LENNAN ZINC & LEAD CO. OKLAHO

Property: a lease on the Commerce Mng. & Royalty Co.'s land ... N. E. end of the town of Commerce. Equipped with concentrator.

Producing since 1914 Production in 1918 came from the old workings ... to 375', which was the deepest mining in the district.

LEONORA MINING CO. OKLAHO

Address: C. Chamberlain, Joplin, Mo.

Property: formerly the Lucky Five mine, 1 mile S. of Picher, ... thoroughly drilled, a shaft sunk, and mill under construction in March, 1919.

LIGHTFOOT O. & M. CO. OKLAHO

Address: William Lightfoot, mgr., Miami, Okla. A mill was ... erected, at last accounts.

LINCOLNVILLE LEAD & ZINC CO. OKLAHO

Address: T. H. Newborn, pres., Miami, Okla.

Property: a lease between Lincolnville and Sunnyside, on which ... siderable drilling has been done, shaft sunk, and mill erected.

LION MINING CO. OKLAHO

Address: Picher, Okla.

Production: about 106 tons of blende (60% metal) per week.

LITTLE JEWEL MINING CO. OKLAHO

Address: Lincolnville, Okla.

Property: the Miami Sunrise, S. E. of Quapaw. Ore is mined ... depth of 85'. The mill contains crusher, rolls, and 6 hand-jigs, and the co... trate shows the ore to carry 15% mineral in equal portions of zinc and lead ... veloping.

LOGAN & CO., W. & H. OKLAHO

Address: F. Sleck, mgr., Picher, Okla.

In August, 1919, the old Coronet mill north of Blue Mound in Kans... to be moved to the mine at Picher.

LONE STAR LEAD & ZINC CO. OKLAHO

Organized with capital of $200,000 by B. C. Clark, Purcell, Okla.; C. A. ... Oklahoma City, and R. I. Tibbs, Maypearl, Texas.

LORANE MINING & ROYALTY CO. OKLAHO

Organized ... 1919, with capital of $40,000, by Ray Thompson, ... Moses, J. T. ... and J. T. Gephart, of Miami, Okla.

LOST TRAIL OKLAHO

Property ... the Commerce M. & Royalty Co., at Commerce. ... New shaft sunk, mill re-...

OKLAHO...

1920

UCKY DOZEN LEAD & ZINC CO. **OKLAHOMA**
Property: N. W. of St. Louis, Okla. Ore was opened at 195' in Octo-:r, 1918, and hand-jigs installed to treat the ore.

UCKY JEM MINING CO. **OKLAHOMA**
Address: W. C. Booman, mgr., Miami, Okla.
A 200-ton mill was planned in 1919.

UCKY JOE MINING CO. **OKLAHOMA**
Address: J. P. Matthews, Quapaw, Okla. Mail unclaimed at Miami in larch, 1919.
A 200-ton mill was erected, at last report.

UCKY KID MINING CO. **OKLAHOMA**
Address: J. G. Marcus, mgr., Tar River, Okla.
Property: at Douthat, has two mills whose normal weekly production 40 tons of blende (60% metal) and 40 tons of galena (80% metal).

UCKY STRIKE LEAD & ZINC CO. **OKLAHOMA**
Address: J. C. Austin, Picher, Okla.
Property: 1 mile E. of Picher, S. of St. Louis. Drill-holes exposed ore, ıafts were sunk, and a 200-ton mill erected. This mill was burned in No-:mber, 1918, and property went into hands of a receiver. In May, 1919, drilling ɔerations were resumed.

UCKY SYNDICATE CO. **OKLAHOMA**
Mill at Douthat was burned in June, 1918, but was, it is said, re-built later year.

AHUTSKA MINING CO. **OKLAHOMA**
Office: 608 Frisco Bldg., Joplin, Mo. J. H. Capelli, mgr.; W. L. Kep-:r, supt. Controlled by R. Y. Ramage interests.
Inc. May 9, 1917, in Oklahoma. **Cap.**, $150,000.
Property: 40 acres at Picher, Okla. **Development:** by 3 shafts, 250' :ep. Ore carries 7% zinc and 3% lead. A feature of the deposit is the occur-nce of rich ore in the caves opened in mining.
Equipment: 500-ton mill, in 70 hours' test run in April, 1919, dressed 300 tons of "dirt", yielding 185 tons of lead and 99 tons of zinc-concentrates. he company is a large producer of both galena and sphalerite concentrate.

ARY ANN MINING CO. **OKLAHOMA**
Address: Box 624, Joplin, Mo.
Officers: A. J. Roth, pres.; R. V. Newton, v. p.; F. H. Kissling, sec.; arl C. Smith, treas., with W. H. Johnson, Clyde Riggs, Ned Cotton, G. O. Fos-r, and George Darsee, directors.
Inc. in Oklahoma. **Cap.**, $350,000; $1 par.
Property: 40 acres near St. Louis, just S. of the Kansas line, on which nc-lead ore occurs in limestone and flint.
Development: by 192' shaft. Extensive drilling was done in 1919 to :ep development ahead of ore extraction and keep the 300-ton mill fully sup-ied.
Production: 240 tons of blende weekly in February, 1920.

AURICE MINING CO. **OKLAHOMA**
Address: Douthat, Okla.
A 300-ton mill was to be put up, at last report.

AURINE MINING CO. **OKLAHOMA**
Address: J. R. Cole, Quapaw, Okla.

AXINE MINING CO. **OKLAHOMA**
Address: W. C. Miller, supt., Tar River, Okla.
Property: a tract S. E. of Picher on which 26 drill-holes showed good at depth of 205', the ore being 35' thick. A 400-ton gas-driven mill was nned, at last report.

CURDY BROS. MINING CO. **OKLAHOMA**
Address: D. McCurdy, supt., Quapaw, Okla.
Property: between Picher and Quapaw. Rich ore was opened, and a -ton mill built in 1918-19.

MEDICAL MINING CO. **OKLAHOMA**

Address: E. S. Lain, pres., or S. B. Bobo, v. p., Baxter Springs, Kan.

Property: 40-acre lease of the Tucker-Jane tract, near the Indian Queen mine, W. of Quapaw. A 250-ton mill was planned in 1918, as drilling in 25 holes had opened good ore.

MELROSE MINING CO. **OKLAHOMA**

Address: Quapaw, Okla.

Property: 1 mile N. of Quapaw. Drilling exposed ore from 138 to 210' deep. One shaft is down 170', part of the way in a soft, black shale. No. 2 shaft is being sunk. Equipped with a 300-ton mill.

METALS MILLING CO. **OKLAHOMA**

Address: Tar River, Okla.

Production is normally 65 tons of blende (60% metal) per week.

MIAMI-ADA MINING CO. **OKLAHOMA**

Address: Quapaw, Okla., but letters returned unclaimed in March, 1919.

Officers: G. M. Ramsay, pres.; J. M. Taylor, v. p.; Orville Sneed, sec.-treas., with J. R. Phagan and Ed. Guin, directors.

Property: a lease near Quapaw; also the Phillips zinc mine near Yellville, Ark. Drills at the former passed through 42' of ore, beginning at 190' depth; while drifts in the Phillips were in ore. A mill was to be erected at each mine, at last accounts.

MIAMI METALS CO. **OKLAHOMA**

Address: W. J. Briggle, mgr., Douthat, Okla., but mail returned in 1919.
J. L. Sadler, supt.

Property: the Southeast Missouri lease at north Picher, to which the Buffalo mill was moved in October, 1918.

MIAMI MINING CO. **OKLAHOMA**

Address: J. P. McNaughton, supt., Miami, Okla.

A 400-ton mill was built in July, 1918.

MIAMI NATIONAL LEAD & ZINC CO. **OKLAHOMA**

Address: H. C. Austin, mgr., Miami; and O. L. Parry, pres., 110 W. Grand St., Oklahoma City, Okla.

Inc. in 1917. **Cap.,** $200,000.

Property: 1,000 acres and an 80-acre millsite in the Miami district. A 200-ton mill at Badger and a 150-ton mill at Peacock were erected in mid-1918.

MIAMI ROYALTY CO. **OKLAHOMA**

Address: Miami, Okla.

A 300-ton mill was planned in 1918.

MIAMI SUNRISE MINING CO. **OKLAHOMA**

Now the Little Jewel Mining Co., which see.

MIAMI VOLUNTEER MINING CO. **OKLAHOMA**

Address: Claude Hollman, supt., Commerce, Okla.

Property: operates on Sarah E. McBee land, near Hockerville, in the Commerce field. **Development:** by winze to depth of 330'; 8% blende and 8% galena ore was opened at depth of 290'. Two mills were operating during first quarter of 1918, and one mill after that period.

MIAMI WONDER MINING CO. **OKLAHOMA**

Address: F. D. Whitney, pres., Picher, Okla.

Property: S. E. of Picher. Rich ore was opened at depth of 208'. A mill erected and shipments made in 1918.

MIAMI ZINC & LEAD CO. **OKLAHOMA**

Address: Miami, Okla.

Property: operates on the Sarah E. McBee land, in Miami district. Workings at a depth of 330' are deepest in the field. Three electrically-driven mills turn out over 200 tons of concentrate per week.

MINT MINING CO. **OKLAHOMA**

Address: Julius Labaup, supt., Miami, Okla.

Property: lease N. of Picher, in which 5 drill-holes showed ore. A 75-ton mill was to be [illegible] 1918.

MIO MINING CO. **OKLAHOMA**
Address: W. J. Briggle, Joplin, Mo.
Property: the W. F. White mine and flotation mill at Picher, taken over in July, 1919.

MISSOURI MULE MINING CO. **OKLAHOMA**
Address: Ed. Standefer, Picher, Okla.
Developing and producing at last account.

MOGUL MINING CO. **OKLAHOMA**
Address: A. E. Dunlap, mgr., Miami, Okla.
Cap., $250,000.
Property: a 20-acre lease E. of Picher; also operates west of the town. Drilling exposed from 4 to 51% ore, at 180′ and 212′ depth, and a shaft was sunk late in 1918. Hand-jigs were formerly used to dress the ore, but a new mill was started in November, 1919. In 1920 the output exceeds 30 tons of blende per week.

MONTREAL MINING CO. **OKLAHOMA**
Address: C. F. Dike, mgr., Douthat, Okla.
A partnership operating a mine S. of the Kansouri mine, which is in the Treece district, Kansas. The weekly output in 1918 was 330 tons of blende, 60% metal, and the same early in 1920. This mine was the largest shipper of phalerite in the district.

MOUNT NEBO LEAD & ZINC CO. **OKLAHOMA**
Address: J. E. Turner, mgr., Peoria, Okla.
Development: 3 shafts open ore at a depth of 130′ to 176′. A 200-ton mill erected in 1918, includes 100 h. p. steam engine for mill, 80 h. p. engine for compressor, crusher, 4 sets of rolls, 3 jigs, and 5 tables.

MUSKOGEE LEAD & ZINC CO. **OKLAHOMA**
Address: J. C. Isbell, mgr., Quapaw, Okla.
Property: 60 acres, just W. of Quapaw. Ore was encountered at 165′ and 180′, but water was so troublesome that company joined with the Imperial Development, St. Louis, and Big Three companies to drain the ground. A 10″ Texas pump is working in the Muskogee, while the Imperial also has one besides two 12″ and one 14″ Pomona pumps. The Muskogee shaft was cemented, and a depth of 200′ attained. A mill was planned.

NEVER SWEAT MINING CO. **OKLAHOMA**
Address: Miami, Okla.

NEW CHICAGO MINE **OKLAHOMA**
Address: A. M. Gaines, Tar River, or Picher, Okla.
Mine is completely equipped and a good producer.

NEW STATE MINING CO. **OKLAHOMA**
Address: Homer Seals & Co., Commerce, Okla., or Joplin, Mo.
Property: operates the New State mine on McBee land at Commerce. [illegible] and sphlarerite ores are reported mined at the 110′ level and treated in [illegible]-ton mill.

NIANGUA MINING CO. **OKLAHOMA**
Address: Ray Munson, mgr., Picher, Okla.
Officers: E. S. Warner, pres.; R. W. Smith, v. p.; W. S. O'Bannon, sec.-treas.
Cap., $100,000. Company has no debt. Work in 1918 was principally development and construction, but since mill was placed in operation in February, 1919, earnings have been $8,000 per month.
Property: lease of 20 acres on Tar River, midway between Picher and Cardin. The royalty is 17½%. In August, 1919, the M. & M. mine was acquired at a cost of $150,000.
Geology: orebodies lie on three levels—145′, 179′, and 200′. At 149′ level ore is all lead; at 170′ horizon, ore is mixed lead and zinc, the latter predominating; and on the 200′ level ore is 75% lead. About 30% of the ore is of disseminated type in flint and lime-breccia; remainder is lump ore in broken flint. Ore now being milled assays 6.5% lead and 4% zinc.
Development: 2 shafts to 200′ level, all ore now being hoisted from [illegible] level

Equipment: mill treats 250 tons, in 10 hours. It includes a 500-ton ore bin, 18-in. crusher, 42-in. rolls, with 36 in. return rolls, 2 rougher Colley type jigs, one cleaner and one sand jig, same type, one 36 in. high-speed rolls for re-crushing, and 10 tables. The recovery is 82%.

Power furnished by 150- h. p. gas engine; hoist and drills are operated by air furnished by three 400 cu. ft. gas-driven compressors.

Production: 110 tons of blende per week.

OHIMO MINING CO. **OKLAHOMA**

Address: Lindsey Allington, Miami, Okla.

Property: a tract northwest of Picher.

Development: by 2 shafts. Crude ore is mined at level between 220' and 265', the ore is concentrated in a 250-ton mill built in 1918, with a recovery of 10% as concentrates. The weekly output is over 100 tons of blende.

OKLAHOMA WOODCHUCK ZINC LEAD CO. **OKLAHOMA**

Office: 25 Broad St., New York, N. Y.

Officers: C. C. Burger, pres.; R. M. Atwater, Jr., v. p.; L. E. Whicher, treas., with D. T. Rosen and Herman Aaron, directors. H. Pelz, sec.; H. I. Young, mgr., Mascot, Tenn.

Inc. May 5, 1915, in Delaware. **Cap.**, $1,000.000; $10 par; all outstanding. Notes authorized and outstanding, $250,000.

Company received from ore sales, $367,971; operating expenses for year ended April 30, 1919, totaled $258,324; net income was $84,470, which was charged against depreciation and depletion.

Property: leases just east of the Meridian mine, Tar River, Ottawa county. Mine contains a chamber deposit of zinc and lead sulphides, assaying 10 to 30% zinc and 3 to 10% lead. A peculiarity of the mine is the exudation of tarry matter from the rock.

Development: by shafts to a depth of 250'. **Equipment:** includes a 500-ton mill with flotation unit.

Production: 1917, 8,001,400 lb. zinc, and 5,588,200 lb. lead; 1918, 15,267,400 lb. zinc, and 1,079,100 lb. lead. Concentrates for 1918, averaged $50.20 zinc and $68.82 lead per ton. In February, 1920, the weekly output was 130 tons of blende.

OKLA LEAD & ZINC CO. **OKLAHOMA**

Address: T. P. Lennan, Tar River, Okla.

OKO LEAD & ZINC CO. **OKLAHOMA**

Address: John Reno, Century, Okla.

Property: the Southland mine at North Century, lease formerly held by the Dallas Picher Lead & Zinc Co., but forfeited for non-working. The Lennan mill at Commerce was moved to the mine, and was yielding over 40 tons of blende weekly in 1920.

OLD RELIABLE MINING CO. **OKLAHOMA**

Address: V. E. Conkle, Tar River, Okla.

Developed and small shipments made in 1918.

OMAHA LEAD & ZINC CO. **OKLAHOMA**

Address: care A. E. Bowers, Lincolnville, Okla.

ONTARIO SMELTING CO. **OKLAHOMA**

Address: C. V. Jones, pres. and mgr., Joplin, Mo.

A lead smelter, at Hockerville, in the Oklahoma section of the Tri-State region. Plant has been working since March 15, 1918. It consists of baghouse, motor-room, and furnace-room, all of brick, concrete, and steel; also a refinery of frame construction. Five Newman furnaces have a capacity of 1,600 tons of "Ontario" lead per month.

OTTAWA METAL CO. **OKLAHOMA**

Address: Picher, Okla.

A 175-ton mill was planned in 1918.

OZARK LEAD & ZINC CO. **OKLAHOMA**

Address: St. Louis, Okla.

Report [illegible] was put up a year before any development was done, and the lit[illegible] done up to July, 1919, failed to find ore.

'ALATIVE LEAD & ZINC CO. **OKLAHOMA**
Address: E. L. Warner, mgr., Peoria, Okla.
A 250-ton mill planned at last accounts.

'ICHER-OKLAHOMA MINING CO. **OKLAHOMA**
Address: R. P. McReynolds, mgr., Picher, Okla.
A mill was purchased and erected on a lease S. of the Golden Rod mine in une, 1918.

'IOKEE MINING CO. **OKLAHOMA**
Address: Picher, Okla. Operates a lease on Eagle Picher Lead Co. and.
The normal production is 40 tons of blende (60% metal) per week.

'IONEER LEAD & ZINC CO. **OKLAHOMA**
Address: Harry G. Larsh, Commerce, Okla.
Officers: Harry Larsh, pres. and mgr.; J. L. Wilken, treas.; S. P. .arsh, sec.; C. M. Britt, supt.
Property: a 40-acre lease near the Bluebird mine of the Bilharz company, in Tar River area. Drilling opened 15 to 42% ore.
Equipment: a mill was erected in 1918, and mine has been a steady producer. In June, 1919, there was 2,000 tons of concentrate on hand. In 'ebruary, 1920, the weekly output was over 40 tons.

'ITTSBURG-MIAMI LEAD & ZINC CO. **OKLAHOMA**
Address: C. C. Whittier, Picher, Okla.
The 500-ton mill was burned in February, 1920, but is being re-built.

'ORTLAND LEAD & ZINC CO. **OKLAHOMA**
Company has a lease near St. Louis, Okla., on which it sank a shaft that cut ıe orebed at 131'. At last report company expected to put up a mill.

'OTOSI ZINC CO. **OKLAHOMA**
Address: F. E. Blunt, Picher, Okla.

'RAIRIE LEAD & ZINC CO. **OKLAHOMA**
Address: Commerce, Okla.
Officers: C. O. Bedwell, pres.; Lester Eads, sec.-treas.; C. G. Giles, ıpt.
Property: a tract E. of Quapaw, on which at depth of 81', a drift shows re to be 18' thick for a distance of 300' and drill holes show the ore horizon to ary between 62' and 112' below the surface. The 150-ton mill on the Crescent ase, E. of Quapaw, had a 3,000 ton dump to treat while mine development was nderway.

REMIER ZINC CO. **OKLAHOMA**
Address: A. M. Gaines, Tar River, Okla.
Property: a lease on Tri-State company ground on South Main street, icher; said to be one of the richest tracts in the district.
Development: drilling revealed ore at 193' to 230' depth. Caves of ch ore are found frequently. Two shafts were sunk.
Production: in August, 1918, 11,150 tons of ore hoisted in twenty-five)-hour shifts yielded 520 tons of zinc and 385 tons of lead concentrates. In the rst half of 1919 the output was 5,502 tons of blende and 1,471 tons of galena. egular dividends are paid.

RODUCERS LEAD & ZINC CO. **OKLAHOMA**
Address: George Brown, mgr., Picher, Okla.
Officers: F. W. Hemme, pres.; A. C. Black, v. p.; I. G. Conkling, sec.-eas.
Dividends amount to $35,000.
Property: leases in the Picher district. Shafts were sunk to open 6 ' 30% ore found by drills, and a 300-ton mill erected. A recovery of 7% lead ıd zinc is made.

RUDENTIAL MINERAL CO. **OKLAHOMA**
Address: St. Louis, Okla.
A 250-ton mill was planned at last report.

UAPAW JACK LEAD & ZINC CO. **OKLAHOMA**
Address: B. W. Ward, Quapaw, Okla., supt. in 1918. In July, 1918,

company built a 200-ton mill and small shipments were made, but the slump in prices closed this and many other small plants at the time the armistice was signed.

QUAPAW MINING CO. **OKLAHOMA**

Address: Quapaw, Okla.

Property: an 80-acre lease near Lincolnville station, S. of Quapaw. Royalty paid the land-owners is 5%.

Development: drilling revealed a deposit 20′ thick at depth of 100′. A 250-ton mill was to be built, at last accounts.

QUEBEC MINING CO. **OKLAHOMA**

Address: Tom Shelton, mgr., Douthat, Okla.

Mining and milling with production of lead and zinc concentrates began in September, 1918. In February, 1920, the weekly output was over 40 tons.

QUEEN CITY MINING CO. **OKLAHOMA**

Address: Commerce, Okla.

RAINBOW LEAD & ZINC CO. **OKLAHOMA**

Address: Ed. Dunkin, Quapaw, Okla.

Officers: F. E. Herring, pres.; O. D. Halsell, v. p.; R. H. Drennan, sec.-treas.

Inc. in Oklahoma. **Cap.,** $100,000.

Property: E. of Picher and N. W. of Quapaw. Ore is found at 160′ depth, and is from 20′ to 35′ thick. A 300-ton mill was built.

RAMAGE MINING CO. **OKLAHOMA**

Address: John Capelli, Douthat, Okla.

Operates a mine and a 250-ton mill in which flotation was tried in 1918. Weekly production averages 90 tons of blende, 60% metal, when operating normally.

RED EAGLE MINING CO. **OKLAHOMA**

Address: Ira D. Guthrie, mgr., Baxter Springs, Kan.

Property: 40-acre lease at Sunnyside, S. E. of Baxter and E. of Quapaw. Lead ore extends from depth of 70 to 80′, and zinc ore from 80 to 92′. A 100-ton mill was erected, whose operation showed the ore to average 10% blende and galena.

RED GRANITE COPPER & WATER POWER CO. **OKLAHOMA**

Address: W. E. Hudson, mgr., Tulsa, Okla.

Property: a lease near Spavinaw, Mayer county, Okla. While prospecting for zinc a pyrite deposit was found, at depth of 20′, assaying 52% sulphur. A mill costing $25,000 was to be built, at last report.

RED ROSE MINING CO. **OKLAHOMA**

Address: W. D. Adkins, Quapaw, Okla.

A 200-ton mill was erected in 1918.

RED SKIN MINING CO. **OKLAHOMA**

Address: Harry Myers, Picher, Okla.

REPUBLIC MINING CO. **OKLAHOMA**

Address: W. J. Scafe, mgr., Joplin, Mo.

Officers: W. H. Langford, pres.; F. J. Huttig, v. p.; F. Huttig, sec.

Cap., $250,000.

Property: a lease on the Wright land near Tar River, Okla. Two shafts are in rich ore to 224′ depth. A 250-ton mill is operating.

RICH STRIKE MINE **OKLAHOMA**

Address: A. O. Baker, supt., Quapaw, Okla.

Reported drilling, shaft sinking, and a mill erected in 1918.

ROYAL MINE **OKLAHOMA**

Address: Picher, Okla.

Operated intermittently. Normal production 60 tons zinc ore weekly.

SAFEGUARD MINING CO. **OKLAHOMA**

Address: Commerce, Okla.

A 200-ton mill was planned at last report.

ST. JOSEPH MINING CO. **OKLAHOMA**

Address: E. F. McClellan, Box 564, Picher, Okla. Operates a lease on land of Eagle Picher Lead Co. Weekly output is 70 tons of blende.

ST. LOUIS LEAD & ZINC CO. **OKLAHOMA**

Address: George Lumick, supt., Quapaw, Okla.

Property: S. W. of Quapaw. Drilling has proved ore and shafts have been sunk. The mill near Quapaw was moved to the Jefferson mine south of St. Louis, Okla., late in 1918. Gas-driven compressors are at work.

ST. LOUIS SMELTING & REFINING CO. **OKLAHOMA**

Subsidiary of National Lead Co., and of St. Louis Smelting & Refining Works of National Lead Co., a branch of National Lead Co.

Address: J. A. Caselton, 2nd v. p., 722 Chestnut St., St. Louis, Mo.; and C. E. Schwarz, supt., Miami, Okla.

Property: 160 acres of leased property at St. Louis, Okla., on which two 400-ton modern mills are erected. Also 1,240 acres of partly developed ground about 3 miles E. of St Louis, Okla.

More than half of all the crude ore mined in the territory E. of Picher was treated in the mills of this company, which are regarded as the best in the district. Ore was hoisted from 4 shafts from levels between 232 and 245'.

Production: over 600 tons of blende weekly early in 1920.

SAMBO MINE **OKLAHOMA**

Address: Walter Peltier, Lincolnville, Okla.

Reported purchased in August, 1918, by C. H. and W. S. East, of Lima, Ohio, and Walter Peltier, of Miami, Okla.

Property: 40 acres of land and a mill adjoining Nemo and Moran properties at Lincolnville. Mine has 5% ore, between 75' and 100' levels. Mill enlarged to 500 tons daily and shipments made.

SANTA FE MINING CO. **OKLAHOMA**

Address: A. J. Davidson, mgr., Hockerville, Okla.

Operates a 400-ton mill, driven by 15, 37½, 50, and 100 h. p. oil engines; operations show a recovery of 10% zinc and lead. Weekly output is about 50 tons of concentrate.

SCOTT EAGLE MINING CO. **OKLAHOMA**

Address: Commerce, Okla.

SILVER CROWN MINING CO. **OKLAHOMA**

Address: J. W. Thomas, supt., Peoria, Okla.

Company took over and was drilling the Gebo mine, at last accounts.

SILVER FOX LEAD & ZINC CO. **OKLAHOMA**

Address: Frank Childers, Picher, Okla.

SINDEN ZINC CO. **OKLAHOMA**

Address: W. B. Shackelford, Tar River, Okla.

SKELTON MINING CO. **OKLAHOMA**

Address: Frank Childress, mgr., Douthat, Okla.

Property: 3 mines at Douthat, and 2 at Tar River, with 7 mills.

Production: the mills dress about 1,000 tons of ore per shift. Company is second largest producer in Oklahoma.

The total weekly output was 750 tons in February, 1920.

SOUTHEAST MISSOURI MINING CORP. **OKLAHOMA**

Address: O. C. Whitener, pres., Picher, Okla.

In 1918, two shafts were sunk, to open a 35' face of ore exposed by drills at depth of 185', and a 300-ton mill erected.

SPELTER MINING CO. **OKLAHOMA**

Address: J. J. Gurlach, Quapaw, Okla.

Cap., $150,000.

Property: a lease on Abrams' land E. of Quapaw. Eight drill-holes found ore, one lot assaying 38%. A 200-ton mill was planned before the metal market broke in 1919.

STANDARD ZINC LEAD MINING CO. **OKLAHOMA**

Office: 314 Frisco Bldg., Joplin, Mo. J. F. Haley, gen. mgr.

Property: at Tar River, Okla.

Development: two 220' shafts were sunk during 1918-19, opening a thickness of 30' of unusually rich ore of indefinite length. High-grade lead ore has

also been developed from which a concentrate is made that assays up to 85% Pb.

Equipment: a 300-ton mill, completed in Feb., 1919, and operating regularly since.

Production: 33 tons of blende and 44 tons of lead per week early in 1919.

TAR RIVER MINING CO. OKLAHOMA

Address: W. C. Miller, Douthat, Okla.

TEXAS MINING CO. OKLAHOMA

Address: given as care of T. P. Turner, mgr., Picher, Okla., but mail sent there was returned.

Property: 2 miles E. of Picher. Rich ore—20 to 30% blende—was opened at 176' depth, and a mill erected in 1918. Water has hampered development. Weekly output is over 40 tons of blende.

TIGER LEAD & ZINC CO. OKLAHOMA

Reorganized as Desperation Co., q. v.

TRIANGLE MINES CO. OKLAHOMA

Address: Commerce, Okla.

Officers: N. C. Barry, pres.; E. H. Hoffman, v. p.; K. N. Sween, treas.; J. D. Bomford, sec.-mgr., with A. E. Turner, directors.

Property: near Commerce. Two shafts were sunk and a 300-ton mill erected in 1918. Oil engines are used to generate power.

TRI-STATE COMPANY OKLAHOMA

Address: Picher, Okla.

Company has over 1,000 acres under lease in Oklahoma. Two mills, the Premier and Blue Bonnet, are at work.

TULSA-SAPULPA-MIAMI ASS'D MINES CO. OKLAHOMA

Address: H. R. McCreary, sec., Tulsa, Okla.

Property: leases around Wyandotte, S. W. of Miami, Okla. Drilling was completed and shaft sinking started in June, 1918. A 200-ton mill was to be built, at last report.

UNDERWRITERS LAND CO. OKLAHOMA

Address: Box A-32, Picher, Okla.

Officers: Geo. H. Worthington, pres.; Andrew Squire, v. p.; Alvin Good, sec.-treas., with Warren S. Hayden, F. N. Bendelari, A. E. Bendelari, Harry W. Davis, directors. F. N. Bendelari, mgr.

Inc. 1901, in Delaware. **Cap.,** $1,000,000; $1 par; all outstanding. Annual meeting in February. No bond issues. Transfer office, 1015 Hippodrome Bldg., Cleveland, Ohio; registrar, the Citizens Savings & Trust Co., Cleveland, Ohio.

Dividends: 6% in 1917; 13% in 1918.

Property: 208 acres owned in fee in Jasper county, Mo., and 160 acres under lease in Ottawa county, Okla.; also lease on 40 acres of the Poffis land south of the Underwriters No. 1, drilled by 43 holes.

Development: the workings at No. 1 mine at Commerce are at a depth of 160'; those of No. 2 mine at Picher, 235'; and of No. 3 mine at Douthat, 240'. At Commerce, in No. 1 mine, mineralization is along lines of brecciated rock, or "water-courses," forming a series of lodes separated by barren intervals, 8' to 30' wide. Vugs of rich blende and galena ore are often encountered.

Equipment: includes mills at each of the three mines. The concentrates carry 62% Zn. and 82% Pb. A fourth mill was planned for No. 4 shaft in August, 1919.

Production: normal output over 500 tons of zinc concentrate weekly. This company is the second largest zinc producer of the Miami field. The Underwriter No. 2 and No. 3 mines opened in the Whitebird land in 1918, yielding rich ore at levels 230 to 246' below the surface. The mills have flotation units and handle 550 tons daily of the ore yielding 12% in high-grade concentrate.

UNITED STATES SMELTING CO. OKLAHOMA

Address: U. S. S. R. & M. Co., 120 Broadway, New York; or P. O. Box, Tar River, Okla.

Property: a mine [illegible] opened in 1916 in the Rifle [illegible]

near Cardin. Drilling cut good ore from 280 to 312' depth. The Ravens-nill was moved from Joplin, Mo., to this mine. Developments in 1917 and ere favorable.

oduction: in 1918, the weekly output was about 300 tons of blende metal).

mpany also owns a zinc smelter at Checotah, Okla., acquired in 1916. It ıtural gas for fuel, but failure of the supply resulted in its being shut down e, 1918.

'AGE MINING CO. **OKLAHOMA**

ldress: R. B. Sharp, Tar River, Okla.

operty: operates on land of Eagle Picher Lead Co., in Picher dis-roducing 30 tons of blende weekly, early in 1920.

E MINES CORPORATION **OKLAHOMA**

ldress: Frisco Bldg., Joplin, Mo., or Frank Weeks, Tar River, Okla.

mpany operates the Lion and Panther mines, both producing in 1918, and

OR MINING CO. **OKLAHOMA**

ldress: Picher, Okla.

erates a lease on Eagle Picher Lead Co. ground.

ORY MINING CO. **OKLAHOMA**

ldress: A. E. Bendelari, Picher, Okla. W. N. Corbett, supt. A part-).

operty: a 20-acre lease, 1 mile E. of Picher, developed by 250' shaft. ents, over 40 tons weekly in 1920.

KER MINING CO. **OKLAHOMA**

ldress: Miami, Okla.

KER MINING & DEVELOPMENT CO. **OKLAHOMA**

ldress: Dr. C. V. Warner, Picher, Okla.

BABY LEAD & ZINC CO. **OKLAHOMA**

ldress: Seneca, Mo.

fficers: J. E. Morse, pres.; C. T. Jobes, v. p. and mgr.; C. J. Twohy, as., also directors. F. C. Reutledge, supt.

c. Nov., 1917, in Oklahoma. **Cap.,** $100,000; $1 par; all issued. Trans-ice, 616 Security Bldg., Oklahoma City. Annual meeting, third Tuesday ember.

operty: 2 leases in Peoria district, Ottawa county, Okla. The de-s a blanket conglomerate in limestone, the ore assaying 4% lead and 8%

evelopment: by 117 and 127' shafts, and 300' drift. Mining is by un-ıd and bench stoping.

quipment: 22-h. p. hoist, pump, etc. Figures as to ore reserves, pro-n, and financial results are confidential.

D MINING & MILLING CO. **OKLAHOMA**

ldress: W. F. Fox, Lincolnville, Okla.

AHACHIE MINING CO. **OKLAHOMA**

ddress: Alfred Hunsicker, Lincolnville, Okla.

oduction in 1920, over 30 tons per week.

VER MINING CO. **OKLAHOMA**

ddress: Commerce, Okla.

CH MINING CO. **OKLAHOMA**

ddress: Miami, Okla.

VIRGINIA LEAD & ZINC CO. **OKLAHOMA**

ddress: Parkersburg, W. Va.

c. May, 1918, by Chas. Heinselman, A. D. Sees, A. A. Haught, and H. d

operty: at Sunnyside, adjoining the Lead Boy, in the Quapaw dis-Drill holes said to show good ore, and a mill is to be built.

TE BIRD MINING CO. **OKLAHOMA**

ddress: T. Stoars, Picher, Okla.

roduction: 430 tons of blende per week early in 1920.

WHITE MINING CO.; WM. FOSTER OKLAHO

Address: Picher, Okla.

Operates a lease on land of Eagle Picher Lead Co.

WINGFIELD MINING CO. OKLAHO

Office: Webb City, Mo. Charles T. Orr, pres. and gen. mgr., Jo Millar, treas.

Operated in conjunction with Athletic Mining & S. Co. and Bertha A ing Co.

Property: at Quapaw, Okla., carries high-grade zinc ore, and 1,200-ton mill (per 24 hours). See above named companies.

WOLFTON MINING CO. OKLAHO

Address: Henry Gneissing, supt., Picher, Okla.

Cap., $200,000. Company had a 60-acre lease on the Whitebird le of Picher, and planned to erect two 500-ton mills.

ZINC LEAD CORPORATION OKLAHO

Address: C. C. Whittier, Picher, Okla.

Erected a concentrating plant in 1918 and regular shipments being ma

OREGON

Oregon is not a great metal-producing State, possibly because its districts are as yet but slightly developed, owing largely to inadequate tran tion facilities. Most of the mines are in Baker county, whose ore deposi 90% of the gold and most of the other metals mined in the State. Durin copper production increased 500,000 lb. to 2,935,000 lb., while gold decrea $200,000 to $1,270,000.

A preliminary estimate of the metal production in 1919, made by C G. Yale, of the U. S. Geological Survey, shows a decrease in the gold an produced, but an increase in the silver and copper. The output of gold was $1,270,465 and the estimated output in 1919 is $1,072,661, a decrease of $197,804. The output of silver in 1918 was 107,323 fine ounces, valued at $1 in 1919 it was 211,523 fine ounces, valued at $234,790. The output of co 1918 was 2,451,016 pounds, valued at $605,401; in 1919 it was 2,638,714 p valued at $501,355, an increase in quantity of 187,698 pounds and a decre value of $104,046. The output of lead in 1918 was 10,601 pounds, valued at the output in 1919 was 2,000 pounds, valued at $114, a decrease in quan 8,601 pounds and in value of $639.

There are only about a hundred producing metal mines in Oregon a of these produce 80 per cent. of the total output of all the metals mined State, and one of them produces 25 per cent. of the total value of the meta duced. These six mines are those of the Baker Mines Co., Cornucopia Co., Homestead-Iron Dyke Co., and the Commercial Mining Co., all in county, and the Queen of Bronze Mining Co., in Josephine county. The placer mine in this group is the Powder River Gold Dredging Co.

The larger copper companies of the State show some increase in outpu ing the year, notwithstanding unfavorable conditions. Though less co been produced in Oregon during the last two years than in 1917, the av value of all the metals mined and treated has increased about 90 cents pe

The mines are described under the names of the individuals or corpora owning them, given in alphabetical sequence.

ALICE MINE OREG

Owner: Gustav Pinson, Prairie City, Ore.

Property: 2 claims, near Prairie City, Grant county; said to show lar deposits of soft gold-silver ore in fissure vein. Orebody dips 50° E.

Development: by 180′ tunnel.

ALMEDA MINES CO. OREG

Offices: 1014 Board of Trade, Portland, Ore., and Opera House Grants Pass, Ore.

)fficers: S. C. Spencer, pres.; L. E. Crouch, 1st v. p.; Nat P. Ellis, 2nd H. E. Thurman, sec.; C. M. Huddle, treas.
nc. July 28, 1916, in Oregon. **Cap.**, $3,500,000; shares $1 par; 3,000,000 s common, 500,000 shares preferred. Successor to Almeda Consolidated ; Co. Annual meeting, second Tuesday in April.
Property: 17 lode claims, 340 acres, also 500 acres placer ground, in hine county, about 26 miles from Grants Pass, and 17 miles from Merlin, st railway station on the Southern Pacific, with daily stage line to Almeda. s include a 200-acre town site.
'he quartz claims are in three groups known as the Almeda, on the north)f the river and the Rocky Gulch and Rand groups on the south side of ver.
'he Almeda group consists of 3 claims developed by 5 tunnels and a 535' with about 2 miles of underground workings. Orebody estimated by the gement to show approximately 2,000,000 tons blocked out for production.
:onsiderable development work has been done on the Rocky Gulch and groups by tunnels and crosscuts. The main vein is said to be 10' to 20' on the slate hanging wall, ore being strongly auriferous and slightly argen- us chalcopyrite. Paralleling the main vein is a body of low-grade ore 30' wide, highly silicious, mainly chalcopyrite with occasional bornite, giving ise of greater values at increased depth.
Equipment: consists of a 100-ton blast furnace for matting, distillate es to develop 225 h. p., compressors, motors, boilers, complete laboratory ll necessary buildings. The 17-mile mountain road from Merlin to the mine good condition and motor trucks operate over it the entire year.
'he mines are not being operated owing to litigation between factions of the holders and the directorate.

LGAMATED MINES CO. **OREGON**
)ffice: Baker, Ore.
)fficers: W. F. Downie, pres.; W. Burnham, sec.; G. J. Burnham, treas.
:ap., $1,000,000; $1 par; 800,000 issued.
Property: 21 quartz claims in Eagle Creek district, Baker county. De- ing.

:RICAN ALMADEN QUICKSILVER & GOLD MINING CO.
.ast address: 100½ Fourth St., Portland, Ore.
)fficers: W. B. McKinney, pres., E. N. Wheeler, sec.-treas.
:ap., $1,500,000; $1 par; all issued.
Property: 3 claims in Sec. 20, T. 14 S., R. 20 E., 11 miles from Howard, : Ochoco district, Crook county, developed by tunnels. Ore contains cinna- altered andesite.

:RICAN EXPLORATION CO. **OREGON**
Address: John Hampshire, pres., Grants Pass, Ore.
nc. 1916, in Oregon. **Cap.**, $1,000,000.
Reported to have bought the Queen of Bronze mine in 1916, formerly owned e Takilma Sm. Co., and the Waldo copper mine, in September, 1917, for 00.
:ompany dissolved, 1918, and holdings taken over by the John Hampshire which see.

:ER MINES CO. **OREGON**
)escribed in Vol. XIII. Operated a lease on the Last Chance mine of the ucopia Mines Co., which see.

D MOUNTAIN MINING CO. **OREGON**
Address: Geo. N. Putnam, pres., 35 Congress St., Boston, Mass.
nc. March, 1916. **Cap.**, $100,000.
Property: Bald Mountain mine, on the N. E. extension of the Ibex vein, :acker Creek district, Baker county; reported consolidated with the Ibex which see.

HARRISON MINE **OREGON**
Property: 10 claims, 7,000' above sea level, in Grant county, 23 miles by

road west of Whitney, and 28 miles by road from Sumpter, the nearest rail stations.

Ore: occurs in the Ben Harrison vein, strike N. 3° E., dip [illegible] which varies in width from 18" to 21', with an average stoping width [illegible] opened, of 77". The vein is a brecciated replacement in granodiorite. Ore erals are pyrite, stibnite, chalcopyrite, sphalerite, pyrargyrite, and stephanite gold of about equal value to the silver in the ore.

Development: by adits, the lowest at the 600' level. Several hun feet of drifting has been done on the various levels and in 1915 there was to be above the 500' level, 87,000 tons of ore blocked out on 3 sides, with an av value of $10 per ton.

Equipment: includes 20-stamp mill, tube mill, classifiers, vanners, flotation unit.

See Mineral Res. of Ore. Vol. 1. No. 4, p. 29.

Operated under option, 1917-18, by E. H. Dewey, Nampa, Ida., but option linquished, April, 1918, after expenditure of $50,000. Several cars of gold ore were sent to smelter during 1919.

BLACK BUTTE QUICKSILVER MINING CO. ORE

Office: New York Block, Seattle, Wash.

Officers: John N. Powell, pres.; Marion T. Edwards, sec.; W. B. Mc Carlton, Oregon, managing agent.

Inc. in Washington. **Cap.**, $5,000,000; shares $100 par; fully issued.

Property: 1,040 acres, patented, in Sec. 16, 17, 9, 8, T. 23 S., R. 3W., county, Ore., about 17 miles by wagon road from Cottage Grove, said to a low-grade cinnabar deposit. Developed to depth of 900'.

Equipment: includes a 40-ton retort. Production not reported. 30 men employed at last accounts.

BLUE BIRD MINING CO. ORE

Office: 67 N. Third St., Portland, Ore.

Officers: at last accounts, S. M. Carter, Blue River, Ore., pres.; F. Brooke, sec.; C. Marco, treas.

Cap., $100,000; $1 par; fully issued.

Property: Blue Bird mine, 7 unpatented claims, in Sec. 28, T. [illegible] 4. E., 6 miles from Blue River, Linn county, said to carry a deposit of ore, containing gold and silver values and some iron pyrite. Developed and 220' tunnels and several crosscuts. Is a prospect.

BLUE MOUNTAIN MINING CO. ORE

Office: C. L. Arzeno, pres., gen. mgr., 9 E. Fifth St., Covington. **Mine office:** Sumpter, Baker county, Ore.

Inc. in Arizona. **Cap.**, $2,000,000; $1 par; 1,373,999 issued. Also $50,000 6% bonds; $47,500 outstanding. **Annual meeting fourth Friday** In May, 1919, the Imperial Eagle M. Co. was organized to liquidate the standing bonds and other indebtedness of the Blue Mountain company eventually take over its holdings.

Fully described in Volume XIII.

BLUE RIBBON MINES GROUP ORE

Y. B. Tardiff, owner, Pendleton, Ore.

Property: 4 unpatented claims, 1 mile E. of the Buffalo-Monitor in Granite district, Grant county, said to carry 4' quartz vein in slate and the ore assaying $18 per ton in gold and silver.

Development: by 1,030' tunnel and 1,635' of drifts with 500 tons reported blocked out. Expended $1,200 in 1918.

BOLEN CREEK MINING CO. ORE

Address: P. J. Neff, Medford, Ore.

Inc. Nov., 1919, in Arizona. **Cap.**, $150,000.

Property: a gold placer on Sucker creek, in Holland district of [illegible] county, 30 miles W. of Medford. Mine is fully equipped.

BOULDER CREEK GOLD MINING CO. ORE

[illegible] from former office: 80 Sixtieth St., Portland, Ore.

Officers: R. D. Hewitt, pres., Agness, Ore.; John Gardner, sec.-treas.
Cap., $25,000; $100 par; $21,076 outstanding.
Property: an extensive bar known as the Star group of mining claims, about 240 acres in Sec. 25, T. 34, R. 13 W., Ophir district, Curry county, on which $4,800 has been spent in the following improvements: 4,800′ ditch, sawmill, dam, 1,000′ of piping and 800′ pipe giant. Results of operations not reported.

BRADEN MINE **OREGON**

Operated by C. R. Ray, of Medford, Ore., at last accounts.
Property: S. E. ¼ section 27, T. 36 S., R. 3 W., 3 miles from Gold Hill Jackson county, opened up about 30 years ago. Largest production for any one year was $30,000 in 1907.
Ore: gold in 2′ vein, strike N. 30° E., dip 25° S. E. Vein filling is quartz and sulphides. Ore assays about $9 gold per ton.
Development: several thousand feet of drift tunnels, longest over 1,200′.
For geology, see U. S. G. S., Bull. 546, p. 39.

BRIGHT CARBONATE MINING CO. **OREGON**

Office: 118 East Webb St., Pendleton, Ore. Geo. Darveau, pres.; John Seibert, sec.-treas.
Cap., $60,000; par $1; all outstanding.
Property: 3 claims in the Greenhorn range, Grant county, at an elevation of 7,250′, is reported to carry a quartz vein in granodiorite, containing mainly gold and silver values. Mine but slightly developed and still in the prospect stage.

BUFFALO MONITOR MINE **OREGON**

Operated under lease by Wm. Narkaus, at last accounts. Mine, about 5 miles from Granite, in Grant county, reported to have 3 veins, carrying pyrite, chalcopyrite, tetrahedrite, galena and stibnite; the main or Monitor vein is said to be 50′ wide. Production to date amounts to $75,000. The lessee installed compressor and air drills.

BURNT RIVER DREDGING CO. **OREGON**

Address: 506 Oregonian Bldg., Portland, Ore. O. E. Tisch, pres.; D. L. Wallace, sec.-treas.
Cap., $250,000; par $1; 39,125 outstanding.
Property: 680 acres, known as the Pomeroy dredging ground, 8 miles S. of Durkee in Baker county.

CANYON MOUNTAIN MINING CO. **OREGON**

Address: Jackson Chambers, pres., Canyon City, Ore.
Cap., $1,000,000; $1 par; 876,392 issued.
Property: Mountain View mine, 1¼ miles S. E. of Canyon City, Josephine county, said to carry free milling gold.
Development: by 500′ tunnel. Inactive since 1914.

CHETKO COPPER CO. **OREGON**

Idle. **Office:** Ashland, Ore. Mine near Kerby, Josephine county, Ore.
Officers: C. W. Evans, pres and gen. mgr.; C. C. Hicks, v. p. and supt.; C. E. Shepard, sec.-treas.; Theo. R. Heintz, mgr.
Inc. Aug. 10, 1905, in Arizona. **Cap.,** $1,000,000; $1 par; issued, 730,516.
Property: 36 claims, 720 acres, fairly timbered, and 2 water rights, in Curry county, about 70 miles from Grant's Pass, the nearest railroad point. Said to show 8 orebodies, one reported by company as of 240′ average width, accessible 1¼ miles, carrying native copper in schist, also covellite, bornite and chalcopyrite, of 9% average copper tenor, with $4.75 gold per ton.
Development: by shafts of 45′, 34′ and 80′, and by 6 tunnels, of 30 to 0′ length, with 969′ of workings, estimated by company to show 600,000 tons of ore, with 115,000 tons blocked out for stoping, which figures are regarded as excessive. Closed down, 1918.

COLUMBIA GOLD MINING CO. **OREGON**

Operated the Columbia gold mine, near Sumpter. Company sold its entire [illegible] 1917. Fully described in Min. Resources of Oregon, Vol. 2, No. 4.

[illegible] MINING CO. **OREGON**

[illegible] Chamber of Commerce Bldg., Portland, Ore.

Cap., $1,750,000; $1 par; 1,666,000 issued.

Property: the Rainbow mine covering the Rainbow vein, a brecciated zone, 5'-50' wide, made of rock fragments cemented by quartz.

Development: by 400' shaft with 1,700' of drifting on vein on 200' level

Equipment: 15-stamp mill, with tube mill, Dorr classifier and thickener etc. The mill is reported to make a recovery of 95%. (See Min. Resources of Oregon, December, 1916, Vol. 2, No. 4, p. 66.)

Production: previous to 1911, the mine produced $242,000. During 32 months ending December 1, 1915, the U. S. Sm. M. & R. Co. extracted 9547 tons of ore averaging $12 per ton and representing $1,083,360 in bullion.

CONTINENTAL MINING CO. OREGON

W. W. Robbins, pres.; E. J. River, sec.-treas., 1308 Sixteenth St., Spokane, Wash.

Property: 23 miles from Sumpter, Baker county, said to show a vein 18-36" wide with 4-16" of high-grade gold-silver ore.

Developed to depth of 400'. A 20-ton flotation plant was erected in 1916

COPPER DYKE MINING CO. OREGON

Office: Homestead, Ore.

Officers: Wm. S. Kuhn, pres., Amer. Nat'l Bank Bldg., San Francisco, Cal.; A. S. Humphreys, sec.-treas. Herbert Stone, mgr.

Inc. Oct. 13, 1917, in Washington. **Cap.**, $100,000; par 10c; none issued.

Property: Macdougal group, 80 claims, 19 patented, 1,600 acres on Snake river, 5 miles N. of Homestead, Baker county, said to show a fissure vein in porphyry, with strike N. 20° W., dip 75° E., containing copper, silver and some gold. Copper occurs as chalcocite and bornite. Mill ore runs 3 to 6% copper, shipping ore 20 to 50% copper.

Development: by 200' incline shaft and 6 tunnels having a total length of 3,340'. **Equipment:** includes steam power, air compressor, etc.

Geology fully described in Min. Res. of Oregon, Vol. 2, No. 4, p. 146.

COPPER KING MINING CO. OREGON

H. W. Webber, mgr., Placer, Ore.

Property: 8 claims, near Placer, Josephine county, reported under development, 1918-19.

CORNUCOPIA MINES CO. OREGON

Officers: Robt. M. Betts, pres.-mgr., Cornucopia, Ore.; J. P. Wald v. p.; W. H. Richardson, sec.-supt.; Jos. B. Thomas, treas., 132 E. 19th St. New York City.

Cap., $1,000,000; $10 par; all outstanding.

Property: the Union-Companion mine at Cornucopia, Baker county, Ore., 25 miles from a railroad. Gold was discovered in this district in 1880 and in 1895 the Union-Companion claims, although but slightly developed, were sold for $60,000, and a 20-stamp mill built.

The vein is said to be traceable on surface for 6,800' with strike of N. E., dip of 45° W., and 2-5' wide, maximum width 20'. Wall rock is granodiorite and schist. Vein material is massive white quartz containing 3 to 5% of pyrite which carries the gold. There is some silver sulphide present, also appreciable quantities of chalcopyrite, arsenopyrite and blende. Ore ranges in value from $10 to $20 per ton. Company also owns the Last Chance mine at Cornucopia, formerly operated under lease by the Baker Mines Co.

Development: by incline shafts, with the 800' the lowest level, said to show 4 ore-shoots having an average width of 3' and an aggregate length of 1,200'.

Mill: 20 stamps, weight 850-lb. each, making 98 drops per minute through 7". Ore is crushed in a 4-lb. KCN solution. Stamp duty is 4½ tons per stamp. Fine grinding is done in two 5'x22' tube mills, each driven by a 75-h. p. motor. The cyanide plant is equipped with Dorr thickeners, 3 Pachuca tanks, and 2 continuous revolving drum filters. An extraction of 87 to 89% of gold and silver is obtained. Average consumption of supplies per ton of ore is cyanide, 1.4 lbs.; lime, 3 lbs.; zinc dust, 0.9 lb. Power is furnished by the company's hydro-electric plant, 2 miles from the plant. Current is trans-

at 6,600 volts and transformed to 2,200 volts for use. Cost of treatment is said to be $2 per ton. Production estimated at $1,000,000 in gold annually up to time of the war. Operations have since been curtailed. See Min. Res. of Oregon, Vol. II, No. 4, p. 74. Company is reported to be doing extensive experimental work on its low grade ores with the object of building a new and large mill if tests are successful.

DOROTHEA GOLD MINES CO. **OREGON**

Address: 122 Oregon Terrace, Medford, Ore.; and J. F. Reddy, Grants Pass, Ore.

Officers: J. F. Reddy, pres.; Lincoln McCormick, sec.; Mary F. Reddy, treas.

Inc. 1916, in Oregon. **Cap.,** $50,000; $1 par; all issued.

Property: 200 acres, 120 patented, on Coyote creek, Josephine county, Ore.

Claims show a contact deposit between serpentine and diorite; the mineralized zone is 2 to 12′ wide dipping 20°, with N.-S. course, the ore containing 30% chromic oxide. Ore shoot is said to be 200′ long and 5′ wide, and to average $5 per ton.

Development: by 500′ crosscut tunnel and 300′ drift on vein, workings amounting to 1,000′ to depth of 170′. Reserves given by company as 8,000 to 10,000 tons.

Equipment: includes a 5-stamp mill and concentrator, expected to make a 65% concentrate. Concentration of low-grade chrome ores is increasing, as less than 40% grade has a narrow market.

ELDORADO COPPER MINING CO. **OREGON**

Address: Andrew Laidlaw, Columbia Bldg., Spokane, Wash.

Incorporators: Andrew Laidlaw, S. W. Miller, C. P. Ritter, F. W. Beyer and Henry Banfield.

Inc. 1916, in Washington. **Cap.,** $2.000.000; $1 par. Company organized to take over the Banfield mine, 32 miles east of Riddle, Ore., on the S. P. railway. The price is said to have been $300,000, partly in stock.

Property: 9 claims, formerly owned by the Douglas-Umpqua Mng. Co., said to show nine veins, 3 of which have been developed. Ore estimated to average 4% copper with slight gold and silver values.

Development: by 6 tunnels, lowest 900′ below surface, with about one mile of workings, estimated by management to block out 300,000 tons of ore. This is an old mine which has been under development for 16 years.

EMPIRE GOLD DREDGING & MINING CO. **OREGON**

Office: 250½ Third St., Portland, Ore.

Officers: W. F. Burrell, pres.-mgr.; O. L. Kennedy, sec.-treas.; Chas. H. Timms, supt.

Cap., $100,000; $100 par; $72,000 issued.

Incorporated to rework placer ground in John Day Valley and Canyon Creek, Grant county, credited with past production of $15,000,000 in gold.

Equipment: 6 cu. ft. bucket dredge.

EQUITY COPPER & GOLD MINING CO. **OREGON**

Mine P. O.: Prairie City, Ore.

Officers: Rev. W. J. Hughes, pres.-treas.-gen. mgr.; C F. Godwin, v. p.; Mrs. Kate Palmer, sec., with E. T. Johns, E. J. Hughes, August J. Smith and H. J. Smith, directors.

Inc. 1901, in Oregon. **Cap.,** $150.000; 10c par. Paid one dividend of $3.000.

Property: 6 claims, unpatented, 88½ acres, with a 5-acre millsite in the Quartzburg district, 7 miles N. of Prairie City, Grant county. Reported to show several veins, 3 of which are developed by tunnels and are traceable ½ mile. The sulphide ore is estimated by company to average 1.5 to 3% copper with lead, zinc and silver values.

Development: by 3,000′ of tunnels to depth of 375′. **Equipment:** includes 5-stamp amalgamating and concentrating mill, crusher, tables and 3 slime tables.

Total output to date $125,000. Mine worked in a small way by lessees from 1903-1914. Greater depth and more adequate equipment necessary.

EUREKA MINING, SMELTING & POWER CO. OREGON

Idle. P. O. Box 63, Clarkston, Wash. W. E. Howard, sec.

Property: 40 claims, patented, at Imnaha, Wallowa county, Ore. Secretary reports, property idle for many years, awaiting railway facilities.

FLAGSTAFF MINE OREGON

J. H. Sullivan, supt., Baker, Ore.

Property: in Virtue district, 6 miles N. E. of Baker, Baker county. Ore occurs in quartz fissure veins, with values in small high-grade shoots. The main or Big Ledge vein, 5-8′ wide, runs N. 15° W. with dip of 60° E. and is said to average $16 per ton in gold.

Development: 5,000′ of workings with 760′ three-compartment shaft.

Equipment: 20-stamp mill, cyanide plant, steam power.

Property controlled in Boston, operated intermittently by lessees.

FREELAND CONS. MINING CO. OREGON

Dissolved, March 25, 1914.

Property now owned by Cons. Copper Mng. & Power Co., which see. Fully described in Vol. XII.

GIRAFFE MNG. & MLG. CO. OREGON

Officers: at last accounts, G. Cartright, pres.; A. O. Weatherman, sec. Grace Nichols, treas.

Cap., $150,000; $1 par; 75,000 issued.

Property: 7 gold claims in Mormon Basin, Baker county, said to show ore occurring in a narrow mineralized porphyry dike cutting argillite, with intrusive bodies of serpentine and dikes of basalt. At 85′ depth, gold bearing ore assaying about $4 per ton was reported cut.

Development: by shaft and tunnel.

GOLCONDA MINE OREGON

R. J. Rowan, lessee.

Property: 2 chrome claims, 6 miles N. E. of Takilma, Josephine county.

Ore: occurs in lens shaped masses in serpentine, 33′ thick with N. 15° E. course and dip of 65° E. As usual, with chrome deposits, they are irregular in shape and variable in quantity, but geologic conditions are considered favorable.

In 1918, property was equipped for extensive development, and a production of 5,000 tons of concentrates annually was contracted for with the Atlantic Ore & Alloys Co. of Philadelphia.

Production: 2,000 tons of ore averaging 40% chrome oxide in 1916. In 1918 shipments amounted to 450 tons in May; 1,035 tons in June, and 1,500 tons in July.

GOLD BAR MINE OREGON

Property: placer claims in the Agness district, Illahe, Curry county. Worked intermittently since 1856, but regularly only since 1911. Reported sold 1918, to Seattle, Wash. people, who are said to be operating 3 giants and a steam shovel. Bedrock is black shale; gravel is 9′ thick with 4′ of overburden. Yields have been fair. Property has plenty of water for washing.

GOLD CREEK MINING & MILLING CO. OREGON

Address: Salem, Ore.

Officers: Otto Hansen, pres.; W. I. Staley, sec.-treas.

Cap., 3,500,000 shares; $1 par.

Property: 17 claims, 16 miles N. E. of Gates, on S. P. R. R., N. Santiam district, Marion county, said to show massive pyrite, chalcopyrite, galena, sphalerite, in a vein in andesite.

Development: 1,500′ crosscut tunnel and 1,000′ of drifting on orebodies.

GOLDEN CHARIOT MINING & MILLING CO. OREGON

Address: Sumpter, Ore.

Officers: Chas. Wiedemann, pres.; O. E. Conner, Jr., mgr.: Rose Reimkamp, sec.

Inc. in Oregon. **Cap.,** $350,000; $1 par.

Property: 400 acres at 4,500′ elevation, 2½ miles from Sumpter

o show a fissure vein in limestone. The gold-bearing ore is reported to in shoots, 6′ wide on the 210′ level.
evelopment: to 300′ by vertical shaft, to be sunk another 200′. Core g to 500′ below 210 level; winze below reported in free milling ore.
quipment: includes 50-h. p. friction hoist, steam-driven compressor, umps. A 50-ton mill is to be installed in 1920.

DEN EAGLE MINING CO. **OREGON**
ffice: The Dalles, Ore., J. S. Fish, pres.; J. C. Hostetler, sec.-treas.
ap., $441,000; $1 par.
roperty: 8 claims in Greenhorn district, Baker county, Ore. Past :tion, $75,000. Claims said to show a number of non-persistent fissures; hree of them ore-bearing. No. 2 vein has been followed to depth of 200′, esides free gold, the ore contains some galena and copper.
evelopment: by tunnels aggregating 2,600′, to depth of 175′; also 75′ below lowest tunnel. Work to be resumed in 1920.

DEN GATE MINING CO. **OREGON**
ffice: 145½ S. Main St., Marion, Ohio.
fficers: M. F. Douce, pres.; J. F. Lust, treas., both of Marion, Ohio; Bender, sec., Greenhorn, Ore.
ap., $1,500,000; shares $1 par; 135,000 shares issued.
roperty: 2 miles N. of Greenhorn, Grant county, Ore., said to show rtz vein in greenstone, pinching and widening to 48 inches.
evelopment: 2 tunnels on vein; upper 800′ long, lower with other ngs, 2,400′. Best ore found near mouth of lower tunnel. Two shoots o be 225′ and 60′ long with maximum width of 20″; a third is 200′ long p to 42″ wide. Ten stamps crushed ore in 1915, but operations were itable, and in 1917 mine was closed down and equipment sold.

DEN RULE CONSOLIDATED M. & M. CO. **OREGON**
ffice: Salem, Ore.; C. L. Johnson, sec. **Cap.,** $500,000; shares 5c par.
roperty: 26 claims, 15 miles S. E. of Disston, Bohemia district, Lane . Ore. Idle.

DEN STANDARD MINING CO. **OREGON**
ormer office: 308 Commercial Block, Portland, Ore.
fficers: at last accounts, K. K. Kubli, pres.; E. B. Wilson, sec.; E. J. treas.
ap., $100,000; $1 par.
roperty: 82 acres (known as the Kubli) in Gallo Creek district, Jack- unty, said to show a 1 to 18″ quartz vein opened for 200′, carrying rich

quipment: 2 -stamp mill and concentrator. Idle.

D HILL MANGANESE CO. **OREGON**
ddress: Grants Pass, Ore.
ic. 1918. **Cap.,** $1,000,000.
roperty: 4 claims, on Shan creek, 6 miles from Rogue river, Josephine . Ore: gold-bearing quartz said to run 24-44% manganese. To be de- d and equipped with stamp-mill, etc.

D HILL QUARTZ MINING CO. **OREGON**
ffice: Medford, Ore.
fficers: C. R. Ray, pres.-treas.; E. W. Liljegran, sec., at last report.
ap., $60,000; $100 par.
roperty: some claims, 2 miles S. E. of Gold Hill, Jackson county, Ore. has been done, save assessment work.

D & PLATINUM MINES CO. **OREGON**
ffice: Grants Pass, Ore. I. F. Peck, pres.
ic. 1916. **Cap.,** $1,000,000; $1 par.
roperty: 1,280 acres of placer claims on Cave creek, Josephine county, ich dam, flume, sluice-boxes, etc., have been constructed.

D STANDARD MINING CO. **OREGON**
ffice: Ashland, Ore.
fficers: P. S. Casey, pres.; F. G. McWilliams, sec., at last report.

Cap., $82,000; par $1.

Property: 30 acres, 2½

HIGHLAND MINE

Address: Baker, O
Formerly owned

Co.; latter company dissolved January, 1917. Mine sold to National Mines
1 February, 1920.
roperty: 6 claims, in Rock Creek district, Baker county, Ore., 14
from Haines, the shipping point. Claims show 4 ore shoots carrying lead-
-gold values.
Development: by 6 tunnels with about 5,000′ of work.
Equipment: 100-ton mill, including flotation plant, in which average
ery has been 2 oz. silver and 0.25 oz. gold per ton. Tailings reported
ntain $1.80 to $2.20 per ton in gold and silver.
roduction: from 1905 to Apr., 1914, was 6,322 tons of ore and concen-
, yielding $311,552. Reported shipping ore and concentrates in 1920.

IESTEAD-IRON DYKE MINES CO., INC. **OREGON**

. R. Buchanan, gen. mgr., care of Goodrich, Lockhart Co., No. 60 Broad-
New York. D. M. Goodrich, pres.; Chas. C. Goodrich, sec.-treas.
Cap., 1,000 shares, all issued.
Operates property of Iron Dyke Copper Co., which see.
Production about 50 tons per day in 1919, producing 1,000 tons of concen-
a month.

IRO SIXES MINES CO. **OREGON**

Office: 57 Post St., San Francisco, Cal.
Officers: W. J. Bell, pres.; G. W. Root, sec.; C. J. Pease, treas.
Cap., $70,000; $1 par; all issued.
Property: 1,200 acres placer ground between Otter and Elephant Rock
c. just below the forks of Sixes River, Curry county. Company uses water
: 150′ head, from Big Otter Creek.
Employed 50 men at last accounts. Company spent $100,000 improving and
ping property.

K MINE **OREGON**

Address: Sumpter, Ore.
Property: near Granite Creek, Cracker Creek district, Baker county, 8
N. W. of Sumpter, Ore.
Development: the work done in the past 15 years consists of about
of tunnels, etc., with 3,000′ of it on the gold bearing vein. The vein
ges 5′ in width, but has a maximum of 25′. It occurs entirely in argillite,
ins sulphides, and is generally low-grade.

AHA MINE **OREGON**

Address: S. L. Winchester, Imnaha mine, Joseph, Wallowa county, Ore.
Property: 25 miles N. of Homestead and 40 miles E. of Joseph, the
ad terminus.
Development: 4,000′ of tunnels, etc. Vein said to be 3½′ wide. Re-
s estimated at 50,000 tons of gold ore.
Equipment: 10-ton mill driven by water-power. No recent returns.

ERIAL EAGLE MINING CO. **OREGON**

Address: 9 E. 5th St., Covington, Ky. **Mine office:** Sumpter, Ore.
Officers: C. L. Arzeno, pres.-mgr.; Fred A. Salmer, v. p.; Alvin David-
sec.-treas., with B. Moeller, Chas. J. Summers, Frank C. Marty and John
so, directors. John S. Schmidt, supt.
Inc. May 8, 1919, in Oregon, to take over the holdings of the Blue
tain Mining Co. and the Imperial Mining Co. **Cap.**, $500,000; 2,000
fd. shares, par $100 and 300,000 com. shares, par $1; subscribed for, $460,000;
ly issued (July, 1919) $99,200. Company reports $40,000 in treasury.
al meeting, second Tuesday in March.
Property: 23 patented claims, 25 acres, in Cable Cove district, Baker
, 10½ miles N. W. of Sumpter.
Ore: occurs in fissure veins in diorite, running E.-W. and dipping in
ite directions. Values are mainly gold, silver, and lead, with a little
r and zinc. Mill ore said to average $5.30, and shipping ore $30 to $40
n. Reserves were estimated by management at 67,364 tons opened up,
d at $670,000.
Development: by 16 tunnels to depth of 690′.

Equipment: amalgamating-concentrating mill of 125 tons daily cap steam power, 6-drill compressor being installed.

Production: steady shipments have been made for several years roads are poor, hampering operations. Company will eventually absorb the Mountain M. Co.

IMPERIAL MINING CO. ORE

Described in Volume XIII. Reorganized 1919, as Imperial Eagle M Co., which see.

IRON DYKE COPPER CO. ORE

Office: Homestead, Baker county, Ore.

Officers: F. F. Curtze, pres.; F. A. Brevelier, sec.; A. A. Claus, t J. R. Buchanan, mgr.

Inc. in Pennsylvania. **Cap.**, $500,000; par $1; 380,000 issued. Erie Co. holds title by trust deed and bond. Worked by Homestead-Iron Mines Co., Inc., a Goodrich-Lockhardt subsidiary.

Property: a copper deposit discovered 1897, about 2,000′ from rail at Homestead. Lower tunnel, 300′ above town, is about 1,300′ long, c the orebody at 800′ in and connected by raise with 3 tunnels above. The has several thousand feet of workings. The lower tunnel shows massive copyrite and pyrite ore about 6′ wide, said to extend upward to the upper t Ore said to contain $2 to $3 gold, 3 oz. silver and 4% copper per ton. Res said to be proven by diamond drilling, are estimated to amount to 500,00 of a gross value of $10,000,000.

Reopened 1915, after years of idleness, and is largest copper produc the State. A wide body of 4% ore, with good precious metal content, was c at a depth of 850′.

A 125-ton concentrating plant commenced work in September, 1916, flotation as part of the process with a 93% recovery claimed. Concen aggregate about 1,000 tons a month, and are hauled by team, as R. R. burned out in 1918, has not been reopened. About 90 men employed.

Mine is a steady producer and apparently has promising future.

KOEHLER MINE ORE

Address: A. Koehler, Baker, Ore.

Property: in the Virtue district, 4½ miles from Baker, was a pr of high-grade antimony ore in 1915. Has a well-defined vein, up to width, carrying massive and disseminated stibnite, together with gold valu

Output to date is said to be $15,000, and mine still contains considerabl

LAST CHANCE MINE ORE

Owned by Cornucopia Mines Co., which see.

LEWIS & CLARK M. & M. CO. ORE

Officers: Dr. F. M. Brooks, pres., Oregonian Bldg., Portland Thos. Skaife, sec.; M. Palmer, treas.

Cap., $100,000; shares 10c par; 710,000 issued.

Property: 5 claims in North Santiam district, Marion county, a miles N. E. of Gates, on a branch of the S. R. Ry. Developed by tunnel show veins 1-5′ wide in andesite. Ore contains copper and iron sulphide and silver in zinc.

Working on a small scale.

LINCOLN MINES CO. ORE

Office: Albany, Ore.

Officers: A. M. Hammer, pres.; J. D. McLain, sec.; J. Mc treas., all of Albany.

Cap., $250,000; $25 par; all issued. Is the successor of the Alba & M. Co.

Property: 8 claims, known as the Albany mine, in Quartzville Linn county, about 23 miles from Gates. **Ore:** lead-zinc sulphide gold values occur near the surface in veins in andesite. Veins are shear zones up to 50′ wide with lenses of sulphides on the foot or hang and distributed through the zone.

ɛN LAKE GOLD MNG. CO. **OREGON**
ficers: F. W. Thomas, pres, Fargo, N. D.; C. I. Flynn, sec.
ip., $500,000; $10 par; all issued.
operty: 4 quartz claims and the McNamee placer about 6 miles from on the Sumpter Valley railroad, in Greenhorn mining district, Baker Ore.
velopment: by 120′ shaft, under water below 10′ from surface.

Y BART GROUP **OREGON**
H. Beeman, Gold Hill, Jackson county, Ore., owner and mgr.
operty: 11 claims, partly patented, 220 acres in Sardina mining dis- ear Gold Hill, said to carry veins averaging 2′ in width. Ore is free , running from $5-$100 and said to average $50 per ton. Developed by unnel to depth of 190′.
uipment: includes 40-h. p. steam plant, 10-stamp concentrating mill. trates said to average from 3-5 oz. gold and silver. Mine has been oper- ore or less regularly for many years.

ANESE METALS CO. **OREGON**
c. October, 1917.
operty: Tywell mine on Tywell ranch, 5 miles S. W. of Lake creek, 1 county.
ploratory work reported to have exposed a face of ore averaging 20% nese for 10′ in height and 150′ in length. **Ore:** occurs as pyrolusite ilomelane disseminated through a bed of volcanic tuff breccia from hick, lying between flows of basalt.
uipment: includes 20-ton concentrating mill, concentrates produced average 45% Mn. The shipping point is Eagle Point, 17 miles distant. rly in 1918 Victor Rakowsky took a lease on the Tywell and adjoining ts, but extensive churn-drilling failed to prove sufficient ore of commercial o warrant erection of the proposed 500-ton mill.

JTAIN GEM MINING & DEVELOPMENT CO. **OREGON**
dress: Joseph, Ore.
ficers: Harry Dawson, pres.; T. F. Tomkins, sec.-treas.
p., $200,000; 10c par; $124,211 issued.
operty: the Gem mine, 11 claims in Wallowa district, 10 miles from Wallowa county.
ology: ore occurs in a contact zone between grano-diorite and lime- ith calcareous schists, the values being in pyrite, chalcopyrite and molyb-

velopment: by crosscut tunnel. Output in 1915 was 14 tons of $30

ELDORADO MINING & REDUCTION CO. **OREGON**
ice: Austin, Ore.
ficers: E. B. Reed, pres.; E. H. Saxe, sec.-treas.
p., $100,000; $1 par; 1,750 issued.
operty: known as the Pioneer, on the south slope of Greenhorn New Eldorado district, Grant county, said to show granodiorite cut by grained dikes of grano-diorite porphyry. The altered zone carries veins h quartz from a few inches to 5′ wide, containing gold, a little antimony, and low silver-gold values.

H FAIRVIEW MINING CO. **OREGON**
dress: Herbert Leigh, 38 E. 6th St., Eugene, Ore.
ficers: G. W. McQueen, pres.; Herbert Leigh, sec.; Darwin Bristow,

p., $300,000; par 10c; all issued.
operty: 15 claims N. of Fairview mountain, ½ mile from Bohemia, unty.
ology: a mineralized fracture zone in andesite, 12′ wide, said to have for over a mile.
velopment: 2 tunnels, one 300′ long, 100′ below outcrop; the other epth of 450′. No recent returns.

OAK MINE OREG

Address: G. A. Baker and Geo. Buell, owners, Grants Pass, Josep county, Ore.

Mine is 6 miles E. of Hugo, in Grants Pass district, Josephine co **Ore:** main vein is gold-bearing; also several small copper veins.

Development: by tunnel with total of 800' of workings. Equipped 20-h. p. gas engine and compressor.

OGLE MOUNTAIN MINING CO. OREG

Office: 1003 Main St., Oregon City, Ore.

Officers: J. B. Fairelough, pres.; W. J. Wilson, sec.-treas.

Cap., $1,000,000; $1 par; all issued.

Property: 22 claims, 14 miles from Gates on the S. P. R'y, in the Creek mining district, Clackamas county.

Ore: low-grade ore which occurs in a well-defined fissure vein ab in width. The average value is $5 per ton.

Development: by 1,460' tunnel driven 560' below the two old tu cut the downward extension of the vein. Several small veins have be but contain only very low-grade ore.

Company lost money building a mill which proved a failure, and ha done very little work.

OLD GLORY GOLD MINING CO. OREG

William Stock, sec.-treas., Grants Pass, Ore.

Cap., $1,000,000; shares $1 par; 604,200 issued.

Property: the Old Glory mine, 4 lode and 2 placer claims, on creek in western Josephine county, said to show a large lode of l copper ore carrying gold and silver values. Property was to be equipp machinery, but the death of the president delayed financing and develop been retarded.

OLIVE CREEK MINING CO. ORE

Idle. **Office:** Baker, Ore.

Officers: Thos. M. Tobin, pres., 9332 So. Chicago Ave., Chica S. A. Tobin, sec.; A. J. Weckler, treas.

Cap., $1,000,000; $1 par; all issued.

Owns the Olive Creek and Quartz gulch placers in Greenhorn mining Grant county, Ore.

OPHIR MAYFLOWER MINE ORE

Idle. **Address:** A. J. Champion, Howard, Ore.

Property: 8 miles from Howard, in Ochoco district, Crook county 41 miles from railroad at Redmond.

Geology: the rocks are andesite, occurring as flows interbedde tuffs and breccias. Mineralization is in wide fracture zones of altered r

Development: by 1,400' crosscut tunnel, and one 200' above. follow the fracture zones. Ore is 1 to 6' wide and 70' long; shipments $70 gold. A second shoot, 20' long and 4' wide, averaged $125 per t values in the lower tunnel only carry about $3 per ton.

Equipment: includes a small amalgamating-concentrating st

OPP MINE ORE

Address: J. W. Opp, Jacksonville, Ore.

Property: 373 acres, situated 1½ miles W. of Jacksonville, J county, Ore.

Geology: three main veins from 2 to 4' wide, occur in shale site. Two ore shoots, one 300', the other 150' long, carry free gold the ore averaging $5 per ton.

Development: by 18 adits, with 7,000' of workings. One cross another 550' long.

Equipment: 3,600' tram, 6-drill compressor, 20-stamp mill. 12 , etc., credited with past production of $100,000.

GOLD MINES CO. OR

1208 W. Monroe St., Chicago, Ill

. in Arizona. **Cap.**, $2,000,000; $1 par; 1,657,436 issued. Is a re-
ition of the American Gold Fields Co.
perty: the Granite Hill mine, 9 miles N. E. of Grants Pass, Jo-
county, active from 1902 to 1907 and credited with a production of $75,000.
:: quartz carrying chalcopyrite, galena and pyrite with gold values,
n veins in tonalite and greenstone. Main vein said to average 5′ in
id ore treated in 1907 averaged $5 per ton.
elopment: by 430′ vertical shaft with total of 12,000′ of workings,
ler water.
ipment: includes 20-stamp mill, compressor, steam hoist, 5 machine
d 150-h. p. electric motor. Idle since 1907.

)N-IDAHO INVESTMENT CO. **OREGON**

er, Baker county, Ore.
cers: Jas. A. Howard, pres.; John Arthur, v. p.; Fred R. Mellis,
s.
., $50,000; par $100. Is a close corporation organized as a develop-
holding company. Operates a sampling plant at Baker.
perty: includes the Poorman group, 8 claims, 160 acres, surveyed
it, on Balm Creek, 25 miles N. E. of Baker. The group shows a copper-
vein for 2,000′ that has a gossan cap 200′ wide in places.
elopment: by an 800′ tunnel with several short crosscuts at depth
showing 2.5 to 3.5% copper, present as chalcopyrite.
a lease and bond on the Taber Fraction and has use of the Bourne
ig. company's tunnels to operate the mine.
)tation plant is to be erected in 1920.

CREEK CONS. MINING CO. **OREGON**

ce: 1st Nat'l Bank Bldg., Grants Pass, Ore. **Officers:** Chas. Burk-
res.-treas.; A. H. Gunnell, sec.
., $250,000; $1 par; all issued.
perty: the Jewell & Moore group of 5 placer claims, 3 patented, also
)nal unpatented claims and 92 acres of dump ground, 2 miles E. of
and 10 miles S. of Grants Pass, Josephine county. Credited with past
)n of $40,000.
ipment: includes 3 miles of ditches and 300′ flume line.

C MOLYBDENUM MINES, INC. **OREGON**

ress: J. B. Philips, mgr., Greenhorn, Baker county. Mine reported
an 8′ vein of molybdenum, running from 20 to 25%.
mill was to be equipped with a 1,000-ton oil flotation unit at last report.

MINING CO. **OREGON**

:e: Central Point, Ore.
:ers: W. C. Leever, pres.; J. W. Merritt, sec.-treas.
., $4,400; $20 par; all issued.
)erty: the Buzzard mine, 10 quartz claims, in Elk Creek mining
27 miles N. E. of Trail, Jackson county.
logy: ore deposit occurs in a N. W.-S. E. shear zone in andesite;
contains complex sulphides and is handjigged before shipment, 4 tons
$2,100.
elopment: by 1,600′ crosscut tunnel, total work 3,000′, to depth of
the vein. Mine worked under lease, by Paul Wright, of Trail, Ore., at
unts.

ER RIVER GOLD DREDGING CO. **OREGON**

:e: Insurance Exchange, California St., San Francisco, Cal. **Oper-**

.; with A. L. Dahl and F. J. Mott, directors.
Oct. 18, 1911, in California. **Cap.**, $500,000; $1 par; all issued. An-
ting, fourth Monday in October.
earnings in 1918 were $237,603, of which $233,307 was from the gold
. Operating costs were $135,260; sundry expenses, depreciation, min-

eral depletion, $86,353; leaving $15,989 profit from operations in Oregon, compared with $314,990 for the previous year.

In 1919 the revenue was $232,839, of which $111,400 was profit. Cur assets exceed liabilities by $320,338.

Dividends: aggregate $1.50 per share, or $750,000 to Sept. 30, 1919

Property: about 1,500 acres placer ground, near Sumpter, Ore. of which is considered payable. The gravel channel is from 300 to 2,000' wi it will average 1,000' wide, 18 to 20' deep, and the pay gravel rests on a decomposed rock called "clay webfoot." Dredge digging may be termed to and as a result, the bucket-lips wear out in 5 months' use.

Equipment: consists of a dredge in Oregon that has yet from two three years' work. A boat in Colorado, after digging 864,375 yds. of 7.69 gravel in 1919, at a loss of 3.18 c., was sold to Benjamin Griffith for $16 plus $24,000 for supplies.

Production: from Oregon properties, yielded $2,600,000 to Septem 30, 1919. Results for the past two years, ending September 30, are:

Year	Yards	Yield per yd., c.	Cost per yd.,c.	Daily yardage	Da bo
1918-'19	1,805,582	12.90	6.73	4,960	
1917-18	1,783,180	13.06	7.97	4,885	

QUEEN OF BRONZE MINE OREG

Described in Volume XIII. Owned by John Hampshire Co., which see

QUEEN OF THE WEST MINES CO. OREG

Office: 209 Pillsbury Bldg., Minneapolis, Minn. **Mine office:** Co copia, Ore.

Officers: A. Y. Bayne, pres.; Lewis W. Campbell, sec.: H. U. Ma treas.; R. G. Amidon, mgr.

Inc. in West Virginia. **Cap.,** $1,000,000; $1 par; 993,466 outstanding

Property: 11 claims in the Cornucopia district, Baker county, de oped by tunnels and equipped with 10-stamp mill, concentrating plant, 50 cyanide plant, 3,600' aerial tramway, capacity 6 tons per hour, water power air compressor.

Geology described in Min. Res. of Oregon, 1916., Vol. 2, No. 4, p. 180

RAINBOW MINE OREG

See Commercial Mining Co.

RAINIER MERCURY CO. OREG

T. H. Ellis, pres.-mgr., Beagle, Ore.

Inc. 1918, and reorganized 1919 as War Eagle M. Co., which see.

RED BOY MINES CO. OREG

Stock worthless as property was sold for $34,500 at sheriff's sale in and bid in by bondholders.

Reorganized June, 1916, as Red Boy Mng. & Dev. Co., which see.

RED BOY MNG. & DEV. CO. OREG

Idle. **Address:** Fremont, Neb.

Officers: Ray Nye, pres.; L. A. Peckham, sec.; Paul Colson, treas

Inc. June, 1916. **Cap.,** $250,000; $1 par; all issued. Is a reorganiza of the Red Boy Mines Co.

Property: the Red Boy mine in Granite district, Grant county, ited with past production of $800,000. (The geology is fully described in Mi Resources of Oregon, Vol. 2, No. 4, pp. 188-191.)

RED, WHITE AND BLUE MINE OREG

Owned by Geo. H. Bodfish, Malheur, Oregon. Property at Malheur to show a quartz vein, 8 to 10" wide, carrying gold values that average $5 to per ton. Developed by 134' vertical shaft and equipped with steam hoist, and 6-stamp concentrating mill.

SAMPSON CO., LTD. OREG

Promoted 1910 by F. Wallace White, 115 Broadway, New York, who under indictment (since December, 1918) for misuse of the U. S. mails, dea

30,248 received from the sale of the valueless stock of

onds and $7,000,000 in stock.

that company owned the Cracker-Oregon and
e North Pole Columbia Lode, Baker county, which are
spects of doubtful value.

hite bought control of the practically defunct Sampson Gold
and later sold the property to the Sampson Co., Ltd., for
tock and a $100,000 cash compensation in the form of a promis-
he subsequently paid to himself out of the proceeds of stock
atedly organized companies with valueless or mythical holdings
to the Sampson Co., Ltd., for large sums, payable to himself
stock, thus keeping control of the Sampson Co.

ing to report, White is one of the most dangerous and brazen
of innocent investors" known, who worked his game openly and undis-
nder various names for eight years from a New York office. He is now
indictment and a fugitive from justice. The widely distributed stocks
onds are valueless.

NGER GOLD MINES CO. **OREGON**

Idle. **Office:** J. K. Romig, sec., Baker, Ore. F. W. Paine, pres., at last eport.

Inc. in Oregon. **Cap.,** $2,000,000; $1 par; 1,295,146 issued.

Property: 600 acres of quartz and placer claims on W. side of Eagle eek, in an area which has produced about $1,500,000, but where since 1900 ere has been little work done.

Geology: quartz veins in a black clay slate. Ore contains 3% sul-hides and is considered to be similar to many Californian gold quartz veins. wing to older slates being fractured, cut by dikes, etc., prospecting is difficult.

Development: by tunnels and an incline shaft 400′ deep. In upper orkings the vein shows ore 15″ wide, worth $20 to $25 per ton; in the lower, low the zone of oxidation, the ore is 24″ to 48″ wide, and assays $12 per ton. n 1916 several open cuts and short tunnels were driven to pick up the extension f the vein. Idle since that year.

ORTY HOPE M. & M. CO. **OREGON**

Address: H. S. Sanford, pres., Ashland, Ore.

Cap., $1,000,000; par $1; 784,498 issued.

Property: 4 miles up Wagner creek from Talent, in Ashland district, kson county.

Development: by 1,480′ tunnel. **Equipment:** 10-stamp mill driven by r power.

Work appears to have been spasmodic, but results were not without promise.

VER KING MINING CO. **OREGON**

Address: Albany, Ore., or J. J. Langmack, Gerlinger Bldg., Portland, on.

Officers: J. J. Langmack, pres.; E. E. Williams, v. p.; Wm. S. Risley, ec.-treas.

Inc. March, 1909. Reorganized and capital reduced under Oregon Blue ky Law, June, 1914. Present capital, $500,000; $1 par.

Property: 12 claims covering 4 veins on Little North Santiam river, ear Elkhorn, Oregon, in the Cascade Mts., 75 miles from Portland, and 17 iles from railroad. The veins occur in and follow shearing zones, and carry e with gold, silver, lead, and zinc.

Development: by 2 shafts, 2 prospect tunnels, and a number of open-ts on veins. The main working tunnel, over 100′ long, will be driven to the principal vein of the group at about 1,050′ from portal, at depth of over on vein below the prospect tunnels. Tunnel will drain mine and permit ore by gravity system. Average of samples from prospect tunnels silver, 15 oz.; lead, 3 to 4%; and zinc, 3 to 4%.

by the war is to be resumed.

SIXES MINING CO. **OREGON**

Offices: 741 West 3rd St., Salt Lake City, Utah, and 625 Market St., San Francisco, Cal.

Officers: L. R. Eccles, pres.; C. B. Edington, sec.; John Pingree, treas.; W. A. Bechtel, S. F. mining agent.

Inc. in Utah. **Cap.,** $1,125,000; $5 par; 157,900 issued; assessable. Assessment of 20c. per share levied March, 1918.

Property: an option on placer claims, 300 acres, owned by the Divelbiss family, on the Sixes River, Curry county, 11 miles from Port Orford. Ground contains considerable black sand which holds both gold and platinum, about 10% of the gravel value said to be in the platinum. Three distinct gravel channels are known, one of which is to be dredged, the others hydraulicked. For sluicing a 4½ mile flume is available.

SNOW CREEK MINING CO. **OREGON**

Officers: Henry B. Smith, pres., Bay City, Mich.; Fred D. Smith, v. p., Ithaca, N. Y.; C. H. McColloch, sec.; R. J. Davison, treas., with J. H. Bowlby, directors.

Inc. June 25, 1914. **Cap.,** $200,000; $1 par; outstanding, 132,000 shares.

Property: 5 claims, 85 acres, including the Snow Creek mine, formerly owned by Oregon Mines Exploration Co., near Greenhorn, Baker county. Ore carries gold, silver, lead in contact deposit, 3′ to 8′ wide; country rock is diorite and slate. Ore extracted in the past is said to have assayed $12 per ton in gold and silver and 5% lead.

Development: 225′ vertical shaft and tunnels, aggregating 1,315′. Claim 9,400 tons of ore blocked out.

Equipment: includes 10-stamp mill. Total output to date about $40,000.

Title was obtained by present company under foreclosure of mortgage. Plan sinking shaft 100′ deeper and developing.

SUMPTER GOLD DREDGING CO. **OREGON**

Address: Sumpter, Baker county, Ore.

In November, 1919, company purchased a boat from the Powder River Gold Dredging Co. for $160,000, arranged for electric power, and expected to start dredging in the spring of 1920.

TAKILMA SMELTING CO. **OREGON**

Office: 301 Mining Exchange Bldg., Colorado Springs, Colo.

Inc. in Colorado. **Cap.,** $250,000; $10 par. Owned a controlling interest in the Waldo Smelting & Mining Co. Fully described in Vol. XIII. Holdings sold to John Hampshire Co., which see.

THREELODES MINING CO. **OREGON**

Officers: C. E. Wickstrum, pres.; N. L. Townsend, sec., Medford, Ore.; George Lindley, treas.

Cap., $350,000; 35c par; all issued.

Property: 9 claims, and 9 others bonded, 2 miles W. of Gallice, Josephine county, said to have been exploited in recent years for tin, tungsten, molybdenum, and platinum.

TRI-STATE CHROME CO. **OREGON**

Controlled by Walter J. Nicholls, Sherwood Bldg., Spokane, Wash.

Acquired Jupiter mill between Canyon City and Prairie City, Grant county, early in 1918 and reported to have produced 8 tons of 40% chromium concentrate daily during part of the year.

TROUT CREEK M. & M. CO. **OREGON**

Office: Canyon City, Ore.

Officers: O. J. Darst, pres.; F. S. Slater, sec.-treas.

Cap., $100,000; $1 par; all issued and paid up.

Property: the Bullion Quartz mine near Burns, Harney district, said to show granite cut by large porphyry dikes. The ore carries gold, silver, lead and zinc.

Development: by tunnels and shaft. Shipments were made via Dayville way of Crane, 22 miles from the mine, in 1916.

UNITED COPPER CO. **OREGON**

Office: 95 Union St., Seattle, Wash.

Officers: S. S. Fluhart, pres.; B. E. Fluhart, sec., Leland, Ore.; R. N. Leezer, treas. **Cap.,** $1,000,000.

Property: the Copper King mine, 18 miles east of Leland, Greenback district, Jackson county, said to show a fissure vein in andesite. Ore contains chalcopyrite reported to average 4% copper. A concentration mill was erected in 1916, and work continued until war conditions stopped operations.

UNITED COPPER GOLD MINES CO. **OREGON**

Idle. **Office:** Murphy Blk., Salem, Ore. Mine at Selma, Ore.

Officers: W. S. Low, pres. and gen. mgr.; E. O. Moll, v. p.; Daniel Webster, sec.; C. E. Lebold, treas., with W. C. Buckner, James Greig and H. Neugabauer, directors.

Cap., $500,000; $1 par; issued 219,654.

Property: 11 claims, in Illinois district, about 12 miles N. W. of Selma, Josephine county.

Geology: ore occurs in serpentine near porphyry and diorite contacts. A dark gossan sometimes stained with copper is underlain at 15′ depth by ore carrying 18% copper and 5 to 10 oz. silver and upwards of $1 gold, according to management.

Development: amounts to 1,000′, with a 500′ tunnel and 200′ crosscut, exposing 1,000 tons of ore. Property is 34 miles from S. P. R. R. Is regarded as a prospect which might be worked on a large scale were railroad transportation nearer.

UNITED GOLD MINING CO. **OREGON**

Office: 505 Hyde Block, Spokane, Wash. A. B. Lee, pres

Inc. in Washington. **Cap.,** $1,000,000; $1 par; 568,050 issued.

Property: the Cougar mine, 3 miles N. of Granite, Grant county, formerly owned by the Cougar Gold M. & M. Co.; also the Independence mine, 17 miles from Sumpter, Baker county.

Geology: at Cougar mine country rock is a black, silicious, and semi-slaty argillite. Gold occurs in pyrite and ore is not easily amenable to treatment. Three shoots of ore have been exposed.

Development: at Independence, by tunnels. In November, 1919, a shoot had been opened for several hundred feet and the mill was treating 50 tons of ore daily.

UTAH QUICKSILVER CO. **OREGON**

Described in Volume XIII. Succeeded 1918, by Rainier Mercury Co., which was reorganized 1919, as War Eagle Mng. Co., which see.

VANGUARD GOLD-COPPER CO. **OREGON**

Probably dead. Mine near Kerby, Josephine county, Ore. C. E. Phillips, mgr.

Inc. 1910. **Cap.,** $1,000,000; shares $1 par.

Property: 7 miles W. of Kerby, said to carry gold-copper ore. Idle.

VESUVIUS MINES CO. **OREGON**

Office: Eugene, Ore. **Mine office:** Bohemia, Ore.

Officers: E. M. Johnson, pres.; F. J. Hard, sec.-treas.

Inc. in Oregon. **Cap.,** $6,000,000; $1 par; 2,000,000 shares in treasury March, 1919.

Property: 50 claims, including the Vesuvius mine, 15 miles S. E. of Disston, Bohemia district, Lane county.

Geology: andesite flows interbedded with andesite tuffs, traversed by a fracture zone in which the ore occurs. Gold, silver, galena, chalcopyrite, pyrite and sphalerite are the ore minerals.

Development: by 20,000′ of workings with 3 tunnels, the main one 2,000′ long, said to disclose 18″ to 36″ of ore which assays from $7.50 to $20.64 per ton.

Equipment: includes a 10-stamp mill with tables for treatment of gold ores, steam plant, saw mill, etc. Concentrating plant for copper bearing ores to be installed.

VINCENT CREEK GOLD & COPPER CO. **OREGON**

Probably dead. **Former address:** Austin, Grant county, Ore.

Officers: Burton Miller, pres.-gen. mgr.; Ernest Blackwell, v. p.; Nellie H. Miller, sec.-treas., and J. S. Edwards, directors.

Inc. Dec. 5, 1907, in Oregon. **Cap.,** $200,000; $1 par; issued 100,002 shares.

Property: 6 claims, 100 acres, in the Greenhorn district, 5 miles N. W. of Austin, on the S. V. R. R., shows a strong vein, traceable 1,500', said to average 15' in width and 3.5% copper. The country is greenstone and copper mineral chalcopyrite.

Development: by a 25' shaft and 215' tunnel being driven 600' with back of 400'. In February, 1916, a 20' vein of copper ore was opened in this tunnel. There are 3 buildings. Mine has no power equipment.

VIRTUE MINES DEVELOPMENT CO. **OREGON**

Address: Baker, Ore.

Officers: J. K. Romig, pres.; M. Boswell, sec.-treas., at last report.

Cap., $1,500,000; $1 par; 1,384,075 issued.

Property: bonded in 1916 to G. W. Field & Co., of Boston, for $500,000, consists of 16 claims and placer ground, a total of 400 acres in the Virtue district, Baker county. From 1878 to 1898 the gold yield was about $2,189,000, the largest production being $259,000 in 1898. Mine was idle for nearly 15 years, but in 1917 it was reported working and electric power was installed. In 1920 the mine was worked by lessees.

Claims said to show quartz veins in serpentine striking N. W., dipping 45° to 80° S. W. and averaging 14" in width. Ore carries gold and a little pyrite and chalcopyrite.

Equipment: includes hoist, boilers, 20 stamps, vanners, cyanide plant and electric power.

WALDO CORPORATION **OREGON**

Office: G. M. Esterly, mgr., Waldo, Ore.

Cap., $100,000; $100 par. Company has but two stockholders and no stock for sale.

Property: purchased 1916 for $140,000, includes the Cameron, Simmons and Logan placer mines covering 4,200 acres in Waldo district, Josephine county, which carries auriferous gravel 10' to 25' deep that lies on a bed rock of conglomerate and sandstone with some serpentine. Gravel worked thus far is reported to have yielded 12½c. per cu. yd.

Equipment: consists of 3 ditches, 25 m. in length, 6 giants and hydraulic plant.

Annual output averages $45,000 in gold dust and $10,000 in platinum. Considered a valuable property.

WALDO MINE **OREGON**

Described in Volume XIII. See John Hampshire Co.

WALDO SMELTING & REFINING CO. **OREGON**

Office: 301 Mining Exchange Bldg., Colorado Springs, Colo. **Mine office:** Takilma, Josephine county, Ore.

Inc. Dec. 3, 1901, in Colorado. **Cap.,** $3,000,000; par $100.

Property now owned by John Hampshire Co., which see.

WALLOWA COUNTY MINING & DEV. CO. **OREGON**

Address: J. A. Burleigh, Enterprise, Ore.

Officers: Jesse Walker, pres.; J. A. Burleigh, sec.; G. W. Williams, treas.

Cap., $200,000; $1 par; all issued.

Property: 14 claims, on Lick Creek, Wallowa county, said to show a vein in greenstone, limestone and argillite, cut by aplite dikes. **Development:** by 125' shaft.

WAR EAGLE MINING CO. **OREGON**

Address: Medford, Ore.

Inc. 1918, to acquire holdings of the Rain[illegible]

Officers: C. M. Kid, pres.; A. L. Hill, sec. and Edward Skewis, directors.

roperty: Bertleson group and 35 adjoining lode claims formerly owned e Utah Quicksilver Co., 12 miles N. of Gold Hill, Jackson county.
)re: occurs in an andesite fault breccia and is generally low grade. A ein was tapped in 1919, said to carry 3.5-4% cinnabar. **Equipment:** in- s 12-pipe furnace.
roduction: August 1, 1918, to Jan. 15, 1919, amounted to 17,425 lb. of . June, 1919, production was estimated at 100 lb. mercury per day. **Plan** ng 500-ton furnace.

T COAST MINES CO. **OREGON**

)fficers: W. J. Zimmerman, pres.; W. M. Cake, sec.; W. W. Elmer,

ap., $1,500,000; $1 par; 890,000 issued.
roperty: the Champion, Helena, and Musick mines, 47 claims, 12 miles of Disston, Bohemia district, Lane county. Mines under lease to Mahon, of Portland, at last accounts. The Champion is said to have d $1,700,000; the Helena, $150,000, and the Musick, $180.000.
)evelopment: by tunnels. In the Champion the main lode is 3' wide t 200' in depth and below, the principal ore minerals are pyrite, chal- ite, sphalerite, and galena. The other mines contain similar complex

quipment: includes 3,000' aerial tram, 20 stamps, concentrators and -electric power plant.

T SIDE GOLD & SILVER MINING CO. **OREGON**

ddress: R. Baird, sec. and mgr., Yamhill, Ore.
)fficers: J. A. Simmons, pres.; G. W. Perkins, v. p.; R. Baird, sec.; . Busbee, treas., with C. C. Laughlin, N. H. Perkins, H. C. Gist, ors.
nc. April, 1900, in Oregon. **Cap.,** 1,000,000 shares; 1c par; 814,307 out- ing. Annual meeting, first Monday in January.
roperty: 3 patented claims, about 57 acres, at Greenhorn, Baker and counties, under lease and bond to R. Baird, at last accounts. Min- are gold, silver, copper, lead. A number of veins cutting through stone and schist run at right angles, the N.-S. veins dipping E., and veins south.
lteration and faulting are considerable. Ores contain free gold sul- s in quartz and dolomite; cinnabar is also reported. Shipping ore is o average about $60 per ton and milling ore $20.
)evelopment: by several shallow shafts, comprises about 1,000' of work- greatest depth being about 40'.
quipment: includes a small steam pump. About $10,000 spent in de- **ment** to 1917. No recent returns.

TED MINING CO. **OREGON**

ddress: Aldred Whited, Unity, Ore.
nc. Nov., 1916, in Oregon. **Cap.,** $15,000; $1 par.
roperty: 8 claims situated 5½ miles south of Unity, Baker county. eins show shoots of gold-bearing quartz, the largest one along the g wall of a porphyry dike.
evelopment: includes 2 crosscut tunnels with drifts on the veins. ment: 10-stamp mill with amalgamating plates and Wilfley tables. developing late in 1916. No recent returns.

PENNSYLVANIA

RICAN ZINC & CHEMICAL CO. **PENNSYLVANIA**
bsidiary of American [illegible] Office: 61 Broadway, New

ap., $2,500,000.
Works: at Lanyelo[illegible] for treat-
of 7,000 to 8,000 [illegible] am of 3,000

to 4,000 tons of spelter. Company also owns a sulphuric acid plant with a capacity of 7,000 to 8,000 tons monthly. This property represents an investment of over $4,000,000, and may be divided into the following heads:

1. Zinc smelting plant. This consists of eight blocks of two furnaces each, each block containing 912 retorts, making a total capacity of 7,2 retorts. Each block is equipped with waste-heat boilers; the furnaces are fired by gas-producers, one producer to each block. The smelting plant has complete accessories, such as power-house, two steam-turbine generator units of 2,000-k. w. each, up-to-date machine-shop, carpenter-shop, and pottery plant.

2. Sulphuric-acid works. This department has a chamber-capacity from 8,000 to 8,500 tons of 60° B. acid monthly, and also has a contact plant for the conversion of about 3,500 tons of 60° acid into 66° acid. The raw material used in the manufacture of sulphuric acid is zinc-sulphide ore for the roasting of which four Hegeler kilns with necessary accessories are available. The kilns have a capacity of about 5,000 tons of ore monthly, which would correspond to approximately 5,000 tons of 60° acid. For the handling of the crude ore the works are equipped with modern drying and sampling plants, and storage-bins with a capacity of about 18,000 tons, with overhead cranes. The sulphuric acid plant is one of the most modern in the country, and can be expanded for the production of other acid-products whenever desired.

3. Coal mine. The company owns coal-mining rights over an area of 2,450 acres of the Pittsburgh and Rooster veins. It was estimated that there was a coal reserve in this tract of over 18,000,000 tons, from which only a little over 1,000,000 tons have been mined. Of the above acreage the company owns surface and mining rights on 723 acres and mining rights on the remainder. The mine is equipped to produce about 500 tons of coal monthly. The coal mine is subject to a mortgage of $476,0 against which there was on deposit with the Colonial Trust Co., of Pittsburgh, on December 31, 1918, a sinking-fund credit of $23,906.

4. The Langeloth Townsite Co. was incorporated for the purpose of taking over a block of real estate adjacent to the works of the American Zinc & Chemical Co., embracing about 400 acres, with the idea of developing it into a modern industrial town. The town-site has nearly 400 houses completed, some of which have been sold and others leased to the workmen on easy payments. Modern sewage, complete sanitary water-supply, first-class schools, and playgrounds have been provided.

5. For the convenience of the workmen, the company operates a general store under the name of the Langeloth Mercantile Co. The store building is owned by the American Zinc & Chemical Co., which leases it to the Mercantile Company. The latter sells from $300 to $400 worth of merchandise per day, on which it attempts to make profit only sufficient to cover operating expenses.

6. By-products plants. The company owns and operates:

(a) A zinc-oxide plant with a capacity of about 500 tons monthly.

(b) A zinc-dust plant which produces from 150 to 200 tons monthly.

(c) A zinc-sulphate plant which has been running only intermittently owing to lack of demand for this material.

AMERICAN VANADIUM CO. **PENNSYLVANIA**

Described in Volume XIII.

Merged 1919 into the Vanadium Co. of America, which see under Pennsylvania.

DONORA ZINC WORKS **PENNSYLVANIA**

Operated by the American Steel & Wire Co., a subsidiary of the United States Steel Corporation.

Works: at Donora, near Pittsburgh, Pa. Plant includes bins of 2,000-ton capacity, crushing plant for ore that requires reduction, 6 Hegeler hearth roasting furnaces, mixing house, 10 Hegeler furnaces each con-

912 distillation retorts, pottery, power plant, and sulphuric acid . Furnaces are fired by producer gas.

LE METALLIC COPPER CO. **PENNSYLVANIA**

nactive. **Address:** care H. D. Deshler, Belvedere, N. J. **Branch office:** Haas Bldg., Allentown, Pa. **Mine office:** R. F. D. 3, Fairfield, Adams ty, Pa.

Officers: at last accounts, F. H. Cuyle, pres.; Dr. P. A. Stem, v. p.; A. Fickert, sec.; Thos. Zellner treas.; Owen H. Nagle, gen. mgr., with A. iefenderfer, directors.

nc. 1903, in New Jersey. **Cap.**, $500,000; $1 par, and reinc. Dec. 9, in Pennsylvania; $150,000 in treasury after raising $60,000 to build a ter in 1911.

Property: 500 acres in Jacks Hollow, on the Maryland border, one-mile from and crossed by the Western Maryland railroad, near Char-

Development: by open-quarry work from pit 200' across, connected with ter by 750' aerial rope tram. The mine is apparently a large open-cut with water. Careful examination of exposed rock and surface ma- said to show no indication of copper whatever. It is also reported a pile of crushed ore in smelter bins, 1915, did not contain the minutest cle of mineral. Samples of matte from furnace said to run 2% cop- which evidently came from the pyrite used for flux.

Equipment: includes a 250-h. p. steam plant, 150-h. p. engine and a 2⅝" drill, with office and laboratory. Smelter built in 1911. Regarded as ueless property.

IONAL COPPER MNG. & DEVEL. CO. **PENNSYLVANIA**

Out of business. Property, described in Vol. XII, is now owned by . Deshler.

TED M., M. & COPPER SM. CO. **PENNSYLVANIA**

See description under Maryland.

GIN COPPER CO. **PENNSYLVANIA**

Last address: 12 West Bldg., York, Pa. **Mine office:** Charmian, Frank- ounty, Pa.

Officers: John H. Dechert, pres.; Chas. E. Wills, v. p.; Clarence A. , sec.; Harry S. Wiest treas.

Property: about 1 mile N. of Charmian, in the Blue Ridge mountains, the Maryland state line, shows ore carrying native copper, with silver gold values said to give assays of $25 to $600 per ton.

Development: by 215' shaft sunk at 47°. Four diamond drill-holes, of o 800', were bored, 1907.

Equipment: includes small hoist and compressor. Is considered an un- ising venture. Idle.

SOUTH CAROLINA

MINING CO. **SOUTH CAROLINA**

A. K. Blakeney, Kershaw, S. C., or J. H. Watkins, 200 Fifth

gold mine, near Kershaw, Kershaw county,
rs for its gold ores, and operated 1915-18

Geology: rocks of the region are sericite and quartz-schists, [illegible] from old volcanic tuffs and porphyry. Pyritization is widespread deep-seated, the whole series of schists being more or less impreg with pyrite, but along certain zones this mineralization is highly in fied, the schists in some bands holding so much pyrite that the rock 25 to 30% sulphur; wide belts carry 15 to 20% sulphur, and in spots pyrite occurs in lenses around which the schists are folded. gold values vary with pyrite content.

Development: by extensive workings, open-pits, a 100' shaft drill-holes, which prove the existence of a large quantity of ore 25% sulphur.

Equipment: complete mining plant and 300-ton mill with crushe and jigs, producing a concentrate containing 47% sulphur.

SOUTH DAKOTA

Metal mining in the State is practically restricted to the gold of the Black Hills, in which silver and tungsten are important by-p A little lead, tin, and various rare minerals of chemical importance mined.

Preliminary estimates of the U. S. Geol. Survey, indicate th mines in South Dakota produced $5,391,000 in 1919, as compare $6,563,337 in 1918, and 114,000 ounces of silver as compared with ounces in 1918. The ores shipped to smelters contained only quantities of lead and copper.

The Homestake, Trojan and Mogul companies were the only operators in 1919.

Our thanks are due to Mr. Otto Ellerman, State Inspector of for information concerning the mines described herein.

The companies are arranged alphabetically.

AMERICAN MINING CORPORATION — SOUTH DA

Address: Deadwood, S. D. Owns the Bismarck mine at Fl gold-silver-tungsten producer. Mill and cyanide plant on the ground

AMERICAN TIN & TUNGSTEN CO. — SOUTH DA

Address: 50 Broadway, New York City.

Officers: Simon Lederer, pres.; Leo Bloch, v. p.; Robt. S. W sec.; Chas. P. Bland, treas.

Inc. Jan., 1917, in Delaware. **Cap.**, $1,500,000: par $1; 1,200,00 Listed on New York Curb; quoted at ⅝ January, 1920.

Property: the old Harney Peak tin mines and claims, in Pen county, under lease to National Tin Corporation, this company to g of net profits as royalty. Company shares have been extensively

ANACONDA GOLD MINING CO. — SOUTH DA

Idle. **Address:** Metropolitan Life Bldg., Minneapolis, Mi **office:** Roubaix, S. D.

Officers: Martin H. Brede, pres.-mgr.; Daniel Lynch, v. p.; D. H sen, treas., with Adolph Carlson, G. G. Gustafson, H. M. Hok Malm, O. H. Carlson and G. A. Mattison, directors. C. D. Ap

Inc. in South Dakota. **Cap.**, $1,500,000; $1 par; half comm preferred stock; 498,405 shares issued.

Property: 34 claims, patented, 685 acres, in Roubaix district, a wood, carries gold-quartz ore in fissure veins running N. W.-S E of 50° N. and said to average $8 per ton.

Development: 340' shaft and crosscuts.

Equipment: steam power and compressor. Plan sinking 3- shaft to depth of 700', down 135' May, 1917. Management co raise $50,000 for further development work.

BISMARCK MINE — SOUTH

Ed. Manion, supt., Deadwood, S. D.

A gold mine at Flatiron near Deadwood, Lawrence county, said to con- gold-silver ore of milling grade. Equipped with 200-ton cyanide mill. Operated intermittently by lessees. Treated 5,120 tons of gold-silver valued at $18,864 in 1918 and shipped 30 tons of tungsten ore worth 82.

ACK HILLS COPPER CO. **SOUTH DAKOTA**

Idle. **Office:** Rochford, Pennington county, S. D.
Officers: E. A. Hoffman, pres.; George M. Thresher, sec.; John H. Kerr, as.

Inc. June 2, 1900, in South Dakota. **Cap.,** $2,000,000; shares $1 par.
Property: 27 claims, 510 acres, in the Hornblende district, shows fissure is in slate, with gossan capping, carrying carbonate and oxide ores. body is said by company to average 20′ width, and to be more than in length, opened by incline shafts and crosscut tunnels, giving a l of about 1,200′ of underground openings. Ores average, 1.5 to 3% per, with small values in gold, silver and nickel. Has steam power, 60-h. p. hoist, good for 1,500′, and 4 power drills. Property considered loubtful value.

ACK HILLS TUNGSTEN M. & M. CO. **SOUTH DAKOTA**

Dead. Property sold at sheriff's sale, August, 1917, to Elkhorn Tung- Co., which see.

PITAL GOLD M. & M. CO. **SOUTH DAKOTA**

P. A. Griswold, pres.; R. M. Harrot, sec.-gen. mgr.
Reorganized 1917, in South Dakota. **Cap.,** $1,500,000.
Property: 60 acres, in Deadwood gulch, adjoining the Trojan mine and to carry ore assaying from $3 to $12 per ton. Development was to arted in 1919.

LUMBIA MINING CO. **SOUTH DAKOTA**

Idle. **Address:** Richard Blackstone, Lead, S. D.
Inc. in South Dakota. **Cap.,** $500,000; 300,900 shares issued.
Property: a group of claims at Keystone, Pennington county. Gold ore h $65 per ton said to have been shipped, from a quartz vein in diorite chist, strike N. 56° E. dip 80°.
Development: 225′ shaft and 300′ of drifts.

BERLAND MINING CO. **SOUTH DAKOTA**

s. Graham, receiver, Hill City, S. D.
Property: the J. R. mine, long idle owing to differences among the holders which ended in a receivership, January, 1919.

ER PEAK COPPER CO. **SOUTH DAKOTA**

Office: Roubaix, S. D. Burt Rogers, sec., Black Hills Trust & Sav. Bldg., Deadwood, S. D. D. Grupe, pres.; John O'Brien, v. p.-supt.; ohn Plunkett, directors.
Cap., $1,500,000; $1 par; assessable; 100,400 shares outstanding.
Property: the Jungle mine at the southeast base of Custer Peak, show- porphyry dike cutting schist with 5′ of copper ore on both walls. ngle mine was acquired in 1918.
Development: includes 65′, 90′ and 300′ shafts, showing a 12′ vein of pper ore. The older holdings of the company, 1½ miles from the mine and S. W. of Deadwood, are said to carry average values of $6 in oxidized ore to depth of 100′, changing below to pyrite and chal- te, showing on the 200′ level, a vein of 85′ width, assaying about pper with $1.60 in gold.
Equipment: includes hoist, air compressor, pump and steam power. A 0-ton dry concentrator was reported in operation, May, 1919, at the mine.

ING MINING CO. **SOUTH DAKOTA**

Address: Deadwood, S. D.
Officers: Fred W. Cutting, pres.; Burt Rogers, sec.
Property: adjoins the Homestake on the W., near Central, Lawrence

county. Several veins have been opened by tunnels and a 500' two-co partment shaft is being sunk, down 250', July, 1919.

Equipment: includes elec. power, single-drum hoist and compress About 16 men employed.

CUYAHOGA MINING CO. SOUTH DAKOT

Address: Custer, S. D.; J. H. Snyder, v. p.

Property: the Spokane silver-lead mine. In 1917 the shaft was sunk 200'. Ore containing 43% sulphur and some copper was shipped to Cle land, Ohio, for chemical purposes. Good gold ore was opened and hoist and additional boilers installed. Presumably idle, 1918-19.

DAKOTA CONTINENTAL COPPER CO. SOUTH DAKOT

Idle. **Office:** 300 Commonwealth Trust Bldg., Harrisburg, Pa. C pany is a reorganization of the Continental Copper Mining & Smelting C

Property: near Sheridan, Pennington county, S. D., in the Black Hi known as the Dakota-Calumet, or Lillian property, 52 claims, patented acres. Claims show quartz schist with a pyrrhotized zone, from 50' to wide, traceable one-half mile. The mineralized zone shows bands of nea pure pyrrhotite, with occasional traces of copper. At boundary betwe oxidized and unaltered material, a little copper is occasionally found, a secondary concentration. Small amounts of rich ore were found at surface and down to 25-30', but property is valueless as a copper mine. E tensive diamond drilling and exploration work prove a large amount pyrrhotite available for acid making. A body of gold quartz ore of co mercial grade was cut in diamond drilling and one shipment was made 1918.

Development: includes an 850' shaft, 1,170' crosscut tunnel and 9 tunnels.

Equipment: includes 300-h. p. steam plant, with hoist good for 1,5 7-drill compressor, all necessary shops and an old smelter of no pre value.

Company had a bond on the Golden Summit gold mine 4 miles Hill City and did some diamond drilling in 1918.

DEADWOOD-HEIDELBERG MINING CO. SOUTH DAKO

Address: Deadwood, S. D.

Officers: John Treber, pres.; H. S. Vincent, v. p.; Jacob Goldb treas., A. T. Roos, mgr., with B. Stewart, Jim Hogarth and Geo. Pet directors. Wm. L. Treber, sec.

Inc. June, 1914, in South Dakota, by the Deadwood Business Club an attempt to promote the mining interest of the section. **Cap.**, $125,0 25c par; 295,000 issued. Annual meeting in June.

Property: 9 claims, unpatented, 185 acres, on Two Bit Creek, La rence county, shows gold ore in a contact deposit between shale and p phyry. The orebody is reported to be 20' thick, 6 to 15' wide, 200 to 3 long, with N. E. course and dipping W. Milling ore averages $5 per t Ore reserves said to be 5,000 tons.

Development: 7 tunnels, 65-380' long, with deepest workings at from surface; total development, 2,000'.

Production. 180 tons, averaging $20 per ton. Management plans sh ing to the contact of the shale and underlying quartzite. Inactive, 1918.

DEADWOOD LEAD & ZINC CO. SOUTH DAKO

Address: Deadwood, S. D. Aaron Dunn, supt.

Property: in Spruce gulch, near Deadwood, Lawrence county, un development by tunnels.

Ore: complex sulphide carrying gold-silver-lead-zinc values. A stamp concentrator installed July, 1918, made but one test run. Con trates showed $25 p. t. in gold, $15 in silver, 22% lead and 8% zinc.

ECHO GOLD MINING CO. SOUTH DAKO

W. L. Mason, gen.-mgr., Manchester, N. H.

Officers: Dr. Henry H. Jewell, pres.; Dr. Andrew J. Pitman, v. p.

nelling, sec.; Judge Geo. A. Wagner, treas., with Herbert W. Lake, John J. Gailey, John S. Rand and Burt Rogers, directors.
Inc. 1892, in South Dakota.
Property: 62 acres, in the Maitland district, 4 miles N. W. of Dead-l, Lawrence county.
Development: by 200' vertical shaft, and several tunnels. About 100' the shaft a pyrite vein was cut showing 4' of lead-silver-gold bearing Shaft is being extended to 500' depth.
Equipment: includes a special electric power line to shaft house, 25-h. p. ric hoist, air compressor and sinking pump. Management reports com-is well financed, and is yet in the prospective stage.

:HORN TUNGSTEN CO. **SOUTH DAKOTA**
Office: Hill City, S. D.
Officers: Arthur E. Wiedmann, pres.; Dr.: E. K. Curry, 1st v. p.; Dr. James, 2nd v. p.; C. W. Crosby, sec.-mgr., 3310 Harrison Ave., Kan-City, Mo. A. A. Anderson, supt.
Inc. Feb., 1917, in Arizona. **Cap.**, $2,000,000; $1 par; all outstanding. pany purchased the property of the old Black Hills Tungsten Mining illing Co. at sheriff's sale, August, 1917.
Property: 361 acres near Hill City, Pennington county, shows quartz dipping 70°, said to contain tungsten as wolframite. Developed by and equipped with electric and steam power and a concentrator. to sink shaft and recommence operations, 1920.

MOUNTAIN M. & M. CO. **SOUTH DAKOTA**
Address: Lead, S. D.
Operated the Slavonian group near Crown Hill and treated the ore e Deadwood Standard mill during part of 1917; estimated production tons of ore valued at $9,215.

MONT FRACTION **SOUTH DAKOTA**
Address: Jas. T. Street & Sons, 822 W. Main St., Lead, S. D.
Property: 1 claim in Whitewood mining district, near Lead, Lawrence ty. Vein runs S. E.-N. W. dips 80°, and averages 3' in width. Assays ge 49.6 Mn., 1.82% Fe., 3.76% Silica, 0.0039% Phos.
Development: by 160' shaft and 145' tunnel. The ore is hand-sorted. uced 31.2 tons of ore in 1918, at a cost of $1,500 and valued at $1,670. hipments made.
Mine examined by State Mine Inspector Ellerman.

D DOLLAR MINE **SOUTH DAKOTA**
n Crown Hill district, Black Hills, S. D. Leased to Coleman, Madill, others at last accounts.
Property has been a gold producer, whose ore was treated in the Mogul near Deadwood.

DEN CREST MINING CO. **SOUTH DAKOTA**
Address: Deadwood, S. D.
Owned by F. W. Bird, Victor Bird, Alex Bird and J. G. Playford, all of Deadwood, S. D.
Property: 12 patented and 8 unpatented claims, 275 acres, in Bear and Whitewood mining districts, Lawrence county, 5 miles E. of wood. **Ore:** occurs in fissure veins in porphyry, varying in size up to nd carries gold, silver, lead. Mine worked about 1902; reopened and ded in 1917, and some development work done in 1918.
Development: Nine shafts, greatest depth 335', with about 6,000' of drifts.
Equipment: includes electric double-drum hoist, 10-drill compressor, 40 stamps, 200-ton cyanide mill, Moore filter, etc.

DEN REWARD CONSOLIDATED GOLD M. & M. CO. **S. D.**
Office: 475 Fifth Ave., New York. **Mine office:** Deadwood, Lawrence ty, S. D.
Officers: C. T. Tegethoff, pres.; Harris Franklin, v. p.; with R. W. Henry de Forest, W. B. Devereaux, Walter Luttgen, Ed. de Witt W. A. Harriman, all of New York, directors. W. J. Johnson, sec.; N.

E. Franklin, asst. sec., Deadwood; Henry Schnitzel, gen. mgr.; F. Baldwin, gen. supt.

Inc. June 25, 1896, in South Dakota. **Cap.**, 1,000,000 shares; $10 ... 841,793 shares issued to June, 1916. Stock transferred at company's ... Annual meeting 1st Tuesday in August at Deadwood, S. D.

Property: 442 patented claims, 3,391 acres at Terry, in Whitewood ... Bear Butte mining districts, near Deadwood, includes, the Union and ... toria mines.

Ore: occurs as contact deposit in shale, carrying gold-silver values ... 75% silica. Pay ore occurs in shoots from 5-100' long, said to give ... assays of $5 per ton.

Development: by several tunnels and vertical shafts from 100-350' ... with about 15 miles of workings.

Equipment: includes electric power, electric double-drum hoist, ... pressor, 150-ton cyanide plant, 100-ton filter and 75-ton roaster. The ... nace was stopped in July, 1916, for further investigation of the blue ... which does not give high recovery. Average gold extraction is 75.5% ... Experiments failed to show a higher extraction and practically all ... was stopped in April, 1918, owing to high costs and low grade ore.

Ore reserves: estimated by management June, 1916, at 2,000,000 ...

Production: in 1911-12, $323,846 from 52,583 tons; in 1913, $423,840 ... 53,712 tons; in 1914, $369,182 from 51,355 tons; in 1915, $484,995 ... 58,837 tons; in 1916, $311,204 from 52,204 tons; in 1917, $198,040 from 33,... tons; in 1918, $36,589 from 6,542 tons.

GOLD KING MINING CO. **SOUTH DAKOTA**

Developing a gold-silver property on Silver creek, near Rochford, Pe... ington county.

Equipment: includes boilers, hoist and compressor, installed in 19...

HIDDEN TREASURE MINING CO. **SOUTH DAKOTA**

Trojan, Lawrence county, S. D. Described, Vol. XIII.

HILL CITY MINING & DEVELOPMENT CO. **SOUTH DAKOTA**

Hill City, Pennington county, S. Dak.

Officers: John Wise, pres. and gen. mgr.; with J. W. Stoner, and ... bert Booth, directors; E. A. Schilliman, sec.-treas.

Inc. 1911, in South Dakota. **Cap.**, $500,000; $1 par; 300,000 issued. ... nual meeting, March 9.

Property: 11 claims, 6 patented, 220 acres in Burnt Fork gulch, 3 ... north of Hill City. **Ore:** gold, in fissure vein, in schist; strike N. S., dip ... Said to have an average width of 16'.

Development: by shafts, deepest 200'. **Equipment:** includes ... drum hoist, compressor and a 10-stamp mill. Company planned to sink ... 400' depth and later to build a cyanide plant. No recent returns.

HILL CITY TUNGSTEN PRODUCERS CO. **SOUTH DAKOTA**

Office: Hill City, S. D. Described Vol. XIII.

HOMELODE MINING & MILLING CO. **SOUTH DAKOTA**

Idle. Silver City, Pennington county, S. Dak. L. A. Richards, ... mgr.; L. L. Farnam, supt.

Property: shows several quartz veins, 1' to 2' wide, containing ... silver, antimony, lead and zinc ore. Two veins have been opened ... one by a 200' adit, connecting with a shaft, sunk on the vein, at the ... level; a 50' winze shows the ore to be continuous to that depth. In ... workings ore varies from 12" to 18" and is 150' in length; values are ... in gold and antimony. The second vein parallels the first, is ¼ mile ... said to be 24" wide and to contain more zinc than No. 1. Two shafts, ... apart, 66' and 103' deep, respectively, have been sunk on the vein.

At ... 2, there is reported to be a 4 to 6' quartz vein ... gold-silver ... Develop... 0' shaft with 500' of drifting.

E... ... boilers and an amalgamating ... equip... ... mill, tables and classifiers.

ate shipped reported to carry 2-4 oz. gold, and 6-10 oz. silver, prin-
y as arsenopyrite. Cyanide plant to be added.

IESTAKE MINING CO. **SOUTH DAKOTA**

lain office: American National Bank Bldg., San Francisco, Cal. **East-**
ffice: 15 Broad St., New York. **Mine office:** Lead, South Dakota.
)fficers: Edward H. Clark, pres.; Frank G. Drum, v. p.; Fred Clark,
Louis P. Haggin, treas.; preceding, with Harry L. Tevis, Thos.
er and Richard A. Clark, directors; B. C. Yates, supt.; W. J. Shar-
, metallurgist; C. W. Merrill and Allan J. Clark, cons. metallurgists; R.
ayland, asst supt. and chief engineer.

nc. Nov. 5, 1877, in California. **Cap.**, $21,840,000; increased March 25,

[illegible] salaries, legal, general, etc.; bills payable; taxes; property
[illegible]

1914, amounting to 16c per ton of ore milled, 15c in
1917; 21c in 1918; 34c in 1919.
[illegible] paid monthly almost continuously since Jan.,
May, 1907, as result of a fire in the mines, and

resumed January 25, 1908; continued to December, 1909, inclusive, wh they were suspended owing to labor troubles at the mines; resumed March, 1910. Present rate is 50c per share per month. Dividends paid September, 1919, total $41,927,559.

Property: 468 claims, about 3,723 acres, in the Whitewood mining d trict, Lawrence county. The towns of Lead and Deadwood and the sett ments of Blacktail, Terraville and Central City have grown up around t mines and mills.

The first claims acquired by the company were the Grant and Old A located by J. B. Pearson, December 11, 1875. In the Fall of 1876, repres tatives of Haggin and Hearst bought these claims, and the Homest Mining Co. was incorporated. In July, 1878, the first and only assessm was levied, $1 per share; it furnished the $200,000 required to build the stamp Homestake mill. In 1899, company acquired the Highland Mi Co., an adjoining property of about 73 acres; also the Black Hills Canal Water Co., owning 40 miles of ditches, flumes and pipe-lines, with re voirs, improvements and water rights covering the water supply of De wood and Lead districts.

Geology: the orebody is a great mass of silicified slate, averaging $3 to $6 per ton in gold. The ore is several hundred feet thick and has b mined to a depth of 1,700'. This deposit lies in a mineralized zone of nea vertical Algonkian slates and crystalline schists, into which enormous mas of rhyolite have been intruded. The ore-bearing zone is approximately mile wide and several miles long. Only the northern end of the zone h been extensively developed. The deposits are not fissure veins, impregnations that appear to have taken place along two converg lines of crushing; they follow roughly the direction of schistosity and sh a general pitch southward; where several unite, the aggregate thickness over 500' and many stopes are carried across that width of ore. The lar lenses are on the west side of the zone and are flanked on the east by series of smaller parallel lenses, some of which join the larger at de Near the surface the orebodies follow the rhyolite porphyries, but at de diverge from them and become in part associated with phonolite. The varies considerably in composition in different portions of the deposit, that of the deeper levels, the unoxidized ore, usually contains either chlo or ferruginous hornblende (cummingtonite), with quartz, carbonates lime, magnesia, iron, arsenopyrite, pyrite and pyrrhotite. Ferrous mine predominated and this has been an important factor in determining metallurgical treatment. In the upper oxidized parts of the deposits the is dark red, but deeper, in the sulphide zone, is greenish-blue to blue-bl Sulphides vary in amount from 3 to 5%, and even as high as 10% or m of the ore. In the sulphide zone the distribution of gold is uniform averages $4 to $4.50 per ton. Over 60% of the ore is free milling condary enrichment has not resulted in the formation of any particu rich zones.

Development: 6 shafts; 4 in the footwall, one in the hanging, and in the lode; depths January 1, 1917, were:

Ellison	B. & M.	Golden Prospect	Golden Star	Old Brig	Gold Gate
2,195'	1,700'	1,100'	1,400'	800'	800'

The 1,850' and 2,000' levels of the Ellison shaft will eventually be c nected with the B. & M. shaft, through which outlet the bulk of the will be hoisted to surface. The B. & M. shaft is equipped with bi pockets at 800, 1,000, and 1,550', a hoist and skips, which will dump N. 8 Gates crushers, and their product carried by a belt-conveyor sy to smaller gyratories. Total cost of sinking at the Ellison shaft is n have averaged $60.64 per ft. There are in all about 130 miles of worki Underground work during 1916 amounted to 24,381'; 19,320' in 1917; 2,2 1918; 5,770' in 1919. Measured reserves are large and sufficient to

reduction plants for many years. Broken ore in stopes amounts to ,886 tons, a year's supply for the mills. A new ventilating system for lower levels recently installed includes two large electrically-driven fans.

Ore treatment: the metallurgical equipment at the Homestake is one of most modern and efficient in the country, and has been fully described in technical press. The treatment problem is simple, the ore crushes well, aging 4.7 tons per stamp daily. Amalgamation in battery and on plates llowed by cyanidation of sands and slimes separately. There are 1,020 ps employed in six different mills, the pre-war cost being 26c per ton.

Mills: at the south side—3 stamp-mills (660 stamps) with 36.356 sq. f amalgam plates; 1 regrinding plant, with independent cone system, 540 sq. ft. of amalgam plates; 4 batteries of cones for classification; 3 fying tank houses; 1 sand plant. The mills are the Amicus, Golden , Homestake and Pocahontas. In 1915 the Pocahontas mill was com- ly rebuilt. The Amicus mill was remodeled in 1917.

At the north side—2 stamp-mills (300 stamps), the Monroe mill and eral Point mill; 2 tank-houses; 2 cone-houses; 1 sand plant. Ore sup- l to these mills is usually drawn from the upper levels of the mine, and rtly oxidized.

A 5-stamp crushing and concentrating mill was built, 1916, for treating sten ores. It contains an amalgamation plate, cone classifiers, two Deis- nd one Wilfley tables for cone products, two small ball-mills for grind- middlings, and another Deister table to concentrate the ground pro- Tailing passes to the cyanide plants. This mill has operated con- ously on ore averaging 2% WO_3, yielding concentrate carrying 54%. sales of wolframite were $229,916 in 1916; $226,535 in 1917; $167,468 in : $6,515 in 1919.

At Deadwood—A slime plant, treats the slime from both south and h side mills. At all the mills the stamps weigh 1,000 lb. and drop 10", ng 88 drops per minute Homestake order of drop is 1-3-5-2-4 or -5-3. A 25-h. p. back-geared motor drives each 10 stamps. Ratio of r to ore is large being 10 or 12 tons of water to one of ore. A minimum bout 50,000 tons of water per day is used, most of it from Spearfish k and its tributarties, being conveyed over 20 miles in ditches and ied clay pipe, and costing 10c per ton of ore stamped.

Inside amalgamation is practiced, quicksilver being fed to the mortar. k-blocks are cleaned in rotation, at intervals of about 2 weeks; outside s, except those of the fourth row, are cleaned and dressed daily. th row plates are dressed at 2-day intervals. Amalgam is retorted times each month. Oil-fired retorts are used, the resulting bullion melted in coke-fired furnaces.

A ball-mill is being tested for reduction of Homestake ore.

Regrinding is done in tube-mills. In cyaniding the usual methods are ly conformed to. A recovery is made of about 94% of the value in the 72% by amalgamation and 22% by cyanidation.

Power and equipment: company has hydro-electric plants at Spearfish Englewood. Power equipment includes a steam-driven electric gener- station at Lead, maximum capacity, 4,000 k. v. a. The company ites its own machine shops, carpenter shops and foundry. Power used out 1.15 k. w. hr. per ton of ore treated.

The Homestake Mining Co. has long been known for the way ich it has looked after the welfare of its 1,630 employees. In 1914, it leted a recreation building, containing a theatre with seating capacity 00, library, swimming pool, gymnasium, bowling alleys, billiard and ement rooms. Wages are from $4 to $5 per day underground and from on the surface.

Production: to Jan. 1, 1920, $164,023,965, exclusive of wolframite. Re- production has been:

Year	Ore milled tons	Recovered per ton	Total cost per ton
1919	1,192,588	$3.6443	$3.330
1918	1,628,630	3.633	2.700
1917	1,677,623	3.946	2.900
1916	1,600,220	4.0813	3.110
1915	1,573,822	4.0848	2.6561
1914	1,587,774	3.8797	2.9155
1913	1,540,961	4.0148	2.7258

At the end of 1918 the mines and mills were operated at only 77 per cent capacity. Production continued steadily during 1919, until September 25, when a fire was discovered on the 800' level, and it was found necessary to flood the mine to the 600' level. During October and November operations were necessarily curtailed, but they were resumed December 1.

In our opinion the Homestake is the greatest gold mine in the world, judging by its past performance, present condition, and possibilities. Management says little, but produces the gold and dividends.

IMPERIAL COPPER CO. SOUTH DAKOTA

Idle. Property in Custer Peak district. Described in Vol. XIII.

LAUREL GROUP SOUTH DAKOTA

Owners: August Peterson, Nemo, S. D. E. A. Skalinder, Joe Kelly, Deadwood, S. D.

Property: 4 unpatented claims, 60 acres, in Greenwood mining district, Lawrence county, developed by 495' tunnel and 90' shaft, said to contain free milling gold and silver, assaying $2.40 to $10 per ton. Expended $12,000 during 1918. No shipments made.

MALONEY-BLUE LEAD COPPER M. & S. CO. SOUTH DAKOTA

Address: 215 Ry. Exchange Bldg., Chicago, Ill., and Hill City, S. D.

Officers: M. T. McCaskey, pres.-mgr.; F. A. Poor, v. p.; J. G. Thomas, sec.; R. N. Baylies, treas.

Inc. 1899, in South Dakota. Cap., $750,000; $1 par; 670,000 outstanding.

Property: 23 patented claims, 340 acres, near Keystone, Pennington county, shows copper ore in limited amount.

Worked by lessees in 1918, who are reported to have shipped 580 tons to the Omaha smelter, averaging 4.46% copper and 1.38 oz. silver, valued at $8,202.

MOGUL MINING CO. SOUTH DAKOTA

Address: Terry, S. D.

Inc. 1905, to take over holdings of the Horseshoe Mining Co. Company treated ore from its own mine and other companies, and operated the mine of the Ofer Mng. Co. at Trojan, Lawrence county. A 1,200' tunnel on the Ofer mine was completed in 1918 and 33,750 tons of ore shipped to the Mogul plant returned $169,974.

Equipment: includes 1,600' aerial tramway.

Production: treated 59,384 tons in 1912, valued at $242,567; 5,593 tons in 1913, valued at $44,117; 21,770 tons, in 1914, valued at $141,298; 37,[illegible] tons in 1915, valued at $161,605; 38,671 tons in 1916, valued at $19[illegible] 35,980 tons in 1917, valued at $187,317 and 33,750 tons in 1918, valued at $169,975. All work was suspended October, 1919.

MONTEZUMA & THE WHIZZERS MINE SOUTH DAKOTA

Address: J. T. Milliken, Deadwood, S. D.

Property: 150 acres, on the divide between Deadwood and White[illegible] Cañon, and on [illegible] Creek and West Gold Run, near Lead City, S. D. Property shows [illegible] schists, slates and quartzite, and carries a [illegible] vein, of 45° [illegible] ar width traceable 3,000'. Principal claims [illegible] Emanuel S[illegible] Whizzers, and Brownie No. 3 [illegible] called [illegible] The first named has chalcopy[illegible] carrying 0.5 to 1.5% copper [illegible]

[illegible] ing, and has produced the

0 tons of low-grade fluxing ore, sent to smelters at Deadwood and Rapid until the latter was closed down. A 22′ winze, below the water-level, gave d samples, assaying $16.80 gold per ton.

The Montezuma claim, near West Gold Run, has 2 short tunnels, showing assaying up to 1 oz. silver and $53.70 gold per ton. Though low in average e, the property is considered promising, because of the enormous tonnage red, but needs big capital to develop. Examined and reported favorably on eo. Huston, of Mullan, Idaho, and Nicholas Treweek, of Salt Lake City. Property acquired in 1917 by J. T. Milliken, of St. Louis, Mo., who is loping the Oro Hondo nearby. Mine was unwatered and diamond drilling rway since 1917.

TIONAL TIN CORPORATION **SOUTH DAKOTA**

Address: 61 Broadway, New York City.

Officers: Simon Lederer, pres.; Henry E. Vaughan, v. p.; Fred A. is, treas.

Inc. March, 1919, in Delaware. **Cap.**, $1,000,000; 50c par; amount outling not divulged. Stock listed on New York Curb and quoted at $7.50 ctober, 1919, and at $13 in January, 1920. Security Transfer & Registrar registrar and transfer agents. Company has a 20-year lease on the mines mill of the American Tin & Tungsten Co., the latter company to receive of the net profits.

Property: the old Harney Peak Tin Co. property, 6 claims and a mill-on the Keystone branch of the Ch. B. & Quincy R. R. at Keystone, Penton county.

Ore: occurs as scattered grains of mineral in quartz veins and pegte dikes, the tungsten as wolframite and ferberite, the tin as cassiterite. In Cowboy mine the cassiterite occurs in lenticular quartz mica veins, 12"-2' , with strike N. 54° W. and dip of 67° N. E. Stoping operations between 00 and 250′ levels claimed to have broken 6,000 tons of 1.98% ore. The awk mine is developed by a 100′ shaft, said to show a 3′ lense of 2% ore at epth.

Development: by vertical shaft being sunk to depth of 500′. **Equip-:** an old, but recently remodeled, 125-ton concentrating mill, cyanide electric power plant, compressor, 60 h. p. hoist.

Property reported on 1917 by E. F. Schramm. Company expects to start ents in 1920.

Company has been financed and its shares are active on the New York . It is thought that if property is economically handled, it can be made to fair profits.

GOLDEN WEST MINES CO. **SOUTH DAKOTA**

Mine near Rochford, Pennington county, S. D. Described in Vol. XIII.

PURITAN MINING CO. **SOUTH DAKOTA**

Address: Lead, South Dakota.

Officers: Wm. J. McGoffin, pres, and mgr.; L. Herseth, v. p.; P. A. irst, sec.; W. C. Nissen, treas., with S. Ruud, W. Worth, and A. Randirectors.

nc. 1915, as a reorganization of the Puritan Mining Co. **Cap.**, $1,500,-hares; $1 par; non-assessable; 200,000 shares issued. Annual meeting in

roperty: 60 patented acres, in Whitewood mining district, Lawrence , shows an orebody, 28′ thick in quartzite, carrying gold ore said to assay per ton. Developed by several shafts to depth of 190′.

quipment: includes steam hoist, 6-drill compressor, pump, and a 250-ncentrating mill with cyanide unit.

roperty has been idle for several years, owing to litigation, and as mill ave to be remodeled at a cost of $25,000, and company has no funds, the k is not bright.

RELIANCE GOLD MINING CO. **SOUTH DAKOTA.**

Office: 218 Tribune Annex Bldg., Minneapolis, Minn.. **Mine**

office: Trojan, Lawrence county, South Dakota. F. C. Bowman, gen ... C. O. Veker, sec.

Property: the Reliance mine, at Trojan, shows gold ore in quartz ... **formation. Orebody said to have** average width of 8' over a distance of ... **and to assay $4 per ton.**

Equipment: includes a 30-stamp mill, treating slime by the cyanide ... decantation, counter current system, drills and air compressor. During ... mill treated 13,524 tons of ore, yielding $49,893.

Work was suspended in November, 1916, due to low value of ore.

NEW SILVER QUEEN MINING CO. SOUTH DAKOTA

Address: Galena, S. D.

Property: in Galena district, Lawrence county, under development ... 1917. Shipped 144 tons of lead-silver ore valued at $1,995 in 1917, and 57 ... valued at $2,093 in 1918.

NORTH HOMESTAKE MINING CO. SOUTH DAKOTA

Address: A. Maitland, Negaunee, Mich., pres and controlling owner; A. F. Maitland, v. p.; T. C. Jates, sec.

Inc. in South Dakota. **Cap.**, $6,000,000; $5 par; 1,000,370 shares ... standing.

Property: 77 patented claims, 1,100 acres at Maitland, Lawrence county, ... shows veins of quartz and sulphide ore, carrying gold and silver values.

Development: by 750' vertical shaft and 600' drift on the 600' level ... crosscuts E. and W. for 200' and 100', respectively.

Equipment: includes 125-ton cyanide mill, electric power, 4 electric **pumps, 2 compressors and hoist.** Mine is credited with a production of $1,5... **000 under former management.** Development work carried on intermittently **during past 5 years has so far failed to disclose new orebodies of commercial grade.**

Work suspended in September, 1916, but mine was being kept dry, at ... accounts.

OFER MINING CO. SOUTH DAKOTA

Property: in Bald Mtn. district, near Trojan, Lawrence county, ... ated by Mogul Mining Co., which see.

OLAF SEIM MINE SOUTH DAKOTA

Olaf Seim, owner.

Property: 1 mile from Deadwood, Lawrence county, adjoining ... Montezuma and the Whizzers on the north, carries pyritic ore high in sulphur. Operated during part of 1918.

Production: 1,150 tons averaging 38% sulphur. During 1918, 916 tons **shipped returned $7,200.**

ORO HONDO MINE SOUTH DAKOTA

Address: E. W. Talbot, supt., Deadwood, So. Dakota.

Property: at Deadwood, So. Dakota, is said to show replacement ... posits in schist.

Development: by 2,200' vertical shaft. Did about 2 miles of diamond drilling, 1916, presumably in search of southerly extension of the Homestake orebodies.

Management does not furnish or publish details of its operations, but is reported developing in 1919.

PURITAN MINING CO. SOUTH DAKOTA

Address: Deadwood, So. Dakota. Described in Volume XIII.

See New Puritan Mining Co.

RARE METALS CO. SOUTH DAKOTA

Address: Hot Springs, S. D.

Officers: Frank Hitch, pres.; W. N. Hunter, v. p.; Chas. Eastman, ... treas. Jos. R. Bland, chief engr.

Operates a small concentrating mill at Custer, Custer county, equipped ... **treatment of tin, tungsten and vanadium-bearing ores and the recovery of ... mica ore.**

TTLESNAKE JACK MINING & MILLING CO. SOUTH DAKOTA
Galena, Lawrence county, S. D. Owned by C. B. Harris, of Galena, and liam Sansome, of New York.
Property: several claims, including the Rattlesnake Jack mine near na, said to show gold ore assaying $15 to $20 per ton.
Development: 200′ shaft and tunnels. A 10-stamp mill and cyanide t, completed in August, 1915, ran for several months, when a shutdown was e to build a tailing dam; resumed operations in January, 1916, only to close n in April, due to a disagreement between the owners.
Reported that 1,670 tons of ore treated in 1916, yielded $14,270. Daily ton- treated averaged 60 tons when the mill was running. Idle since 1916.

)KANE LEAD CO. SOUTH DAKOTA
Address: Custer, S. D.
Property: at Custer, Custer county, 7½ miles S. of Keystone, developed epth of 200′ with levels at 60′, 100′ and 200′.
Ore: silver-lead. **Equipment:** includes 100-ton concentrator, installed l. Mine worked intermittently.
Production: in 1918, 102 tons of concentrate, containing 13.25 oz. silver 35.74% lead per ton, and valued at $4,428.

)JAN MINING CO. SOUTH DAKOTA
Office: Deadwood, S. D. **Mine office:** Trojan, S. D.
Officers: H. W. Seamon, pres.; C. M. Curtis, v. p.; A. G. Smith, treas.; l. Clark, sec.; H. S. Vincent, mgr.; above are the directors. C. E. Daw- asst. mgr. and purch. agt. H. Slaughter, mine supt.; N. B. Goodrich, mill

Inc. 1911, in South Dakota. **Cap.**, $3,000,000; par $1; outstanding 1,000,- Annual meeting in June.
The company publishes no financial reports.
Property: 166 patented claims, 1,550 acres in Bald Mtn. district, Law- e county. Ore-bodies are flat deposits and verticals between porphyry shale quartzite carrying refractory values in gold and silver.
Development: by Portland, Decorah, Empire and Eagle adits, the Port- being main outlet.
Equipment: 5 electric hoists, 300-h. p., 17,000-lb. capacity; 600 cu. ft. pressors and 2 gasoline locomotives. Mill equipment is for cyaniding. acity 400 tons daily. Crushing is by Chilian and tube mills, filtration by er machines.
Production: Total to Jan. 1, 1919, 634,000 tons ore mined, 631,540 tons ed, including 10,060 tons custom ore; also 13,420 tons shipped to smelter; value, $2,777,455. The 1918 production was 107,373 tons, valued at $530,642, ompared with 113,121 tons, valued at $471,268 in 1917.

SP No. 2 MINING CO. SOUTH DAKOTA
Address: D. A. McPherson, pres., First National Bank, Deadwood, So. ota; H. H. Stewart, sec., Lead, S. D. A close corporation, most of the k still held by original 14 stockholders.
Inc. November, 1901, in South Dakota. **Cap.**, 500,000 shares, $1 par; ssued. Original purchase of land paid for from sales of ore. Voluntary ssment of $50,000 paid in 1911 to replace mill destroyed by fire. To October, , dividends paid, totaled $451,966. In 1916, 20%, or $100,000, was distributed, was over double that paid in 1915.
Property: includes the Alma Fraction and Wasp claims at Flatiron, famous for low cost mining and milling of low-grade ore, which occurs in Cambrian formation above the quartzite. Wolframite occurs along fissures at Cambrian quartzite.
Development: by open cuts, steam shovels stripping 20′ of waste which lies an ore bed 20′ thick. The total mining cost was $1.661 per ton. In -17 a decided change was apparent in the ore extracted from the workings, the mill was dismantled and sold for scrap along with all surface equip- t.
Equipment: included a 500-ton plant, in which the ore was crushed

coarsely and cyanided direct at a cost of 59.1c per ton. In 1916 a 25-ton pl was erected for concentrating low-grade tungsten ore, crushing to ⅛" by sc re-crushing by smaller rolls, grinding by ball mill and treating coarse in je sand on Wilfleys and slime on canvas tables. Three grades of concentr were produced, 65%, 45% and 35% tungstic acid.

Production: in 1914, 176,140 tons ore, average value $2.015 gold a 28.7c silver per ton, returned $1.533, at a cost of $1.287 per ton. In 1915, co increased and operations were curtailed until shipping and milling of tungst ores added new profits.

From May, 1915, to March, 1916, company shipped 184 tons ore, averag 45% tungstic acid. In 1916, 50,035 tons of gold ore averaged $1.79 per ton; a 36 tons of tungsten concentrate were sold for $97,869. Total value in 19 was $187,775. In 1917 a final cleanup was made, netting $4,493. Tungsten co centrate amounting to 12 tons returned $19,561.

TENNESSEE

AMERICAN BALLAST CO. TENNESSE

A subsidiary of the Amer. Z., L. & Sm. Co., and described under th title.

AMERICAN ZINC CO. OF TENNESSEE TENNESSE

A subsidiary of the Amer. Z., L. & Sm. Co., and described under th title.

CHATTANOOGA COPPER CO. TENNESSE

Bought by the Ocoee Copper Co., which see.

COPPER PYRITES CORPORATION TENNESSE

Office: 17 Madison Ave., New York City. **Mine office:** Copper Tennessee.

Officers: Wm. Young Westervelt, pres.; Roger L. Wensley, v. p.; J Bailey, sec.-treas.

Inc. March 17, 1919, in New York. **Cap.,** $203,000, in 20,000 pref and 300 common shares; par $10; all outstanding. To end of June, 1919, co pany had spent over $200,000 for a 25-year lease from June 29, 1916, a development of the School property.

Property: Sec. 16, comprising 640 acres of School land, in Duck mining district, Polk county, showing ¾ of a mile of gossan outcrop. Dia

ing of the southern end gives assurance of approximately 1,500,000 tons of averaging over 45% iron, 29% sulphur and 1% copper. Management antici- s 12,000,000 to 13,000,000 tons of this grade ore.

Development: shaft A had been sunk 250', to October, 1919, and 1,200' of k done on two levels.

Equipment: includes steam hoist, air-compressor and ½ mile broad- ge railway, connecting with the L. & N. R. R. at McHarg Siding. Company s erecting a differential flotation mill to make 18% copper concentrate and a oppered pyrrhotite concentrate. Tests show latter will contain between 90 95% sulphide of iron, which can be used in the production of sulphuric acid, a sintered material for iron furnaces.

CKTOWN SULPHUR, COPPER & IRON CO., LTD. TENNESSEE

Office: 1 Gresham House, Old Broad St., London, E. C., Eng. **Mine** e: Isabella, Polk county, Tenn.

Officers: J. G. Gordon, chairman and managing director; L. G. Morti- managing director: preceding, with Col. J. Le G. Daniell, H. G. Palmer, ard Dexter and Col. H. B. Mortimer, directors; J. W. Felstead, sec.; Wil- Young Westervelt, 17 Madison Ave., New York, cons. engr. Executives e mine: W. F. Lamoreaux, gen. mgr.; J. H. Taylor, asst. gen. mgr.

Inc. in Great Britain, Feb. 16, 1891. **Cap.**, £75,000; shares £1 par, in 800 ordinary shares and 200 founders' shares. Increased 1907, to £200,000 s, increase subscribed to by the old stockholders at par, except £48,799 iary shares sold to the public at 25s. Stock is fully issued and fully paid. ts are divisible on the basis of 7%, plus one-half of the net remaining ts, to ordinary shares, balance of profits going to founders' shares. £83,900 mortgage, 6½%, debentures outstanding, July 1, 1919, against which a al reserve fund of £55,000 has been accumulated.

Recent Dividends:

	Shares Ordinary	Shares Founders' £ s d		Shares Ordinary	Shares Founders' £ s d
.....	82½%	249 3	1912.....	10%	29 19 5
.....	55%	108 18	1913.....	12½%	54 18 11
.....	10%	16 0 8	1914.....	12½%	54 18 11
.....	10%	21 17	1915.....	13¾%	9 9 10
.....	10%	28 4 5	1916.....	20%	129 17 3

otal dividends paid to all classes of shares, £558,063. Of this, £363,547, nting to 375 5/6% on shares outstanding at the times of payment, was paid e ordinary shares, and £194,506, amounting to 97,253% was paid to the ers' shares, the latter constituting the world's record for profitable copper g investment. On the 74,800 ordinary shares, from 1895 to 1907, inclusive, , or £229,636, was paid.

roperty: nearly 7,000 acres, bought for £68,057, includes the Mary, **Tennessee** and **Isabella** mines, which are active, and the Calloway and **kee** mines, which are idle. Country rocks consist largely of very tough metamorphosed, silicified mica schists, of ancient origin. The ores are ively sulphide, averaging about 2½% copper and containing minute quan- of gold and silver, sufficient, however, to be appreciable in the matte.

he **Mary** mine, which is the principal producer, has three shafts, the m 1,180' deep being now the main working shaft. The richest ore in ine is on the lower levels The workings blocked out 1,500,000 tons, ging 1.8% copper and 16% sulphur with an additional amount of ted ore of similar grade making a total of 3,000,000 tons.

he **East Tennessee** mine did not commence to produce until 1910. The ft, or operating shaft, 700' deep, has 2 compartments and yields about 30 ns per diem of ore containing 3% to 5% copper and 8% sulphur. Reserves ed through old mine, between 5,000 and 10,000 tons contain at least

2.5% copper and 8% sulphur, and there are prospects of considerable furth developments of rich ore.

The **Calloway** mine, now idle, contains between 10,000 and 20,000 to of 2% copper ore immediately below the third level, with possibility of furth developments in depth.

The **Cherokee** mine shows extensive outcrop on the continuation of th orebody of the School property and it is anticipated that it will yield fr million to five million tons of ore averaging 1% copper, 29% sulphur and 45% iro

The **Isabella** mine has thus far yielded but a few thousand tons of m a year. The ore, averaging about 0.8% copper and 29% sulphur, has as y been used for little else than experimental purposes. 5,600' of systematic di mond-drilling, however, has already revealed over 2,500,000 tons of average o with like amount anticipated making 5,000,000 tons in all, so that doubtless t property will, eventually, be worked on a considerable scale for acid and ir manufacture.

Smelter: the companys' smelter, and headquarters are located at Is bella, on the company's private, standard-gauge railway, about 2½ mi from the Mary mine. The plant contains two 500-ton, sectional water-j blast furnaces, operated by induction motor Connersville blowers of 30 ft. per revolution aggregate capacity, charged by a Freeland patent elec charger and served by an electrical traveling crane for the matte and bucket elevators for the granulated slag. Since 1902, when heap-roasting a abandoned, semi-pyritic smelting, introduced into this country from Tasmania this company, has been employed. The first fusion gives a matte containing 12-15% copper and disposes of the bulk of the non-valuable material of the o in a slag containing from 0.2 to 0.3% copper. This coarse matte is then ra to 45% copper content by a second fusion in the same furnace, usually undertak once a week. A small percentage of coke, with cold blast of from 20 to 30 pressure is used in both fusions. The 45% matte is sold to the American Me Co., of New York, and treated for them at the Laurel Hill, L. I., or the Carte N. J., smelters.

A 300-ton differential flotation plant finished 1920, produces an 18% co concentrate and a nearly pure pyrrhotite product.

In 1905, investigations were undertaken to determine the possibility of ma ing sulphuric acid from the smelter fumes. In 1906, an experimental con plant was erected, but proved unsuccessful, and in 1908, work on the pres chamber acid plant was commenced. This plant, which cost over $600,000 put into operation in less than a year from the time of breaking the ground its erection, and has since been producing from 40 to 50 thousand t per annum of 60° Beaume sulphuric acid. It was the first acid plant to cessfully convert sulphuric gases from pyritic smelting into concentrated

The credit for the successful development of the company is due pri to the chairman and managing director, Mr. Gordon, himself a technical m the consulting mining engineer, Mr. Westervelt, who developed the mine to the former manager, Mr. W. H. Freeland, who developed the pyritic sm process employed.

Production:

Year	Pounds Copper	Tons 60° Sulphuric
1919	5,290,000	*17,40
1918	5,252,000	35,00
1917	5,593,000	32,90
1916	5,129,000	†41,00
1915	5,500,000	41,00
1914	5,862,000	46,90
1913	5,811,000	48,50

1911	5,040,000	45,00
1910	4,409,000	36,80

* Six months. † 11,000 tons contained 95% to 97% acid.

Company is managed with commendable financial probity, technical ability a high order, and is heartily endorsed as worthy of confidence and invest- it.

ST TENNESSEE MINING & DEVELOPMENT CO. TENNESSEE

See Southern Zinc & Mng. Co., Inc.

ST TENNESSEE ZINC CO. TENNESSEE

Inc. in New Jersey, and registered in Tennessee. All stock owned by C. Hinn. M. Casewell Heine, atty., 1 Liberty St., New York.

Property: 173 acres, 2 miles from Newmarket, on the Southern rail- , reported to show zinc blende ore occurring in joint planes and fractures imestone beds.

Development: by drilling claimed to have proven about 6,722,000 tons ore. Work on the property includes an open quarry pit 75′ deep with 5 tun- running from it.

Equipment: includes 100-ton concentrator, 540′ cable tram and 25-h. p. it.

ENOR MANGANESE CO. TENNESSEE

R. B. Hayes, pres., Masontown, Pa.

Inc. 1919. **Cap.**, $15,000.

Property: at Butler, Johnson county, to be developed and equipped.

X MINING CO. TENNESSEE

Braemer, Tenn.

Prospecting for manganese on Little mountain, Carter county, where 15% is found that shows manganese minerals in grains and lumps in a clay bed.

OEE COPPER CO. TENNESSEE

Address: J. I. Carter, Chattanooga, Tenn.

Officers: J. I. Carter, pres.; John Stagmaier, 1st v. p.; G. H. Miller, v. p.; S. E. Whitaker, sec.; P. B. Carter, treas., with R. B. Davenport, W. S. ner, J. C. Vance and W. H. Weatherford, directors

Inc. 1917, in Tennessee. **Cap.**, $1,250,000; shares $10 par; 70,000 shares reasury to be sold to secure capital for development; 55,000 shares paid to ttanooga Copper Co. for its holdings. Practically a reorganization of that pany, the officers and directors remaining the same.

Property: 120 acres in northern part of Ducktown copper district, Polk surrounded on 3 sides by the holdings of the Tennessee Copper Co., and the ktown Copper, Sulphur & Iron Co., adjoins the East Tennessee mine on the owned by the last named company. Several diamond-drill holes prove that ore deposits of that mine extend downward on their dip beneath the land of Ocoee Copper Co., and that the ore is identical in character, mineral as- ation and occurrence with that of the East Tennessee mine. Ore was found ie drill holes at depths of 685 to 1,050′. Ownership of surface carries owner- of all beneath the surface, as Tennessee does not have an apex law. Dia- d drill records indicate an orebody 290′ long, 415′ in depth and 30′ thick, l to about 241,000 tons, allowing ⅓ for waste. Development might add to figure.

Development: by 6x14′ shaft, 427′ deep, June, 1919, being sunk to depth 1000′.

The property has attractive possibilities, which warrant a well-planned drill- campaign, in addition to the shaft work and development now underway.

OOL MINE TENNESSEE

Operated under lease by Copper Pyrites Corporation, which see.

THERN AGRICULTURAL CHEMICAL CORP. TENNESSEE

Subsidiary of Tennessee Copper & Chemical Corp'n.

Office: 61 Broadway, New York City.

Inc. August, 1919, in Virginia. **Cap.**, $1,000,000.

Company handles the entire output of sulphuric acid and phosphate fertilizer ufactured by the T. C. & C. Corp'n.

SOUTHERN MANGANESE CORPORATION **TENNESSEE**

Operates several manganese mines and is the largest producer of manganese ore in Eastern Tennessee.

Ore: occurs between limestone and decomposed quartzite and is mined by open pit method.

Equipment: includes complete treatment plant and electric smelting furnaces at Anniston, Ala.

Production: (1918) 140 tons of 26% Mn. ore from Scotia Valley; 300 tons of 22-52% Mn. ore from the Doe Valley mine; 550 tons of 25-45% Mn. ore from Taylors Valley; 550 tons of 25-26% Mn. ore from Shady Valley, and 63 tons of 49% Mn. ore from the Neely mine.

SOUTHERN ZINC & MINING CO., INC. **TENNESSEE-VIRGINIA**

John H. Caldwell, receiver, Bristol, Tenn.

Officers: E. L. Patton, pres.; Geo. F. Reynolds, v. p.; J. E. Kingsland, sec.-treas., with S. V. Fulkerson, Horace D. Fry, Kirby Thomas and H. G. Peters, directors.

Inc. in Delaware. **Cap.,** $1,600,000, in $600,000 7% cum. pfd. and $1,000,000 common stock; shares $10 par; full paid; non-assessable.

Property: mineral rights of Fall Branch and Arcadia mines, 1,125 acres: the Fall Branch property, 225 acres, is in the S. W. corner of Sullivan county, Tenn., 7 miles S. W. of Fordtown; the Arcadia property is in Sullivan county, Tenn. ,and Scott county, Va., about 12 miles N. of the Fall Branch property.

Ore: carries zinc in Knox dolomitic limestone; said to be in the same ore-bearing zone as the Mascot and Bertha mines. Prospecting has shown 4 parallel veins. No. 1 vein is opened by a system of open cuts and a 127' incline shaft that has exposed the ore for 300' along the strike. The greater part of this work was done under lease by the East Tennessee Min. & Dev. Co., which built a mill prematurely and exhausted its funds. A rough estimate of ore in No. 1 vein gives 188,000 tons of 4% zinc ore above the 100' level. Veins 4, 5 and 6 parallel No. 1, but have had no systematic development.

Mill: 100-ton capacity, equipped with "Clifford" dry process system. J. H. Banks states in his report: "I consider this a very promising zinc property and can unhesitatingly recommend its further development." No work done in recent years owing to litigation with general creditors.

TENNESSEE COPPER & CHEMICAL CORP'N. **TENNESSEE**

General office: 61 Broadway, New York. **Corporate office:** Millbrook, New York.

Officers: Adolph Lewisohn, pres.; Sam A. Lewisohn, v. p.; E. H. Westlake, v. p.; F. M. Loper, sec.; E. H. Westlake, treas.

Directors: Jules S. Bache, J. Parke Channing, Wm. B. Joyce, H. K. Kilborn, Adolph Lewisohn, Sam A. Lewisohn, S. S. Rosenstamm, J. H. Susman, Richard Sutro, Martin Vogel and E. H. Westlake. Annual meeting, fourth Thursday in April.

Inc. Oct. 11, 1916, in New York, to re-finance and take over control of Tennessee Copper Co. (which see), through stock ownership. Stockholders of old company were given privilege of converting stock share for share, and of subscribing for an equal additional amount of the new stock at $16 per share.

In August, 1919, company organized the Southern Agricultural Chemical Corp. (which see) to handle its acid and fertilizer business.

Capital: 800,000 shares; no par value; increased May 29, 1919, from 400,000 to provide funds for the fertilizer manufacturing business. Holders of voting-trust certificates were given right to subscribe for 100% of their holdings at rate of $12.50 per share, the stock subscribed for to be issued to the voting trustees, who will issue additional certificates under the agreement of October 30, 1916. The issue was underwritten by J. S. Bache & Co. and Adolph Lewisohn & Sons at $1.50 a share. By this issue about $4,400,000 additional capital was secured. Columbia Trust Co., New York, transfer agent; Empire Trust Co., New York, registrar. Listed on New York Stock Exchange.

roperty: 12,640 acres of mineral and timber lands, in the Ducktown t. Ore was discovered and mining first begun in 1850, and the mines were ed regularly by a New York company previous to the Civil War, and dur- earlier part of the war, under compulsion by the Confederate Government ply copper for munitions. Company owns the Burra Burra, London, and ureka mines. Company also holds under lease 270 acres, including the ounty mine. The Eureka was formerly operated under lease for iron ore Virginia Iron, Coal & Coke Co.

eology: property shows pre-Cambrian metamorphosed mica-schist, ıg several lines of mineralization with lenticular orebodies. Four deposits, development, show extensive gossans, originally having a little rich sooty ore under the gossan, which was mined out many years ago. The lenses 30 to 150 in width, 500 to 2,000′ in length, and are of unknown depth. The ısists of a massive mixture of pyrite and pyrrhotite, with a little chalcopy- a gangue of various metamorphic minerals and quartz, ore ranging from 3% copper, 40% iron, 27% sulphur and 15% silica, with minute quantities l and silver. The ore is excellently adapted to smelting, giving very clean

Development: the mines are extensively developed; new work is shown in the following tables, with reserves:

Year	All Mines	Cost p. ft.	Drilling	Cost p. ft.	Ore Reserves Tons
1918.....	2,858′	$0.202	3,579′	$2.539	3,480,911
1917.....	3,107′	0.139	3,351′	2.310	3,485,713
1916.....	2,991′	0.187	4,090′	2.000	3,372,305

The **Burra Burra mine,** which is the principal property, is operated through a 1,600′ main central shaft, sunk at 75° in the footwall, having its first level 170′ below the collar, with succeeding levels at 100′ intervals, the mine ending 1918 with 10 producing levels, with No. 12 under development. The entire output in 1918 came from back stopes in the mine and 134,910 tons of broken ore was in the stopes January 1, 1918.

The main orebody of the Burra Burra is 1,200′ long and averages 60′ wide on the third level. The McPherson orebody farther north is developed by a drift from the third level of the main shaft, connecting with the McPherson shaft, now down to the eighth level. This shaft is 2,200′ N. E. of the main shaft and facilitates working the McPherson orebody, which is about 900′ long with an average width of 25′. The Hiwassee shaft, 900′ S. W. of the main Burra **Burra shaft, is sunk to the third level,** showing a comparatively small orebody of about 200′ length and 12′ average width. Haulage underground is by electric locomotives, and loading of skips in shafts is done from two pockets. During 1918 a total of 2,231′ of underground development work was done. Burra Burra produced 297,083 tons of ore in 1918.

The **London mine** has an 850′ shaft, sunk at at incline of 75°, with 3 levels opened, developing an orebody of 25 to 75′ width and about 600′ length, ranging 2 to 4% in copper tenor. A total of 378′ of underground work was done in 1918, consisting mainly of raises and drifts. The London produced 70,534 tons of ore in 1918.

The **Polk County mine** has a 485′ vertical shaft, with 5 levels opened, developing an orebody of very irregular shape, up to 120′ maximum width, of about 2% average copper tenor. The Polk mine is held under lease. To January 1, 1919, about 248′ of drifting had been done. Production of this mine **was 22,726 tons of ore in 1918.** In 1919 it supplied the smelter with a silica **flux.**

The Eureka mine, idle since 1912, has a shaft 165′ deep, at which point the first level will be opened. Diamond-drill borings have shown an ore-body of 20 to 165′ width, about 1,000′ length, and it is estimated that this mine has 2,500,000 tons of ore developed that average 44% iron, 30% sulphur and about 1% copper. This ore will be treated for its iron and sulphur, as experiments indicate that it will make a good non-phosphorous iron ore.

Equipment: at McPherson shaft includes electric hoists, 400-h. p. motor and engine good for 1,200′, 3 Rogler type electrically-driven (450 h. p. motors) 2,500-cu. ft. compressors, a combination shaft-house and crusher building. Crushing plant includes 18x36″ crusher, feeding to a 36″x33′ Robins belt conveyor used as a picking belt, which discharges into storage bins of about 2,500 tons capacity. As far as possible all barren rock is removed from the crushed ore by hand picking, plant having a daily crushing and assorting capacity of 1,[illegible] tons, ore being reduced to 4″ size. There are similar shaft houses at the London and Polk County mines. Electricity is obtained from the Tenn. Power Co.

The new power and compressor plant at the McPherson shaft has supplied air for the Burra and London mines. The hoist at the latter is driven by a [illegible]. During 1917 a new steel head-frame and crusher-house was erected at the Burra shaft, and the old steam plant shut down. A brick change house for 300 men was erected in 1918.

The company's private railway connects the mines with the works and has connection at Copperhill with the Louisville & Nashville railway. The track is of standard gauge, with 80 and 90 lb. rails, with 7½ miles of main line and 8 miles of sidings and spurs. Equipment includes four 105,000 lb. Sch[illegible]

y locomotives, eighty-five 65-ton steel tank cars, 74 standard gauge gondolas
l 13 flat cars, and 57 hopper bottom ore cars. The company has a repair shop
locomotives and cars, equipped for making all repairs and capable of com-
tely rebuilding when necessary.

Smelter: at Copperhill, 1 to 5 miles from the mines of the company,
s designed and built by J. Parke Channing. On the upper level are the ore
s, having storage capacity for 10,000 tons of ore, 800 tons of coke, and neces-
y fluxes and furnace products requiring re-treatment. Charges are drawn
m the bins into cars of 44 cu. ft. capacity, hauled by electric locomotives over
racks that run under the bins and circle around the furnaces, so that a train
ded on any track may go to any furnace and return to the bins. A sampling
nt was built in 1917 and a smelter laboratory in 1918.

The furnace building of steel has space for 7 blast-furnaces, but only 5 are
use, each having an oval settler lined with firebrick. Slags skim into pots of
cu. ft. capacity, which are hauled by the electric lomomotives. Considerable
g is used for railway ballast.

Coal dust pulverizing and firing equipment was erected in 1918, and tests
far indicate a considerable saving in fuel in the blast-furnaces.

The converter department has two 40-ton electric traveling cranes taking
tte from the settlers to the converters. Two 12′ basic lined converters of the
eat Falls type were installed in 1916 to replace the old ones, also a copper-
ting machine.

Hot converter slag is poured into the blast furnace settlers, by reason of
ich the only converter slags requiring re-smelting are the skulls forming in the
lles. Converter bars average 99.4% copper. Copper is cast in 210-lb. pigs
d sent to the Baltimore Copper Smelting & Rolling Co. for electrolytic refin-
g, which affects the saving of the very small gold and silver values contained.
e finished electrolytic copper is marketed through the American Smelting &
fining Co.

Leaching of flue-dust is being tried, mainly with the idea of securing data
r subsequent treatment of ore in the Eureka mine.

The smelter power house includes two 250 k. w. 500-volt d. c. Westinghouse
nerators, direct-connected to 2 Nordberg tandem-compound Corliss engines,
d one 400 k. w. 500-volt d. c. Crocker-Wheeler generator, driven by a Bates
ndem-compound Corliss engine, all 3 engines running non-condensing, with
haust steam going to a feedwater heater. Furnace blast is supplied by 3 Nord-
rg piston blowing engines, each of 20,000 cu. ft. capacity per minute, and 3
rdberg duplex cross-compound piston blowing engines, each 30,000 cu. ft.
pacity per minute, supplying blast at 50 oz. pressure to a common blast-main,
ove the charge floor. A motor-driven blower was put in during 1919. Con-
rter blast is furnished by 2 Nordberg duplex cross-compound air compressors,
pplying 10,000 cu. ft. per minute each, at 12 lbs. initial pressure. An Ingersoll
nd air-compressor furnishes air at 100 lb. pressure for operating the chipping
ors and sundry pneumatic tools. The electric plant includes a 1
eystone generator, direct-connected to a Ball tandem-compou
g current for electric light, and there is a motor-generator
g a 500-volt current to 220-volt current for electric light
wer plant.

The smelter boiler house has four 512- h. p. Altman &
oilers, with Murphy automatic stokers and Foster superheater
175 lb. pressure, with 150° superheat. Coal and ashes are ha
a bucket and chain conveyor, an 800-ton steel coal bunke
ed automatically to the boilers. A brick transformer house
ant in 1915.

Water is pumped from the Ocoee river by three 10″ 2-s
mps, belt-driven by motors, each with capacity of 2,800 ga
rge storage tanks above the smelter. A 4,000,000-gal. reserv
vel of the furnace floor receives the flow from the water-jacke

The company operates a quartz quarry at Austral, Tenn.

Copperhill, on the Louisville & Nashville railway. Equipment of the quarry consists of a boiler, air-compressor and rock drills.

The smoke damage situation is complicated by the location of the works which are in the extreme S. E. corner of Tennessee, winds carrying the bulk of the fumes into the State of Georgia, by reason of which the State authorities of Georgia brought suit against the Tennessee Copper Co. and the Ducktown Sulphur Copper & Iron Co. in the Federal courts, and the latter decided that the smelters must cease operations or stop the fumes by using them for a sulphuric acid plant. This undertaking proved much more difficult than was anticipated by reason of the intermittent and varying nature of the gas supply from the blast furnace tops.

The No. 1 acid plant cost about $1,600,000 and was put into full operation early in 1908, with a rated capacity of 120,000 tons yearly of 60° Beaume chamber acid. With the completion of the No. 2 acid plant in July, 1916, the company had 2 large lead chamber plants for the manufacture of 60% acid, with an estimated capacity of 300,000 tons per year. No. 1 was overhauled by July, 1917, while considerable improvements were made in 1918. There are also plants for concentration of sulphuric acid to 66° and 97½%, and for manufacture of nitric acid.

As the furnace gases contain sulphur dioxide, sulphur trioxide, carbon dioxide, oxygen and nitrogen in considerably varying percentages, new methods of control were found necessary to maintain the volume of sulphurous gases suitable for making sulphuric acid by the chamber process. After some experimentation the problem was solved by equipping one of the smaller and three of the large blast furnaces with tight tops, above the charge floor, to exclude atmospheric air, these being connected with a dust chamber, where most of the solid matter is precipitated from the gas, the dust chamber being so constructed as to conserve the heat of the gases sufficiently to concentrate the acid in the Glover towers. There are 2 octagonal Glover towers of 30′ diameter and 50′ height with suitable nitre plants at the foot of each. After passing through the towers the gases are conducted through very large lead flues of 200 sq. ft. sectional area, which deliver the fumes to the chamber system containing 4,600,000 cu. ft. of chamber space. In a general way the chamber plant is of conventional design, yet the enormous quantities of fume received and acid produced have brought about developments that were new to the industry, among the most notable being the size of gas connections, acid lines, acid coolers and fans, which are all on a scale never before known. The discharge from the chamber plant is conducted into 11 Gay-Lussac towers, which are of a gigantic size, the three latest and largest being octagonal of 36′ diameter and 65′ height. The company has contracted for the sale of its entire production of sulphuric acid to the International Agricultural Corporation, at a price understood to be $4.81 per ton, the contract expiring on December 31, 1920. This acid plant is the largest and most complete in existence.

On May 29, 1919, the company issued the following statement:

"The Tennessee Copper Co. has a capacity of approximately 360,000 tons per year of 50° Baume sulphuric acid, and under the terms of a contract entered into several years ago it has delivered its entire production of acid to the International Agricultural Corporation at a price much below the current market. Under the heavy increases in wages and supplies in the past few years, this contract has proved a handicap to the company. The contract, however, expires by limitation on December 31, 1920, and plans are now being made by the Tennessee company for the construction of a number of large acid-phosphate plants at strategic points throughout the South. These plants will be of the latest construction and will be equipped with the most modern machinery, with a view to reducing the labor cost to the lowest possible minimum. Work on these plants will be started as soon as the necessary preliminary arrangements have been completed. The company also has under contract a large deposit of phosphate rock in Florida, and plans are now under consideration for its early development. In addition to the above, the company has secured options on and is prospecting additional high-grade deposits. W. D. Huntington will direct the development

he fertilizer enterprise. He is president of the National Fertilizer Associa-, and is recognized as being one of the leading authorities in the fertilizer . While a large part of the tonnage of acid produced at Copperhill will be erted into acid-phosphate at the various plants, the company will have a of its output available at all times to supply to fertilizer manufacturers and rs, and it is expected that the prices received for this acid will average much er than in the past."

Low-grade copper ores are treated profitably at other points, but in nearly ther cases, they contain considerable gold and silver, which are lacking in the of the Tennessee. This company has shown both courage and ability in installation of its acid plant, by virtue of which a very serious handicap has turned into a permanent source of large revenue.

NNESSEE MANGANESE CO. **TENNESSEE**

Address: D. C. Campbell, pres., Knoxville, Tenn.

Cap., $20,000; increased 1918 to $200,000.

Property: mines at Sevierville, Sevier county, and Knoxville, Knox ity. A 25-ton electric steel furnace to be installed for the production of ferro-ganese.

TEXAS

Under this head, mining companies are arranged alphabetically. Apart from great sulphur and oil deposits, the mineral production of the State is small; r is the principal metal produced and nearly all comes from the Presidio . Some of the copper deposits (red beds) are said to be worth exploitation. duction for 1919 was 540,000 oz. silver. Small shipments of copper, gold, and zinc ore were made from the Van Horn and Sierra Blanca districts.

ERICAN SULPHUR ROYALTY CO. **TEXAS**

Address: Houston, Texas.

Has a royalty share in the production of the Freeport Sulphur Co., which

ISOS MINING CO. **TEXAS**

Howard E. Perry, pres.-gen. mgr., Terlingua, Brewster county, Texas. Prop- is at Terlingua, 108 miles S. E. of Marfa on the S. P. R. R. Cinnabar ore rs as replacement deposits in limestone and shale. In the lower limestones ores are generally in nearly vertical calcite veins, or in lodes of friction cia. For geology, see Texas Bull. 405, 1909.

Development: by shafts. The mine, which is the biggest producer in district, had a record-breaking year in 1915, producing 1,200 flasks of mercury tember and December. Yearly output not available. Produced 500 flasks in 1918, with a smaller output in 1919.

ment: includes an 18-ton shaft furnace.

T-TIGNER QUICKSILVER MINE **TEXAS**

in Brewster county. Idle several years.

CONSOLIDATED KANSAS CITY SM. & REF. CO. TEXAS

Owns the El Paso smelter at El Paso, Texas, described under that title.

ELLIS MINE 34 TEXAS

Address: W. K. Ellis, treas., McKinney Springs, Tex. W. R. Wyatt supt.

Property: 5 patented quicksilver claims, 103 acres, in Brewster county 100 miles S. of Marathon, Texas.

Development: by 250' shaft and 200' tunnel. **Equipment:** includes 15 ton retort furnace.

Production: 41,400 lb. quicksilver in 1918.

EL PASO SMELTER TEXAS

Address: Kuno Doerr, gen. mgr.; J. Heggie, supt., El Paso, Texas.

Owned by the Cons. Kansas City Sm. & Ref. Co.

Is a subsidiary of the American Smelting & Refining Co., which see.

The smelter proper occupies 43 acres out of an 1,100-acre tract of land which is traversed by the Sante Fe, El Paso & Southwestern and the Southern Pacific railways.

The monthly average of cars of ore that is brought to the smelter from the surrounding mines has never been less than 1,600. Often it has run as high as 2,300 cars per month and in a few instances even larger amounts of ore have been handled in a month.

Three Godfrey lead roasters and 12 mechanical roasters average from 1,200 to 1,500 tons daily. There are four reverberatory copper smelting furnaces that in practice actually smelt 1,500 tons of copper ore in a working day.

The constant increase in the tonnage of copper smelted at the El Paso smelter has made it necessary to replace the two 10' diameter, 30' long Pierce-Smith converters which have been in use by 2 new converters of the same type, each of which is 30' in length and 13' in diameter.

A 12' Great Falls type converter converts in connection with the others 2,500 tons of blister copper per day and is not the least important item in the equipment. From 1,500 to 2,000 tons of lead are smelted each month.

An interesting mechanical feature is the 90' craneway span over which two 60-ton cranes are operated. The new converter stack is 300' in height, is 16' diameter and was built of concrete. The smoke and escaping gases reach the stack through a steel "Balloon type" flue 4,400' long.

In 1918, ore worth $2,500,000 a month and over $30,000,000 a year was smelted in the plant, which covers 43 acres of ground.

The El Paso smelter is a city within itself, with stores, fire station, church, an electric light plant that could light a city of 50,000; parks, water works and office buildings. A portion of the grounds were used during 1916 and 1917 by United States troops as a military post. The hospital has a number of cots ready beds and a resident physician. The smelter owns and operates a complete railway system, and more than 7,000 people who live in El Paso look to it for support.

FREEPORT SULPHUR CO. TEXAS

Address: 61 Broadway, New York City, and Freeport, Tex.

Is a subsidiary of the Freeport Texas Co., a holding company owning the entire capital stock, $200,000.

Property: 8,677 acres of real estate, including 500 acres of sulphur deposits, near the mouth of Brazos river, Brazoria county.

Geology: sulphur occurs in pockets, cavities, and as streaks impregnating gypsum, or a formation in which gypsum predominates. The bed is about 1,000' from the surface.

Development: by wells drilled to the sulphur bearing formation.

Process: the sulphur is extracted from the rock by the well-known Frasch process. Steam is made in boilers and used in water-heaters, each capable of heating 1,000 gals. of water a minute and from 60 to 336° F. under a pressure of 100 lbs. This superheated water is forced down the wells to the formation, the sulphur melts, and rises to surface, where it cools. Sulphur is pure and

ıtly used in the paper pulp industry, the remainder being used for sulphuric l manufacture.

Equipment: includes 4 plants aggregating 23,800 h. p., complete with oil ·age, 4½-mile oil pipe line, canal from river, pumping plant, water purifica- plant, compressors, and large battery of boilers.

Production: about 2,000 tons of sulphur daily.

ZEL MINING & MILLING CO. **TEXAS**

Officers: at last accounts. John V. Hughes, Dallas, Tex., pres.; G. G. ight, v. p.; C. F. Freeman, Dallas, Tex., sec.; R. B. Stichter, treas. **ectors:** J. V. Hughes, T. J. Oliver, G. H. Cox, C. A. Culters, C. F. Free- ı, Milton Parks and G. G. Wright.

Property: the Hazel Silver mine, in Diablo mountains, 15 miles N. E. Van Horn, Culberson county, shows a fissure vein that yields chalcocite ore ı barite gangue. Shipping ore said to average 10% copper and 50 oz. silver ton.

Development: includes 700′ shaft and extensive workings at various ·ls. Mine was worked for 10 years by H. G. Clifford, of El Paso, and A. C. river, of San Antonio, producing $500,000, but was shut down in 1895. A dry centrator was erected to treat the old dumps, said to contain about 100,000 ; of $15 copper-silver ore, but was unsatisfactory and has been converted into et concentrator.

Reported that the Sutton Steele & Steele Co., of Dallas, had taken over mine and would install a cyanide mill. O. W. Steele, mgr.

ıRIPOSA MINING CO. **TEXAS**

Terlingua, Tex.

F. M. Dancy, pres., Philadelphia, Pa.

Property: adjoins the Terlingua mine. **Ore:** occurs in fissure veins :ropping over a wide area. The mine, at one time the largest producer in the ntry, is being developed at depth. Past production has been practically from surface.

Equipment: two 10-ton Scott furnaces, with a capacity of 100 flasks :ksilver per month and the 50-ton Terlingua furnace held under lease. Dumps l to have 32,000 tons containing $241,000 in mercury, April, 1918. Estimated put, 250-300 flasks per month.

COS MINING CO. **TEXAS**

Idle. J. Y. Canon and James Dougherty, of Van Horn, Tex., principal share- ders.

Property: the Pecos mine, 3 miles N. E. of the Hazel silver mine in El ·o county, 19 miles from Van Horn, shows a N. E.-S. W. vein in brown igneous s, traceable 2 miles across the mountains to the Red Maverick mine.

Development: by a 105′ shaft with a level at 90′, showing seams a few ıes thick of copper-silver ore, said to assay 70% copper; the seams in places regate 2′ in thickness. The mine was first operated in 1888, abandoned after king and relocated 1903, by George Briggs and T. R. Owen, forfeited by tech- dity of Land Commission and located by J. Y. Canon.

ESIDIO MINING CO. TEXAS

Office: 406 Balboa Bldg., San Francisco, Cal. **Mine office:** Shafter, Tex.

Officers: W. S. Noyes, v. p. and gen. mgr.; F. C. Handy, supt.

Cap., $150,000; shares $1 par; all issued.

Property: the Shafter or Presidio mine, at Shafter, Presidio county, has roduction record of over $7,000,000 since 1883. **Ore:** carries silver mainly oloride. The mine was once known as the Bullis, and has an interesting ory.

Development: by about 20 miles of workings.

Equipment: includes 1 mile aerial tram, a 15-stamp 100-ton mill and a ide plant. The mill is equipped with 2 tube mills, filter, Pachuca tanks, Dorr ener and 250-h. p. oil engine.

Production: figures are not available, but the State of Texas has yield the following quantities of silver, most of which is from the Shafter mine: 540,000 oz. in 1919; 612,000 oz. in 1918; 588,000 oz. in 1917; 600,000 oz. 1916, and 12,417,882 oz. from 1885 to 1915, inclusive.

Little information is available concerning operations, but it is probable good profits are made.

RAINBOW MINING CO. TEXA

Address: Terlingua, Tex.

Property: a prospect adjoining the Chisos mine, under develop

SHAFTER SILVER MINE TEXA

Owned by the Presidio Mining Co., which see.

SHERIDAN MINING CO. TEXA

Inc. in Texas. **Cap.**, $200,000.

Owns a copper-molybdenite property in the Llano district, Burnet co

STUDY BUTTE MINING CO. TEXA

W. D. Burcham, mgr., Terlingua, Texas.

Property: a lease on the Big Bend quicksilver mine, 5 miles E. of T lingua, Brewster county. Ore occurs in fissures filled with calcite and cinn and occasional impregnations, in a flat lying rhyolitic intrusion 500' thick cov by 50' of limestone shale.

Equipment: includes power plant, 20-ton furnace and oil-engine. O put in 1918 showed a large falling off. Additional depth necessary to ma past production.

TAMA SILVER MINING CO. TEXA

Was reported developing a group of claims in the Quitman district, El Pa county. The ore is silver-lead and occurs in replacement deposits in lime

Adjacent properties include the Thunderbolt group on the lead and z bearing Bonanza lode, owned by Geo. H. Stokes, which is developed by two t nels. Love Bros. are also working similar silver-lead deposits at the head Quitman canyon, 9 miles S. E. of Sierra Blanca.

TEXAS ALMADEN MINING CO. TEXA

Terlingua, Texas.

Property: Texas Almaden quicksilver mine, unwatered and under velopment, 1918. Equipped with 50-ton furnace.

TEXAS COPPER & REFINING CO. TEXA

Address: 527 Cooper Bldg., Denver, Colo.

Officers: W. P. Dietz, pres.-treas.; Wm. Shubert, Jr., v. p.; K. M. Sh hert, sec.

Property: reported to own 1,200 acres of copper-bearing land in Hu man county.

TEXAS DEVELOPMENT & MINING CO. TEXA

Reported to own a copper mine at Nacogdoches, Tex.

TEXAS GULF SULPHUR CO. TEXA

Office: 50 East 42nd St., New York, and Gulf, Texas.

Officers: W. H. Aldridge, pres.; T. Schulze, v.-p.; H. F. J. Knoblock, s treas., with C. F. Ayer, E. C. Bacon, H. B. Baruch, J. A. Black, and T. Cochr directors. F. V. Munster, asst. sec.-treas. Charles Biesel, gen. mgr.

Inc. Dec. 23, 1909, in Texas. **Cap.**, $7,600,000; increased in 1919 to $5,000,000. Was originally $3,000,000. Shares $10 par; issued $5,100,000; s scribed and 50% paid, $2,500,000. No funded debt. Annual meeting, fir Tuesday in November.

Property: sulphur-bearing land near Matagorda, Matagorda co Texas. Drilling in 1918 and 1919 revealed over 10,000,000 tons of sulphur-be ing rock.

Equipment: entire works cost over $3,500,000, including 6-mile rail spur, and 10,000 h. p. steam boiler plant for the Frasch process.

Production: since March, 1919, at the rate of 1,500 tons of sulphur da

UTAH

The descriptions of the mining companies of the State are grouped in five tions, the first including all mines outside of the four big mining districts, ile the mines of the Alta-Cottonwood, American-Fork, Bingham, Park City l Tintic-Eureka-Ophir districts, are described under these separate headings. t Lake City is the actual business center for each of these districts and most the operating companies have offices there.

In 1919, the metal production of Utah had a value of $45,439,000, or nearly million less than in 1918, the decrease being one of both price and quantity. e gold output was $2,070,000, compared with $2,949,170 in 1918, more than half it from Bingham. The 1919 output of the silver mines of the State was 569,000 oz., compared with 13,455,597 oz. in 1918, the Chief Consolidated at reka being the largest producer, with the Tintic Standard a close second; igham and Park City mines were also large producers. The copper output in 9 was 123,626,000 lb., compared with 227,169,630 lb. in 1918, the Utah Copper contributing 9,000,000 lb. monthly. The lead output was 121,249,000 lb., com- ed with 167,008,224 lb. in 1918, and the zinc production 4,467,000 lb., compared h 18,399,417 lb. in 1918, decreasing 77%.

)AH COPPER CO. **UTAH**

Address: St. George, Washington county, Utah.

A. H. Dahle, pres., at last accounts.

Inc. 1916, in Utah. **Cap.,** 600,000 shares; 2c par.

Property: the Burg mine, in Harrisburg district, Washington county, miles E. of St. George, said to be a regular shipper of copper-gold-silver ore. nagement planned erecting a 40-ton leaching plant in 1917. No recent re- ns.

.UMINUM POTASH CO. OF AMERICA **UTAH**

Address: 514 Templeton Bldg., Salt Lake City, Utah.

Officers: G. M. Winkelman, pres.; J. Stokes, Jr., v. p.; H. O. Pack, sec.; mer McCarty, treas., with G. C. Shipp, Geo. H. Blood, and W. P. Hauerbach, ectors.

Inc. March 24, 1919. **Cap.,** $3,000,000; $100 par. Operating expenses re- ted $30,000 for 3 months in 1919.

Property: 15 acres in Marysvale district, Piute county, said to have one the best alunite deposits in the state. Company claims reserves of 60,000,000 s of ore assaying 10% potash, and 37% alumina. Reported in May, 1919, that 00-ton mill was being erected.

IERICAN COPPER MINING & MILLING CO. **UTAH**

Office: Lehi City, Utah. J. N. Butt, pres.; Charles Anderson, v. p.; O. Slade, treas.; preceding officers, Howard Murdock and Chas. Herron, di- tors; William Asher, sec.

Inc. Aug., 1912. **Cap.,** $100,000; shares 10c par. An assessment of 1 l called March, 1914. Property is in Tooele county, but as officers do not ly to letters, no details of the company's holdings are available.

IERICAN EAGLE COPPER MNG. CO. **UTAH**

Officers: F. R. Meadows, American Falls, Idaho, pres.; S. H. Cotterel, .; H. P. Huey, sec., with Henry Miller and Mr. Sparks, directors.

Property: 10 claims, about 200 acres, 2 miles E. of Farmington and 15 es N. of Salt Lake. The ore carries copper, silver and gold.

Development: by 130′ tunnel.

IERICAN STANDARD COALITION MINING CO. **UTAH**

Controlled by Lorin Hall, Salt Lake City; Willard Scowcroft, and John wcroft, Ogden, Utah.

Property: ½ mile N. of Siegel mine in Schell range, said to have a vein wide on surface, and traceable for 600′. Values are mainly in silver.

TELOPE STAR CONSOLIDATED MINES **UTAH**

Inc. March, 1917, in Utah. **Cap.,** $300,000; shares 10c par. Is a consoli- ion of several properties in Mineral Mountain range, 9 miles S. E. of Black

Rock, Millard county. Is said to be a reorganization of the Antelope Star Mining Co.

The incorporators are: Leo Neilson, Logan; Darby Crandall, New York; W. R. Hensleigh; V. L. Arnold and Chas. M. Morris.

ANTELOPE STAR MINING CO. UTAH

Office: 618 Newhouse Bldg., Salt Lake City, Utah.

Officers: Chas. M. Norris, pres.; H. L. Parker, v. p. and mgr.; V. L. Arnold, sec.; L. J. Brattager, asst. sec., with W. N. Williams, B. L. Rich, and L. Nielsen, directors.

Inc. in Utah. **Cap.,** $250,000; 25c par; 50,000 shares in treasury. Stock listed on Salt Lake Exchange.

Property: 9 claims and a millsite, about 200 acres, 20 miles N. E. of Milford, in Millard county, said to have a 5′ fissure vein of milling ore, assaying 8-10% lead. The orebody is leached at surface and contains barium, lead, silver, copper and iron.

Development: by 373′ tunnel, 65′ shaft and about 800′ of drifting and raises. Promoted by Woolley Bros., Salt Lake City.

ARROWHEAD MINES CO. UTAH

Officers: H. D. Chase, pres., 76 G St., Salt Lake City, Utah; Chas. Root, v. p.; G. Alma Gardner, sec.-treas.; A. J. Hoban, managing director, with J. A. Reeder, H. Mann, R. M. Usher, Chas. Anderson and W. J. Allen, directors. J. H. Nelson, supt.

Cap., $10,000; shares 10c par; assessable; 261,953 shares in treasury. Stock listed on Salt Lake Exchange.

Property: the General Connor mine, 9 claims, 1 patented, near Marysvale, Piute county, said to show a 15′ fissure vein of free milling ore, with 16″ streak averaging $18-$20 in gold and silver.

Development: by 95′ shaft, 225′ tunnel, winzes and crosscuts. Ore reserves estimated at $275,000. Five men employed. Management plans sinking from tunnel level and erecting a mill. No recent information.

BEAVER-BUTTE COPPER CO. UTAH

Office and mine: Beaver, Beaver county, Utah. Sherman McCoy, supt.

Inc. 1909, in Utah. **Cap.,** $50,000; shares 10c par; assessable. Property idle from 1912-1914, owing to lack of capital, but development work was resumed in summer of 1914, and property reported under lease to Senator A. B. Lewis, representing Eastern capitalists, 1916.

Property: 15 claims, unpatented, in the Newton district, 8 miles from railroad, show gold-silver ore and are believed to carry the continuation of the Sheep Rock ledge.

Development: by a 150′ two-compartment shaft, crosscuts and drifts. Company claims to have 2′ of $10 ore on surface and 19′ of $8 ore on the 150′ level with 1′ of $18 ore along the footwall side. Planned installing an electric hoist and drifting on the 150′ level. See Beaver Gold Mines Corp. and remember Majestic Mines. No returns, 1917-1919.

BEAVER COPPER CO. UTAH

Office: 609 Newhouse Bldg., Salt Lake City, Utah. Mine at Milford, Beaver county, Utah.

Officers: W. J. Dooley, pres.; S. S. Pond, sec.; A. J. McMullen, v. p., with Chas. A. Weaver, A. R. Bain, Blaine Grey, and W. C. Lockington, directors.

Inc. 1907, in Utah. **Cap.,** $100,000; 10c par; assessable; all issued. Annual meeting, third Monday in March. Listed on Salt Lake Exchange.

In 1919 the company absorbed the Beaver Lake Metals Co. and the Utah United Copper Co. All machinery and other equipment has been moved to the Utah United property because the officers believe that group offers the best chance to develop a producing mine with the limited funds on hand.

Property: 31 claims, 600 acres, in the Beaver Lake district, showing fissure veins in monzonite, contact deposits between monzonite and limestone and replacement orebodies in lime. The ore is complex, containing copper, and

ıides with gold-silver values. Plan on mining an orebody 225′ long said to ıin 10,000 tons of 2% copper ore blocked out.

Development: by a 470′ incline shaft with about 1,000′ of workings. in 1919 the east drift on 470′ level cut 6″ of ore containing 6% of zinc, of lead, and 19 oz. silver per ton.

Equipment: includes hoists, compressor, and pump. Total output to 1919, was 4 cars copper ore and 2 cars lead ore. Assays were 4% copper, lead, and 17 oz. silver.

The consolidation of the three properties and new plans for development ır to be an honest effort on the part of the management to make a producing

VER GOLD MINES CORP. **UTAH**

Officers: A. B. Lewis, pres.; E. C. McGary, v. p.; M. P. Braffet, sec.- .. with B. F. Caffey, W. L. Cook, W. H. Stephens and S. Glazier, directors. . Blainey, mgr.

Inc. in 1914. **Cap.,** $3,500.000; shares $1 par.

Property: claims covering the Sheep Rock gold vein in the Newton ict in eastern Beaver county, 12 miles N. E. of Beaver City, Utah.

Development: by 100′ shaft. Company claimed to have cut a vein of ıg ore, 15′ wide on the 60′ level, and 18′ wide on the 100′ level. In January, the company was reported to have obtained a bond, $240,000, on the old p Rock mine, a former high-grade producer, developed to the 300′ level and ıped with a 5-stamp mill. Promotion methods caused much comment. No ıt report; probably idle.

VER HORSESHOE GOLD MNG. CO. **UTAH**

.etters returned unclaimed. Probably closed down.

Officers: H. B. Ward, Mina, Nev., pres.; John Waldis, Tonopah, v. p.; . Bunker, Salt Lake City, sec.-treas., with Fred Zimmerman, J. W. Kelley F. E. Becker, directors.

Inc. in May, 1915. **Cap.,** $250,000.

Property: 19 claims located on south Fork of Beaver river, 14 miles of Beaver City. Surface samples are said to assay $24.60 in gold.

VER LAKE METALS CO. **UTAH**

Described in Volume XIII.

Merged with Beaver Copper Co., which see.

VER MINES CO. **UTAH**

Office: 222-23 Continental Bank Bldg., Salt Lake City, Utah. **Mine ess:** Marysvale, Piute county, Utah.

Officers: A. H. Cutright, pres. and mgr.; Geo. R. Raymond, v. p.; W. E. ırn, treas.; A. Maxwell, sec., and Alex. Beckstead, directors.

Inc. Dec. 17, 1910, in Utah. **Cap.,** 1,000,000 shares, 1c each; issued 859,000 s. Annual meeting, second Saturday in January.

Property: 11 claims, 220 acres, in the Ohio district, 5 miles from D. & R. Claims carry copper-bearing gold-silver ores in fissure veins in andesitic ıyry. There are 7 veins, 2 developed by crosscut tunnels, 725′ and 72′ long. had only a prospecting outfit. No recent report; presumably idle.

VER RANGE MINE CO. **UTAH**

Address: Black Rock, Millard county, Utah.

Officers: John B. Taylor, pres. and gen. mgr.; W. W. Moody, v. p. and R. B. Graff, sec.-treas.

Inc. July, 1916, in Utah. **Cap.,** $100,000; shares 10c par.

Property: 10 claims, in the Mineral Mountain range, 10 miles S. E. lack Rock on the Salt Lake R. R. Claims are in limestone near quartzite aid to carry copper and lead ore, in three prominent N. S. fissures.

Development: over 1,500′ of tunnel and shaft work. Main Chicago ıl is over 300′ and expected to cut the shoots which show lead ore on the ıe. No recent report. One of the many Utah companies which appear to ıaid to answer letters of inquiry.

BEE BEE MINING CO. UTAH

Office: 409 Kearns Bldg., Salt Lake City, Utah. **Mine office:** Gold strike, Washington county, Utah.

Officers: H. G. Snyder, pres.; John A. Bryson, v. p.; Robt. L. Judd sec.-treas., with E. J. Lund and Thos. Marioneaux, directors; S. F. Snyder, supt.

Inc. April 13, 1915. **Cap.,** $100,000; shares 10c par, issued $70,000. Assessment of 4/10c per share levied, August, 1916.

Property: 3 claims, unpatented, in the Goldstrike mining district, Washington county, claimed to show 20,000 tons of $10 to $35 free milling ore in fissure vein. No recent report. Probably idle.

BIG INDIAN COPPER CO. UTAH

Office: Provo, Utah. Col. C. E. Loose, pres.-gen. mgr.; J. T. Farrer, v. p.; P. G. Peterson, sec.-treas. and supt.; Niels C. Christensen, metallurgist. Col. Loose and Senator Smoot are the principal owners.

Inc. in Utah. **Cap.,** $10,000; shares 1c par; 185,000 taken by insiders; 700,000 issued for property; 100,000 shares offered the public in 1917 at $1. Increased, 1918, to $750,000; shares, 50c par.

Property: 21 claims, 11 patented, about 350 acres, 38 miles S. E. of Moab and 60 miles from the D. & R. G. railway at Crescent, San Juan county, Utah. Claims are said to show copper ore occurring disseminated through sandstone with sulphides appearing at 100′ depth.

Company started operating a 300-ton leaching plant to use the sulphur dioxide process to treat a large tonnage of 3% ore, in November, 1917. Water piped from La Sal ranch, 7 miles distant.

Reported in 1919 that property had been leased for 3 years to the Metallurgical Improvement Association.

BIPONT SILVER MINING CO. UTAH

C. A. Phillips, pres., Spokane, Wash.; J .B. Randall, sec., Oakley, Utah.

Company was organized in 1918, to take a $250,000 bond and lease on 9 claims, including the Bipont mine, 20 miles from Oakley and 2 miles from the Idaho-Nevada line. Reported that over 100,000 tons of rich silver-lead ore is available and company would build a mill.

BLACK JACK CONSOLIDATED MINING CO. UTAH

Merged, 1917, with Empire Mines Co., which see.

BLACK ROCK COPPER MINING & MILLING CO. UTAH

Address: Black Rock, Millard Co., Utah. Walter James, gen. mgr.

Property: 11 claims, 17 miles S. W. of Black Rock, developed by 35′ shaft and a drift on the 180′ level, exposing a vein in limestone, said to show copper values. Working in 1918; no later report.

BLUE RIBBON GOLD MINING CO. UTAH

Address: Minersville, Utah.

Officers: W. B. Seymour, pres.; L. Shaw, v. p.; Fred R. Pryor, sec.-treas., with J. H. McOmie and Clara D. Smith, directors, at last accounts.

Inc. Feb., 1915, in Utah. **Cap.,** $100,000; shares 10c par; issued $60,000.

Property: 8 claims in Jarloose mining district, miles E. of Minersville, Beaver county, Utah.

Ore: gold in shoots in vein 6′ to 12′ wide, between well-defined walls of rhyolite. Average assay said to be $9.40 per ton.

Development: by 50′ shaft. Plan the addition of 25-h. p. gasoline hoist and sinking shaft of 500′ depth. Is only a prospect.

BREWER GOLD & COPPER MINING CO. UTAH

Office: 212 Utah Savings & Trust Co. Bldg., Salt Lake City, Utah. **Mine office:** Ibapah, Tooele county, Utah.

Officers: J. P. Gardner, pres.; S. W. Morrison, v. p.-treas.; H. B. Wessor, sec.; John Mortimer, asst. sec.

Inc. Feb. 16, 1907, in Utah. **Cap.,** $50,000; shares 10c par; assessable. 4 assessments have been levied.

Property: 11 claims, 6 patented, on Dutch mountain, in the Clifton district, less than 5 miles to loading station on the Deep Creek railroad. In operation, May, 1917. No later information.

ENA VISTA CO. **UTAH**
Address: 4 E. 43rd St., New York.
Officers: Jos. E. Barlow, pres.; C. C. Nolfle, v. p.-treas. and mgr., care Indian Mine, Moab, Utah; A. M. Cheney, sec., with N. C. Christensen, and . Dowell, directors.
Inc. 1918, in Utah. **Cap.,** $1,000,000; $1 par; 600,000 outstanding. An- meeting, first Tuesday of December.
The company was organized to buy, or lease, and operate mining properties, irticular properties, where it is possible to use the processes owned by the llurgical Improvement Corporation, 101 Park Ave., New York. A lease been acquired on the Big Indian Mine in San Juan county, Utah, with the al object of making a commercial demonstration of the Christensen Lixivia- process. The mill was expected to be in operation in October, 1919, with a capacity of 8,000 lb. of copper.

L VALLEY GOLD MINES CO. **UTAH**
Office: 410 Felt Bldg., Salt Lake City, Utah.
Officers: M. R. Evans, pres.; Williard Scowcroft, v. p.; N. A. Robert- sec.-treas., with M. P. Braffet and R. G. McQuarrie, directors.
Inc. 1913. **Cap.,** $100,000; shares 10c par.
Property: 16 patented lode claims, 295 acres, 1 millsite, and one placer t 35 acres in Goldstrike district, near Enterprise, about 40 miles from Mo- on Salt Lake Route.
Ore: free milling gold quartz found in fissure veins, 3' wide, along hyry dike in lime, quartz, andesite and rhyolite formation, said to run as as $50 per ton.
Development: several thousand feet of workings, including 2 tunnels, and 705' long, at last accounts. **Ore reserves:** estimated at 10,000 tons ng ore in sight, valued at $20 per ton. **Equipment:** 3-stamp, 10-ton mill.
Production: consisted of several high-grade shipments in 1915. Com- does not reply to requests for information.

L VALLEY HASSIAMPIE GOLD MINING CO. **UTAH**
Address: Goldstrike, Washington county, Utah.
Officers: J. D. Alsop, pres.; Ren Bryson, v. p. and supt.; J. A. Bryson, reas., with H. J. Burgess, A. B. Hemenway, A. F. Miles, W. E. Ayer, tors.
nc. July 28, 1913, in Utah. **Cap.,** $100,000; shares 10c par; outstanding, 0. Annual meeting, first Monday in July.
roperty: 3 claims, 60 acres, unpatented, adjoining Bull Valley Gold s Co., in the Goldstrike mining district, covers a large belt of por- y and quartzite. **Ore:** gold in fissure vein, 17' wide, with 80° dip, said ay from $1.20 to $14.60 per ton.
evelopment: several tunnels and shallow shafts.
roperty is still in the development stage. This is one of the many Utah anies who shun publicity—in this book.

GOMASTER ORE CO. **UTAH**
ddress: Zenith, North Dakota.
roperty: 120 acres, south of Atlas mine in the Star district, Beaver y, said to show silver ore. Developed by shaft to depth of several hundred Plans early resumption of work.

DO MINING CO. **UTAH**
ddress: J. M. Callow, pres., care General Engineering Co., Salt Lake Utah.
mpany had a lease on the dump of the Horn Silver mine at Frisco, Beaver y, Utah, said to contain 200,000 tons of silver, lead, zinc tailings, and oper- 200-ton flotation mill. Operations on the Horn Silver dump have been ed and the company is inactive.

UMET MINING CO. **UTAH**
ddress: Lund, Iron county, Utah.
roperty: 19 claims, 30 miles N. W. of Lund, developed during 1917, ment estimated 2,000 tons of 30% lead and 2 oz. silver ore available above

75′ level. Shipments in August, 1917, yielded $3,000. Production to Septembe 1917, was about 700 tons. No recent returns.

CAPITOL MINING CO. UTA

Address: Charles Smith, supt., Milford, Utah.

Property: 2 claims, 3½ miles S. W. of Milford, Utah. Being develope by shaft, 225′ deep in June, 1919. Crosscutting and drifting was to begin on 2 level.

Ore: carrying silver, lead and gold occurs in limestone and porphyry

CARBONATE KING MINING CO. UTA

Officers: M. J. Dooley, pres.; J. F. Free, v. p.; F. E. Harding, sec treas., of Salt Lake City.

Cap., 1,000,000 shares; 10c par; 400,000 in treasury.

Property: the Hetty Green, Schindler, Ethelwin and Pinky claims, Ophir camp, near Hidden Treasure mine.

Development: 200′ inclined shaft on Hetty Green vein. Property is st in prospective state. No recent report.

CEDAR RIDGE MINING CO. UTA

Owns 5 claims, about 65 acres, adjoining the Lake View mine on N. Promontory Point, Boxelder county, Utah. Mail returned, 1919, from Promon tory Point.

Samples had good zinc values for length of 1,500′, the ore showing 11% zinc for 60 samples cut at regular intervals along workings.

CEDAR TALISMAN CONS. MINES CO. UTA

Offices: 515 Newhouse Bldg., Salt Lake City and Milford, Beave county, Utah.

Officers: S. S. Pond, pres. and mgr.; F. B. Sherwood, v. p.; Ge Baglin, sec.-treas., with H. M. Chamberlain, Geo. Lynch and G. L. Bemis, d rectors.

Inc. March, 1909, in Utah, as a merger of the Cedar Mining Co. a the Talisman Mining Co.; latter company described in The Copper Han book, Vol. XI. **Cap.,** $500,000; shares 50c par; assessable. The 10th assess ment was levied on March 15, 1917, of 1c a share. All outstanding. Stock tra ferred at company office. Listed in Salt Lake City.

Financial statement, January 1 to April 30, 1916, showed profit of $2 At this time management changed and in report, May 1 to September 16, operating loss was given of $8,193 on this period, or net loss of $5,341. Mana ment has been changed again and reports are not available.

Property: 13 claims, 8 patented, 250 acres, in the Star mining distri Beaver county, Utah. **Ore:** carbonate of lead, copper, and zinc, contain gold and silver.

Development: several thousand feet of shafts and underground wo ings, the lowest on the 1,000′ level of the incline, or main working shaft. 300′ level drift is out 267′ and will be driven 200′ further. Previous to the c solidation the two properties are said to have had a total net production of $1 000, but for years they have not shown a production of any importance. Co pany claimed 50,000 tons mill ore on dump and blocked out, that will ave 8% lead, 14% zinc, 7 oz. silver. In July, 1917, the property was leased f years to H. S. Joseph, who started shipping 12% lead and 10 oz. silver o August. Shipments for 1918 totaled 200 tons. Company operations to be sumed in 1920.

CHRISTMAS MINING CO., INC. UTA

Address: 802 S. 2nd West St., Salt Lake City, Utah.

Officers: Thos. H. Hazel, pres.-treas.; C. F. Kabisius, v. p.; J. H. S der, sec., with A. Johnson, and C. F. Adams, Jr., directors.

Inc. April 21, 1891, in Utah. **Cap.,** $10,000; 5c par; outstanding, shares; assessable. Last assessment, No. 18, ½c a share, was called Marc 1919.

Property: 12 patented claims, 4 miles from Gold Hill, Tooele co said to show fissure veins in limestone and porphyry, with gold, silver and lead ore.

Development: 150′ vertical shaft with 100′ of workings. The president letter to the stockholders, says: "We have a mint in the Christmas prop- only the majority of you don't know it." He also says: "We are just bud- into shippers." This is a prospect handicapped by "lack of funds," a not mmon malady.

Y ROCKS MINING CO. **UTAH**

Office: Houghton, Mich.

Officers: N. W. Haire, pres,; John Edwards, v. p.; Jas. P. Edwards, sec.- .; L. M. Cleaves Byers and Jos. Busch, directors.

Inc. 1906, in Utah. **Cap.,** $1,000,000; $5 par. Property consists of holdings in the Michigan-Utah Mining Co., received for lands sold in 1912.

FF MINING CO. **UTAH**

Former address: First Nat'l Bank, Milwaukee, Wis. **Operating office:** Judge Bldg., Salt Lake City, Utah. **Mine office:** Ophir, Tooele county, t.

Officers: A. G. Kern, pres.; Grant Snyder, v. p.-mgr.; J. A. Stewart, treas., with A. D. Thompson, Frank Adams, Geo. Swift and E. McVicker, tors. A. H. Williams, supt.

Inc. May 31, 1906, in Maine. **Cap.,** $3,000,000; $10 par; all outstanding.

Dividends: to 1916, $90,000.

Property: in the Ophir district, contains silver-lead-zinc ore as replace- deposits in limestone.

Development: by tunnels, with several miles of workings.

Equipment: includes electric power and one-mile aerial tram.

Does not reply to requests for information.

PPER MINING CO. **UTAH**

Successor to Mohawk Mining Co.

Inc. July, 1916, by T. J. Yates, J. S. Barlow, John Russon, Dr. G. N. is and J. A. Dalton, all of Salt Lake City.

Property: 7 claims, near Tecoma, Boxelder county, Utah, shows 2 veins sed throughout property, carrying silver-lead and zinc ores.

Development: by an 80′ shaft with 100′ of drifting. Is a prospect only. No recent report.

IMONWEALTH MINES CO. **UTAH**

Office: 420 Herald Bldg., Salt Lake City. **Mine office:** Newhouse, er county, Utah.

Officers: Wm. M. Bradley, v. p.; W. T. Allen, sec.-treas.; Newton A. on, gen. mgr., with C. H. Strevell and Jas. H. Paterson, directors.

Inc. Nov., 1906, in Wyoming. **Cap.,** $600,000; $1 par.

Property: the Commonwealth mine, 7 claims, in the Star district, ad- ig Lady Bryan and Progressive mines. Claims show Topache limestone intrusive sheets of altered green porphyry, cut by fissures, with more or mineralization along fissures and outward along certain limestone beds. ore was produced from surface workings and the Nellie claim has copper ides in its bottom workings.

Development: by a 1,400′ tunnel, with back of about 300′. Said to have d ore assaying up to 4% copper, 20% lead and 60 oz. silver per ton.

Equipment: includes gasoline power and an air compressor. Develop- shows but little ore, mostly low-grade, and claims are not especially promis- according to geological reports. No recent information; probably idle.

SOLIDATED ORES CO. **UTAH**

Owns vanadium-uranium claims in Brumley ridge district, near Moab. Re- d, October, 1919, that work would be started; J. W. Stephen, in charge.

PER BUTTE MINING CO. **UTAH**

Office: Richfield, Sevier county, Utah. Wm. Johnston, pres.; Bird, sec.-treas.

is a copper prospect on Gold mountain, in the Kimberly dis- nty, Utah.

by a short tunnel, showing a 6′ vein of low-grade silver-

bearing copper ore. Company claims to own a large deposit of alunite, a pot ore.

COPPER MOUNTAIN MINE UTA

Owned by Samuel Newhouse, Newhouse Bldg., Salt Lake City, Utah. Lea to A. J. McMullen, Milford, Utah.

Property: 7 patented claims, 125 acres, in Beaver Lake mining distr Beaver county, Utah.

Geology: ores containing gold, silver, iron and copper occur as co tact deposits in E.-W. shoots with a dip of 70° to the north between a marm foot wall and a limestone hanging wall. Ore carries copper oxide with lime a iron, the average of carload shipments being 4%.

Development: by a shaft 100' vertical, then 150' incline and 60' drifts. Mine is worked by overhead stoping.

Equipment: 15-h. p. gas hoist.

Production: 60 to 70 tons for 1916. Ore reserves were estimated 10,000 tons.

COPPEROPOLIS MINING CO. UTA

Address: N. A. Dunyon, mgr., Tooele county, Utah.

Property: 65 claims in Deep Creek district. Shipments of selected in October, 1917, reported to have returned 60% copper, 65 oz. silver and gold per ton. In February, 1918, a car of ore was shipped assaying about copper.

Developments: by tunnels.

COPPER QUEEN MIDLAND MINING CO UTA

Address: Grantsville, Utah.

Officers: John P. Anderson, pres.; E. T. Woolley, v. p.; Mrs Hil Erickson, sec.-treas., with Gustave Anderson, and O. W. Anderson, directors

Inc. June, 1907, in Utah. **Cap.**, $125,000; 25c par; issued 380,000 sha

Property: 15 claims, unpatented, in Clifton mining district. Too county, and 6 miles S. E. of Gold Hill; said to show several promising vein gold-silver values in lead and copper ore.

Development: 6 incline shafts from 50' to 205' deep, two tunnels, and 125' in length. Total workings about 1,850' are mainly result of assess work. About 30 tons of $50 ore was shipped in 1918.

COPPER RANCH CONS. MINING CO. UTA

Office: 130 South, on West Temple, Salt Lake City, Utah.

Officers: D. L. Evans, pres., Malad, Ida.; Jos. Pingree, sec.-treas.; A McCulley, v. p.; D. E. Kirk, and E. V. Kessler, directors.

Inc. Sept., 1917, in Utah.

Property: the Copper Ranch mine, 10 claims, located next to Mil Copper Co. ground, 7½ miles west of Milford. Mine operated during 19 17 by lessees who produced 100 cars of ore netting $32,368 smelter ret Orebodies in sight reported sufficient for regular shipments for seve years.

Development: by 300' incline shaft with drifts and crosscuts on ore

Equipment: motors, hoist and compressor.

COPPER RANCH MINING CO. UTA

Presumably dissolved.

Former officers: M Thatcher, former pres.; C. L. Rood, v. p. Inc. in Utah. **Cap** 000; shares 50c par.

Property: a mine Milford, sold Aug., 1917, for $57,000 to D. Malad City, gree and A. S. McCully, of Milford, Ut ed to 13c p Copper Ranch stock. (See Copper Ra The own its property are described in The Co XL 191

CO UTA

In

Property: 8 unpatented claims, near Newcastle, said to show copper, er-lead ore. Developed by a tunnel that was 600′ long at last report. a prospect.

EEDMOOR MINES CORPORATION **UTAH**

Address: Palladio Bldg., Duluth, Minn.

Officers: W. D. Williams, pres.; J. A. Keyes, v. p.; R. A. Casson, treas.; . Bonner, sec.; with Lloyd Davie, Milford, Utah, directors.

Inc. Aug., 1915, in Utah. **Cap.,** 1,000,000 shares; 500,000 outstanding.

Property: 7 claims, 120 acres, in Star district, Beaver county, Utah, said how silver-lead ore.

Development: open-cuts and shallow shafts. Some ore shipped from e under former ownership.

EOLE COPPER MINES CO. **UTAH**

Address: Atlas Bldg., Salt Lake City, Utah.

Officers: H. A. Pederson, pres.; H. Brellean, sec.; B. H. Goddard, mgr.

Inc. 1917. **Cap.,** $250,000; shares, 15c par.

Property: 10 claims, 6 patented, 75 acres in Lincoln mining district, ver county, shows gold-silver-copper-lead ore in a contact deposit ween granite and limestone. Deposit has an E. W. course and dips E. Average assays said to be 12% copper, 5% lead, 17 oz. silver and $1 to old per ton.

Development: 400′ incline shaft and 200′ tunnel, with total workings t 2,500′. Management claims to have large bodies of ore blocked out shipping when copper prices warrant.

Equipment: includes compressor and hoist.

EOLE MINING CO. **UTAH**

Was a leasing company. Fully described in Vol. XIII.

OFF MINING CO. **UTAH**

Officers: R. R. Tanner, supt., Beaver, Utah; G. P. Norton, sec.

Cap., $1,000,000; shares $1 par; 295,000 shares and $7,354 in treasury, uary, 1916. Listed in Salt Lake City.

Property: 5 patented claims, in Lincoln mining district, 12 miles east Milford, Beaver county, Utah. Ore is found along the contact of lime e hanging-wall and limestone foot-wall and varies in width from 6″ to It is said to carry silver, lead, copper and gold.

Development: by 240′ incline shaft, also 665′ of tunnels and drifts. Have ven ore shoot on 150′ level.

Three carloads of ore shipped, 1917, assayed 13% lead, 6 oz. silver and) gold per ton.

Equipment: includes a gasoline hoist and air-compressor. No recent ort.

PRIC MINES CO. **UTAH**

Mail returned from former office at 17 Battery Place, New York, and from 206 Templeton Bldg., Salt Lake City, Utah. F. A. Bishop, sec.; . Morris, mgr.

Inc. May 11, 1908, in New York. **Cap.,** $1,000,000; $1 par; assessable; d, $500,000. Is affiliated in finances and is managed by the Horn Sil- Mining Co.

Property: the Cupric, or Iron Devil mine, 16 claims, unpatented, in the co district, Beaver county, adjoining the Peacock mine, at the east of White mountain and 2 miles S. E. of Newhouse. The mine is near gneous contact, dikes and tongues of monzonite invading the limestone; e are numerous mineralized fissures carrying chalcopyrite, pyrite, specu- rite and magnetite with garnet, tremolite, muscovite, etc.

opment: by 2 old incline shafts and 425′ two-compartment ver- sunk near the main tunnel of the Cactus mine. Equipped with ist. Property has good ore, but not, it is believed, in large ity to make mine profitable.

DEEP CREEK COPPER KING CO. UTAH

Mail returned, 1919 from former address, Gold Hill, Tooele county, Utah.

Property: 10 claims in Deep Creek district, extending south from the Western Utah Copper claims.

Development: by 100' shaft said to be sunk on copper-silver-lead ore. Probably idle.

DEEP CREEK COPPER M. & M. CO. UTAH

Office: 501 Boyd Park Bldg., Salt Lake City, Utah.

Officers: R. C. Naylor, pres.; J. Pingree, treas.; A. L. Thomas, Jr., sec., with A. Winzell, L. Housekeeper, I. A. Powell and W. T. Smith, directors.

Property: 10 claims, in the Deep Creek district, Tooele county, said to show lead-silver-copper ore.

Development: by shallow shaft on the Moonlight claim which is to be sunk 100' on a 2½' vein.

Company reported raising funds for development work by stock sales at last account.

DEER TRAIL MINING CO. UTAH

O. J. Salisbury, pres., 574 E. First St., Salt Lake City, ; G. A. McCaskill, gen. mgr. Company operates the Deer Trail mine, near Marysvale. The ore contains gold, silver and lead.

Development: by tunnels, one over 2,200' in length. Early in 1918 a 100-ton mill with flotation unit was completed. Shipments in 1918-'19 averaged 10 to 12 carloads a month. About fifty men employed.

DELSA MINING CO. UTAH

Property about 6 miles from Santaquin, reported operated under lease by G. M. McLean in 1917. Ore occurs in veins, 1-2' wide, carrying silver, lead-zinc. Developed by tunnel, 500' long at vertical depth of 300'. Probably idle.

DETROIT COPPER MINING CO. UTAH

Samuel A. King, pres.; Judge Bldg., Salt Lake City, Utah.

Inc. Jan., 1916, in Utah. **Cap.**, $1,000,000; shares $1 par; 400,000 in treasury. Held 5-year $100,000 bond and lease, from November 24, 1915, on 40 claims, locally known as Ibex mine, and owned by Ibex Gold Mng. Co.

Company described in Vol. XIII. Property is now held under bond and lease by the Monarch Cons. Mines Co. and described under that name.

DEWEY SILVER AND COPPER CO. UTAH

Mail returned, 1918, from former address, Lorin Hall, Brigham City, Utah.

Property: 5 claims, 5 miles N. of Brigham City, Boxelder county.

Development: by tunnels, ore occurring in limestone. Surface ore said to contain up to 60% lead with some silver and copper. Probably idle.

DRY CANYON CONSOLIDATED MINING CO. UTAH

Address: Gisborn, Tooele county, Utah.

Officers: C. J. Garber, pres.-treas.; L. L. Travis, v. p.; J. E. Dare, sec., with V. C. Anderson and Violet S. Scribner, directors.

Inc. 1900, in Utah. **Cap.**, $100,000; shares 5c par; assessable; 1,800,000 shares outstanding. Annual meeting January 15.

Property: 29 claims, 12 patented, 400 acres, in Dry Canyon, Ophir mining district, Tooele county, said to show a complex ore containing gold, silver, copper, lead and zinc.

Development: by tunnels with a total of over 8,000' of workings.

Production: during 1918 produced steadily, smelter returns paying expense of development work.

DUGWAY COPPER MINING & SMELTING CO. UTAH

Office: 54 East 4th South St., Salt Lake City, Utah **Mine office:** Gisborn, Tooele county, Utah.

Officers: O. F. Peterson, pres.-treas.-gen. mgr.; P. C. Kittle, v. p.; A. F. Peterson, sec., with A. F. H. Peterson and H. B. Windsor, directors.

Inc. June 13, 1902, in Utah. **Cap.**, $30,000; shares 10c par; assessable; ed, $22,506. Annual meeting, third Tuesday in July.

Property: 6 claims, patented, 118 acres, in the Dugway district, 43 :s from a railroad. Shows an ore zone, reported by company, to be long on the 200′ level, containing a number of orebodies that carry copyrite, bornite and argentiferous galena, giving assays of 1 to 15% per, up to 30% lead, up to 7% zinc, up to 66 oz. silver, and $1.60 gold ton.

Development: by a 333′ incline shaft, with about 1,000′ of workings, wing considerable ore. Idle for several years.

GWAY SMELTING CO. **UTAH**

Office: 203 Atlas Block, Salt Lake City, Utah.

Officers: A. L. Thomas, Jr., pres.; K. D. Kuhre, v. p.; C. S. Goddard, -treas., with E. R. Hardy, and C. G. Adams directors.

Early in 1918, this company was arranging to construct a 100-ton lter at Dugway, Tooele county, with the idea of refining the ores from Dugway district, and the advertising matter sent out stated "This will : the Dugway Smelting Co. a profit in excess of $1,000 a day with 100 s daily capacity, and with increased capacity the profits will be more ı proportionately larger. As a rule, the public is not cognizant of the :e profits in smelting, as the returns are so large and sure that the public never been given a chance to invest, all the capital being furnished by :e corporations." Nothing has been heard of the proposed company for r a year, so presumably the public has lost another chance to get either fit or experience.

LUTH & UTAH DEVELOPMENT CO. **UTAH**

Property sold to Bullion Coalition, and proceeds distributed. Company sumably dissolved. Fully described in Vol. XIII.

GLE COPPER MINING CO. **UTAH**

Mine office: Santaquin, Utah county, Utah.

Officers: Armon Cravens, pres.; S. W. Higginson, v. p.; C. E. Snell, -treas.; L. F. Peterson, supt.

Inc. May, 1907, in Utah. **Cap.**, $1,000,000; shares 10c par. Last assess- ıt of ½c delinquent, April 11, 1914.

Mine on Mount Nebo, east of Santaquin, has shipped a little high-grade l and copper ore. Developing with a small force at last accounts. No :nt information.

ST ANTELOPE MINING CO. **UTAH**

Address: 135 E. Broadway, Salt Lake City, Utah.

Officers: John Matson, pres. and mgr.; John W. Chase, v. p.; H. E. rs, sec.-treas.; with N. P. Hansen, and A. C. Nebeker, directors. C. W. tit, supt.

Cap., $100,000; 10c par; assessable; last assessment, ½c a share, delin- nt September 15, 1919. Listed on Salt Lake Exchange.

Property: 11 claims, unpatented, on Mineral Mountain, Millard county, ›ins Keno and Antelope Star mines.

Development: by 400′ tunnel with drift on limestone quartzite contact; of work in 1916-17, showed excellent ore in small amount in west drift. ed down during 1918, but reopened in March, 1919.

DORADO GOLD MINING & MILLING CO. **UTAH**

Address: Don Maguire, mgr. and principal owner, Ogden, Utah.

Property: 900 acres, said to show silver-lead-zinc ore in limestone- rtzite contact. Copper ores occur in granite. Shipments in 1912 ran lead, 10 oz. silver and $2 gold. Mine is said to show 40,000 tons % zinc ore and 100,000 tons of silver-lead ore.

Development: includes 1,400′ tunnel. Planned mine development and allation of a new tramway. No recent report. Probably idle.

ERALD MINING CO. **UTAH**

Mine office: Mammoth, Juab county, Utah. J. E. Oglesby, pres.; J. L. dt, gen. mgr.

Inc. 1896, in Utah. **Cap.**, $300,000; shares $1 par; assessable, fully i sued. Listed on Salt Lake Exchange.

Property: 4 claims, and additional land bought, 1910.

Development: 1,100′ shaft, with about 4,000′ of workings, on a narr but rich vein, carrying copper, silver and lead ores. A 4′ vein between w defined walls, showing heavy iron mineralization and sugar quartz w opened in a 700′ winze.

Company has levied assessment for years and been regarded as t "wildest of wildcats," but is now in favor and may repay stockholders their blind faith and yearly contributions.

Reported June, 1919, to look promising on 1,000′ level.

EUREKA OPHIR MINE UTA

At Dry Canyon camp, via Stockton, in Rush Valley district, To county, Utah, on the S. P. L. A. & S. L. R. R.

Property shows veins with replacement orebodies in Paleozoic li stones at and near dike contact and shipped 50 tons a month from the 2 and 375′ levels, averaging 8% copper, 15 oz. silver, 10% lead, in 1913.

Property: operated under bond and lease by Mineral Development C some years ago, and shipped $26.92 ore from the 200′ level. Planned sinki main shaft to 400′ level. No recent returns.

FALK MINING CO. UTA

Address: Midvale, Utah.

Officers: K. H. P. Nordberg, pres.; Alma E. Malstrom, v. p.; Hy A. Nordberg, sec.-treas.; with Alma Francom, and Kristina Nordbe directors.

Inc. 1913, in Utah. **Cap.**, $100,000; shares 10c par.

Property: 8 patented claims, 160 acres, in North Willow Can Tooele county, 8 miles S. W. of Grantsville, said to show veins with le silver, gold, copper ore.

Development: by several tunnels and 120′ shaft. Property is a prosp idle for some time, but management attempting to sell stock to en company to resume work.

FEDERAL MINING & MILLING CO. UTA

RISON-MONSTER MINING CO. **UTAH**
ffice: Utah Sav. & Trust Co., Salt Lake City, Utah. Mine near Gold ooele county, Utah.
fficers: J. P. Gardner, pres.; J. S. Garrison, v. p.; H. B. Windsor, S. W. Morrison, treas.
ic. June, 1906, in Nevada. **Cap.,** $1,000,000; $1 par; assessable. As- ent No. 9, ½c per share levied in September, 1918. Is a merger of arrison G. & C. Mng. Co. and the Monster Mng. Co.
roperty: 26 claims, patented, on Dutch mountain, in the Deep Creek t, 40 miles from Wendover, on Western Pacific railroad. A branch o the district was completed in 1917, reducing transportation costs ially. The Garrison Monster company built a loading station at Garri- tation on its spur from the Deep Creek line. Mine has over 3,500′ rkings and is said to show considerable bodies of silver-lead ore. was resumed in 1917. A few carloads of ore were shipped early in

RAL EXPLORATION CO. **UTAH**
dress: Providence Bldg., Duluth, Minn.
cers: Hansen Evesmith, pres.; Wm. O. Pealer, v. p.; M. W. Eve- ec., with E. I. Bricker, U. L. Yynott, and E. J. Hansen, directors.
July 21, 1903, in Minnesota. **Cap.,** $100,000; $50,000 in preferred, 000 in common stock; outstanding, $50,000, and $300 preferred.
mpany is an exploration and holding company interested in the St. nd other companies in Star and South Star districts, Beaver county.

N LEROY UNITED MINES CO. **UTAH**
ce: 517 Atlas Blk., Salt Lake City, Utah.
ers: A. S. Fowler, pres. and treas.; Jas. Moffat, sec., with Given nd Loris Pratt, directors.
, $1,000,000; $1 par; 750,000 issued. Paid a dividend of 1c per share, er, 1913.
erty: in Silver Island district, Tooele county, 15 miles north of **r. Company has made several shipments of silver ore, but ran out y and leased mine; lessees are said to have shipped 500 sacks of ary, 1916.**

Property reported sold in August, 1917, to satisfy a judgment for $[illegible] in favor of E. Hanson. No later information.

GINZA COPPER CO. UTAH

Idle. Mine near Kelton, Boxelder county, Utah. Operations stopped [illegible] 1915 after considerable prospecting had failed to locate ore of commercial grade. Described Vol. XI, Copper Handbook.

GLEN ALLEN MINING CO. UTAH

Address: Box 88, Park City, Utah.

Officers: Jas. B. Allen, pres.; E. K. Stallo, v. p.; Emer Murdock, sec.-treas.; with A. C. Hatch, Jos. Hatch, A. C. Miller, S. A. King, J. W. Poe, Leon Nash, and W. R. Ridgely, directors.

Inc. May, 1918, in Utah. **Cap.**, $2,000,000; $1 par; issued 1,500,000 shares. Annual meeting in May.

Property: 36 claims, 15 patented, in Glencoe Canyon, 3 miles S. E. of Park City, includes the old Glencoe mine, a silver-lead producer.

Development: 200′ vertical shaft and a 2,250′ tunnel, with total workings of 3,500′. Management claims 50,000 tons ore blocked out with average assays of 10% lead, 10 oz. silver, 16% zinc, and ½% copper.

Equipment: includes a 50-h. p. hoist, and 6-drill compressor. A 250-ton flotation mill has recently been built.

GOLD BOND MINING & MILLING CO. UTAH

Idle. **Last address:** 27 Latimer Block, Salt Lake City, Utah.

Officers: A. A. Crome, pres.; Walter Crome, v. p.; Wm. Crome, sec.-treas., with W. C. Howe and C. F. Stanley, directors.

Inc. 1898, in Utah. **Cap.**, $25,000; 5c par; assessable; 200,000 shares outstanding.

Property: 2 unpatented claims, 4 miles from a railroad, Tooele county, shows a contact fissure vein, traceable on surface and carrying streaks of copper, gold, silver ore in limestone formation. Assays average 4% copper. Is merely a prospect reported to have good showings. Developed by a shallow shaft and 120′ tunnel, with about 300′ of workings. No recent information; probably idle.

GOLD CROWN MINING & MILLING CO. UTAH

Address: Milford, Beaver county, Utah.

Officers: A. L. Cullimore, pres.; C. G. Johnson, v. p.; S. L. Swan, sec.-treas.; James Kirk, mgr.; W. E. Yardley, asst. mgr.

Cap., $10,000; shares $1 par.

Property: 7 claims and lease on another in Star district, Beaver county. Some rich lead-silver ore opened. Reported in May, 1919, that nine cars of ore had been shipped, mainly from 300′ level, said to assay 20-25% lead and 45 oz. silver.

GOLDEN EMMA MINING CO. UTAH

Geo. F. Busch, pres. and mgr., 426 Vermont Bldg., Salt Lake City.

Cap., $1,000,000; shares $1 par.

Property: 30 claims, under development in 1918. No recent report.

GOLDEN REEF CONS. MNG. & DEV. CO. UTAH

Address: 22 Keith Emporium Bldg., Salt Lake City, Utah.

Officers: D. P. Rohlfing, pres. and mgr.; Leon Sweet, v. p.; H. S. Young, sec.-treas., with L. Simons, J. Rosenberg, C. B. Stewart and David Spence, directors.

Cap., $100,000; shares 10c par; 800,000 shares outstanding.

Property: about 750 acres, in Beaver county, about 5 miles N. of the Horn Silver mines, developed by a 2,000′ tunnel and a 450′ double-compartment shaft with four levels.

Work was resumed in November, 1919, after a shutdown of several months.

GOLDEN RELIEF MINING CO. UTAH

Address: Provo, Utah. Ben. H. Bullock, mgr.

Property: located in Santaquin district, was under development in the Fall of 1919.

OLDSTRIKE BONANZA MINING CO. **UTAH**

Probably dead, see Goldstrike Con. Both companies described in Vol. III.

OLDSTRIKE CONSOLIDATED MINING CO. **UTAH**

Dead. Mail sent Rollo E. Clapp, pres., returned, from former office, 603 ewhouse Bldg., Salt Lake City. Described in Vol. XIII.

OLDSTRIKE MINING & LEASING CO. **UTAH**

Mail returned, 1919, from former address, 603 Newhouse Bldg., Salt ake City, Utah.

Officers: H. G. Snyder, pres.; E. J. Lund, v. p.; Rolla E. Clapp, sec.-eas., with Clyde McQuarrie, Louis R. Lund and H. A. McQuarrie, direc-rs. **Inc.** April 16, 1915. **Cap.**, $100,000; shares 10c par.

Property: lease Nos. 1 and 2 on Hamburg claim of Bull Valley Gold ines Co., 3 claims of the Herd Girl group, Last Chance and Cripple reek groups in Goldstrike district, Washington county, Utah. Said to show old ore occurring in fissure vein, 4′ wide and averaging from $7 to $20 r ton.

Development: 500′ adit, at depth of 300′ with several winzes, drifts and raises.

Equipment: two 3-stamp mills of 20 tons daily capacity, 20-h. p. engine d compressor.

Ore reserves: 10,000 tons blocked out, according to published reports.

No recent report, probably idle. The Goldstrike district had a boom veral years ago, but is at present inactive.

RAND RIVER PLACER CO. **UTAH**

Office: 201 Felt Bldg., Salt Lake City, Utah.

Officers: O. W. Kumrow, pres.; Leo Erdman, v. p.; W. H. Penner, sec.-eas., mgr.

Inc. 1918, in Utah. **Cap.**, $100,000; shares 10c par; 300,000 shares issued; 0,000 in treasury. Annual meeting, first Monday in July.

Property: 3,000 acres of placer ground, at Grand River, Grand county, tah. Gravel runs from 80 cents to $7 per cu. yd. Equipped with a Mitchell malgamator of 35 tons capacity. Expended $6,000 in 1918. No production ported.

RANITE COPPER CO. **UTAH**

Address: Beaver, Beaver county, Utah.

Officers: A. L. Fotheringham, pres. and mgr.; Jos. McEwen, v. p.; F. Tolton, sec.-treas., at last accounts.

Cap., $1,000,000. shares $1 par.

Property: the King of the Hills mine in the Mineral range between Mil-rd and Beaver, has a 2′ vein, carrying high-grade silver-lead ore with some pper.

Opened by a 250′ shaft and 1,100′ tunnel. About $25,000 has been spent on e mine. No recent report, probably idle.

RANITE MINING & MILLING CO. **UTAH**

Address: Santaquin, Utah.

Officers: E. O. Bylund, pres.; Jos. Tietjen, v. p.; Jas. Goodall, sec.; C. Lindstrom, treas.-supt., with T. B. Heelis, R. J. Armstrong and Jos. Crook, rectors.

Property: 12 claims, unpatented, near Santaqu[illegible] Granite ne. Claims show limestone with ore-bearing fis[illegible] posits of copper and silver-lead ore developed [illegible] port, probably idle.

REEN MOUNTAIN MINING & MILLING

Probably idle. No 1917-19 returns secured.

Officers: Dr. R. S. Millbee, Marshfield, Wis[illegible] p.; A. E. Goodell, sec.; S. Amberson, treas., with

Inc. 1915, in Utah. **Cap.**, 1,500,000 shares; 10[illegible]

Property: Green Mountain group in Miners Ba[illegible]

35 miles S. E. of Cisco, on the D. & R. G. R. R., formerly owned by the Green Mtn. G. & C. Mng. Co. and fully described in Vol. XI, Copper Handbook.

Ore: gold, silver and copper, low-grade ore said to average about $8 per ton; also said to show some high-grade ore. Developed by Dewey crosscut tunnel.

Equipment: 30-h. p. gasoline engine, 2 sets of power drills, compressor and pumps.

HANAUER SMELTING WORKS UTAH

At Salt Lake City, Utah. Controlled through stock ownership by American Smelting & Refining Co.

HINMAN MINING CO. UTAH

H. W. Hinman, pres., Garfield, Utah; F. G. Morse, sec., 639 Sixth Ave., Salt Lake City, Utah.

Property: the old Pocahontas lead-silver mine, 6 claims, located 6 miles from Gold Hill. A tunnel was driven to get under the ore disclosed in the 130′ incline shaft above, and some ore was shipped in 1918.

HOMESTAKE T. & C. CO. UTAH

Recently merged with the Great Divide Mines Co.; controlled by John B. Taylor, v. p., 678 E. S. Temple St., Salt Lake City; J. H. Hurd, pres.; Walter A. Cook, sec.-treas.

Inc. 1906, in Utah. **Cap.**, $100,000; shares $5 par; assessable; fully issued. Is a close corporation, with only 5 stockholders.

Property: 30 claims, in Pine Canyon, West Mountain section, Tooele county, with water rights, tunnel rights and franchise for a deep tunnel from Pine Canyon into the Bingham district; also several hundred acres of bench lands, and an 800-acre smelter site, 4 miles from the International smelter. Claims show bedded veins with lead and copper ores.

HOPE OF ISRAEL MINING CO. UTAH

Ben H. Bullock, pres., Provo, Utah; Nora A. Bullock, sec.-treas.

Inc. 1918, in Utah. **Cap.**, $50,000; shares 1c par.

Property: at Santaquin, being developed by tunnel said to have opened up low-grade lead-silver-copper ore.

HORN SILVER MINES CO. UTAH

Office: 27 Cedar St., New York. **Operating office:** McCornick Bldg., Salt Lake City, Utah. **Mine office:** Frisco, Beaver county, Utah.

Officers: Jacob Neadle, pres.; Alexander B. Simonds, v. p.; M. S. Hirschberg, sec.; Harvey N. Wadham, treas., with E. B. Critchlow, A. B. Simonds, Jacob Neadle, W. R. Britton, Chas. Brenneman, Wm. J. Barrette, S. T. Perrin, H. N. Wadham, and H. S. Young, directors; Benjamin B. Lawrence, cons. engr.; Wm. H. Hendrickson, mgr.

Is a reorganization of the Horn Silver Mining Co., which was incoporated in 1879 in Utah, with capital of $10,000,000; shares $25 par. Stock in old company exchangeable for stock in the new on an equal basis.

Inc. Oct. 17, 1917. **Cap.**, $400,000; $1 par; 348,000 issued. Listed on New York Curb.

Dividends: old company paid $5,642,000 in dividends up to 1907. Three dividends of 5c. each were paid in 1916, two by the former company and one by the present. Two 5c. dividends were paid in 1917, and one of same amount in 1918.

Statement for 1918 shows receipts from ore shipments, $181,235; misc. income, $4,513; operating expenses, $147,864; general expenses, $20,383; net profits, $8,434, compared with $27,283 in 1917, and $62,798 in 1916.

Property: 19 claims, 9 patented. The mine is extensively developed and has been a large producer of zinc, lead, silver and gold, with some copper as a by-product. The old bonanza ores extended down to depth of about 800′ with silver ores on the footwall, and copper ore on the hanging.

Main orebody was lost at 900′ and present company's main object is to find its extension below that level. Shaft has been deepened to 1,200′ and considerable work done on the lower levels. The north 900′ and 1,000′ levels now show

ping ore. In addition the low-grade ores and tailings are estimated at 000 tons.

Production: in 1916, 16,567 tons or ore were shipped, made up of 8,504 lead-silver ore, 3,986 tons zinc-lead, 102 tons zinc, 1,237 tons copper and 9 tons old slag. In 1917, output was 11,736 tons of ore, consisting of 10,507 of lead ore; 131 tons zinc ore, and 1,098 tons copper ore. In 1918, output 12,528 tons, consisting of 11,712 tons lead ore, 170 tons copper ore and 646 lead concentrates. In 1919, company employed about 75 men and produced 0 to 2,000 tons a month, including concentrates. Most of the ore came from re the 600′ level.

RN SILVER MINING CO. **UTAH**

Reorganized, 1916, as Horn Silver Mines Co., which see.

IPAH GOLD MINING CO. **UTAH**

Property: the Queen of Sheba mine, in the south end of the Deep ek country, Beaver county, Utah, an old gold mine credited with a production 80,000. Mine shows vein 5-18′ wide. Pay ore occurs in shoots assaying from $13 per ton.

Development: by a 1,187′ main tunnel, several short tunnels and a 376′ e.

Equipment: includes a small mill.

Worked under a 3-year lease from 1914 by C. E. Johnson. No later infor- ion.

PERIAL LEAD MINING CO. **UTAH**

J. H. Turner, mgr.; Frank Jardine, supt.

Property: located in southeastern part of Tooele county, said to show vein of lead-silver ore, assaying 40% lead and 10 oz. silver. Under develop- it in 1919.

DIAN QUEEN CONSOLIDATED MINING CO. **UTAH**

Office: Provo, Utah. **Mine office:** near Newhouse, Beaver county, Utah.

Officers: Jesse Knight, pres.; L. N. Morrison, v. p.; W. L. Mangum, -treas.; K. S. Jordan, gen. mgr.; J. W. Knight, directors.

Inc. 1907, in Utah. **Cap.**, $150,000; shares 10c par. Listed on Salt e Stock Exchange.

Property: 39 patented claims in Newhouse district.

Development: by 3 tunnels, 4,700′, 300′ and 200′ long, respectively; also spect tunnels and shafts.

Equipment: includes compressor, drills, blower and electric power. t of the mine has been worked by lessees.

Y HAWKES MINING CO. **UTAH**

Mail returned, 1919, from former address, Ogden, Utah.

Property: 6 claims in Little Valley, on Promontory Point, in Great Lake, near the Lake View mine. Ore carries galena with silver. About 00 was expended sinking an incline shaft and open cut work.

NNETTE COPPER MINING & MILLING CO. **UTAH**

Address: via Vernal, Utah.

Officers: J. T. Fitch, pres.; F. B. Hammond, v. p.; C. R. Jones, sec.- s., with G. A. Storrs and W. H. Griffin, Jr., directors.

Cap., $200,000; shares 20c par.

Property: 34 unpatented claims in the Uintah basin, Utah, 55 miles S. Rock Springs, Wyo.

Development: by 1,000′ of tunnels and shafts, costing $10,000. Ore ains up to 20% copper and good gold and silver contents. Shipments were le in 1916. The long haul prevents shipping ore at a profit, and a plant was ned at last accounts. Probably idle.

NO M. & M. CO. **UTAH**

Controlled by Knight Investment Co., Provo, Utah. **Mine office:** co, Utah.

Officers: Jesse Knight, pres.; W. Lester Mangum, sec.-treas.; Knight r Jordan, gen. mgr.; R. S. Andrew, supt.

Inc. March, 1907. **Cap.,** 500,000 shares; 10c par. Stock listed on Sal Lake Exchange.

Property: located in the Antelope mining district, Millard county. in the development stage.

KENTUCKY-DOUGLAS MINING CO. UTA

Mail returned, 1918, from former address, care Roger Traweek, sec., 62 w 3d St. N., Salt Lake City.

Officers: E. S. Holt, pres.-treas.; Thos. E. Brooks, v. p.; with T. S Fowler, directors.

Inc. 1916, in Utah. **Cap.,** $1,000,000; $1 par; 600,000 paid for property 400,000 in treasury.

Property: 10 claims, in Silver mining district, western Tooele county said to show silver-lead ore in veins and deposits in limestone, at and nea porphyry contacts.

Development: 150′ crosscut tunnel, expected to cut vein at 250′. I a prospect. Presumably idle.

KING COPPER MINING CO. UTA

Controlled by the Baileys of Salt Lake City. Property, located on th divide between Emigration and Red Butte canyon, 12 miles E. of Salt Lake City shows 6′ vein of copper carbonates on contact between quartzite and blue lime stone. Is developed by 300′ tunnel, principally in sandstone. Ore said to carr $14 in gold, copper and silver.

KING DAVID MINING CO. UTA

Address: Provo, Utah. **Mine office:** Frisco, Beaver county.

Officers: Jesse Knight, pres.; David Evans, v. p.; W. L. Mangum, sec treas.; K. S. Jordan, gen. mgr.

Inc. 1908, in Utah. **Cap.,** $500,000; shares 50c par; assessable; 67,00 issued. Shares listed on Salt Lake City Exchange. Sales at 2c. in 1919.

Property: 63 claims, patented, 940 acres, adjoining the Horn Silve mine, and supposed to carry the extension of the Horn Silver vein. Claim are well mineralized. **Ore:** mainly silver-lead bearing, with small quan tities of zinc and copper. **Development:** by 800′ 3-compartment shaft an several prospect tunnels and shafts. Present work consists of drifting, sinki and diamond-drilling.

Equipment: includes two 80-h. p. boilers, a double-drum hoist, 5-dr air compressor, 14 machine drills, generator, blower and steel head-fra Inactive in 1919.

KING OF THE HILLS MINE UTA

Address: Milford, Beaver county, Utah. Mine in Granite district, 2 miles N. E. of Milford, reported to have a 14 to 18′ contact metamorphic ve of copper-lead ore in limestone, cut by porphyry.

Development: by tunnels. Equipped with concentrating mill, maki a product carrying 10% copper, 42% lead and 10 oz. silver. Developing at l accounts.

LAKEVIEW MINING CO. UTA

Office: Ogden, Utah. **Mine office:** Promontory Point, Utah.

Officers: W. H. Wattis, pres.; L. F. Farr, sec.-treas., with C. Farr and Jas. Wotherspoon, directors.

Inc. March 9, 1915, in Utah. **Cap.,** $50,000; shares 5c par; assessa all issued to officers of the company. Annual meeting, March 9.

Dividends: to May, 1916, amounted to $124,000.

Property: 15 claims, unpatented, 235 acres, at Promontory Point, Box elder county, 3 miles E. of Saline on the S. P. R. R., shows zinc-lead ore in contact deposit between limestone foot and shale hanging-wall. The ore-b runs 35° W. and dips 35° N. E. Pay shoots are from 1′-20′ wide and fro 52′-250′ along the strike. Assays reported to average 32% zinc, 5% lead, 2 iron, 16% insoluble.

Development: to 1,000′ below the outcrop by 5 adits, from 250 long. Zinc ore as shipped averaged 32%, and lead ore 26%.

Equipment: includes 600′ tram and oil-driven Chicago Pneumatic comssor of 187 cu. ft. capacity.

Production: to July 1, 1917, 279 cars realized $352,471, mostly from zinc bonate ore.

The mine made quite a remarkable record. Located January 27, 1915, work s commenced March 9, with a small force and by December, 1915, all debts e paid, the mine was developed, equipped and shipping, a $70,000 dividend paid stockholders and a cash surplus remained in the treasury. Mine developed a lead property with depth, sulphides replacing oxidized ore. Property mined and sampled by Pierre Peugot, July, 1917.

In July, 1919, mine was again being operated in a small way under manageit of W. H. Wattis; company had approximately $20,000 in the treasury.

VORE GOLD MINES CO. **UTAH**

Idle and probably dead. Address: W. Scowcroft, Ogden, Utah. Mine is r St. George, Utah.

Officers: Willard Scowcroft, pres.; R. G. McQuarrie, v. p.; D. H. Morsec.-treas., with Irvine McQuarrie and Herrick McQuarrie, directors.

Inc. 1915, in Utah. **Cap.,** $100,000; shares 10c par; 60,000 issued.

Property: 10 claims in the Goldstrike district, Washington county, said show a vein 11′ wide, averaging $5 gold per ton.

ONORA MINING & MILLING CO. **UTAH**

Office: 18-20 E. First South St., Salt Lake City, Utah. **Mine office:** lford, Beaver county, Utah.

Officers: John Matson, pres.-mgr.; J. W. Chase, v. p.; C. D. Brown, -treas., with L. H. Stohr and N. P. Hansen, directors; S. Molin, supt.

Inc. Dec. 19, 1903, in Utah. **Cap.,** $100,000; shares 10c par; assessable; ued 950,000 shares. Listed on Salt Lake Exchange. Sales vary from ¼ to 2c., 9.

Property: 13 claims, in the North Star district, near Milford, shows ures in limestone carrying replacement deposits of gold, silver, zinc and l ores.

Development: by tunnels of 1,500′, 500′ and 300′ and 7 shallow shafts of to 100′ depth.

Company spent $9,000 on development work in 1917 and 1918, and has cut ie promising looking veins. Expects to be shipping soon.

Equipment: includes electric hoist and air compressor.

TTLE VALLEY MINING CO. **UTAH**

Owned 9 claims in compact group N. and E. of the Lakeview property, Protory Point, Boxelder county, Utah. Mail returned, 1919, and company bably idle.

WLAND TUNNEL WATER & TRANSPORTATION CO. **UTAH**

Mail returned, 1919, from former address, 819 Newhouse Bldg., Salt ce City. **Mine office:** Starr, Utah.

Officers: Louis Fugal, v. p.-mgr.; C. L. Whitney, sec.-treas., with Geo. Wasson and D. H. Livingston, directors.

Inc. Nov., 1912, in Utah. **Cap.,** 1,000,000 shares; 1c par; 350,000 issued.

Property: 36 unpatented claims, 700 acres, in Nebo mining district, Juab nty, said to carry gold-silver-lead-copper-zinc-iron ore. Formation is rtzite, lime and granite.

Ore: occurs as a contact deposit and in fissure veins, running N.-S. h dip of from 40-90°.

Company was organized to drive a 10,000′ drainage and transportation tunnel the Mt. Nebo mineral belt to serve 11 companies operating in that district to develop its own mineralized ground. The tunnel was in 600′, January 1, 7. No later information.

CIN COPPER CO. **UTAH**

Address: 908 Kearns Bldg., Salt Lake City.

Officers: R. W. Powers, pres.; D. J. Wheeler, v. p.; G. S. Norris, sec.-s., with F. Riter, P. K. Flynn, and V. Ergmaga, directors.

Property: near Lucin, Boxelder County, said to have a promis... as be... ing of ore. In December, 1918, property was being operated unde... re wa... D. J. Wheeler.

LUCKY BOY MINING & MILLING CO.

E. E. Lowry, pres.; Ira Griffiths, sec.-treas.

Shares listed on Salt Lake Stock Exchange, Boston and New York C... Federal Trust Co., transfer agent; State Street Trust Co., registrar, Bo... Mass. Annual meeting, third Tuesday in March.

Property: 120 claims, 2,450 acres, in 8 groups, also an 80-acre sme... site, and 800 acres miscellaneous lands. The groups, located in 5 different ... tricts of Beaver county are the O. K., Old Hickory, Harrington-Hickory, V... burg, Hoosier Boy, Southern States, Larkspur, Copperfield and Treasurer, ... to have about 100 orebodies, carrying copper, gold, silver, platinum, lead, co... bismuth, vanadium and uranium. The company has platted the town sit... Lewisville, where the smelter was located, and the property is served by the ... Lake Route.

Development: there are 18 shafts, 100 to 600′ deep, with a total of ... miles of workings. The Old Hickory and O. K. mines yield copper ores ... others silver-lead ores.

has been on the Old Hickory group of 9 claims, and in July, ore was reported on the 400′ level.

mine, 7 claims, formerly the principal producer, has a 500′ ient shaft, with a vein up to 20′ in width, development being e 300′ and 400′ levels. This mine had over 500,000 tons of low- ocked out, in what apparently was a stockwerk, up to 250′ in width, ringers of high-grade ore.

Harrington-Hickory group of 27 claims, partly fractional, shows ous fissure veins, intersected by cross veins, both approximately vertical, n addition, has a series of bedded veins, presumably following bedding s, dipping at 30 to 35°, giving 3 separate intersecting systems of orebodies. lopment is by a 600′ two-compartment vertical main working shaft, with s on the 500′ level, where there is a body of high-grade ore, assays from h have given 1% copper, 37 to 55% lead, 18 to 22 oz. silver, and about $1 per ton.

The **Vicksburg** group of 4 claims, a lead-silver mine, formerly worked gold, has 3 practically vertical fissures, of 2 to 20′ width, with mineralized s-fissures, developed by a 200′ 2-compartment working shaft, a 150′ incline t and numerous shallow shafts and pits. It is said that high-grade ore has encountered at a depth of 150′ in this mine. Worked by lessee and 20% lty paid to company on gross proceeds.

The **Hoosier Boy**, a silver-lead mine is about 3 miles from the Horn er mine. An 800′ shaft has been sunk and considerable work done at 200′, 600′ and 800′ depth.

Equipment: includes 6 gasoline and 1 steam hoist. Electric power, for ting and pumping, is taken from the Beaver River Power Co.

Mines closed down from August, 1914, to May, 1915.

Production: in 1916 was about 6,500 tons of ore, yielding 350,065 lb. er, 294,678 lb. lead, 257,476 lb. zinc, and 18,680 oz. silver. Produced about tons per month, 1917. Management has not furnished later production res.

MMOTH COPPER MINING CO. **UTAH**

Office: 219 Judge Bldg., Salt Lake City, Utah. Edward Bardsley, pres.;). Lyon, sec.-treas.

Inc. in Utah. **Cap.**, $10,000; issued, $6,000; shares 1c par; assessable. ed on Salt Lake Exchange.

Owns 240 acres in Millard county, 15 miles from Milford, said to show a of copper ore in monzonite. Development is surficial only, and property is a prospect. No recent returns.

STER KEY MINING CO. **UTAH**

Address: 1014 Boston Bldg., Salt Lake City, Utah.

Officers: A. G. Gutheil, pres.; C. W. Reese, v. p.; G. M. Sullivan, sec.- s., with A. J. Mooney and Henry Barney, directors.

Inc. Feb., 1915, in Utah. **Cap.**, 1,000,000 shares of no par value; as- able; 500,000 held by Trustee.

Property: 7 claims, 5 patented, 123 acres, 8 miles W. of Milford, Star ict, Beaver county.

Geology: ore occurs in bedding planes and fissures in limestone dip- N. E., the Mowitza shale-contact carrying the large orebodies, which extend g the bedding into the Red Warrior limestone. Company expected to cut horizon at depth of 250′. Hoosier Boy fissure intersects it. Is a prospect. recent report.

AL STATES MINING & MILLING CO. **UTAH**

Address: care Jesse F. Cannon, 743 S. 3 E. St., Salt Lake City, Utah.

Officers: Jesse F. Cannon, pres.; Henry Schepper, v. p.; E. S. Fisher,

19, in Utah. **Cap.**, $100.000. Company was organized to develop claims in the Dugway district, Utah.

MILFORD COPPER CO. OF UTAH UTAH

Office: Newhouse Bldg., Salt Lake City, Utah. **Mine office:** Milford, Utah.

Officers: Alfred Frank, pres.; C. W. Saacke, v. p.; H. A. Frank, sec.-treas., with J. E. Bergh, supt.; O. Brodbeek and F. Eckstein, directors.

Inc. Feb. 3, 1917, in Utah. **Cap.**, $500,000; $1 par; all issued. Transfer office 52 William St., New York. U. S. Corporation Co., New York, registrar. Stock listed on Salt Lake Exchange. Annual meeting, January 15. Earnings at rate of $100,000 per year.

Property: 18 patented claims, 300 acres, at Milford, Beaver county, Utah, known as the Montreal mine, being one of the properties developed extensively by the defunct Glasgow & Western Exploration Co. In February, 1916, mine was leased by Alfred Frank and others, who eventually organized the Milford company.

Geology: contact deposit in limestone and quartz-monzonite. Orebody 10 to 50′ wide, dips 45°, and has an irregular course. Ore is partly sulphide and averages 2.5% copper, 0.75 oz. silver, 0.01 oz. gold, 15% silica and 37% iron.

Development: by tunnels and shafts to 400′ depth, workings amount to 3,000′. Ore reserves estimated at 30,000 tons copper ore. In addition 200,000 tons of iron ore, with small values in silver and copper, has recently been opened up.

Equipment: 8x10″ air-hoist and 10-drill compressor.

Production: ships 100 tons daily to Garfield smelter, Utah, which desires the high iron-content of the ore.

MILFORD MAGNOLIA MINES CO. UTAH

Address: R. B. Garff, pres., 219 Colfax Ave., Salt Lake City; H. A. Smith, C. I. Goff, A. F. Judd, and John Clayton, directors.

Inc. 1919, in Utah. **Cap.**, $10,000; shares 1c par.

Property: the old Magnolia group of 9 claims, 12 miles S. W. of Milford, which contain lead-silver ore.

Development: by 125′ and 150′ shafts when the company acquired the property (1919). Company sank the 125′ shaft to the 200′ level on which exploration work exposed 4′ of high-grade lead-silver ore.

MILLER HILL MINING CO. UTAH

Office: care Knight Bros., Knight Block, Provo, Utah. **Mine office:** American Fork, Utah county, Utah.

Officers: Jesse Knight, pres.; J. Wm. Knight, v. p.; W. Lester Mangum, sec-treas.

Cap., $100,000; shares 10c par; assessable. Shares listed on Salt Lake Exchange. In September, 1917, 25,000 shares of stock were offered for sale at 50c. a share. Assessment of 2c. per share was called November 12, 1917. Shares sold from 2 to 15½c. in 1918, and 1½ to 4c. in 1919.

Property: 33 claims, 30 patented, adjoining the Mineral Flat mine, developed by 2,200′ tunnel with about 2,400′ of workings.

Property was worked in 1918, but is now idle.

MINERAL MOUNTAIN MINING CO. UTAH

Address: Tecoma, Nevada.

Officers: G. Austin, pres.; F. Litz, v. p.; E. B. Whipple, sec.; C. F. Whipple, treas.

Inc. March, 1908, in Utah. **Cap.**, $100,000; shares 10c par; 475,000 issued; assessable to 1c. yearly; assessment No. 4, levied July 2, 1919, 1c. a share.

Property: 13 unpatented claims, 250 acres, in Lucin district, Utah, 8 miles from Tecoma, Nevada. Developed to 350′ by incline shaft.

Geology: contact and fissure veins in limestone, quartzite and granite. Shoots are from 12 to 24″ wide. Ore carries lead carbonate, silver, and gold.

MINERALS PRODUCTS CORPORATION UTAH

Address: Marysvale, Utah. Controlled by Chicago capital. Howard F. Chappell, pres.; R. H. Knapp, gen. mgr.

Property: alunite bearing claims, 9 miles S. W. of Marysvale.

Equipment: includes aerial tram 6,200′ long, 600-h. p. steam plant and 1-ton mill to extract potash from the alunite, which is a hydrous sulphate of

l potassium. In October, 1918, reported as shipping 600 tons of ılphate per month.

_H CONS. MINES CO. **UTAH**

.ess: 631 Judge Bldg., Salt Lake City, Utah.

.icers: Joshua Greenwood, pres., 1150 Herbert Ave., Salt Lake City; . Goslen, v. p.; with M. K. Parsons, M. P. Broffet, J. M. Hayes, directors.

Inc. in Utah. **Cap.**, $2,000,000; shares $1 par; issued, 800,000 shares.

Company has a bond and lease on the property formerly held by the Detroit pper Mining Co.

Property: the Ibex mine (see Ibex Gold Mng. Co.), situated in Detroit trict, Millard county, 35 miles from Oasis, and 20 miles west of end of Delta nch line. Claims were located 35 years ago, work began 1894, and the Ibex was formed and smelter put up at Leamington, Millard county, Utah, treating tons daily. In winter of 1894-'95, company failed and property was idle till 6, when Jesse Knight took it up and reorganized the Ibex Co., patented the ims and sank two shafts. Worked until panic of 1907. Idle till 1915, when se and bond was taken from Mr. Knight by local farmers who organized Detroit C. M. Co. and shipped ore.

Claims cover two horizons of limestone; one blue and hard, the other light l soft, both cut by porphyry dikes and intrusives. Ore occurs in veins and lding offshoots, the veins being 25-100′ in width.

Ore: carries 2%-20% copper, with trace to 3 oz. per ton silver and to $20 per ton gold. Elevation of mine 5,500′ to 6,500′ above sea level.

Development: 600′ shaft on Keystone claim, a tunnel on Ibex, with 500′ tical depth at face and a 500′ shaft on E. P. H. claim. Good auto road from lta to Oasis; freight to Oasis $6 (to R. R. terminal $4); R. R. to Salt Lake, 60; smelter treatment, $4.

)NZONITE SILVER & COPPER CO. **UTAH**

Idle. **Officers:** S. S. Pond, pres. and gen. mgr.; D. Rigby, sec.; Geo. glin, treas.

Cap., $50,000; shares 5c par; assessable. In treasury, Jan., 1916, 400,000 res; bills receivable and cash, $2,500. Stock listed in Salt Lake City, but sales for 2 years.

Property: 7 unpatented claims, near Milford, Beaver county, 6 miles m the railroad, surrounded by the Leonora, Hoosier Boy and Paloma Exten- ı mines. Ore: silver and copper.

Development: 100′ shaft with 50′ of crosscutting. Is a prospect.

)RGAN ARGENTINE MINING CO. **UTAH**

Office: 22 E. Broadway, Salt Lake City, Utah. Mine near Peterson, rgan county, Utah.

Officers: Herbert Pembroke, pres.-gen. mgr.; A. B. Pembroke, sec.- ıs.

Inc. 1900, in Utah. **Cap.**, $5,000; shares 1c par.

Property: 15 claims, 9 patented, 280 acres, in Argenta district, shows ure veins in limestone carrying silver-lead and copper-gold ore.

Machinery was added, and development work started in 1917 and continued 1918.

)RGAN CRESCENT MINING CO. **UTAH**

Geo. T. Stenhouse, gen. mgr., Morgan City, Utah.

)RGAN-GALENA MINING CO. **UTAH**

Address: 417 Kearns Bldg., Salt Lake City, Utah.

Officers: J. W. Rozzelle, pres.-treas.; A. H. Levine, v. p.; J. H. Ritchie, . with F. H. Ashihira and Frank Troxler, directors.

Inc. Oct., 1916, in Utah. **Cap.**, $100,000; shares 10c par; 500,000 issued.

Property: 6 claims in Morgan county, Utah, said to contain fissure ıs in porphyry carrying 37% lead ore with some gold-silver values. Develop- ıt by shafts and tunnels. Is considered a good prospect. No recent report, bably idle.

MOSCOW MINING & MILLING CO. UTAH

Offices: 1020 Boston Bldg., Salt Lake City, and Moscow, Beaver county, Utah.

Officers: Matthew Cullen, pres.; J. L. Rawlins, v. p.; Athol Rawlins, sec.-treas.; G. S. Wilkins, supt.

Inc. May, 1907, in Utah. **Cap.**, $1,000,000; shares $1 par; assessable; issued, 900,000. Listed on Salt Lake Exchange.

Dividends: $108,000 to Sept., 1917, at rate of 2½c per share.

Property: 7 claims, including the Moscow mine in the Star district, 7 miles from a railroad, covers about one-half mile of the strike of an ore zone 50′ to 60′ wide. Ore mainly silver-lead, with some copper and zinc. The Moscow mine is one of the oldest in the district, having been worked over 30 years ago.

Development: tunnels and shaft to the 1,400′ level.

Shipments: have been fairly consistent, while the metal market was good. In June, 1917, output was 1,000 tons, averaging about $30 per ton, but company closed down later in the year.

NATIONAL RADIUM MINES CO. UTAH

Henry Schwartz, Denver, Colo., pres., at last accounts. **Inc.** in Colorado. **Cap.**, $400,000.

Property: in Green River district, Emery county, shows uranium and vanadium ore in a 5″ vein, said to run as high as 20% uranium. Developing in 1916. No recent returns, probably idle.

NEBO SILVER-LEAD MINING CO. UTAH

Company was operating a property near Mono, Utah, reported to show ore which assays about 60% lead and 8 oz. silver per ton.

NEW STOCKTON MINING CO. UTAH

Office: Mankato, S. D. Mine at Stockton, Utah.

Officers: F. M. Currier, pres.; R. A. Dunham, v. p.; W. Z. Harris, sec.-treas., Hess Bldg., Salt Lake City. W. A. Wilson, cons. engr., 406 Dooly Block, Salt Lake City; C. B. Kennedy, W. D. Kimball and M. M. Ferguson, directors.

Property: the old Ben Harrison mine at Stockton showing a vein with one to two feet of ore, which averages 10% to 45% lead, 5 to 40 oz. silver and 60c. to $7 gold per ton.

Development: by shaft with main work on 200′, 500′, 700′, and 800′ levels.

Production: $70,000 in 1913-1914. As shipped the ore has averaged $5 to $15 per ton with silver-gold-lead values.

In 1917 lessees shipped ore averaging 45% lead and 35 oz. silver per ton. No later production reported.

NORTH BECK MINING CO. OF SPANISH FORK UTAH

Officers: M. K. Nebo, pres.; S. N. Nelson, v. p.; H. A. Gardner, sec.-treas., 1134 Bueno Ave., Salt Lake City, with B. H. Brown, W. A. Jones, Edward Money, and R. H. Andrus, directors.

Inc. 1919, in Utah. **Cap.**, $10,000; 1c par.

Property: a group of silver-bearing claims in Spanish Fork section, Utah county.

O. K. EXTENSION MINING & REDUCTION CO. UTAH

Office: 222 D. F. Walker Bldg., Salt Lake City, Utah. **Mine office:** Milford, Beaver county, Utah.

Officers: A. J. McMullen, pres. and gen. mgr.; T. M. Farrell, v. p.; Chas. A. Weaver, sec.-treas., with R. H. Greenhalgh, directors.

Inc. Nov., 1899, in Utah. **Cap.**, 300,000 shares; 3c par; assessable; issued, 125,000; total assessments to date, $15,363. Annual meeting, second Tuesday in October.

Lands: 6 claims, 3 patented, 120 acres, near the Majestic mine in the Beaver Lake district, show monzonite and quartz-porphyry, carrying 2 fissure veins, of 5 to 24′ estimated average width, traceable 150′. Opened by 7 pits and shafts of 15 to 510′ depth, and a 150′ tunnel, with 1,045′ of workings, show-

copyrite estimated to average 2% copper. Inactive except for annual assess-t work.

L SILVER M. & M. CO. **UTAH**

David Keith, gen. mgr., Kearns Bldg., Salt Lake City, Utah. Thos. Kearns, ; W. G. Lamb, sec.-treas.

Inc. 1909, in Utah. **Cap.**, $100,000; shares 10c par; assessable; assess-t No. 17 of ½c per share levied August, 1918. Stock listed on Salt Lake hange.

Property: 33 claims in Erickson mining district, Indian Springs (near ic Jn.), Tooele county.

Development: by a 280′ incline shaft, reported all in ore running better 186 oz. silver and $4.70 gold per ton.

Production: in 1916, 5 cars of ore shipped netted $30,000. No recent rt.

PHAN BOY MINING CO. **UTAH**

Idle. **Milford, Utah.**

Officers: James R. Craig, pres.; W. D. Williams, v. p. and mgr.; Chas. oe, sec.-treas., with M. R. Williams and P. J. Evans, directors.

Property: in Star district, 20 miles S. W. of Milford, Beaver county, , shows limestone, cut by quartz monzonite, with ore in veins and replace-ts. There are 11 claims, adjoining the Red Warrior and Mowitza mines, loped by 500′ shaft with 1,200′ of tunnels and workings from which con-able high-grade ore has been shipped. Vein, though narrow, has bodies ead-carbonate ore carrying a little copper. Presumably doing only annual sment work.

.OMA EXTENSION MINING CO. **UTAH**

Office: 222 Judge Bldg., Salt Lake City, Utah. Lorin Hall, pres.; Wil-Scowcroft, v. p.; John W. Scowcroft, sec.-treas.

Inc. in Utah. **Cap.**, $50,000; shares 5c par; assessable; last assessment, share, delinquent, September 13, 1919; 700,000 shares outstanding. Listed alt Lake City. Shares sold at ½c. in 1919.

Property: 300 acres in Star mining district, Beaver county, shows N. ssures carrying silver-lead-copper ore. These fissures cross contacts between stone beds running N. and dipping E., quartzite that runs E. and dips N., and anite or quartz monzonite. Ore occurs where the contacts are crossed by the res.

.OMA GOLD AND SILVER MINING CO. **UTAH**

Office: Judge Bldg., Salt Lake City, Utah. **Mine and works:** Mos-Beaver county, Utah.

Officers: M. P. Braffet, pres.; H. W. Lane, v. p., with W. Scowcroft, . Cole and B. F. Caffey, directors; J. H. Braffet, sec.-treas.; C. J. Graff, supt.

Inc. in Utah. **Cap.**, $100,000; shares 10c par; assessable; last assess-: 1c. levied September 17, 1918. Stock is listed on the Salt Lake Exchange. es varied between ¼ and 3¼c. a share in 1918, and ½ to 3c. in 1919.

Property: 14 claims in Star district, near Moscow, said to cover 3,000′ g a limestone-monzonite contact intersected by 2 fissure veins, carrying silver, and copper ore.

Development: by 500′ of trenching and 900′ incline shaft, with develop-: work in progress on 900′ level in May, 1919.

IAMA MINING & MILLING CO. **UTAH**

Fred McCoy, mgr., Castleton, Grand county, Utah.

Property: 300 acres, 50 miles S. E. of Cisco and 6 miles from Utah-rado line, said to have a good showing of copper ore. In 1918, company ed a 2,400′ tunnel to cut veins at depth; this was 200′ long at last accounts.

INUVA COPPER CO. **UTAH**

Office 1160 S. 8th W. St., Salt Lake City, Utah.

Officers: J. R. Austin, pres.; G. D. O'Connor, v. p. and mgr.; W. R. herson, sec.-treas.; W. N. Beatty and F. L. Hummel, directors.

Inc. 1916, in Utah. **Cap.**, $25,000; shares 25c par; outstanding, $19,101;

assessable. In December, 1919, the State Securities Commission granted co pany permission to sell 68,000 treasury shares.

Property: 21 claims, unpatented, 385 acres, situated on Promont point, next to the Lakeview zinc mine and 2 miles from Salina on the S. P. R. The ground has not been thoroughly prospected, as it is covered by the bea gravels of Lake Bonneville (the ancient and larger Salt Lake).

Development: 200′ shaft on quartz shale bed showing bunches of ch copyrite ore assaying 20-30% copper; also 110′ drift on 60′ level. Work resumed on the 200′ level of the Redfield claim in December, 1919.

PLANETARY MNG. & MLG. CO. UTA

Inactive. **Address:** T. E. Weyher, sec., 210 Judge Bldg., Salt La City, Utah.

Cap., $10,000; shares 10c par; assessable; reduced from $500,000 November, 1917.

Property: claims near the old Century mine, N. W. of Kelton, Bo elder county, Utah. Development work is continued by assessments.

POLE STAR COPPER CO. UTA

Offices: Vandergrift Bldg., Pittsburgh, Pa., and Newhouse Bldg., S Lake City, Utah.

Officers: P. S. Chambers, pres.; D. A. Rees, v. p.; A. E. Custer, v. p.; F. A. Duerr, treas.

Inc. Nov., 1916, in Delaware. **Cap.,** $1,500,000; shares $1 par. Sta ment rendered March 20, 1917, showed cash on hand and accounts receiva $125,402.

Property: 15 claims, 5 patented, about 230 acres, in the Clifton or De Creek mining district, Tooele county, Utah, 167 miles S. W. of Salt Lake C Gold Hill is the post office address, about 2 miles south.

Geology: country rock is monzonite with prophyry intrusions. E and west veins traverse the claims and are in turn cut by N.-S. dikes, the m ore occurring at these contacts. Veins are said to be 4-12′ wide and ore average 5-7% copper, 49 oz. silver, $4.65 gold, with about 12½% bismuth.

Development: by 9 shafts, 5 tunnels, several drifts and open cuts. Ma vertical shaft is 336′ deep. In 1918 company was doing prospecting work the 336′ level; no later report.

Equipment: includes 2 gasoline hoists, compressor, etc.

Literature sent out from Pittsburg is suspiciously lurid, though mine m have merit and officers be reputable.

PROGRESSIVE MINING CO. UTA

Office: 229 South West Temple St., Salt Lake City, Utah. Mine nea Milford, Beaver county, Utah.

Officers: L. B. Bohn, pres.; I. Lessing, v. p. and mgr.; C. T. Mixe sec-treas. and cons. engr., Box 56, Salt Lake City; preceding, with F. J. Nichol C. C. Crimson and Jas. Barrett, directors.

Inc. Aug. 20, 1906, in Utah. **Cap.,** $250,000; shares 50c par; assessab fully issued. Total assessments to date, $10,000.

Property: 6 claims, 80 acres, patented, in the Star district, 8 miles fro a railway, carrying argentiferous copper and lead ores. The mine has a 2 incline shaft, with about 1,000′ of workings, developing a 3′ vein, said to carry ore assaying up to 8% copper, 35 oz. silver and $1 gold per ton. A few sm shipments have been made.

Mine was under lease in 1916, but presumably idle from 1917 up to present time.

PROMONTORY MINING CO. UTA

Described in Volume XIII. Name changed to United Promontory Mines Co., which see.

QUADMETAL MINES CO. UTA

Address: 41 Broad St., New York. Mine office: 414 Judge Bldg., Salt Lake City.

Officers: R. F. Robertson, pres.; H. A. Stoneham, v. p.-sec.-treas.; Chas. A. Stoneham, N. I. Snyder, and Grant Snyder (gen. mgr.), directors.

Cap., $1,000,000; $1 par; issued 600,000 shares; assessable.
Property: 8 claims, patented, near Frisco, Beaver county, said to show er-lead ore in fissure veins, dip 80° N. Orebodies said to vary in width from to 40′ and from 100′ to 200′ in length.
Development: by 700′ vertical shaft.
Equipment: includes a 50-h.p. electric hoist, compressor, and 150-ton ıtion mill.
The mine was worked for several years previous to 1884 and reported to e produced $960,000. The present management started operating its mill in 1918.

EEN OF SHEBA MINING CO. **UTAH**
Owned by J. W. Lawton, Chicago, Ill. W. D. Rawson, mgr.
Property: near Ibapah, in the Deep Creek district, about 29 miles S. W. Gold Hill, includes the old Queen of Sheba mine. Ore carries free milling d in a quartz vein said to be from 14-25′ wide.
Development: by 1,080′ tunnel and a 276′ raise, driven in 1914.
Equipment: includes 10-stamp mill and 1,700′ aerial tram. The mine is dited with past production of $150,000. Operated by lessees in 1917.

D WARRIOR MINING CO. **UTAH**
Office: Providence Bldg., Duluth, Minn. **Mine office:** Milford, Beaver nty, Utah
Officers: Leonidas Merritt, pres.; Alfred Merritt, v. p.; W. H. Borgen, .; E. R. Ribenack, treas., with Jas. T. Hale, John E. Merritt, Angus Buchanan l W. F. Acker, directors; Wilbur J. Merritt, supt.
Inc. Jan. 25, 1908, in Minnesota. Cap., $250,000; increased Jan., 1911, m $150,000, and again increased, January, 1917, to $600,000; $1 par; 210,000 ıed. Listed on Duluth Stock Exchange and New York Curb. Annual meet- , second Tuesday in January.
Property: a silver-lead mine, 8 claims, 1 patented, 95 acres, in the Star trict, eight miles from the Salt Lake Route. The claims show orebodies :urring along the bedding planes of limestone, one of which is 6′ thick, 50′ g, and proven for 600′ on dip; ore said to average 21% lead, 1% zinc, 18 oz. ver and 25c. gold per ton. In the deeper levels the mine has shown ore assay- ; 12% copper, 1% lead and 3 oz. silver per ton.
Development: by an 812′ vertical shaft with levels at 500′ and 675′ and 00′ winze sunk on the vein from the 500′ level. There are also numerous old llow shafts and tunnels, the mine having about 3,000′ of old and 4,000′ of w workings. These workings were estimated to show 20,000 tons of ore, with ut 10,000 tons blocked out for stoping by the former management. The mine s operated from 1870 until 1889 and was re-opened 1907, by this company. ork was concentrated on the 500′ level, 1917.
The property of the Mowitza Mining Co., adjoining the Red Warrior, was rchased early in 1917.
Equipment: includes a hoist good for 1,500′ and a 3-drill compressor.
Probably idle, as company's funds are low, and mine is not yet self-supporting.

EVENUE CONSOLIDATED MINING CO. **UTAH**
Frisco, Utah. **Address:** John B. Taylor, 678 E. S. Temple St., Salt ke City.
Property: 66 claims, 22 patented, 1,320 acres in Pine Grove district, 28 S. R. 16 W. on west side of Wah Wah Mtns., 20 miles S. W. of Frisco Newhouse, stations on Milford branch of Salt Lake Route. Elevation 7,500′ mine camp. Peaks 3,000′-4,000′ higher.
Geology: claims cover quartzite beds, overlain by 600′ of green shales, pped by 5,000′ of thickly bedded limestone, intruded by thin dikes and a boss yellowish decomposed porphyry. These beds dip eastward into the mountains, 20° to 40°, the west slope of the range being of similar structure, with igneous cks forming the east side. A strong E. W. fault runs through the center of e property, dislocating the beds 1,000′ to the east, on S. of fault, and ending in porphyry intrusion. Ores are lead and silver bearing and occur in fissure veins quartzite. Four parallel N. W.-S. E. veins north of Pine creek are 3′-6′ wide,

have smooth walls, quartz filling and carry galena of concentrating tenor, with occasional masses of shipping ore. There are several other undeveloped parallel veins, but all end at the shale belt. South of the fault a parallel 6'-20' vein represents the probable faulted continuation of the Cliff vein north of the fault.

Development: active in 1904-05; work was resumed 1913, but stopped 1914. It comprises the 500' Buckbee and 600' Southside tunnels, 125' Cliff shaft with 200' drift work, 130' Tasor shaft and various lesser openings. The Reveral tunnel is to crosscut all these veins in depth and supply the mill.

Equipment: includes 300 cu. ft. compressor, steam engine, etc. Property promising, but idle, pending financing.

ROB ROY MINING CO. UTAH

Address: P. T. Farnsworth, 164 E. S. Temple St., Salt Lake City.

Mine near Beaver City, Utah, at mouth of Indian Creek Canyon. T. P. Farnsworth, Salt Lake City, owner. Developed to depth of 300'. Mine has produced very rich gold ore, but was closed down several years ago when the vein was cut off by faulting. Tunnel was to be driven south in hopes of finding orebody. No recent report, probably inactive.

SACRAMENTO MINING CO. UTAH

In liquidation. Glenn R. Bothwell, pres.

Declared a dividend of 0.9c. a share, payable August 1, 1919.

Property: located in Mercur district, paid out $308,000 in dividends before closing down in 1912. At that time there remained $10,000 in the treasury and the 1919 dividend was paid from this fund.

ST. CROIX CONS. MINES UTAH

Organized in August, 1917, to continue work of St. Croix Mines Co.

Address: Duluth, Minn., and 261 Broadway, New York City. **Mine address:** Milford, Utah.

Officers: M. J. O'Brien, pres.; A. D. MacIntyre, v. p.; W. M. Evered, sec.-treas., with David Graham, L. Davis, M. J. Filiatrault, and H. G. Middaugh, directors.

Inc. 1917, in Utah. **Cap.,** $600,000; $1 par: outstanding, 500,000 shares. Listed on New York Curb; 120,700 shares traded in 1919 at 50c. to $1 a share.

Property: 6 claims, 1 patented, about 90 acres, in Star district, Beaver county, 4 miles from Milford, shows 5 contact deposits between porphyry and so-called white and blue lime. Copper-lead ore occurs as "chimneys," and shipments have run as high as $75 per ton.

Development: by 300' shaft and 400' tunnel, opening ground to depth of 500'. Workings total 1,500'.

Equipment: 35-h. p. gasoline hoist, and 4-drill compressor.

Production: intermittent since 1870: recent production about 250 tons annually.

ST. CROIX MINES CO. UTAH

Office: 601 Providence Bldg., Duluth, Minn. **Mine office:** Milford, Utah.

Officers: Hansen Evesmith, pres.

Inc. March 10, 1915, in Utah. **Cap.,** $1,000,000; 25c par; non-assessable. Is a holding company having part of stock of St. Croix Cons. Mines.

ST. MARY MINING CO. UTAH

Described in Volume XIII. Superseded by St. Croix Mines Co., which see.

SALT LAKE COPPER CO. UTAH

Office: 11 Broadway, New York. **Operating office:** McIntyre Bldg., Salt Lake City, Utah. Mine office: Lucin, Boxelder county, Utah.

Officers: Frederick Lewisohn, pres.; Walter Lewisohn, v. p.; E. C. Westervelt, treas.; other directors, S. W. Peck, E. H. Westlake, E. J. Macnamara, O. B. Van Sant and E. B. Corbet, mgr.

Inc. October 10, 1906, in Maine. **Cap.,** $2,200,000; shares $10 par.

Property: 108 claims, known as the Copper Mountain mine, at an elevation of 7,200' above sea level, in the Newfoundland district.

The Copper Mountain mine has a number of tunnels and shafts, the 1,500' main tunnel having a back of about 400'; a 500' tunnel planned to be driven 1,200', to enter the hoped-for sulphide zone, has not realized expectations. The

ıe has upwards of 2 miles of workings, and is estimated to have in sight and cked out, 75,306 tons of copper ore of 1.1% average tenor. For the last few rs the mine has been worked by lessees. Approximately 3,000 tons ore, assay- ½% copper and 45% excess iron were shipped in 1918.

NTA MARIA GOLD & COPPER MG. & REDUCTION CO. UTAH

Office: P. O. Box 517, Ogden, Utah. **Mine office:** Utah Hot Springs, xelder county, Utah. Don Maguire, pres. and mgr.

Inc. 1907, in Utah. **Cap.,** $500,000; shares $1 par.

Property: includes mill and smelter sites in the Sierra Madre district, ery rugged section of the Wasatch mountains. Land carries 7 fissure veins, ctically parallel, with a strong cross-fissure, and a contact deposit. The veins ge from 12 to 70′ in width, and ore contains chalcopyrite, associated with ite and occasional small amounts of galena, ore being mainly of concentrating de.

Development: by the 2,000′ Clara Belle tunnel, cutting 3 veins, and nned to cut 5 more, with backs of 200 to 1,800′. The mine has about a mile workings, showing ore developed regarded as sufficient to warrant a mill.

Equipment: includes a power house, air compressor, smithy and board- house. Idle several years.

NTAQUIN CHIEF MINING CO. UTAH

Reported merged with Santaquin King to form S. Cons. q. v. L. A. Martin, s.; C. E. Martin, sec.-treas., at last accounts.

Inc. April 29, 1911, in Utah. **Cap.,** $100,000; shares 10c par; assessable. treasury, April, 1916, 176,993 shares stock and $476 cash. Total debt reported $1,955. Formerly listed in Salt Lake City.

Property: 7 unpatented claims, in Santaquin mining district, 65 miles E. of Salt Lake City, several miles from a railroad, and adjoining its twin ıther, the Santaquin King on the south. Is said to show limestone cut by a ll-defined fissure vein carrying silver-lead ore containing zinc blende.

Development: consists chiefly of 250′ of tunnels with 225′ of winzes. e tunnel is said to show 3′ of lead-zinc ore. At last accounts a contract let extending the main tunnel 300′. Property is a prospect, but not in the "pre- red" class. Idle in 1918. See Santaquin Cons. Mines Co.

NTAQUIN CONS. MINES CO. UTAH

H. L. Pratt, sec., Boston Bldg., Salt Lake City. Presumably a consolidation the Santaquin Chief, and Santaquin King mining companies, whose properties in Juab county, Utah. An assessment of ¼c. was levied in May, 1919, to ıvide money for patenting the claims.

Inc. 1918, in Utah. **Cap.,** $1,000,000; 50c par; 1,585,978 issued. See titles ed above, for description of property.

NTAQUIN KING MINING CO. UTAH

Letters returned from former office Newhouse Bldg., Salt Lake City, Utah. B. Young, pres.; Ben C. Rich, sec.-treas., at last accounts. See Santaquin ns. Mines Co.

Inc. 1911, in Utah. **Cap.,** 1,000,000 shares; increased in 1912 to 2,000,000; cts. par. In treasury May, 1916, 242,065 shares stock and $344. Listed in lt Lake City.

Property: 9 unpatented claims, located in Santaquin mining district, 65 les S. E. of Salt Lake City, 7 miles from a railroad, adjoins the Santaquin ief on the north.

Ore: occurrence said to be similar to that of the Santaquin Chief.

Development: in May, 1916, consisted of 350′ of tunnels with total un- rground workings of 780′ estimated "1,500 tons of commercial ore in sight." e, 1918.

MINOLE COPPER CO. UTAH

Address: F. L. Wilson, Brooks Arcade Bldg., Salt Lake City, Utah.

Property: adjoining that of Western Utah Copper Co., near Gold ll, Deep Creek district, Tooele county. Ore deposits said to be numerous d varied in character; tungsten ore was opened to depth of 135′, and molybde-

nite was also developed. The 50-ton mill was enlarged in 1918. Operated intermittently.

SHEEP ROCK MINING & MILLING CO. UTAH

Office: W. A. Wilson, 406 Dooly Block, Salt Lake City, Utah.

Officers: W. A. Wilson, pres. and treas.; C. W. Morse, v. p.; C. Browne, sec., with W. B. and F. B. Eiseman and L. A. Jeffs, directors.

Inc. Sept. 4, 1893, in Utah. **Cap.,** $100,000; 10c par; 450,000 issued.

Property: 10 patented claims, 177 acres, in Newton district, Beaver county, said to show a fissure vein in rhyolite. Ore contains gold and silver with quartz and manganese gangue. Alunite is also found on the property.

Development by 300′ shaft and 1,000′ tunnel. **Equipment:** 25-h. p. electric hoist and compressor.

In development stage. No recent work done.

SILVER PEAK MINING CO. UTAH

Offices: J. R. Richards, mgr., Cedar City, Utah. R. B. Shepard, pres., 408 State St., Salt Lake City. T. F. Jennings, sec.-treas., Garfield, Utah.

Inc. July, 1915, in Utah. **Cap.,** $10,000; shares 1c par; 600,000 issued.

Property: the Blair mine, 6 claims, 120 acres, unpatented, near Pinto, in Pinto Iron mining district, Iron county, shows a contact deposit 8′-10′ wide carrying copper-lead ores with gold-silver values.

Development: 200′ shaft and 2 others. Dumps show 100 tons of $8 to $300 ore. Company doing assessment work only.

SILVER REEF CONS. MINES CO. UTAH

Inc. 1918, in Utah. Officers reported to be W. F. Snyder, Thos. Homer, R. L. Edwards, Alex. Colbath, and G. W. Snyder. An assessment of 1c a share was levied in April, 1919, for development.

Property: located in the old Silver Reef district near Toquerville in southern Utah.

SINCLAIR CONSOLIDATED SILVER, INC. UTAH

Address: C. S. Cresser & Co., fiscal agents, 83 Pine St., New York.

Inc. 1920, in Delaware. **Cap.,** $1,000,000; non-assessable. National Security & Transfer Co., New York, registrar and transfer agent. Shares offered at 20c. in March, 1920.

Officers: Salvatore Bonomolo, pres.; Col. Weatherly, v. p.; W. G. Stoddard, treas.; M. E. Schek, sec.; with Ronald Ridgway and B. J. Boemerwald, directors.

Property: 10 claims in the Pinto district of Iron county, Utah, at the mouth of Chloride canyon. The vein runs S. E.-N. W. and dips 85° S. Silver-lead ore from the outcrop shipped to the Silver Reef mill is said to have yielded $75 per ton. Examined by E. J. Eddards.

Company prospectus contains this literary gem: "The formation of Chloride Canyon belongs to the mociene and quartinary ages, with pelsoaic intermingle. The porphyry lies on the east and has been wholly undisturbed, while the rhyolite on the west seems to have had some heavy movements. The porphyry is magnifurious, granite porphyry."

Only surface work has been done so far; tunnels are to be driven.

SOFFE SILVER MINING CO. UTAH

Letters returned unclaimed in May, 1917. Probably dead.

Directors: J. C. Soffe, pres., W. R. Soffe, v. p.; J. W. McKinning, sec.-treas., with W. J. Soffe, mgr.; A. J. Shulson, at last accounts.

Inc. May 7, 1916, in Utah. **Cap.,** $10,000; shares 1c par.

Property: 12 claims, unpatented, in Erickson mining district, Tooele county, 30 miles west of Faust Station on Salt Lake Route. Claims show high grade silver-gold ore.

SOUTHERN PACIFIC GOLD & COPPER M. & M. CO. UTAH

Office: Walker Bank Bldg., Salt Lake City, Utah. Mine near Ogden, Weber county, Utah.

Officers: H. T. Strauss, pres. and gen. mgr.; W. C. Kellerman, sec.

Inc. July 20, 1903, in Utah. **Cap.,** $1,000,000; shares $1 par; assessable; issued 792,593. Shares are listed on the Salt Lake Stock Exchange.

Property: 12 claims, unpatented, 240 acres, 3 miles from a railway and
it 8 miles north of Ogden, in the Sierra Madre district, reported to carry
rebodies in contact deposits between quartzite and gneiss. The main vein of
it 50′ width, shows some oxidized ores, but mainly auriferous sulphides, in-
ing covellite, bornite and chalcopyrite, with some molybdenite, in a 6′ vein.
Development: by two incline shafts on the Wizard claim, and a main
el in 500′ in June, 1919, with about 1,000′ of workings, said to show ore
ying up to 15% copper, 37 oz. silver and $1.60 gold per ton. Company plans
ing the tunnel an additional 200′.

JTHERN SWANSEA MINING CO. **UTAH**

Mine office: Silver City, Juab county, Utah.

Officers: Geo. Jones, pres.; Geo. A. Shepard, v. p.; Richard B Shepard,
s.: Emma C. Shepard, sec., 408 S. State St., Salt Lake City. R. E. Jones, supt.
Inc. July 31, 1907, in Utah. **Cap.,** $10,000; shares 1c par; issued, $8,500;
ssable; last assessment, No. 8, one mill a share, levied November, 1919.
res are listed on the Salt Lake Stock Exchange.

Property: 12 claims, unpatented, south of the Swansea mine and sup-
d to carry an extension of the Swansea vein, showing porphyry, quartzite
lime, with a fissure vein of 12′ estimated average width, traceable 1 mile,
ying auriferous and argentiferous oxidized and sulphide ores of copper and
, developed by a 200′ shaft.

JTH STAR MINING CO. **UTAH**

Address: Chas. L. Alexander, pres.-mgr., Fergus Falls, Minn.

Officers: above with C. W. Cockroft, v. p.; L. C. Alexander, sec.-treas.,
L. Davie, directors.

Inc. July 15, 1915, in Utah. **Cap.,** $100,000; 25c par; issued 200,000.

Property: 7 unpatented claims, about 90 acres, in South Star district,
ver county, said to show copper, silver-lead ore in a contact deposit in lime-
e. Only surface development work has been done. Idle, except for assess-
t work.

JTH UTAH MINES & SMELTERS **UTAH**

Office: 165 Broadway, New York. **Mine office:** Newhouse, Beaver
ity, Utah.

Officers: Hugo Hoffstaedter, pres.; H. G. Robinson, sec.-treas., with
. Earle and Samuel Newhouse, directors; W. L. Heidenreich, gen. mgr.

Inc. Feb. 28, 1910, in Maine, as successor of Newhouse Mines & Smelt-
Cap., $5,000,000; shares $5 par; issued $4,300,000. **Debentures:** $919,000
%, 20-year income bonds, convertible into stock at par, remaining from a
00,000 bond issue put out by the Newhouse Mines & Smelters. Interest on
ds is said to be payable annually, but only if and when earned, and then out
et profits of the year's operations. The old company defaulted in interest
its bonds, and the property was bought for $500,000 under foreclosure, old
eholders being given stock, share for share, plus a payment of $1 per share
new stock. The reorganization brought about $600,000 into the treasury,
which all but about $200,000 was required to liquidate the floating debt of the
company. The annual report for year ended June 30, 1918, showed an
rating loss of $16,112, increasing a former deficit to $188,572, and gave current
ts as $83,060 and current liabilities as $7,650. No report has since been
ed.

Listed on Boston Stock Exchange and on New York Curb. Equitable Trust
New York, transfer agent; Windsor Trust Co., registrar. Annual meeting,
d Monday in October.

Property the Cactus mine, 13 claims, with miscellaneous holdings,
uding the Midvale placer, 168 acres, water rights at Wah Wah springs, mill,
n sites and grazing lands, total holdings of 7,882 acres.

; Cactus mine shows monzonite-porphyry country rock, near a limestone
tact, and ore is essentially an irregular mass of brecciated monzonite, carry-
copper impregnations, including some oxidized ores in the upper workings,
at depth mainly chalcopyrite, associated with pyrite. There is about 168,000
t of developed low-grade ore scattered about the mine that averages 1.30%

copper. Much of this ore will assay only 1.05%, while some of the small blocks consist of 1.75% ore. Such material can be profitably handled in the company's mill with flotation units, but as there seems to be no chance of finding additional orebodies it will not pay to reopen the mine and remodel the mill.

Development: by two working shafts of 600′ and 900′ depth, with levels at 100′ intervals, and connected on the 600′ level with a 6,300′ main haulage tunnel. The mine has upwards of 4 miles of workings.

Equipment: includes 200-h. p. steam plant, with a 150-h. p. hoist good for 600′, and a 40-drill air compressor, both operated electrically. There also is an auxiliary electric hoist on the second level.

The mine and mill are connected with the Salt Lake Route.

Mill: the 1,000-ton mill contains three 10x24″ crushers, 4 sets of rolls, Huntington mill, 22 Harz jigs, 58 tables, 8 slimers, 16 Callow tanks, settling tanks and classifiers.

The old tailings were treated by Utah Leasing Co. on a royalty basis. In 1914 a $175,000 flotation plant was built for this purpose. The tailings were exhausted in 1919, and the company plans treating their ore reserves in the mill. The untreated tailings contained less than 10 lb. copper per ton.

Production: from 1906 to mid-1914, amounted to 22,412,082 lb. copper; 146,148 oz. silver and 6,443 oz. gold. Mine will not be reopened, but the company is free from debt and has about $70,000 in the treasury, in addition to the mine and mill equipment at Newhouse. It is on the lookout for mining properties worthy of development.

STAMPEDE MINES CO. UTAH

Address: A. T. Burton, sec., Beaver City, Utah.

Officers: B. F. Caffey, pres.; Archie MacFarland, v. p.; A. T. Burton, sec.-treas., with Sam. Glaser and R. H. Strickland, directors.

Inc. 1916, in Utah. **Cap.**, $100,000; shares 10c par; assessable; 800,000 issued.

Property: 14 claims, 250 acres, in Lincoln or Jarloose district, Beaver county, Utah, said to show fissures in limestone, dipping 40° and pitching 70° E. Sulphide ore reported to contain 0.09 oz. gold, 25 oz. silver, 21.5% lead and 2.46% copper. Shoot occurs at junction of 2 fissures. Development: shaft down 235′ in November, 1918, cut ore whose persistence in depth is a favorable indication.

Equipment: 6-h. p. gasoline hoist, 140 cu. ft. compressor, etc. **Production:** 21 tons in 1916. A small mine with possibilities. Rail and smelting facilities nearby.

STOCKTON STANDARD MINING CO. UTAH

Address: W. N. Gundry, 523 Atlas Bldg., Salt Lake City, Utah.

Officers: C. F. Buehner, pres.; E. V. Anderson, v. p.; W. N. Gundry, sec.-treas., with F. Salzner, John Fetzer, A. P. Davidsen, and J. C. Fleming, directors.

Inc. May 16, 1916, in Utah. **Cap.**, $10,000; 1,000,000 shares 1c par; assessable, not more than 1c. per year; issued, 486,000 shares.

Property: 13 claims, 5 patented, 240 acres, in Rush Valley district, Tooele county, said to show a vein of silver-lead ore.

Development: by 200′ shaft, with 450′ drift in which a N.-S. fissure has been cut showing silver-lead ore for 60′. In 1918 $2,000 was spent by the company. In December, 1919, the shaft was being re-timbered, preliminary to resumption of development work.

SYNDICATE MINING CO. UTAH

Property and assets transferred, May, 1919, to Syndicate Mining and Milling Co., which see.

SYNDICATE MINING & MILLING CO. UTAH

In May, [illegible] property and assets of the Syndicate Mining Co. were transferred to the [illegible] stockholders received share for share in the deal.

Address: Utah co[illegible] Utah. B. H. Bullock, pres.

[illegible] 1,250,000 shares par 2c. Listed

t Lake City. Assessable; assessment No. 18, $2.50 per 1,000 shares levied May, 1919.

Property: 10 unpatented claims, near Santaquin, said to show a 20′ vein taining ore with gold, silver, and copper. The vein fissures are in limestone orebodies are expected at vein intersections. Developed by 1,600′ tunnel. perty is a prospect, in which ore in commercial amount has not yet been nd, though surface croppings are promising.

LISMAN CONSOLIDATED MINING CO. UTAH

Address: P. O. Box 1065, Salt Lake City. **Mine office:** W. W. Crone, t., Milford, Utah.

Officers: H. S. Joseph, pres.; S. S. Pond, v. p.; H. W. Brock, sec.; 3. McCornick, treas., with L. B. Merriman and M. J. Morris, directors.

Inc. July 7, 1917, in Utah. **Cap.,** $100,000; shares 10c par; assessable; 000 issued.

Property: 20 claims; also Cedar Talisman and Empire mines under e for 2 years, total 450 acres, in Star district, Beaver county, Utah.

Geology: fissures and contact deposits in limestone. Orebody is from) 5′ wide and ore said to assay 10% lead, 15 oz. silver, and 10% copper, with ıe zinc and gold.

Development: by incline shafts 200 and 1,000′ deep. Workings total 0′. Reserves consist of 1,000 tons of high-grade and 40,000 tons of low-grade the latter in the leased mines. No recent information, probably idle.

COMA CONS. MINING CO. UTAH

Address: 1407 Walker Bank Bldg., Salt Lake City. C. S. Woodward, ıager.

Cap., $100,000 common stock, 10c par; and $40,000 preferred stock, $1 Listed on Salt Lake Exchange.

Property: 8 claims in Lucin mining district, Boxelder county. Ores ry gold, silver, lead, copper and zinc. Mine is reported to have yielded 00,000 since the Seventies. Reported, November, 1919, that work would be ted shortly.

OELE GOLD HILL M. & M. CO. UTAH

Address: Peter Clegg, Tooele, Utah.

Officers: Peter Clegg, pres.; C. W. Bailey, v. p.; T. S. Marks, sec.-s., with W. Carder and J. Donovan, directors.

Inc. April 7, 1917, in Utah. **Cap.,** $50,000; shares 10c par; 222,500 issued.

Property: 6 claims, patented, 110 acres, in Clifton district (Deep Creek), ele county, said to have a contact deposit in granite and limestone. Ore ries gold, silver, copper and lead.

Prospecting in August, 1917, and no news received about company since t time.

EPHINE MINING CO. UTAH

A. P. Hanson and Robt. E. Mark, owners of majority of outstanding stock, ed a meeting of stockholders October 6, 1919, at 902 Kearns Bldg., Salt Lake y, to elect officers to wind up affairs of company. They claim that no annual eting has been held, nor officers elected since company was incorporated in 9. The charter and franchise of company were revoked by State in April, 0, for failure to pay annual license tax for 1909.

EVIDA GOLD MINING CO. UTAH

A. B. Lewis, pres.; W. S. McCornick, treas., 205 Center St., Salt Lake City; C. Ralston, Jr., sec.-mgr.

Inc. May 14, 1917, in Delaware. **Cap.,** $7,500,000; $1 par; non-assessable; 0,000 shares and $12,500 cash in treasury, October, 1918. Debts amounted 89,000.

Company controlled several miles of alluvial and gravel ground along Carson er in Nevada, from which it was proposed to recover the amalgam lost from old Comstock mills; also reported to have mining properties in Beaver nty, Utah, and in Idaho. Details of company, organization and operations obtainable, save in January, 1919, company brought suit against two former ectors and others, charging them with having induced owners of leases, under

which company operated, to cancel and transfer them to Comstock Lode Recovery Corp.

UNION CHIEF MINING CO. UTAH

Office: Newhouse Bldg., Salt Lake City, Utah.

Officers: G. L. Bemis, pres.-mgr., Santaquin, Utah; Geo. Baglin, sec.; A. W. Larson, supt.

Inc. 1903, in Utah. **Cap.,** 1,000,000 shares; par 10c; assessable; assessment No. 7, 1c. a share, levied in January, 1919. Listed on Salt Lake Exchange. Share sold ¾-4c. in 1918; and up to 8c. in 1919.

Annual report for 1918 shows total receipts of $14,273, mainly from assessment No. 6. Disbursements were $14,270, leaving cash on hand, $2.92.

Property: 18 claims, 6 patented, 370 acres, in Santaquin mining district, shows lead-silver ore in vein reported to be about 6′ wide.

Development: over 8,000′ of tunnels and drifts. Reported to have found high-grade ore at 550′ depth in 1916, but as only picked samples seem to have been assayed, no averages can be given. Equipped with electric power line and compressor.

In 1918, 806′ of development work was done at a cost of $9.27 per foot; no orebody was found. Company plans sinking.

UNITED PROMONTORY MINING CO. UTAH

Officers: B. D. Siegfus, pres., 560 12 E. St., Salt Lake City; O. P. Peterson, v. p.; D. H. Wenger, sec.-treas., with L. W. Phillips, T. W. James, and W. C. Smaltz, directors.

Inc. in Feb., 1915, in Utah. **Cap.,** $7,000; 1c par; 100,000 shares in treasury, June, 1919. Company's name was formerly Promontory Mining Co.

Property: 14 unpatented claims, in Boxelder county, Utah, 7 miles N. of Promontory, on the S. P. R. R., shows vein 20′ thick in limestone-porphyry contact. Developed by 90′ shaft, and two tunnels, 200′ and 300′ long. Upper level showed some high-grade copper-silver ore. Company has been developing the mine for about 8 years, spending $3,000 in 1918.

Equipment: includes a compressor.

UNITED STATES METALS REDUCTION CO. UTAH

A close corporation, controlled by a Pittsburg syndicate. A 15-ton plant 15 miles from Castleton, and 50 miles from Cisco, was built in 1918, to treat radium-bearing ores. The company owns 37 claims. Details not available.

UTAH BALTIMORE CONSOLIDATED CO. UTAH

Mail returned, 1918, from former address. J. P. Evans, pres., 408 S. 13 E. St., Salt Lake City, Utah; J. M. Williams, v. p.; C. A. Doe, sec.-treas.; J. T. White, W. D. Williams, directors.

Inc. in 1916. **Cap.,** $1,000,000; shares 5c par; no indebtedness.

Property: 10 claims, 5 in Beaver county, known as the Mollie Pitcher group, 5 in the Rocky district, known as the Bill Williams group. Mollie Pitcher group has a 100′ shaft in vein of copper ore, said to be 60′ wide and of shipping grade. Loading station on R. R. about a mile from mine. Probably idle.

UTAH & EASTERN COPPER CO. UTAH

Idle. **Office:** 127 Church St., New Haven, Conn. **Operating office:** 508 McCornick Bldg., Salt Lake City, Utah. **Mine office:** Dixie, Washington county, Utah. **Works office:** Shem, Washington county, Utah.

Officers: Louis E. Stoddard, pres.; T. W. Farnam, sec.-treas.

Inc. 1901, in West Virginia. **Cap.,** $1,500,000, increased later to $3,500,000; shares $5 par, in $2,000,000 preferred and $1,500,000 common stock.

Property: 11 claims, patented, 220 acres, and a 40-acre smelter site, including the old Dixie mine, in the Tutsagubet or Cave Springs district, near Green river.

Geology: 5 replacement deposits in limestone, 1 of 40′ estimated average width, [illegible] cuprite, azurite, and massive malachite ores, said to give average as[illegible]% copper.

Develo[illegible] a 775′ blin[illegible]nk from the breast of a 25[illegible] T[illegible]d. 1905, a[illegible] ecessary to run a new tunnel [illegible] Old wor[illegible] show about 100,000 tons of ore

Equipment: includes a small gasoline plant. The company has 2 smel-. 1 worthless; the new smelter has a 100-ton water-jacket blast furnace, with er power, secured from the Santa Clara river, 2 miles distant, and a small iliary steam plant. The smelter is at Shem, about 50 miles from Acoma, on Rio Grande Western railroad, the nearest shipping point, and transportation 14 miles of the distance is by traction engine.

Production: 1,448,597 lb. copper in 1904; 400,166 in 1905, and 391,779 in 7. Property considered promising but is handicapped by lack of rail trans-tation. Worked by lessees, who have shipped several cars of 30% ore. Letters returned unanswered, and no recent report received.

AH LEAD & COPPER CO. **UTAH**

Address: care H. M. Stonemetz, v. p., 53 State St., Boston, Mass. ıe office: Bingham Canyon, Utah.

Officers: Carl Brandt, pres.; Harry M. Stonemetz, v. p.; J. P. McDon-;h, sec.; J. H. Turnbull, treas., with Geo. E. Davis, directors.

Inc. Dec. 24, 1912, in Maine, as the successor of the Bingham Copper **Cap.,** $500,000; shares $1 par; outstanding, 262,000 shares. Debentures 0,000, 6% convertible; outstanding, $37,750. Federal Trust Co., Boston, ısfer agent; Paul Revere Trust Co., registrar.

Property: 13 claims, patented, about 102 acres, on the eastern slope of r Fork Canyon. Company also owns a one-half interest in the Diamond tension, and one-half in the Diamond claims adjoining.

The property shows 3 fissure veins, several bedded deposits of silver-lead and a fissure vein of copper ore of less promise. A big outcrop near the end line is said to have yielded considerable high-grade gold and silver ore h lead carbonates, to former owner.

Development: by 2 tunnels, longest 1,200', and 2 shafts on the Venice im. There are about 3,000' of workings, showing ore below commercial tenor ıerally, but with occasional streaks of ore assaying up to 70% lead and 15 30 oz. silver.

Equipment: includes a small air compressor. Property has been idle some time.

AH LEASING CO. **UTAH**

Office: 804 Newhouse Bldg., Salt Lake City, Utah. **Mine office:** H. H. ams, supt., Newhouse, Utah.

Officers: V. P. Strange, pres.; J. C. Dick, v. p.; D. R. Pingree, sec.-as., with Herbert Salinger and F. W. Royer, directors. R. P. McDonald, ditor.

Inc. in Utah. **Cap.,** $30,000; shares 10c par; assessable; 250,000 issued.

Dividends: $25,000 in 1916; $47,500 in 1917; $22,500 in 1918.

Property: a lease from South Utah Mines and Smelters, on about 1,000,-) tons of copper-gold-silver tailing at the old Cactus mine, Newhouse, Utah.

Equipment: one 20-ton steam shovel, 750-ton plant including two 8'x48", d one 6'x48", Hardinge mills, 2 Dorr classifiers and 2 Minerals Separation tation units.

Electric power is obtained from the Beaver River Power Co., at 44,000 volts, pped down to 2,200 and 4,400 volts.

Production: feed to the plant assays about .52% copper, which is claimed be the lowest head assay in the country; concentrate assays 21% copper, 7 oz. gold, 2 oz. silver. In 1915, 15,530 tons ore milled produced 86,941 lb. of pper; in 1916, 160,420 gave 1,286,011; in 1917, 207,270 gave 1,575,347; and in 18 205,000 tons ore gave 1,489,851 lb. copper.

Reported in May, 1919, that tailings dump was exhausted, 700,000 tons ving been treated during past 3½ years.

TAH MINING CO. **UTAH**

Mine address: Fish Springs, Juab county, Utah; A. F. Rynder, sec., 77 St., Salt Lake City.

Property: old Utah mine, 25 miles S. of Gold Hill, a large producer of h-grade silver ores in former days. The old dumps are estimated to contain

200,000 tons of ore. Present company has built a 200-ton mill to treat t
Details of operation not available.

UTAH MINING, MILLING & TRANSPORTATION CO.

Address: Moscow, via Milford, Beaver county, Utah. Chas. T.
ard, pres. and gen. mgr., at last accounts.

Property: includes the Hub and Lady Bryan mines, latter bough
of Mathew Cullen et al., S. of the Burning Moscow, 6 miles from a rail
the Star district.

Development: by a 400′ two-compartment main shaft, developing
variously reported as 2 to 30′ in width, carrying silver-lead carbonates,
bedded deposit in limestone showing high-grade cuprite, from which
shipments of ore have been made. Ore said to carry $6-$7 in silver a
with heavy percentage of iron. No recent returns. Probably idle.

UTAH NATIONAL MINES CO.

Address: G. W. Field & Co., 50 Broad St., New York.

Officers: F. E. McMillin, pres.; M. Butler, v. p.; T. L. Lloyd,
treas., with D. C. Pettibone, George Henderson and J. T. Lloyd, directors.

Inc. Feb., 1917, in Delaware. **Cap.**, $1,000,000; shares $1 par;
assessable. Listed on Boston Curb.

Property: the Silver King mine, in Newfoundland district, Box
county; and the Lady Bryan in the Star district, Beaver county, Utah.

Development: 3,000′ of work said to have been done in the Silver
opening silver-gold-copper ore assaying over $60 per ton. In the Lady
$16 ore is exposed to depth of 510′. Estimated reserves in May, 1917,
75,000 tons. No recent information, probably idle.

UTAH-OREGON MINES CO.

Address: Price, Utah; John C. Forrester, pres. Levied an assess
of 1c. a share, and expected to start operating its milling plant to treat a
tonnage of free-milling gold ore late in 1919.

UTAH ORE SAMPLING CO.

Office: 820 Newhouse Bldg., Salt Lake City, Utah.

Officers: Jesse Knight, pres.; E. P. Ellison, v. p.; W. L. Mangum,
treas., with J. W. Knight and R. E. Allen, directors. E. G. Jensen, gen.
Frank Burgner, gen. supt. at Murray.

Inc. Dec., 1909, in Utah. **Cap.**, $300,000; par $1; 215,000 issued.

Company owns and operates two ore-sampling mills at Murray and one
Silver City, with combined daily capacity of 1,000 tons of ore.

UTAH PLACER MINING CO.

VOLUNTEER MINING CO. UTAH

Letters returned from last address. Milford, Beaver county, Utah.

Officers: W. C. Albertson, pres. and gen. mgr.; W H. Havenor, v. p.; S. G. Cole, sec.; H. E. Havenor, treas., asst. sec. and engr., with Geo. Havenor, directors, at last account.

Inc. in Utah. **Cap.**, $50,000; shares 10c par; non-assessable; issued $25,550. Annual meeting, second Monday in May.

Property: 6 claims, unpatented, 600 acres, in the North Star district seven miles from the Salt Lake Route. Claims show contact deposits between limestone and intrusive porphyry. The mine has only two 12′ pits and a 70′ tunnel. Company reported in 1916-17, operating a lease on the north end of the Lakeview Mining Co.'s property. No later information.

WASATCH BONANZA MINING CO. UTAH

Officers: Burdell Davis, pres., Provo, Utah; Wm. Davis, v. p.; Brigham Johnson, sec.-treas.; J. M. Buckner, Geo. A. Storrs, directors.

Inc. May, 1916, in Utah. **Cap.**, $10,000; 1c par.

Property: 4 claims, the Mayflower group in Decker Canyon, near Charleston, Wasatch county, Utah. No recent information.

WEDGE GOLD MINING & MILLING CO., THE UTAH

Office: 1102 W. 7th South St., Salt Lake City, Utah. Mine near Marysvale.

Officers: E. P. Mowers, pres.-gen. mgr.; N. W. Sonnedecker, v. p.; W. L. Grovenor, sec.-treas., with E. J. Schenck and K. D. Schenck, directors.

Cap., $300.000; shares $1 par; all outstanding.

Property: near head of Bullion canyon, 10 miles S. W. of Marysvale, Piute county. Mine contains a gold-bearing quartz fissure vein in latite; dip 15° S. E., strike N. E.-S. W. Orebody varies from ½″ to 20″ in width. Mine has been developed and worked chiefly under lease. Workings include a shaft 400′ adit and 200′ of drifts. Shipments are of high-grade ore only.

WESTERN PACIFIC COPPER CO. UTAH

Office: care Wilson Bros., Brooks Arcade, Salt Lake City, Utah. **Mine office:** Callao, Juab county, Utah.

Officers: E. J. Yard, pres.; Jackson H. McChrystal, v. p. and gen. mgr.; Elroy M. Clark, sec.-treas.

Property: 320 acres, adjoin the Western Utah Copper Co., in the Willow Springs division of Deep Creek district, Tooele county, just over the Juab county line.

Development: by a shaft and 2 tunnels, 400′ and 1,200′ long, developing ore averaging about 13% copper, 23% lead and 22% iron, with small silver and gold content. In 1914 a rich strike was reported in a south drift run from the bottom of the 250′ shaft. The vein is said to be 15′ wide and a 100-ton sample ran 24.4% copper. Occasional small shipments of ore have been made.

Equipment: includes steam plant and air compressor. Reported that work will soon be resumed.

WESTERN PACIFIC MINES CO. UTAH

Property: 12 claims at Crater Island, 25 miles S. of Lucin, said to show a 5′ copper-gold-silver vein. Developed by several shafts, deepest 80′. Plans continuing development work. Examined, 1919, by A. G. Burritt, Salt Lake City.

WESTERN UTAH COPPER CO. UTAH

Office: 1109 Boston Bldg., Salt Lake City. **Mine office:** Gold Hill, Tooele county, Utah.

Officers: F. G. [illegible]ley, pres., Pawtucket, R. I.; Duncan MacVichie, v. p.; G. R. Rawsl[illegible] C. G. Spittal, treas., also directors. Owen F. Brim[illegible] manager.

[illegible] 1906, [illegible] Cap., $2,500,000, $5 par; 499,500 issued.

:s, comprising the Gold Hill, Yellow Hammer, Calaveras, Tuolumne, and re Springs groups; also the Redding Springs ranch, valuable for water. The properties are situated in the Clifton district, Tooele county, reached he Western Pacific and Deep Creek railroads, about 167 miles S. W. of Salt e City. Examined in 1917 by F. R. Weekes.

Geology: the claims cover a granite-limestone contact, with replacement osits in limestone. See 'Economic Geology' for June, 1918.

Development: 700′ Gold Hill shaft recently sunk from 300′ level. Ore 300′ level assays about 5½ oz. silver, 13% lead, and 2% copper. On the 700′ l the vein is 62′ wide.

The Calaveras and Yellow Hammer groups commenced shipping about , 1919. The product from these groups is gold-copper-silver ore, with gold lominating.

Early in 1919, a 50-ton experimental mill, erected at Salt Springs, 27 miles n the mine at Gold Hill, treated copper-tungsten ore from the Yellow Ham- mine until in June, it was moved to the mine in order to treat second class Smelter shipments averaged about 100 tons ore daily during 1919.

Shipments of silver-lead ore from glory hole operations, totaled 3,750 tons, uary, 1920.

The Deep Creek railroad from Wendover, Utah, to Gold Hill, Utah, was pleted March, 1917.

STERN UTAH EXTENSION COPPER CO. UTAH

Address: A. E. Custer, mgr., Walker Bank Bldg., Salt Lake City, Utah, Gold Hill, Utah.

Officers: P. S. Chambers, pres.; D. A. Rees and A. R. Custer, v. p.'s; F. Duerr, sec.-treas., with John Pingree, directors. C. L. Glass & Co., Pittsburg, fiscal agents. B. T. Haywood, supt.

Inc. in Delaware. **Cap.**, $2,500,000; $1 par. Stock transferred at com- y's office.

Financial statement for year ending June 24, 1918, showed total assets of 52,441, of which property and development comprised $2,518,615.

Property: 15 claims, about 250 acres, at Gold Hill, Utah, adjoining the stern Utah Copper mine, in the Clifton district, Tooele county. Examined in by F. R. Weekes. Mine is said to contain a well defined fissure in lime- e and granite, over 5,000′ long.

Development: by 2,500′ tunnel work and 300′ Mogul shaft, with good in drift on vein on 300′ level. Smelter shipments in June, 1919, said to y about 4¾% copper and 3 to 6 oz. silver; 250 tons shipped in 1918 from elopment work.

Company plans developing an extension of its neighbor's orebody, and will shaft 1,000′ deep in near future.

STERN ZINC CO. UTAH

Probably dead. Was organized to operate a lease on the Lakeview Mining s property on Promontory Point, Utah, in 1916.

ST JORDAN SMELTER UTAH

Owned by U. S. Smelting Co., at West Jordan, Utah.

ST MERCUR MINES CO. UTAH

Offices: 11 Broadway, New York, and 827 McIntyre Bldg., Salt Lake . **Mine office:** Ophir, Utah.

Officers: E. J. Macnamara, pres.; Edw. H. Eckhoff, sec.

Company was doing a small amount of development work at last account in ine on the western dip of the Camp Floyd district. Reported in February, 9, that suit had been brought against the company by Walter and Fred. ricks, for $30,600 due on promissory notes.

Equipment: includes a 150-ton mill.

ITE STAR MINING CO. UTAH

Mine office: Eureka, Juab county, Utah.

Officers: C. H. Thompson; pres.; P. A. Sorenson, v. p.; Emma C. Shep ard, sec.; Bernard Rich, treas., and Harry Rich, directors.

Inc. 1898, in Utah. **Cap.,** $30,000; shares 10c par; assessable; with sev eral assessments levied.

Property: 4 claims, patented, 80 acres, 3 miles from Eureka, the nearest rail point. The mine has a 100′ shaft and 100′ tunnel.

Company has apparently acquired a new property in the North Star distri Beaver county, from which in August, 1917, two cars of $52 ore were shipped a a compressor, hoist and other electrically driven equipment were installed.

The White Star mine in the Silver Island district, Western Tooele Co. near the Kentucky-Douglas, Western Utah and Gethin Leroy mines, all acti in 1917, though no later news has been received.

WIG MOUNTAIN MINING & MILLING CO. UTA

Officers: George A. Storrs, pres., American Fork, Utah; George Brown, v. p.; J. W. Storrs, sec.-treas., John Curzon, and Jos. Thurgood, di rectors; F. Jardine, supt.

Inc. May, 1916. **Cap.,** $1,000,000; shares 1c par.

Property: the Jumbo group, 7 claims, on Wig mountain. Is a lead-silv prospect which was being developed in August, 1917. No recent return received.

WILSON CONSOLIDATED MINING CO. UTA

Offices: 208 Brooks Arcade Bldg., Salt Lake City, Utah, and Wendover Tooele county, Utah. Clyde H. Wilson, pres.; Frank L. Wilson, sec.-trea

Property: located in the Clifton section of Deep Creek district, Toel county, 45 miles from Wendover, was the only mine in the U. S. whi shipped bismuth ore in 1914. Reported to have shipped one 25-ton l of 8% bismuth ore carrying gold and silver. Ore was hand jigged t bring shipment up to 20%.

Reported in 1919, that company had resumed operations.

WOLF MOUNTAIN COPPER CO. UTA

Office: C. A. Harker, 705 Eccles Bldg., Ogden, Utah.

Officers: C. A. Harker, pres.-treas.; P. M. Parry, v. p.; with C. R. Col R. A. Eliason, and A. A. Allen, directors. S. A. Holmes, sec.

Inc. Jan. 31, 1914, in Utah. **Cap.,** $100,000; 10 par; assessable; 502.5 shares issued. Assessment No. 9, ½c a share, called, August, 1919

Property: 640 acres, in Paradise district, 19 miles S. of Hyrum, Cach county, said to show a N.-S. fissure vein in quartzite, 45′ wide, dipping 3 and carrying ore assaying 4½% copper, 1 oz. silver, and .01 oz. gold p ton. Examined by W. F. Mitchell, Don Maguire, J. T. Bacon and J. C Lind.

Development: by four tunnels totaling 930′ of work; 33,000 tons of o reported blocked out. Company making preparations to build a 50-ton m so that the ore can be made profitable.

WOODMAN MINING CO. UTA

Address: Gold Hill, Tooele county, Utah.

E. F. Woodman, pres.; T. J. Midgley, sec.

Property: the Frankie group, 2½ miles S. of Gold Hill, said to sho low-grade copper ore.

Ore: occurs in a granite-limestone contact, and the ore will, it is sa average 2% copper, $1.20 gold, 2 oz. silver.

Development: by extensive tunnel work and a shaft. In 1918, produc tion was about 2,000 tons, and net production about $30,000.

Company also owns the Cane Springs mine S. W. of Gold Hill, a the Alverado group E. of the town. In both groups a gold-bearing silic vein occurs in the granite-limestone contact. The two mines have, it said, produced $270,000. Seven men are employed at the Cane Spring mine.

ALTA-COTTONWOOD AND AMERICAN FORK DISTRICTS

Including Big Cottonwood and Little Cottonwood, whose combined output was 18,250 tons in 1919, compared with 35,269 tons in 1918.

ME MINING CO. **UTAH**

Officers: Edw. Southwick, pres.; Jacob Evans, v. p.; H. Gardner, sec.-as.; with John F. Bradshaw, Wm. E. Trinnamen, and Jas. Trinnamen, ectors.

roperty: 28 claims, 18 patented, known as the Argenta group, located e Big Cottonwood district, 7 miles southwest of Park City. Claims i the Maxfield mine on the south and the Cardiff on the north. At last nts the company planned to start work on a long drainage and exion tunnel that had already been driven 1,300'.

A DIVIDE GOLD MINING CO. **UTAH**

fficers: A. F. Elfgren, pres.; L. H. Hardy, treas.; A. Y. Hardy, sec.; . W. Knudsen, and E. M. Tyson, directors.

c. April 22, 1916, in Utah. **Cap.**, $100,000; shares 10c par; 600,000 in treasury.

operty: 34 unpatented claims, in Big and Little Cottonwood dis- near Alta, shows gold values in a vein up to 30' wide in a shale te contact.

velopment: commenced in Spring of 1916, and in 1918 the tunnel was ag and $5 to $6 ore had been found. Idle in 1919, but work to be d.

GERMANIA MINES CO. **UTAH**

ly described in Vol. XIII. Merged 1919 into Albion Cons. Mng. Co., tee.

MICHIGAN MINES CO. **UTAH**

ce: 161 So. Main St., Salt Lake City, Utah. **Mine office:** Alta, Utah.

cers: same as South Hecla Mining Co.

in Utah. **Cap.**, $100,000; shares 10c par; assessable; outstanding, First assessment of 1c per share levied October, 1917. Listed on ke Exchange. Share prices 2½c to 8c in 1918; ½ to 9½c in 1919. ncial statement to January 1, 1917, showed total resources, $101,000, cluded: mines and plant, $16,250; treasury stock, $74,287; and cash, ccounts payable, $1,000.

perty: 17 acres, in Little Cottonwood district, said to show silver- per-gold ore. Development work is carried on through the Quincy evel of the South Hecla mine and some 5% ore is said to have pped. No later reports received.

MINING & DEVELOPMENT CO. **UTAH**

ess: 102 Mercantile Annex, Salt Lake City, Utah.

ers: Chas. A. Walker, pres.-mgr.; J. R. Walker, v. p.; H. M. lain, sec.-treas., with Walter C. Lewis and John M. Moore, direc-

June 29, 1906, in Utah. **Cap.**, $600,000; shares $1 par; 326,500 held ry. Annual meeting 1st Monday in January. Columbia Trust Lake City, Utah, transfer agent.

erty: about 160 acres in the Alta Cottonwood district, at the head Cottonwood canyon, includes the townsite at Alta between the mines and the South Hecla. The management expects to continue started in 1907, for 3,600' to explore the ground under the town- depth of 500'. Several contacts and well-defined fissures are said he property. Presumably idle since 1917.

RINCE MINING CO. **UTAH**

Johnson, pres.; C. W. Frees, sec.-treas., 739 E. 21st St., South, City, Utah.

1,000,000 shares, par 25c; 30,000 shares in treasury.

erty: 2 claims, patented, at Alta, Salt Lake county, between the Utah and the Prince of Wales Mining Co.'s property. Develop- el 1,065' at 500' depth. No recent information.

ALTA SUPERIOR M. & M. CO. UTAH

Office: Provo, Juab county, Utah.

Officers: A. E. Ahlander, pres.; N. A. Nelson, sec.

Inc. March, 1909, in Utah. **Cap.,** $50,000; shares 5c par; assessable. Previously known as Mineral Flat Extension M. & M. Co.

Property: 2 miles S. of Alta, Little Cottonwood district, Utah, showed 3′ vein of copper ore, also silver-lead ore.

Development: by tunnel and shaft with drifts on vein.

Reported, June, 1919, to show good ore in the 530′ tunnel.

ALTA TIGER MNG. CO. UTAH

Address: 420 Boston Bldg., Salt Lake City. **Mine office:** Alta, Utah. J. E. Phillips, pres.; Daniel Phillips, v. p.; A. T. Sanford, sec.-treas.

Inc. 1915. **Cap.,** $7,000; divided into 700,000 shares; assessable; with 20,000 remaining in the treasury. Assessments called 1918 and 1919. Listed on Salt Lake City Exchange. Shares sold ¼ to 1c in 1919.

Property: the Tiger patented claim, 6 acres and an interest in the Highland Chief claim, in the Alta-Cottonwood district, north of the town of Alta. The management intended to work the Tiger claim ground through the Highland Chief claim tunnel. The tunnel was cleaned out in the summer of 1915 when it was found that the Tiger ground had been mined to a considerable extent in early days. The work since has been devoted to the unexplored ground. One shipment made in 1916, claimed to have assayed 18% lead and 16.8 oz. silver per ton. Reported, June, 1919, that work had been resumed on the property.

One of the many Utah mining companies that does not reply to requests for information.

ALTA TUNNEL & TRANSPORTATION CO. UTAH

Office: 618 Newhouse Bldg., Salt Lake City, Utah.

Officers: John C. D. Clark, pres.; M. P. Braffet, v. p.; John Cain, sec.; F. V. Bodfish, gen. mgr., with V. E. Lollin and Geo. N. Wagner, directors.

Inc. Sept., 1911, in Utah. **Cap.,** $1,000,000; shares $1 par; 800,000 issued; assessable; assessment No. 9, 1c per share, called June, 1919. Shares varied from 5 to 12½c in 1918; 5 to 20c in 1919.

Property: 250 acres, includes the Lucky Dutchman group of 16 claims and the old Alta tunnel ground. Ore occurs in fissure veins in limestone with stringers of ore said to assay 9.7% copper, 21% lead and 13½ oz. silver per ton.

Development: by drifts and raises which have opened up several ore veins. Company is driving a mile-long drainage and transportation tunnel (3,550′ long in September, 1918) to open its own and adjoining properties with portal 3,500′ from Silver Fork on the Big Cottonwood, and 8,500′ above sea level. Tunnel will be 600′ lower than any mine workings of the district and will cut all the great veins of the section.

Equipment: 50-h. p. motor and compressor, drills, a 10′ fan for ventilating purposes, a 2-mile power line, boarding house and other buildings.

No reports issued by company.

ALTA-UTAH MINES CO. UTAH

Address: 161 So. Main St., Salt Lake City, Utah.

Officers: G. H. Watson, pres. and gen. mgr., Alta, Utah; H. Bamberger, v. p.; J. W. Harrington, sec.-treas.

Company was organized late in 1917.

Property: an old mine in the Cottonwood district, near the South Hecla. Developed by tunnels, one in 400′, and another 200′. The latter showed high-grade ore. No. 3 tunnel yielded a carload of 3% copper and 15 oz. silver ore.

AMERICAN CONSOLIDATED COPPER CO. UTAH

Office: Judge Bldg., Salt Lake City, Utah.

Officers: John C. Barnard, pres.; L. L. Smith, v. p. and mgr.; D. Dart, sec.-treas.; with J. W. McKinney and L. R. Wardrop, directors; Malmborg, supt.

Inc. 1907, in Utah. **Cap.**, $600,000; $1 par; changed to 1,000,000 shares; ar, October, 1917. Stock listed on Salt Lake Stock Exchange. Prices, in 1918; 3½-8c in 1919.
Property: 19 claims, 1 patented, in Big Cottonwood district, adjoins the iff and Howell on the west.
Development: several tunnels, longest 2,200′, driven to cut the Silver & Garfield fissures, showing heavy mineralization. Samples said to 48% zinc, with lead, gold and silver values.
Equipment: includes compressor, drills and mine buildings. Opera- resumed December, 1914, after an idleness of several years. Late in reported, following 2½′ of vein matter. Closed down December, but reopened May, 1919.

ERICAN CONS. MINES CO. UTAH
Address: 3 Stock & Mining Exchange Bldg., Salt Lake City, Utah.
Officers: Geo. E. Hemphill, pres.-mgr.; J. D. Blue, Jr., v. p.; J. W. rs, sec.; C. M. Beck, treas.; with F. Hardinge, directors.
Inc. 1918. **Cap.**, $1,500,000; $1 par; outstanding, 1,400,000 shares; assess- Assessment No. 3 called in October, 1919. Listed on Boston Curb.
Property: 22 claims, 400 acres in American Fork mining district, com- ng the silver-lead properties of the Earl & Eagle Mng. Co., and Bog Co. The veins carry silver-copper ore, as well as silver-lead.
Development: mainly by tunnel with total workings of 4,000′. The Earl agle tunnel was over 2,000′ long at last accounts. The Bog tunnel 600′ has yielded some shipping ore in former years. Property is still a lopment proposition.

ERICAN FORK EXPLORATION CO. UTAH
A merger of the Wild Dutchman M. & M. Co., and the Fissures Expl.

Address: American Fork, Utah.
Officers: W. E. L. Dillaway, mng. dir. and treas.; J. E. Rothwell, W. B. ner, J. B. Hubbard and F. J. Justin, directors; Peter Miller, supt.
Inc. in Utah. **Cap.**, $300,000; $1 par. 150,000 issued. Listed on Boston
Property: company owns a lease on the Dutchman mine; also a lease he Pacific mine of the Pacific Gold M. & M. Co.
Development: by upper and lower tunnel following the Pacific fissure cross fissures. Estimated value of ore reserves is $1,000,000. Ore is in lead and silver; while copper ore carrying gold is being developed.
Equipment: in Oct., 1917, a new 200-ton mill, costing $100,000, started ing dump ore. Houses were erected for staff and employees, also ssary shops, 300-ton concentrate bins, assay-office, etc.
Production: during the season of 1918, $89,881 was realized from crude and concentrate shipped.

ERICAN MINING CO. UTAH
Office: 400 Ness Bldg., Salt Lake City, Utah.
Officers: A. A. Crome, 1st v. p. and gen. mgr.; Wm. Crome, sec.-treas.
Inc. 1896, in Utah. **Cap.**, $50,000; shares 10c par; assessable; all issued; sessments levied to end of 1918. Annual meeting 3rd Monday in May.
Property: 10 patented claims, on Scott Hill, in Big Cottonwood dis- 5 miles from a railroad. Ore occurs as sulphides in lime. Orebody om 2″ to 2′ wide and average assays run from 5-18% copper, 10 oz. r and $3.50 gold.
Development: about 2,000′ of shafts and tunnels.
Property reported under lease and bond, in 1918, for $100,000.

ELOPE & PRINCE OF WALES MINING CO. UTAH
Not incorporated. Controlled by Walker Bros., of Salt Lake City.
$1,250,000; shares $1 par; 400,000 shares held in treasury.
Property: 9 claims, patented, in the Alta-Cottonwood district, cover a of the Prince of Wales fissure, worked years ago to a depth of 900′,

said to have produced $1,000,000 from one shoot alone, being the "bone ntention" in a celebrated lawsuit in the seventies.
Development: 930′ incline shaft and 600′ "Annie'" tunnel. In 1915 es continued the tunnel several hundred feet, cutting the vein 140′ w bottom of shaft. Vein where cut is said to have shown good ore aining silver chloride and galena. Company planned to continue the : of the lessees. No recent report.

ONAUT MINING & SMELTING CO. UTAH
Address: 310 Kearns Bldg., Salt Lake City, Utah.
Officers: Wm. Chipman, pres.; Hugo B. Anderson, v. p.; J. Tracey tton, sec.-treas.; J. H. Wootton, mgr., with John Hower, directors.
Inc. February, 1917, in Utah. **Cap.,** $50,000; shares 5 cts. par; assess- 515,000 shares outstanding. Annual meeting, 2nd Tuesday in January.
Property: 7 claims, 140 acres, in American Fork canyon, claimed to a fissure vein of lead sulphide and iron carbonate, with a 4″ shoot ad ore, assaying about $25. Developed by tunnel, 90′ long, to be ex- d 200′ at last report.

KERS MINES CO. UTAH
Offices: J. A. Maxfield, Maxfield Apts., Salt Lake City, Utah.
Officers: Noble Warrum, pres.; J. A. Maxfield, v. p.-sec.; A. D. Wil- s, treas., with M. B. Connell, B. Y. Golding and Aquilla Nebeker, tors.
nc. November, 1916. **Cap.,** 1,000,000 shares; 10c par; 500,000 shares in ury.
Property: 39 claims, about 780 acres, adjoins the Logger mine in Big onwood Canyon, and is near the old Maxfield mine.
Development: by a tunnel which is expected to cut the Logger vein 0′ in.

STATE MNG. & DEV. CO. UTAH
Address: American Fork, Utah county, Utah.
Officers: Geo. B. Tyler, pres. and mgr.; J. H. Wootton, v. p.; J. W. s, sec.-treas., with A. Chipman and E. J. Bennett, directors.
Cap., $1,000.000; shares 5c par; assessable; last assessment, No. 5, of alled June 14, 1917. Stock listed on Salt Lake Exchange. Prices range ¼c in 1918; ¼-½c in 1919. Financial statement from April 26, 1917, to ber 12, 1918, shows total receipts of $12,361; of which $392 was from ales, and $11,490 from assessments. Cash on hand, October 12, 1918, $210.
Property: at American Fork canyon. 22 claims, unpatented, 18 miles the railroad. Company claims to have 1,000 tons of ore on the dump ging 5 to 8% lead and 8 to 10 oz. silver, and 210 tons of ore averaging er ton.
Development: is by tunnel with about 1,200′ of workings.

OROPHON MINING CO. UTAH
Address: A. T. Sanford, Boston Bldg., Salt Lake City, Utah. Carl n, mgr., has a bond and lease on the property.
Cap., $100,000; shares 10c par par; 960,000 shares issued.
Property: 250 acres adjoining the Live Yankee group on the north in rican Fork canyon, Utah. The Live Yankee and other veins are said to the claims.
Ore: occurs in fissures in quartzite and in contact between lime and zite, carrying gold, copper, silver and lead.
Development: by 800′ tunnel. A small mill was built in 1918, and ore nents reported, August, 1919. The property is not operated in the r months on account of the deep snow.

COTTONWOOD COALITION MINES CO. UTAH
Officers: W. G. Romney, pres., 271 4th Ave., Salt Lake City; E. J. ny, v. p.; C. E. Robertson, sec.-treas., 777 7th Ave., Salt Lake City; R. Papworth, Jr., W. H. Hurd, W. C. Hurd, and H. J. McKean, direc-

Property: 14 claims, partly patented, 18 miles from railway, in the Alta Cottonwood district, 6 miles from Salt Lake City, includes the Mountain Chief group, N. W. of the Columbus Rexall.

The Cardiff is now one of the richest silver-lead mines of Utah. After being idle for years, a new prospecting tunnel was started in 1914. The tunnel cut a bedded orebody, averaging 10' thick, on a limestone-quartzite contact, at a point where it was intersected by a fissure vein. The orebody was opened for a length of 235' and for 795' on its dip (22°) developing 250,000 tons of $30 ore. New orebodies on the same contact, were cut at intersections of other fissures. One orebody found 800' S. of the main working winze is 5 to 9' wide and is continuous for over 200' along the strike.

Development: by main haulage tunnel, and an 1,180' inclined shaft which follows the ore down along the limestone bedding plane. A new 235' shaft in quartzite hanging wall, has recently been completed. Ore reserves of 200,000 tons of $30 ore were blocked out January, 1917. Proven reserves estimated to be large enough for an output of 100 tons daily for 3 years.

Equipment: includes compressor, drills, electric power, dwellings, machine and blacksmith shop.

Production: amounts to 125 tons daily of $45 to $50 ore during the summer months, but is only 30 to 40 tons when the winter snows cover the ground.

Output in 1919 was 6,520 tons of ore yielding 102,043 oz. silver, 3,111,900 lb. lead, 106,982 lb. copper, and 952,917 lb. zinc.

COLUMBUS EXTENSION MINING CO. UTAH

Consolidated with Rexall Silver & Copper Co. to form the Columbus Rexall Con. Mines Co., which see.

Described Vol. XII.

COLUMBUS-REXALL CONS. MINES CO. UTAH

Is a consolidation of the Columbus Extension and Rexall Silver & Copper Mng. Co., described in Vol. XII.

Office: 309 Kearns Bldg., Salt Lake City, Utah. **Mine office:** Mercur, Utah.

Officers: L. Greene, pres.; M. R. Evans, v. p.-mgr.; F. B. Cook, sec.; S. A. Whitney, treas., with H. W. Lane, Fred A. Price and John Gallacher directors. C. M. Evans, supt.

Inc. July 15, 1915, in Utah. **Cap.**, $600,000; $1 par; 586,234 shares issued; assessable. Columbia Trust Co., N. Y., registrar and transfer agts. Annual meeting, 1st Monday in June. Listed on Salt Lake City Exchange. Shares jumped from 13c in July to $2 in September, 1917. Prices in 1918 were $1.05 high, 25c low. In 1919, 45c high, 23½c low. An initial dividend of 2½c a share was paid December 30, 1918.

Property: 14 patented claims, 12 acres, in the Little Cottonwood district. Ore is copper with some galena.

Development: by 5,500' tunnel with total workings of 13,000'. An orebody was cut in July, 1917, at a point 5,000' from the tunnel portal at a depth of 1,350'; the ore occurs in limestone, near the quartzite contact. This orebody yielded 1,900 tons of ore, assaying 13.9% copper, 3.8% zinc, 0.5 oz. gold, and 32.9 oz. silver per ton. Late in 1919 a drift from the main tunnel cut ore at 75', and passed through 16' of high-grade ore. A raise above the 800' level in December, 1919, showed 6' of 41 oz. silver and lead ore. A connection was being made with the Cardiff, early in 1920.

Equipment: includes tramway and motors.

Production: shipments to April 21, 1919, totaled 7,223 tons of first-class ore with net smelter returns of $233,402, and 861 tons of second class with net smelter returns of $7,793. Ore is treated by the Murray mill. Lack of transportation facilities has kept down shipments. Early in 1920 company shipped over $40,000 worth of ore.

The total output in 1919 was 1,337 tons of ore, 7,842 oz. silver, and ,950 lb. copper, worth $39,688 gross.

)TTONWOOD ATLANTIS MINING CO. **UTAH**

Office: 420 Vermont Bldg., Salt Lake City, Utah. **Mine office:** Alta, ah.

Officers: Samuel Neff, pres.; R. O. Dobbs, v. p.-gen. mgr.; J. H. Moss, .-treas.; with Geo. F. Busch and R. C. Middlewood, directors.

Inc. July, 1915, in Utah. **Cap.,** $100,000; 10c par value; 900,000 shares ued.

Transfer office: 420 Vermont Bldg., Salt Lake City. Annual meeting May.

Property: 6 claims, 50 acres, in the Little Cottonwood district. Ore ich carries lead, silver, gold and copper occurs in shoots at the inter- tion of two orebearing fissures with a thrust fault contact having a estone foot wall and a quartzite hanging wall. This contact courses ıth 15° East and dips 25°. The developed portion of the Atlantis prop- y was sold to the Louise Mining Co. in November, 1917.

It is the plan of the company to crosscut to the thrust contact as has n done at the Cardiff mine two miles north.

)TTONWOOD KING MINING CO. **UTAH**

Office: 502 Boyd Park Bldg., Salt Lake City, Utah.

Officers: A. Anderson, pres.; A. L. Thomas, Jr., v. p.; H. H. Harris, -treas., with H. P. Hucy, G. H. Webb, C. R. Halstead and J. W. Mc- ughlin, directors. A. B. Gattrell, mgr.

Inc. July 2, 1915. **Cap.,** $150,000; shares 10c par; 150,000 shares in treas- . Assessment No. 5, ¼ per share levied August, 1918. Listed on Salt ke Exchange.

Property: 28 claims, 560 acres, and a bond and lease on the Giles prop- y of 31 claims, located between Big Cottonwood and Park City, Utah. nd calls for $600,000, with no payments due for 2 years.

All the property of the Big King Mining Co., bought, 1917, by exchange stock share for share, property 52 claims, 1,040 acres, adjacent to Cotton- od King ground.

Development: 2,100′ of tunnels and 187′ shaft with 500′ of workings. nagement states that on account of faults, 600′ of development done in 6-17 proved disappointing. In 1918 the Sunnyside tunnel was advanced '. Work was resumed in May, 1919. Property is still in a prospective te. It adjoins the Daly Judge and Silver King Coalition of Park City.

)TTONWOOD METAL MINING CO. **UTAH**

Office: 503 Utah Savings and Trust Co. Bldg., Salt Lake City, Utah.

Officers: W. M. Ferry, pres.; E. E. Watrous, v. p.; S. J. Truman, sec.- as., with E. P. Watrous, and H. R. Watrous, directors.

Inc. in Utah. **Cap.,** $100,000; 10c par; 205,000 shares paid for property d organization expenses. The balance is to provide funds for velopment work. Listed on Salt Lake Exchange. Shares sold 1-3½c in 8; 6c in 1919.

Property: 38 full claims, 760 acres, known as the Watrous group, in the g Cottonwood district, said to be crossed by six large fissures which cut : series of sandstone, shale, quartzite and limestone. These fissures run 35°-40° E., dip 60° to the N. W., and are cut by E. and W. fissures. Ore- dies are found at these intersections especially in the soluble white lime. e deposits of the district are bedded deposits by replacement.

Development: by 1,070′ tunnel that has cut 3 fissures. It is the plan of company to continue the tunnel to cut all the fissures. The Silver King [illegible] is expected within 500′.

[illegible]ment: 4-drill compresor, blacksmith shop, and houses.

[illegible]ment frankly states that property is a prospect, and that they [illegible] development. Prof. J. H. Webber of Salt [illegible] first-class territory to prospect.

DAYS FORK MINING CO. **UTAH**

Office: 608 Boston Bldg., Salt Lake City, Utah.

Officers: Henry Harker, pres.; M. T. Ellison, v. p.-mgr.; E. O. Le sec.-treas., with H. E. Booth and B. H. Cannon, directors.

Inc. April, 1911, in Utah. **Cap.**, $60,000; 10c par; 475,000 shares ou standing.

Property: 5 claims, 85 acres, in Big Cottonwood mining district, sa to show gold, silver, and copper ore in fissure veins. **Development:** abo 1,000' of tunneling. Is a prospect.

EARL & EAGLE MINING CO. **UTAH**

Described in Vol. XIII. merged with American Cons. Mines Co which see.

EAST HECLA MINING CO. **UTAH**

Office: 1119 Boston Bldg., Salt Lake City, Utah. **Mine office:** Alt Utah.

Officers: J. B. Taylor, pres.-gen. mgr.; E. J. Broberg, v. p.; W. Hans Jr., sec.-treas.; D. J. Cook, supt.

Inc. in 1916, in Utah. **Cap.**, 1,000,000 shares; 10c par.

Property: a group of claims at Alta, adjoining the South Hecla mm said to show a prominent outcropping vein and about 3' of ore in a sha sunk on it. Ore carries copper, lead, silver and gold values.

Development: a tunnel, 250' long, being driven to cut the downwa extension of the vein beneath a 75' shaft, that shows copper ore.

Management doing exploration work at last accounts.

EMMA CONSOLIDATED MINING CO. **UTAH**

Dead.

Former officers: G. G. Rice, pres.; Wm. Barret Ridgely, v. p.-treas Judge H. D. Rummel, 2d v. p.; I. H. Weinberg, sec.; J. J. Beeson, gen. mg

Inc. 1917, in Delaware. **Cap.**, $3,000,000; $1 par; 2,668,693 issued. Wa the holding company, owning more than 98% of the outstanding capitaliza tion of Emma Copper Co. and over 80% of Old Emma Mines Co Als bought the lease on Old Emma Mines Co. ground from the Old Emm Leasing Co. (now dissolved), which ran until September, 1917.

Emma Copper Co.

Controlled through ownership of over 98% of outstanding capitalizatio by the Emma Cons. Mng. Co.

In 1918 the company after shipping a few hundred tons of ore wen into the hands of a receiver, and in 1919, the Emma Silver Mines Co. wa formed as a reorganization of the Emma companies, assuming their deb and assets.

EMMA SILVER MINES CO. **UTAH**

Mine address: Alta, Salt Lake county, Utah.

Officers: C. S. Burton, pres.; John Dern, v. p., Salt Lake City; Fran B. Cook, sec.-treas.; with J. E. Galligher, John M. Hayes, and A. L. Hoy paugh, directors. Geo. H. Dern, mgr., Jas. Quirk, supt.

Inc. 1919, in Utah. **Cap.**, $5,000,000; $1 par. Listed on Salt Lake Ex change.

Company is the offspring of Emma Cons., Old Emma Mines Co. an the Emma Copper Co., which were controlled by Emma Cons. In 191 Emma Cons., which had been fostered by George Graham Rice, went int the hands of a receiver and one of the results was the formation of th Emma Silver Mines Co. Shareholders in the Old Emma companies wer given the "privilege" of exchanging one share of old stock for three s new on payment of 10c. a share on the old stock or one share of ne for one of the old with no assessment; receiving 20c a share cash for eac of the old. Some of the shareholders of Emma Cons. had paid as high a $3.75 a share for this stock in 1916; it afterwards fell to a few cents pe share.

The new company after paying all debts of the old company is said ave started business with $100,000 and 1,000,000 shares of stock in the ury and no debts. As there are many who still have faith in the un- ored part of the property, it is hoped that the new management will this old and much abused mine into the productive class.

Property: included 11 claims in Little Cottonwood district and the ad- ng Vallejo and Joab Lawrence groups, bought 1915 in exchange for 00 shares of stock. The company had a lease on the Emma mine d by the Old Emma Mines Co., which see.

History: the Old Emma mine was a famous early-day producer, having ed over $6,000,000 worth of lead-silver ore in the 60's and 70's, from e the 300′ level. It was sold to the Emma Silver Mng. Co., for 0,000 and soon afterwards the orebodies appeared worked out, or cut y a fault. After vain attempts to find the orebodies below the fault, nine lay idle until 1915.

Chas. S. Herzig made a geological study of the property with the de- on that it contained a faulted portion of the Old Emma bonanza ore- . whereupon diamond drilling was started. Under direction of J. J. on, geologist, the Emma vein was located, 1916, at about 250′ below e it had been cut off by the fault, and the displaced segment of the ore- opened up.

Development: by 1,700′ tunnel, 400′ shaft and drifts on several levels. Management diamond drilled in 1917, in the hopes of locating the ward extensions of 4 other orebodies, all presumably cut off by the tezuma fault. In November a mineralized zone 50′ wide was passed gh, assaying a few ounces of silver.

Early in 1920, a winze from the bottom level opened 5′ of ore assaying lead and 180 oz. silver per ton. Shipments were begun shortly there-

Production: from Jan. to Nov., 1917, 8,400 tons were shipped with age net returns of $30 a ton.

A MAY MINING CO. **UTAH**

Address: Frank Jardine, mgr., American Fork, Utah.

Officers: B. H. Neilson, pres., Frank Jardine, v. p. and mgr.; Milas son, sec.-treas., with Nelson Miller and T. E. Tullis, directors.

Stock assessable; assessment of ½c per share levied in 1918.

Property: in American Fork district, said to show lead-silver ore, with e copper. Developed by a 250′ tunnel.

SURES EXPLORATION CO. **UTAH**

Company no longer in existence. Entire stock issue owned by Ameri- Fork Exploration Co., which see.

E COINAGE MINING & MILLING CO. **UTAH**

Letters neither answered nor returned from office: 69 Commercial , Salt Lake City, Utah. Mine near Alta, Salt Lake Co., Utah. L. A. ns, pres.; D. H. Wenger, sec.-treas.

Inc. 1896, in Utah. **Cap.,** $125,000; shares 25c par; assessable, with 2 ssments levied.

Property: 4 claims, 3 patented, in Little Cottonwood canyon, 2 miles a railroad, developed by shaft and tunnels, showing lead and copper

NWOOD MINING CO. **UTAH**

Office: 1102 West Seventh South St., Salt Lake City, Utah.

Officers: E. P. Mowers, pres. and gen. mgr.; N. W. Sonnedecker, v. p.; . Grovenor, sec.-treas.

Inc. Feb. 21, 1901, in Utah. **Cap.,** $30,000; shares 10c par; assessable; eased 1912, to $125,000, shares 25 cts. par.

Property: 8 claims, patented, in Big Cottonwood district, 6 miles from ilroad, opened by shafts and tunnels, with about 1,600′ of workings. No nt information.

GLOBE CONS. MINING CO. UTAH

John Cleghorn, pres.-gen. mgr., Boston Bldg., Salt Lake City, Utah.

Property: located in American Fork Canyon, said to show limestone cut by fissure veins with lead-silver ore.

Developed: by tunnels—main tunnel had a length of 800' early in June 1919. Management claims to have a good tonnage of milling ore.

GOLD HILL MINES DEVELOPMENT CO. UTAH

Main office: 425 Atlas Block, Salt Lake City, Utah. **Mine office:** American Fork, Utah.

Officers: Theo. Nicholes, pres. and gen. mgr.; A. J. Weber, v. p. J. Fitzgerald, sec.-treas.

Inc. July, 1916. **Cap.,** $1,000,000; par $1; 300,000 in treasury; 200,000 sold. Increased 1916 from $50,000; 10c par; assessable.

Property: 9 claims in American Fork district, Utah county, on Mill Hill. Ledge said to show copper ore, with lead, gold and silver.

Development: by 3 short tunnels, lowest driven to open ore found in upper tunnel.

GRATER CONS. MINES CO. UTAH

Address: 201 Ness Bldg., Salt Lake City, Utah.

Officers: J. A. Maxfield, pres.; C. F. Johnson, v. p.; B. D. Field, sec.-treas.; with Geo. W. Robbins, and Peter Crystal, directors.

Inc. Feb., 1919, in Utah. **Cap.,** $1,500,000; $1 par; outstanding, 1,250,000 shares.

Property: 76 claims in Big Cottonwood Canyon. Company has an ambitious scheme of driving a 5-mile tunnel to cut several fissures: the tunnel would pass under the Maxfield, Dolly Varden, Kennebec, Flagstaff, Prince of Wales, Woodlawn, and other mines.

The project may have merit, but the advertising matter sent out may prove misleading to the uninitiated.

GREAT COPPER KING MINING CO. UTAH

Inc. Aug., 1904, in Utah. **Cap.,** $50,000; shares 10c par; issued, $47,500; assessable; last assessment 1/10 ct. delinquent March 7, 1914.

Property: 10 claims, unpatented, including 4 claims, 1 fractional, held under bond and lease, near the mouth of Little Cottonwood canyon, 7 miles from Alta.

Development: by shallow shafts and a 330' tunnel, with about 800' of workings, showing auriferous and argentiferous copper and lead ore. Ore occurs in fissure veins as contact deposit in granite and quartzite.

Samples taken from main tunnel on 300' level said to assay from 19-33% copper. J. E. Smith, a director, was developing property under contract in 1916. No later information.

GREAT WESTERN GOLD & COPPER CO. UTAH

Merged with Mountain Lake Mining Co. and Thor Mining Co. under title of Great Western Mines Co., which see.

GREAT WESTERN MINES CO. UTAH

Office: Knight Bldg., Provo, Utah.

Officers: Jesse Knight, pres.; J. W. Knight, v. p.; W. L. Mangum, sec.-treas., with Jas. H. Moyle, W. I. Snyder, R. A. Brighton and K. S. Jordan, directors.

Inc. 1916, in Utah. **Cap.,** $150,000; 10c par; outstanding 1,270,000 shares. Listed on Salt Lake City Exchange. Company is a merger of the Great Western Gold & Silver Co., Mountain Lake Mining Co., and the Thor Mining Co., all described in Vol. XI, Copper Handbook.

Property: 98 claims, in the Big Cottonwood and Snake Creek districts in Salt Lake and Wasatch counties.

Ore: gold, silver, copper and lead, mainly in contact deposits: no estimate of ore in sight.

Development: 500' of shafts, 8,500' of tunnels, 350' winzes and raises, and 2,000' of crosscuts. Ten cars of copper ore said to have been shipped from the property. Company has a transportation agreement with the Snake

:k Mining & Tunnel Co., a subsidiary of the Judge Mining & Smelting for use of the 14,000′ tunnel.

WELL MINING CO. **UTAH**

Office: 209 Felt Bldg., Salt Lake City, Utah.

Officers: T. L. Walden, pres.-mgr.; M. J. McGill, v. p.; J. H. Deming, treas.; with J. M. Howell and T. H. Paull, directors.

Inc. in 1910. **Cap.**, $600,000; shares, $1 par; 555,000 shares outstanding; ssable. Assessment No. 6, 1c a share payable, August, 1919, and No. 7, a share, payable November, 1919, $1,250 in treasury, June 20, 1919. es sold 3½-17c in 1918; 7-12½, in 1919 **Listed on Salt Lake Exchange.**

Property: an old mine, formerly known as the Baby McKee, 7 patented ns, in the Alta-Cottonwood district, about 25 miles S. E. of Salt Lake , adjoins the Cardiff property on the east. Claims cover strike of vell vein, said to be traceable on property for over a mile, with strike E.-S. W. and 4′ width. Country rock is quartzite and limestone. **Ore:** r. copper, lead, zinc and antimony, said to average $20 to $50 per ton.

Development: 150′ of shafts, and over 1,800′ of tunnels. The main tun- is in over 1,400′. Shipments were made prior to 1910. Development k only is being done; several small fissures have been cut.

VA COPPER MINING CO. **UTAH**

Address: Park City, Utah.

Officers: L. R. Perry, pres., Forrest City, Iowa; D. G. Scott, v. p.-gen. .; R. T. Kimball, sec.-treas., with J. Carson and D. E. King, directors. e Scott, supt.

Cap., $100,000; 10c par; 750,000 issued; assessable; last assessment, 1c share, levied May, 1919. Ore sold, 1917, was valued at $5,740, and in , at $2,277.

Property: 4 patented claims, and 2 unpatented claims, 180 acres, in Cottonwood district, 1,000′ N. W. of Silver King Coalition.

Development: by tunnel, with 200′ incline in ore and several hundred of workings, mainly along a limestone quartzite contact.

In 1917 a compressor and other mining machinery was installed. Sev- shipments were made, yielding as high as $900 per carload. Com- y is working only 3 or 4 men, and shipped 125 tons in 1919. Reported ember, 1919, that during the past year, $2,500 had been spent on new pment, and 550′ of new work done.

IAN MINING & MILLING CO. **UTAH**

Dead. Described Vol. XIII. Formerly operated at American Fork.

NNEBEC CONSOLIDATED MINING CO. **UTAH**

Address: 1105 Newhouse Bldg., Salt Lake City, Utah.

Officers: Ezra Thompson, pres.; Jas. D. Murdoch, sec., with A. T. San- l, Shand Smith and P. S. Keogh, directors.

Inc. in 1901. **Cap.**, $400,000; shares 1c par; 63,390 shares in treasury.

On the basis of 3c per share on their holdings, shareholders subscribed loan bearing 8% in June, 1917.

Property: 30 patented claims, about 400 acres, in the South Fork of Big Cottonwood district, adjoins the Cardiff on the east and west and Wasatch Mines and Columbus Rexall on the south.

Development: by a 700′ incline shaft, a 3,000′ lower tunnel and an upper el.

Property is an old-time, but very small silver-lead producer. Inactive some time, but in June, 1919, company levied an assessment of 3c per e to provide money for resumption of work.

NNEBEC MINING CO. **UTAH**

Company reorganized in October, 1917, under name of Kennebec Con- dated, which see.

ST CHANCE MINING CO. **UTAH**

Address: Newhouse Bldg., Salt Lake City, Utah.

Officers: Jas. A. Hauerbach, pres.; F. O. Horn, sec.-treas.

Cap., $25,000; 10c each; assessable; 200,000 shares issued. Company reported out of debt and amply financed.

Property: 1 patented claim adjoining the Cardiff, in the Big Cottonwood district, near Alta.

Development: 400′ tunnel and 150′ winze. Ore is said to assay 60-70% lead, and 50-75 oz. silver. Employs 3-4 men steadily on development. Management hopes to enter shipping list in 1920.

LOGGER MINING CO. UTAH

Officers: R. D. Maxfield, pres.-mgr.; Jas. Marlow, v. p.; D. J. Bloem, sec.-treas., with J. M. Hamilton, and Henry Erickson, directors.

Inc. July, 1915. **Cap.**, 1,000,000 shares; 1c each. Stock listed on Salt Lake Exchange. Quoted 1¾-2c in 1919.

Property: the Logger mine in Big Cottonwood canyon, adjoining the Maxfield mine, shows a 1′ fissure vein, developed by a 475′ adit, a winze sunk on the vein from the 200′ point and a crosscut at 350′ from portal, exposing ore. Assays said to return $16.47 gold, 13.4 oz. silver and 1% copper.

A lower tunnel was started 100′ below upper tunnel, 1916, and is reported to have cut the vein seen above with several other small veins of ore assaying from $50-$240 per ton in copper, gold and silver. Development work was resumed in 1919.

LOUISE MINING CO. UTAH

Address: 420 Vermont Bldg., Salt Lake City. **Mine address:** Alta, Utah.

Officers: Samuel Neff, pres.; R. O. Dobbs, v. p.-sec. and gen. mgr.; David Neff, treas.; with J. H. Moss, G. F. Busch and R. C. Middlewood, directors.

Inc. Nov. 16, 1917, in Utah. **Cap.**, $100,000; 10c par; assessable; outstanding, 501,600 shares.

Property: 7 patented claims, 70 acres, in the Little Cottonwood mining district at Alta, said to show silver-lead ore with some copper and gold.

Development: by three tunnels, 800′, 450′, and 250′ in length with total workings of 2,500′.

Management plans to thoroughly develop the property.

MAJOR EVANS MINING CO. UTAH

Mail returned, 1918, from former address, 440 Boston Bldg., Salt Lake City, Utah. C. B. Felt, pres.; R. Leo Bird, sec.

Inc. 1915, in Utah. **Cap.**, $100,000; 10c par; assessable; treasury, 44,000 shares. Listed in Salt Lake City.

Property: 42 claims in American Fork mining district, said to show copper-lead-silver ore. Is a prospect. Probably idle.

MARY ELLEN MINING & MILLING CO. UTAH

Address: American Fork, Utah.

Officers: W. C. Boley, pres.; T. S. Priday, v. p.; J. W. Storrs, sec.-treas.; with R. C. Boley and T. M. Allman, directors.

Inc. 1909, in Utah. **Cap.**, $100,000; 10c par; assessable; 650,000 issued.

Property: 7 claims, 125 acres, in American Fork district, Utah, said to show a vein in quartzite and limestone. **Ore:** is partly sulphide, and contains lead, silver, and gold.

Development: by tunnels totaling 700′. Idle for 3 years, but work resumed in 1917. No report since.

MAXFIELD MINE UTAH

Operated by Boston Development Co.

MICHIGAN-UTAH CONSOLIDATED MINES CO. UTAH

Office: 411 Felt Bldg., Salt Lake City, Utah. **Mine office:** Alta, Salt Lake county, Utah.

Officers: Norman W. Haire, pres. and gen. mgr.; H. R. MacMillan, v. p.; N. A. Robertson, sec.; L. H. Farnsworth, treas.; with Frank B. Cook, C. A. Gillette, and W. J. Halloran, directors. R. R. Van Valkenburgh, supt.

Inc. April 26, 1915, in Utah, as a reorganization of the Michigan-Utah

ing Co. **Cap.**, 1,500,000 shares; 25c par; assessable; assessment, 2½c a e, called November, 1919; 1,328,255 shares issued. Listed on Salt Lake hange. Sales, 9-23c in 1918; 8-15c in 1919. Columbia Trust Co., regis- . Annual meeting, 2nd Monday in February.

Gross earnings in 1917 were $226,408; all from ore sales.

Property: 72 claims, 42 patented, 1,200 acres, including a millsite, in the and Little Cottonwood mining districts. Claims show Paleozoic sedi- its cut by granite, the ore occurring in fissure veins in limestone, and contact metamorphic deposits between limestone and granite, having eneral strike of N. 65° E., and a dip of 32°. There are 5 distinct and allel veins showing average widths of 2½′ and traceable 5,000′, reported carry copper, lead, zinc, silver and gold values, averaging $25 per ton. s are carbonates at and near surface, succeeded below by sulphides.

Development: principally by tunnels, all workings being in the oxide carbonate zones, but sulphides are proven to occur in depth by work- s of the Columbus Consolidated Mining Co., near by. Total under- und openings aggregate over 50,000′, about one-half being tunnels, drifts crosscuts that are all in ore, raises and winzes aggregating 10,500′ ad- onal. Ore is transported by aerial tramway to Tanners flat, 5 miles n the mine, thence by narrow-gauge railway to Wasatch, where connec- n is made with the Salt Lake & Alta standard gauge road which runs the Midvale smelter. The tram has a maximum capacity of 200 tons y.

The Copper Prince tunnel has been driven under property about 2,000′, osing several large orebodies.

Equipment: includes two 90-h. p. hoists, and everything necessary for ning 150 tons daily. Air is supplied by the Wasatch Power Co. from tle Cottonwood creek.

Buildings include machine shop, carpenter shop, several dwellings and a thy, located underground as a measure of protection from snowslides, ich are of frequent occurrence in this region.

Production: ar	Gold Oz.	Silver Oz.	Copper Lb.	Lead Lb.	Receipts Net
5	67	43,146	99,066	515,296	$29,901
6	154	90,816	364,685	916,851	130,342
7	227	148,318	384,906	1,865,379	244,125

The mine was worked continuously throughout 1918, and in July, 1919, duction was about one car of ore daily, the company, like many others, ng short of miners.

Part of the property was operated under lease by the Triangle Mng. ., a close corporation, which see.

LLER MINES DEVELOPMENT CO. UTAH

Office: 804 Newhouse Bldg., Salt Lake City, Utah.

, sec.-mgr., with A. B. Stevenson, A. K. Thornton, directors.

Inc. 1900, in Utah. **Cap.,** $100,000; shares 10c par; assessable; 400,000
res outstanding. Annual meeting, first Monday in February. Financial state-
nt for 1918 showed balance in bank, $1,306; Liberty bonds, $2,000.

Property: Blue Rock group, 7 patented claims, 120 acres in American
k mining district, shows quartzite and limestone, carrying several fissure
s varying in width from 17" to 15'. Veins strike N. 30° E. and dip 50°
W.

Ore: lead-silver sulphide, estimated by management to average 50%
l, 25 oz. silver, .02 oz. gold, 1.5% zinc, 15% iron, 0.1% copper, 22% sulphur.

Development: by 3 tunnels 300', 700' and 1,000' long with about 5,000'
workings, estimated to show 100,000 tons of ore blocked out for stoping, De-
ber, 1915. January 1, 1919, reported to have 7 month's ore supply blocked
Main fissure was cut at depth of 500'. Property was leased to the Fissures
loration Co (controlled through stock ownership by American Fork Explora-
Co.), on a royalty basis. Royalties received in 1918 totaled $10,842.

Equipment: includes a hydro-electric-generating plant, installed in Dec.,
, at a cost of $20,000. A 200-ton mill constructed during 1917 treated about
ons per day in 1918, concentrates netting $37 per ton.

Idle. **Office:** 855 Sherman Ave., Salt Lake City, Utah. **Mine office:** ghes Canyon, Salt Lake county, Utah.

Officers: D. A. Buck, pres.; H. H. Patterson, v. p.; B. A. M. Froiseth, -treas.

Inc. March 17, 1906, in Utah. **Cap.,** $50,000; 20c par; issued, 180,000 res.

Property: 6 claims, unpatented, 7 miles from railroad, in Big Cotton-od mining district, opened by shaft and tunnel, with about 750′ of workings, wing gold and silver-copper ore. Annual assessment work only being done.

OTIA MINING CO. **UTAH**

W. E. Weihe, pres.; Jas. H. Douglas, v. p., Ogden, Utah; Jas. S. Morgan, -treas., with A. A. Beesley, A. L. Pratt, O. G. Pratt, and R. G. Pratt, direc-

Cap., $500,000; 10c par; 200.000 shares issued.

Property: in Honeycomb Gulch, of Big Cottonwood, shipped a few oads of lead-silver ore in 1918. Reported that controlling interest has passed Messrs. Dunn and Fabian, of Salt Lake City.

CRET MINING & MILLING CO. **UTAH**

Offices: 618 Newhouse Bldg., Salt Lake City and Alta, Utah. Reported ad" in Copper Handbook, Vol. X. Reorganized and rejuvenated in 1915.

Officers: R. W. Clough, pres.; W. M. Minor, v. p. and treas.; H. S. per, sec., with E. R. Phelps and W. H. Clough, directors.

Inc. about April, 1906, in Utah. **Cap.,** $300,000; increased in 1915 to),000; shares $1 par. In 1919, increased number of shares to 1,000,000; par Listed on Salt Lake Exchange. Share sales 1c, 1918.

Property: 15 claims, 300 acres, 100 patented, at Alta, Little Cottonwood ing district, adjoining the Albion on the S. E., said to show lead-silver ore. intry rock is quartzite.

Development: by tunnels; reported in April, 1916, that an 80′ tunnel uld be extended to cut the surface showings at a depth of 800′. The company lso reported as having obtained the right from the Albion to drive a crosscut Secret ground from a point 2,500′ in from the portal of the Albion tunnel. upper tunnel is in 500′. Workings total 700′. No orebodies large enough for duction have been found. In May, 1919, work was again resumed after a od of idleness. Property is in the speculative class.

LLS MINING CO. **UTAH**

[redacted]: Judge Bldg., Salt Lake City, and V. S. Snow, supt., Alta.
[redacted]: John Zink, pres.; John Gallacher, v. p.; W. H. Weyher, sec.-[redacted]. Joerger, directors.
[redacted]: Utah. **Cap.,** 600,000 shares; 25c par; 400.000 issued In [redacted] $3,994 in the treasury; debts amounted to $13,500 on the [redacted] on the 6 patented claims, latter amount was due September

1, 1916. Assessment No. 4, of 1c a share was levied in March, 1919. Last assessment, 2c a share, delinquent October 18, 1919.

Listed on Salt Lake City Exchange. Shares 8½ low, 21 high in 1918; 4 low, 13½ high in 1919.

Property: 16 claims, 6 patented, in the Alta-Cottonwood mining district, 8 miles from a railroad, said to cover 1,800′ to 3,000′ along the mineralized zone passing through the South Hecla property which adjoins on the west.

Ore: carries silver lead, zinc and copper, in fissure veins in limestone and in contact deposits between limestone and granite; veins strike N. E. S. W.

Development: mainly through the Dwyer tunnel of the South Hecla company, also a 200′ shaft, 2,200′ of tunnels and 600′ of raises. Connection has been made with the old Lexington tunnel, giving another opening to the Sells and improving ventilation. Shipments average about 2 cars per week.

Early in 1920 a 125′ raise above the tunnel level opened an orebody said to sample $14.50 gold and 240 oz. silver per ton, with 4% copper.

An aerial tram, 2,000′ long, costing $10,000, to carry 10 tons per hour, was erected in 1918. This should permit transportation during the winter. Is a speculative mining venture that has promising ground.

Company has remained courteously non-communicative to requests for information.

SILVER FLAT MINING CO. UTAH

Presumably dead. **Property:** the old Nebraska mine in Delta Creek, Silver Lake section, American Fork, Utah, shows silver-lead ore in fissures in limestone cut by porphyry dikes.

Ore: complex silver-copper-lead, high in zinc.

Development: by 1,200′ of tunnels. No recent information.

SILVER MOON MINING CO. UTAH

Office: 27 Latimer Block, Salt Lake City, Utah.

Officers: A. L. Headbug, pres.; Wm. Crome, sec.-treas.

Inc. Jan. 29, 1912. **Cap.,** $10,000; shares 2c par; assessable. Last assessment levied August 15, 1919. In treasury, May, 1916, 200,000 shares and $[illegible] in cash; no debts. Listed in Salt Lake City.

Property: 7 unpatented claims in the Big Cottonwood district.

Ore: carries silver, gold, lead. Little development has been done. Four men employed. Property is a prospect.

SILVER SIDE MINING CO. UTAH

Address: American Fork, Utah.

Officers: J. E. Beveridge, pres.; A. O. Jacobson, v. p.; W. Holmes, sec.-treas., with H. P. Huey and M. M. Beaver, directors.

Inc. 1916, in Utah. **Cap.,** $50,000; shares 5c par.

Property: 5 miles up American Fork canyon, is said to show silver-lead ore in contact deposit between limestone and quartzite.

Development: by tunnels and shallow shaft. No recent information.

SOUTH CARDIFF MINING CO. UTAH

Address: George N. Lawrence, pres., 420 Boston Bldg., Salt Lake City; W. H. King, v. p.; Allen Sanford, sec.treas., and George A. Steiner, director.

Inc. April 9, 1916, in Utah. **Cap.,** 1,000,000 shares; 450,000 in treasury.

Property: 10 claims, 160 acres in Cottonwood district, adjoining Cardiff, Howell & Monte Cristo, and the Canton Mining Co. holdings, is supposed to carry extension of Cardiff fissure. No recent information; property idle.

SOUTH HECLA EXTENSION MINING CO. UTAH

Office: 161 So. Main St., Salt Lake City, Utah.

Officers: the same as South Hecla Mng. Co.

Inc. in Utah. **Cap.,** $100,000; shares 10c par; assessable; outstanding $53,879. Listed in Salt Lake City. Shares 1¼-5c in 1918; 2¼-5c in 1919.

Assets at January 1, 1917, totaled $101,747, including $32,085 for property and plant, $19,422 for development and $46,122 for treasury stock. Current assets were $[illegible] against current liabilities of $1,747. Later figures not available.

Property [illegible] acres in the Little Cottonwood district, adjoining [illegible]

cla Mining Co., said to show silver-lead-copper-gold ore. Development is ng done through the Quincy tunnel level of the South Hecla mine. Is in prospect class.

UTH HECLA MINING CO. **UTAH**

Office: 161 So. Main St., Salt Lake City, Utah. **Mine office:** Alta, Salt ke county, Utah.

Officers: Geo. H. Watson, pres.-gen. mgr.; Herman Bamberger, v. p.; W. Harrington, sec.-treas., with A. B. Watson, and H. C. Edwards, directors.

Inc. Sept. 14, 1910, in Utah. **Cap.,** $500,000; $1 par; assessable; issued 2,920. Geo. H. Watson & Co., registrar. Annual meeting, second Wednesday September.

Listed on Salt Lake Stock Exchange. Shares, 63c low, $1.30 high, 1918; 80-2.70 in 1919.

Company was organized as a merger of the South Columbus Consolidated ning Co., and Alta-Hecla Mining Co., and holds properties formerly held by Bingham-Centennial, Alta-Quincy, Columbus Wedge, Ivanhoe and Lilburn ing companies. Company exchanged stock on the basis of 1 share of South cla for 5 shares of South Columbus, and 1 share of South Hecla for 5 shares Alta-Hecla.

Assets at end of 1918 totaled $627,420, including $202,534 for property, $236,- for treasury stock, and $51,662 discounts. Net earnings in 1918 amounted $69,849, all from ore sales, and exclusive of $3,855, royalties received. Initial idend, 15c per share, paid August 10, 1916; last dividend, 15c a share, paid tember 5, 1919.

Property: 41 claims, partly patented, 584 acres, in the Little Cotton- od district. Claims carry 8 well-defined ore-bearing fissures in granodiorite limestone, running N. 70° E., dipping 70° N. and contact deposits between estone and granite. The 3 orebodies under development, one in the Kate yes, the others in the Wedge fissure, are reported by the management to rage 20′ in width, and to carry malachite, azurite and tetrahedrite in the face zone, succeeded by chalcopyrite, galena and sphalerite, estimated by the nagement to average 1% copper, 15% lead, .05 oz. gold and 35 oz. silver per . No. 1 shoot of the Kate Hayes is 940′ long; No. 2 proven for 300′ long.

Development: is by two main working tunnels, the Quincy and Dwyer: Dwyer, 2,000′; Alta-Quincy, 1,800′; South Columbus, 1,400′; Rustler, 1,200′; tt, 1,700′; Neversweat, 150′, and the White, of 700′. The mine as a whole has ut 7 miles of workings, lighted by electricity; new work in 1918, totaled 3′. Main development during 1918 was on the 500′ level of the Wedge vein, ch was opened up for 160′ above the 500′ level. A total of 4,000 tons shipped 1918 averaged 0.02 oz. gold, 10.4 oz. silver, and 5.3% copper. Milling ore s opened on other levels, but management desired to stope only smelting ore. May, 1919, a new body of sulphide ore was reported found in the Dwyer nel.

Equipment: includes a 60-h. p. electric plant, with a 10-h. p. hoist good 200′, and a 2-stage compressor. Buildings include a shop building, housing thy, machine and carpenter shops, with a 3-story boarding house and 5 ellings.

Production: company in 1916 shipped 7,962 tons of ore containing 267 gold, 164,619 oz. silver, 1,236,357 lbs. lead, 55,366 lbs. copper, 738,473 lbs. zinc 782,059 lbs. iron. Lessees marketed 1,097 tons of ore containing 34 oz. gold, 93 oz. silver, 218 lbs. lead, 5,361 lbs. copper, 157,854 lbs. zinc, and 47,089 lbs. n. In 1918, combined output by company and lessees was 9,232 tons ore, ding 165 oz. gold, 112,920 oz. silver, 238,985 lb. lead, 577,773 lb. copper, 137,556 zinc, and 4,261,888 lb. iron.

In 1919 the output was 7,703 tons of ore yielding 107 ounces gold, 77,029 ces silver, 51,424 lb. lead and 361,428 lb. copper, all of a gross value of $140,299. t yet operations show a loss of $5,554.

PARK MINING & DEVELOPMENT CO. **UTAH**

O. A. Relf, pres.; J. Tracy Wootton, sec.-treas.

ly 24, 1916. Cap., $50,000; shares 5c par; assessable. Last assess-

ment, ½c a share, delinquent, September 27, 1919. $3,000 issued. Listed in Salt Lake City.

Property: 17 claims, 14 patented, in American Fork mining district, said to show iron carbonate containing silver and lead.

Development: by tunnels, crosscutting the formation. Work has usually been suspended during the winter months, and resumed in May. At that time in 1919 main tunnel had a length of 700', and a drift was started on an orebody showing 450' from the portal.

SWASTIKA MINING CO. UTAH

A. H. McKnight, pres.-mgr.

Operates a property in Honeycomb gulch, near Alta, formerly owned by Bishop L. G. Hardy, of Salt Lake City. Reported to have opened a large deposit of low-grade ore by several thousand feet of workings.

TAR BABY MINING CO. UTAH

Office: 523 Atlas Block, Salt Lake City, Utah. **Mine office:** Alta, Salt Lake county, Utah.

Officers: J. M. Matsen, pres. and gen. mgr.; R. W. Savage, v. p.; W. [illegible] Grundy, sec.-treas.; A. P. Davidson and J. W. Brewer, directors; H. D. Green, supt.

Inc. 1911, in Utah. **Cap.,** 500,000 shares, increased June, 1916, from 400,000; 20c par; outstanding, 483,000 shares. Listed on Salt Lake City Exchange. Shares 1½c. low, 5¾c. high in 1918; 2c.-7½c. in 1919. Assessment No. 21, 1c per share, levied in February, 1920.

Property: 6 claims, in the Alta-Cottonwood district, on the south side of Big Cottonwood. The purpose of the enterprise is to cut the Cardiff lime-quartzite contact by working through the Victor company's tunnel, whereby an additional depth of 500' will be gained. No ore in commercial amount has yet been found.

TEXAN MINING CO. UTAH

Office: 400 W. 7th South St., Salt Lake City, Utah.

Officers: Chas. Tyng, pres.; Frank Nelson, sec.

Inc. in Utah. **Cap.,** $1,000,000; shares $1 par; outstanding, 825,000. Listed in Salt Lake City. Share prices 1c-8c in 1918. No quotations, 1919.

Property: 200 acres in American Fork district, said to show silver-lead-copper-gold ore. A tunnel was driven over 1,000' in the Texan mine, which the Miller Hill tunnel is in 2,100'; both tunnels are in quartzite. No commercial orebodies have yet been found. Probably idle.

THOR MINING CO. UTAH

Merged, 1916, with Great Western Gold & Copper Co. and Mountain Lake Mining Co., with title of Great Western Mines Co., which see.

TRIANGLE MINING CO. UTAH

Went into receiver's hands, Jan., 1919. N. W. Haire, receiver, 411 Felt Bldg., Salt Lake City, Utah. **Mine address:** Alta, Utah.

Officers: Howard C. Fields, pres.; Wm. C. Stewart, v. p.; Irma L. Fields, sec.-treas.; Howard H. Fields, mgr., with Harry A. Marsh and Wm. [illegible] Lidvall, directors.

Inc. July 15, 1917. **Cap.,** $25,000; shares $1 par; 6,201 outstanding. Operated as a close corporation. Annual meeting, first Saturday in September.

Company operated a lease on part of the property of the Michigan Utah Consolidated Mines Co., which see.

Production: in 1915 was 2,000 tons; in 1916, 5,000 tons averaging $[illegible] per ton.

UTAH CENTENNIAL MINING CO. UTAH

Address: Pleasant Grove, Utah.

Officers: J. E. Thorne, pres.; L. L. Nelson, v. p.; D. Noble, sec.-treas.; J. W. Thorne, J. E. Thorne, C. Thorne and L. L. Nelson, directors.

Inc. 1907. **Cap.,** $1,000,000; shares 5c par; outstanding, 250,000 shares, assessable; last assessment, $5 per 1,000 shares, called in May, 1919. Annual meeting in April.

Property: [illegible] American Fork Canyon, American Fork district.

ure vein carries gold, silver, lead, copper ore. Developed by a 450′ tunnel reported to have struck a few inches of high-grade silver-lead ore. Property prospect undergoing development.

TOR MINING CO. **UTAH**

Address: 702 McIntyre Bldg., Salt Lake City, Utah.

Officers: C. R. Greene, pres. and gen. mgr.; Lee Case, v. p.; R. B. kin, sec.-treas., with H. V. Greene, and E. C. Davies, Jr., directors.

Inc. in Utah. **Cap.**, $20,000; 5c par. Listed on Salt Lake Exchange.

Property: adjoins the Tar Baby and Cardiff in the Alta-Cottonwood rict. After driving a crosscut, work was stopped owing to war conditions. 1919, the company started development work through the Tar Baby tunnel. perty examined by J. Fewson Smith.

SATCH MINES CO. **UTAH**

Office: 713 Judge Bldg., Salt Lake City, Utah. **Mine office:** T. W. ce, supt., Alta, Salt Lake county, Utah.

Officers: A. H. Cowie, pres.; A. C. Ellis, Jr., v. p.; W. O. Williams, sec.-s., with H. G. Williams, W. S. Cooper and L. K. Cowie, directors.

Inc. Feb. 8, 1913, as a merger of the Columbus Consolidated Mining Co., gstaff Copper Co., and Superior-Alta Mining Co. **Cap.**, $1,000,000; shares ar; issued 358,905 shares; assessable, limited to two 5c. levies a year. Consoli-on of these properties was effected on the basis of 160,000 shares for Colum- Consolidated Co., 100,000 shares for Flagstaff Co., and 40,000 shares for erior-Alta. Stock is listed on the Salt Lake Stock Exchange. McCornick & Salt Lake City, registrar. Annual meeting, second Thursday in June.

Property: 60 claims, 40 patented, about 900 acres, and millsites at Tan-s Flat and at the mouth of Little Cottonwood canyon, on the E. flank of the satch mountains.

Geology: claims show a number of fissure veins cutting through lime-e, shale and quartzite; also numerous bedded and contact deposits between stone and quartzite. The bedded deposits contain the principal orebodies, ch range from 30 to 100′ in width, several hundred feet long, and carry up 1% copper, 18% lead, 15% zinc, 66 oz. silver and $4 gold per ton. Outside he shoots the ore is generally pockety and mainly below payable tenor.

The Flagstaff group carries several ore channels, one of which is said to ge up to 300′ in width and to be traceable 2,000′, and is developed by the 0′ Tom Moore tunnel. This tunnel also cuts 6 smaller veins and has a 450′ scut to the N. E., with about 13,000′ of workings. Other workings include 500′ Burgess tunnel, 1,200′ Burnswood tunnel, 1,200′ Flagstaff tunnel, and 700′ Flagstaff shaft. The mine was a notable producer of silver-lead car-ates in early days.

The Columbus Consolidated group shows a vein, known as the Braine ire, of about 12′ average width, opened by 2 tunnels, 1,250′ apart, on prac-ly the same level.

Development: about 3 miles of workings connected with the main 5,100′ nage tunnel, 4,000′ down the canyon, planned to unwater the Columbus and ining properties. The Holland and Columbus tunnels are connected on the ne fissure, the first-named with electric traction. There are also 3 other els and several shallow shafts. The output consists of copper ore, silver-ore and concentrating ore. The mine is wet and has a 600-gal. pump.

Shipments have assayed from 34c to 70c gold; 8 to 51 oz. silver; 5 to 6% ; 5 to 14% copper, 6 to 14% excess iron per ton, yielding from $20 to $60 ton.

A Pelton water wheel works under a head of 494′, taking water through [redacted] 22″ steel pipe line of 4,500′ length, developing 660 h. p., which is trans-[redacted] into electricity by two 300-k. w. dynamos and carried to the mine by a [redacted] transmission line. At the mine there are four 25 h. p. hoists good for [redacted] 3-drill Nordberg and two 5-drill Ingersoll-Sergeant air compressors, [redacted] and a sawmill.

[redacted] concentrator is equipped with a Gates gyratory crusher, 2 sets

[illegible] Rogers rolls, six 3-compartment jigs and 7 Wilfley tables, the [illegible] about 4 or 5 tons into 1. A cyanide unit was installed in 1915.

Development work above the tunnel level proved disappointi[ng]. management has concentrated all energy on the deep drainage tu[nnel] driven 5,000', about 500' below the present lowest workings and which deep mining easy and profitable; the tunnel is from a few hundred [feet] to other properties in the district. Company derives sufficient funds operating expenses from the sale of electric power and compressed air of the mines in the district.

In November, 1919, the main tunnel was in over 5,100'. Progress limestone is 7-8' daily with 2 shifts.

WASATCH UTAH MINING CO.

Company probably out of business as mail was returned, 1919, from addresses: Kearns Bldg., Salt Lake City, and mine office, R. D. No. 4, Utah.

Officers: at last accounts, F. L. Palmquist, sec.-treas.; J. L. Kr[ause], Meeds, A. W. Manz, J. Hyldahl, E. Tressing, Asa Bacon, J. W. Reibm[an] directors.

Inc. October, 1902, in Nevada. **Cap.**, $1,000,000; par $1; assessab[le] issued.

Bonds: authorized, $100,000; issued, $35,000. Annual meeting, [3rd] Monday in June.

Property: 51 claims, 14 patented, known as the Consolidated Je[ff] mine, 9 miles from railroad, near mouth of Little Cottonwood canyon 40 acres dumping ground. Mine has two systems of veins, a narrow fissure in hornblende schist with high-grade gold, silver and copper ore, large N.-S. quartz fissure about 8' wide containing ore running from $2 gold per ton, which is all milled.

Development: by adit and glory-hole into 500' stope.

Equipment: includes compressors, buildings, experimental 5-stan[d] with Wilfley and vanner, large mill with crusher, Chilean mill, plates and [a] amalgamator.

WEST TOLEDO MINES CO. U[tah]

Office: 146 S. West Temple St., Salt Lake City. **Mine office:** Alta, [Utah]

Officers: A. L. Hurley, pres.; J. A. Foley, v. p.; E. W. Hulse, sec.-t[reas.] with A. O. Jacobson and P. M. Magregor, directors. J. A. Foley, mgr.

Cap., $50,000; shares 10c par; outstanding 452,000 shares. Listed on Salt Lake Stock Exchange. Shares 2c-11c in 1918; 3c to 14c in 1919.

Property: 11 claims in the Little Cottonwood district, Salt Lake co[unty]

Development: chiefly by the Superior and Frederick tunnels which to be extended to cut several known mineralized veins. The Frederick [tunnel] is over 3,000' long. Grade of ore so far found is reported to be low. Pr[operty] is in a line with Cardiff and South Hecla in both of which the overthrust [fault] has proven ore bearing. Developing in 1919.

WHIRLWIND CONSOLIDATED MINING CO. U[tah]

Office: 400 W. 7th St., Salt Lake City, Utah; Harry Kreuse, [pres.] American Fork, Utah.

Officers: Chas. Tyng, pres.-mgr.; Frank K. Nelson, sec.

Inc. April 24, 1916, in Utah. **Cap.**, $250,000; shares 25c par; [all] shares issued. Listed on Salt Lake Exchange. Shares 1c-5c in 1918; [$]1 in 1919.

Property: 7 claims, unpatented, 110 acres, in the American Fo[rk] ing district, adjoining the Miller Hill on the West, 20 miles from a rail[road] to show silver-le[ad]

Developme[nt] [illegible] tunnels; one 1,000' long was reported to [be] [illegible] lead carbo[nate] [illegible] 500 in.

[illegible] was planned and stock offer[ed] [illegible] formation, presumably [in]

DLAWN COPPER MINING CO. **UTAH**

ice: 305 Atlas Blk., Salt Lake City, Utah. Mine near Brighton, Salt unty, Utah.

cers: H. W. Lawrence, pres.; E. S. Hills, v. p.; George N. Lawec.-treas.; W. J. Lawrence, mgr., with C. R. Long, directors.

. 1899, in Utah. **Cap.**, $700,000; shares 10c par; assessable. Listed Lake Exchange.

roperty: 7 claims, patented in the Big Cottonwood district, 18 miles a railroad, show lead, zinc, silver and copper ore, whose value is mainly id.

Development: work was resumed in 1915, after an idleness of several : the main tunnel was 1,650′ long in September, 1919; there are also sevshorter tunnels. Various fissures cut by the main tunnel are being explored ifts, raises, etc., and some good ore sacked and shipped.

BINGHAM DISTRICT.

INE GALENA MINING CO. **UTAH**

)wned and operated by Alpine and Provo men.

Property: in Alpine Canyon, near Bingham, contains ferruginous lead n bunches in black limestone.

Development: by 312′ tunnel and incline shaft. Planned to drive tun- reach blowout 350′ below surface. No recent report; probably idle.

GHAM AMALGAMATED COPPER CO. **UTAH**

ully described in Volume XIII. Succeeded by United Bingham Copper which see.

GHAM ANACONDA COPPER CO. **UTAH**

lail returned, 1918, from former address, 11 Main St., Salt Lake City. Mine in Markham Gulch, Bingham, Utah.

Officers: E. McCarrick, pres.; B. B. Gray, v. p.; P. L. Meyers, sec.- : above, with A. Gustaveson and R. E. L. Collier, directors.

Cap., $1,000,000; shares 10c par. Owns a group of claims in Bingham ct. Probably idle.

GHAM CENTRAL MINING CO. **UTAH**

dle. At Bingham Canyon, Salt Lake county, Utah. This company and lingham Standard Copper Co. were controlled by the Bingham Central ard Copper Co., which sold its stock holdings, 1909, to Utah Metal Min- o., receiving stock in latter company which is now controlled by the Utah & Tunnel Co., which see. Described Vol. X.

GHAM CENTRAL STANDARD COPPER CO. **UTAH**

rganized as a holding company, controlling, through ownership of prac- entire stock issues, the Bingham Central Mining Co. and Bingham Stan- Copper Co. Sold these subsidiary stocks, 1909, to the Utah Metal Mining or 300,000 shares of latter, which was escrowed until 1911 and extended payment of 10,000 additional shares until November 8, 1912, and subse- y to January 1, 1914, to permit building by Utah Metal Mining Co. of a 0 aerial tramway from the western end of the big tunnel to the Interna- at Tooele. On release of escrow, 1914, company was to be wound by minority stockholders, who attempted to recover property, disposition of the company's assets. Stock valueless.

COALITION MINES CO. **UTAH**

Exchange St., Portland, Me. **Mine office:** Bingham Can-

ler, pres., Springfield, Mass.; H. P. Sweetser,

Cap., $1,000,000. increased 1916 to $1,500,000; $1

par. Bonds, $150,000. Stock listed on New York and Boston Curbs. State Street Trust Co., Boston, and Registrar & Transfer Co., New York, registrar and transfer agents.

Property: is a merger of the Butler Liberal, Red Wing, and Massasoit properties, about 50 claims, in Markham and Freeman gulches. The claims carry the Florence Erie, Julian, Red Wing and other fissures, all of them good producers in the upper levels.

Development: by crosscut tunnels with about 5 miles of workings cutting the above named fissures (veins) containing lead ores with silver, copper, and gold values. **Equipment:** includes 200-ton Red Wing mill.

Production: in 1917 was 127 oz. gold, 29,249 oz. silver, 57,684 lb. copper and 1,625,830 lb. lead. No later figures received.

BINGHAM COPPER BOY MINING CO. UTAH

Out of funds and idle several years, with no sale or market for the stock so far as known. See Vol. XI, Copper Handbook.

BINGHAM EMPIRE MINES CO. UTAH

Officers: Jesse Knight, pres., with A. M. Knight, W. L. Mangum, S. S. Jordan, G. A. Storrs, E. G. Jensen, directors.

Inc. July 31, 1915, in Utah, for development of property in the Bingham district. **Cap., $10.000**; shares 1c par; 484,000 shares in treasury.

BINGHAM MINES CO. UTAH

Office: 60 Congress St., Boston, Mass. **Operating office:** 404 Dooly Blk., Salt Lake City, Utah; Joseph Hyland, supt., Lark, Utah.

Officers: Jas. P. Graves, pres.; Henry N. Sweet, v. p.; M. K. Billings, sec.; Thos. S. Woods, treas., with Alfred B. White, Arthur W. Chesterton and Lewis B. McCornick, directors. Imer Pett, gen. mgr.; Fred R. Sands, purch. agent.

Inc. April 6, 1908, in Maine. **Cap., $1,500,000**; $10 par; all issued.

Is a reorganization of the Bingham Consolidated Mining & Smelting Co., stock being exchanged, share for share, on payment of $3.50. Controls about 95% of the outstanding stock of the Eagle & Blue Bell Mining Co., a dividend payer, of Eureka, Juab county, Utah; also controls the Yosemite Mines Co., of Bingham Canyon, Salt Lake county, Utah. Purchased the entire capital stock of the Victoria Cons. Mng. Co. in 1914 and the property was conveyed to the Bingham Mines Co. in November, 1917. The Victoria property consists of 4 acres mineral land at Eureka, adjoining the Eagle and Blue Bell.

First National Bank, Boston, and Chase National Bank, New York, registrars. Federal Trust Co., Boston, and Guaranty Trust Co., New York, transfer agents. Stock listed on Boston Stock Exchange and New York Curb. Sold in 1919, at $10¼. Annual meeting, third Wednesday in April, at 97 Exchange St., Portland, Maine.

Company has liquidated its bonded indebtedness of $1,480,790, besides having paid for the property of the Victoria Cons. Mng. Co.

Comparative Balance Sheet:

Assets—

	Real Est. & Mines	Cons. & Equip.	Mining Stocks	Cash & Loans	Accts. Rec.	Supplies Ins., etc.	Tot

gain and income	$164,272	$515,802	$185,759

Dividends: initial dividend of 50c and Red Cross dividend of 25c a share, July 2, 1917; 50c paid October 5, 1917; 5 dividends of 50c, or $2.50 in 1918, two dividends to October 1, 1919, a total of $4.50 per share, or nominally nually. Total is $674,500.

Property: the Dalton & Lark and Commercal mines, 60 claims, pat-l, 430 acres mineral land, in the Bingham district, and 596 acres non-mineral . Also 92% of Eagle & Blue Bell Mining Co. and control of Victoria Cons. Co. at Tintic, as already noted, and the Yosemite Mines Co.

Development: at Dalton & Lark and Commercial mines is extensive, being many miles of workings. New work in the first named in 1918 nted to 2,755', compared with 3,670' in 1917. The Commercial mine has een worked for 3 years. It is considered that a large quantity of ore will veloped in the Brooklyn, Lead Mine, and Lark veins below the Mascotte l. Lessees extract ore from old workings in the Dalton & Lark and Com-ial, and shipped 4.862 tons during 1918, yielding the company a royalty of 53. In 10 years they have produced 1,332 oz. gold, 481,258 oz. silver, 2,060,088 ad, and 7,960,157 lb. of copper.

Equipment: at Dalton & Lark—25-h. p. steam plant, hoists, 25-drill ressor, shops, etc., and spur line with electric locos connecting with the R. G. At Commercial, hoist, 10-drill compressor, and other machinery, all ically driven.

Production: of Dalton & Lark, exclusive of lessees:

Ore, tons	Gold oz.	Silver, oz.	Lead, lb.	Copper, lb.

Working Capital:

Year	Current assets	Current liabilities	Net current a
1918.....	$156,121	$34,548	$121,57
1917.....	264,933	86,534	178,39
1916.....	67,580	.....	.....

Dividends: 20 cents in 1913; 15 cents in 1914; 15 cents in 1915; 10 ce in 1916; 40 cents in 1917; 30 cents in 1918; 10 cents in 1919. The total to of 1919 is $1,250,405.

Property: 17 patented claims, 73 acres, includes a 9-acre millsite carry ing the water right to a spring having a flow of about 30 gal. per minute. La lie between the Centennial-Eureka, Victoria and Chief Consolidated mines the Victoria-Grand Central ore zone, in the Mammoth Limestone.

Geology: chamber deposits in limestone, carry silver-lead ores co taining gold and some copper. The lime is cut by numerous fissures, at angles, with mainly vertical dip, carrying pipes, shoots and erratic deposits ore at the intersections of fissures and bedding planes, in massive blue lime The mine has considerable bodies of silicious copper ore, lead sulphides and c bonates. Pay shoots vary from 6 to 100' in width. Average assays of dry 0.230 oz. gold, 12.99 oz. silver; 0.31% copper; lead ore assayed: 0.13 oz. gold, oz. silver and 17.05% lead.

The mine workings indicate 4 separate ore channels striking northerly southerly, and occasionally joined together by immense ore deposits made a easterly and westerly cross faultings. The ore occurrence shows a great larity throughout, giving the zone a width of over 600', but each channel parently has its characteristic mineral association.

History: according to C. H. Blanchard, pres. of the D. & B. Mines C ore was discovered by 30' shaft, and mill erected before ore development rranted, with consequent abandonment. Relocated several times, and pro developed by 1,200' tunnel, that eventually found downward extension shoot cut by sha Profitably worked till panic of '93; later reopened and ore in sight ta nd mine was idle until sold to Bingham Mines C who sank deep tunnel; extracted all ore in sight and ran into (for $400,000; Weeks assumed debt, taking company notes Owens as supt. New management the 1,000' level and found of Tintic. last few years; the

nt shaft is 2,018′ deep, with levels at 700, 1,000, 1,350, 1,550, 1,700 and 1,875, l blind levels at 1,100, 1,200, 1,300, 1,425 and 1,538′.

In 1918, two main deposits supplied most of the output. One of these is the 50 orebody, which, although irregular in occurrance, extends up to 1,350′ and on to 1,845′. Stoping is over 900′ long. The other orebody is in the North tension claims, and is found mainly below the 1,000 north drift. Stoping on ; ore is also extensive, but its full size is not yet known. New work in 1918 aled 5,519′, compared with 4,783′ and 3,086′ in the two previous years.

Equipment: includes a 180-h. p. double-drum hoist, good for 2,000′ th, a 100 h. p. tubular boiler and a 4x6″ electric triplex pump. The mine was trically equipped throughout and a 250 h. p. air compressor and 225 h. p. tric hoist installed in 1916. Electric power is supplied by the Utah Power & ht Co.

Production:	Ore, tons	Gold, oz.	Silver, oz.	Lead, lb.	Copper, lb.

Victoria Consolidated Mining Co.

Owned by Bingham Mines Co. Mine at Eureka, Tintic district, Juab county, h.

Property: the Snowflake and Victoria mines, 7 patented claims, 49 s, at Eureka, which contain chamber deposits of silver-lead ore in limestone. ore shoots and streaks are of variable size, up to 100′ in width. Copper, rring as chalcopyrite and tetrahedrite is found with the galena.

Development: includes 1,200′ shaft with several thousand feet of work- . Has compressor, 112 h. p. hoist, and uses electric power. Property is oper- through No. 1 shaft of the Eagle & Blue Bell. New work in 1918 amounted 313′, opened a disappointing tonnage of new ore.

Production:

r	Ore, tons	Gold, oz.	Silver, oz.	Lead, lb.	Copper, lb.	Net profit

Yosemite Mines Co.

Subsidiary of Bingham Mines Co.

Property: 12 claims, patented, in the West Mountain mining district, *ham* Canyon, Utah.

Development: by the Yosemite shaft connecting with the Mascotte el on the 2,200′ level and the 1,650′ Paradox tunnel. In 1918 new work led 1,799′. Greater depth was attained on the two ore-shoots in the Lead vein, but conditions were found to be much the same as on the upper levels. annual report for 1918 says: "The results so far attained in the development is property are by no means satisfactory."

Production:

BINGHAM-NEW HAVEN C. & G. MNG. CO. UTAH

Absorbed by the Utah Metal & Tunnel Co., and property described there under.

BINGHAM-TOOELE MINING CO. UTAH

Address: 307 Utah Svgs. & Trust Co., Salt Lake City, Utah.

Officers: S. D. Huffaker, pres.; H. L. Dodd, sec.-treas.; M. T. Awoki supt., Box 136, Bingham, Utah.

Inc. May 27, 1915, in Utah. **Cap.,** 100,000; 10c par; assessable.

Property: 13 claims, 187 acres, in Middle Canyon, Tooele county Company was driving a tunnel, 1,600′ long, in May, 1919, to "encounter a lo anza" of copper ore. Is a prospect.

CONGOR GOLD & COPPER MINING CO. UTAH

Office: 506 Auerbach Bldg., Salt Lake City, Utah. Mine near Bingha Canyon, Salt Lake county, Utah.

Officers: Glen R. Bothwell, pres. and gen. mgr.; R. C. McCona v. p.; Frank E. Loose, sec., with E. F. Jenkins and C. G. Hall, directors, a accounts.

Cap., $1,000,000; shares $1 par.

Property: 10 claims, 150 acres, adjoins the Bingham Amalgamat on the north, in Bingham Canyon, Salt Lake county, Utah. **Developing** 3′ ve from 4,000′ tunnel of Montana Bingham Co., working about 100′ from face tunnel. Mine reported to have about 100,000 tons of ore exposed, running fro $6 to $50 per ton and averaging $14.

Company had a contract with the Montana Bingham Consolidated Mi Co., shipping its ores through the Miller Ore Transportation tunnel of th company to the Denver & Rio Grande railroad tracks at a cost of 25c per t of ore and 12½c per ton of waste. Probably idle.

EAGLE & BLUE BELL MINING CO. UTAH

A subsidiary of Bingham Mines Co. and described thereunder.

FORTUNA MINING & MILLING CO. UTAH

Inactive and property sold to Montana Bingham. See Vol. XIII.

GENERAL EXPLORATION CO. UTAH

Alfred Frank, gen. mgr., Newhouse Bldg., Salt Lake City, Utah.

Officers: Alfred Frank, pres.; E. L. Newhouse, Jr., v. p.; O. Ba berger, sec.-treas. (all of Salt Lake City), with John MacGinniss, of Butte, d rectors.

Inc. in Utah, in June, 1915. **Cap.,** 10,000 shares: $1 par; 7,500 st standing.

Company operated the Ohio Copper Co. property until it was taken ov the reorganized Ohio Copper Co. of Utah. Royalties aggregating upwards $500,000 were paid, and lessees are said to have made large profits.

GREAT DIVIDE MINES CO. UTAH

Inactive. **Office:** 521 Atlas Block, Salt Lake City, Utah.

Inc. Aug. 15, 1903, in Utah. **Cap.,** $2,000,000; $5 par. Company co trolled Western Mining & Milling Co. and Homestead Tunnel & Copper Co.

Property: 108 claims, mainly patented, 1,735 acres, 600 considered well mineralized, with 160 acres mill and smelter sites, lying on the Tooele s of the Oquirrh mountains and on the summit of the range, west of the h of the Utah Consolidated. Property shows Cambrian quartzite, monzo porphyry and altered limestone, with a number of fissure veins and contact posits between limestone and quartzite. Claims cover 11,600′ on the west course of the mineralized limestone beds of Bingham. This tract is 21/ from E. to W. and 10,800′ N. S., and contains the apexes of many ore-bea fissures, and the westerly extensions of the ore-bearing limestone bed in the Utah Consolidated, Bingham New Haven, Utah Apex and Yanq

Development: includes the 400′ Homestake tunnel in Pine Cr 525′ North tunnel at 6,600′ elevation, and the 2,457′ Spring tunnel. Th nels are prospect work only, but ore is cut in the last named at 1,050′ a a 5′ width for 40′ along the drift and in a 25′ raise. A vertical E. W. fis

le is also cut at 2,250′ from the portal and shows kidneys and stringers of er-lead ore.

Equipment: includes a 35-h. p. electric plant, with a 1-drill compressor, l there are 10 buildings, including a small power house, 2 smithies, a bunk se, stable and dwellings. Electric current is taken from the Telluride Power . over this company's private line from the sub-station at Bingham. Prop- y was under lease and bond to the Homestake T. & C. Co., which expired y 1, 1919. No later information.

GHLAND BOY GOLD & COPPER MINING CO. **UTAH**

Controlled by Utah Cons. Mining Co., and described under that title.

TERMOUNTAIN MINING & INDUSTRIAL ASS'N **UTAH**

Thos. B. Crawford, sec., Ouray, Colo.

Inc. 1905, in Arizona. **Cap.**, $5,000.000; par $1.

Property: Mystic Shrine group of claims, at Bingham, which adjoins perty of Utah Copper Co. Evidently idle, and for sale.

YSTONE EXTENSION MINING CO. **UTAH**

Mine near Bingham, in West mining district, Salt Lake county, Utah. Com- y inactive for some time owing to heavy flow of water in mine workings. perty covers about 3,000′ of the Keystone vein outcrop and shows ore said to rage $14 per ton in gold, silver, lead and copper values, from surface down ottom of 165′ shaft.

Development: by inclined shaft with drifts on vein opening up stopes m which shipments have been made. The Montana Bingham Consolidated ing Co. was to open the ground by its deep tunnel, thus eliminating pumping ts and heavy wagon-haul charges on ore shipped.

NERAL LANDS CO. **UTAH**

Idle. **Office:** 102 Exchange St., Portland, Me. Carl W. Smith, treas. **Inc.** 1913, in Maine. **Cap.**, $100,000; $5 par. Company owns large in- st in Bingham Coalition Mines Co., also Vespasian-Hoogly group of claims Markham gulch, Bingham, and other mining interests. Treasurer reports, rch, 1919, that company has a substantial surplus.

NTANA-BINGHAM CONSOLIDATED MINING CO. **UTAH**

Office: 66 West Broadway, Salt Lake City, Utah. **Mine office:** Bing- Canyon, Utah. J. Benton Leggatt, gen. mgr.

Officers: C. G. Ballentyne, pres. and mng. dir.; E. A. Vail, v. p.; J. B. sman, sec.-treas., with W. E. Hubbard, Imer Pett, L. B. McCornick, and . Leggatt, directors.

Inc. July, 1910. **Cap.**, $3,000.000; $1 par; issued, 2,385,802; assessable. assessment of 10c a share, levied March, 1918; one of 3c in November, 1918, a third, 2c in May, 1919. Annual meeting, first Tuesday in March. Owns 00 shares of Bingham Amalgamated C. Co stock. Debentures: $200,000, 6%: ,600 outstanding; due June 1, 1918; extended to June 1, 1919.

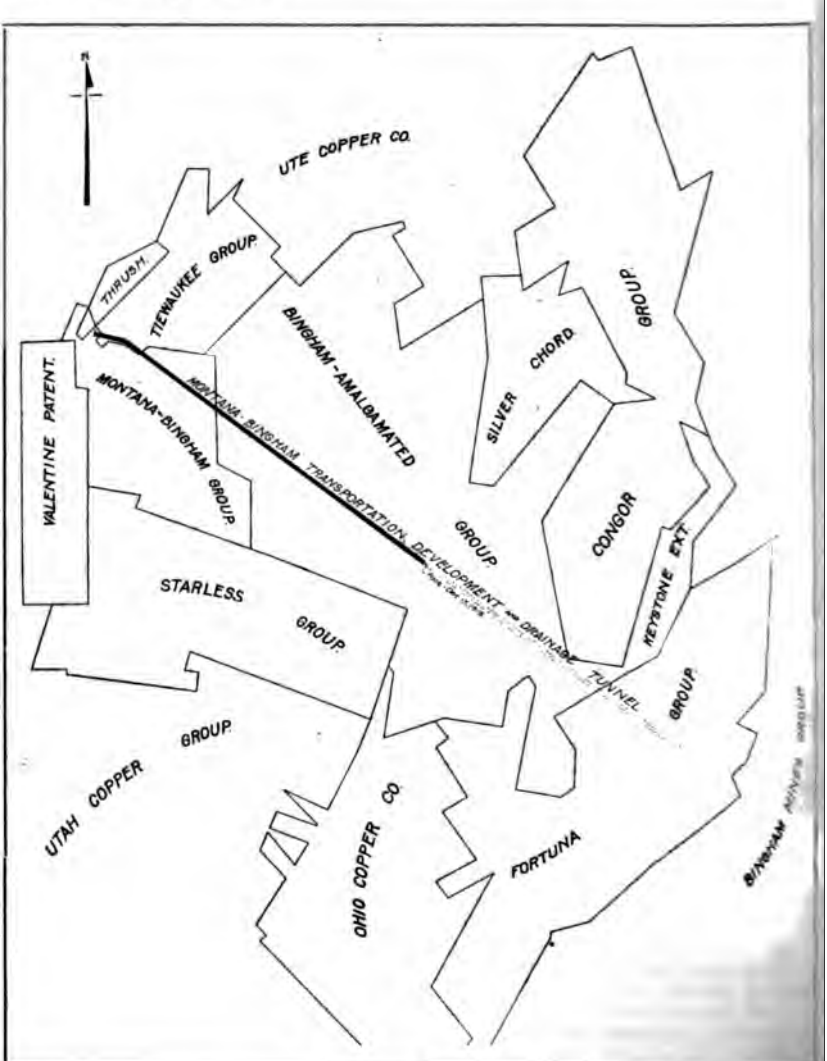
Financial statement, June 30, 1919, shows fixed assets of $3,428,756; invest- t in the B. A. C. Co., $52,650; cash, $14,645, with total current assets of 22. Liabilities included $120,066, accounts, notes, interest, and taxes; this des $75,000 balance due on purchase of Fortuna mine.

Income statement for year ending December 31, 1918, shows: total income, 40, of which $31,325 was from ore sales. Office and administrative expenses d out, $31,548, or 82%; of this $13,500, or 35%, was the president's salary, $5,560, general office salaries. Mine labor totaled $53,043, and total expendi- s for mine and mill was $135,481. Total income for first 6 months in 1919 $8,008.

Profit and loss statement for 1918 show a charge of $10,000, "special com- ation to president—for surrender of life position in Honolulu, for loss ugh sacrifice sale of personal effects and property, and to cover expenses of ing to Salt Lake City," he also received 50,000 shares of capital stock as part ensation.

In 1919, a committee representing the minority stockholders' interest was rumental in causing the cancellation of the contract which employed the dent and general manager for five years with a salary of $15,000 per annum

for two years and $25,000 per annum for three years thereafter, of which contract a little more than one year had run; also has been instrumental in causing economies in the overhead expenses of the company to the extent of several hundred dollars per month."



PART OF BINGHAM DISTRICT, UTAH

Property: consists of 335.5 acres, patented, in the West Mountain mining district (Bingham), Salt Lake county, Utah, comprising the Fortuna group of 23 claims, 170.8 acres, in the Keystone and Dalton gulches, and the David claims, 6.2 acres, underlying the town of Bingham; (2) the Eddie group of

ims. 50.3 acres in Bingham Canyon; (3) leases and options on the Valentine ent and Tiewaukee group, 10 claims, 114 acres, in Bingham Canyon.

The Montana-Bingham Transportation & Drainage tunnel over 5,540′ long, ers the mountain in the N. W. corner of the Eddie group, within 50′ of the & R. G. railway, and runs S. E. through the Eddie group, then through the ıgham Amalgamated Copper Co. group and the Congor Cons. Mng. com- ıy's ground to the Fortuna group. This tunnel crosscuts, nearly at right an- s, the Eddie and Cleveland veins of the Eddie group, the Copper Glance and ınifay veins of the Bingham Amal. group, the veins of the Conger group, the ester and Virtick veins of the Keystone Extension Co.'s group and the Sierra ande, Fortuna and Mayflower veins of the Fortuna group. The three last med veins, are cut 470′ vertically, or 1,400′ on the dip, below the lowest of the ong drift tunnels of the old Fortuna mine, but the S. rake of the orebodies ened in the old mine, carries them 1,700′ or more south of this tunnel. Ex- ısive lateral development was done to block out ore. The Mayflower vein this horizon shows an oreshoot estimated by the manager to be 700′ long, 22′ ck, and 1,400′ on the dip, equal to 1,500,000 tons of 2% ore with an equal ıount between the M. B. tunnel and the Mascotte (of the Ohio Co.), 550′ ver- ally below it.

Geology: the Fortuna group, the most important holding of the com- ıy, shows an intruded sheet of monzonite-porphyry in tilted series of quartzite d limestone beds, traversed by four nearly parallel veins following the strike d dip of the monzonite sheet or of the quartzite bedding, occasionally cutting ·oss and accompanied by some fracturing and crushing. These veins are to 25′ thick, and carry streaks and shoots of pyrite, with varying copper value, chalcopyrite and chalcocite. Southern workings have shoots of silver-lead ² and in Eastern end of workings lenses of ore occur that are 20′-50′ thick and ·ry 2% copper.

These veins are opened by the 4,200′ Keystone tunnel and 3 other tunnels mprising the old workings of the Fortuna mine.

Tiewaukee mine: 9 claims, 45 acres, is explored by a main tunnel, over 1,000′ ıg, cutting several bedded veins, large stopes of old workings north of it, con- n much milling ore. Pillars left in stopes show 18.9% lead, 6% copper, 27 oz. ver per ton. Tiewaukee shaft is 90′ vertical, connecting with a drift from the ain tunnel, while shaft continues as an incline on the bedded vein.

The Valentine mine, also in Bingham Canyon, has been an irregular ipper from an orebody assaying 4% copper. It has a 500′ tunnel and 225′ shaft, tting a vein of silver-copper ore.

Company has contracts with Bingham Amalgamated C. Co. and will receive % of net proceeds on all ore shipped through the tunnel; from Keystone Ex- ısion Mng. Co., 25c per ton of ore and 12½c per ton for waste; from Bingham- ngor C. Co., 15c p. t. of ore or waste; from Fortuna Mng. Co., 25c p. t. ore d 15c per ton for waste; also an agreement with Col. E. A. Wall to handle arless ores when drift from tunnel has been extended on one of Montana-Bing- m veins into Starless ground: 300,000 gallons water per day is flowing from nnel, which is valuable for milling, etc.

Production: Nov., 1918, to July 9, 1919, was 1,547 tons of ore yield- ¿ $20,720 net smelter returns. About half of this ore was mined by leasers.

Work was resumed in June, 1919, after a shutdown of four months. Ship- ents for 1919 totaled 4,763 tons of ore containing 220 oz. gold; 14,667 oz. ver; 99,051 lb. lead; 358,212 lb. copper, all of a gross value of $110,390. erations for 1919 resulted in an expenditure of $15,829 over and above ore urns.

EW ENGLAND GOLD & COPPER MINING CO. UTAH

Went into hands of receivers in 1915.

Office: 67 Milk St., Boston, Mass. **Mine office:** Bingham Canyon, Salt nty, Utah.

[illegible] S. Williams, pres.; E. E. Abercrombie, v. p. and managing [illegible] Bradstreet, sec.-treas.; preceding, with Woodford Yerxa, [illegible] Bancroft, directors.

Inc. June, 1899, in Colorado. **Cap.**, $2,000,000; shares $10 par; issued $1,294,467.

Bonds: $500,000 authorized, at 6%; issued, $390,000. Paid a 10% stock dividend, October, 1908. Federal Trust Co., Boston, registrar; Geo. F. Bradstreet & Co., transfer agents. Annual meeting, first Monday in June.

Property: the Bingham group of 9 fractional claims, 18 acres, in the Bingham, or West Mountain district, Utah, south of the Boston Consolidated and near the Utah Metals property. The company also owns a group of claims at Goldfield, Nev.

The old Nast mine of the Bingham group shows porphyry cut by 3 fissure veins, of 30" average width, opened by the 1,600' Nast tunnel and the 1,670' Benton tunnel, both in ore, and 2 shafts, 1 of 159', with a total of about 6,000' of workings. Ores said to average 30% lead, 10% zinc, 15 oz. silver and $4.50 gold per ton, with small and variable percentages of copper.

Equipment: includes a steam plant with 2 hoists, 1 of 30-h. p., good for 800' depth. The concentrator has a 4x12" crusher, 2 rolls, 2 Hartz jigs and 1 Wilfley table, operated by commercial electric current.

Production: was 2,108 tons of lead concentrates and 165 tons of copper ore, 1907, but property was closed down, late 1907; mine was worked on only a small scale, 1908 to 1910, securing 936 tons of ore, giving net smelter returns of $36,986. In 1910, the Utah Metal Mining Co. sued this corporation for $700,000 damages, alleging tresspass and illegal ore-extraction. A survey proved that company was not guilty of tresspassing and suit was cancelled.

In 1911 the mine produced milling silver-lead ore, yielding 150 tons high grade concentrates per month, netting the company $25,874. In 1913 output was reduced to 8,360 and the mine was shut down by reason of western creditors forcing their claims. The Trust Co. holding mortgage securing the bonds, foreclosed same, December, 1915, at request of the bondholders and a reorganization of the company was contemplated. Interest, amounting to $46,800 on bonds has not been paid since February 1, 1914.

NEW UTAH BINGHAM MINING CO. UTAH

Described in Vol. XIII. Property and assets acquired by New York Bingham Mining Co., which see.

NEW YORK BINGHAM MINING CO. UTAH

Acquired property and assets of New Utah Bingham Mining Co.

Office of treasurer: H. A. Bellows, Suite 711, No. 53 Park Row, New York City. **Mine office:** Bingham Canyon, Utah.

Officers: T. B. Beacher, pres.; H. A. Bellows, treas.; R. L. Reisch, sec.; with F. T. Bellows, J. W. Thompson, E. S. Burns and H. F. Hoevel, directors.

Inc. Nov. 19, 1918. **Cap.**, $200,000; shares 20c. par; 73,648 shares outstanding, March, 1920.

Bonds: of old company outstanding when property was taken over, $14,000. Stock was exchanged share for share. Annual meeting, November.

Property: 20 claims, 19 patented, 130 acres adjoining the Telegraph of the United States Mining Co., in Bingham Canyon, Utah. Claims cover about 3,000' along the footwall portion of the Jordan limestone ore-bearing zone of Bingham. The large orebodies of this district are found in fissures within limestone, or along limestone contacts, and the Jordan belt is the most productive of the 3 belts known in the camp; 16 fissure veins have been opened. Before the company acquired the property a number of promising veins carrying ore in the porphyry, but too narrow to be valuable, had been exposed. These veins pass into the limestone and are expected to have large orebodies at the contact. Ore is mainly silver-lead.

Development: consists of about 15,000' of work, mainly by 3 tunnels. In the Turngren tunnel, over 1,300' long, 8 veins from 1 to 4' thick have been cut, 7 showing ore and 2 of them worked. These two veins run north, are parallel and contain high-grade ore in the Spanish mine and along the outcrop in the company's ground. The Harrison tunnel, 600' long, is in quartzite and will crosscut the Rough and Ready veins, which are opened by 3 other tunnels higher

the mountain, all showing ore. Work on these veins has been discontinued and work concentrated on the Giant Chief.

The Giant Chief vein is a fault fissure, developed by a 200′ shaft from which ther exploration is being conducted on the 150′ level; 600′ of drifts and cross- s driven in 1915 from this point have at 800′ depth in the sulphide zone cut issures encountered in the higher workings. These veins carry oxidized ieral matter, surrounded by a soft lime, and show porphyry mineralized with ı pyrites. A small vein of carbonate ore, running nearly 50% lead, has been ned; the Bonanza tunnel was driven 977′ along the Giant Chief vein, and)ss it to reach the ore, 150′ deeper than where first opened.

Equipment: includes compressor, 180-h. p. electric plant, taking current n the Utah Power & Light Co., hoist and all necessary buildings.

Production: several cars of ore reported to have been shipped during past 2 years, running from 6 to 12 oz. silver, and 20 to 38% lead. Lessees working the lower tunnels.

Property is well adapted for tunnel work, has large blocks of virgin ground is considered promising. Company is an intermittent producer.

IAGARA MINING CO. UTAH

Is controlled by United States Smelting, Refining & Mining Co., which see.

RTH BINGHAM CONSOLIDATED MINING CO. UTAH

Office: Provo, Utah. Mine near Bingham Canyon, Salt Lake county, h. Jesse Knight, pres.; Wm. W. Matthews, v. p.; W. Lester Mangum, sec.- s., and J. Wm. Knight, directors.

Inc. June, 1907, in Utah. **Cap.,** $100,000; shares 10c par; assessable; ontrolled, through stock ownership, by the Knight Investment Co.

Property: 6 claims, in Barney Canyon, has a very wide ore zone, said ıow leached ore carrying traces of copper and up to $2.80 gold per ton.

Development: includes a tunnel of about 1,000′, and a 2-compartment t. Property is considered a good development proposition. Idle.

IO COPPER MINING CO. UTAH

Property sold at foreclosure sale, August, 1916, to representatives of bond- ers' committee and company reorganized as Ohio Copper M. Co. of Utah, h see. Also see Vol. XII.

IO COPPER MINING CO. OF UTAH UTAH

Office: 43 Exchange Place, New York. **Operating office and concen-)r:** Lark, Utah.

Officers: H. E. Rogers, pres.; Chas. A. Kittle, v. p.; E. S. Hooley, v. p.; e with J. H. Flagler, M. N. Buckner, A. R. Rogers, A. R. Peacock, Hugh n and S. B. Sherman, directors. G. M. Colvocoresses, gen. mgr. Jos. A. zman, sec.; S. K. Kellock, treas.-asst. gen. mgr.

Inc. Nov., 1916, in Maine, as a reorganization of the Ohio Copper ing Co., formerly the Ohio Copper Co. **Cap.,** $2,500,000; $1 par; ,625 shares issued. Listed on Salt Lake Exchange and on Boston Curb. York Trust Co., transfer agent. Price range 70c. to $1.05 in 1918; 35c. ic. in 1919.

Balance sheet as of December 31, 1918, shows: total assets, $2,676,732, which des: property, $2,096,793; stocks and bonds of Bingham Central Ry., 820; current, $118,108; prepaid insurance, interest, etc., $21,087; general t and loss-deficit, $112,925. Liabilities show: capital stock, $2,225,625; ır convertible 7% notes dated September 20, 1918, $250,000; current, $156,389; ry reserves, $44,718.

Profit and loss statement shows: total value metals produced, $817,210; cost roduction, $941,745; operating loss, $124,535; rents, interest received, etc., 9; miscellaneous expenses, $18,764; profit and loss deficit, 1918, $140,300. it, December 31, 1918, $112,924. Fire loss, due to burning of the mill, is as $104,233.

Revenue in 1919 was $188,599 from concentrates sold, and expenses were 386.

For detailed history of old company and the plan of reorganization, see XIII of the Mines Handbook.

Property: 14 claims, patented, 120 acres, bounded on the N. and W. by holdings of the Utah Copper Co., on the E. by the Montana Bingham Con. M. Co., on the S. by United States Mining Co., and on S. W. by the Boston Consolidated. The Mascotte tunnel, owned by the Bingham Central railway, a subsidiary company, charges toll on all ore hauled to the mills.

Geology: property carries a belt of quartzite 500' wide carrying 2 parallel veins known as the What Cheer and All's Well. These veins are not more than 500' apart, and separated by mineralized quartzite which constitutes the main orebody of the property, the ore averaging 1.015% copper. The quartzite which adjoins the laccolithic mass of monzonite-porphyry of the neighboring Utah Copper and Boston Consolidated properties, is much shattered and broken with ore disseminations and impregnations along shatter and cleavage planes, ore in the brecciated material being chiefly chalcocite and chalcopyrite, associated with pyrite, readily amenable to concentration, and lying above the level of the Mascotte tunnel.

Estimates of ore developed vary greatly, the former management claiming that ore had been developed under about 5 acres, the "porphyry" orebody being estimated as 400' wide, 1,000' long and 600' deep. One estimate gave 3,7[illegible] tons of ore developed with 9,738,690 tons of probable ore and the average [illegible] probably about that of the ore milled, or 1.01% copper. Proven ore reserves July 31, 1919, were 6,000,000 tons of 0.8% copper, with another large block of ore not yet fully developed that averages 1% copper.

The 14,000' single track Mascotte tunnel, connecting with the shaft at a depth of 1,100', cares for the large volume of water coming from the workings. The ore is blocked out in 100' squares, with extensive development on the 3rd, 5th and 7th levels, and the caving system is used in extraction. Ore is sent from the upper workings, through chutes, to a 4,000-ton ore-bin, 20' wide and 200' long, extending over both tracks; loaded in about 4 minutes from the bins into trains of 18 to 20 five-ton double-bottom steel cars, and hauled by electric locomotives to the concentrator at Lark.

The mill: at Lark, 3,200' from the mouth of the Mascotte tunnel. On August 10, 1918, fire destroyed the mill. It was rebuilt and operations were again started, October 1, and by February 23, 1919, the 5-unit flotation mill was completed. On March 10, 1919, all operations were stopped on account of the lack of demand for copper.

Production: in 1918 was 3,362,119 lb. copper, compared with 5,27[illegible] lb. in 1917. In 1918, there was also produced 5,290 oz. silver and 731 oz. gold.

Output in 1919 was 1,012,920 lbs. copper, 1,149 oz. silver and 96 oz. gold.

A special stockholders' meeting was called for September 10, 191[illegible] authorize an increase in the capitalization to 3,500,000 shares of $1 par, 1,000,[illegible] of which will be kept in treasury to provide for converting $1,000,000 7% [illegible] year bonds to be sold to further finance operations and retire $250,000 of the [illegible] year notes.

Reported, November, 1919, that a syndicate had underwritten $550,000 of the authorized bond issue.

With this financing successfully completed and if copper stays above the 20 cents per pound mark, it is expected that Ohio Copper will quickly be put on the permanently profitable basis outlined by President Rogers and made possible by moder[illegible] facilities.

PHOEN[illegible]NING CO UTA[illegible]

PINE C[illegible] & BIN[illegible] TUNNEL CO. UTA[illegible]

Office T[illegible] Lake City, Utah.

Office [illegible]ard Savage, v. p.; Homer Bea[illegible] 2nd v. p.; [illegible]

Inc. Ju[illegible] par; 800,000 issued [illegible] in secretary's [illegible]

Property [illegible] of Bingham, [illegible]

Star vein, in quartzite carrying limestone beds and cut by Bingham monzonite porphyry.

Company owns 2,000′ tunnel running from Pine Canyon toward Bingham. Portal of the tunnel will be 1½ miles from the International smelter at 5,600′ elevation. The Great Western tunnel at an elevation of 7,300′ is between the Great Divide group and the Star group, half way up the mountain side between the Nancy Hanks and the portal of the new Pine Canyon tunnel. Company does not reply to requests for information.

SILVER SHIELD MINING & MILLING CO. **UTAH**

Office: McCornick Bldg., Salt Lake City. **Mine office:** Bingham Canyon, Utah.

Officers: Henry Cohn, pres.; H. S. Joseph, v. p.-gen. mgr.; Allen T. S. Sanford, R. E. Miller, N. G. Hall, D. L. Wertheimer, J. A. Barclay, directors.

Inc. in Utah. **Cap.,** $300,000; shares $1; assessable; assessment No. 49 1c. a share, was levied in February, 1919; last assessment, 2c., delinquent, September 20, 1919; 298,700 shares issued. Paid $4,500 in dividends prior to 1903. Listed in Salt Lake City. Financial statement covering period January 1, 1916, to July 1, 1918, showed total receipts of $48,166, including $8,028 from ore sales, $14,800 from treasury stock sales, and $12,000 from assessments. Disbursements amounted to $48,166. Cash balance October 1, 1919, was $4,441, compared with debt of $7,162 year previous.

Property: about 320 acres, at Bingham Canyon. **Ore:** carries mainly silver-lead, with some gold.

Development: by shaft and 8,000′ tunnel to depth of 538′. Workings connected with tunnel of the U. S. Mng. Co. In February, 1919, a carload of high-grade ore was in the bins ready for shipment, but property is still in development stage. Reported that lessees opened a body of good ore early in 1920.

Equipment: hoist, 5-drill compressor, 50-h. p. motor, etc.

STARLESS MINE **UTAH**

Office: care Col. Enos A. Wall, owner, Salt Lake City, Utah. **Mine office:** Bingham Canyon, Utah.

Property: 8 claims patented, 160 acres, lying N. E. of the holdings of the Utah Copper Co., is developed by an incline shaft and numerous tunnels, longest 2,000′, with crosscuts and upraises, aggregating 10,000′.

Development: said to block out 800,000 tons of 1 to 2% copper ore.

Equipment: includes a hoist.

The 125-ton mill, idle, though it was enlarged and remodeled 1910, at a cost of $50,000, is equipped throughout with machinery of Col. Wall's own design, comprising Wall corrugated rolls, Wall steel rolls for middlings, 3 sets of jigs, 4 tables for concentrates, 2 Wilfley tables, and washers, of trough form, with valves and sprayers, concentrates being discharged through the bottom and sands from the top.

STIBNITE MINING CO. **UTAH**

Address: H. C. Baker, 2421 Washington Ave., Ogden, Utah.

Officers: H. C. Baker, pres.; A. M. Miller, v. p.; G. M. Flowers, secretreas., with Leroy Buchmiller and H. J. Craven, directors.

Inc. April, 1917, in Utah. **Cap.,** $100,000; 10c par; 800,000 issued.

Property: 686 acres, patented, 4 miles N. of Bingham, in Wasatch Range, Box Elder county, Utah.

Development: by 2,452′ adit, total openings 4,315′ to depth of 800′, showing various types of ore deposits in limestone, quartzite and shale, the ore containing lead and antimony. Reserves are estimated at 126,000 tons. Antimony ore, mined in 1916 was 67 tons, assaying 66% metal.

Equipment: compressor, 6,200′ tram, 125-ton concentrating plant. Flotation have been added in 1918. No recent information, probably inactive.

[illegible] GROUP **UTAH**

[illegible] South State St., Salt Lake City, Utah. **Mine office:** Bingham, Salt Lake county, Utah. A. M. Surbaugh and Thos. Moore Sur-

Property: 39 claims, 22 patented, 715 acres, with direct rail connection, in the N. E. part of the Bingham camp.

Development: by 16 shallow shafts and short tunnels, principal work being by the Highline tunnel, with another tunnel driving at lower depth. The mine carries gold and silver-bearing lead and copper ores, with small quantities of native copper, in quartz. Owners do not care to have output or other details made public, and returned letters unopened. Probably idle.

UNITED BINGHAM COPPER CO. UTAH

Officers: L. A. Marks, pres.; G. R. Bothwell v. p.; F. R. Snow, sec.-treas., 252 Canyon Road, Salt Lake City, with P. E. McConaughy, and W. P. Davis, directors.

Inc. 1919, in Utah. **Cap.,** $100,000; 10c par; issued 900,000 shares.

Company is the successor of Bingham Amalgamated Copper Co., described in Vol. XIII. The new company was organized in order to make the stock assessable. Old stock was exchanged for new on payment of 1c. a share.

Property: 22 claims, 300 acres, patented, known as the Illinois and Copper Glance groups, carrying 7 mineralized veins. The principal orebodies exposed in the Bingham Amalgamated are on the same vein as the Congor orebodies and of about the same character of ore. Vein is 15 to 40′ thick, developed for several hundred feet in depth, but the water and high cost of wagon haul stopped further development. In a tunnel on the west side of the property a 20′ vein shows streaks of good ore all through it. The Montana Bingham tunnel cuts this vein about 100′ deeper, 3,948′ from the portal, and opened it for 10′. Samples taken from this vein said to run from 3.2-6.5% copper, 7 oz. silver, $1.20 gold and 25% iron. Development work resumed the latter part of 1915 after an idleness of several years.

The Illinois has a 640′ shaft, with a 6 to 9′ vein carrying a 2′ pay-streak of about 5% copper ore, with occasional assays up to 40%, the average of 50 assays being 2.8% copper, 2 oz. silver and $2 gold per ton. The Copper Glance group has a 1,400′ tunnel, in McGuire gulch. Mine has a total of 2,450′ of workings.

In summer of 1917, company mined ore from a raise at the East end of the 300′ level. A trial shipment of 90 tons in June, yielded $25 per ton, the ore carrying 4.73% copper, 2 oz. silver, $1 gold, and 26.4% iron and 35.6% insoluble. The shaft, flooded in July was reopened later. Recent work has been on a small scale on the 400′ level, east side; some ore was shipped in 1918. Company plans more active exploration work in 1920.

UTAH-APEX MINING CO. UTAH

Office: 10 Post Office Square, Boston, Mass. **Mine office:** Bingham Canyon, Utah.

Officers: R. F. Haffenreffer, Jr., pres.; J. J. Murphy, v. p. and treas., with N. P. Duvally, sec.; G. F. McGahey and M. W. Sangy, directors. V. S. Rood, mgr.

Inc. May, 1902, in Maine, as a merger of the Copperfield Mining Co. and York Mining Co. **Cap.,** $3,000,000; increased 1906, from $2,500,000; $5 par; issued 528,200 shares. State Street Trust Co., Boston, transfer agent. Listed on Boston Stock Exchange and on New York Curb. Price range $1¾ to $4½ in 1918; $1⅛ to $3⅞ in 1919.

Bonds: $500,000; authorized at 6%, convertible, were retired July 1, 1916. Company absorbed the Highland Boy, Petro, Minnie and Phoenix mining companies. Annual meeting, second Thursday in November.

Balance sheet for year ended August 31, 1918, shows assets totaling $3,770,000, including $2,480,789 for cost of properties; $302,781 cash; $507,798 for development and equipment.

For fiscal year ending August 31, 1918, gross receipts from ore sales, royalties etc., were $1,761,044. Mining, development and milling cost, $1,189,306; miscellaneous expenses including general insurance, taxes, depreciation, etc., $121,586; litigation expenses and settlement of claims, $68,139, leaving a net profit of $255,858. Dividends absorbed $132,050.

Gross receipts for 1919 were $923,888, as against expenses of $1,097,995.

Dividends: initial quarterly dividend, 12½c, paid Oct. 1, 1915, 75c in 1916; 50c. in 1917; and 50c. in 1918.

Within the past few years the company has had several law suits, the last (1919) being one brought by the Utah Cons. against the Apex Co. for $1,000,000 damages for ore illegally mined from its ground.

Property: 34 claims, 244 acres, including the York, Copper Field, Petro, Highland Boy Consolidated and Phoenix groups, adjoins the Utah Consolidated on the S. and W., on York hill, Carr Fork canyon.

Geology: claims show limestone and quartzite, carrying the Parnell, Petro, York, and Andy bedded veins. These veins are cut by several fissures which have been more or less developed. The Dana, the principal orebody, is apparently a contact deposit between quartzite and limestone, showing as a shoot standing vertically, without disseminations in the contact, up to 15' in width and 500' in length on the 4th level. The mine primarily is a producer of high-grade lead ore, but has considerable copper, and some zinc: all ores carry silver and gold values with an excess of iron, giving low smelting charges. First-class ores carry about 2% copper, and $6 to $8 combined gold and silver values per ton, the second-class copper ores carrying about $3 per ton in combined gold and silver values. First-class lead ores carry 35 to 50% lead with silver and gold values, and second-class lead ores range 7 to 14% in lead with small gold and silver values.

Development: by 3 shafts and 6 tunnels, with over 20 miles of workings. The main working shaft is down to the 1,800' level. The tunnels, such as the Parnell, Minnie, Smilax, Andy, Andy No. 2 and Parvenu, are spaced 200' vertical intervals, and are connected by incline blind shafts, with electric hoists, on the Parnell vein, which is estimated by the company to be 5' in width and to be mineralized for about 1,000' in length and to 2,000' in depth. The Andy tunnel develops 3 ore-shoots, on the Parnell vein. The Parvenu tunnel, which is the principal working, is about 1 mile in length, cutting the Parnell with a back of about 2,200'. Since the decline in the copper market 1907, production had been devoted mainly to silver-lead ore. A silver-lead orebody in the Parvenu tunnel, having a maximum thickness of 100', with a width better than 100' and length undetermined, shows direct smelting ore of 15% lead, with 3 to 5 oz. silver per ton, and excess of iron, estimated to contain values of $8 to $10 per ton. The Parvenu shaft was completed to the 4th and hoisting started in April, 1917.

A 3,000' aerial tram, not in present use, runs from the portal of the tunnel to a loading station. Ore is shipped over a spur track of the railroad of the Utah Copper Co.

Mine was examined 1916, by Pope Yeatman, who discussed the lead, lead-silver-zinc and copper ore occurrences, of which lead has been the important. There is little chance for development of ore between 200 and but above 200' there are possibilities. The York beds show promise at depth. The principal orebody is the Parvenu, which on November 1, 1 tained 50,000 tons of 14% lead and 14% zinc ore. Its lower extension be close to the 1,500' level. The future lies in extensive development departments being in good order.

Ore reserves are estimated at over 200,000 tons, assaying 0.03 oz. oz. silver, 11% lead and 8% zinc. Present indications show that new maintain, if it does not increase reserves. During last fiscal year importa of milling ore were found on 100' level; reserves of this ore amounting tons, assaying 8% lead and 2 oz. silver per ton. New bodies of shi were found on the 1,150', 1,225', and 1,300' levels; reserves of this o to 160,000 tons ore assaying 12½% lead, and 4 oz. silver per ton.

Equipment: includes two 15-drill air compressors and 2 elec 1 of which is a double-drum hoist installed at the 7th level station in the tunnel. In April, 1917, a new Nordberg hoist was installed on th The old Phoenix mill at the mouth of the Parvenu tunnel was dismant new 200-ton mill built 1909, on the same site. The mill is said to ef centration of 4 into 1, with a saving of about 77% of assay values

mpany increased the capacity of the concentrator to about 350 tons daily, and 1915 a flotation equipment was added. In 1918, a large electric compressor is added.

The mill treated 53,518 tons of lead ore in the year ended August 31, 1916, om which 16,947 tons of concentrates were recovered; and 2,010 tons of copper e. Average cost of milling was 72.2c. per ton in 1915, as compared with 79.8c. 1914. In 1917 the mill treated 17,637 tons of ore, assaying 0.034 oz. gold, 3.76 . silver, and 11.37% lead. In 1918, 49,742 tons were milled.

Company has contracts with U. S. Mng. & Sm. Co. and American. Sm. & f. Co. for daily shipments of 300-400 tons lead zinc ore and lead ore and concentrates respectively. Employs over 500 men.

Production, years ended August 31:

ar	Gold Oz.	Silver, Oz.	Lead, Lbs.	Copper, Lbs.
19	2,257	195,715	14,753,984	386,833
18	6,171	641,551	42,811,805	1,427,576
17	3,551	396,989	24,414,451	.....
16	4,924	620,022	37,304,675	2,355,475
5	4,000	560,000	32,000,000	2,400,000

Zinc produced in 1919 amounted to 7,671,742 lb.

Mine idle from May until late in September, 1919, when shipments were umed. November outputs averaged about 500 tons daily.

It is said that a large tonnage of milling ore is available.

'AH CONSOLIDATED MINING CO. **UTAH**

Office: 42 Broadway, New York. **Operating office:** 608 Dooly Block, t Lake City, Utah. Mine office: Bingham Canyon, Utah.

Officers: R. H. Channing, Jr., pres.; Adolph Lewisohn, v. p.; with Sid- Chase, J. S. Dunstan, H. N. Anthony, J. W. Allen, Maxwell Woodhull, ctors; A. H. Melin, sec.-treas.; Frederick Cowans, gen. mgr.; A. S. Winther, t.; T. S. Van Wagoner, purch. agt.

Inc. 1903, in New Jersey. **Cap.,** $1,500,000; shares $5 par.

Is a reorganization of Utah Consolidated Gold Mines, Ltd., a British corpo- on that in turn succeeded the Sevier Gold Mines, Ltd., October, 1896. Prop- of the Utah Consolidated Mining Co. is 2,490 shares of the 2,500 shares of capital stock of the *Highland Boy Gold & Copper Mining Co.,* of New Jersey, latter corporation holding direct title to the Utah properties. The company owns 8,250 shares of the Anaconda Copper Mng. Co., stock derived from of Internat'l S. & R. Co.

Shares are listed on the Boston and Salt Lake Stock Exchanges. Price e, $7 to $10 in 1918; $7½ to $12¾, July, 1919. Transfer agent, International st Co., Boston. Annual meeting, first Tuesday in April.

Comparative Profit and Loss Account shows:

	1918	1917
Sale of metals	$2,827,571	$3,513,079
Other receipts	107,065	101,698
Total receipts	$2,934,636	$3,614,777
Mining expense	1,450,743	1,562,636
Smelting expense	907,492	1,054,943
Refining, Marketing, etc	170,863	117,970
Administration and legal expense	51,619	67,033
Litigation expense	101,155	.....
Total expense	$2,681,872	$2,802,582
Net profit	252,764	812,195

Total receipts in 1919 were $2,060,404, of which $181,966 was profit. Current s exceed liabilities by $1,931,687.

Dividends:

1903	$3.20	1909	$2.00	1915	$2.00

1907	7.00	1913	1.50	1919	0.25
1908	2.00	1914	2.00		

Property: 46 claims, patented, 393 acres, known as the Highland Boy group, in Carr Fork canyon, 2½ miles from Bingham canyon. The Highland Boy mine was a considerable producer of silver-lead ore, 1870-90.

In 1915 the Bingham Copper Boy group adjoining the Utah Cons. on the north was purchased for $18,747. Property promising but undeveloped. In 1918, the Yampa mine, 51 acres, adjoining on the north, was purchased from the Tintic Mining & Dev. Co. for $100,000.

Geology: the Highland Boy group, the original property, has 6 ore deposits which are replacements of limestone beds 150 to 300′ thick, with quartzite above and below. These beds dip from 25 to 45° N. and the rocks are cut by a series of porphyry dikes that are nearly vertical and run N. E. The ore deposits form well-defined shoots with E.-W. strike and N.-E. pitch. They are large, varying up to 100′ in width and 100 to 200′ in length, and are separated by barren limestone; the largest orebody so far developed is said to be 320′ in extreme horizontal width and 340′ in length. An ore-shoot carrying galena was found in the lower workings in an extension of the Yampa limestone. The predominating ore of the mine carries chalcopyrite, with some bornite and chalcocite, associated with pyrite in a limestone gangue.

Development: the Highland Boy mine is opened by a main shaft 1,600′ deep, and 7 tunnels, of 1,000 to 2,600′ in length. No. 7 tunnel, 700′ below the crest of the mountain, is 2,600′ in length and is the main haulage way, all tunnels being connected, and ore milled, through chutes, to this tunnel. There are 2 blind shafts, deepest 500′, starting from the 700′ level, with large electric hoists raising ore to that point for extraction by the electric haulage plant in No. 7 tunnel. The ore breaks easily and is extracted by the top-slice caving system, mainly on contract.

New openings totalled 29,206′ in 1917; 21,067′ in 1918; 17,407′ in 1919.

The most important exploration was done in opening up the 1,400′, 1,500′ and 1,600′ levels from a vertical winze sunk from the 1,300′ level. On the 1,400′ and 1,300′ levels 850′ of new drifting was in 2% copper ore of an average width of 3½′. Crosscutting to north at E. end of both levels disclosed another orebody 4′ in width, assaying 2.5% copper on the 1,200′ and 4% on the 1,300′ level. On the west end of the mine crosscutting on the 1,300′ level disclosed 6′ of 2.5% copper ore. The lead ores on the 1,400′ and 1,500′ levels, reached by the winze from the 1,300′, are reported to be holding up well.

In 1918, an option was taken on adjoining property of the Utah Lead & Copper Co. Exploration work is being done in this ground from the 1,300′ and 1,500′ levels.

Suit was filed against the Utah-Apex Mining Co. for damages, 1919. Utah Cons. claiming it had the apex of the vein from which Utah-Apex had been mining ore. By an agreement with the Utah Metal and Tunnel Co. apex litigation with that company is ended, but in November, 1919, Utah-Apex commenced suit against Utah Cons. for alleged wrongful extraction of ore.

Ore reserves:

	Copper Ore Tons	Copper %	Silver Oz.	Gold Oz.	Lead Ore Tons	Lead %	Silver Oz.	Gold Oz.	Copper %
1919...	848,000	1.94	0.66	.040	38,400	15.70	5.36	.060	[illegible]

1916...			0.[illegible]		33,400	16.03	5.62	.038	[illegible]

A fl[illegible] [illegible]000 tons of low grade copper ore.

A 12,700′ aerial tram leads from the portal of No. 7 tunnel to ore bins on Rio Grande Western railway. There is a subsidiary aerial tram, crossing · Fork canyon, used for handling lumber and mining supplies.

While the great orebodies of the mine are worked out the property is far ı exhausted, and development work is encouraging.

Office: Deseret Bank Bldg., Salt Lake City, Utah. **Mine office:** Bing- Canyon, Salt Lake county, Utah. Works office: Garfield, Utah.

General office: 25 Broad St., New York City.

Officers: Chas. M. MacNeill, pres.; Daniel C. Jackling, 1st v. p. and ging director; Chas. Hayden, 2nd v. p.; K. R. Babbitt, sec. and gen. counsel; - directors, Spencer Penrose, E. A. Guggenheim, H. F. Guggenheim, W. C. r, Stephen Birch, W. P. Hamilton, R. C. Gemmell (asst. managing director gen. mgr.), W. Hinkle Smith, Wm. B. Thompson, J. K. MacGowan (pur- ng agent), and R. A. Penrose, Jr.

Operating officials: L. S. Cates, asst. gen. mgr.; John M. Hayes, treas. asst. sec.; J. D. Shilling, supt. of mines; D. D. Moffat, consulting engr. of F. G. Janney, gen. supt. of mills; H. C. Smith, supt. Magna plant; T. A. ey, supt. Arthur plant; H. C. Goodrich, chief engineer of mines and railway; Jennings, asst. purch. agt.

nc. June 4, 1903, and reorganized April 30, 1904, in New Jersey. **Cap.,** 0,000; shares $10 par; originally, $4,500,000; capital successively increased ber, 1905, to $6,000,000; February, 1907, to $6,600,000; January, 1908, to 0,000; January, 1910, to $25,000,000; issued, $16,244,900. The new stock 1910, amounted to $8,282,240, of which $3,100,000 in stock was given for the rty of the Boston Consolidated Mining Co.; $4,445,120 or 445,512 shares,

UTAH COPPER COMPANY

Our Statistical Department will furnish complete information on application.

HAYDEN, STONE & CO.

bers New York, Boston and Philadelphia Stock Exchanges.

reet Street, NEW YORK 87 Milk Street, BOSTON

dry to approximately 10 mesh by 23 sets of 37½x15" rolls, three 8x6 Marcy b mills. Screening and circulation is done with help of seventy-eight 3x4 in screens and twenty-six elevators. It is then crushed wet to approximately mesh by twenty-six Chilean mills and twenty-six 7x10 tube mills: twenty- elevators; twenty-six drag classifiers; fifty-two 4-compartment and fifty-f 5-compartment Richard Janney classifiers.

The concentrate department has Garfield roughing tables, No. 5 Wil finishing tables, and 6' vanners.

The electric power used at both Arthur and Magna plants is taken fr the Utah Power & Light Company. It is stepped down into substations fr 44,000 to 440 volt. The 13,000-h. p. steam-electric plant, 1,500' northeast of Magna mill, was equipped with 20 Heine 440-h. p. boilers, working under lbs. steam pressure, equipped with American automatic stokers. General room contains two 26x50x48" Allis-Chalmers cross-compound Corliss condens engines direct connected to 1,500 k. w., A. C. generators; also three 32x70 Nordberg cross-compound Corliss condensing engines direct connected to 2 k. w., A. C. generators. There are two concrete smoke stacks 180 ft. high 12 ft. inside diameter. This plant has not been in operation since February, 1

The Leaching Plant.

This plant, located near the Magna mill, completed during 1917, treats oxidized and partially oxidized capping overlying the sulphide ore, which car approximately 15 pounds of copper per ton, of which about 12 pounds are sol in sulphuric acid.

Ore from the mine at Bingham is discharged in crusher building wher is reduced to 15% on ½" mesh screen by two No. 6 Gates gyratory crush style "K," and two 72"x20" Garfield rolls. A noticeable feature in the crush plant is the absence of any elevators; all intermediate crushing products ha handled on incline conveyors.

The crushed ore is charged from loading bridge into twelve 100'x50'x18' d mastic lined concrete leaching vats equipped with suitable filters in bottoms

The vats of ore are leached in rotation with a sulphuric acid solution c taining a maximum of 1½% free acid.

The leaching solution is handled and circulated by means of 6" centrif antimonial lead pumps and air lifts. The leaching solution, containing n .2% to .3% free sulphuric acid, and the copper, in the form of sulphate, is to mastic lined concrete and wooden precipitation launders filled with scrap i where the copper is precipitated. The cement copper precipitate is then s from the precipitation launders, drained, dried and loaded into cars pre to shipment to the smelter. The tailing is discharged from the vats by unloading bridge equipped with a 10-ton grab bucket into 30-yard dump and hauled away by locomotives to the waste dumps.

Arthur Mill.

The Arthur mill was built by the Boston Consolidated Mining Comp a cost of upwards of $1,500,000. It was remodeled to a capacity of 7,800 ton ore daily in 1916, by replacing the Nissen stamps with rolls and Chilean to correspond to the practice at the Magna mill. Later additions have inc this capacity to 16,000 tons daily.

The ore is brought to the head of the primary crushing department by road cars of 69 tons capacity, which are spotted on a car dumper by a haulage system; this equipment having a capacity of 30 cars per hour.

The railroad delivers the railroad cars in the electric mule haulage which is constructed on a 1.50% down grade. The car riders uncou cars and drop them down the grade beyond the mule pit, where they are on the dumper by the mule haulage system. The loaded car, as it is on the dumper, kicks off the empty car which runs down a grade back dumper and up a kick back track, where it reverses its direction and co on down into the empty yard located opposite the car dumper and mule

ks. Four men are required to ride these cars from the mule haulage tracks ss the dumper and back again.

The dumper discharges over a grizzly which separates in plus and minus oduct, the over-size going to a No. 27 gyratory crusher, the largest type e. The undersize and crusher product are conveyed to the secondary coarse hing department by four 60" pan feeders and two 60" conveyors. The above irtment contains a 60-ton crane, with 10-ton auxiliary hoist.

The secondary coarse crushing plant consists of three No. 8 gyratory hers, six sets of 72"x20" Garfield roughing rolls, two elevators, twelve con- rs for circulation and transporting the ore to the fine crushing department, 25-ton crane. The capacity is 16,000 tons of approximately 5/8" size. Adja- to this department is a 9,000-ton coarse ore bin, with overhead tracks, which sed when the primary crushing plant is down for repairs. This bin has six eyors and one hundred and two steel apron feeders for transferring the erial to the secondary coarse crushing department.

Miscellaneous buildings at the Arthur plant consist of substations, machine), boiler shop, oil house, compressor building, warehouse, carpenter shop, dry, pattern storage building, general offices, telephone and emergency ital building, dormitory, mess house, lumber shed, heating plant, assay office, office, scale house, and houses for employees.

Initial Water Supply.—The main pumping plant, called Plant No. 2, is situ- l immediately east of the Magna mill and at the end of the Utah & Salt Lake al, which brings the water from Utah Lake about forty miles from the plant. canal has been enlarged sufficiently to deliver 100 second feet of water to nt No. 2.

The equipment in this plant consists of one 22,000 gal. capacity, single stage, trifugal pump driven by a 250-h. p. induction motor; one 10,000-gal. capacity, gle stage, centrifugal pump, driven by a 150-h. p. induction motor; one 5,000- capacity, single stage, centrifugal pump driven by a 100-h. p. induction or, all three of which pump direct into the Magna 5,500,000-gal. concrete d reservoir above the Magna mill, through 700 ft. of 30" wooden stave pipe against a 30 ft. head; three 5,000-gal. capacity, single stage, centrifugal pumps, h driven by a 250-h. p. induction motor; one 10,000-gal. capacity single stage, trifugal pump driven by a 450-h. p. induction motor, all pumping direct to Arthur mill 2,000,000-gal. reservoir through 6,300 ft. of 30" and 42" wooden e pipe line against a head of 135 ft. The total capacity of this plant to the gna mill is 37,000 gals. per minute, and to the Arthur mill, 25,000 gals. per ute.

The reserve pumping plant No. 1 is used in whole or part when the main nping plant No. 2 is out of primary water. This reserve pumping plant is ated 1,500 ft. N. E. of the Magna mill, and includes 6 Byron Jackson centri- al pumps, each of 10,000 gals. capacity. These pumps, having a combined acity of 60,000 gals. per minute, deliver the water through two 42" wooden e pipe lines, each 1,800 ft. in length, against a 235 ft. head, into the 5,500,000- reservoir.

In order to insure a sufficient supply of mill water at all times, and as a tection against unforseen accidents on the Utah & Salt Lake canal which uld cut off the supply of primary water from that source, practically a dupli- e water supply is being constructed, and in connection with this work there s purchased 1,325 acres of land lying about nine miles east of the plants. The ography of this land is such that it forms a natural reservoir for the drainage m higher lands, but nevertheless, its elevation is sufficient so that the storage ter can flow by gravity to the lower pumping plant at Magna through a canal nstructed for that purpose. There is also under consideration the construc- n of a ditch from the Surplus canal to this natural reservoir, which will require umping plant of low head, and after this work is completed it is believed that water supply for the Utah Copper Co. for milling purposes will be such as make practically impossible any combination of circumstances that would

necessitate the closing down of the mills or even any reduction in their capac because of water shortage.

Bingham & Garfield Railway.

Inc. July, 1908, in Utah. Cap., $6,515,000; $100 par. Controlled by t Utah Copper Co., through ownership of the entire share capital.

The mileage at the end of the year 1918 is shown in the table below:

Main line and branches between and in the vicinity of Garfield and Bingham	37.136	miles
Yard and siding tracks, including all the terminals	52.769	"
Additional tracks leased to Utah Copper Co	43.458	"
Total length of tracks	133.363	"

The average grade for the Main line is about 2%; the maximum grade 2.5%, with curves compensated .04 of a foot per degree of curvature. The are 4 tunnels with an aggregate length of 4,821', all driven 18' wide and 22' hig the longest being 2,085.11'. There are 3 steel viaducts with an aggregate leng of 2,000' containing about 3,000 tons of steel; the longest, across Carr Fo being 690' long and 190' high.

The road equipment owned and operated by this company at the end of th year 1918 consisted of the following: 7-Mallet engines, each weighing 228.5 to on drivers; 1 consolidated engine, weighing 87 tons on drivers; 12 switch engine 647 Hopper bottom steel ore cars, 50 drop bottom side dump steel general serv gondola cars, 149 steel concentrate cars, making a total of 846 cars each of ton nominal capacity with 10% excess allowance for overload; 3 steel flat cars 50 tons capacity; 8 wooden flat cars of 25 tons capacity; 4 steel frame pow cars, of 50 tons capacity; 1 tool box car; 1 kitchen box car; 16 outfit cars. caboose cars; 9 steel tank cars of 7,000 gallons capacity each; 1 Jordan spreade one 120-ton wrecking crane; 1 scale testing car; 1 locomotive crane; 4 passen coaches; 1 business car.

The cost of the complete line was upwards of $6,000,000. The first tra load of ore, about 2,600 tons, was taken down the main line on September 1 1911, and regular passenger and freight service was started the following mo ing. In 1918 the line handled an average of 34,081 tons of freight and 1,0 passengers daily.

ncrease of ore reserves for 1918 was 2,288,000 tons in excess of tonnage d. Much additional ore can and will be developed.

Total amount of capping removed was 4,064,091 cu. yards. The total area which stripping operations has been conducted was 258.67 acres and the l area stripped was 132.16 acres.

The average cost of mining concentrating ore, including the proper appor- nent of all fixed and general charges for the year 1918 was 53.70c. per ton, hich 10.16c. represents charges for stripping and 6.69c. for development. actual direct cost was 42.85c. per ton as compared with 36.88c. per ton he previous year.

Utah Copper is still the brightest star in the Hayden-Stone-Jackling galaxy, its aggressive and brilliantly competent management promises to keep the any in its present enviable position.

AH METAL & TUNNEL CO. UTAH

Mine office: Bingham, Utah.

Officers: B. B. Lawrence, pres.-gen. mgr.; Jas. E. Rothwell, v. p.; W. . Dillaway, treas., with Walter B. Farmer, Wm. H. Coolidge, Henry G. am, and L. E. Stoddard, directors. W. H. Hendrickson, mgr.

Inc. May, 1914, in Maine. **Cap.**, $800,000; $1 par; increased from $500,- to $725,000, to purchase Bingham-New Haven C. & G. Mng. Co.; again ased in April, 1919, to $800,000; 750,000 shares issued; 100,000 set aside for ersion of $750,000 7% bonds; in August, 1919, 50,000 shares of this block sold at $50 a share to a syndicate composed of L. E. Stoddard, W. H. idge, H. G. Lapham, and F. H. Prince. Company converted $375,000 of onds into stock, exchanged $225,000 for a like amount of 6% bonds which ired April 1, 1919, and at present has about $150,000 bonds in its treasury. re-financing will enable the company to pay off a floating debt of about 00, and leave the company approximately $120,000 for mining operations. Commonwealth Trust Co., Boston, and Registrar & Transfer Co., New York, ifer agents. International Trust Co., Boston, and Empire Trust Co., New ; registrars. Company acquired Bingham-New Haven C. & G. Mng. Co., xchange of share for share. Listed on Boston Stock Exchange; traded on York Curb. Stock sold at $1 to $10.50 in 1915. Price range $1¼ to $3 18; $1 to $5⅛ in 1919. Annual meeting, first Monday in May.

Company is a reorganization of the Utah Metal Mining Co., itself a con- ation of the Bingham Central, Bingham Standard, and Bingham Metal ng Co.

A dividend of 50c. per share was paid in August, 1916; 80c. in 1917. In 1¼c. was paid April 1.

Comparative Balance Sheet, years ending December 31:

Assets.	1918	1917
Property account	$1,777,107	$1,784,3
Prepaid accounts	1,489	2,8
Cash	1,009	43,0
Supplies	60,029	92,6
Accounts receivable	14,743	98,3
Total	$1,854,374	$2,020,6

Liabilities.	1918	1917
Capital stock	$700,000	$691,5
Bonds	233,500	220,5
Accounts payable	45,923	51,0
Notes payable	35,436	.....
Surplus	839,518	1,057,6
Total	$1,854,374	$2,020,6

Gross revenue in 1919 was $94,521, of which $59,909 was from comm operations. Expenses were $96,458.

Property: is extensive, covering 3,539 acres, including 139 acres tim land in Bingham district, adoining holdings of Utah Cons. and Utah Co Co. (Boston Con.), and extending across the range to Middle Canyon, o Tooele side. The company drove a transportation and drainage tunnel Big Tunnel, 11,500′ through and 2,300′ below the crest of the range, from Tooele to Bingham Canyon (Carr Fork). This gives direct short transporta to Tooele and Garfield and develops a large flow—2,000,000 gals. per day water, part of which is sold to the Garfield mill of the Utah Copper Co. company having an income of $30,000 a year from this.

The Bingham or Carr Fork holdings include the Bingham Central & E ham Standard groups, an area in which the various mineral bearing limes beds of the camp are cut by the Saginaw-Burning Moscow and Nast veins crossed by the Old Jordan fault. The claims on the Tooele side show si limestones, cut by fissures, but the development work there has not thus far sh commercial orebodies, as it has on the Bingham side.

In November, 1914, the company started crosscut exploration from the drainage tunnel at 8,200′ from the Tooele portal. In March, 1915, 1,300′ from Bingham portal, the latter work encountered mineralized ground, and on up 70′, an orebody 25′ thick was cut. Drifting disclosed a second orebody and above the first, and later a third orebody, already opened and mine the Bingham New Haven Co., was cut. At present there are five prod orebodies on the combined properties. One copper ore shoot 300′ belo B. N. H. tunnel has been proven for over 200′.

The transportation tunnel is 8x9′ in the clear, double-tracked, with grade. It develops the mineral bearing limestone and veins at depths of 3 900′ below any other workings.

Development: on the Utah Metal includes besides the 11,490′ tra tation and drainage tunnel, and the workings therefrom, extensive tunnel de ment on the Bingham Central and Standard group, embracing the 4,000′ 700′ Saginaw, 2,000′ Whitlay, 2,000′ Jeff Davis, 400′ Deem, 950′ Mtn. Mai Amelia and lesser tunnels, all showing ore at various points. On the T side, the Middle Canyon group has one 5,000′ tunnel, another 1,700′ and a 500′ long.

New work in 1918 amounted to about 10,000′. The ground already o and the orebodies indicate the existence of similar other depos lo nt of been developed.

t 00-ton mill using the Callow system of t

Production:

Tons Ore,	Lbs. Lead,	Lbs. Copper,	Oz. Gold,	Oz. Silver,	Value Gross

he 1919 output included 70,750 lb. of zinc.
n October, 1917, a five years' contract was arranged with the International ting Co. for Utah Metal ore, the price to be the average for the week pre- g receipt of the ore.

The Bingham-New Haven property includes 26 claims, 500 acres adjoin- he Utah Consolidated on the S. E., includes the Zelnora mine near the of Carr Fork. Claims show 3 fault fissures in porphyry and a contact it 3′ to 8′ in width, between quartz-porphyry and limestone. The copper verages 3.5% copper, $6 in gold and silver and about 12% excess iron. The ore averages 20% lead, $7 in gold and silver and 1.5% copper, ores being pyrite, galena and sphalerite. The main ore supply is from 3 beds of tone, which strike E. W. and dip N. Company now mining 2 deposits of r, 2 of lead and one of complex ore.

Development: by tunnels with a blind shaft starting 900′ from the l of the lowest tunnel, there being a vertical distance of 1,200′ between the st and lowest workings. The 1,030′ lower tunnel cuts a wide fissure vein, g assays of about 3% copper, 2.3 oz. silver, and $2.50 gold per ton. Terminal upper tunnel was moved to the lower tunnel and mine is operated through tter. The shaft is now down 320′ below the 500′, or Highland Boy level. rosscuts have been driven 200′ and 320′ below the tunnel level to cut a tly found orebody which averages 6′ in width where cut. Estimated 2-3 ore reserves in sight. Mine has several miles of workings with an aerial connecting with loading bins on the Copper Belt railroad.

Equipment: includes electric power, air compressor and 175-ton mill, ped with jigs, Wilfley and Diester tables, vanners and ball mill for fine ing.

Summary: the year 1918 was not profitable for the **Utah Metal** com- **Regular** mining operations ceased during the period of negotiations re- ng apex rights, but expensive development work was necessary to open up rove apex claims. The adjoining Utah Cons. was the other claimant. It lecided in December, 1918, to reach a settlement without having recourse gation. This settlement gave the Utah Metal & Tunnel Co. unrestricted to follow all beddings found on the westerly part of the Bingham-New ground downward extralaterally, in and under the Utah Cons. ground, ut regard to apexes, and also full mining rights in a segment of ground between the boundary line separating the properties and the southerly of the Utah Cons. workings, a space about 2,000′ long and 1,100′ wide. as part of the agreement the Utah M. & T. Co. transferred to the Utah certain causes of action and claims for damages it had against the Utah Mining Co., another neighboring property.

Officers: Col. E. A. Wall, pres.; Geo. W. Parks, sec.

Inc. in Utah. **Cap.**, $4,000,000; issued $3.000,000; $20 par; assessable. ed on Salt Lake Exchange.

Dividends: paid $2,925,000 to 1897. Dividends resumed in 1917, when)00 was paid: in 1918, $75,000; in 1919, $97,000 to October 1. On January 2, , 10c was paid. The grand total is $3,142,000.

Property: in Uintah district, Summit county, 8 claims and an interest 4 claims of the Ontario Silver Co. claims; also an interest in 17 claims of the r West Co., and 195½ acres owned jointly with the Ontario Silver Mng. total acreage 316, of which all are patented.

Ore: silver-lead-gold and copper in fissure veins in quartzite. The erty is an old one, and at last accounts had 2,300′ of shafts and much unex-ed ground between the surface and 1,700′ levels. Work has been carried on mittently during the past few years. Ore assays from 45 to 80 oz. silver, 15% lead, and $0.75 to $1.50 gold per ton; shipments are about 500 tons thly of ore of this character.

.Y WEST MINING CO. **UTAH**

Office: 1101 Deseret Bank Bldg., Salt Lake City, Utah. **Mine office:** City, Summit county, Utah.

Officers: G. W. Lambourne, pres.; Geo. G. Brooks, v. p.; with H. M. emetz, M. C. Fox, and O. N. Friendly, directors. S. G. Taylor, treas.; A. H. ody, sec. O. N. Friendly, gen. supt.; G. R. McKay, mine supt.

nc. Feb. 14, 1902, in Colorado. **Cap.**, $3,600,000; increased to $5,000,000 18; shares $20 par. Owns a 20% stock interest in the Little Bell Mining an adjoining property. National City Bank, Salt Lake City, and First Na- Bank, Boston, registrars. American Trust Co., Boston, transfer agent. listed on Boston and on Salt Lake Exchanges.

n 1918, ore sales returned $184,593; other income totaled $2,753, which, balance on hand, January 1, 1918, equalled $217,565. Expenditures were)38, leaving balance on hand, January, 1919, $23,626.

)ividends: 30c quarterly reduced to 15c. in 1913; total to end of 1916 6.606,000. Nothing was paid in 1914, 1915, 1916, 1917, or 1918.

ompany is a large silver-lead producer, copper being a by-product.

roperty: the Daly West and Quincy mines with 50 claims, patented, :res in the Park City district. The ores are a complex of argentiferous zinc and iron sulphides, occurring in fissures, and as replacement deposits iestone. Ores are declining in value with depth. Production formerly y divided between smelting and concentrating ore, is now mainly the latter. roperty has 3 principal veins, of 4 to 6′ minimum and up to 40′ maximum Upper workings are practically worked out, lower workings show con- Owing to fire, no work was done, 1914-1915, but operations were

the main shaft is 2,300′ deep, and the mine has about

15 miles of workings, an average of nearly 1 mile of new ground being opened yearly. Connection was made, October, 1909, with the 3-mile Ontario drainage tunnel, on the 2,100′ level for the use of which company pays $750 monthly rental.

Equipment: includes hoists and air-compressor. The 350-ton concentrator was destroyed by fire December, 1913. A new 600-ton mill was built and went into commission January, 1915. Plant includes a flotation unit with capacity of 30 tons of dry slime per day.

Production: recent shipments have been as follows: 20,344 tons in 1913; 24,341 tons in 1914; 13,620 tons in 1915; 9,980 tons in 1916.

Property, though an old one, has much new territory yet to be prospected and the known ore shoots give indications of going to greater depths.

The present management took control March 1, 1918; for several years previous to this time the mine had not been operated to best advantage, and only such development work done as was necessary for immediate ore extraction. The new management decided on a more aggressive line of development work and also to mill the ore at the Judge Mng. & Smg. Co.'s plant; this necessitated the driving of a 1,000′ crosscut.

JUDGE MINING & SMELTING CO. UTAH

Office: 1101-3 Deseret Bank Bldg., Salt Lake City, Utah. **Mine** P. O.: Park City, Summit county, Utah.

Officers: G. M. Lambourne, pres. and gen. mgr.; M. C. Fox, v. p.; S. G. Taylor, treas.; A. H. Peabody, sec. O. N. Friendly, gen. supt.

Inc. 1901, in New Jersey, as the Daly Judge Mining Co. Reorganized 1916, under present name. **Cap.,** $300,000; shares $1 par; increased March, 1916, to $500,000; 480,000 shares issued. Stock listed on Salt Lake Exchange.

Dividends: in 1916, $435,000; in 1917, $480,000; in 1918, $240,000. In March, 1919, $60,000. Total dividends to 1919, $2,310,000. Rate in 1918 was 12½c per share, quarterly. Balance of $148,385 in treasury, January 1, 1919. Total receipts from ore sales in 1918, $701,401, not including receipts from the zinc plant, $360,241, or sundry receipts, $28,700. Profit in 1919 was $208,385.

Property: company has valuable holdings, about 1,100 acres patented ground, covering 11,000′ of a fissure vein system, in Park City district, adjacent to the Daly West mine. Is a large producer of silver-lead ores with much zinc and a small amount of copper.

Development: to 2,500′ level by main drainage tunnel. New work in 1918 amounted to 5,761′ of which 10.98% is on the Daly vein, 64.65% on the Back vein, 24.37% on the Middle vein. The depth ranged from 300 to 1,400′. In 1917, the development definitely established the existence of an ore zone not previously known containing one of the largest deposits of shipping ore ever found in the mine.

The Snake Creek tunnel, driven 14,500′ to the property line, was completed early in 1916; it will unwater the mines at greater depth and provide transportation. It is to be extended later for further exploration of the property.

Equipment: includes 400-h. p. electric hoist, compressor and 500-ton wet concentrating plant with flotation unit for treatment of slimes, making a zinc and lead product, also an electrolytic plant producing 99.95% zinc.

Production:	1916	1917
Crude ore sold, tons	4,164	7,247
Residues, tons	....	....
Ore concentrated	61,787	58,186
Ore mined, tons	65,951	65,427

	Silver oz.	Gold oz.	Lead lb.	Zinc lb.	Copper lb.
To 1916	5,622,420	11,800	116,601,381	86,937,150	2,984,875
1916	477,852	535	8,114,627	5,153,049	341,198
1917	585,680	532	7,919,720	.....	428,000
1918	508,434	490	7,931,566	.....	371,036
1919	410,307	402	6,989,908	1,262,760	276,926

The company's progress in zinc production is of interest. As ore contracts ired in April, 1916, zinc concentrate was stored. By February 1, 1917, a 15- electrolytic plant of good design, was erected and started. In 1916 the mill le 6,129 tons of concentrate, assaying 44.58% zinc, 4.38% lead, 6.54% iron, 21.47 oz. silver. In 1917, and 1918, zinc production was considerably cur- :d. in 1918, only about one-third capacity was attained.

The discovery of high-grade mill ore in the footwall of the Daly vein was most notable result of 1919 development: work for the year totaled 2,976' 43,107 tons of ore were mined.

ARNS-KEITH MINING CO. **UTAH**

Out of business, property conveyed to the Silver King Coalition Mines Co. Park City, which see.

Inc. Sept. 12, 1902, in Wyoming. **Cap.**, $700,000; shares $1 par; out- ıding $500,000; assessable; last assessment 2c, December, 1915. Capital to increased to $1,000,000, at last accounts. Transfer office: J. L. Tilton, 32 adway, New York. Empire Trust Co., New York, registrar. Listed on Salt e Exchange and on New York Curb as a prospect.

Property: 16 patented claims, 66 acres, in Unitah mining district, 3 es S. W. of Park City, said to show silver-lead ore.

Development: 225' vertical shaft and 700' tunnel, work of former years, king the winze from tunnel level during 1916.

The property was rehabilitated in 1916, compressor and motor installed and loration started. A suit against the Kearns-Keith Mng. Co. and the Silver g Coalition Mines Co., asking $1,500,000 damages for alleged unlawful ex- tion of ore was pending, June, 1916, but in December, 1919, the Silver King lition announced that all disputes in the district had been settled.

TLE BELL CONSOLIDATED MINING CO. **UTAH**

Office: Newhouse Bldg., Salt Lake City, Utah. **Mine office:** Park City, ımmit county, Utah. Solon Spiro, pres. and gen. mgr.; S. M. Bamberger, ; Joe Kemp, supt.

Inc. 1902, in Wyoming. **Cap.**, $1,500,000; shares $5 par; non-assessable; issued. Began payment of 5c. quarterly dividends, November, 1909, and o and including September 2, 1910, had paid 4 quarterly dividends of $15,000 . Shares listed on Salt Lake Stock Exchange; 20% of stock owned by Daly st Mng. Co.

Property: 30 claims, patented, in Park City district. **Development:** ex- ive, showing deposits of lead-silver ore.

Equipment: includes steam power, with hoist and air compressor. tric power is taken from the Knight plant at Provo. The old 100-ton mill he Fortuna Mining Co., at Bingham Canyon, was bought 1910, and re- ted at Park City. Worked intermittently. No recent information.

RTIN GOLD AND SILVER MINING CO. **UTAH**

Address: C. F. Johnson, 201 Ness Bldg., Salt Lake City, Utah.

Property: 9 claims, unpatented, located on west side of Thaynes can- near Park City.

ILDRIVER MINING CO. **UTAH**

Is a subsidiary of the Ontario Silver Mng. Co., 163 So. Main St., Salt e City, Utah.

Officers: W. Mont. Ferry, pres.; Herbert Cohen, sec.-treas.

Inc. Oct. 2, 1902. **Cap.**, $600,000; shares $2 par; assessable; 287,450 issued. Stock listed on the Salt Lake Exchange.

Property: 13 claims in Park City mining district, Summit county, shows ad-gold-copper ore, developed to depth of 600' by shaft and drifts.

Development: by shaft to 700′ depth. Most recent development s to have opened a vein from 1′ to 3′ in width and assaying more than $40 per t

Equipment: includes electric hoist and compressor driven by 7½-h motor. Reported on by Edward R. Zalinski. Management is confident of find commercial ore.

THREE KINGS SILVER MINING CO. UTA

Name changed to Three Kings Cons. Mining Co., which see.

VERDUN MINING CO. UTA

Address: Box I, Park City, Utah.

Officers: W. J. Buck, pres.; J. L. Kearns, sec.; R. T. Kimball, trea with C. F. Wherrit, and Geo. Evans, directors.

Inc. 1917, in Utah. **Cap.,** $50,000; 5c par; issued 400,000 shares.

Property: 5 claims and lease and bond on three others in Park C district, said to show silver, copper, gold ore in a contact deposit, assaying copper, and 2½ to 12 oz. silver per ton.

Development: 250′ tunnel. Property is a prospect.

TINTIC MINING DISTRICT

Ore was first found in the Tintic district, 60 miles S. of Salt Lake City, 1869, and production started the following year. Since that time the district been a steady producer; its output to the end of 1916 was approximately $ 000,000, in silver, gold, lead, and copper.

The U. S. Geological Survey published a report on the Tintic district in 1 but copies are no longer available for distribution. A more recent report been published giving the results of later studies. Professional Paper 107, titled "Geology and Ore Deposits of the Tintic Mining District, Utah," Waldemar Lindgren and G. F. Laughlin, with a historical review by V Heikes.

See "East Tintic District," by L. H. Goodwin, Eng. & Mng. Journal Ja uary 10, 1920.

ADDIE MINING CO. UTA

Address: 333 Judge Bldg., Salt Lake City, Utah.

Officers: G. C. Lambert, pres.; H. B. Cole, sec.

Inc. in Utah. **Cap.,** $30,000; 10c par; assessable.

Property: 5 silver-lead claims in Tintic district, Juab county.

Development: includes a tunnel and two shafts, reopened 1920.

AMERICAN MINES SYNDICATE UTA

Office: Houghton, Mich. **Mine office:** Eureka, Juab county, Utah.

Officers: Walter Fitch, pres.; J. H. Rice, v. p.; Wm. P. Seager, trea preceding officers, Cecil Fitch and Exilda Fitch, directors.

Inc. 1907, in Arizona. **Cap.,** $100,000; shares $100 par; paid in, $8 share; issued, $86,350. Is a holding company, controlling the Chief Consol Mining Co. through ownership of 361,000 shares.

AMERICAN STAR MINING CO. UTA

Office: 403 Dooly Bldg., Salt Lake City, Utah. **Mine office:** Eu Juab county, Utah.

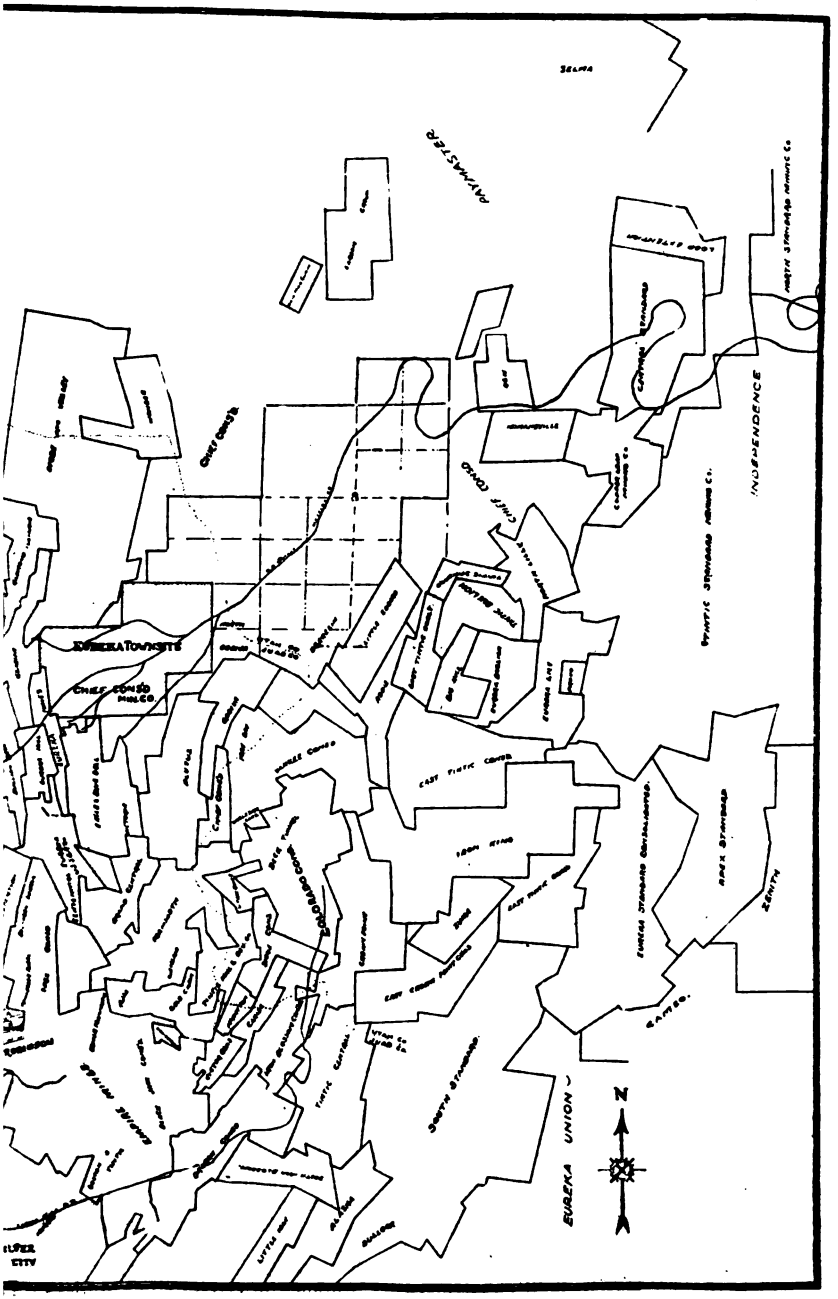
Officers: Imer Pett, pres. and gen. mgr.; Geo. E. Davis, v. p.; F R. Sands, sec.-treas., with Jas. P. Graves and Thos. P. Billings, directors.

Inc. 1909, in Utah. **Cap.,** $1,000,000; shares $1 par; issued 70 shares.

Property: 2 claims, 15 acres, between the Victoria and Chief Co dated mines, and touching the Plutus on the east and Eagle & Blue Bell west. Mine has about 1,000′ of workings, made from the 900′ level, 1,00 the 1,350′ level and about 600′ from the 1,875′ level of the Eagle & Blu mine, and is developing through the Eagle & Blue Bell, in 1919. Workings an ore channel of about 60′ width. Property considered promising.

APEX STANDARD MINING CO. UTA

Officers: Lewis Merriman, pres.-mgr., Eureka, Utah; Frank K v. p.; S. S. Pond, sec.-treas., with F. W. Brock and Hugh Hefferman, d



MINING PROPERTIES OF TINTIC DISTRICT, UTAH

new concrete-lined shaft, No. 2, was 1,000′ deep in January, 1920; it is planned to sink this shaft to the 2,000′ level. In 1918, new work totaled 15,672′, of which 4,048′ was on Plutus ground. Ore was produced from all levels from the 600′ to the 1,800′ level. New work in 1919 amounted to 25,937′.

The most important feature of the work during the first quarter, 1919, was the discovery of ore in the 1,052 drift, which has been running for a long time exploring the ground easterly from the mine. This discovery was on the Alabama claim of the Plutus Mining Co.; the management regards it as establishing a new ore channel, and as giving assurance of a second mine.

Equipment: the plant has three 150-h. p. boilers, with mechanical stokers, a hoist and 2 air compressors. The double-cylinder hoist has 6′ balanced drums, 1⅛″ steel cable, and operates 2 triple-deck cages in balance, carrying 1-ton cars, to depth of one-half mile. Buildings include a power plant, housing the boilers, hoists and air compressors; a machine shop, carpenter shop, and blacksmithy, all of steel frame. Late in 1919 there were 450 men employed.

Production:

	Ore, tons	Copper, lb.	Lead, lb.	Zinc, lb.	Gold, oz.	Silver, oz.	Value Net
1919.....	63,726	15,574	5,979,588	.....	3,753	2,757,533	$2,343,927
1918.....	66,019	4,137	7,906,831	14,597	4,100	2,354,798	1,869,819
1917.....	59,950	....	10,780,540	600,236	9,175	1,534,907	1,554,714
1916.....	83,606	1,795	18,439,153	879,410	8,331	1,739,004	1,315,442

1914.....	40,667	237,901	5,974,008	71,665	6,337	665,947	324,299
1913.....	51,866	117,328	2,597,091	.....	4,806.	1,030,132	381,267
1912.....	33,072	.....	1,141,222	.....	7,838	969,907	509,436
1911.....	8,063	.....	825,551	.....	389	306,362	117,585
1910.....	8,841	.....	800,802	.....	584	531,483	217,050

Gross average value ore in 1919 was $55.57 per ton and $36.78 net; in 1918 $45.07 and $28.49; in 1917, $40.12, and $25.93, respectively.

For 1919 the average gold content was 0.0589 oz., silver, 43.272 oz., lead (in lead ore) 11.92%, copper, 1.186%. Average New York price received for metals was 112.6c. for silver, 5.92c. for lead, 18.31c. for copper.

Chief Consolidated is a valuable property, the largest silver producer in Utah, and is under excellent management.

COLORADO CONSOLIDATED MINES CO. UTAH

Office: Provo, Utah.

Officers: Jesse Knight, pres.-mgr.; J. William Knight, v. p.; W. Lester Mangum, sec.-treas., with R. E. Allen, J. S. Smith, K. S. Jordan and A. M. Knight, directors. Controlled by Knight Investment Co.

Is a consolidation of the Beck Tunnel Cons. Mng. Co. and Colorado Mng. Co.

Inc. April, 1916. **Cap.**, 2,500,000 shares; 10c par; stock in old companies exchanged share for share. Listed on Salt Lake Exchange.

Dividends of $675,000 have been paid by the Beck Tunnel and $2,600,000 by the Colorado Cons.

Property: 28 claims, near the Sioux mines, in the Tintic district, Utah county, contains large deposits of low-grade ore carrying silver-gold, lead and copper values.

Development: main shaft is 2,000′ deep and will be sunk to water level. In 1919, the 1,900′ level was being explored; no ore has been found to date on this level.

COLORADO MINING CO. UTAH

Merged April, 1916, with the Beck Tunnel Cons. Mng. Co. and now called the Colorado Cons. Mines Co., which see.

COPPER LEAF MINING CO. UTAH

Mine in the Tintic district.

Officers: J. C. Die[illegible], Utah; J. E. Mayer, of Salt Lake City; J. W. Taylor, mgr., of [illegible] Pierpont and Alex. Hedquist, of Provo.

Inc. 1916, in Utah. **Cap.**, 600,000 shares; $1 par. Cash on hand, Jan., 19, reported as $19,000.

Property: several claims in the Tintic mining district.

Development: vertical shaft which reached the 1,250′ level in Oct., 1919. cploratory work is being done on the 1,000′ and 1,200′ levels.

ROESUS MNG. CO. **UTAH**

Succeeded by Eureka Croesus Mining Co.

ROWN POINT MINING CO. **UTAH**

Officers: Jos. Worthlin, pres.; J. F. Greer, sec.-treas.; John Roundy, n. mgr., Provo, Utah, with E. B. Kimball and Jos. Berry, directors.

Inc. 1907, in Utah. **Cap.**, $100,000; 10c par; assessable. Last assessment, per share due August 15, 1919. Listed on Salt Lake Exchange.

Property: 8 claims, 5 patented, in Tintic district. **Ore:** silver-lead. Delopment by 1,000′ shaft and 4,100′ of tunneling. Workings totaled 6,875′, pt., 1919. **Equipment:** includes a hoist and compressor. Funds for delopment raised by assessments.

& B. MINES CO. **UTAH**

Officers: C. H. Blanchard, pres., 766 First Ave., Salt Lake City; Wm. Dickson, v. p.; A. C. Ellis, sec.; with Pat Donnelly, and Chas. P. Brooks, dictors, all of Salt Lake City. L. H. Farnsworth, treas.

Inc. in Nevada. **Cap.**, $200,000; shares, 10c par; outstanding, 1,130,000 ares; listed on Boston Curb.

Property: 63 claims, in the North Tintic mining district, said to have ld, silver, lead and copper ore. The claims are in 2 groups, the D. & B. oup of 30 claims has a 200′ shaft and several hundred feet of workings. The & K. group has a 90′ and also a 200′ shaft. Property is a prospect. The stock s been profusely advertised by Orem & Co., Boston, Mass.

ESERET MOUNTAIN MINES CO. **UTAH**

Office: 409 Atlas Bldg., Salt Lake City.

Officers: W. Mont Ferry, pres.; D. H. Livingston, v. p.; Wm. D. Livgston, sec.; S. J. Truman, treas., with J. W. Mellen, J. H. Turner and I. D. ines, directors. D. E. McPherson, supt.

Cap., 1,000,000 shares; 500,000 reserved for treasury.

Property: 12 claims, 250 acres in the West Tintic mining district, Juab unty, said to show a contact vein, between limestone and porphyry, 12′ wide, rrying copper ore that assays better than 3%.

Development: by 300′ new incline shaft and an old shaft 218′ deep, ifts, stopes and raises. Plans continuing shaft to 500′ level. The 300′ level)sscut cut the vein in 1917, but owing to war conditions, mine was shut down til early in 1919, when shaft was unwatered to the 300′ level, and development)rk resumed.

RAGON CONSOLIDATED MINING CO. **UTAH**

Office: care Knight Investment Co., Provo, Utah. Mine near Tintic, ab county, Utah.

Officers: Jesse Knight, pres.; J. Will Knight, v. p.; W. Lester Manm, sec.-treas.; R. E. Allen and L. E. Ritter, directors; E. R. Higginson, supt.

Inc. 1911, in Utah. **Cap.**, $2,000,000; $1 par; issued 1,750,000; 250.000 treasury. Stock listed in Salt Lake City.

Initial dividend of 1c a share declared February 20, 1917, and continued quarly during 1917 and 1918. Is heaviest shipper in the Tintic district, as ore is)-grade pyrite used as a flux by smelters.

Property: 28 claims, patented, 122 acres, comprising the Dragon and vernor groups in Tintic district. The Governor group has 2,000′ or more the big Iron Blossom fissure in limestone, from which the great production that and the Sioux mines has come. The Dragon group shipped 100 tons per y of iron ore to the U. S. smeltery, for a long time. The Governor ground s a rich orebody of copper-silver ore developed by drifts from the Iron Blosn on the 300′, 600′, 800′ and 1,000′ levels, showing a 20′ vein with 0.5 to 10% per and 20 to 50 oz. silver. Part of the property is worked through the Black

In the tunnel connecting the workings with the Iron Blossom property, large bodies of low-grade ore were encountered in 1915.

Equipment: includes electric pump on 1,000′ level which secures water supply of the Knight-Christensen mill, and a hoist.

Production: 1,743 tons in 1914, yielding 44,006 oz. silver, 135,814 lb. copper, 57,552 lb. lead and 432.37 oz. gold; 7,804 tons in 1915, yielding 102,143 oz. silver, 490,750 lb. copper, 14,766 lb. lead and 2,559 oz. gold. Later figures not available.

Shipping 260 tons daily, 1919.

EAST CROWN POINT MINING CO. UTAH

Address: Provo, Utah.

Officers: R. A. Badger, pres.; H. C. Jex, sec.

Inc. 1907, in Utah. Cap., $100,000; shares 10c par; assessable; last assessment, ½c a share, delinquent October 4, 1919. Listed on Salt Lake Exchange.

Property: 9 silver-lead claims in Tintic district, Juab county, Utah. Idle for some time, but planning to resume work.

EAST STANDARD MINING CO. UTAH

Officers: Fred C. Allen, pres.; Isaac Isaacson, v. p.; M. C. Morris, sec.-treas., with J. Frank Quist, and Gus Wickman, directors.

Inc. 1919, in Utah. Cap., $100,000; 10c par; 600,000 issued.

Property: 9 claims, adjoining the Tintic Standard on N. E., in East Tintic district, Juab county, formerly known as the White Track. Management states that a shaft will be sunk to 1,000′ depth.

EAST TINTIC COALITION MINING CO. UTAH

Address: Provo, Utah.

Officers: John M. Bestelmeyer, pres.; H. G. Blumenthal, v. p.; A. Bestelmeyer, sec.-treas., with D. R. Beebe, and H. C. Hicks, directors.

Cap., $75,000; shares 5c par. Listed on Salt Lake Exchange. In July, 1919, company stated that it had $26,312 in cash and no debts.

Property: 3 patented claims, located just W. of the Eureka Bullion, said to have gold-silver-lead ore.

Development: 225′ tunnel, and two incline shafts, one 142′, and one 127′ deep. In July, 1919, started work on a new shaft. Is a prospect.

Equipment: newly installed, includes a head-frame, electric hoist, compressor and drills.

EAST TINTIC DEVELOPMENT CO. UTAH

Property bought, 1916, by Eureka Lilly Mining Co., which see.

EMPIRE MINES CO. UTAH

Address: Jesse Knight, Provo, Utah.

Inc. 1907, in Utah. Cap., 3,000,000 shares; 5c par. Listed on Salt Lake Exchange.

Is a merger of the Black Jack, Boston & Tintic, Central Mammoth, Lower Mammoth, Garnet, Old Colony and Eureka, Manhattan and Opex Consolidated mining companies, all controlled by the Knight Investment Co.

In April, 1917, the property of the Carisa Gold & Copper Mng. Co. of Maine at Mammoth, Utah, was bought for $115,000.

Property: over 700 acres in the Tintic district, Utah, east of Silver City and south of Eureka.

Practically all the work done since the consolidation has been carried on through the Lower Mammoth shaft, the main work late in 1919, being on the 1,800′ level, where a 3′ vein of good copper ore was cut in Black Jack group.

EUREKA BULLION MINING CO. UTAH

Address: J. M. Bestelmeyer, mgr., Provo, Utah.

Officers: H. C. Hicks, pres.; J. M. Bestelmeyer, v. p.; August Bestelmeyer, sec.-treas, with N. C. Hicks, and H. G. Blumenthal, directors.

Inc. 1916, in Utah. Cap., $50,000; shares 5c par; assessable. Listed on Salt Lake Exchange.

In January, 1920, company formed the Tintic Silver Mining Co., with capital of $150,000.

Property: 7 patented claims and 2 unpatented claims, formerly ab[illegible]

Grutli Mining Co., were bought at sheriff's sale, 1916, for $8,960. Claims are he East Tintic district, W. of the Tintic Standard property, and are said to w a 50' vein on surface with a limestone porphyry contact.

Development: by 800' shaft reported to show quartz in a cave 150' ;, 50'-75' high and 75' wide at 500', with manganese. A drift on the 800' l is said to have opened a 4' vein of ore in June, 1919, with assays 9 to 20% l. 23 to 70 oz. silver, and about $2 gold per ton. A winze is being sunk below level to cut two intersecting fissures.

Equipment: includes compressor, 60-h. p. steam boiler, hoist, etc.

REKA CROESUS MINING CO. OF NEW YORK **UTAH**

Controls or owns the Eureka Utah Mining Co. of Salt Lake City. E. L. res, pres.

Cap., $1,500,000; shares $1 par.

Property: the Huebner mine, at Eureka, Juab county, Utah, has shipped e high-grade lead-silver ore. Reported in 1919, that a 250-ton mill would be ted.

REKA HILL MINING CO. **UTAH**

Office: Deseret National Bank Bldg., Salt Lake City, Utah. **Mine e:** Eureka, Juab county, Utah.

Officers: Moylan C. Fox, pres.; Waldemar Van Cott, v. p.; Jas. E. key, sec., with Ed. W. Packard, directors. Jackson C. McChrystal, managing .; Chas. Weisbaker, supt.

Inc. Nov. 12, 1875, in Utah. **Cap.,** $1,000,000; shares $100 par. Is a e corporation, credited with having paid $2,000,000 in dividends. Paid $1 lend, 1916. Annual meeting, third Tuesday in February.

Property: 5 claims, 27 acres, patented, also a 25-acre millsite and 150 s miscellaneous lands, in the Tintic district, adjoins the Bullion-Beck and tennial Eureka. The Eureka Hill mine has a 1,500' main working shaft and it 30 miles of workings. Orebodies are lenticular deposits, carrying cuprite, achite and enargite, with average values of about 1.4% copper, 6% lead, 25 ilver, and $3 gold per ton. Mine worked for 45 years, but shut down, 1911, only old workings mined by lessees since then. Produced many millions of r-lead ore from above 1,000' level. Deep development in future will be from cent mines.

Knight-Dern interests, 1916, leased tailing dumps of Eureka Hill, reported ntain 200,000 tons of ore, averaging $4.50 per ton. Lessees were shipping in 1919.

REKA KING MINING CO. **UTAH**

Directors: Ray Van Cott, Judge Bldg., Salt Lake City; Geo. M. Chiulos, . Moreton; Geo. B. Bywater, and F. J. Sylvester.

Property: in Tintic mining district. In June, 1919, consolidated with Paymaster Mines Co. The company will spend $50,000 in development work ne 1,200' level.

REKA LILLY MINING CO. **UTAH**

(Succeeds East Tintic Development Co.)

Office: Judge Bldg., Salt Lake City, Utah. **Mine office:** Eureka, Utah.

Officers: N. F. Snyder, pres.; Thos. Barrett, v. p.; with Elmer Holder- and Jos. Galigher, directors. Gideon Snyder, sec.-treas. Grant Snyder, New York, supt.

Inc. 1907, in Utah. **Cap.,** $1,300,000; shares $1 par; assessable; No. 9 sment, 1c per share, was called in June, 1919; last assessment, 1c a share, quent September 15, 1919; outstanding, 1,300,000 shares. Listed on Salt Exchange. Company is a consolidation of the Lilly and Provo mining anies.

Property: Eureka Lilly mine, 8 claims, 6 patented, in the East Tintic district, adjoining the Tintic Standard mine on the west and including h mine of the East Tintic Dev. Co., bought in 1916, from which con- high-grade silver-lead ore was mined years ago.

lopment: by 1,660' incline shaft, which passes through broken o depth of 1,200', where it enters the underlying quartzite, the ground

is cut by N. 10° E. and E.-W. fissures, and ore occurs at intersections. On the 1,400′ level these fissures have so far shown no large bodies of commercial ore. On the 1,660′ level a fissure shows 5″ to 8″ of copper-silver-gold ore and a drift on the vein. Driving on 1,660′ level and sinking shaft in February, 1920.

Produced over $150,000 worth of ore, running 42% lead and 31 oz. silver per ton, from above the 200′ level.

EUREKA METALLURGICAL CO. UTAH

Addres: Eureka, Utah.

Officers: M. M. McChrystal, pres.; R. V. Smith, v. p. and gen. mgr.; Thos. McCormick, treas.; Judge E. Pike, sec.; above, with J. Westerdahl, directors. C. M. Oakes, asst. mgr.

Inc. 1917, in Utah. **Cap.,** $500,000; shares $1 par.

The company was organized to conduct a general metallurgical business on the strength of patents of R. V. Smith for treating carbonate lead-zinc ores by flotation. Operates a small mill at Eureka.

EUREKA MINES CO. UTAH

Address: John H. McChrystal, gen. mgr, Eureka, Utah.

Officers: Wm. R. Wallace, pres. and gen. mgr.; Jackson C. McChrystal, v. p.; J. E. Berkley, sec.; H. J. Wallace, treas., with John H. McChrystal, directors.

Inc. 1916, in Utah. **Cap.,** $100,000; shares 10c par. Listed on Salt Lake Exchange.

Property: in the Tintic district, is bounded by the Chief Consolidated, Gemini, Centennial, Eureka and Eagle and Blue Bell mines.

Ore: silver-lead of milling grade, averaging about 6 oz. silver and 4% lead with occasional zones of enrichment.

Development: mine has been opened up through the deep workings of the Gemini on the 900′ to 1,500′ levels. Shipments are reported to carry 7 oz. silver and 9% lead and to average $70 to $80 a ton. At last report, lessee had found good ore on the 1,000′ level and company work was being done on the 1,100′ level.

EUREKA STANDARD MINING CO. UTAH

Address: F. G. Richmond, mgr., Salt Lake City.

Property: 14 claims, about 280 acres, in the East Tintic district, formerly known as the Montana group. Shows several large outcrops.

Development: by 500′ 3-compartment shaft. Work on property was resumed in 1919, and a 1,500′ shaft started.

FARRAGUT MINING & MILLING CO. UTAH

Address: care Ashby S. Thatcher, Boston Blk., Salt Lake City.

Property: the Admiral Farragut group of claims in the North Tintic district, near Eureka, developed by a 265′ shaft, which was to be sunk to 500′. No recent returns; probably idle.

GEMINI MINING CO. UTAH

Office: 723-4 Kearns Bldg., Salt Lake City, Utah. **Mine office:** Eureka, Juab county, Utah.

Officers: E. W. Packard, pres.; Jackson H. McChrystal, v. p. and mgr.; J. E. Berkley, sec.; E. O. Howard, treas., with W. Van Cott, directors. John H. McChrystal, supt.

Cap., 5,000 shares, $100 par. **Dividends:** to 1918, totaled $482 per share. In 1916, $16 per share was paid and in 1917 $20 per share.

Property: the Gemini is a silver-lead mine with accessory copper in shoots. There are 3 fissure veins, in an ore-channel about 450′ wide, transversely by a number of cross-fissures, making a rather complex system orebodies, the main fissure, of 15 to 20′ width, having a S. E. dip, with shoots raking to the north. Ore in the upper workings averages about lead and 40 oz. silver, while the bottom level, at 1,600′, shows a 20′ vein

The Gemini has been a regular producer since 1886. Management, like many tah, extremely reticent about giving any information.

DIVA MINING CO. **UTAH**

Office: 735 Kearns Bldg., Salt Lake City, Utah. **Mine office:** Eureka,) county, Utah.

Officers: E. W. Packard, pres.; J. C. McChrystal, v. p. and gen. mgr.; . Berkley, sec.; E. O. Howard, treas.

Cap., $1,000,000; $1 par. In 1919, 144,000 treasury shares offered to ic at 30c. Financial statement for 1918 showed receipts from ore sales, 260; expenditures included $20,502 paid lessees and $14,029 for development. ı on hand, January 1, 1919, $4,112.

Property: 64 acres of patented claims in Tintic district. Only leasing for some years, company not operating on account of settlement of estates.

Development: by 1,200′ shaft, with a winze 150′ below that level. New in 1918 amounted to 1,057′. Good lead-silver ore is said to have been ed on the 1,300′ and 1,350′ levels.

Equipment: 250-h. p. hoist, compressor, 100-ton concentrator, ore bins, lings, etc.

From 1908 to April 1, 1917, production was 13,701 tons of crude ore and tons of concentrate, worth $805,687. In 1916 zinc and silver-lead ores ed $93,000, mostly from 700′ level. In 1918, ore mined totaled 1,800 tons, age value, $37.13 per ton.

.D CHAIN MINING CO. **UTAH**

Provo, Utah. **Mine office:** Mammoth, Juab county, Utah.

Officers: C. E. Loose, pres. and gen. mgr.; J. T. Farrar, v. p.; P. G. rson, sec.-treas., with G. Simmons and John R. Turloes, directors. W. D. e, supt.

nc. Dec., 1910, in Utah. **Cap.,** $250,000; shares 25c par. Listed on Salt Exchange.

Dividends: to date, $130,000. Company absorbed the Ajax Mining Co., to have paid upwards of $1,000,000 in dividends.

roperty: the Gold Chain group and Ajax mine in the Tintic district. lopment on the 1,500′ level opened an orebody averaging 15 to 20 oz. silver, 50% lead and $2 to $3 gold per ton.

Development: new work in 1919, was being done from the 1,800′ level Empire Mines Co. Lessees are working on the level above.

Equipment: hoist, 17-drill compressor, and electric motors.

ND CENTRAL MINING CO. **UTAH**

Office: Provo, Utah. **Mine office:** Mammoth, Juab county, Utah.

Officers: Jos. T. Farrar, pres.; H. L. Holbrook, v. p.; Preston G. Peter- ec.-treas.; Col. Edwin C. Loose, gen. mgr.; W. D. Loose, supt.

nc. Feb., 1902, in Colorado. **Cap.,** $600,000; increased 1909 from $250,- hares $1 par, non-assessable; issued 600,000. Stock listed on Salt Lake Ex- e.

Dividends: in 1914, 15c per share; in 1915, 2½c; in 1916, 8c; in 1917, in 1918. 12c. Total dividends to 1919, $1,802,000. In April, 1919, 4c was

roperty: the Grand Central is the deepest mine of the Tintic district. oins the Centennial Eureka and is opened to the 2,600′ level, carrying a ith an orebody 200′ wide in places and of low average grade, though it is rgest orebody in the Tintic camp. A second ore shoot, 700′ west of the e, and with parallel strike, was opened on the 2,000′ and 2,100′ levels. This ot averages 15 to 20% copper on the 2,380′ level and has been opened up 1,600′ level for a distance of 1,200′, showing a width of 50 to 100′. At nt the ore is bunchy, requiring careful sorting. Mine producing from the the 2,300′ levels, inclusive.

ipment: includes hoist, tramway and electric power. Mill to be ed after the Knight Christensen plant has proved successful.

uction: 117 cars or about 5,500 tons ore in first quarter of 1919.

rty and management good.

v. p. and supt.; Col. R. M. Wilkinson, sec., with Earl McIntyre, and R. E. Mark directors.

Inc. 1881, in Utah. **Cap.**, $10,000,000; shares $25 par. Reincorporated Dec. 5, 1906, in Nevada. **Cap.**, $1,000,000; shares $2.50 par. Controls the Cleveland Mining Co., through ownership of 70% of capital stock. Annual meeting, first Tuesday in February.

Dividends: 5c per share in 1913, 5c in 1915, 25c in 1916, and $1 in 1917; total to date, $2,820,000.

As a result of 9 years' litigation, a judgment in favor of the Grand Central Mining Co. was rendered, 1910, against the Mammoth Mining Co., and necessitated the levying of a 10c assessment, 1910, the first in the history of the company. Assessment No. 2, 5c a share, was payable in March, 1919, to provide money for further development work.

Property: 19 claims, in Tintic distrct. Mine opened about 1870, is undeveloped extensively and has a 2,300' main shaft, the deepest in the Tintic camp. Irregular shoots and chimneys of gold, silver, and copper ores occur.

Equipment: includes complete plant, installed in 1910. About 50 men employed.

Production: 36.000 tons in 1914; 26,000 tons in 1915; 36.000 tons in 1916; 24,000 tons to July, 1917; about 18,000 tons in 1918. Dumps said to contain over 250,000 tons.

MAMMOTH No. 2 MINING & MILLING CO. UTAH

Idle. **Office:** 409 Hooper Bldg., Salt Lake City, Utah. Mine at Mammoth, Juab county, Utah.

Officers: Wm. H. McIntyre, pres.; Samuel McIntyre, v. p. and treas.; Isaac Jennings, sec.

Inc. 1900, in Utah. **Cap.**, $300,000; $1 par; assessable; fully issued.

Property: 2 claims, patented, adjoining the Mammoth Mining Co. shows lead and copper ores.

MAY DAY MINING & MILLING CO. UTAH

Address: 515 Dooly Block, Salt Lake City, Utah. **Mine office:** Eureka, Juab county, Utah.

Officers: John Dern, pres.; M. P. Braffet, v. p.; A. Reeves, sec.; W. S. McCornick, treas., with J. C. Dick, directors.

Inc. 1896, in Utah. **Cap.**, $200,000; shares 25c par; assessable; all outstanding. Stock transferred at company's office. Annual meeting, first Monday in April. Listed on Salt Lake City Exchange.

Balance sheet for year ended March 31, 1919, shows $9,289 received from sales, $16,122 from two assessments, $1,582 from sundries, a total of $27,... Expenses totaled $27,271. Dividends total $300,000.

Property: 6 claims, 5 patented, 60 acres, in the Tintic mining district.

Ore: zinc, silver and lead in limestone.

Development: by 1,100' vertical shaft and 1,500' tunnel. The mine has been practically out of ore several times: at one time the supply was so low that stock dropped to 1c per share: the larger part of its dividends has been paid since then.

Equipment: includes 50-h. p. electric hoist and compressor, capacity 250 cu. ft.

Production: for year ending March 31, 1917, 1,360 tons lead ore, valued at $40,980; 569 tons zinc ore valued at $18,378 for year ending March 31, 1... 591 tons lead ore, valued at $9,126 and 18 tons gold ore, valued at $163.

Development work is being carried on with the hope of finding new ore bodies. Part of the property is leased, and company itself leases part of the Chief Consolidated ground.

MONO DEVELOPMENT CO. UTAH

Address: J. H. Cook, pres., or Matt Gisborn, Salt Lake City. Mine at Dry Canyon, near Ophir, Salt Lake county, Utah. Stock assessed a share.

Property: a group of claims, 300 acres, noted in 1872-3 for its high grade silver ore. Claims are near the following producing mines: Mono...

, Thad Stevens, Kearsarge and Eureka Ophir. A new wagon road was built tober, 1917, from Dry Canyon to the railway; heretofore ore was hauled 9 es to Stockton.

Developed: by 2,500′ tunnel. No recent information; probably idle.

)RTH BECK MINING CO. **UTAH**

Address: E. J. Radatz, 19 Haxton Place, Salt Lake City, Utah.

Property: in northwestern part of Tintic, adjoining Centennial-Eureka, Gemini, developed by shaft 1,450′ deep in January, 1920, to be sunk to 1,600′. eached zone was opened at 1,200′. Mine is fully equipped.

Management does not reply to requests for information.

)RTH SCRANTON MINING CO. **UTAH**

Address: H. B. Merrihew, Box 355, Lehi, Utah.

Officers: H. B. Merrihew, pres.-mgr.; B. C. Lott, v. p.; F. R. Heidech, sec.-treas., with D. H. Cox, directors.

Inc. May, 1905, in Utah. **Cap.,** $100,000; shares 10c par; assessable; 000 issued. Operating expenses in 1916 were $1,684.

Property: 10 unpatented claims, 200 acres, on west slope of Tintic ge, in North Tintic district, Utah, 3½ miles by good road from rail-l. Group shows outcrops of silver-bearing zinc-lead ore in a well-ned fissure in dolomitic limestone. **Ore:** consists of 6 to 8″ streaks, re-ed to carry 23% lead and 6 oz. silver per ton.

Development: by 2 tunnels and winzes with total workings of 2,300′. nel No. 1 exposes 18% zinc ore at depth of 40′. Tunnel No. 2 shows ore as-ng 74% lead and 54 oz. silver, at depth of 75′. While not in commercial ıtity, this ore warrants further development to reach the main fissure. The re has been followed down for 200′.

Is a prospect.

RTH STANDARD MINING CO. **UTAH**

Address: 230 Judge Bldg., Salt Lake City, Utah.

Officers: Dr. C. F. Wilcox, pres.; John Dorius, sec.-treas.; J. H. Man-v. p. and mgr. Cap., $100,000; par 10c. Stock is listed on Salt Lake Exge. Assessable; assessment No. 1, 1c a share, called October, 1919.

Property: 22 claims, north of the Tintic Standard at Eureka, Juab ty. Company is sinking a 2-compartment shaft, which had reached a depth 0′ in October, 1919.

Equipment: includes electric hoist, and a compressor.

)EN-TINTIC LEASING CO. **UTAH**

Has a lease on part of property of Tintic Central Mining & Milling Co., h see.

) SUSAN MINING CO. **UTAH**

Mail returned, 1918, from former address, 411 Felt Bldg., Salt Lake City,

)fficers: W. H. Simmons, pres.; P. F. Thompson, v. p.; E. D. R. Thomp-sec.-treas.-mgr., with F. A. Druehl, directors.

nc. 1899, in Utah. **Cap.,** 400,000 shares; 10c par; 257,572 shares out-ing. Annual meeting, first Monday in January.

Property: 3 patented claims, 25 acres in Tintic mining district, Juab y, shows gold-silver lead ore in fissure veins in porphyry and monzonite. oped to depth of 300′ by 1,500′ tunnel. The mine, at last accounts was ed by lessees on a royalty basis.

X CONSOLIDATED MINES CO. **UTAH**

s a part of Empire Mines Co., which see.

IR HILL CONSOLIDATED MINING CO. **UTAH**

)ffice: Miner Bldg., Butte, Mont. **Mine office:** Ophir, Tooele county,

)fficers: Wm. A. Clark, pres.; W. C. Siderfin, sec.; M. H. Hartman, ngr., with Chas. W. Clark, directors. A. G. Swanson, mine supt.; F. Wel-, mill supt.; E. Bowman, engr. Company is managed as a close corpora-

)roperty: one-half mile north of Ophir, carries the 5′ Top-vein, the

20′ Big vein, the Middle vein 10′, the Copper vein 8′, and the Blue vein, 6′ thick and from 10′-100′ wide.

Ore: contains argentiferous galena, with pyrite, averaging 8% lead and 10 oz. silver per ton; also some copper and zinc ores. Ore occur as replacements in argillaceous limestone and shale, in 3 clearly defined shoots, known as the Wild Delirium, Miner's Delight and Western Stope.

Development: an 1,800′ incline shaft, with the usual levels and stopes, also a transportation tunnel nearly 1 mile long, through which all ore is taken. This tunnel intersected the vein on the 1,300′ level; it also drains the mine at depth.

Equipment: includes a steam plant, not operating, and a hoist; there is a gravity tramway from the mine to the 200-ton mill.

Production: averages about 200 tons daily of lead-silver ore, with a little gold and 2½% copper. Concentrates run about 10-20 oz. silver and 10-12% lead per ton. The property is an excellent one. A branch of the Salt Lake Route known as the St. John & Ophir R. R. Co. was built to the property in 1912.

In 1919, mine produced 33,895 tons of ore, yielding $705,856 gross, or $155,63[illegible] net. Ore contained 373,435 oz. silver, 6,595,743 lb. lead and 210,241 lbs. copper.

OPHIR KING GOLD MINING CO. UTAH

Mine near Ophir, Tooele county, Utah.

Inc. November, 1917, in Utah. **Cap.**, $10,000; shares 2c par; assessable.

Lands: 30 acres, patented, 9 miles from railroad, adjoining the Ophir Hill and Cliff Mining Co.'s properties carry auriferous and argentiferous copper and lead ores. Mine has 400′ tunnel, with some crosscutting and several shallow shafts. Property and equipment were sold at sheriff's sale in November, 1914, to John B. Holmes, for $1,750, to satisfy a judgment obtained by Holmes.

OPHIR METALS CO. UTAH

Address: W. B. Farmer, Ophir, Tooele county, Utah.

Inc. 1919, in Utah.

Property: that of the Lion Hill Consolidated Mines Co., 640 acres in the Ophir section of the Tintic district, carrying silver-lead ore in fissure veins in limestone.

Development: by over 5,000′ of shafts, tunnels, and drifts. A tunnel is to be driven 500′ below the old workings.

OPHIR QUEEN MINING CO. UTAH

S. Crawford, Cedar River, Mich., controls property.

OPHIR SILVER MINES CO. UTAH

Officers: Guy R. La Coste, pres., 21 Mining Exchange, Salt Lake City; O. D. Coughten, v. p.; E. W. Toole, sec.-treas., with C. M. Beck, directors.

Inc. Nov., 1919, in Utah. **Cap.**, $100.000; par 10c; 600,000 shares in treasury.

Property: 15 claims, in Ophir district, Tooele county, adjoining the Ophir Hill property, said to show a well-defined vein of silver-lead ore. Present development, mainly tunnels, is estimated to have cost $30,000. Management plans to continue the 630′ tunnel to the shale-lime-porphyry contact.

OPHIR-UTAH MINING CO. UTAH

Idle. **Office:** Salt Lake City, Utah. Mine near Ophir, Tooele county, Utah G. G. Schliep, pres.; C. L. Olson, sec.-treas.

Inc. Feb. 13, 1909, in Utah. **Cap.**, $250,000; 25c par.

Lands: 7 claims, 9 miles from railroad, show copper and lead ores. Has several buildings and a hoist.

OPOHONGO MINING CO. UTAH

Office: Provo, Utah.

Officers: Wm. Hatfield, pres. and mgr.; J. H. Hatfield, v. p.; J. W. Hatfield, sec-treas.; F. E. Birch, mgr.

Inc. 1908, in Utah. **Cap.**, $25[illegible] shares 25c par; assessable. Assessment No. 4, [illegible] share, le[illegible] 1919. Shares are listed on the Salt Lake Stock [illegible]

Dividend [illegible] and t[illegible]rations in 1911-12, and one [illegible]

anuary 30, 1913, a total of $80,907 to 1916. Stock is listed on the Salt Lake ıange.

Property: 3 claims, patented, in the vicinity of the Black Jack and Ajax s.

Development: by shafts and tunnels, with over 2,000′ of workings, to ı of 1,800′. The mine is operated jointly with the Gold Chain, with which :onnected on the 300′ level, and hoisting is through the Black Jack shaft. The level shows an 18′ orebody, said to give assays up to 10% copper and $60 per ton. The 700′ level shows this same ore shoot. Present development ainly in the winze below the 1,800′ level, down 75′ in favorable ground.

Equipment: owned jointly with the Gold Chain, includes an air com- ıor.

Production: has been intermittent since it began in 1909. The recent ısment was levied with the idea of providing money to start work.

ORD CONSOLIDATED MINING CO. **UTAH**

Eureka, Utah. James Crooks, pres.; Geo. W. Owen, sec.-treas.; C. H. ggs, mgr.

Inc. June, 1909, in Utah. **Cap.,** $25,000; shares 5c par; assessable.

Lands: 9 claims, patented, show copper and lead ores. Levied an as- nent of one-half cent, early 1911, to pay indebtedness incurred through ıtion. No work has been done since patent to property was issued.

ION QUEEN MINING CO. **UTAH**

Address: Provo, Utah. **Mine office:** Dividend, Utah.

Officers: Thos. Pierpont, pres.-mgr.; J. William Knight, v. p.; J. C. , sec.-treas., with Andrew Sutherland, supt., and Wm. Scowcroft, directors.

Property: 16 claims, in East Tintic district. Management plans sink- ı 3-compartment shaft to 500′ level.

TUS MINING CO. **UTAH**

Controlled through stock ownership by Chief Consolidated Mng. Co.

Address: Eureka, Juab county, Utah.

Inc. 1907, in Utah. **Cap.,** $100,000; shares 10c par; fully issued; assess- Last assessment of 1 ct. per share delinquent October 21, 1919. Absorbed Tetro Mining Co., January, 1909. Shares are listed on the Salt Lake Stock ıange.

Property: 14 claims, patented, including the Tetro group of 3 claims, which the Tetro Mining Co. paid $18,000 in dividends. Mine carries erous and argentiferous lead and copper ores, developed by a 600′ shaft, 3,700′ of tunnels, and 1,250′ of other workings. Is being developed by Cons. Mining Co.

VO MINING CO. **UTAH**

Address: Provo, Utah.

Officers: Jos. S. Berry, pres.; J. W. Farrer, v. p.; D. W. Conover, sec.- . with Geo. H. Naylor, W. J. Tregonning, and J. A. Barclay, directors.

Inc. Feb. 28, 1887, in Utah. **Cap.,** $100,000; 10c par; assessable; 837,440 d. Listed on Salt Lake Exchange.

Property: 3 patented claims at North Tintic, adjoining the Tintic Stand- Lead-silver-zinc ore occurs in pockets. Development by 300′ shaft. As any was without funds, control passed to a new syndicate late in 1919, paid 9c. a share for the stock.

EN ISABELLA MINES CO. **UTAH**

Officers: Alex. Caldwell, pres., Eureka, Tooele county, Utah; Alex. Irvine, v. p.; S. R. Thurman, sec.-treas., with Daniel Caldwell and Bert man, directors.

Inc. 1916, in California. **Cap.,** $50,000.

Property: 14 claims adjoining the Sharp mine, Tintic district, and car- the extension of the Sharp vein. The Sharp mine while under 2-year bond to Mr. Alex. Caldwell produced 15 carloads of silver-lead ore, to $20 per ton. At last accounts, 1918, the company was planning on the property.

RAYMOND-ILLINOIS MINING CO. UTAH

Office: 312 McCornick Bldg., Salt Lake City, Utah. Mine is at Eureka, Juab county, Utah.

Officers: F. J. Hagenbarth, pres. and mgr.; J. M. Wheeler, v. p.; J. C. Lynch, treas., and Thos. Kearns, directors; M. B. Johnson, sec.

Inc. 1905, in Utah. **Cap.,** $450.000; shares $1 par; assessable. Assessments of one-half cent a share fell due May 7, and June 29, 1917.

Property: 15 patented claims, in the Tintic district, shows fissures and replacements in limestone. Developed by about 1 mile of tunnels and a 1,50[illegible] vertical shaft, which as yet have shown but little ore. The bottom workings are wet. Diamond drilling was done, 1909-10, from the bottom of the shaft. Idle since 1914.

RICHMOND & ANACONDA CONSOLIDATED MINING CO. UTAH

See Uncle Sam Consolidated Mining Co.

RIDGE & VALLEY MINING CO. UTAH

Address: 723 Kearns Bldg., Salt Lake City, Utah. **Mine office:** Eureka, Juab county, Utah.

Officers: Wm. R. Wallace, pres.; Jackson C. McChrystal, v. p.-mgr.; J. E. Berkley, sec.; H. J. Wallace, treas.; J. H. McChrystal, supt., with Sarah H. McChrystal, directors.

Cap., $1,000,000; originally $150,000, increased 1915 to $500.000 and in 1916 to present amount; par, 50c.; issued 500,000 shares.

Property: 39 claims, 443 acres, adjoining the Gemini property, and operated through the Gemini shaft for many years. Ores carry lead-silver-copper-gold values.

Development: by 1,800' shaft, and extensive workings. Recent development work on the 1,800 foot level is claimed to be satisfactory. In 1[illegible] 4,000 tons of ore shipped sold for $14,721, giving net profits of $4,240. In January 1919, 700 tons ore were shipped.

SCRANTON LEASING CO. UTAH

Address: care Wade & Funkel, Scranton mine, Eureka, Utah. Operates under lease the Scranton mine at North Tintic, Utah. Produces lead and zinc ores from new discovery on surface and from Magazine tunnel. Employs 52 men.

In 15 months, to July, 1917, the output was 6,000 tons, containing 20% lead and 32% zinc. Shipments were made in 1918; no later information available.

SCRANTON MINING & SMELTING CO. UTAH

Offices: McIntyre Bldg., Salt Lake City and Scranton, Tooele county, Utah.

Officers: T. G. Wolf, pres.; H. A. Knapp, treas., with B. H. Throop, of Scranton, Pa., R. J. Deighton, sec.-mgr., and Wm. H. Bramel, Salt Lake City, directors.

Cap., $30,000; shares $1 par.

Property: in the North Tintic district, is an old producer of silver, lead and zinc ore. The company operated the mine until 1915, and the stopes were pretty thoroughly worked out.

SELMA MINES CO. UTAH

Office: Kearns Bldg., Salt Lake City, Utah. **Mine office:** Knightsville, Juab county.

Officers: J. C. Jenson, pres. and gen. mgr.; L. C. Peterson, v. p.; O. Carlson, sec.-treas., with R. A. Brown and Chas. Biers, directors.

Inc. Dec., 1909, in Utah, as successor of Selma Consolidated Mining Co. **Cap.,** $50,000; shares 5c par; assessable, except 50,000; 740,000 outstanding. Last assessment, half cent a share, was levied in March, 1919. Statement made in June, 1917, showed current assets of $13,655, and current liabilities, $[illegible]. Miners have taken half of their wages in shares.

Property: 34 claims, unpatented, near the Lehi Tintic mine, supposed to carry the northern extension of the mineral zone of the Colorado mine. 3 miles from a railway. The property has a lime-porphyry contact, with 3 principal fracture zones carrying silver-lead-copper ore.

Development: by 210′ three-compartment shaft, and tunnels showing ied ground with occasional bunches of good ore. The old company ided about $75,000 on development. Workings total 2,650′, including els 80, 900, and 1,400′ long, opening ground to depth of 1,000′. **Equip-**: includes electric power and electric hoist.

UX CONS. MNG. CO. **UTAH**

Succeeded by Sioux Mines Co., which see.

UX MINES CO. **UTAH**

s a reorganization of Sioux Cons., fully described in Vol. XIII.

Address: Provo, Utah.

Officers: Reed Smoot, pres.; R. L. Anderberg, sec., with Jesse Knight, Lester Mangum, and K. S. Gordon, directors.

Inc. 1917, in Utah. **Cap.**, $100,000; par 10c; outstanding, 498,470.

Property: 6 patented claims, 47 acres, in Tintic district, said to show -lead ore.

Development: by shaft to the 1,000′ level. In April, 1916, the company ned work; sank the shaft from 600′ to 1,000′ level. Drifts for about 500′ n the 800′ and 1,000′ levels in search of the continuation of the orebody l in the Iron Blossom, failed to find commercial ore. Considerable quartz found and management believes that ore will be found at greater depth.

TH IRON BLOSSOM MINING CO. **UTAH**

Robinson, Juab county, Utah. George Jones, pres.; T. L. Schofield, sec.-

Inc. 1908, in Utah. **Cap.**, $100,000; shares 10c par; assessable; outstand-241,000. Listed in Salt Lake City.

Property: 4 claims in the Tintic mining district, showing silver-lead ore.

TH STANDARD MINING CO. **UTAH**

Address: 422 Judge Bldg., Salt Lake City.

Officers: E. J. Raddatz, pres.-treas.; W. I. Snyder, v. p.

Cap., 1,300,000 shares; assessable; last assessment ¼c a share, was l in June, 1919. Listed on Salt Lake Exchange. Company is a consolida- of United Tintic Mines and the South Standard Mining Co.

Property: 47 claims, in Juab and Utah counties, includes the Montreal, c Combination, Tintic Empire, and Bullock groups.

NSEA CONSOLIDATED MINING CO. **UTAH**

Office: Knight Bldg., Provo, Utah.

Officers: Jesse Knight, pres.; R. E. Allen, sec.-treas.

nc. in Utah. **Cap.**, $100,000; shares 10c par; 999,798 outstanding; as-ble. Listed on Salt Lake Exchange.

Owns 145 acres in Tintic mining district, said to show silver-lead ore. Prop- closed. Lessees working the dumps, at last account.

NSEA EXTENSION MINING CO. **UTAH**

Has passed on. Described in Vol. XIII.

MPSON-QUINCY CONSOLIDATED MINING CO. **UTAH**

Reorganized 1915, as New Quincy Mining Company, which see.

TIC BULLION MINING CO. **UTAH**

Officers: John M. Bestelmeyer, pres., Provo, Utah; T. Nicholes, v. p.; Hicks, sec.; August Bestelmeyer, treas., with Samuel Bennett, directors.

nc. 1919,in Utah. **Cap.**, $75,000; 5c par.

Property: located in East Tintic mining district, adjoining Eureka on.

TIC CENTRAL MINING & MILLING CO. **UTAH**

Property under lease to Ogden Tintic Leasing Co.

Office: Provo, Utah. **Mine address:** T. T. Holdaway, Knightsville, Juab y, Utah. J. T. Farrer, pres.; R. L. Anderberg, sec.-treas.

nc. June, 1907, in Utah. **Cap.**, $50,000; shares 5c par; assessable; all d. Three assessments yearly of one-half cent a share. Last assessment, alf cent a share, delinquent October 17, 1919. Stock listed on Salt Lake ange.

Property: 20 claims, covering ground adjacent to the Iron Blossom in

the Tintic district and supposedly carrying the extension of the ore-bearing fissures of that mine. These fissures are in limestone and are cut by porphyry, carrying irregular orebodies. Work is being done through the Iron Blossom mine.

Development: includes a 1,038′ shaft with extensive workings on the 870′, 920′ and 1,020′ levels. In 1917 some lead-silver ore was opened on the 900′ level.

TINTIC CHIEF MINING CO. UTAH

Office: Provo, Utah.

Officers: H. C. Hicks, pres.; J. M. Bestelmeyer, v. p.; August Bestelmeyer, with E. A. Peay, and N. C. Hicks, directors.

Inc. July, 1919, in Utah. **Cap.,** $75.000.

Property: located in Tintic mining district, Juab county.

TINTIC COALITION MINES CO. UTAH

Frank Hornberg, pres. and mgr.

Property: located in south end of the Tintic district several miles S. E. of Silver City, said to show lead-silver ore. Developed by 1,800′ tunnel. Company has done no shipping since 1912. A part of the property has been worked by lessees in recent years but company resumed operations in 1919.

TINTIC COMBINATION MINING CO. UTAH

Consolidated with Tintic Empire and Bullock companies to form United Tintic mines, now dead, the property passing to the Tintic Tunnel Co.

TINTIC CO. UTAH

Office: 734 Fifth Ave., New York. **Mine office:** Bingham Canyon, Salt Lake county, Utah.

Officers: E. B. Schley, pres.; Kenneth B. Schley, v. p.; E. Richter, sec.-treas.; C. G. Raynor, asst. sec.-treas.

Inc. 1903 in Maine. **Cap.,** $2,700,000; shares $3 par; issued $2,700,000. Original cap., $3,000,000; shares $5 par, increased, 1906, to $4,000,000, with an outstanding issue of $3,500,000 stock in 700,000 shares of $5 par, which was then reduced 1909, to $2,100,000, by cutting the par value from $5 to $3 and was immediately thereafter increased to present amount of $2,700,000.

Bonds: $500,000 authorized, at 6%, convertible into stock, of which $422,900 is outstanding, this bond issue having been made to liquidate a floating debt. The company is a securities-holding corporation only, and was the parent company of the Tintic Mining & Development Co., Yampa Smelting Co. and West Mountain Tramway Co. See Tintic M. & D. Co.

TINTIC-DAVIS MINING CO. UTAH

C. M. Morris, pres., 813 E. 1 S., Salt Lake City; Geo. H. Taylor, mgr.

Inc. in 1919.

Property: located in North Tintic mining district, adjoins Chief Consolidated. In October, 1919, machinery was added, and a head-frame built. Details of operations not available.

TINTIC DELAWARE MINING CO. UTAH

Address: Provo, Utah.

Officers: Joseph Hatch, pres., Heber, Utah; W. R. Wherritt, v. p.; J. Holdaway, Provo, sec.-treas., with W. D. Clark, J. H. Ekker, E. H. Ekker, S. Ness, directors.

Inc. in Utah. **Cap.,** $100.000; increased June, 1919, to $200,000; 10c par. Listed on Salt Lake Exchange.

Property: 8 claims, in West Tintic, 12 miles from Dunbar, Juab county, contains lead and silver ore. Developing during recent years.

TINTIC DELMAR MINING CO. UTAH

Office: Snow Bldg., Provo, Utah. **Mine office:** Eureka, Juab county, Utah.

Officers: Lewis Merriman, pres.; Andrew Madsen, v. p.; Harvey Cook, sec.-treas., with C. W. Reed and T. Boardman, directors.

Inc. March 27, 1909, in Utah. **Cap.,** $100,000; shares 10c par.

Property: 20 claims, partly patented, in the North Tintic district.

h limestones occur with geologic conditions like those of Centennial Eureka

Development: by 350′ tunnel, to be extended to crosscut formation, h shows stringers of quartz carrying ore said to give good assay values in , lead and copper where 2 large cross breaks intersect. A 114′ winze en- tered fissures opened by a drift, 100′ below the tunnel, reported to show ore ing 300 oz. silver, some gold, lead and a little copper in a shoot encased in grade ore.

Property reported on favorably by C. A. Porter of the Utah Copper Co. by Prof. J. E. Tallmadge. No recent report of operations received. Is a ising mining gamble.

TIC DRAIN TUNNEL CO. **UTAH**

Address: Provo, Juab county, Utah.

Officers: Jesse Knight, pres.; W. L. Mangum, sec.-treas., with J. S. h, E. F. Birch, Henry Barney, A. M. Knight, K. S. Jordan, R. E. Allen, and Jordan, directors. Listed on Salt Lake Exchange.

Organized in September, 1917, to drive a 5½ mile adit from Goshen valley to nt near Silver City, for drainage of adjacent mines and sale of water for ution. In September, 1919, tunnel was in 3,400′ and advancing about 10′ —no timbering required at that time. Company owns 300 claims along the -of-way.

TIC EMPIRE MINING CO. **UTAH**

Address: Eureka, Utah.

Officers: Theo. Nicholes, pres.; L. E. Chipman, v. p.; H. J. Fitzgerald, reas.; with H. E. Phelps, and Orson Keeler, directors

Cap., $125,000; 10c par; 625,000 issued.

Property: is in the North Tintic mining district, near Eureka, between Lehi-Tintic and the Tintic Paymaster. A shaft was started in Septem- 1919, and was 100′ deep in January, 1920, and a 280′ tunnel driven; 36% and 7 oz. silver ore was uncovered on the surface. Equipment being lled.

TIC MILLING CO. **UTAH**

Address: Provo, Utah.

Officers: Jesse Knight, pres.; J. S. Smith, mgr.; W. L. Mangum, sec.- ; T. P. Holt, gen. supt.

nc. in Utah. Cap., 1,000,000 shares, 3c par; assessable. The purpose e company is to provide a process and a mill for treating low-grade ores e locality, hitherto found valueless. The mill employs the Holt-Dern and t-Christensen roasting furnaces and leaching. Operations began March, the mill treating 200 tons daily, mostly from the Iron Blossom and Dragon lidated mines. About $60,000 in silver bullion is produced monthly. Bul- ssays 90% copper and carries from 600 to 2,000 oz. silver per ton.

riefly the process is: crusher, 4 sets of rolls, 11 roasting furnaces; four n leaching tanks, and scrap iron precipitating boxes. The charge for ng is a mixture of oxide and sulphide ores, coal dust, and salt. This ss is amenable to the low-grade silver-copper-gold ores of the district.

TIC MINING & DEVELOPMENT CO. **UTAH**

roperty sold to Utah Cons. Mining Co., and company dissolved. Described l. XIII.

TIC PAYMASTER MINES CO. **UTAH**

Officers. W I. Snyder, pres., Eureka, Utah; J. W. Knight, v. p.; H. yder, sec.-gen. mgr., with W. Scowcroft and R. E. Allen, treas., directors.

nc. 1919, in Utah. Cap., $1,000,000; 50c par; issued, 600,000 shares.

roperty: a consolidation of about 1,700 acres, including the Eureka located in the Tintic mining district, between the Lehi Tintic and the

evelopment: on the Eureka King, a 500′ shaft, which is to be sunk 1,000′ level, cut No. 1 vein in lime and quartzite January, 1920. It was mineralized.

Equipment: electric power, 52-h. p. motor-driven hoist, 46′ head-frame 52-h. p. 5-drill compressor, automatic bucket dump, and all surface accessories

TINTIC PRIZE WINNER MINING CO. UTAH

Address: Springville, Utah.

Officers: H. Straw, pres.; Edw. Bingelson, v. p.; W. B. McPherson sec.-treas., with Mel Chase, and Earl Bissell.

Inc. July, 1919, in Utah. **Cap.,** $100,000; par $10.

Property: in Tintic district, Juab county.

TINTIC QUADRANGLE MINING CO. UTAH

Officers: Geo. Horton, pres.; Samuel Bennett, v. p.; Geo. F. Tilson sec.-treas., with C. S. Goddard and Geo. Horton, Jr., directors.

Inc. about Oct., 1919. **Cap.,** $100,000; par 10c.

TINTIC STANDARD MINING CO. UTAH

Office: 422 Judge Bldg., Salt Lake City, Utah. **Mine office:** Eureka Juab county, Utah.

Officers: E. J. Raddatz, pres.-treas.-gen mgr.; W. I. Snyder, v. p.; L. E. Stohr, sec., with Willard Scowcroft, and Ira I. Travis, directors. John Wessdahl, supt.

Inc. Oct. 2, 1907, in Utah. **Cap.,** $1,300,000; $1 par; assessable; issued 1,175,000. Has levied 19 assessments of ½c. each up to 1916. Stock listed Salt Lake Exchange. Annual meeting, January 10.

Dividends: initial of 20c paid June 23, 1917, and 40c during that year. Four quarterlies of 8c. each, plus extra of 15c. paid in 1919. Eleven in all to date equal to $1,140,658. Net profits in 1918 were $638,944.

Property: 95 claims, 1,760 acres, of which 15 claims, 300 acres, are patented, covers a long stretch on the ore zone. In November, 1919, company started suit against the Chief Cons. concerning ownership of the White Wing No. 5 claim.

Geology: mine shows limestone, quartzite, and porphyry, carrying two sure veins with N.-S. strike and dip of 55° E. in limestone. Ore comes in a north-south fault fissure at contact of shale with underlying quartzite.

Ore: a fine-grained aggregate of galena and tetrahedrite, plus a little pyrite, in barite and quartz, and is reported to assay from a trace to 50% lead, 1 to 105 oz. silver, and $1 to $15 gold per ton. The management reports the main orebody as 200′ wide.

Development: one 1,450′ three-compartment main working shaft and about 8,000′ of drifts, etc. The second shaft, 1,700′ south of main shaft is also 1,450′ deep and connects with the other. Both shafts show shipping ore. Ore developed is on the 1,250 and 1,350′ levels.

Equipment: includes a 100-h. p. steam plant, with an 80-h. p. double cylinder, hoist, good for 1,500′ depth. Also double-drum hoist with 300-h. p. motor and an 800 cu. ft. compressor with 150-h. p. motor.

Production: in 1919, about 50,000 tons of ore. Total from 1915-'18 inclusive, 58,495 dry tons that yielded 1,900,000 oz. silver, 7,900,000 lb. lead, 750,000 lb. copper, and 1,582 oz. gold.

TINTIC STAR MINING CO. UTAH

Jesse M. Harms, mgr.

Inc. 1918, in Utah. **Cap.,** $100,000; 10c par.

Property: 4 miles S. E. of the Tintic Delaware near Dunbar, Juab county, said to show copper-silver ore. Driving a tunnel in 1919.

TINTIC TUNNEL CO. UTAH

Letters returned unanswered July, 1917, from Newhouse Bldg., Salt Lake City. No recent information; probably idle.

Officers: L. A. Martin, mgr., with F. C. Richmond, D. R. Beebe, E. Smith, B. D. Lyon, H. J. Fitzgerald, R. J. Evans, D. F. Davis and C. E. Moss directors.

Inc. 1916, in Utah. **Cap.,** $2,000,000.

The company planned to drain the E. and S. ends of the Tintic district by means of a 5-mile tunnel. It has absorbed the holdings of the United Tintic

:s, which was a consolidation of the Tintic Combination, the Tintic Empire Bullock Companies.

Property: 28 claims, about 600 acres, in the Tintic district, near Eureka, to show 4 parallel veins in an ore zone, or channel, that lies east of the imoth-Grand Central and the Centennial-Eureka ore zones. The claims are cated as to give approximately 2 miles on this vein system.

Ore: carries copper, lead, silver and gold values. The veins vary greatly idth, but are generally of small size, the Bullock vein, in which work has centered, showing a maximum width of about 4'. The ore in this vein runs in iron and carries about $20 per ton in copper, lead and silver.

Development: principally on the old Bullock property, includes shafts 0', 215' and 102' and several old tunnels. **Equipment:** includes a small n plant and hoist.

Excess of water and high cost of mining have presumably caused cessation ork.

TIC UNION MINING CO. **UTAH**

Officers: Willard Scowcroft, pres., Ogden, Utah; W. I. Snyder, v. p.; . Snyder, sec.-treas., with Gideon Snyder, and J. W. Scowcroft, directors. Inc. 1919, in Utah. **Cap.,** $1,000,000; 50c par.

Property: 22 claims, located in southern part of East Tintic district. pany plans exploration work.

TIC WINCHESTER MINING CO. **UTAH**

Address: L. N. Ellsworth, Tintic, Eureka county, Utah.

Officers: G. F. Tilson, pres.; William Haws, v. p.; L. N. Ellsworth, reas., with S. Trotter and H. B. Cole, directors.

Inc. Dec., 1919, in Utah, to engage in general mining business.

TIC ZENITH MINING CO. **UTAH**

Office: Eureka, Utah.

Geo. A. Udall, and A. W. Larson, of Eureka, reported as heavy stockholders. . Hurley, supt.

Property: located in eastern part of Tintic mining district, Juab county. pany will sink a 2-compartment shaft, 1920.

TIC ZINC CO. **UTAH**

Has passed away. Described in Vol. XIII.

LE SAM CONSOLIDATED MINING CO. **UTAH**

Office: 515 Dooly Block, Salt Lake City, Utah. **Mine office:** Eureka, county, Utah.

Officers: Hon. John Dern, pres.; M. P. Braffet, v. p.; Frank D. Kimball, ; Fred. C. Dern, sec.; J. C. Dick, gen. mgr.; W. P. Carter, supt.

Inc. June 29, 1900, in Utah. **Cap.,** $750,000; shares $1 par; assessable; ased August 21, 1912, from $500,000; issued, $550,000, with 1 assessment l. The company formerly owned a 50% stock interest, 400,000 shares, in May Day Mining & Milling Co., which stock was distributed 1910, to share- rs, as a stock dividend. The Richmond & Anaconda Mining Co., adjoining, absorbed 1912, by the Uncle Sam.

Shares are listed on the Salt Lake Exchange. Annual meeting, first Mon- n June.

Regular dividend rate was 2 cts. per share monthly, changed June, 1910, to quarterly, with an extra dividend of 3 cts., December, 1910, dividends for having been 19 cts. per share; total dividends to April, 1913, were $470,000; since. Assessment of 1c. a share was levied on April 22, 1920.

The annual statement for year ended May 31, 1918, shows: ore sales realized ; balance from 1917, was $1,554; assessment No. 2, $5,494, other $558, ng $13,095. Expenses totaleo $12,103, leaving $992 cash balance.

Property: 4 claims, patented, in Tintic district, including the Humbug which is the principal property, producing mainly auriferous silver- ore of both smelting and milling grades. A good orebody was de- ed in the western part of the property. **Equipment:** is electrical.

Production: in 1916, 25 tons zinc ore and 265 tons lead ore.

ast report states that company expects to do development on west part of

Equipment: hydro-electric power and 100-ton flotation plant.

Production: 131,911 lb.; fine copper in 1905; 304,377 lb. copper and 1,[illegible] oz. silver in 1906; 425,367 lbs. copper and 2,292 oz. silver in 1907. Inactive from November, 1907, until October, 1915, when experiments with the flotation process were started. Shipments from October, 1915, to January, 1916, about [illegible] tons, claimed to run 10% copper and 1 oz. silver per ton. In 1918, mine produced 509,654 lb. copper and 2,056 oz. silver.

VERMONT COPPER CO. VERMONT

Office: 50 E. 42nd St., New York. **Mine office:** South Strafford, Orange county, Vt. A. Heckscher, pres.; G. E. Parks, sec.; N. O. Lawton, gen. supt.

Inc. 1906, in Arizona. **Cap.,** $1,000,000. Is successor of Elizabeth Copper Co., and later took over the Strafford Mining Co. and the Sharon Power Company. On account of low price of copper, operations ceased May 1, 1[illegible] and company was put in hands of Ralph E. Pierson, Bethel, Vt., as receiver.

Property: the Elizabeth and Foster copper mines, 9 miles from Pompanoosue, and 10 miles from Sharon, the nearest rail station. The Elizabeth mine was opened 1793, to get pyrrhotite with which to make copperas and at one time had quite an extensive plant for roasting the ore, leaching and making copperas. Early in the nineteenth century the Vermont Copperas Co. operated the mine and is said to have made as much as 6,000,000 lb. of copperas, beginning with a small incidental production of copper about 1830, when it was found that the ore carried an average of about 3 per cent. copper as chalcopyrite disseminated in pyrrhotite. Six different smelters have been built on the property at various times, the last one in 1916, for pyritic smelting.

Geology: a lens of pyrite ore, wedging out at the bottom, occurs in foliated quartz mica-schist. The orebody has been mined for 700′ in length and opened up for more than 2,000′ in length, ranging from 15′ to 60′ in width. Management estimates upwards of 500,000 tons of ore in sight, consisting of pyrrhotite carrying chalcopyrite, and with average assay of 2¼% copper. Diamond-drill borings, made 1909-1916 show ore to continue for 250′ deeper below the present workings.

Development: by a 1,340′ tunnel with back of 225′, and an 800′ inclined blind shaft. The dumps carry about 50,000 tons of discarded ore, a large part of it said to average 1.75 per cent. copper.

A 500-h. p. hydro-electric power station on the White river, transmits current 9 miles to the mine and works. There also is a small steam plant and an air compressor at the mine. Electric haulage is used underground.

After an idleness of several years the property was reopened in 1916, the smelter remodelled for pyritic smelting and the mill equipped for flotation. Metallurgically, the smelter operated successfully under the supervision of Prof. George A. Guess of the University of Toronto, but operations were discontinued on account of the cost and trouble in hauling in fuel and flux.

The flotation process worked successfully on this ore. The ore is a base pyrrhotite carrying disseminated chalcopyrite and assays about 2.25% copper. The mill produces concentrates assaying 18% to 24% copper, with tails running from .2% to .3%. Another unit added in 1919, increased the daily capacity of the mill to 200 tons. Hardinge mills are used for grinding and Callow cells for flotation.

Production: in 1918, 300,000 lb. copper, and 35 oz. silver.

VIRGINIA

ALLEGHANY ORE & IRON CO. VIRGINIA

Address: care H. B. Spackman, pres., Buena Vista, Va.; Arcade Bldg., Philadelphia, Pa.; and Coatesville, Pa. The Lukens Steel Co. owns [illegible] capital stock.

Property: iron ore mines at Oriskany, Va., having an annual output of 225,000 tons. The iron furnaces have an annual output of 100,000 [illegible] quarries have an output of 50,000 tons limestone.

IERICAN CHEMICAL & INDUSTRIAL CO. **VIRGINIA**

Address: Philadelphia, Pa.

Reported in March, 1919, that company had bought property of the Crimora nganese Corp., which see.

IERICAN RUTILE CO. **VIRGINIA**

Address: 622 F. St., N. W. Washington, D. C. W. M. Slater, pres.

Inc. in Virginia. **Cap.,** $100,000; $100 par; issued $97,500.

Property: 550 acres at Roseland, Nelson county. Rutile containing % titanium oxide, and ilmenite are mined from open-cut workings.

Equipment: includes power and milling machinery to handle about 100 s daily, also a 2,500′ aerial tram. The mill is equipped with crushers, stamps, rr classifier, tables, and a magnetic separator.

Production: 260 tons of rutile concentrate in 1918 was sold for $39,150. l 444 tons of ilmenite concentrate for $11,100.

IMINIUS CHEMICAL CO., INC. **VIRGINIA**

Operated by Grasselli Chemical Co.

Office: 44 Pine St., New York. J. Frederick Kernochan, pres.; T. Mc- vern, mgr., Mineral, Louisa county, Va., at last accounts.

Cap., $10,000.

Property: shows a large lens of pyrite in ancient schistose rocks. The was 30′ to 50′ wide and persisted below the 1,200′ level.

Development: a new 60° incline shaft being sunk in 1919 (down 750′ August), and connected at 700′ with the old workings.

Equipment: steam power, hoist, compressors, and 350-ton concentrat- mill.

BIN BRANCH MINING CO. **VIRGINIA**

Office: 1015 Fidelity Bldg., Baltimore, Md. **Mine office:** Dumfries, nce William county, Va. Is owned by the American Agricultural Chemical mpany.

Property: has a large lenticular body of iron pyrites carrying up to e-fourths of 1% copper recovered as a by-product after roasting.

Development: by 1,200′ vertical shaft. **Equipment:** includes steam hoist, compressor, and a 200-ton mill. Employs 150 men.

IMORA MANGANESE CORPORATION **VIRGINIA**

Office: 30 E. 42nd St., New York, and Crimora, Augusta county, Va.

Directors: Geo. C. Allen, pres.; Geo. Burnham, Jr., v. p.; Walter Whet- e, sec.-treas.; A. M. Yonge, gen. mgr.

Inc. Sept. 29, 1914, in Virginia. **Cap.,** $1,000,000; shares $100 par; all standing. **Transfer office:** Security Transfer & Registrar Co., New k. Annual meeting, last Monday in September.

Bonds: authorized and issued $500,000 1st mtge. 6% sinking fund gold ds, due 1929.

Property: 946 acres, including the Crimora mine, 2 miles east of Cri- a station, on the Norfolk & Western R. R. The mine was first opened in 7 and acquired by present company in 1914. Deposit consists of manganese- masses of various sizes scattered through a clay basin, ½ mile long, several dred yards wide and 200′ deep. The ore is hard and consists of psilomelane pyrolusite. Percentage of ore to clay varies considerably, from 2 to 20% ore to the clay, by volume. Ore assays 42 to 48% manganese. (See U. S. S. Bull., No. 427, pp. 58-61, pp 101, 270.)

Development: formerly by underground workings, now done with two 36 Marion steam-shovels. Management claims 1,000,000 tons ore proven, probable reserves of 3,000,000 tons.

Equipment: electric power, and a 200-ton mill, which started operating June, 1916. Management anticipated a yearly production of 15,000 to 25,000 ons ore.

The property was closed down in March, 1919, and reported sold to the erican Chemical and Industrial Co., Philadelphia.

In August, 1919, A. W. Blakemore, of 40 Central St., Boston, attorney for mittee bondholders committee advertised that those who wished to know

The Valznico mine has a fissure vein in schist, dipping 75° S. E. and pitching N. 40° E. The ore is a complex sulphide, containing 4% lead, 12% zinc and silver, copper, gold and iron.

Development: by 250′ vertical shaft and 2,400′ of workings. **Equipment:** hoist, compressor, pump, steam plant and 50-ton concentrating mill.

Production: in 1916 was 2,300 tons of ore, averaging 4% lead and 12% zinc. Company does not reply to requests for information.

VIRGINIA MINING CO. VIRGINIA

Controlled through stock ownership by General Chemical Co. Operates the Gossan pyrrhotite mines at Monarat, Carroll county, Va. W. S. Smith, supt.

Two mines are worked, the old Huey pit, 200′ deep, and the Bombarger, both by open cut methods. They are located about 2,000′ apart on the same vein which varies up to 60′ in width and is enclosed in mica schist. The ore contains about ½% copper and 30% sulphur, and is shipped 48 miles to Prince, Va., where it is milled and the product burned to make sulphuric acid.

During 1918-'19 about 100,000 yards of overburden was removed, exposing a three-year ore supply. About 100 men are normally employed.

VIRGINIA SMELTING CO. VIRGINIA

Office: 131 State St., Boston, Mass. **Works office:** West Norfolk, Norfolk county, Va.

Officers: W. E. C. Eustis, pres.; A. H. Eustis, v. p.; F. A. Eustis, sec.-treas. W. B. Durant, engr.

Inc. November 10, 1909, in Maine, as successor of Eustis Smelting Works. **Cap.,** $1,000,000; shares $100 par; in $500,000 preferred and $500,000 common stock. Annual meeting, first Tuesday in October.

Company owns the Eustis Smelting Works, or Norfolk smelter, on tidewater, near Norfolk, with railroad facilities to all points. The situation is favorable for custom smelting; as more coal is shipped from this vicinity than from any other center in North America and traffic commands favorable inward rates on return cargoes. The location also insures the best coke for metallurgical use, on advantageous terms. Ore received from vessels is unloaded by machinery into standard railway cars, with facilities to set aside any desired portion as a sample car, standing on a separate track. The unloader has a maximum capacity of 1,000 tons in 24 hours. Loaded cars containing ore are hauled by locomotives upon trestles, and ore and coke dumped into storage bins having capacity for 25,000 tons of ore.

The smelter has a single water-jacket blast furnace of 600 tons daily capacity, using sea water for the jackets. The plant does a general custom business in smelting iron bearing ore from Sherbrooke, Quebec, Canada. The smelting works contain 2 Dwight-Lloyd sintering machines; one operates on copper matte in connection with the blast furnace, the other treats the leached residue and pyrite cinder to produce sinter, which is shipped to pig iron blast furnaces. The leaching department contains a Ramen-Beskow chloridizing furnace, a Holt-Dern chloridizing furnaces, and a precipitating plant. In order to prevent the sulphur smoke from becoming a nuisance to the surrounding farmers, the plant has developed a complete system for washing the gases, and the manufacture of liquid sulphur dioxide from them.

The smelting department of the works is operated under a lease on a royalty basis, by the Norfolk Smelting Co., a New York corporation.

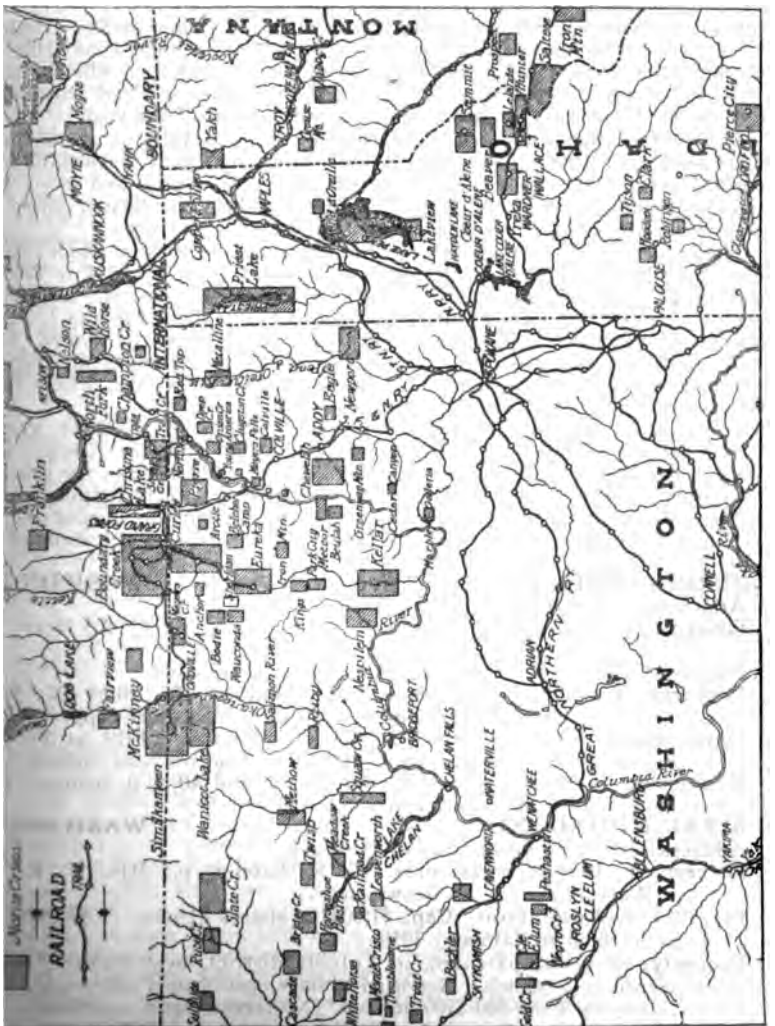
VIRGINIA ZINC & CHEMICAL CORPORATION, LTD. VIRGINIA

Liquidated. Properties acquired by the Virginia Consolidated Chemical Corporation, which see.

WASHINGTON

Spokane is the natural center for the mining districts of eastern Washington, as well as the Coeur d'Alene region, and Seattle for western Washington, but the descriptions are arranged alphabetically for greater convenience of reference.

The value of the metals mined in Washington in 1919, was $959,000, a rease of $518,000 from that of 1918. No zinc ore was marketed. The copper out in the Chewelah district, Stevens county, was somewhat less than in 1918. there was a marked decrease in the shipments of siliceous ore from the ublic district, in Ferry county. Most of the ore and concentrate from the



MINING DISTRICTS OF NORTHEASTERN WASHINGTON, NORTHERN IDAHO AND BRITISH COLUMBIA

of Washington was smelted at Tacoma, Wash.; Trail, B. C.; Midvale, and Northport, Wash. The plant at Grand Forks, British Columbia, was n June, and [illegible] at Greenwood, British Columbia, was idle through- year. [illegible] Northport, Wash., was idle several months on of the [illegible] mine in Idaho during most of the year.

The price of silver increased to about $1.12 an ounce, but the average price of copper, lead, and zinc were even less than those of 1918.

The gold output decreased from $304,658 in 1918, to about $280,000 in 1919, a decrease of nearly 8 per cent. Nearly all the gold came from the Republic district, but there was a distinct decrease in ores amalgamated throughout the State. From the Republic district approximately 25,600 tons of siliceous ore were shipped during the year, as compared with 42,275 tons in 1918. The mines of the district were closed on October 9, as a result of a labor strike. The principal shippers from the district were the Last Chance, Quilp, Knob Hill, Spoil, and Lone Pine mines. The Quilp mine, which had been idle for years, produced the largest output of gold. The Lone Pine-Surprise-Pearl group, which was formerly the largest producer, was idle during most of the year.

The silver output decreased from 310,093 ounces in 1918, to approximately 299,000 ounces in 1919. The value of the output increased from $310,000 to about $333,000. Nearly half the silver came from copper ores, and most of the remainder from ores from the Republic district. The Consolidated Mines Co. in the Springdale district, made several shipments of silver ore.

The copper output decreased from 1,922,406 pounds in 1918, to about 1,371,000 pounds in 1919. The value of the output decreased from $474,834 to $240,[illegible]. The United Copper mine, in the Chewelah district, was as usual, the largest producer of copper. Ore rich in silver was mined below the 1,300-foot level, and shipments of crude ore and concentrate averaged about 350 tons a month. Other notable shipments of copper ore came from the Sunset mine, near Index, Snohomish county, and the Loon Lake mine, north of Spokane, where a flotation plant was operated.

The mine output of lead decreased from 5,271,815 pounds in 1918, to about 1,700,000 pounds in 1919. Most of the product came from the Electric Point property, near Northport, in Stevens county, which was idle most of the year. As the company resumed mining in November, the output is largely estimated.

The only dividend paid by a metal mine in Washington during the first eleven months of 1919 was that of the Electric Point mine, which amounted to $23,790.*

ADDISON COPPER CO. **WASHINGTON**

Address: Keller, Ferry county, Wash.

Officers: Geo. R. Hodges, pres.; R. B. Smith, v. p.; C. A. Gray, sec.-treas.-mgr.

Inc. in Washington. **Cap.,** $75,000; 5c par; assessable.

Property: 5 claims, unpatented, and a millsite, 75 miles N. W. of Spokane, and four miles N. E. of Keller, said to show lead-silver-copper ore.

Development: by tunnels and 150′ shaft. In October, 1919, at 307′ in portal of new tunnel, a 2′ vein of $66 copper-silver-lead ore was opened.

Equipment: includes three-drill compressor and 40-h. p. boiler. Company developing in 1919, employing 7 men.

ADMIRAL MINING CO. **WASHINGTON**

Address: Rookery Bldg., Spokane, Wash.

Officers: T. H. Greenway, pres.; T. R. Tate, v. p.; Mrs. T. R. Tate, treas.; Chas. Warsth, sec.; J. R. Brown, mgr.

Inc. 1914, in Washington. **Cap.,** $1,50,000; shares $1 par. A $75,000 additional issue was authorized in January, 1919.

Property: 65 acres, patented, in Colville district, near Valley, Stevens county, developed by 3 tunnels. Reported to have opened up a silver-copper vein 18″-8′ wide, assaying from $30-$100 per ton. No recent report available.

ADVANCE MINING CO. **WASHINGTON**

Address: Spokane, Wash.

Officers: Frank Johnson, pres.; H. T. [illegible], v. p.; A. M. [illegible], treas., with W. F. Johnson, C. G. Staple, A. [illegible], and W. H. Wiscombe, directors.

Cap., $2,000,000; $1 par.

* Above statements from [illegible]

Property: 9 claims in Beulah district, Ferry county. **Development:** tunnels 400′ and 1,400′ long.

ICHAN BEE SILVER-LEAD MINING CO. **WASHINGTON**

Office: 401 Jamieson Bldg., Spokane, Wash.

Officers: H. M. Howard, pres.-mgr.; Emma S. Stephan, v. p.; Dr. B. F. osser, sec.-treas. with Dr. C. S. Kalb and H. Schwitzer, directors. J. Currie, ɔt., Fruitland, Wash.

Inc. August 1, 1916, in Washington. **Cap.,** $100,000; shares 10c par; 1,000 outstanding.

Property: 8 patented claims, 160 acres, in Deertail district, Stevens ıntv, 25 miles W. of Springdale.

Ore: occurs as a contact deposit in granite. Three veins under develop- nt, said to give assays of about 44 oz. silver and 20% lead.

Development: by tunnels crosscutting property through main working ınel to ascertain value and extent of ore. Management expected to finish ; work in July, 1919. A small flotation plant was erected early in 1920.

.ASKAN COPPER RIVER MINING CO. **WASHINGTON**

Address: Everett, Snohomish county, Wash.

Inc. in 1917 to develop gold mines in Alaska. **Cap.,** $2,000,000. In- porators: E. B. McGill, T. M. Williams and Dr. C. A. Mead.

No recent information.

.LIANCE MINING CO. **WASHINGTON**

Address: 622 Old National Bank Bldg., Spokane, Wash.

Officers: M. C. Hunter, pres.; F. H. Hunter, v. p.; W. W. Gifford, sec.- ıs., with J. M. Lloyd and S. S. Frantz, directors.

Inc. September 9, 1913, in Washington. **Cap.,** $1,500,000, shares $1 par, ıtanding $1,303,288; assessable, not exceeding 5 assessments of 5 mills each r. Bonds authorized $100,000, outstanding $32,400. In 1914 the company ‹ over for $171,000 the property of the Anaconda Gold Mng. & Reduction Co., ing $120,000 in Alliance stock, and assuming an indebtedness of $51,000 for remainder.

Property: 7 claims, 5 patented, 100 acres, in the Eureka mining dis- ; Republic, Wash., adjoining the property of the Republic mine, and said to r 3,500′ along the strike of the Republic vein, 12′ to 30′ wide, and the Princess . 2′ to 10′ wide.

Early development of the properties was done when only high-grade ore shipped, and the Alliance Co. acquired the holdings of 4 different companies the purpose of mining and milling the low grade ore. The veins are de- ped to a depth of 600′ by a 385′ tunnel and a 400′ winze, with total workings .000′.

Equipment: includes gasoline hoist and a 3-drill compressor. No work rted since organization.

PINE MINING & MILLING CO. **WASHINGTON**

Address: Alaska Bldg., Seattle, Wash.

Officers: J. H. Starbird, pres.-mgr.; H. C. Ash, sec.-treas.; with M. R. **bird** and T. P. Revelle, directors.

Cap., $50,000; $100 par.

Property: four lode claims and one placer claim on Negro creek, Chelan ty, said to show a vein 1½′ to 3½′ wide of free milling gold ore.

Development: several tunnels, 100′ to 200′ in length. Is a prospect.

LGAMATED GOLD MINES CO. **WASHINGTON**

Officers: C. R. Hesseltine, pres., 756 New York Block, Seattle, Wash.; G. Litherland, v. p.; J. E. Reynolds, sec.

Cap., $2,000,000; $1 par; assessable to 10c.

Property: the Blewett mine, 7 claims, and two millsites, on E. slope of ıdes, Chelan county, said to show well defined fissure veins in serpentine gold ore, containing a small amount of silver.

Develo [illegible] 000′ of tunnels. **Equipment:** includes 20-stamp mill [illegible] Credited with past production of over $1,000,000.

[illegible] idle.

AMAZON MINE **WASHINGTON**

J. Oppenheimer, owner, Chewelah.

Property: 3 claims, patented, 51 acres, 5 miles N. W. of Chewelah, said to show a vein uncovered for 2,200'. Ore said to assay about 2½ oz. silver, 2% copper, and up to 2½ oz. gold per ton.

Developed by several tunnels, to depth of 300' with 1,330' of workings.

Production in 1918, 187 tons ore; total production, 725 tons. Idle in 1919.

AMERICAN FLAG MINE **WASHINGTON**

Owned by Maurice Snyder, and W. D. Hoover, of Aberdeen, Wash.

Property: at Sheridan, Okanogan county, 11 miles W. of Republic, Ferry county, said to show silver-gold ore that assays $10 to $200 per ton, valu[e] mainly in silver.

Development: by tunnels and 100' shaft.

AMERICAN MINERALS PRODUCTION CO. **WASHINGTON**

Address: 140 S. Dearborn St., Chicago, Ill.

Officers: H. F. Wierum, gen. mgr.; H. L. Griswold, supt., Valley, Wash.

Cap., $1,500,000; $1 par.

Property: in Stevens county, Wash., has a large bedded deposit of magnesite, dipping 40 to 70°. The enclosing rocks are slates, schists and quartzites; the deposits being replacements of dolomite by magnesite. These deposits of crystalline magnesite, a few miles west of Valley in Stevens county, discovered in the summer of 1916, excel in size and purity any known deposits of this material.

Development: by quarries. The crude magnesite is shipped to Irvin, Wash., where it is dead-burned, on toll, and shipped thence to steel works and refractories trade.

Company states there are 300,000 to 500,000 tons shipping grade in sight; quarries have a monthly capacity of 12,000 tons, and the calcining plant at Irvin, 6,500 tons monthly.

Production: in 1918, the company mined 67,855 tons of crude magnesite, analyzing approximately Mg CO_3, 91%; CaO, 1.90%; SiO_2, 2.50%. Total dead-burned shipped East amounted to 17,664 tons.

AMERICAN REDUCTION CO. **WASHINGTON**

Address: Republic, Ferry county, Wash.

Inc. in 1915 by F. R. Clark, of Spokane; P. N. Clark and G. F. Sommer.

The property of the North Wash. Power & Reduction Co., which had been held by a receiver for 2 years, was purchased together with adjoining holdings.

Equipment: includes concentrator, mill, and power plant. Idle for two years.

AMERICAN TUNGSTEN CONS. CORP'N. **WASHINGTON**

Company a reorganization, 1912, of the Germania Mng. Co. Cap., $1,000,000 shares $1 par.

The Germania Co., composed principally of German investors, was organized 14 years ago to develop the Roselle mine, 25 miles west of Springdale, Stevens county. It is said that $500,000 was spent in driving tunnels, in the concentrator and buildings. In 1911 the company became involved in litigation, finally going into bankruptcy.

In January, 1916, eastern interests, represented by F. T. Hamshaw, of Seattle, obtained a lease and bond on the properties held by the Corporation and started operations. Holdings include the Germania and Roselle mines. Development, consisting of a 200' shaft and 3 tunnels with 3,000' of work, is said to have exposed a considerable tonnage of ore. Property sold by Alien Property Custodian in October, 1919, along with the Roselle Mining Co.

APACHE MINING CO. **WASHINGTON**

Address: 1408 Pioneer Bldg., St. Paul, Minn. **Mine address:** Newport, Wash. Leased to Beggs and Ostrasky.

Officers: F. A. Day, pres., Fairmont, Minn.; F. A. Hoyt, v.-p.; W. Evans, sec.-treas., with J. C. Wilson and G. B. Hoyt, directors.

Inc. 1904, in Washington. Cap., $1,000,000; $1 par; issued $[illegible]

Property: 6 unpatented claims, 90 acres, at Nespelem, Okanogan nty, said to show gold, silver ore in a quartz vein in granite.
Development: 75′ shaft and 300′ tunnel.

'EX MINING CO. **WASHINGTON**
Address: James P. Blaine, superintendent, Chesaw, Okanogan county, ash.
Property: the Ben Harrison mine, showing fissure veins carrying gold-er-copper ores. Developed by a shaft with gasoline hoist. Mine intermit-tly operated. No recent information.

'OLLO CONS. GOLD MINING CO. **WASHINGTON**
Mine office: Republic, Wash.
Officers: H. D. Clark, pres.; E. C. M. Hall, sec.; H. B. Ives, treas.; of New Haven, Conn. T. J. Howell, mgr.
Cap., $1,500,000; 50c par.
Property: 9 claims, patented, 165 acres, in Ferry county, 10 miles S. E. Republic, show gold, silver, lead and zinc ore. Said to have made shipments ling $200,000. No recent returns.

ADIUM COPPER MINING CO. **WASHINGTON**
Officers: C. A. Maxwell, pres., Puyallup, Wash. J. C. Wright, gen. r.
Property: 67 acres in Carbon river district, Pierce county, said to w copper, gold, and silver ore.
Development: over 1,300′ of tunnels. **Equipment:** includes a stamp- and electric power plant.

K MINES CO. **WASHINGTON**
A reorganization of the Ark Group Mng. & Milling Co., Ltd., described in . XIII.
Address: Spokane, Wash. **Mine address:** Kettle Falls, Wash.
Officers: J. J. Budd, pres.-mgr.; H. L. Nelson, v. p.; O. L. Budd, sec.-s.; directors, J. J. Budd, H. Karlsten, W. P. Maurer, and Dr. H. Hornby.
Inc. 1918, in Washington. **Cap., $375,000;** par 25c; assessable in treas- 500,000 fully paid shares, and 400,000 paid up to 15c.; 600,000 shares given property.
Property: 10 claims, the Silver Queen group, 3 miles S. of Kettle Falls, ens county. Ore occurs in contact between granite and lime with S. W. e and dip of 45°. Vein reported to be from 30 to 60′ wide, traceable for ¾ mile.
Development: by shafts, 3 tunnels, longest being 800′ and a 150′ up-. This work has shown copper ore containing silver values but silver-lead also occurs near face of tunnel, with back of 300′ with hanging wall not yet Equipped with steam power, air compressor and 2 air drills. The Wash-on property has been under development for several years.
Company also owns 3 gold claims in the Kootenai district, British Columbia.

LINGTON SILVER MINING CO. **WASHINGTON**
H. S. Stoolfire Mgr., Sherwood Bldg., Spokane. Company was formerly Arlington Mng. Co., but was reincorporated in March, 1918, under present e.
Property: 10 claims, near Ruby, Wash., developed to the 450′ level. is said to assay $30 per ton in gold and silver. Small shipments made in

RELIA CROWN CO. **WASHINGTON**
Office: P. O. Box 187, Seattle, Wash. treas. and
mgr.; A. E. Coxhead, v. p.; H. M. Geo. C.
ple and C. E. Horton, trustees.
Inc. in Washington. **Cap.,** $10,000 sable;
d $8,137,600.
Property: 36 claims, 730 acres and
of Lucerne, Chelan county, Wash.
and molybdenite mines, having 8 tu
several open cuts. The Crown Prin

to develop 2,000 tons ore. The Silver Trail silver-lead mine has a 6′ fissure vein. Tunnel No. 3, on the copper vein, shows 4 ore shoots, of 4 to 8′ width, carrying ore said to give average assays of 15.5% copper and $8.65 gold and silver per ton.

Equipment: includes hydraulic plant, air-compressor, machine shop, engine house, saw-mill, warehouse and 3 cabins. The mill has 2 crushers, rolls and a Schull concentrator.

AURORA COPPER MINING CO. **WASHINGTON**

Inactive. Conrad Wolfle, pres., Symons Block, Spokane, Wash.

AZURITE COPPER CO. **WASHINGTON**

Office: 80 Broadway, New York.

Officers: C. H. Ballard, pres.; W. G. Hughes, v. p.; Wm. Tensan, sec.; W. T. Behire, treas.

Inc. December, 1916, in Delaware. **Cap.,** $3,000,000; par $1; 2,600,000 shares issued.

Property: a prospect in Whatcom county. Claims show gold and copper ore.

BEAD LAKE GOLD-COPPER MINING CO. **WASHINGTON**

Address: 608 Hyde Bldg., Spokane, Wash.

Officers: G. C. Geisler, pres., E. 1111 Augusta Ave., Spokane, Wash.; C. C. Wilt, v. p.; W. E. Allen, sec.-treas.-mgr.

Cap., $3,000,000; $1 par; assessable.

Property: several hundred acres in the Newport district, Pend Oreille county, Wash., carrying veins of silver-lead, and copper ore. In December, 1919, company bought the Conquest mine for $20,000. The Comstock mine has been previously acquired for $2,500.

Development: by over 5,000′ of tunnels and 600′ of shafts, which it claimed, has blocked out sufficient ore to justify the installation in 1919 of a 100-ton concentrator, moved from the Western Union mine in Idaho. The plant includes a flotation unit.

BEECHER GOLD MINING CO. **WASHINGTON**

Address: Orient, Wash. Alex A. Anderson, mgr.

Property: the Beecher mine near Orient, Ferry county, in which gold quartz ore occurs in stringers.

Idle since 1917.

BELCHER MINING CO. **WASHINGTON**

Property was reported to have been bought, 1918, by Frank Babcock, Ione, Wash., for $50,000, payable in instalments over a period of two years.

Property: the Belcher claim N. of Republic, Ferry county, shows regular replacement deposits of pyrite associated with garnet, epidote, tremolite and magnetite in marble and interbedded shale, etc., intruded and metamorphosed by monzonite porphyry dikes and sheets.

Development: by 3 tunnels showing sulphide orebody 5′-20′ thick. A dip plane (see Bull. 550 U. S. G. S., 1914, pp. 167, 175, 179). Over 5,000′ of work has been done.

A 1,000′ aerial tram connects the tunnels with ore bins on the railroad. Water, brought 2,000′ from Lambert creek, through a steel pipe, generates electric power, supplemented by a gasoline auxiliary plant.

Equipment: includes an air compressor and power drills.

Property, reopened May, 1911, shipped low-grade gold-bearing pyritic ore per ore to Granby smelter. In 1917, reported to have shipped 3,000 tons assaying 6% copper and $1 gold.

BENDER METALS MILLING CO. **WASHINGTON**

Officers: Henry Bender, pres.; B. W. Johnson, sec.; Robt. Bender, treas., all of Toledo, Ohio. J. W. Douglas, v. p., Spokane, Wash.

Cap., $30,000; par $25. Early in 1918, the company finished converting an old stamp-mill in the Oroville district, Stevens county, into a flotation mill to treat ore from the nearby Rich Bar, and Caaba mines. No recent information.

'N HUR LEASING CO. **WASHINGTON**

Dissolved.

Address: S. P. Domer, 623 Rookery Bldg., Spokane, Wash.

Company was a co-partnership formed to operate the Ben Hur mine at Re-lic, Ferry county, Wash., under lease.

Property: the Little King and Queen claims on Gold Hill, developed 300' shaft, showing gold, silver, and copper ore. Equipped with steam power, ipressor, etc. New plant installed, 1913. Property was intermittently worked, 1-12, and drifting done on the 200' and 400' levels. Mine was operated under e by Cons. Mining & Smelting Co. of Canada, Ltd., during 1914-15, but 'n up early in 1916. Lessees worked the mine; made small shipments in 1919. Vol. X, of the Copper Handbook.

UE LEDGE MINING & MILLING CO. **WASHINGTON**

Officers: Geo. W. Steele, pres., 355 Head St., San Francisco; Geo. A. mook, v. p.; Wm. R. Rae, sec., all of San Francisco; Geo. A. Steele, asst. Keller, Wash.; Louis Reiss, treas., Cheney, Wash.

Cap., $175,000; 10c par, assessable.

Property: 5 claims, 3 patented, in Ferry county, 4½ miles E. of Keller, to show silver bearing copper and gold ore in a 2' to 6' vein that outcrops 600'.

Development: tunnels and shafts, total 1,255'. Idle many years.

JESTAR MINING CO. **WASHINGTON**

Address: Chewelah, Wash.

Officers: L. R. Nestos, pres.; H. C. Moltern, v. p.; Fred W. Dickey, treas., with Wm. Boyd and S. F. Doran, directors.

Inc. 1906. **Cap.,** $1,600,000; $1 par; 990,000 issued.

Property: 8 claims, 1 patented, N. W. of Chewelah, Stevens county, to carry silver-lead ore. Idle several years.

IANZA MINE **WASHINGTON**

Property: 200 acres, located 3 miles from Bossburg, Stevens county, ı. The mine, an old-time producer, said to have had an output of $1,000,- ınd idle for 15 years, was reopened in 1915 by lessees, who started shipping -lead ore to the Trail smelter. Reported in 1918, that property was under ar lease and bond to Geo. Vervaeke, that $20,000 in ore had been shipped nodern machinery added.

)eveloped: by 450' incline shaft to 700' level, and a total of over 3,000' 'ground workings. All ore above 600' level has been stoped. See U. S. G. S. tin 550, p. 63.

TON-AMERICAN MINING CO. **WASHINGTON**

)ffice: 217 Commerce Bldg., Everett, Wash. **Mine office:** Monte), Snohomish county, Wash.

)fficers: H. D. Cowden, pres.; C. A. Riddle, v. p.; L. E. Engel, sec.; Boston, treas., with J. H. Adams, P. E. Low, E. Garber and H. B. Cow- lirectors. D. R. Kyes, supt.

ompany is not a reorganization of the United Mining Co., Nevada, which ut stockholders of the United Mining Co., with few exceptions, have more ın **equal** proportional holding in the Boston-American Mng. Co.

ıc. in 1913, in Washington. **Cap.,** $2,000,000; $1 par; 1,600 400,000 preferred; 1,344,200 common and 293,450 preferred iss nancial statement, January 1, 1917, showed: receipts for 19 **litures,** $68,928; balance on hand, $38,750.

roperty: 88 claims, 26 patented, and 4 patented mill si Wash., said to show a dike of low-grade ore 300' wide, cu with streaks of ore from a few inches to 4' in width. Ore ilver, copper, zinc and arsenic. Mineralized zone said to ha rkings over a length of 750' and to show for 5,000' on surf

evelopment: 14 tunnels, the longest, 1,850', is 1,400' b **tunnel.** Total underground workings about 19,600'. d to have proven up five distinct ledges at depths from the ges being regular, well defined, true fissure veins. Mar

to have 120,000 tons ore blocked out and to have shipped 18 carloads ore that assayed $29 per ton in gold, silver and copper, 8% arsenic and 2½% zinc.

The mine was examined by I. H. White, of Butte, Mont., who is quoted as having reported that there is more than enough ore blocked out to warrant the construction of a 200-ton mill.

Company's former literature considered grossly misleading and creating an unfavorable impression, which can only be remedied by frank statements of operations and economical development. No recent returns; probably idle.

BOUNDARY GOLD CO. **WASHINGTON**

Officers: I. D. Sperry, pres.-treas., Glacier, Wash.; Geo. G. Gilchrist, sec., 747 Gas & Electric Bldg., Denver, Colo.

Cap., $1,000,000; $1 par.

Property: 5 claims patented, on S. E. slope of Bear mountain, Whatcom county, said to show free milling gold ore with small values in silver.

Development: by 1,000′ of tunnels. **Equipment:** includes 76-h. p. water wheel, 10-stamp mill, 3-drill compressor, and 2,600′ aerial tram.

Total shipments to 1918, reported about $225,000.

BOUNDARY RED MOUNTAIN MINING CO. **WASHINGTON**

Address: Reno, Nev.

Officers: Geo. Wingfield, pres.; E. A. Julian, gen. mgr.; C. F. Burton, sec.-treas. Stock is closely held.

A. H. Westall, supt., Sardis, B. C. Control purchased June, 1916, by George Wingfield and associates.

Property: in Whatcom county, shows a fissure vein containing an ore shoot developed for 750′ and averaging 4′ in width, of $20 ore.

Development: carried on intermittently since 1889, is by tunnels. A crosscut tunnel driven 500′ below upper tunnel has a 500′ drift on the vein whose width and values are larger than above; new tunnel started, 1919, is 75′ lower.

Equipment: includes a hydro-electric plant and a 10-stamp mill.

BRUCE CREEK MINES CO. **WASHINGTON**

Officers: Bob Mabry, pres.-mgr., Hutton Bldg., Spokane, Wash.; J. F. Dillard, v. p.; E. A. Mabry, sec.-treas.

Inc. in Washington. **Cap.,** $100,000; 10c par; assessable.

Property: 120 acres, leased from the State, in Stevens county, 16 mi. N. E. of Colville. Mine is said to have a contact deposit, between limestone and granite, with silver-bearing lead ore and a little zinc blende.

Development: by tunnels and open cuts. **Equipment:** includes gasoline engine and compressor. Was developing late in 1918; no later report.

BUNKER HILL MINING & SMELTING CO. **WASHINGTON**

Dissolved. Was successor of Bunker Hill-Sullivan Copper Mng. Co. and operated near Reiter, Wash. Described in Volume XIII.

Mining property and other assets were purchased by the Western Coal & Mining Co. in June, 1917, and the mine is described under that title.

BUTTE-CHEWELAH COPPER CO. **WASHINGTON**

Address: J. O. Gillice, pres., Paulsen Bldg., Spokane, Wash.; F. M. [illegible] v. p.; P. L. Eberhardt, sec.-treas., with G. B. Harrington and R. J. Davis (gen. mgr.), directors, at last accounts.

Inc. March, 1913, in Washington. **Cap.,** $1,000,000; shares $1 par; fully paid and non-assessable; 500,000 issued.

Property: 4 claims, 75 acres, in the Valley mining district, shows veins in sedimentaries close to a diabase intrusion; average strike N. 25° E. and dip 60°. Ore contains chalcopyrite and gray copper in a gangue of quartz, calcite and spathic iron. At 100′ in depth the vein is said to be 6′ wide and the ore to average 2 to 5% copper, 1 to 5 oz. in silver and 50 cents to $1 in gold per ton.

Developed by 100′ winze, reported all in ore, a 300′ shaft and 125′ [illegible]. Equipment includes a hoist and air-compressor. No recent report, probably [illegible].

CAREY MINING & MILLING CO. **WASHINGTON**

P. P. Rooney, mgr. Company has lease and bond on the Phil Sheridan and other claims in Sheridan camp, Ferry county, near Toroda, said to show [illegible]

ein of silver ore with some gold and copper. Developed by 400′ shaft. In 1917 company built a flotation plant. One car of ore shipped is said to have returned $2,800. No recent returns.

ASCADIA MINING & DEVELOPMENT CO. WASHINGTON

Mine office: Toledo, Wash.

Officers: E. A. Sessions, pres., 212 Abington Bldg., Portland, Ore.; V. A. Gray, v. p.; W. D. Scott, sec.-treas., with M. A. Poppleton, J. P. Finley, eo. S. Reid, F. H. Dowler, directors. J. F. Hartley, asst. sec.

Inc. March 12, 1887, in Washington. **Cap.,** $6,000,000; shares $1 par; 1,164,615 in treasury.

Property: 108 claims, 2,170 acres; 330 patented in St. Helens mining istrict on the divide at the head of the Toutle river in Cowlitz, Lewis and kamania counties, includes the Polar Star and Minnie Lee groups. Properties ow fissure veins in grano-diorite, running N. E.-S. W. and dipping 40-60°. he copper ore, which carries gold and silver, occurs in shoots, 2-12′ thick and)-100′ long. This ore is said to average 17.9% copper, 24.85% iron, 10.75% lica, 4% aluminum, 1.2% lime, 34.5% sulphur, 5.68% antimony, 0.8% zinc and 05% nickel.

Development: 5,000′ of work including 300′ to 700′ tunnels with about 500′ on ore. About 100,000 tons of shipping ore has been mined and put on the mp, waiting for cheaper transportation. The mines are 16 miles from a railad over a heavy grade. Property has been under development in a small way r 19 years past.

Examined and reported on by Prof. F. L. Barker, Robt. E. Hanley and B. Wilson.

AYWASH MINING CO. WASHINGTON

Officers: L. H. Prather, pres., Tacoma; W. R. Weisel, v. p.; D. L. ylor, treas., both of Kennewick, Wash.; S. S. Callahan, sec., Twisp, Wash., th W. Wood, directors.

Cap., $1,000,000; par $1; assessable to 10 mills.

Property: 3 claims on Methow river, and 5 claims on Goat creek, both oups near Mazama, Okanogan county, are said to show silver and gold-bearing oper ore. The ore from the Goat Creek group said to assay $33 to $54, and t of the 3 claim groups $8 to $32 in copper, with a little gold and silver.

Development: shallow shafts and 3 tunnels, longest, 250′.

Management thinks it has a good prospect, but only assessment work has n done recently, as company expects a railway to be built soon that will give ap transportation.

IATTERBOY MINING CO. WASHINGTON

Office: Dayton, Wash.

Officers: A. D. Monnett, pres.; Judge C. F. Meller, sec.-treas.; J. C. nard, mgr.; J. J. O'Connor, supt.

Property: the Lucille Dreyfus mine, including 8 claims, 1½ miles S. Danville, reported in 1917, as held by Virginia Mining Co., and operated under 50,000 lease and bond by A. A. Dunphy and associates, of Spokane. Said to e a 7′ vein with gold value ranging from $6 to $17 per ton.

The Chatterboy Co. is driving a tunnel to cut the vein at a depth of 8 itional depth of 500′. Company also has an option on the adjoining he Minnehaha Mining Co.

ELAN CONSOLIDATED COPPER CO. WASHI

Michael J. Corcoran, asst. sec.-treas., 180 Broadway, New York. **Operating office:** 811 Lowman Bldg., Seattle, Wash. **Mi** venworth, Chelan county, Wash.

Officers: F. D. Wilsey, v. p.; Thos. J. Higgins, sec.-treas., W Bristol, Edw. W. Kuhn, A. T. La Vallette, J. L. Jurey and Louis tees.

Inc. May, 1906, in Wash. **Cap.,** $12,000,000; $10 par; issued. ranty Trust Co., New York, registrar. Annual meeting, first . Company absorbed the Red Mountain Gold & Reduction Co., Mng. Co. and a large number of individual mining properties.

COPPER KNOB MINING CO. **WASHINGTON**

Officers: Wm. H. Stevens, pres., Hillyard, Wash.; with J. S. Meyers, J. T. Brunskill, Laurier, Wash.; J. E. Winters, and E. O. Conner, Spokane, directors.

Cap., $100,000; par 10c; non-assessable.

Property: 7 claims, unpatented, near Laurier, said to show copper ore with small precious metal content. Has a 60′ shaft. In 1918, a crosscut then being driven showed a little ore.

COPPER QUEEN MINING CO. **WASHINGTON**

Property taken over by Copper King Mining Co. and a new company organized under title of King Mining Co., which see.

COPPER WORLD EXTENSION MINING CO. **WASHINGTON**

Address: Loomis, Okanogan county, Wash. Walter A. Boyle, pres.; Edw. H. Caylor, v. p.; Alfred F. Carman, sec.-treas.

Property leased to C. Dempster & Sons, New York (R. C. Dempster, supt.) who are said to have spent $80,000 for equipment and development work to end of 1919.

Inc. January 11, 1904, in Washington. **Cap.,** $1,500,000; shares $1 par.

Property: 8 claims, 160 acres, on Palmer mountain, in the Wannacut lake district. The ore is pyrrhotite containing copper and occurs in lenticular masses in a schistose formation opened by a 335′ 2-compartment shaft, with 800′ workings of 2,000′. Diamond-drilling being done in 1920.

In 1917-18, shipments amounted to 3,500 tons ore, assaying 4% copper, 6 oz. silver, and 0.025 oz. gold per ton.

Equipment: includes steam plant, with 40 h. p. hoists and 4-drill air compressor. A 2-mile Riblet aerial tram was completed in 1919; capacity, 40 tons in 24 hours. Employs 14 men.

COPPER WORLD GOLD MG. & SM. CO. **WASHINGTON**

Office: 401 Columbia Bldg., Spokane, Wash. **Mine office:** Loomis, Okanogan county, Wash. Jerome L. Drumheller, pres. and mgr.; John Wentworth, v. p. and supt.; S. A. Child, sec.-treas.

Inc. in Washington. **Cap.,** $3,000,000; shares $1 par, non-assessable.

Property: 2 claims, patented, lying between the Copper World Extension on the east and the Leadville mine on the west, on Palmer mountain, 3 miles N. E. of Loomis. The mine has several short tunnels and shallow shafts and a 135′ two-compartment incline shaft, having a 125′ crosscut.

This and adjoining property, Copper World Extension (which see), are under 5-year lease to C. Dempster & Sons, New York.

CRESCENT MINING CO., LTD. **WASHINGTON**

Company is a reorganization of the Crescent C. Mng. Co.

Office: at last accounts, 201 Lindsey Bldg., Winnipeg, Manitoba, Can. **Mine office:** Twisp, Okanogan county, Wash.

Officers: D. C. McFee, pres.; C. H. McNaughton, v. p.; J. H. Sutherland, sec.-treas., with F. J. Carr, D. D. Young and D. Munroe, directors. G. A. Creighton, mgr.

Cap., $3,000,000; unsubscribed stock, $1,291,786; $1 par.

Property: 48 claims, about 960 acres, and a mill-site on the east side of Cascade Range, in Okanogan county, about 100 miles S. W. of the Great Ore occurs in fissure veins, carrying chalcopyrite, bornite and quartz. Main development by tunnel over 900′ long. A good deal of graphite is mixed with the ore.

Equipment: includes a turbine, electric plant, air drill, saw-mill, buildings and miners' lodgings. Management does not reply to requests for information.

CRYSTAL MINE **WASHINGTON**

Property: 40-acre mining group 35 miles W. of Lincoln, in Lincoln county. Developed by 200′ shaft.

Reported under option to E. S. Campbell and associates for $200,000.

DEER TRAIL NO. 2 MINES **WASHINGTON**

The mines were notable producers 25 years ago, with a credited yield of

,000,000. Ore carries silver, with some lead. 200,000 tons of $10 ore are ported on the dump and in stopes. Mine has 2 miles of workings.

Reported under a lease and bond in 1918 to W. A. Corey, of the Finch estate.

IAMOND R. MINING CO. **WASHINGTON**

Officers: R. A. Hutchinson, pres.; W. H. Crawford, v. p.; E. S. Camp-ll, sec.-treas., 311 Hyde Bldg., Spokane; Oscar DeCamp, supt., with T. S. utchinson, directors.

Cap., $100,000; 10c par.

Property: 6 claims, patented, in Pend Oreille county, one mile from etaline, said to have argentiferous lead-zinc ore assaying 7% lead, 10% zinc, d 1 to 3 oz. silver. In 1918, company claimed to have 15,000 tons milling ore dump and in the mine.

Development: by tunnels. Lessees are said to have made small ship-nts of 60% lead ore. No recent information.

OMINION SILVER LEAD CO. **WASHINGTON**

Officers: early in 1918 were, W. H. Linney, pres., 2805 Summit Blvd., okane; Roy C. Lammers, v. p.-treas.; Roy H. Clarke, sec., all of Spokane.

Inc., 1919, in Washington. **Cap.,** $100,000; par $10; non-assessable. Owing litigation property has been idle for several years. Company was organized work Old Dominion group, operated for many years by G. B. Dennis, Spokane, d Peck Bros., Chicago. Property sold at sheriff's sale, 1916. Bought by W. Linney, who formed present company. Peck Bros. then brought suit and n the case in the lower court, but company has appealed.

Property: Old Dominion group, 2 miles E. of Colville, said to show h-grade silver-lead ore. Developed by tunnel to depth of 800', with 17,000' al workings. Mine first opened in 1865, has produced 3,061 tons of ore worth 2,536.

)UBLE EAGLE MINING CO. **WASHINGTON**

Officers: M. Kulzer, pres., Valley, Wash.; W. S. Rose, v. p.; E. E. wards, sec., Valley, with J. L. Dirks, W. H. Button, and A. Morrison, di-tors.

Cap., $1,000,000; $1 par.

Property: 4 claims, and 200 acres leased land in Stevens county, 12 es W. of Valley, said to show silver-lead-copper ore.

Development: by tunnels. At last account company was driving a 0' tunnel to cut the vein at 700' depth. Several cars of ore have been shipped.

)UBLE HEADER MINING CO. **WASHINGTON**

Officers: Geo. M. Quinn, pres.; L. C. Shuff, sec.-treas.; with E. Moore, . Kennedy, and E. Smith, directors. Reported in November, 1918, that prop-was being operated by a close corporation, the Jenkins-Hammond Co., with nk C. Hammond, mgr.

Inc. 1914, in Washington. **Cap.,** $1,500,000; $1 par; 1,174,326 issued. nual meeting, first Tuesday in June.

Property: 7 claims, 120 acres, 1½ miles S. of Nespelem, Wash. Exam-by A. O. Ingalls and others. Claims cover a quartz vein in granite, dip-50° N. E., with N. W.-S. E. course.

Development: by 80' vertical and 125' incline shafts, workings totaling 0'. InNovember, 1918, rich ore was reported cut in a band paralleling the r-grade ore. A 100-ton flotation mill has been installed in which an 80% very is reported.

TCH MILLER MINING & SMELTING CO. **WASHINGTON**

H. P. Fogh, pres. and agent for majority stockholders, 1403 Howell St., tle. Wash. Geo. H. Law, sec.-treas.

Cap., $2,000,000; shares $1 par; all issued; 1,000,000 shares in escrow fo ars. Majority of stock is held by an ore contract association, which mad ear contract for output, the Dutch Miller to get 40% of earnings as royalty half to apply on 500,500 shares optioned to the association.

Property: 2 patented claims, on summit of range, 12 miles south o comish, Wash., formerly worked by the Seattle-Boston Copper Co. Claim an orebody in a vein in granodiorite. Ore is chalcopyrite with tourmalin

and quartz, and is high-grade. Mine lacks transportation facilities and ... tramway must be installed to get ore to the wagon-road.

Examined by W. H. Weed. Inactive for several years, but company ... alive.

EAGLE PEAK COPPER MINING CO. WASHINGTON

Mine office: Longmire, Pierce county, Wash. **Main office:** Tacoma, Washington.

Officers: R. H. Wheelock, pres., Ashford, Wash.; J. E. Walker, v. p.-mgr.; M. A. Long, sec.-treas., with G. W. Anderson and A. Lundin, directors.

Inc. 1908 in Washington. **Cap.,** $150,000; $1 par; issued, 130,000. Annual meeting, September 10.

Property: claims, 40 acres in Cascade mining district, 14 miles ... railroad, in the heart of the Tatoosh range, near Mt. Tacoma. Claims ... fissure veins in granite with ore carrying bornite and chalcocite and sul... average 17% copper, $4 gold and some silver.

Development: by tunnel. **Equipment:** includes 25-h. p. power ... air compressor and 4 buildings. Reported, 1919, that a small mill will be ...

ECLIPSE CONS. MG. & INVESTMENT CO. WASHINGTON

Address: 528 New York Bldg., Seattle, Wash.

Officers: Robert Dahl, pres., John E. Newall, v. p.; John B. Van Dyke, sec., with Andrew Chilberg, directors.

Inc. 1906, in Washington. **Cap.,** $3,000,000; $1 par; $2,000,000 in ... given for the property.

Lands: 9 claims, unpatented, and a mill site.

Mine has 3 tunnels and a shaft on a fissure vein in slate, carrying ... gold and silver, claimed to assay $61.50 per ton. Workings total 1,825'. ... agement estimates 90,000 tons ore blocked out, March, 1919. Water power ... the Stillaguamish river develops 830 h. p. by turbine. The concentrator, ... at 300 tons daily capacity, has tank room for cyanide treatment. A compr... of 600 cu. ft. capacity has recently been added.

ELECTRIC POINT MINING CO. WASHINGTON

Address: Roy A. Young, pres.-gen. mgr., Northport, Wash. ... Dodds, supt., Cummings, Wash.

Officers: J. E. Yoder, v. p.; F. A. Turner, sec.; F. T. McColl... treas., with L. C. Jesseph and R. A. Young, directors.

Cap., $1,000,000; $1 par; 793,000 shares issued. One quarter ... owned by Walter J. Nicholls, Spokane. Financial statement shows ... loss in 1918 of $25,917. Cash reserve, December 31, 1918, reported as $14...

Dividends: initial on Jan. 31, 1916; last, of 3c a share, was paid ... 22, 1919, making total of $301,530.

Property: 13 claims, 245 acres, unpatented, 20 miles E. of Nort... Stevens county, and 13 miles from Boundary, the shipping point. Mine ... top of a mountain, 4,000 to 5,000' high.

Ore: a low grade lead ore mainly carbonate that occurs in chim... of variable size. Shipments run about 25% lead.

Development: to 800' level by tunnels and shaft. Reserves are ... ficially estimated as 25,000 tons of 30% ore, plus 2,000 tons in bunkers at ... terminal. In October, 1919, it was reported that a new chimney of ore, 80' ... had been developed.

Equipment: includes a 2½ mile aerial tram, from mine to Lead... and another section to be built to Wood Spur; orebins and suitable mining ...

Production: in 1917, shipments totaled 16,310 tons ore; in 1918, ... tons were shipped, returning $241,138.

Property was idle for several months in 1919. Future of the mine ... depend on the possibility of finding a market for the ore. Reported, ... 1919, that the U. S. S. R. & M. Co. at Midvale, Utah, had arranged to ... entire output. If the ore carried 30% lead, and the metal is 6 cents a ... equal to $18 per ton of ore, and charges are $3 per ton for treatment and ... for freight, the profit will be $6.20 per ton.

LIZABETH GOLD HILL MINING CO. **WASHINGTON**

Address: North Yakima, Yakima county, Wash.

Officers: L. L. Matterson, pres.; P. J. Eschbach, v. p.; Frank X Nagler, :-treas., with Jos. Feser, Thos. Hope, E. P. Sanford and Rudolph Mayer, ectors.

Inc. 1900, in Washington. **Cap.,** $1,000,000; $1 par. Annual meeting ond Monday in March.

Property: 14 claims, unpatented, 200 acres, adjoining the Blue Bell mine the north, about 65 miles N. W. of North Yakima, in the Summit district, ws a number of orebodies in granite, carrying gold-silver-lead-copper ores, h 1,600′ of workings.

Ore reserves: estimated by management, 150,000 tons of ore, with ,000 tons blocked out for stoping, averaging $40 per ton, which figures are essive.

Equipment: includes steam and water power, and a small sawmill, with erial for a 10-stamp mill on the ground. Idle since 1917.

PIRE MOLYBDENITE M. & M. CO. **WASHINGTON**

Address: M. B. Le Page, sec., 621 S. Adams St., Spokane, Wash.

Officers: T. Le Page, pres.; D. J. Whelan, v. p.; Fred Le Page, treas., A. G. Clark, directors.

Cap., $100,000; shares 10c par.

Property: 8 claims, unpatented, on Molybdenite peak, Metaline dis- Pend Oreille county, 11 miles from Ione. Claims carry molybdenite ore has been worked in a small way for several years, and some shipments e.

'ORITE GOLD & COPPER MINING CO. **WASHINGTON**

Probably dead. See Vol. XII.

Mine at Nighthawk, Okanogan county, Wash.

. & C. GOLD MINING CO. **WASHINGTON**

Officers: S. A. McCay, pres.; M. J. Luby, v. p.; J. J. Hennessy, treas.- ; Mary Hennessy, sec., with Martin Woldson, directors, all of Spokane.

Cap., $250,000; shares 25c par.

Property: 53 acres, 2½ miles N. W. of Rockcut, Ferry county, has silver ore.

Development: 170′ shaft, with about 1,000′ of workings. **Equipment:** les gasoline hoist and compressor. Small shipments were made to Granby r in 1918. No later information.

T THOUGHT MINING CO. **WASHINGTON**

ucceeded by Cons. First Thought Mines Co., which see.

RENCE-RAE COPPER CO. **WASHINGTON**

ddress: Index, Snohomish county, Wash. N. Rudebeck, mgr.; Fred supt.

roperty: on Copper mountain, about 4 miles E. of Index, has a tun- owing a 10′ paystreak of chalcopyrite in the Margurite vein and assay of sample taken across 6′ of the vein averages 12 oz. silver, 18.5% copper, iron, 7.2% silica, and 35.8% sulphur. Idle.

'K MINING CO. **WASHINGTON**

ldress: Chewelah, Wash.

ficers: A. C. Weary, pres.; W. B. Stuart, sec.-treas.-mgr., with Wm. son, directors.

p., $80,000; 5c par.

operty: 4 claims, 80 acres, near Chewelah, said to show copper-lead quartz vein. Developed by 120′ shaft. A prospect.

NA FARM MINING CO. **WASHINGTON**

dress: Dr. W. J. Keyes, sec., Fernwell Bldg., Spokane, Wash.

operty: 6 claims, in Stevens county, 16 miles S. E. of Northport, show lead-silver-gold ore.

velopment: by open-cuts and 200′ tunnel. No recent report.

GLADSTONE MOUNTAIN MINING CO. **WASHINGTON**

Address: 201 Sherwood Bldg., Spokane, Wash. **Mine office:** Northport, Wash.

Officers: F. T. McCollough, pres.; T. S. Lane, v. p.; W. J. Nichols, mgr.-sec.-treas., with J. A. Welch and H. M. Stephens, directors. D. D. Dodd, supt.

Inc. August, 1916, in Washington. **Cap.,** 1,500,000 shares, 10c par; non-assessable; 1,201,056 outstanding; 100,000 shares sold 1917 at 15c per share.

Property: 16 claims, 11 surveyed for patent, 291 acres, situated 20 miles E. of Northport, and but 900′ from Electric Point mine, the claims almost surrounding that property.

Geology: vertical chamber or so-called "chimney" deposits in limestone. Ore contains lead as carbonate, 1 oz. silver, trace of gold. Sulphides were opened in 1919.

Development: by Setting Sun shaft 275′ with drifts at 50, 100, 200 and 260′; total openings, 450′. Shaft and drifts show pay-shoot 120′ long with workable width, of carbonate lead ore. Also has 120′ Lone Star shaft with ore.

About $35,000 has been spent on the property.

Equipment: 15-h. p. gasoline hoist.

Production: in 1917 shipped 22 cars of 15 to 18% lead ore netting $12,000. Closed down in 1917, owing to lack of funds, but was reopened in 1919 and by October, carbonate and sulphide ore had been found carrying up to 8% lead. Is a speculative proposition.

GRANT CONSOLIDATED COPPER MINING CO. **WASHINGTON**

Officers: at last accounts, C. H. Clodius, pres., Ritzville, Wash.; MacDonald, v. p.; J. A. MacLean, sec.-treas., Spokane.

Inc. 1907, in Washington. **Cap.,** $1,650,000.

Property: 14 claims, on Copper mountain, 9 miles from Chesaw, Okanogan county, developed by an open cut and tunnel planned to be driven 1,500′, cutting 2 strong veins carrying medium-grade chalcopyrite in considerable quantities. Shipments said to have returned about 6% copper and $3 gold per ton.

Equipment: includes two 80-h. p. boilers and an air compressor. Letters neither answered nor returned. Presumably idle.

GREAT METALS MINING & MILLING CO. **WASHINGTON**

Address: Nespelem, Okanogan county, Wash. E. C. Williamson, mgr.; Albert Nelson, supt.

Property: in the Nespelem district, also reported to have leased property from the Double-Header Mining Co., which see. At depth of 200′ in September, 1919, a foot of $20 and five feet of $15 ore had been opened in company's mine.

Equipment: includes a gravity concentration and flotation mill, treating 80 tons of silver ore and 10 tons of lead ore daily, at last account.

GREAT NORTHERN MINING CO. **WASHINGTON**

Address: Jos. Rosslaw, Hyde Bldg., Spokane, part owner in 1918.

Property: 4 patented claims, on San Poil river, Ferry county, 15 miles from Kellar, said to show gold-copper ore, with some nickel and cobalt. In 1918, workings totalled 1,850′.

GWINN MINING CO. **WASHINGTON**

Property said to have been acquired by Hall Creek Mining & Milling Co. in 1919.

Address: Meteor, Ferry county, Wash. Peter Proff, mgr. at last accounts.

Property: a group of claims in the Meteor or Covada district, showing fissure veins in sedimentary rocks cut by diorite and carrying complex ore said to average about $16 per ton in gold, silver, copper and lead.

Development: by shafts and tunnels, said to have blocked out considerable low-grade ore which is being treated in a 50-ton concentrator. Company erected a dam on Hall creek for its hydro-electric plant.

ALL CREEK MINING & MILLING CO. **WASHINGTON**

Officers: at last accounts, M. W. Merritt, pres.; Peter Proff, Jr., sec.-as.-mgr., Rosalie, Wash.

Inc. in Washington. **Cap.,** $1,000,000: shares $1 par.

Property: 240 acres including the Gwinn mine and group of claims, ows a fissure vein carrying gold-copper ore, developed by 400′ shaft. (See vinn Mng. Co.)

Equipment: includes steam plant and water power, hoist and 4-drill irbanks compressor. Has a 75-ton concentration mill, driven by electric power.

No recent returns; presumably idle.

AMMOND MINING CO. **WASHINGTON**

Dead. Former property, the Great Excelsior mine.

This was an attempt to work a $4 gold deposit. See Vol. XIII for details.

CLA COPPER-SILVER MNG. & MLG. CO. **WASHINGTON**

Chewelah, Wash.

Officers: J. C. Argall, pres., Spokane; Howard McPhee, v. p.; V. R. ar. sec.-treas.; Fred F. Foster, supt., with C. W. Linscott, directors.

Property: 11 claims 3½ miles N. E. of Chewelah and S. of the United er Copper Co. Claims show 4 ledges, the main vein varying from 6 to wide, traceable by cuts and pits for nearly a mile and averaging 5.4% cop-, $1 in gold and $1.80 in silver.

Developed: by a 75′ tunnel and a 150 vertical shaft. **Equipment:** in-les a 50 h. p. hoist and a 4-drill compressor. No recent returns; probably

GH GRADE SILVER & COPPER MINING CO. **WASHINGTON**

Office: Chewelah, Wash.

Officers: Oscar Carstens, pres.; Henry Carstens, v. p., 828 Old National k Bldg., Spokane; J. A. Hansen, treas.

Inc. July, 1909. **Cap.,** 1,500,000 shares, assessments of 9 mills levied to

Property: 3 claims, about 3 miles N. E. of Chewelah, Stevens county vs a granite intrusion in lime with mineralization along contact. **Ore:** -grade copper with silver and lead values.

Development: by 125′ shaft and a new 60′ shaft being sunk on a body of ized iron ore. **Equipment:** includes hoist, boiler, pump, etc.

See Columbia Turk Copper Co., for lawsuit, etc.

LDEN GOLD & COPPER MINING CO. **WASHINGTON**

Mine near Lucerne, Chelan county, Wash.

Officers: J. H. Holden, pres.-mgr., Chelan, Wash.; A. W. Lachapelle ; O. A. Hoag, sec.-treas., with Chas. N. Boon, directors.

Cap., $250,000. Company has no debts and no earnings to date.

Property: 6 claims, 120 acres, on Railroad creek, near Lake Chelan, 60 N. of Wenatchee on the G. N. R. R., shows gneiss and schist cut by granite a vein of 40′ average and 185′ claimed maximum width.

Development: by 6 tunnels, Nos. 2 and 3 being connected by a blind with about 2,000′ of workings on 3 levels and several hundred feet of dia--drilling. There also are numerous open cuts. Mine shows ore said to from 7 to 10% copper, 2 oz. silver and $5 to $10 gold per ton. Idle, except nual assessment work.

IESTEAD COPPER CO. **WASHINGTON**

ddress: W. H. Angel, mgr., Colman Bldg., Seattle, Wash.

fficers: C. Dell Floyd, pres., Chehalis, Wash.; Mrs. Peter McLane, Peter McLane, treas., with W. H. Angel (mgr.), directors. Agnes W. , treas.

ic. in Washington. **Cap.,** $1,000,000; par $1.

roperty: 9 claims, 180 acres, 6 miles from Index, Snohomish county, show copper ore. Workings amount to only 200′ of tunneling. Is a ct.

NOIS COPPER & SILVER MINING CO. **WASHINGTON**

ddress: Keller, Ferry county, Wash. J. C. Davis, pres. and gen.

mgr.; J. D. Nighbert, v. p.; R. Shoemaker, supt.; Edwin Johnston, sec.; J. D. Hess, treas.

Inc. in Washington. **Cap.**, $2,000,000; $1 par; in $1,000,000 preferred and $1,000,000 common stock.

Property: 10 claims, in the San Poil district, and "a ⅓ interest in [illegible] acres of granite" 21 miles N. of Keller.

Development: by 3,000' of tunnels, exposing a 3½ vein of zinc-copper ore with silver values. In a second vein said to be 50' wide, $10 ore is cut and a third vein, 12' across, shows $30 ore. Mine under development since 1907.

Equipment includes $5,000 worth of machinery, all well housed.

INSURGENT GOLD MINING CO. WASHINGTON

Address: G. B. Dennis, Knickerbocker Apts., Spokane, Wash.

Inc. in Washington. **Cap.**, $500,000; $1 par.

Property: 1 claim and fraction adjacent to the Hope mine of the Northport S. & R. Co., at Republic, Ferry county, controlled by the Day Bros.

Development: by 540' shaft, opening a 15' vein.

In 1919, the Days started suit against the Insurgent and Lone Pine-Surprise Consolidated, claiming $100,000 damages for ore alleged to have been wrongfully removed by those companies.

Production: to 1918 amounted to 12,000 tons of $19.76 gold ore.

INTERNATIONAL GOLD MINING CO. WASHINGTON

Head office: Empire State Bldg., Spokane, Wash.

Officers: Peter Reid, pres.; D. F. Kizer, v. p.; G. H. Walters, sec.; C. L. Russell, treas., with H. L. Williams, directors.

Cap., $1,000,000; shares, $1 par.

Property: 6 claims in the Orient district, Ferry county, developed by tunnels and equipped sufficiently for a small mine.

INTERSTATE-SULLIVAN MINING CO. WASHINGTON

Officers: Dennis Sullivan, pres., Rockford, Wash.; H. F. Phillips, v. p.; A. E. Barnes, sec.-treas., Hyde Bldg., Spokane; Jack Ashley, Jr., supt.

Cap., $100,000; shares, 5c par.

Property: Hidden Treasure group, 6 claims, on Goat mountain, W. Fk. Clark's Fork, Wash., said to show a fissure vein with silver-lead ore. In 1919, a 3-drill compressor had been added to equipment, and a tunnel was run to cut the vein at a depth of 800'.

IRON CREEK MINING CO. WASHINGTON

Address: Keller, Wash.

Officers: R. J. Clark, pres.; J. E. Angel, sec.-treas.; both of Colville, Wash.; J. W. Duncan, v. p., 1311 McClellan St., Spokane; J. E. Kennedy, Chas. W. Clark, directors.

Inc. in Washington. **Cap.**, $1,500,000; par $1.

Property: several claims, unpatented, on Iron creek, 12 miles S. of Keller, in Ferry county, said to show silver-lead ore.

Development: 1,200' of workings, mainly tunnels.

In 1917, 20 tons, valued at $491, were shipped. At last report, company planning the erection of a 25-ton mill, and resumption of work.

IROQUOIS MINING CO. WASHINGTON

Address: Chas. E. Bisbee, receiver, Rookery Bldg., Spokane, Wash., appointed in May, 1918.

Officers: C. W. Horne, pres.; Jas. A. Crowther, sec.-treas.; with A. Verich, all of Spokane; John Kalscheuer, and Geo. H. Bessler, directors.

Cap., $1,500,000; par $1.

Property: had a lease and bond for $50,000 on 3 claims on Flat Mtn. 6 miles S. W. of Boundary, Wash. No [illegible] tunnel was run and expensive machinery installed [illegible] to the original owners, as a report by W. Earl [illegible]

IVANHOE MINING CO.

W. B. McChesney, mgr., Oroville, Wash.

Property: on Palmer mountain, 7 [illegible]

ity, developed by a 4,400′ tunnel to a vertical depth of 1,559′, at which depth main orebody was intersected.

NO-ECHO COPPER CO. **WASHINGTON**

Address: Albert E. Kulzer, Chewelah, Wash.

Officers: Dr. C. A. Hauber, pres.; C. T. Winslow, v. p.; with H. R. lden, of Colville; F. L. Reinoehl, Chewelah, and F. H. Alm, directors.

Inc. in Washington. **Cap.,** $150,000; par 10c; assessable up to 3c a share. e assessments of one mill called, 1917.

Property: the Juno, Echo and Ibex lode claims, 2 miles E. of Chewe- and adjacent to Security Copper Co. and Standard Chewelah Co. holdings. resumably a consolidation of Juno Copper Co. and Juno-Echo M. & M. Co.

Development: by 320′ shaft with levels at 150′ and 300′, exposing in of copper ore carrying molybdenite.

Property has shipped two carloads of high-grade ore.

ITER LEAD CO. **WASHINGTON**

Address: Northport, Wash., or care Al Baker, Spokane, Wash.; Chris. son, Wm. Bynan, C. Basler, and others, of Northport, Wash., lessees.

Cap., $300,000; par $1.

Property: the Last Chance group, 6 miles S. E. of Northport, which ig 1908-10 produced about 1,400 tons of lead ore, valued at $65,000. Idle 1916, when Norman Mines Co. took lease and bond on property for $30,000. ral carloads of ore were shipped, assaying 60% lead and zinc. Option was quished in October, 1916, and mine was idle until late in 1918.

T TIME MINING CO. **WASHINGTON**

Office: 326 Rookery Bldg., Spokane, Wash.

Officers: F. C. Descent, pres.; A. Anderson, sec.; with D. Danielson, tors, all of Spokane.

nc. 1917, in Washington. **Cap.,** $300,000; par $1.

Property: 2 unpatented claims, in Stevens county, 3 miles from Elec- Point mine, said to show silver-lead ore in a 70′ shaft. No recent report.

KAKEE MINING CO. **WASHINGTON**

Officers: H. L. Mayberry, pres.; Wm. Barnard, sec., Nespelem, Wash.; O'Neill, treas., with F. M. De Camp, G. G. Sather, E. Christensen, and . Smith, directors.

nc. in Washington. **Cap.,** $850,000; $1 par.

Property: 11 unpatented claims, and a millsite in Okanogan county, 3 W. of Nespelem, has zinc-copper ore with silver and a little gold. Said re 15,000 tons of ore blocked out.

Developing in 1918; no later report.

3 MINING CO. **WASHINGTON**

Lead. See Copper King Mining Co.

Officers: V. D. Williamson, pres., Empire St. Bldg., Spokane, Wash.; Douglas, v. p.-gen. mgr.

nc. in 1916, to take over the Copper King and Copper Queen mines at lah, Stevens county, Wash. See Vol. XIII.

B HILL MINING CO. **WASHINGTON**

Office: 622 Old National Bldg., Spokane. **Mine office:** Republic, Wash.

Officers: John Byrne, pres.; Chester Shoudy, v. p.; with T. A. White, Chamberlain, H. Kreysler, Mrs. John Byrne, and J. E. Daley, directors. Broyles, sec.-treas.

ap., $1,000,000; shares $1 par; all issued. Stock [illegible] Spokane Ex- . Annual meeting, January.

ults in 1916 were $33,812; in 1917, ore [illegible] 10 cts. lb

sales were $33,933; total income, $37,330.

6; operations resulting in a loss of $9,216.

idends: resumed in March, 1917, after a [illegible]

year, bringing total dividends to $105,000.

perty: the Knob Hill and Mud Lake [illegible]

Wash. The Knob Hill is developed by shafts [illegible]

oz. silver besides copper and gold values and which it is believed can be profitably mined and milled.

Equipment: includes a 15-h. p. electric hoist and 5 buildings. Company's last report shows a total expenditure at the mine from beginning of work to April 28, 1913, of $118,000, of which ore sales furnished $17,062, bonds $35,100 and stockholders (175,000 shares), $65,838.

In 1917 company expected to erect a mill including flotation, which process is expected to save at least 90% of the metal contents. A Hardinge 75-ton mill was ordered in December, 1919.

Property promises to make a good small mine.

Q. S. COPPER CO. — WASHINGTON

Mail returned from former office, 229 North Division St., Spokane, Wash. Mine office: Q. S. Ranch, Cusick, via Loomis, Wash.

Officers: A. M. Dewey, v. p.-gen. mgr., 4042 Arcade Bldg., Seattle, Wash.; J. P. Heckert, sec.; A. F. Suksdorf, treas.

Inc. April 10, 1914, in Washington. **Cap.,** $2,000,000; shares $1 par. Is successor of the Q. S. Mining Co. Property was purchased by the new corporation, which paid all the debts, amounting to more than $25,000, and issued stock at 2c a share to the old stockholders; forfeited stock was left in the treasury which gave the corporation a majority of the stock. Bad management in 1913 wrecked the former company and led to a receivership, no annual meeting being held that year. Property was sold for taxes, but sale set aside by the court when the receiver was appointed. Litigation involving ownership pending.

Property: 13 claims, with 10 acres of mill sites, and water rights on Sinlahekin creek, about midway between Loomis and Conconully, along the flank and crest of Aeneas mountain, in the Salmon River district. The property shows fissure veins in diorite carrying mainly low-grade copper ores. The company claims an orebody 300' wide at surface, which has been crosscut for 200' at a depth of 800' below the outcrop without reaching the wall, and traced by stripping for 6,000' on surface, showing a ledge of 212' width at the north end, in the middle and 285' at the southern end of the property.

Development: begun 1897, is by 2 open cuts at either end, a pit of 150' in the middle, and a tunnel 1,063' long cutting the vein at depth of 800', with another tunnel, intended for the main avenue of extraction, 540' below, planned to cut the orebody at depth of 2,000'. One tunnel shows chalcopyrite ore said to give assays of 11.4% copper and estimated to average 2 to 4% copper with small and variable silver values and about $1 gold per ton. The company claimed an average ore value of $14 per ton from several hundred assays.

Assessment work only done by new company. No recent information; probably idle, or out of business.

Q. S. MINING CO. — WASHINGTON

Succeeded by Q. S. Copper Co., which see.

QUILP GOLD MINING CO. — WASHINGTON

Address: Republic, Wash.

Officers: Jas. Hutchinson, pres.; W. G. C. Lanskail, sec.-gen. mgr.; G. V. Alexander, H. J. Lycett, and John Stack, directors. Alex. McKay, S. H. Richardson, cons. eng.

Cap., $1,500,000; par $1; 67,500 shares outstanding.

Property: 1 claim and a fraction including the Quilp mine at Republic, Ferry county. It is adjacent to the Insurgent, Last Chance and Surprise mines. The Quilp was located in 1896 and operated intermittently by several companies. It paid five dividends, totaling $67,500; last payment in 1912. Mine was reopened in 1914 after lengthy litigation with the defunct Republic Mines Corporation; and again opened in 1918. In 1919 the Quilp mine was the largest producer in the district. Shipments made to Tacoma smelter. Ore carries gold and silver.

Development: by over 6,000' of workings to depth of 800'. Results at 800' have been good.

Equipment: steam power, hoist, 7-drill compressor, drills, and regular mining plant.

Production: 39,653 tons valued at $492,843 to end of 1918. Shipments 1919 estimated to be worth $100,000.

THFON REDUCTION WORKS **WASHINGTON**

Officers: A. L. Bradley, pres., Danville, Wash.; D. W. Rathfon, gen. r., Republic, Wash.

Cap., $500,000; par $1; 400.000 shares common stock, assessable up to ents.

Property: company in 1913 acquired the famous Republic mine and other claim in Ferry county, at one time operated by New Republic Mining and before that by Patrick Clark, of Spokane. Said to have produced $2.-000 in gold. Ore was shipped in 1918. November 22, 1919, the Republic mine sold at sheriff's sale to satisfy a judgment of $43,406 in favor of Fred Kei-m, J. T. Hollis and Frank Babcock.

ARDON COPPER CO. **WASHINGTON**

Officers: Oscar Carstens, T. J. Carstens, Henry Carstens, all of Rear- Wash., and A. H. Kenyon, of Spokane.

Cap., $50,000; par 5c. A close corporation.

Property: near Turk, Stevens county, includes the High Grade mine.

Development: mainly by tunnels. Shipments were made in 1918, and 919 shipped 137 tons of ore up to September.

)WOOD COPPER MINING CO. **WASHINGTON**

Dead. Mine at Chewelah, Stevens county, Wash. Developed by 400′ tun- with several hundred feet of raises and winzes expected to expose copper at ter depth. Operations ceased in April, 1912, and property was lost under closure of mortgage. Present owners are Chas. Stevens and others, of Rob-n Straus & Co., St. Paul, Minn.

)UBLIC CONS. MINES CORPORATION **WASHINGTON**

Property now operated by the Northport Smelting & Refining Co., which Vol. XIII contains details of the corporation's checkered career.

S MINING CO. **WASHINGTON**

Address: Newport, Stevens county, Wash.

Officers: A. Ries, pres.; E. E. Jones, sec.; F. W. Vawater, treas., with . Bell, directors.

Inc. in Washington. **Cap.,** $100,000; $1 par.

Property: 4 claims near the Pend d'Oreille river, 2 miles N. of New- on the Washington side of the State border, about 30 miles E. of Chewelah e veins have been found, carrying silver, lead, and gold. A shipment of 11 from an old shaft returned 288 oz. silver, 4,245 lb. lead, and 4.4 oz. gold, or erage of $47 per ton. A 200′ shaft is being sunk.

Mine is favorably situated and the owners are sanguine of success.

'AL COPPER MINING & MILLING CO. **WASHINGTON**

. J. Winslow, pres. **Mine address:** Chewelah, Stevens county, Wash.

)roperty: 7 claims said to show 3 parallel ledges having slate and te contacts.

)evelopment: by 400′ tunnel said to carry copper, lead, silver, and with small amounts of copper. Company probably dormant, as letters are ied unclaimed.

Y MINING CO. **WASHINGTON**

'ighthawk, Okanogan county. Succeeded by the Pyrargyrite Mining Co., see.

TA RITA MINING & MILLING CO. **WASHINGTON**

ddress: F. C. Merriam, Wallace, Idaho.

)fficers: John H. Hemphill, sec.-treas., Peyton Bldg., Spo

nc. 1918 in Delaware to take over property of Clevela

$500,000; par $1.

roperty: 10 claims, including the old Cleveland mine,

gdale, Stevens county, discovered nearly 30 years ago. T

ead-zinc-silver sulphide, containing antimony and bismut

)rofitably. Mine is developed by a 265′ shaft and tunnels

ny started operations several years ago, but lack of capit

down after a concentrator had been built. In August, 1919, control passed to First National Bank of Devils Lake, North Dakota.

SEATTLE-BOSTON COPPER CO. **WASHINGTON**

Idle since 1916. Company owns water-rights of 40,000 est. h. p. and a charter for a railway to open large timber tracts and reach the Dutch Miller mine described under title of Dutch Miller M. & S. Co. The former mine holdings of the Seattle-Boston C. Co. are described in Vol. VIII, Copper Handbook.

SECURITY COPPER CO. **WASHINGTON**

Address: 720 Peyton Bldg., Spokane, Wash. **Mine office:** Chewelah, Stevens county, Wash.

Officers: J. F. McGinnis, pres.; M. C. Hunter, v. p.; A. H. Syverson, sec.-treas., with L. K. Armstrong, gen. mgr., and F. H. Fulton, directors.

Inc. 1913, in Washington. **Cap.,** $1,500,000; shares $1 par; 1,200,000 outstanding; assessable. Total expenditures, $275,000.

Property: Security group, 200 acres at Chewelah: Copper Butte group, 80 acres, and Champokane group, 600 acres, 16 miles W. of Springdale. The first-named shows fissure veins cutting shales and schists; the Champokane group has 5 veins, from a few feet to over 100′ in width, and the Copper Butte has one vein, over 50′ wide. All the groups carry argentiferous copper ore. Five cars shipped from the Copper Butte are said to have averaged 3.8% copper.

Development: on Security group by about 1,150′ of workings on a series of six veins by 550′ shaft, levels, and tunnel. The Copper Butte has about 500′, and the Champokane 1,000′ of workings.

Equipment: includes a gasoline hoist and a 3-drill air-compressor at the Security.

Refinancing was arranged in August, 1919.

SHIPPER GOLD MINING CO. **WASHINGTON**

Address: Chesaw, Wash.

Officers: J. P. Blaine, pres.-mgr.; H. L. Mooney, v. p.; A. C. Blaine, sec.; W. A. Harry, treas.

Inc. May 31, 1916, in Washington. **Cap.,** $1,000,000; $1 par; 500,000 issued.

Property: 3 claims, unpatented, 56 acres, located one-fourth mile north of Chesaw, contains a 3½′ flat quartz vein running E.-W., with 2?? ??

Ore: contains gold values with pyrite, and is said to average $?? per ton.

Development: 700′ of work, including 110′ shaft, connected with 300′ tunnel, blocking out 1,000 tons of $20 ore.

Production: 1,200 tons of $40 ore. Company owns 25-ton mill. No recent information; probably idle.

SILVER ANTIMONY MINING CO. **WASHINGTON**

Address: Uniontown, Wash.

Officers: J. J. Welle, pres.; Jos. Kuntz, v. p.; H. J. Hoefer, sec.-treas., with Albert Carbuhn, directors.

Inc. January 16, 1916, in Washington. **Cap.,** $1,500,000; par $1 assessable.

Property: one claim, one mile from Chewelah, Stevens county, said to show a quartz vein in serpentine, containing streaks of sulphide ore carrying gold-copper-antimony ore that averages $4.80 gold, $11.40 silver and $2?? copper. Has a shaft 170′ deep and 2 short tunnels.

SILVER BASIN MINING CO. **WASHINGTON**

Address: C. S. Turner, Davenport, Wash.

Cap., $1,500,000; par $1; non-assessable.

Property: 2 claims, unpatented, in Deer Trail district, Stevens county, said to have silver ore. Total production to 1918 reported as 7,500 tons, valued at $200,000. The 1917 output was 180 tons, valued at $6,000; none reported since.

Development: by shafts and crosscuts. **Equipment:** includes a 3-drill compressor and a pump.

SILVER BELL MINING CO. **WASHINGTON**

Address: E. H. Belden, 1208 Old National Bank Bldg., Spokane, Wash.

Officers: E. H. Belden, pres.; R. F. Blackwell, v. p.; with W. R. Dwyer
l. Fitzpatrick and J. C. Broad, directors; E. F. McCabe, sec.-treas.
Inc. November, 1916, in Washington. **Cap.,** $1,500,000; $1 par; 1,100,-
issued. Expenses in 1918 were $5,000.
Property: 8 claims, 160 acres, 5 miles S. E. of Loon Lake, Stevens
nty, and 35 miles N. W. of Spokane, Wash.
Development: by 125′ shaft, and 300′ of drifting, shows 4½′ quartz vein
ranite. Ore said to contain 25 oz. silver per ton, with gold up to $4. Sink
is to be continued.
Equipment: 16 h. p. gasoline hoist. Is a silver prospect.

VER CREEK MINING & MILLING CO. **WASHINGTON**
Company dead and property, the Gold Cord mine, sold for taxes. Bought
r Steil and company reorganized as Gold Cord Mining & Milling Co., Kel-
Wash., also dead.
See operations, 1904-1912, described in Vols. VIII and IX of Copper Hand-
. Property favorably reported on by Wm. J. Elmendorf.

VER TIP MINING & POWER CO. **WASHINGTON**
Office: J. H. Beattie, 718 Green Bldg., Seattle, Wash.
Officers: A. Julian, pres.; G. B. Gilfillan, v. p.; J. H. Ferguson, J. J.
ean, P. D. Roberts and H. R. Sanderson, directors. M. S. Davys, engr.
Inc. January 15, 1910, in Washington. **Cap.,** $1,000,000; shares $1 par;
2 issued. Bonds, $700,000 of 7%.
Property: the Lake Side mines, 557 acres, Skagit county, Wash., also
Hewitt and Lorna Doone mines in Slocan district, B. C. No recent in-
ation. Probably idle.

VER TRAIL MINING CO. **WASHINGTON**
Office: care J. Richard Brown, W. 1619 Clark St., Spokane, Wash.
Officers: J. R. Brown, pres.; A. L. Hooper, sec.; W. S. Haish, treas.;
Robert Bell, A. J. Bell, Peter Reid and M. S. Peters, directors.
Inc. 1915 in Washington. **Cap.,** $125,000; shares 10c par.
Property: the old Clungstone mine, 8 miles E. of Evans in Colville
g district, opened in early '90s by Col. I. N. Peyton.
Development: tunnels, the lower one 700′, with 400′ drift on a 2-6′ vein
ver-lead ore. Shipments made to Trail, 1916.
o recent information. Probably inactive.

CANE CONS. TUNGSTEN CO. **WASHINGTON**
Officers: F. E. Parks, pres., Deer Park, Wash.; E. N. Robinson, v. p.;
A. M. Winston, O. F. Kelly and A. M. Wood, directors.
Cap. $625,000; non-assessable. Company is a merger of the Deer
Mng. Co., Spokane Tungsten Co., and Beard & Myers mining leases.
Property: about 360 acres, held under 30-year lease from the State,
es N. of Deer Park, Stevens county, said to show tungsten ore. Shipments
mer owners reported as $30,000. Present company commenced work in
nd planned erecting a 50-ton mill.

CANE COPPER CO. **WASHINGTON**
Address: C. H. Harvey, Co., 618 Paulsen Bldg., Spokane, Wash.

NE TIN MINES CO. **WASHIN**
dress: Hyde Bldg., Spokane.

ployed at last accounts, and made occasional shipments. Company planned sinking shaft to depth of 400'. No recent information; probably idle.

UNITED SILVER-COPPER MINING CO. **WASHINGTON**

Name changed in 1919 from United Copper Mining Co.

Office: 217 Symons Bldg., Spokane, Wash. **Mine office:** Chewelah, Stevens county, Wash.

Officers: Conrad Wolfle, pres.-gen. mgr.; W. G. Collins, v. p.; E. C. Blanchard, sec.-treas., with Daniel Hoch and J. H. Griffith, directors. E. A. Wolfle, supt.; H. D. Quimby, mill supt.

Inc. July, 1906, in Washington. **Cap.**, $1,000,000; shares $1 par; fully issued; assessable by majority vote. Last assessment Sept., 1914, 5c a share. Annual meeting, Jan. 28. Company and Guaranty Trust Co., New York, transfer agents; Registrar & Transfer Co., and Spokane & Eastern Trust Co., Wash., registrars. Listed on New York Curb, May 1, 1917.

Treasurer's Report for years ending December 31st showed:

	1918	1917
Operating revenue	$282,966	$354,371
Operating expenses	234,291	240,899
Net operating profit	*18,174	113,472
Net indebtedness	39,879	61,577
Dividends	None	100,000

*After deducting depreciation charges and taxes.

In April, 1919, management stated that indebtedness was practically wiped out as a result of finding high-grade silver ore in sinking a winze from the 1,200' level. Estimated net profit for April was $26,000.

Dividends: total to date, $150,000. None since 1917.

Property: 16 claims, patented, 103 acres, 4½ miles N. E. of Chewelah.

Geology: claims show a 6' vein cutting through shale and schist. Ore contains chalcopyrite, with streaks of gray copper ore on both walls. The high-grade ore above the 1,000' level has been practically mined out, but the low-grade ore, which assayed 1.5% copper and 2 oz. silver, cannot be mined clean and the admixed waste lowers the grade so that the mill feed carries only 0.75% copper, and 1 oz. silver. In March, 1919, a new high-grade ore-shoot 4 to 5' wide, was found in sinking a winze from the 1,250' level; about one foot of this was rich silver ore, and the remaining 3 to 4' was good milling ore assaying 20 oz. silver and 5% copper.

Development: by shafts 250' below 1,000' level, and 5,000' tunnel, giving depth of 1,250'. Considerable development work was done in 1914-15; diamond-drilling reported to have proven the orebodies to depth of 1,500'. The mine has over 40,000' of workings. Report of Raymond Guyer, consulting engr., in March, 1919, estimated ore reserves at 50,836 tons above the 1,000' level, and below this level, 45,173 tons positive, 47,241 tons probable and 30,658 tons possible ore; grade about 1.35% copper and 3 oz. silver.

Equipment: includes electric hoist, air-compressors, capacity 1,500 cu. ft., 11 power drills, 2 pumps, and an electric lighting plant. Electric power is obtained from the Stevens County Power & Light Co. The mill is a flotation; in June, 1919, it was treating 225 tons ore daily, and this was to be raised to 300 tons. Employs about 90 men.

Production: 1910, 608 tons, $5,878; 1911, 1,134 tons, $11,184; 1912, 13,500 tons, $240,798; 1913, 14,938 tons, $171,617; 1914, 18,527 tons, $90,356.

	Tons mined	Value	Copper lb.	Silver oz.
1918	66,181	315,448	907,422	130,000
1917	59,600	354,371	1,147,014	147,500
1916	40,000	372,296	1,179,178	150,000
1915	25,000	145,632	650,995	137,500

Output for first quarter of 1920 was 400 tons of $100 crude ore, and 75 tons of concentrate carrying 17% copper and 45 oz. silver per ton.

Profit from ore mined above tunnel level is expected to pay off all indebtedness by midsummer when contract will be let to sink shaft to 1,200 or 1,400'.

ALLEY MAGNESITE CO. **WASHINGTON**

Office: Old National Bank Bldg., Spokane, Wash. **Mine office:** Valley, 'ashington.

Officers: F. M. Handy, pres.; B. E. Kehler, v. p.; W. J. Matthews, sec.;)bert Carnochan, treas. and Irving Whitehouse, asst. sec.-treas.; also di- ctors.

Inc. 1917, in Washington. **Cap.,** $1,500,000; shares $5 par; 213,000 issued.

Property: about 1,300 acres at Valley, Stevens county, Wash.

Development: to 100′ depth, is estimated to expose 1,000,000 tons of ignesite, one exposure being 75 to 200′. Mining is by quarry methods. e ore is a gray, coarsely crystalline magnesite, containing 0.5% lime and % silica, which is well within market requirements.

Equipment: 10 kilns with accessories. Capable of making 150 tons of cined magnesite daily.

About $300,000 has been spent on the property to date. As company s not even reply to repeated requests for information, production figures inot be given. The company's prospectus estimated costs at $12 per and a sale price of $32.50 per ton, equivalent to earnings of $3,000 daily a 150-ton plant.

LLEY MINING CO. **WASHINGTON**

Officers: W. R. Tuttle, pres., 1816½ 7th St., Spokane, Wash.; A. L. oper, sec.-treas.; with H. M. Ross, V. P. Adams, and S. Van Hook, di- ors, all of Spokane, Wash.

Property: 3 unpatented claims, locally known as the Edna mine, 9 miles of Valley, Stevens county. Idle for 12 years, but in September, 1917, e was unwatered to 400′, and levels have been driven at 100, 200, and 300′ th. Copper-silver ore exposed is said to have a value of $600,000.

Equipment: includes a hoist and 3-drill compressor.

TORY COPPER CO. **WASHINGTON**

See Copper King Mining Co.

GINIA MINING CO. **WASHINGTON**

See Chatterboy Mining Co.

LCAN MINING CO. **WASHINGTON**

Office: 2025 West 3rd Ave., Spokane, Wash. Mine at Orient, Stevens ity, Wash.

Officers: H. M. Gibson, pres.; P. Lewis, v. p.; A. O. Stuberg, sec.; P. en, treas., with J. D. Grimes, directors.

Inc. July, 1914, in Washington. **Cap.,** $1,500,000; par $1; assessable.

Property: 7 claims, 4 miles N. E. of Rock Cut at 3,850′ elevation, shows ns with gold ore; also some silver.

Development: by several hundred feet of tunnels and shallow shafts. Present owners have spent over $20,000 on development. No recent in- ation. Probably idle.

LA WALLA COPPER MINING CO. **WASHINGTON**

Office: Walla Walla, Wash. **Mine office:** Keller, Ferry county, Wash.

Officers: J. G. Muntinga, pres.; W. H. Meyer, v. p.; W. P. Lathrop, reas., with H. Osterman, Wm. Pfeiffer, Geo. Bradbury, C. M. McKin- all of Walla Walla, and J. T. Leonard, director.

ap., $1,000,000; par $1.

roperty: 10 claims, 2 patented, and a millsite 1 mile N. E. of Keller, southern half of the old Colville Indian reservation, shows a vein of timated width, partly mineralized with gold-copper ore of fair assay

eveloped by an open-cut, shaft, and tunnel. In January, 1919, a 500′ l was started.

HINGTON COPPER MINES DEV. CO. **WASHINGTON**

fficers: P. H. Nestor, pres.; J. L. Linn, v. p.; J. N. Hart, sec., all of nd, Ore.

ap., $500,000; par $1.

roperty: 9 claims, unpatented, in Bald Mt. district, Skamania county,

ore carries copper, gold, and silver. In 1918 company was reported putting about 30 tons of ore daily through a small mill. Said to have a considerable tonnage opened, but no shipments made to date.

WASHINGTON-IOWA COPPER MINING CO. WASHINGTON

Idle at last accounts, 1917. W. D. Gibson, pres.; P. R. Screven, sec., both of Seattle.

Property: on the eastern fork of Silver creek, 2 miles above Mineral and 14 miles N. W. of Index, Snohomish county, adjoins the Edison Mining & Development Co., and both properties are under one management. Claims said to show 5 veins, carrying complex ore, consisting of chalcopyrite, galena, sphalerite and pyrite, with quartz gangue.

Development: by the 1,200′ Bonanza crosscut tunnel.

WASHINGTON TUNGSTEN MINES CO. WASHINGTON

Address: Miller Bldg., Yakima, Wash.

Officers: D. B. McMahon, pres.-treas., Seattle, Wash.; J. Lenox Ward, sec., with Geo. Kerr, E. B. Sanford, E. G. Tennant, and J. J. Miller, directors.

Inc. November, 1915, in Washington. **Cap.,** $350,000; $1 par.

Property: 15 unpatented claims, in Bumping Lake district, 50 miles N. W. of Yakima, Yakima county, said to show gold-copper-tungsten ore. Idle.

WASHOUGAL GOLD & COPPER MINING CO. WASHINGTON

Address: Washougal, Clarke county, Wash.

Officers: F. A. Mabee, pres.; John Scharboarer, v. p.; J. B. Jordan and T. A. Altman, secretaries; Dr. Otta Sutter, treas., at last accounts.

Inc. 1902, in South Dakota. **Cap.,** $1,000,000; shares $1 par.

Property: 560 acres, held on a 30-year lease, from the State, near Mt. St. Helens, in the Bald Mountain district, on the upper Washougal river. Said to show several vertical fissure veins in granite, one of which, averaging 6′ thick, is developed by an 1,800′ tunnel exposing ore, estimated to average 5% copper, 15% lead and zinc, 2 to 70 oz. silver and $1 to $15 gold per ton.

Equipment: includes gasoline hoists, 25-ton concentrating mill, and a 3-drill Sullivan air compressor. No recent information available. Described in Mining and Scientific Press, 1916, by F. Brinsmade.

WENATCHEE GOLD MINING CO. WASHINGTON

Officers: J. P. Bonar, pres.; W. H. Kneemyer, treas.; both of Wenatchee, Wash.; M. P. Spencer, sec., Wenatchee, Wash.

Cap., $1,000,000; shares $1 par.

Property: 80 acres of State land, held under 30-year lease, in Entiat valley, Chelan county, said to show free gold ore.

Development: over 500′ of tunnels and shafts.

Equipment: includes a 2-stamp mill. Total shipments reported to have yielded about $170,000. In 1918 mine was reported under a 2-year lease.

WESTERN COPPER MINING CO. WASHINGTON

Office: 1123 Broadway, New York. **Mine office:** Reiter, Wash.

Officers: C. G. Reiter, pres.; Leroy B. Sherman, v. p.; J. J. O'Brien, sec.; J. D. Campbell, treas., with W. D. Schwarzwaelder, E. J. Wright, T. Christensen, Manfred Rockfeller and T. A. Meed, directors. C. Hendricks, mgr.; V. V. Clark, cons. engr.

Inc. April 25, 1917, in Maine. **Cap.,** $2,000,000; $1 par; 1,125,000 issued. Annual meeting, first Tuesday in April.

On June 6, 1917, company purchased assets of the Bunker Hill Mining & Smelting Co. for a stock consideration and assumed B. H. debts of $84,973, consisting of bonds and notes.

Property: 20 claims, 15 patented and 1 millsite, patented, 371 acres, at Reiter, 5 miles W. of Index, Snohomish county, Wash. Examined by Geo. Wright, T. E. Brown, E. M. Simonds and V. V. Clark. Claims said to show fissures in granite, syenite and diorite, dipping 45°, with N. 46° E. course.

Ore: is mainly chalcopyrite, associated with magnetite. On account of this latter mineral, the consulting engineer considered that prospecting with

lipping needle should find additional copper deposits. The Bell shoot has en followed to 500′ depth and the Jumbo to 100′.

Development: by incline shafts, 86 and 500′ deep and tunnels, the igest 2,700′. To depth of 1,200′ workings total 6,100′. Diamond drilling t a parallel body to the Bell at 497 to 526′, assaying 6.99% copper. This le is to be followed by a shaft. Exploration cost $112,927 to the end of 6.

Equipment: to December, 1916, cost $72,195, covering 300-h. p. hydroctric plant, 100-ton obsolete concentrator, 50-ton smelter, compressor, mway, diamond drill, steam engine, hoist, etc.

Property is well equipped for production if ore is developed and has a ge asset in over 50,000,000′ of standing timber. In December, 1919, work s to be resumed after several years of idleness.

EST HILL MINING CO. **WASHINGTON**

Out of business. Fully described in Vol. XIII.

WEST VIRGINIA

ARKESBURG CLINKERING CO. **WEST VIRGINIA**

Subsidiary of American Metal Co., Ltd.

Office: 61 Broadway, New York.

Works: a sintering or clinker plant at Bridgeport, W. Va., for treatnt of metal-bearing residues, such as those carrying silver from zinc :lters.

WISCONSIN

Wisconsin produces over 50,000 tons of zinc per annum from the treatnt of over 2,000,000 tons of 2.5% ore. Most of this ore is concentrated the mill product reduced to metal at Illinois smelters. The production ters named in their order of importance are: New Diggings, Benton, Hin-Livingston, Galena, Linden, Hazel Green, Shullsburg, and Highl. The output during the past two years follows:*

	1917	1918
de ore tons	3,014,800	2,377,300
: content, per cent	2.44	2.61
d content, per cent	0.13	0.19
: concentrates produced, tons	226,216	180,554
d " " "	5,544	6,210
al value of all products	$12,899,276	$9,746,234

The output of concentrates in 1919 was 158,871 tons from mills and)5 tons from roasting and separating plants (refineries).

* U. S. Geol. Survey figures. The Wisconsin zinc district is described 3oericke and Garnett in Bull. 152, August, 1919, of the Am. Inst. M. & >. 1213.

Since the year 1862, the fields have produced approximately 2,083,000 of zinc. Practically all the ore of this district occurs in solution open-, whose position is largely controlled by joints and crevices.

In Bull. XIV (1906) of the Wisconsin Geological and Natural History ·ey, U. S. Grant, describes the lead and zinc deposits of this State. Bull. V (1915) of the State Survey, also describes the mineral lands of >us counties, including those with iron-ore deposits. Little informaconcerning production could be obtained from mine-owners in the :, despite our frequent requests for same.

The mining companies operating in the State are arranged alphaally.

AMERICAN ZINC ORE SEPARATING CO. WISCONSIN

Address: Platteville, Wis.

Company owns and operates a plant using the Huff electrostatic process to remove iron from mill concentrates carrying 16 to 40% zinc and pyrite.

BARABA MINING CO. WISCONSIN

Office and mine: Mellen, Ashland county, Wis. Nelson Baraba, Sr., pres.; Nelson Baraba, Jr., sec.

Inc. 1906. **Cap.,** $1,000,000; shares $1 par. Has a shallow shaft showing ore assaying 2.8% copper, with traces of gold and silver.

Idle since 1917.

BIG BEND MINING CO. WISCONSIN

Address: Cuba City, Wis.

Inc. in September, 1919. **Cap.,** $60,000; shares $1 par. Will develop and operate leases in the Cuba district.

BLOCKHOUSE MINING CO. WISCONSIN

Address: Kistler & Stephens, Platteville, Wis.

In March, 1919, this property was the only active producer in Platteville district. The mine is extensively developed and actively worked, having an average weekly output of 40 tons of 40% blende. In 1917 company realized $500,000 from concentrate sold, and in 1918 was the largest producer in the district. Operations were curtailed in 1919 owing to low prices and lack of demand for zinc ore.

B. M. & B. MINING CO. WISCONSIN

Address: Jos. Wilson, supt., Mifflin, Wis. Company owns various zinc mines in the Mifflin district.

CAHOON MINE WISCONSIN

Address: A. W. Rohn, mgr., Baraboo, Wis.

Property: a tract of 140 acres, one mile S. W. of Baraboo, underlaid by iron ore, opened and mined by shafts and extensive workings.

CLEVELAND MINING CO. WISCONSIN

Office: 625 Bank & Insurance Bldg., Dubuque, Iowa. S. W. Barlow, mgr.; H. L. Jones, supt.

Property: 40 acres, includes the Cleveland and Hazel Green mines in Hazel Green, Grant county. Lead-zinc ore occurs in flats and pitches in limestone.

Development: several 150′ shafts with 1,500′ of workings said to have out 100,000 tons of ore.

Equipment: includes a 75-h. p. electric hoist, a 6-drill air-compressor, a 250-ton concentrating plant. Concentrate is sold to Mineral Zinc Co. under contract; employs normally 160 men on double shift.

COMMONWEALTH IRON CO. WISCONSIN

Address: E. W. Hopkins, mgr., Ironwood, Mich. **Property:** a well-known iron mine.

CONNECTING LINK MINING CO. WISCONSIN

Office: Theo. A. Waech, mgr., Cuba City, Wis.

Officers: Anton Zwack, pres.; B. H. Hoeper, v. p.; Curt M. Treat, sec.; Theo. E. Buechele, treas., with M. A. Barr and W. H. Hennigu, directors.

Inc. 1917, in Wisconsin. **Cap.,** $100,000; $1 par; 90,000 issued.

Dividends: two, equal to 20%, were paid in 1918.

Property: 220 acres in Cuba City district, Lafayette county. Deposit carries lead and zinc.

Equipment: includes electric hoist, a 150-ton mill, on the Dall land, and a new concentrator on the Coulthard land. Company was the largest producer in the Cuba district in 1918.

CONSOLIDATED LEAD & ZINC CO. WISCONSIN

Address: Charles Lawyer, mgr., Benton, Wis. Company has a lease on the Charles Smith tract, a mile S. of Benton. Drilling was completed and shaft sunk late in 1918.

FEARLESS MINING CO. WISCONSIN

Address: Frank Harker, Platteville, Wis.

Inc. 1919. **Cap.**, $100,000.
Property: in the Linden district has an orebody 60′ wide and 9′ thick, ·ying high-grade jack.
Equipment: includes a 100-ton mill, making 55% zinc concentrate by ·ing.

ELD MINING & MILLING CO. **WISCONSIN**
Office: 2200 Insurance Exchange, Chicago, Ill. **Supt.'s address**: R. F. No. 7, Scales Mound, Ill.
Officers: Robt. W. Hunt, pres.; Jas. C. Halsted, v. p., with L. V. Rice, mgr.; C. C. Whittier, directors. F. W. Guthrie, sec.-treas.
Inc. 1908, in Illinois. **Cap.**, $100,000; shares $100 par. $65,000 outstand- Annual meeting 1st Tuesday in May.
Property: the Thompson mine near New Diggings, Wis., an important -zinc producer, developed to depth of 225′ by vertical shaft. Ore occurs ssure veins and disseminations traversing dolomite. Management esti- ed ore reserves at 350,000 tons in May, 1917.
Equipment: includes electric power, 50-h. p. hoist, 600′ elec. compressor, rifugal pump, 800-ton mill, equipped with jigs and tables.
Produced zinc, lead, and pyrite averaging 45% zinc, 75% lead, 31% sul- r, 16% iron, respectively. Operations suspended in December, 1918.

NT MILL & FURNACE CO. **WISCONSIN**
Company operates a 20-ton Fink furnace at Wauwatosa, treating lead ·entrates from the Wisconsin fields.

)RENCE IRON CO., THE **WISCONSIN**
Address: E. H. Thiemann, asst. mgr., Florence, Wis.

)NTIER MINING CO. **WISCONSIN**
Office: 413 Fletcher Trust Bldg., Indianapolis, and Galena, Ill.
Officers: J. H. Billingsby, pres.; D. C. Ellison, v. p.; W. C. Haneisen, ·treas.; preceding with C. W. Craig, C. R. Hinkle, Carl L. Rost, S. O. ·hler, directors.
Cap., $125,000; shares $100 par.
Dividends: begun April, 1916, are 2% the first of each month, and 10% he 15th.
Property: the Frontier and Grotkin mines at Benton, and the Optimo 1 and 2 at Linden, also the Bearcat, Bull Moose, Hird and Middle ·s at Benton, Wis. Ore is zinc sulphide in pitches and flats in lime- e. Stopes are 120′ wide and 35′ high.
Development: 3 shafts, average depth of 150′. Room and pillar mining ·m is used. Extensive exploration on adjoining land was done in 1918.
Equipment: includes one 50-h. p. and one 75-h. p. electric hoists, air- ›ressor and drilling machines. There are also 3 concentrators with capacity of 600 tons in 10 hours.
Production: the mines when in full operation average about 800 tons › to 42% zinc concentrate weekly. Shipments are made under contract ıe Grasselli Chemical Co.

'NOW MINING CO. **WISCONSIN**
Address: Herman Grunow, supt., Mifflin, Wis.
Company operates zinc mines in the Mifflin district.

'VEY LEASE **WISCONSIN**
Address: Charles Wolfe, Cuba City, Wis.
Property: a tract N. of the Connecting Link mine, which after being ·n by drilling, was opened up by a shaft and equipped with the Law- · mill, removed from Hazel Green to this mine.

'ES MINING CO. **WISCONSIN**
Address: Ironwood, Mich.

:CULES MINING CO. **WISCONSIN**
Address: Cuba City, Wis.
Officers: H. H. Busch, pres., Dubuque, Iowa; Harry Seemiller, mgr.; rt Fox, mine supt.
:ap., $100,000.

Property: leases 400 acres of farms, 2 miles E. of Cuba City, on which drilling revealed rich zinc and lead ore. A 100-ton mill was to be erected at last accounts

HOLMES MINING & MILLING CO. **WISCONSIN**

Idle. Mellen, Ashland county, Wis.

Officers: John Holmes, pres.-mgr.; A. D. Barnes, v. p.; Thos. A. Humphrey, sec.; F. P. Simmonds, treas., with Edw. Bekken, A. D. Wilson and A. D. Hill, directors.

Inc. Jan. 9, 1902, in Wisconsin. **Cap.**, $150,000; shares 25c par.

Property: 160 acres in the Penokee iron range, about 1 mile N. of Bad river, shows fissure veins in greenstone, diorite and slate with E.-W. strike and dip of 70°. Three orebodies are claimed of which one, said to be 40' wide and traceable one-half mile by a strong gossan, with slate footwall and diorite hanging, is reported to have chalcopyrite in a quartz gangue. Ores give assays up to 9 oz. silver and $3 gold per ton.

Development: by 150' and 188' shafts.

Equipment: includes a 16-h. p. hoist.

INDIAN MOUND MINING CO. **WISCONSIN**

Mine controlled by Lawrence Mines Co., which see.

KLAR PIQUETTE MINING CO. **WISCONSIN**

Address: W. H. Doyle, sec., Platteville, Wis.

Company operates zinc mines in the Platteville district.

LAWRENCE MINES CO. **WISCONSIN**

Address: Dubuque, Iowa; or New Diggings, Wis.

Property: the Indian Mound mine at Benton and leases in New Diggings district. The Lawrence mine at Hazel Green was abandoned in 1918. The Indian Mound was a regular producer in 1918-19.

LITTLE PLATTE MINING CO. **WISCONSIN**

Address: Raymond Piquette, mgr., Platteville, Wis. Owns a lease on James Tracey land, 6 miles W. of Platteville. A 50-ton mill was erected in September, 1918, and shipments made.

LUCKY FIVE MINING CO. **WISCONSIN**

Address: Mr. McKinley, supt., Dodgeville, Wis.

Property: a lease on Davis and Thomas lands, in Dodgeville district, near Cuba City, Grant county, Wis. A small producer of high-grade lead-zinc concentrates. Developed by 100' shaft.

Equipment: includes steam plant and 50-ton concentrator. Shipments made to the Collinsville smelter, under lease to the Eagle Picher Lead Co.

LUCKY SIX MINING CO. **WISCONSIN**

J. N. Vail, supt., R. R. No. 2, Livingston, Wis.; or Mifflin, Wis.

Property: in Mifflin district, Iowa county, developed by two shafts and equipped with a 150-ton mill.

LUCKY TWELVE MINING CO. **WISCONSIN**

Address: L. N. Dana, mgr., Benton, Wis.

Company operates zinc mines in the Benton district.

McMILLAN ZINC CO. **WISCONSIN**

Offices: Platteville and Hazel Green, Grant county, Wis.

Officers: A. C. McMillan, pres.; Henry Hornischfeger, v. p.; H. B. Morrow, sec.-treas., with L. C. Dagenhardt and C. M. Echols, directors; L. C. Dagenhardt, supt., Hazel Green.

Inc. August 3, 1914, in Wisconsin. **Cap.**, $100,000; $1 par. Annual meeting, August 14.

Property: 100-acre lease, at Hazel Green, said to show zinc and lead sulphides occurring in a disseminated deposit in the Galena limestone formation.

Development: 180' vertical shaft.

Equipment: includes steam hoist, 300 cu. ft. air-compressor, pumps and a mill, capacity 400 tons per 20 hours.

In February, 1918, mine was closed temporarily, due to high costs and

ıvy flow of water. Although fully equipped, more capital is needed to ng property to producing basis.

ıCKAY MINING CO. **WISCONSIN**

Address: D. and W. Mackay, Platteville, Wis. Acquired property of Ross Mining Co. in Linden district, in October, 1919, and resumed min- and drilling in November.

DLAND MINING CO. **WISCONSIN**

Dead.

NERAL POINT ZINC CO. **WISCONSIN**

(Subsidiary of the New Jersey Zinc Co.)

Address: B. A. Hoskins, supt., Galena, Ill. W. F. Boericke and T. H. rnett, engineers.

Properties: the Black Jack mine at Galena, Ill.; Coker mine at Liv- ston, Wis.; Highland mine at Highland, Kennedy at Hazel Green, and Penna and Hoskins mines at New Diggings, Wis. The last named pro- ed over 17,678 tons of green blende concentrate in 1919. The Coker had a ord of over 15,000 tons in 1916.

Geology: in the Black Jack mine there are two "pitches" to the ore- ly; one contains heavy black jack, and has a smooth hanging wall; the er "pitch" contains ore heavy in marcasite and without any definite wall. the Coker mines the orebodies are of great length and determined by ll holes for a length of 6,900′. No. 1 orebody is 7,500′ long, if the mines of Vinegar Hill Zinc Co. be included. The Kennedy orebody including the lls and Winnebago mines, which are on an integral part of the Kennedy, the largest deposit of ore yet found in the district. Since 1860, these ee mines have yielded about 2,500,000 tons of ore, producing 150,000 tons 35% zinc concentrates.

Equipment: includes concentrating plants, zinc oxide works, and acid nt. At Mineral Point company has a separating plant, including a multi- ırth roaster of 150 to 200 tons daily capacity and magnetic separators to ıove pyrite from jig concentrates, whose zinc content is raised from 37 59%. Recovery is about 90% at cost of $2 per ton.

Production: in November, 1919, the mines were producting 25 to 30 s of zinc ore per week.

)NMOUTH ZINC MINING CO. **WISCONSIN**

Office: Hazel Green, Wis.

Officers: J. L. Noble, pres.; J. W. Houston, v. p.; C. G. Norton, sec.- as., with J. A. Allen, A. G. Patton and Jos. Harvey, directors. H. L. lliams, mgr.; Jack Rogers, supt.

Cap., $150,000; $10 par; $110,000 issued. Annual meeting first Tuesday :r first Monday in September.

Property: 200 acres at Hazel Green, Lafayette county, Wis. Deposit fissure or "pitch" in "blue" rock, with "horseshoe" course, characteristic the district. Ore assays 40% zinc, 15% iron, and 2.5% lime.

Development: by 209′ shaft and 260′ tunnel. **Equipment:** 75-h. p. motor- ven hoist, 2-drill compressor, pumps (one deep-well of 2,500, one sinker 800, and one station of 800 g. p. m.), 400′ tram from shaft to mill, and -ton mill employing 3 jigs of 7 cells each, in operation since Aug., 1918.

)NTREAL MINING CO. **WISCONSIN**

Address: F. B. Goodman, supt., Hurley, Wis.

.TIONAL ZINC SEPARATING CO. **WISCONSIN**

Address: W. N. Smith, gen. mgr., Platteville, Wis.

Works: company operates a roasting and magnetic-separating plant, acity 275 tons of crude zinc concentrate in 24 hours, at Cuba City, Grant nty, Wis. A Cottrell precipitator was installed in the works in 1918. e sulphuric acid plant can make 100 tons daily. Most of the supply nes from mines operated by the Vinegar Hill Zinc Co. The raw con- trate carries 23 to 46% zinc, and the final product 60%. This is sold the Illinois Zinc Co., Grasselli Chemical Co., and the American Zinc . of Hillsboro, Ill.

NORTHWESTERN IRON CO. WISCONSIN

Described in Vol. XIII. Mine now owned by the Steel & Tube Co of America, which see.

ODANAH IRON CO. WISCONSIN

Address: L. M. Hardenburgh, supt., Ironwood, Mich.; or J. M. Davis, Hurley, Wis.

Property: the Cary and Windsor mines, on Gogebic range, Wisconsin. Employed 275 men in 1919. For production, see Pickands, Mather & Co. under Minnesota, in this volume.

OLIVER IRON MINING CO. WISCONSIN

Office: Duluth, Minn. Operates lead-zinc mine and separator at Shellburg, Wis.

OPTIMO MINING CO. WISCONSIN

Office: 1127 State Life Bldg., Indianapolis, Ind.

Property: at Linden, Iowa county, Wis., was the main producer of lead-zinc concentrates in the Linden district in 1917-'18. Subleased to Vinegar Hill Zinc Co.

Equipment: includes electric power, drills, pump, and 100-ton mill. Concentrates carry 30 to 40% zinc.

PEACOCK MINING CO. WISCONSIN

Address: Henry Ovitz, supt., Mifflin, Wis.

Company operates zinc mines in the Mifflin district.

PENI MINING CO. WISCONSIN

Address: H. C. Holtz, supt., Mifflin, Wis. Owns a zinc mine in the Mifflin district.

ROSS MINING CO. WISCONSIN

Property acquired October, 1919, by the Mackay Mining Co., which see.

RUDOLPH LAND CO. WISCONSIN

Idle. Mine near Gordon, Douglas county, Wis.

Inc. 1905, as successor of Minong Range Copper Co.

Property: 12 miles from Gordon, on the southern fold of the Keweenawan syncline.

Development: by two shafts, deepest 350', sunk at an angle of 30°, on a dark amygdaloidal trap bed carrying small quantities of native copper.

Equipment: includes a 6-stamp mill. Property fully described under title of Minong Range Copper Co., Vol. XIII, Copper Handbook.

ST. CROIX CONSOLIDATED COPPER CO. WISCONSIN

(For description see Vol. XII.)

Successor St. Croix Consol. Mines. M. J. O'Brien, pres., 223 Ferguson Bldg., Duluth.

SHAMROCK MINING CO. WISCONSIN

Address: J. Maloney, mgr., Mifflin, Wis.

Officers: H. F. Cochenus, pres., 1536 First Nat'l Bank Bldg., Milwaukee, Wis. P. C. Kolinski, gen. mgr.

Property: 37 acres in Mifflin, said to show a 32' vein, running N. W. to S. E., carrying a 10 to 12" streak of lead-zinc sulphides, averaging 35% zinc, 25% lead. Mine is the old Shamrock & Peni mine on the so-called old tract, mined 100 years ago for lead, recently quarried for glass rock and now for its 10" to 12" of coal black "jack" ore.

Development: by 340' tunnel, and opened to 28' depth, by quarry, stripping off the "glass rocks." About 800 tons shipped in 1915, that averaged 30% zinc and 10 tons of lead concentrate.

Ore is treated in 50-ton mill and concentrate goes to DePue smelter. Company took over the Sunset mine, July, 1916. No recent returns.

STEEL & TUBE CO. OF AMERICA, THE WISCONSIN

Address: First Wisconsin National Bank, Milwaukee, Wis. J. F. Means and E. S. O'Connor, local operators.

Property: the Mayville mine formerly owned by the Northwestern Iron Co., at Mayville, Dodge county, developed to depth of 125'.

Ore: is a soft, red non-Bessemer hematite, containing 41.80% iron

)9% phosphoruus, 4.11% silica, 3.80% alumina, 6.50% lime, 4.50% mag-sia, and 11.04% moisture.

Production: 88,710 tons in 1918, and about 1,300,000 tons to date.

UPERIOR COPPER MINES CO. **WISCONSIN**

Address: Superior, Wis.

Officers: J. B. Arnold, pres.; T. A. Merritt, v. p.; F. L. Bernard, sec.; id H. M. DeLanoie, treas.

Inc. Nov. 14, 1916, in Wisconsin. **Cap.**, $1,000,000; all outstanding. isted on New York Curb.

Property: in Douglas county, Wisconsin. Ore carries native copper.

HOMAS FURNACE CO., THE **WISCONSIN**

Address: John M. Thomas, pres., Milwaukee, Wis.

Company is a manufacturer of pig-iron, low in phosphorus. A little e is mined for reduction in the works.

IFFANY MINING CO. **WISCONSIN**

Letters returned from former address, 925 Postal Telegraph Bldg., hicago, Ill., and company probably dead.

Inc. 1916. **Cap.**, $50.000.

Property: 160 acres, leasehold, east of the Wilson Mining Co. land, own as the Tiffany mine, formerly owned by W. N. Tiffany, of Platte-lle, Wis.

INEGAR HILL ZINC CO. **WISCONSIN**

(Owned by Mark Manufacturing Co., of Chicago, Ill.)

Office: Platteville, Wis. W. N. Smith, mgr.; J. A. MacCulloch, supt.

Property: the Ellsworth and Rundell mines at Livingston, the Martin Benton, the Wilkinson at Cuba City, the Vinegar Hill at Days Siding, id others.

The orebodies are of extraordinary length and persistence; that of No. mine of the Mineral Point Zinc Co., which is part of the ore deposit ined in the Vinegar Hill property, is continuous for 7,500′.

The Vinegar Hill company put up a 200-ton mill on the Edward Meloy in 1916 to handle the output of a tract on which drilling proved up an ebody 60′ thick. At the Martin mine a Whaley electric shovel was put , doing the work of 20 shovelers. In February, 1918, a 600-ton mining id milling plant was completed at the Jefferson mine in Hazel Green dis-ict. During 1918 the Calvert farm on the Swindler range was drilled and afts sunk and the Franklin Rundell mine developed and worked, the ore ing treated at the Yewdall mill at Mifflin. Late in the year the Kittoe ill was moved from Platteville to the Dale Rundell mine. Several of the ines were closed early in 1919 on account of the metal markets, but were -opened in August. An extension of the Hoskins range has been proved drilling for 550′ and a shaft will be sunk to open the orebody, whose out-it will be treated in the Meloy mill.

Company has a new shaft on Jas. Copeland tract at Shullsburg, has proven new run at Heughlett mine at Days Siding, and the Dale mine is now operating.

'EST HILL MINING CO. **WISCONSIN**

Address: W. Brown, supt., Platteville, Wis.

Cap., $20,000. In last eight months of 1915, reported to have made 150% ofit on capital stock.

Operates zinc lands in Platteville, Grant county, and was an important ipper of zinc concentrates. Paid a 10% dividend in March and another June, 1916. No new data available. Probably dead.

'HITE ROSE MINE **WISCONSIN**

Address: Gus. E. Brown, Platteville, Wis. Mill was burned in March, 18, but has been rebuilt.

'ISCONSIN ZINC CO. **WISCONSIN**

Subsidiary of the American Zinc, Lead & Smelting Co., which see.

Address: A. M. Plumb, gen. mgr., Platteville, Wis.

Inc. in Maine. **Cap.**, $1.000,000; $1 par; 925,000 shares issued; 649,774 vned by A. Z. L. & S. Co.

Dividends: 2% quarterly; No. 6 paid April 1, 1919.

Property: the Champion, Longhorn and Thompson mines at New Diggings, Wis. Crude ore averages 6% zinc. In 1919 company opened up an ore range and new shaft on the Booty lease, a half mile west of the Winskell. C.A.T. No. 2, was developed and connected by drift with C.A.T. No. 1—both at New Diggings.

Equipment: in 1917, a 200-ton mill was erected on the Copeland lease near Shullsburg. There is also a roasting plant at New Diggings, containing 7 Skinner hearth furnaces, 20′ diam., preparing ore for magnetic separation of marcasite from zinc blende.

Production: the Champion in 1917 yielded 15,727 tons of blende, and 17,004 tons green blende concentrate in 1919.

General: Company is one of the largest zinc-ore producers of this country, operating a number of mines as well as one of the Skinner magnetic separators, and an industrial railway that connects its several properties with the main line of the Galena division of the Chicago & Northwestern railroad. Three mines in the New Diggings district—the C.A.T., Champion, and Longhorn—are producing from 800 to 1,000 tons of zinc concentrate per week. A new mine recently developed and equipped is on the Copeland estate in the Shullsburg district. It made its initial ore deliveries during the third week of March. One of the most consistent producers of the field, from 1912-1918—the Winskill—also at Shullsburg, was exhausted and abandoned on March 16. The equipment will be dismantled and moved. Half a mile west a 170′ shaft was being sunk in the Booty land late in 1919. Drills are engaged by the company on various tracts in the Benton, Hazel Green, Shullsburg, Galena, and New Diggings districts. The Wisconsin Zinc, Vinegar Hill Zinc, and New Jersey Zinc companies combined to construct and operate at their own expense an industrial spur that is of great benefit to all.

Sales of dressed ore are made in open market to the highest bidder, although the Wisconsin Zinc Co. is a subsidiary of the American Zinc, Lead & Smelting Co., and is in this manner affilated with the American Zinc Co. smelters, at Hillsboro, Ill., to which point much of the finished ore finds its way. Heavy shipments are made at intervals of pyrite saved as by-product in the separation of zinc ore. The pyrite carries 30 to 35% sulphur. The Skinner roasters were completed in 1916 at a cost of $100,000. They are capable of treating 1,000 tons of raw zinc concentrate weekly. From this is recovered 500 tons of 59 to 61% blende. Cleveland-Knowles and Dings separators are largely employed in this plant, also the McDougall furnace. Fifty men can operate the plant per 24 hours. A wet mill was erected during the summer of 1917 to wash out fine and slime. The Overstrom slime table is mostly used. The ordinary method of wet concentration employed in the Wisconsin field is regarded efficient enough to eliminate the necessity of saving the small amount of mineral lost in slime.

Mill feed is handled on the can-contract system. Shovelers earn from $3 to $5 each per shift. Power supplied the company by the Inter-State Light & Power Co. of Galena, Ill. is steady and good. A telephone system connects the general manager's office with mine foremen underground.

Between 500 and 600 men are employed by the Wisconsin Zinc Co. Sociological conditions of the workers are given plenty of attention, and wages paid are good.

ZINC HILL MINING CO. WISCONSIN

Address: Charles Wolf, mgr., Platteville, Wis.

Property: formerly known as the Little Dick and Big Dick. Drills exposed good ore, and a 50 to 100-ton mill was erected in June, 1918. Operations were suspended in March, 1919, on account of market conditions, but were resumed in September, and $100,000 was to be spent in further exploration and erection of an electrostatic separating plant.

WYOMING

The mountainous regions of Wyoming contain numerous widely scat-ed mineral deposits, as yet but slightly developed, and the short-lived)om" of the Encampment district, on the Colorado border, bred so ny wild cats that the State has suffered ever since from the frauds of that iod.

The metal output is relatively small, that of 1918 being but 7 oz. of d, 253 oz. of silver, 754,324 lb. of copper, and a considerable tonnage of omite. The 1919 output was still smaller.

The mines are arranged alphabetically, as the State has no great min-center.

ME CONS. GOLD & COPPER MINING CO. **WYOMING**

Inactive. See Copper Handbook, Vol. XI.

TNA MINING CO. **WYOMING**

Idle. **Office:** Merrill, Wis. Mine near Riverside, Carbon county, Wyo. Copper Handbook, Vol. XI.

IERICAN FIREPROOFING & MINING CO. **WYOMING**

Address: Investment Clearing House, Fin. Agts., 513 Denham Bldg., nver, Colo. A. E. Minium, pres.; S. E. Coyler, mgr.

Inc. 1913. **Cap.,** $10,000,000; shares 10c par. Stock was offered at 2c h a guarantee of refund attached should the company's statement not be ified.

Property: 8 and a fraction claims, 200 acres, in the South Pass mining trict, 35 miles from Lander, Fremont county, Wyo., the nearest railroad, nprising the Jerry Dain and Hidden Hand Fraction group, a bond and se on the Bobtail, Denver and Bluebird claims, near Lewiston, and con-l of 120 acres of partially developed mineralized land.

Ore: quartz, with gold in fissure veins, 15-24" wide; said to average ter than $100 per ton in gold.

Development: includes shafts 40-70' deep, including 500' of underground rkings on the Bobtail claim.

Equipment: shaft-house, blacksmith shop, pumping station, engine, ler, crusher, electric plant, and other machinery. A new mill was ready operation in May, 1919.

ICHORIA COPPER MINING CO. **WYOMING**

Idle several years.

Office: Room 3 Algoma Bldg., Oshkosh, Wis. **Mine office:** Copper-, Carbon county, Wyo. H. O. Granberg, sec.-treas.

Inc. April, 1901, in Wyoming. **Cap.,** $1,000,000; shares $1 par.

Lands: 4 claims, 80 acres, patented, in the Battle Lake district, de-oped by a 200' shaft and tunnels of 45' and 60', showing an orebody esti-ted at 45' width, giving specimen assays of 17% copper, and from a trace $5 gold per ton. Has a 40-h. p. steam plant, with hoist good for 500', ee power drills and four substantial mine buildings of logs.

INIE MINING CO. **WYOMING**

Mine office: Jelm, Albany county, Wyo. L. A. Hancock, sec.

Inc. 1903, in Wyoming. **Cap.,** $250,000; shares $1 par.

Property: 100 acres, near Jelm, said to show two 4' contact veins be-een granite and schist, opened by a 140' shaft and a 138' tunnel, showing)per carbonates and bornite, assaying up to 20% copper and $10 gold per . Idle since 1907, except for assessment work performed each year.

'LAS COPPER MINING CO. **WYOMING**

Address: Tie Siding, Albany county, Wyo.

Development work was carried on in 1918-'19, a few hundred tons of being shipped to the Omaha smelter in 1918.

URITE MINING CO. **WYOMING**

Idle. **Office:** Room 3 Algomah Bldg., Oshkosh, Wis. Arthur Bishop, p.; H. O. Granberg, sec.-treas. and gen. mgr.

Inc. Dec. 17, 1904, in Wyoming. **Cap.**, $1,000,000; shares $1 par; issued, $624,650.

Lands: 5 claims, 63 acres, in the Battle Lake district, near Dillon, Carbon county, showing 3 fissure veins, in gabbro, of 15 to 20' estimated width, opened by 305' of work, including a 65' shaft and 70' tunnel.

BIG FIVE COPPER CO. WYOMING

Company dissolved. Fully described in Vol. XIII.

BOSTON & WYOMING COPPER MINING CO. WYOMING

Idle. **Office:** care Jas. A. Shinn, Leadville, Colo. **Mine office:** Esterbrook, Albany county, Wyo.

Inc. January, 1903. **Cap.**, $500,000.

Property: the oldest in the district, includes 120 acres mineral land and 120 acres miscellaneous lands, taken over from Esterbrook Mining Co. The Esterbrook mine has a 4' fissure vein, traversing diorite, schist and granite, carrying cuprite, chalcopyrite, cerussite and galena, estimated by former owner to average 2 to 4% copper, 25 to 30% lead, 2 to 4 oz. silver and $1 to $2 gold per ton, developed by 2 short tunnels and 5 shafts, deepest 335'.

COMMERCIAL GOLD MINING CO. WYOMING

Office: Centennial, Wyo.

Officers: P. A. Peterson, pres., Canon Falls, Minn.; P. L. Holtum, sec.; B. Holtum, mgr., Centennial, Wyo.

Transfer office: Centennial. Annual meeting, second Tuesday in August.

Inc. 1909, in Wyoming. **Cap.**, $1,000,000; $1 par; 350,000 outstanding.

Property: 2 patented claims of 96 acres in Centennial mining district. The formation is similar to that of the district, granite, schist, porphyry, quartzite, etc., with N. E.-S. W. trend.

Idle since 1918.

CONGO MINING CO. WYOMING

Address: Rawlins, Wyo.

Owns property in Battle Lake district; idle for several years on account of lack of transportation. No recent information.

CONTINENTAL-MORRIS COPPER MNG. CO. WYOMING

Office: Morris, Ill. Mine near Encampment, Carbon county, Wyo.

Officers: J. H. Rogers, v. p.; Dr. G. A. Leach, sec.-treas., with L. Hatcher, U. C. Davis, W. A. Thomas, E. R. Joyce, B. C. Hitchcock, directors.

Inc. March 31, 1908, in Wyoming, as a merger of the Continental Copper Mining Co. and Morris Mining Co. **Cap.**, $2,250,000, increased later to $5,000,000; $1 par, issued, $1,750,000. Annual meeting, first Tuesday in February.

Property: 7 claims, patented, 120 acres, in the Battle Lake district, carrying about 50 acres of good pine timber. Claims show schist, with veins, of 31 to 40' estimated average width, traceable 1,500 to 3,000', carrying carbonate and sulphide ore, estimated to average 1 to 8% copper, with small gold and silver values.

Development: includes several shafts and 1,400' of tunnels. **Equipment** includes a steam hoist, good for 500', and 2 buildings. Idle, but resumption planned as soon as property can be refinanced.

COPPER BOTTOM MINING & MILLING CO. WYOMING

Address: Inez, Converse, Wyo. Henry Metz, Sr., pres.; Fred Metz, sec.-treas.

Property: the Green Hope mine, in the Hartville district, Laramie county, has produced about 125 tons of ore. Company also owns 4 copper claims in the region at the head of Broom creek, 15 miles from Sunrise, on which annual assessment work has been done.

ELECTROLYTIC COPPER CO. WYOMING

Offices: 342 Securities Bldg., Omaha, Neb., and Fort[illegible], Wyo.

Officers: E. J. Stoll, pres.; W. C. Metzger, sec. and gen. mgr.; Frank ·ling, treas., with Q. P. Wyland, directors. Wm. Benton, supt.
Inc. November, 1918, in Wyoming. **Cap.**, $1,500,000; $1 par; 700,000 ·d.
Property: 8 claims, 150 acres, includes the Mountain Rest, Iron Blos- . and Jitney copper mines, 4 miles N. and N. W. of Foxpark, Albany ·ty, Wyo. In first-named claim, ore is said to carry gold, silver, copper, , zinc, vanadium, and nickel. The Iron Blossom claim was acquired ı the Iron Blossom Mining Co., which see.
Development: by 128′ shaft and 350′ of workings. Equipped with double- ı hoist; a 100-ton concentrating plant is planned.

:NOR MINES CO. **WYOMING**

Address: O. M. Beck, Atlantic, Wyo.
Officers: O. M. Beck, pres.; Nate Wilson, v. p.; F. V. Marsh, sec.-treas.
Inc. 1917, in Wyoming. **Cap.**, $150,000; shares 50c par.
Property: 12 claims about 4 miles N. W. of South Pass and 28 miles ı of Lander, show a well-defined vein carrying copper, gold, and silver :s.

:HORN COPPER MINING CO. **WYOMING**

Property: the Elkhorn mine in the Elkhorn Mountain district, near ·land, Carbon county, said to carry a 7′ vein of sulphide ore, averaging 8% copper, with considerable ore in sight. Mine has a shaft and a tunnel, with about 1,000′ of drifts. Development work was carried on 18, and the ore mined was stored until the 400-ton concentrating mill n 1918, was finished.

:RALD MINING CO. **WYOMING**

dle. Wheatland, Laramie county, Wyo.
Property: the Cooney Hill mine, formerly owned by the Cooney Hill & Copper M. & M. Co., and the Emerald mine, on Slate creek, show- prominent gossan outcrop in schist. The Emerald has a 60′ shaft in and a 100′ shaft bottomed in a gossan showing traces of copper sul- s. No recent report received.

RIS-HAGGARTY COPPER MINING CO. **WYOMING**

nactive. Owns, or did own, the copper mine of this name at Rudefeha, ɔn county, Wyo. Company also owned $375,000 of the Penn Wyoming ·, but as its stock is practically all owned by the Penn Wyoming, its ·rate officers and affairs are of no public interest, save as the only ble mining asset of the chain of bankrupt corporations, controlled by enn Wyoming and its alleged and equally rotten successor, the United ers, Railway & Copper Co. See under Penn Wyoming Co., in Vol. also Vol. X, Copper Handbook.

LD MILLING AND LEASING CO. **WYOMING**

. A. Lathrop, mgr., Centennial, Wyo. Company had a lease on the rty of the Utopia M. & M. Co. (which see) in the Centennial district.

GARTY COPPER MINING CO. **WYOMING**

robably dead. Mine at Rudefeha, Carbon county, Wyo. L. N. Pen- former pres.
ap., $10,000, increased Nov. 9, 1908, to $1,500,000; shares $1 par. Con- l and owned by the United Smelters, Railway & Copper Co. Is a nion of the Ferris Haggarty Co., but like all its sister companies by the U. S. R. & C. Co. Only a lawyer can tell which of the two the copper mine that has been the bait for so many "investors." c Vol. XIV, also Vol. X of "Copper Handbook," under Penn-Wyom- pper Co.

A CONSOLIDATED MINES CO. **WYOMING**

fice: at last reports, care Henry Schwartz, pres., 308 Masonic Bldg., r, Colo. Mine at Hecla, Laramie county, Wyo.
c. 1909, in Wyoming, as a merger of the Hecla Mining Co., Amalga- Copper Mining & Extraction Co. and Kopper Krown Mining Co. 5,000,000; shares $1 par.

Property: 610 acres, including the Hecla group, 13 claims, 2 patented, and a 35-acre townsite, in the Silver Crown district, 4 miles from Granite Canyon, on the Union Pacific railroad and 7 miles from the Cheyenne Northern line. The Hecla is claimed to show 16 fissure veins, of 8′ average width, in schist and granite, of which 3, of 7′ average claimed width, carry oxidized and sulphide ores, said to give average assays of 3.4% copper, 3 oz. silver and several dollars in gold per ton, besides nickel, platinum and uranium.

Development: includes a 40′ tunnel and 14 pits and shafts of 10 to 14′ depth.

The Hecla mill has 15 stamps, a 50-ton concentrating plant and a leaching plant. Ore is mainly low in grade, and only in part adapted to concentration, and the mill requires overhauling, and flotation equipment. The history and financial methods of this company and its predecessor are described in Vol. X.

Same management as the Henley Cons. Copper Mines, Wyo. Letter returned unclaimed 1919. Probably dead.

HENLEY CONSOLIDATED COPPER MINES WYOMING

Address: at last accounts, Henry Schwartz, 308 Masonic Temple, Denver, Colo., chief owner.

Property: 25 claims, 500 acres, 25 miles S. W. of Cheyenne, Laramie county, Wyo.

Same management as the Hecla Cons. Mines Co., which see.

HOME RUN COPPER MINING CO. WYOMING

Office: Rooms 17-18 Postoffice Bldg., Colorado Springs, Colo. Mine near Rudefeha, Carbon county, Wyo.

Officers: A. L. Bohrer, pres.; J. F. Humphrey, v. p.; Adolph Fehring, treas.; Wm. C. Robinson, sec., at last accounts.

Cap., $1,500,000; shares $1 par.

Property: 180 acres, partly patented, known as the Copper Bell group near the Ferris-Haggarty mine, having a 350′ tunnel showing a vein of copper, gold, and silver values. Idle many years.

IMPERIAL COPPER & GOLD MINING CO. WYOMING

Office: 423 Caswell Block, Milwaukee, Wis. Jacob Best, sec.-treas.

Property: 6 claims, 113 acres, patented, near the Penn-Wyoming mine on Upper Cow creek, 12 miles west of Encampment, said to show 2 veins, 1 of 26 to 32′ estimated width, being a schist dike. Mine has about 500′ of tunnels, developing ore giving assays of 6 to 14% copper, with small gold and silver values. Idle since 1915.

INDEPENDENCE MINING CO. WYOMING

Successor of Leighton-Gentry Mining Co.

Idle. **Office:** Algoma Bldg., Oshkosh, Wis.

Officers: E. E. Meeleus, pres.; Henry L. Larsen, v. p.; H. O. Granke, sec.-treas. and gen. mgr.

Inc. June 28, 1904, in Wyoming. **Cap.,** $1,000,000; $1 par.

Property: 6 claims, patented, 120 acres, 2 miles north of Dillon in the Battle Lake district, shows eruptive metamorphic country rocks, carrying an 11′ contact vein between quartzite and diorite.

Development: by 200′ incline shaft and 250′ tunnel, showing occasional stringers of 3 to 12″ width, carrying a little chalcopyrite assaying 12% copper, with small quantities of nickel and cobalt and traces of silver and gold. Has steam power, a hoist and several small mine buildings.

IRON BLOSSOM MINING CO. WYOMING

Office: Laramie, Wyo. **Mine office:** Foxpark, Wyo.

Officers and directors: Grant Thomas, pres.; E. J. Stoll, v. p.; W. Benton, sec.-treas. and mgr.

Inc. August, 1914, in Wyoming. **Cap.,** $100,000; 10c par; $75,000 issued, 250,000 shares in treasury. Paid dividends of 40% during 1918.

Balance sheet of August 3, 1918, showed cash, Liberty bonds and securities worth $15,400; and bills and taxes of $240.

Property: 5 claims, 100 acres, in Albany county, includes the Amazon, at Rambler, and Beulah mines, 5 miles W. of the C. W. & E. R. R. at Spark.

The Amazon mine whose claims cover 40 acres, has a 1,000′ tunnel giving a back of 200′. Ore was encountered in fissure veins in diorite at 200′ 600′ from portal. Two lots of ore shipped to the Grant smelter, Den- gave returns (1) 11% copper, $6.40 gold and silver; (2) 15.40% copper, 60 gold and silver.

The Beulah property has a 65′ shaft with a 30′ crosscut from which ore mined that yielded 11.20-15.6% copper, $3.40 and $5.60 gold and silver. carries 40% iron making it a good flux. A 2,200′ tunnel is being driven vein through Amazon property towards Beulah shaft to drain ground allow larger production at lower cost. Tunnel 965′ long, December,).

Company intends to sell 50,000 shares at 30c. to complete work planned. anuary, 1920, it was decided to erect a power plant, hoist, pumps, and a

IAY COPPER MINING CO. **WYOMING**

Idle. **Office:** Rawlins, Wyo. Mine near Rambler, Carbon county, Wyo. Miller, mgr.; Albert Bryle, supt., at last accounts.

Property: 4 miles S. of Rambler, is said to have a 20′ vein, carrying a streak of high-grade ore, apparently undeveloped, and another vein up to width carrying sulphide ore.

Development: by a 300′ shaft. Mine has been a complete failure to date.

K POT MINING & MILLING CO. **WYOMING**

Idle. **Office:** Room 3 Algoma Bldg., Oshkosh, Wis.

Officers: H. Thorsgaard, v. p.; H. O. Granberg, sec.-treas.

Inc. Dec. 23, 1903, in Wyoming. **Cap.,** $1,000,000; shares $1 par.

Property: 9 patented claims, 180 acres, in the Battle Lake district, ing fissure veins in diorite and chlorite schist, and 2 contact veins, be- n diorite and porphyry, carrying carbonate and sulphide ores. Two , slightly developed, are said to average 14′ to 60′ in width. The ler vein has averaged 8% copper and $3 to $12 gold per ton, the larger showing very low-grade copper ore.

Development: 75′ tunnel, 100′ shaft and 8 pits of 20 to 36′ depth, with of workings. Though inactive for many years, company is still in nce and all taxes have been paid to date.

BALL MINING CO. **WYOMING**

dle. **Address:** Kimball, Neb. B. A. Lathrop, pres. and supt., Centen- Carbon county, Wyo. G. W. Forsling, v. p.; A. J. Hull, sec.-treas.

roperty: 19 unpatented claims, near Centennial, developed by 800′ of ls opening a quartz vein with gold and silver-bearing copper ore. No t returns.

HTON-WYOMING MINING CO. **WYOMING**

dle. Letters returned from 417 Seventh St., Milwaukee, Wis.

fficers: M. H. Yewdale, pres.; Herman Pereles, v. p.; H. E. Dankoler, Spencer C. Yewdale, treas.; with A. G. Weissert, S. P. Bjorklund and Hendricks, directors, at last accounts.

c. 1906. **Cap.,** $1,000,000; shares $1 par; issued, $810,000.

roperty: 2 patented claims, about 1 mile north of the Ferris-Haggarty in the Battle Lake district.

evelopment: by a 186′ tunnel and a 65′ shaft.

quipment: includes a sawmill and a small machinery plant, bought from the Haskins mine.

MER MINERALS CO. **WYOMING**

ddress: M. Lorimer, Lusk, Wyo.

November, 1919, machinery had been erected to make a trial run, ring rich uranium ore for shipment to the extracting plants in the It was expected that radium would be extracted locally from the nd a sanitarium erected.

LOST CABIN MINING CO. WYOMING

Address: A. O. Heger, sec., Shoshoni, Fremont county, Wyo.

Cap., $150,000.

Property: the Lost Cabin group, in the Boyeson section, said to carry the Summit vein. Gold, silver and copper ore occurs in quartz veins. Since 1909 assessment work only has been done.

MAGGIE MURPHY COPPER CO. WYOMING

Office: care Chas. S. Ashley, pres., New Bedford, Mass. Mine near Douglas, Converse county, Wyo.

Inc. August, 1904, in Wyoming. **Cap.,** $1,000,000; shares $1 par

Property: 12 claims, 180 acres, and a 60-acre millsite in Horseshoe canyon, in the Laramie Peak district. Claims show granite, with gneiss and schists, carrying 7 veins between gneiss and mica-schist, one of which ranges 30 to 60′ in width and shows covellite, bornite and chalcopyrite, with pyrrhotite ores assaying 1 to 6% copper, 2 to 9 oz. silver and 40 cts. to $3 gold per ton.

Development: includes 114′ shaft and various shallow workings. Company has kept up necessary annual assessment work, but has done no development, as far as can be ascertained.

NORTH LARAMIE PEAK COPPER MINING CO. WYOMING

Office: care L. V. Saul, sec., Esterbrook, Wyo. **Mine office:** Douglas, Converse county, Wyo.

Officers: H. C. Saul, pres.; W. A. Saul, treas.

Inc. 1908, in Wyoming. **Cap.,** $2,000,000; shares $1 par; fully paid, non-assessable; 500,000 shares in treasury.

Property: 29 claims, 440 acres, patented, in the North Laramie Peak district, show pre-Cambrian schists bordering granite contacts, on which 1,000′ of diamond-drill work has proven existence of a flat body of disseminated chalcopyrite ore 40′ wide. A shaft has been sunk 100′ on a channel of chalcopyrite ore said to assay 27% copper, 6 oz. silver and $2 gold, in a total width of 5′.

Equipment: includes 80-h. p. boiler with hoist, pump, steam power and a 3-drill compressor. Is a close corporation, entirely owned and financed by Messrs. Saul. No recent returns.

OCCIDENTAL GOLD MNG. & MLLG. CO. WYOMING

Address: Beulah, Crook county, Wyo.

Property: 12 miles from Beulah, was not operated in 1918-19, though roads were built, and flumes and pipe laid as part of assessment work.

OSHKOSH-WYOMING MINING CO. WYOMING

Idle. **Office:** 3 Algoma Bldg., Oshkosh, Wis. Mine near Dillon, Carbon county, Wyo.

Officers: O. A. Koch, pres.; E. E. Meeleus, v. p.; H. O. Granberg, treas. and gen mgr.

Inc. June 20, 1904, in Wyoming. **Cap.,** $1,000,000; shares $1 par.

Property: 11 claims, 220 acres, in the Battle Lake district, is said to carry fissure veins in gabbro, of 22′ estimated average width, opened by shafts of 32′ and 72′ and a 22′ tunnel, showing chalcopyrite and oxide of copper.

OTEGO MINING CO. WYOMING

Hecla, Wyo. **Officers:** Horace E. Adams, pres.; L. M. Porter, v. p.; Fred McTygue, sec.-treas.

Inc. in Wyoming. **Cap.,** $5,000,000; shares $1 par.

Property: 3 claims, about 60 acres, in the Silver Crown mining district near Hecla, Laramie county. The Arizona mine is said to show granite schist cut by an extensively fractured dike of diorite, about 200′ wide, 2,000′ long, outcropping at surface over a considerable distance. Ore at surface is oxidized and carries principally malachite, succeeded at depth by copper sulphides and native copper. Gold occurs disseminated throughout the orebody.

Development: by 160′ shaft with 102′ crosscut at the 80′ level, 3

scuts and drifts on the 130′ level, and a 100′ tunnel. Mine reported on . E. Jamison and H. C. Beeler (1907).

K GOLD MINING CO. **WYOMING**

Office: Mining Exchange Bldg., Colorado Springs, Colo. **Mine office:** ennial, Wyo.

Officers: Henry Sachs, pres.; G. Y. Kittle, v. p.; C. B. Garnett, sec.-.; P. J. Winters, mgr., with E. H. Joslyn, directors.

Inc. 1916, in Wyoming. **Cap.**, $700,000; shares $1 par; non-assessable; 50 shares outstanding.

Property: 10 claims, 100 acres, 40 acres being placer ground, in Cen-ial mining district, Albany county, 3½ miles by road to Centennial, at levation of 9,294′. Also has a bond and lease on 200 acres adjoining nd, developed by a main tunnel expected to cut the veins of the ralized zone at 500′ from portal.

Development: work was started in January, 1917, and consists of two els, longest 335′ and a shallow shaft.

Equipment: includes gasoline engine and 3-drill compressor.

The lode claims have been favorably compared by the two engineers have reported on the properties at different times "to the Homestake in South Dakota."

Funds for development being raised by sale of notes convertible into s at 10c per share.

N-WYOMING COPPER CO. **WYOMING**

For detailed history, see Vol. X of "Copper Handbook."

n January, 1919, it was announced that Morse Bros. Machinery & Sup-Co. of Denver had purchased from the Bondholders Protective Commit-he entire assets of the Penn-Wyoming, including all the assets of the us subsidiary companies whose bond issues totaled $3,600,000. Pro-on from properties totals 6,414,011 lb. of copper recovered from 59,000 of ore equivalent to 5.4% copper.

The aerial tram connecting the Ferris-Haggerty mine with the smelter ıcampment is 16 2/3 miles long, and was a costly attempt to solve the portation problem. An honest effort will be made by the new owners ove the value of the mines, and to operate them if investigation proves worthy of the necessary expenditure. The smelter and concentrators ıcampment will be dismantled and sold.

The geologic features of the district are described by A. C. Spencer, ofessional Paper No. 25, of the U. S. Geological Survey, 1904.

TINUM MINING & MILLING CO. **WYOMING**

Merged with Rambler Copper & Platinum Co. into Rambler Consoli-Mines Corporation, which see. Fully described in Vol. XIII.

Inc. July, 1906, in Wyoming. **Cap.,** $5,000,000; $1 par; fully issued, with 0,000 stock assigned to a trustee, for the benefit of the treasury. An- meeting, second Wednesday in July.
Property: 9 lode claims, 2 patented, 180 acres, and 520 acres of placer ns, unpatented, in Three Forks district, 26 miles S. W. of Encampment, nearest rail point.
Geology: claims show granite and diorite, reported by management ave veins carrying auriferous galena, with strike of N. 25° W., and cross s carrying copper striking at nearly right angles, the galena vein system ng an extreme width of 120', with length of 4,500', the paystreak varying 10" to 54" in width. The galena ore is said to average 10 to 20% free from zinc, with silver and gold values. The copper veins are un- loped, but show a variety of oxidized ores, at surface.
Development: by pits and shafts, and numerous short tunnels, from 30 0' in length, nearly all openings showing ore. The management esti- s 5,000 tons of ore blocked out for stoping. Plan raising necessary s for proper equipment and small concentrating plant.

TED SMELTERS, RAILWAY & COPPER CO. WYOMING

Dead. The property claimed by company is described under the title e Penn-Wyoming Copper Co., which apparently was the legal owner, full particulars regarding the entire chain of rotten promotions, in- ng this company, are given in Vol. X, Copper Handbook, under Penn- ming Copper Co.
udgment against company for $2,500,000 was secured by Continental mmercial Trust & Savings Bank, Chicago, December, 1913. Bank had d money to company taking a mortgage on the property. Several of litigation were thus ended and the properties of the United Sm., & C. Co. and its subsidiaries were sold at forced sale, being bought in e bank.
On January 1, 1919, the property was purchased by the Morse Bros. inery Co. of Denver, who will build a mill for the treatment of the melter slag dump.

PIA MINING & MILLING CO. WYOMING

ddress: Centennial, Albany county, Wyo.
fficers: Lee Van Voorhis, pres.; Jas. McCune, v. p.; P. L. Loltum, Bernards Loltum, gen. mgr.
nc. 1898, in Wyoming. **Cap.,** $1,000,000; shares $1 par; non-assessable; l, $875,000. Annual meeting, third Tuesday in August.
roperty: 2 claims, 30 acres, unpatented, in the Centennial district, said ow 2 contact veins between diorite and schist, of which 1 averaging 5' lth, is reported to have given assays of 3% copper, 4 to 20% zinc, up oz. silver and $44 gold per ton. Minerals are mainly chalcopyrite, rite, and pyrite. Ore averages $15 per ton.
evelopment: by tunnels of 250', 600', 175', 300', and 1,200', with about of workings, all in ore.
quipment: includes a small electric installation, with electric drill, and dings. Reopened in 1913 and leased in 1915 to the Gould Milling & g Co. A 50-ton mill costing $20,000 was erected, but was closed dur- e war. It was to be remodeled, and mine and mill operated by lessees 9-20.

TOR CONSOLIDATED GOLD MINING CO. WYOMING

603 Symes Bldg., Denver, Colo., and Glenrock, Wyo.
t see same company under Colorado.
t 3 patented chromite claims, 23 miles S. E. of Glenrock, Con- Wyo., purchased in October, 1918, for $8,750 cash, plus 12½% on board cars.
enough work has been done to prove limits of 4 lenses

of 40% chromic oxide ore whose croppings are scattered over an area of 400' across. Exploration work and stoping have produced 610 tons and developed indicated ore amounting to 2,000 tons, with faces still in ore. This ore is from 4 to 22' wide, and is found but 10' below the surface. One lens yielded 50 tons of 34% ore, with enough indicated ore to show that it would take 5 months' work to extract it and would give a profit after paying for purchase price and all improvements, including much road construction.

Financial: chromite mined on the Pacific Coast when shipped to Denver, takes a freight rate of $8.70 per ton higher than ore from Glenrock to the Vindicator company's Denver plant, where two 1,500 kva. electric furnaces reduce the ore to ferro-chrome with output of 200 tons per month. This freight charge gives the Vindicator Company a big advantage over other chromite producers. The total outlay at the mine up to February, 1919, was $55,273, less $21,671 for ore sold.

WESTERN SULPHUR CO. WYOMING

Address: Douglas, Wyo.

Officers: W. F. Cox, pres.; G. W. Metcalf, v. p.; C. D. Zimmerman, sec.-treas.; with P. I. Rothwell, directors. H. C. Austin, supt.

Inc. in Wyoming. **Cap.**, $15,000,000.

Property: 430 acres at Thermopolis, Hot Springs county, Wyo. Examined by Chauvenet of St. Louis and McClave of Denver.

Sulphur deposit is a dissemination in limestone, assaying from 6 to 99.7% S. Mining is to be by steam shovels. Diamond-drilling under way in 1919. A spur line is contemplated, also a refinery.

WILLIAMS LUMAN MINING CO. WYOMING

Address: care W. J. Thom, cashier First Nat'l Bank, Buffalo, Wyo.

Mine office: Depass, Fremont county, Wyo. L. R. Vanhouten, pres.

Inc. May 2, 1908, in Wyoming. **Cap.**, $2,500,000; $1 par; issued 2,385,000 shares.

Property: 9 claims, patented, 130 acres, 16 miles from a railway, in Copper Mountain district, shows 8 fissure veins in granite, diorite and altered schist. The main vein zone, 50 to 60' wide, traceable 3,400', is much altered, crushed and fissured diorite, has a 2' paystreak carrying free gold, copper ore, and native copper in thin sheets and nuggets, ore minerals being cuprite, melaconite, malachite and chalcocite. Ore is reported to assay 10% copper, 5 to 10 oz. silver, and $2 to $8 gold per ton.

In April, 1918, company bonded the McGrath claims from D. L. Day of Basin, Wyo.

The G. & M. Copper Mining Co. operated a lease on the main property and was reported shipping ore. Company resumed operations in 1918.

Development: by an 820' shaft, showing sulphides on the 800' level, with 2,000' of workings. There also are tunnels of 513' and 300'.

Equipment: includes an 80-h. p. gasoline plant, with a 15-h. p. hoist and a 2-drill compressor. A concentrator was erected in April, 1918.

The company is operated as a close corporation, money for development having been furnished by about 10 shareholders only. Property favorably regarded, but needs railroad transportation.

WINONA GOLD-COPPER MINING & MILLING CO. WYOMING

Office: 111 Market Ave., S. Canton, Ohio. **Mine office:** Painter, Big Horn county, Wyo.

Officers: L. Cavanah, pres. and gen. mgr.; Geo. House, v. p.; D. L. East, 2nd v. p.; Wm. H. McAloney, sec.-treas., at last accounts.

Inc. 1903, in Wyoming. **Cap.**, $5,000,000; shares $1 par; fully paid. Management was changed and company practically reorganized December, 1905.

Property: 25 claims, unpatented, 440 acres, in the Sunlight district, Silver creek, in Rose, Bonfil and Sulphur mountains, in the N. W. corner of Big Horn [illegible] miles E. of the Yellowstone National Park. Claims [illegible] ores, carrying [illegible] with [illegible] pyrite, chalcopyrite [illegible]

ite and are reported to average 7 to 8% copper with about $3 gold per . The principal veins in andesite are known as the Bluff, Malachite and enhorn. The Bluff vein is said to be 25′ wide with a 12′ paystreak of per ore. The Malachite vein, 10 to 25′ wide, has a paystreak of high-de copper ore, 1½′ wide at surface, increasing to 5′ at depth.

Development: by 2 tunnels, the lower or main working tunnel, 804′ g. Total workings, 1,032′. **Equipment:** includes steam and electric power its and 10 buildings. No recent returns; presumably inactive.

'OMING COPPER & GOLD MINING CO. **WYOMING**

Office: Alma, Kan. C. B. Henderson, pres.; Al Rohr, v. p.; J. R. Hen-son, sec.-treas.

Inc. Sept. 3, 1903, in Arizona. **Cap.**, $1,500,000; shares $1 par; non-ssable.

Property: 9 claims, known as the Metal Chief and Jessie group, in Hog k, in the upper Platte district, 12 miles from a railway, show granite gneiss, cut by 2 fissure veins with S.-E strike, reported by management average 28 to 35′ in width, and to carry copper oxide and carbonate , with average assay of 3 to 15% copper, a little silver and $1.63 to 9 gold per ton.

Development: the Metal Chief vein has a 105′ shaft and the vein is re-ed to widen at depth. The Jessie vein has a 175′ shaft showing ore of 10% copper tenor with small gold and silver values.

Equipment: includes a small steam plant with a hoist, steam pump, and ildings.

No recent returns; presumably idle.

OMING COPPER MINING CO. **WYOMING**

Idle. **Office:** 303 Detroit Free Press Bldg., Detroit, Mich. **Mine office:** th Pass City, Fremont county, Wyo.

Officers: Charles K. Skinner, pres.; C. F. Remington, treas.; Jas. Mac-lane, v. p. and supt.; C. A. Spalding, sec., with Chas. E. Murphy, and s. D. Ridgway, directors.

Inc. 1905, in Wyoming. **Cap.**, $2,000,000; $1 par; issued 1,375,000.

Property: 12 quartz claims, 240 acres, and a 30-acre placer claim, in the th Pass district of the Wind River mountains, reported to show a act zone between granite and metamorphic rock, proven for one-half in length by prospect pits.

Development: includes a 500′ incline shaft, and several hundred feet of scutting. The vein is reported by the former management to show sul-e ore at depth of 72′, ore giving assays of 2 to 6% copper, with an age of 1 to 2 oz., and maximum of 20 oz. silver, and $3 to $4 gold per

Equipment: includes an 80-h. p. boiler and a 40-h. p. hoist, with several lings.

CANADA

The mining companies of Canada are grouped by provinces and by districts, and arranged alphabetically under these names—Cobalt, Porcupine, etc., are therefore, described under Ontario. The Pas district, the new copper district of Canada is in Manitoba and the great number of mineral properties of the Pacific Coast region are described in the British Columbia section.

Newfoundland being an independent Crown Colony is in a separate section.

ALBERTA

ATHABASCA MINING CO.

Inc. in Alberta, Can., April, 1914. **Cap.**, $1,000,000. Hon. G. H. Bulyea, Gov. of Alberta, Hon. Chas. R. Mitchell, E. J. Taylor and C. L. Freemann, directors, all of Edmonton.

Property: assets and properties of the Athabasca Mng. Syn. consist of 800 acres of nickel claims, 160 acres iron claims, on and near Lake Athabasca near Edmonton, Alberta, Canada. Assays of surface samples showed 1½ to 2% nickel, iron samples ran 66.7% iron, 2.12% silica, .014% phosphorous and .02% sulphur. Copper occurs as bornite.

BRITISH COLUMBIA

The mining companies of this province are arranged alphabetically. Readers interested in British Columbia mines should consult the yearly reports of the Provincial Mineralogist, issued as Annual Report of the Minister of Mines, obtainable free from the Minister of Mines, Victoria, B. C.

A. B. C. METALS CO. **BRITISH COLUMBIA**

See Alaska British Columbia Metals Co.

ALAMO CONCENTRATOR **BRITISH COLUMBIA**

Located at Alamo, on the Kaslo-Nakusp Ry. Owned by Clarence Cunningham, and built by General Engineering Co., of Salt Lake City. Mill has a capacity of 150 tons and was built to treat ore from the Queen Bess, Wonder, Sovereign, and Idaho and Alamo mines, operated by Cunningham. Power obtained from a 225 h. p. Pelton wheel. Mill started operating about August 1, 1919.

ALASKA BRITISH COLUMBIA METALS CO. BRITISH COLUMBIA

Office: S. I. Silverman, 1 Wall St., New York.

Officers: S. I. Silverman, pres.-mgr.; C. S. Cohen, v. p.; H. H. Hyman, sec.-treas., with H. M. Keith and H. L. Dudley, directors.

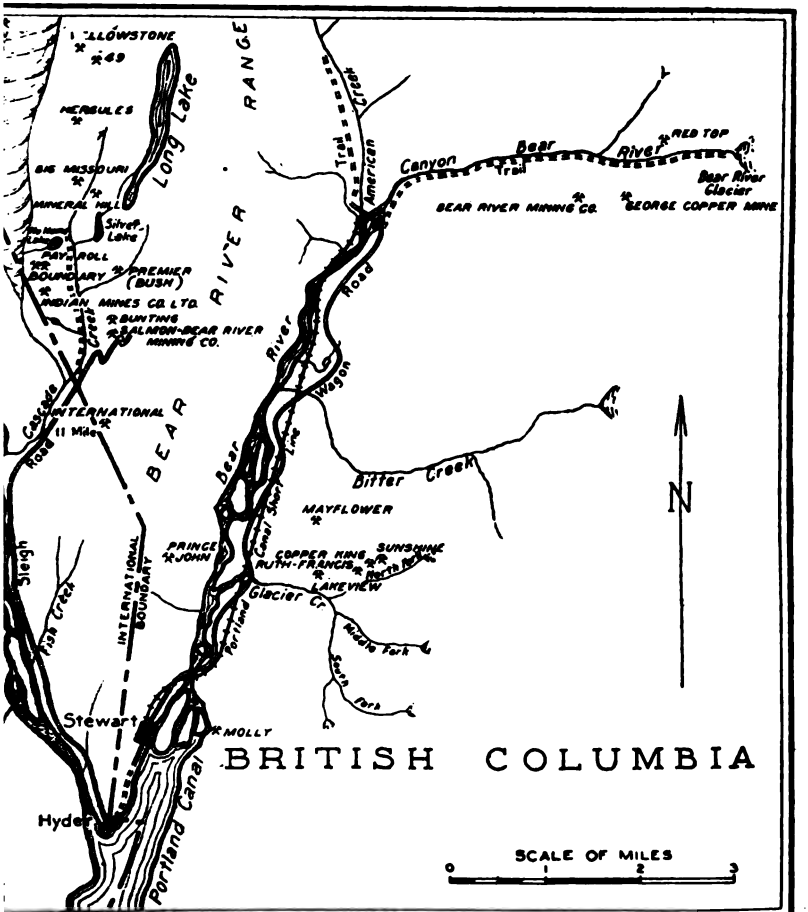
Inc. December, 1915, in Washington. **Cap.**, $2,000,000; $1 par; increased from $1,000,000. Metropolitan Trust Co., New York, transfer agents and registrars. Listed on New York Curb.

Company is a holding concern whose principal interests are in the Dewdney or Indian Chief mine of the Dewdney Canadian Syndicate, and in the Forty-Nine Mining Co., Ltd., which see. Also controls the Tidewater Copper Co., which see.

AMARGOSA COPPER CO. **BRITISH COLUMBIA**

Office: 823 Old National Bank Bldg., Spokane, Wash.

Officers: E. P. Spalding, pres.-mgr.; C. D. Muxen, v. p.; Oscar Cain, treas., with A. M. Premo and G. A. Henkel, trustees.
Inc. 1916, in Washington. **Cap.,** $1,000,000; $1 par; assessable.
Property: 7 claims, 300 acres, 5 miles from Hazelton, claimed to cover ' on the strike of a series of veins, from 4-10' wide, carrying copper-silver-ore.
Development: by 300' crosscut tunnel. Idle since June, 1917.



TIES OF THE NEW BOUNDARY DISTRICT. THE DOLLY VARDEN MINE IS EAST OF STEWART.

RICAN BOY MINING CO. BRITISH COLUMBIA

ockholders, 1918, Maurice Oppenheimer, A. W. Siegel, Sam Hanauer, and McCall, of Spokane, and C. D. Bibbins, Oakland, Calif. Reported in 1918 nas. F. Caldwell and Eastern associates had taken a 3-year lease and bond perty of the company for $100,000. Mine has been idle for 10 years.
p., $1,500,000; par $1.
operty: 4 claims, adjoining the Last Chance, on Reco Mountain, andon, Slocan district, said to show silver-lead ore. There are several

thousand feet of workings; considerable ore was shipped when the property was operating.

ARGO MINING & TUNNEL CO., LTD. **BRITISH COLUMBIA**

Office and mine: Greenwood, Yale district, B. C.

Officers: Ole Lofstad, pres. and gen. mgr.; A. S. Black, sec.-treas.; with John Williamson, Jerome McConnell and Oscar Hartman, directors.

Inc. June 10, 1909, in British Columbia. **Cap.,** $125,000; shares 25c par.

Property: the Argo mine, near the Greenwood smelter, developed by 1,150' tunnel, at a vertical depth of 500', with portal about 500' from track of Canadian P. Ry. A vein of milling quartz, 10' wide, contains a 4' band of concentrating ore. No recent information; probably idle.

ASPEN GROVE AMAL. MINES, LTD. **BRITISH COLUMBIA**

Address: Merritt, B. C.

Officers: J. E. Bate, pres.; M. L. Grimmett, v. p.; M. R. Durland, sec.-treas., with Jos. Walters, and J. J. Gillis, directors.

Inc. in British Columbia. **Cap.,** $1,000,000; par $1.

Property: 75 claims, in Aspen Grove district, Nicola mining division, which show low-grade copper ore. At last report property was under bond and lease to Jas. Errington and associates and was to be explored by drilling.

AUFEAS MINES, LTD. **BRITISH COLUMBIA**

Dead. Formerly at Hope, B. C. See Vol. XII.

BABINE BONANZA M. & M. CO. **BRITISH COLUMBIA**

Officers: Jas. Cronin, pres., 924 S. Maple St., Spokane; Chas. Thein, v. p., with Wm. Huntley, J. F. Cronin, all of Spokane, Wash., and A. H. MacNeill, Vancouver, directors.

Property: a group of claims, 300 acres, at the head of the Tuchi river, in the Babine range, Skeena district, 22 miles by trail from Smithers, on the Grand Trunk Pac. R. R. Orebodies occur on contact of granite porphyry and altered sediments, and in fissure veins, 1 to 3' wide, in the porphyry. Values are in the silver-lead-zinc contents. Average assays show 20 to 60 oz. silver, 11 to 56% lead, 10 to 34% zinc.

Development: several tunnels, longest 400', and shafts, deepest 50'. A promising prospect, but handicapped by its remoteness. Planning to continue development work, 1920.

BELMONT-CANADIAN MINES, LTD. **BRITISH COLUMBIA**

Described in Vol. XIII. Property taken over by Belmont Surf Inlet Mines, Ltd., which see.

BELMONT SURF INLET MINES, LTD. **BRITISH COLUMBIA**

Office: 500 Bullitt Bldg., Philadelphia, Pa.

Officers: C. A. Heller, pres.; W. M. Potts and S. D. Sinkler, v.-p.; C. B. Taylor, gen. counsel., with E. A. Cleveland, M. B. Cutter, J. C. Fox, R. G. Park and T. W. Synnot, directors. J. K. Kitto, sec.-treas.; B. G. Hawkins, R. G. Wilson, and A. S. Arnold, asst. sec.-treas.; C. Ducheneau, comptroller; Frederick Bradshaw, gen. mgr.; F. W. Holler, supt.; G. H. Garrey, consulting geologist; H. J. O'Connell, mine supt.; F. H. Penn, mill supt.; E. W. Hawkins, auditor.

Inc. in British Columbia. **Cap.,** $2,500,000; shares, $1 par. Incorporated by the Tonopah Belmont Development Co., of Nevada, to take over property of Belmont-Canadian Mines, Ltd., and Surf Inlet Power Co., two British Columbia corporations, owning the Tonopah Belmont, which controlled the mine directly. The mother company owns 80% of the total [illegible] Inlet Mines. Up to the end of 1918, the Tonopah Belmont [illegible] on the property, a sum which has since been [illegible]

[illegible] 28, 1918, shows $325,7[illegible] ceipts [illegible] were $326,258, and [illegible] ties, $[illegible] 31, 1918, the [illegible] $744,432, [illegible],811, and [illegible] 107. Net [illegible] 434.

ividends: initial, of 5 cents a share, equal to $125,000, was paid in 1919; total for 1919, $375,000. First quarter of 1920, $125,000.
roperty: a gold-copper mine on Princess Royal Island, B. C.
evelopment: by the present company, total 16,000′ of work, all h tunnels. The cost per foot in 1918 was $15.116 for 1,887′. The winze the main haulage-level (550′) is now a fully equipped three-compartment with electric hoist, etc. Recent exploration has exposed orebodies of large nd on January 1, 1919, reserves were reported as 422,761 tons, an increase .790 tons since March 1, 1917. In 1918, 116,349 tons were mined.
quipment: is very complete, including 750 k. w. hydro-electric plant, ile transmission-line, compressors, machine-drills, conveyor-bridge, and 1 mill (started Sept., 1917), containing ball-mills, concentrators, and flo- machines. Concentrate is sent to smelter. A modern township has been ed and dwellings erected for employees.

oduction:	Gold,	Silver,	Copper,	Value	Total		
Tons	oz.	oz.	%	per ton	realized	Recovery	Cost
..... 103,451	0.438	0.275	0.315	.....	.....	.....	.....
..... 83,142	0.481	0.311	0.261	$11.12	$740,090	93.13	$5,012

ıe 1918 figures are for 10 months, and those for 1917-18 for 6 months, oken periods. Net profit for last quarter in 1919, $88,181.
ıis mine is now a regular dividend-payer.

MISSOURI MINE. **BRITISH COLUMBIA**

ddress: Lindeborg Bros., Stewart, B. C. Mine worked under lease nd by Sir Donald Mann, and Sandy Mann, of Montreal.
operty: 20 claims on Cascade creek, just N. of property of Premier ; Co., 20 miles from Stewart, said to show an immense body of low-grade x ore, opened by a series of open-cuts made in 1917, which prove the ore vidth of at least 1,000′. Hundreds of samples from these cuts average 60c l, $1.05 in silver, 2.16% lead, 0.5% copper, 5%zinc, 14.3% iron, 75% silica. in 1918 is said to have disclosed extensive bodies of high-grade silver ore ill assay, in places, over $100 per ton in a width of 20′. Diamond drilling, l during the winter, to be renewed in 1920. If further development shows ıation of such a large low-grade orebody experimental work will doubt- d a method to treat the complex ore. The high-grade ore is an additional

ENA COPPER MINES, LTD. **BRITISH COLUMBIA**

fice: 420 Rogers Bldg., Vancouver.
ficers: L. A. Brown, pres.; T. W. Turner, v. p.; C. M. Oliver sec.- with D. McCallum, and G. Armitage, directors.
c. May, 1913, in British Columbia. **Cap.,** $300,000; $1 par; outstand- 7,020. Annual meeting, December 13. Spent $20,477 in development work

operty: 3 claims, 150 acres, crown-granted, on the east side of Island, 12 miles west of Vancouver, said to show disseminated copper ore g 1.9% copper and containing gold and silver.
velopment: 170′ tunnel, claimed to block out 10,000 tons ore. Trial ns sent to Ladysmith smelter in 1917, ran 3.3% copper, $2.40 gold and 1.16 per ton, netted $14.18 per ton.
sander Sharp, E. M., reported 8,000 tons of 1.8% ore and G. S. Eldridge, tal assayer, Vancouver, reported the 10 dumps ran 2.42% copper.
operty leased, July, 1918, to C. W. Tipping for 5 years, company to re- 0% of the net profits. Lessee has built a 100-ton mill. No record of

-ALBERTA MINING CO. **BRITISH COLUMBIA**

A. J. Flood, pres., Vulcan, Alberta; W. R. Allen, sec., Nel-

rick group, 4 claims, 6 miles N. of Argenta, at head

of Kootenay Lake, Ainsworth mining division. Said to show a 36' vein with lead-silver-zinc ore in streaks 6 to 18" in width. Developed by tunnel and a 90' shaft. In 1918, a few men were employed and a little ore mined.

BRITISH-AMERICAN COPPER MNG. & SM. CO. B. C.

Office: 510 White Bldg., Seattle, Wash.

Incorporators: Arthur Bernstein, Norman Herman, Adam Beeler, J. J. Sullivan, and E. M. Kennard.

Inc. in 1917 in Washington. Cap., $2,000,000. Company planned to develop copper mines in British Columbia. No recent information.

BRITISH AMERICAN MNG. CO., LTD. **BRITISH COLUMBIA**

Office: Van Anda, Texada Island, B. C.

Officers: H. J. Peterson, pres.; E. E. Harnish, v. p.; O. L. Grondal, sec.; preceding officers, J. D. Smith, Geo. King, R. C. Payne and A. G. Byle, directors; L. M. Olson, treas.; John Minear, supt.

Inc. December 1906, in Arizona. **Cap.**, $1,000,000; $1 par; 591,000 outstanding.

Property: 3 patented claims on Texada Island, B. C., said to show copper, gold and silver ore in vein. Development is by 160' incline shaft.

Equipment: hoist, 3-drill air compressor. Company does not reply to letters. A prospect.

BRITISH CANADIAN SILVER CORP'N **BRITISH COLUMBIA**

Address. R. E. Bayliss, 19 St. Swithin Lane, London, E. C. 4, England.

Organized February, 1920, as operating subsidiary of Selukwe Gold Mng. & Finance Co., to develop properties in Stewart district, B. C.

BRITISH COLUMBIA COPPER CO., LTD. **BRITISH COLUMBIA**

Fully described in Vol. XII. See Canada Copper Corporation.

BRITISH COLUMBIA IRON CO., LTD. **BRITISH COLUMBIA**

Address: E. C. Wragge, Nelson, B. C.

Organized in summer of 1919, to develop 40 claims located about 3 miles W. of Kitchener.

Management states that the holdings show a large body of hematite, running from 60 to 75% iron, and that diamond drilling will be done to ascertain its commercial possibilities.

BRITISH COLUMBIA MANGANESE CO. **BRITISH COLUMBIA**

Operates a manganese property at Hill 60, 12 miles W. of Duncan. Reports shipments are made to the Tacoma smelter.

BRITISH COLUMBIA PHOENIX CO., LTD. **BRITISH COLUMBIA**

Described in Vol. XIII. Presumably dead.

BRITISH COLUMBIA SILVER MINES, LTD. **BRITISH COLUMBIA**

Address: O. B. Bush, Stewart, B. C.

Inc. in 1919.

Property: the Lake and O'Leary claims between the Premier and Bush mines and the Mountain claims between the Premier and International, a few miles north of Stewart.

BRITANNIA MNG. & SMELTING CO. **BRITISH COLUMBIA**

All stock acquired by the Howe Sound Co., which see.

BULLION MINING SYNDICATE **BRITISH COLUMBIA**

R. T. Ward, mgr., Bullion, B. C.

Property: over 1,200 acres, 600 held under a 25-year government lease, 600 acres Crown-granted, in Caribou district, Quesnel mining division. The property was formerly the largest hydraulic gold mine in British Columbia. It has been tied up by litigation for several years. The Quesnel Forks Gold Mines Co. was formed to take it over, but according to report the property has been awarded by the Courts to R. T. Ward. A large amount of money has been spent on the mine, and over $1,500,000 of gold has been extracted.

BUCKEYE MINES CO. **BRITISH COLUMBIA**

Office: Geo. C. Mercer, pres., Lodi, N. J.; W. C. Dalgliish, v. p.; F. Larkin, treas.; T. C. Larkin, sec., all of 291 Broadway, New York; J. J. H. G. Glennon, directors.

Inc. in Delaware. **Cap.**, $1,000,000; par $1.

Property: 67 acres in Ainsworth district, B. C., said to show several dred feet of the Highland silver-lead-zinc vein, worked by Cons. M. & S. Co. ugh its Highland mine.

Development: two 40′ shafts and 200′ tunnel. Company has spent 00 in development.

In 1918, stock of this company was being sold by Winslow Taylor & Co., and & Co., brokers, of Philadelphia. No recent information; probably idle.

LLOCK MINING CO. **BRITISH COLUMBIA**

Organized September, 1919, by Groves Bros., of Bullock, Lardeau mining sion, to develop a silver property near Bullock. Details of organization not lable.

RNIERE GOLD MINING CO. **BRITISH COLUMBIA**

Reported November, 1919, that this company, whose office is in Indianapolis, had acquired the Burniere and Nelson claims, 6 miles from Camborne, and iles from property of New Era Mining Co. The company was to start de- pment work and put up a mill.

3H MINE **BRITISH COLUMBIA**

See Premier Mining Co., Ltd.

3H MINES, LTD. **BRITISH COLUMBIA**

Address: O. B. Bush, pres. and H. Tanner, supt., Stewart, B. C.

Inc. in 1919.

Property: a group of claims just northeast of the Premier silver mine, h of Stewart. Encouraging conditions were reported late in 1919.

TE & ROCHER DE BOULE COPPER CO. BRITISH COLUMBIA

Idle. **Office:** 49 East Broadway, Butte, Mont. **Branch office:** Hazel- B. C.

Officers: Samuel McConnell, pres.; C. J. Stone, v. p.; J. W. McLane, treas., with Paul Ozanne and P. J. Jennings, directors.

Inc. 1912, in Arizona. **Cap.,** $1,000,000; $1 par; fully issued.

Property: the Highland Boy group adjoining, but 1,000′ above the ier de Boule mine and covering 400 acres on Juniper Basin, Rocher de e mountain, Omineca mining district, 3 miles from New Hazleton and 4 from the Grand Trunk railroad. Claims show the extension of the Rocher oule veins, 2 of which have been opened by tunnels and open cuts. Ore s in fissure veins following intrusive dikes of porphyry in granite. Sam- from veins 18″ to 5′ wide, assayed from 1.5% to 5.7% copper; with 0.5 to 0.8 ilver and slight gold values.

Property considered promising and worthy of further development.

IFORNIA MINING CO. **BRITISH COLUMBIA**

Officers: J. R. Cassin, pres., E. 416 9th St., Spokane, Wash.; W. R. orff, sec.-treas.; W. H. Turner, mgr.

Property: 5 claims, on Bird creek, near Nelson, B. C., shows a strong developed by tunnels; No. 3 tunnel, 1,200′ long, is 170′ vertically below No. 2, is 627′ long. Ore is said to average $17 gold per ton.

The Athabasca 10-stamp mill, leased to test the ore, was enlarged to 25-ton ity by adding a ball-mill, Senn table, and flotation unit. A recovery of 90% ected.

ADA COPPER CORPORATION, LTD. **BRITISH COLUMBIA**

Office: 42 Broadway, New York.

Officers: L. W. Mayer, pres.; A. J. Ronaghan, v. p.; with C. H. Burke, st Heckscher, Allen H. Rogers, C. I. Stralem, E. L. Gruver, New- Erb, Colgate Hoyt, directors. R. H. Eggleston, sec.-treas.; H. R. Wagenen, gen. mgr.; Allen H. Rogers, cons. engr.; and F. S. Norcross, , of mines, British Columbia.

March, 1914, in Virginia. **Cap.,** $10,000,000; $5 par; increased Au- 1917, from $5,000,000; outstanding 945,859 shares. Funded debt, sinking fund convertible gold 6s dated January 1, 1918, due January any time into stock at $3 a share. A sinking fund of 15c. than $150,000 shall be paid each year.

6% gold debentures issued October 1,

1919, subject to call at $105 and interest, and offered stockholders pre
par with a bonus of 100% par value of stock.

Equitable Trust Co., New York, transfer agent. Empire Trust Co.
York, registrar.

On March 20, 1917, company purchased the properties and assets of
British Columbia Copper Co., Ltd., the operating company, by exchange of
of its shares for two of the latter. In May, 1917, there was less than
the capital stock of the B. C. company outstanding.

Comparative Balance Sheet, years ending December 31:

Assets.	1918	1917
Properties	$6,059,323	$5
Equipment for future delivery at contract prices	258,920	
Metal & Smel. Products, Supplies, etc	346,054	
Copper on hand and in transit	106,309	
Insurance, taxes, etc	22,098	
Investments	211,539	
Bonds, 10-yr., due in 1918		1
Cash	542,966	
Profit and loss	229,864	
Total	$7,777,073	$7

Liabilities.	1918	1917
Capital stock	$4,729,295	$4
Bonds—10-yr., 6%	2,575,000	2
Liberty Bonds—deferred installments	45,361	
Equipment contracts	209,578	
Accounts payable	203,811	
Reserve for sundry Liab	14,028	
Total	$7,777,073	$7

From January 1, 1918, to November 26, 1918, operations of the old pro
resulted in a deficit of $19,574, compared with net earnings of $152,
previous year.

The company smelter at Greenwood, B. C., was permanently shu
November 26, 1918, owing to depletion of ore reserves, and low grade of re
ing ores. The Lone Star mine (Wash.), was also closed down, as its ore
for years mined for use as a flux for the B. C. ores. By itself it is too
pay mining costs. The Boundary creek properties are described in Vol. X

Copper Mountain Properties:

The company's future depends on the newer and larger holdings
acres of mineral and other land at or near Copper Mountain, British Co
9.5 miles due south of Princeton, British Columbia, and 182 miles by
of Vancouver. A 13-mile branch of the Kettle Valley R. R. connects Pri
and Copper Mountain.

Geology: Copper mountain consists of monzonite-porphyry and
diorite, intruded by a system of light-colored porphyry dikes.

The ore consists of primary chalcopyrite, bornite and pyrite finely
nated in the porphyry and granodiorite, carrying recoverable values in
silver. The ore is found at or close to the surface, but oxide minerals

Development: property has been developed in a systematic ma
a large amount of drilling and underground work. Over 11
diamond drilling, surface trenching, 18,000' of drifting, 15
raising, and 900' been done to block out ore. Ore is
through the 2,900 e tunnel. There is a difference in ele
800' between this next nea kings: a 2-compartm
way and a zigzag ting th

All ore thus far developed occurs above the level of the Similkameen River, ich passes along the base of Copper Mountain at an elevation of approximately 0'.

Ore reserves: estimated at 10,000,000 tons of developed ore and 2,000,- tons of probable ore, having an assay value of 1.74% copper, and approxi- ely 35c. per ton in gold and silver. Careful geological study suggests the sibility of eventually doubling the present tonnage of assured ore. Com- y in addition owns several other promising prospects in the locality.

The average grade of ore has been determined from bulk samples drawn n the underground workings, and these areas have been thoroughly checked by drill and groove sampling.

Treatment of ore: a 40-ton flotation test mill erected at the prop- has given very satisfactory results. Since there is a marked absence of dized material in the ores, a recovery of 90% of the copper is expected in ılar operations; actual savings very close to this figure on extended experi- ıtal runs have already been obtained. Concentrates assaying 25% copper e maintained with a concentration ratio of approximately 17 into 1.

For the purpose of estimating earnings, a recovery of 27.4 lb. of copper per of ore was assumed after allowing for a certain amount of dilution by te rock. As the wall rock is generally light colored dike material, the ore its of clean mining.

The cost of producing copper is estimated at 9½c. per lb. when operating a basis of 3,000 tons per day. Approximately one-half of the present ore rves will be extracted by open-cast mining methods, and all of the ore will lrawn from the mines by means of tunnels.

The millsite, called Allenby, is 9 miles from the mine and 4 miles from iceton. The mill, almost completed by end of 1919, being delayed for 4 ths by a labor strike, is rated at 2,000 tons per day. The ore as mined will through the ore-pass to pockets on the 3,170', or main haulage level, where trammed in 10-ton cars hauled by electric locomotives to the crushing t at the mouth of the tunnel. After crushing to 2½" it will go into 3,000- bins, then by railway cars to the mill bins.

Concentrates from the mill are to be smelted by the Consolidated M. & S. at Trail, and the converter copper refined electrolitically.

Power is furnished by the West Kootenay Power & Light Co., which con- :ted a 100-mile transmission-line under a contract to supply 5,000 h. p.

Production:

Year	Gold, Oz.	Silver, Oz.	Fine Copper, Lb.	Year	Gold, Oz.	Silver, Oz.	Fine Copper, Lb.
905....	26,226	95,416	5,601,309	1912....	25,863	142,025	11,146,811
906....	20,238	82,193	5,820,651	1913....	26,640	137,052	8,296,902
907....	24,967	101,114	8,643,133	1914*...	14,442	63,501	4,116,190
908....	13,597	58,204	5,567,355	1915....	5,417	23,002	1,734,385
909....	18,244	64,234	6,325,000	1916....	12,366	49,928	5,196,239
910....	24,962	84,180	7,143,456	1917....	9,592	46,356	4,247,316
911....	31,144	134,266	9,944,987	1918....	12,663	60,495	2,813,993

* January 1 to August 23.

The following estimates of future operations and earnings have been made e company's president: with the treatment of 1,000,000 tons of ore annually roduction is estimated at 27,400,000 lb. of copper. The yearly earnings hare, assuming 1,778,787 shares outstanding (which allows for the con- on of the $2,500,000 of bonds), would be as follows on various prices for r:

of Copper.....	15c	16c	17c	18c	20c
ated earnings.....$1,507,000		$1,781,000	$2,055,000	$2,329,000	$2,877,000
earnings per share	$0.85	$1.00	$1.15	$1.31	$1.62

will be seen from the foregoing that the estimated net operating profit 50 per ton of ore is based on 15c. copper, which on the developed and ble ore would represent a total net profit of $18,000,000 not allowing for

amortization. The estimated life of the property based on present ore reserves is 12 years. With the development work now in progress it is expected that the present ore reserves will be substantially increased.

CASSIAR CROWN COPPER CO. **BRITISH COLUMBIA**

Office: 601 Empire State Bldg., Spokane, Wash.

Officers: A. C. Mason, pres.; W. C. Miller, v. p.; J. V. Pohlman, sec.-treas.

Inc. in 1916. **Cap.,** increased from $1,000,000 to $1,500,000; $1 par, 268,000 shares in treasury.

Property: five 50-acre mineral claims on Grouse mountain, 18 miles S. E. of Telkwa and Aldermere, B. C., and 260 miles from Prince Rupert on Grand Trunk Pac. R. R., said to show zinc-copper-silver ore. Reported in December, 1918, that 11′ of ore had been cut at 100′ depth, assaying 21% zinc, 2% copper, and 5 oz. silver.

Development is mainly by tunnels, longest in over 750′. Mineralized area as indicated by surface workings is a sheeted zone 10 to 12′ wide. There are several shallow shafts and pits all showing more or less copper. Average assay of all ore exposed in workings is claimed to exceed 7% copper and $3 gold.

For geology see Canadian Geological Survey of Cassiar Crown group for 1915, by J. D. McKenzie.

COAST COPPER CO., LTD. **BRITISH COLUMBIA**

Head office: Trail, B. C.

Officers: J. J. Warren, pres., Toronto, Ont.; T. W. Bingay, sec.-treas., with S. G. Blaylock, W. M. Archibald, M. W. Bacon and W. E. Cullen, directors; W. M. Archibald, mgr.; Wm. Clancy, supt., Quatsino, B. C. Company is successor of Quatsino Copper Co. and is controlled by the Consolidated Mining & Smelting Co.

Inc. September 15, 1916, in British Columbia. **Cap.,** $1,000,000; $5 par. Operating expenses in 1917, reported as $48,600.

Property: at Elk mountain, near Elk lake, Quatsino mining division, Vancouver Island, B. C. Ore shoots carry argentiferous chalcopyrite in magnetite in fissures with dip of 40° that cut through diorite.

Development: 1,000′ tunnel, a 250′ winze and 1,000′ of underground workings to depth of 500′. Work in 1918 was on a level at bottom of the winze on which considerable amount of ore has been developed.

Equipment: 6x8′ single drum hoist, 300 cu. ft. compressor and water power.

COLONIAL GROUP **BRITISH COLUMBIA**

Address: A. D. Coplen, mgr., 2324 Allamont Blvd., Spokane, Wash.

Property: 1 claim, 43 acres, at Sandon, B. C., shows a fissure vein containing silver-lead-zinc. Developed by 700′ tunnel, with 1,000 tons of ore blocked out. A prospect.

CONNERAPPE MINES, LTD. **BRITISH COLUMBIA**

Address: Calgary, Canada. S. Chapin, gen. mgr. W. O. Young, sec. Mine opens a replacement deposit in limestone, the ore assaying about 15% lead, and 3 oz. silver per ton, with a small percentage of zinc. Property has been operated about 4 years, the output being concentrated in the Monarch mill. In 1918, 776 tons ore were shipped to the Trail smelter.

CONSOLIDATED M. & S. CO. OF CANADA, LTD.

Office: Room 1202, Canadian Pacific R. R. Bldg., Toronto.

Works office: Trail, B. C.

Officers: J. J. Warren, pres.; Geo. Sumner, v. p.; with Sir Edmund Osler, Chas. R. Hosmer, H. S. Osler, W. L. Matthews, J. C. Hodgson, and Hon. Joseph, and J. K. L. Ross, directors; J. Kitto, sec.

Operating officials: S. G. Blaylock, gen. mgr.; W. M. Archibald, mgr. of mines, and staff consisting of F. S. Peters at Rossland, F. G. [illegible] at Sullivan and St. Eugene; L. W. Oughtred at Michaud, [illegible] Gibson and the Ivy Fern groups; [illegible] R. M. Macaulay, at Emma; D. M[illegible] Coast Copper, and G. H. Kilburn [illegible]

M. E. Purcell, R. G. Mellin, J. K. Cram, and G. H. Kilburn); T. W. Bingay, iptroller; James Buchanan, smelter supt.; G. E. Murray, assistant; B. A. nmel, manager of zinc plant; F. E. Beasley, and J. J. Fingland, in charge of neries; R. W. Diamond, supt. of concentration and testing; G. F. Chapman, struction eng.; W. E. Jones, mechanical eng.; A. L. MacCallum, supt. of acid its; F. E. Lee, W. H. Hannay, H. R. Motherwell, research engrs.; G. Cruick-nk, F. S. Willis, H. Woodburn, R. G. S. Anthony, department superintendents inc plant; D. G. Bissett, chief chemist; R. K. Blois, supt. Cottrell plant.

Inc. January 1, 1906, in Canada as Canadian Consolidated Mines, Ltd. ., $15,000,000; $25 par; issued $10,477,450; increased from $5,500,000 in) to $7,500,000, and again in December, 1915, to present amount. Company's al year ends September 30. Annual meeting, third Tuesday in December. ed on Toronto and Montreal Exchanges. Transfer agents: Toronto Gen-Trusts Corporation, Toronto, and Royal Trust Co., Montreal.

Bonds: $3,000,000 7% debentures authorized December, 1918, and con-ible after January 1, 1924, into stock at par.

Cons. M. & S. controls the West Kootenay Power & Light Co., Ltd., a dend-payer that supplies electric current to mines in that region.

Financial Statement, years ending Sept. 30 to 1918, then Dec. 31:

Dividends: rate of 10% per year quarterly from May, 1906, to April, then 1¼% in November, 1907, 4% in October, 1912; 2% quarterly from 1913, to October, 1915; and 2½% quarterly from January, 1916, to March 920. Total, $6,567,211.

Property: company was formed to take over the following properties, by direct ownership, or by stock control; War Eagle Consolidated Mining evelopment Co., Ltd.; Centre Star Mining Co., St. Eugene Consolidated ng Co., The Rossland Power Co., and the Trail smelter, formerly operated e British Columbia Southern railroad. In 1907, the Iron Mask, Idaho and rprise mines at Rossland were purchased and the Phoenix Amalgamated er Mines, Ltd.; also the Keystone and Four Ace claims adjoining the nix, located at Phoenix, B. C. In 1910 the company acquired the La Plata, olly Gibson group, near Nelson, and the No. 7 group in the Boundary ct. In 1911, company purchased control of the Fort Steele Mining & ing Co., Ltd., owning [illegible] near Fort Steele; Le Mining Co. at R[illegible] Mines. In 1915,

company purchased the Monte Christo, Paul Boy, Eddie J. and the Iron Horse mines, all at Rossland, and acquired a controlling interest in the Silver King Mines, Ltd., at Nelson. Also the No. 1 and the Highland groups in Ainsworth. In 1913, the Deer Park, Grand Prize and Mabel in Rossland were taken over and the Ottawa mine near Slocan City purchased. Control was purchased of the Quatsino Copper Co., operating on Vancouver Island. Late in 1917 the company bought silicious flux properties in the Camp McKinney and Fairview districts, near Keremeos, B. C. The Voight copper mine near Princeton was acquired in 1918. To ensure a further supply of fluxing ore, the San Poil gold-silver mine at Republic, Wash., was bought in 1918 at a receiver's sale. The Blue Grouse copper mine on Cowichan lake was taken over in March, 1918, from the Gordon Bay Mines, Ltd., and was being drilled in 1919. In 1918 an option was taken on the Ivy Fern claims on W. side of Kootenay lake on which surface conditions indicate lead-silver ores in 2 veins. The Coast Copper Co. mine at Elk lake also owned by the company is opening fairly well. To ensure a cheaper supply of fluorspar, the Rock Candy claims on Kennedy creek were acquired in 1918, and a 100-ton mill erected. In January, 1920, the Sooke group on Vancouver Island were taken over. Over 1,000′ of crosscutting and 500′ of diamond-drilling has been done.

The *Le Roi-Centre Star* group, on the southern slope of Red mountain, Rossland, is still the principal property. At this place the country rock is a complex of effusive and fragmentary volcanics of the Paleozoic age intruded by an elongated mass of monzonite-porphyry. This monzonitic mass, with the adjacent rocks, has been intruded by a large number of nearly vertical dikes from a few feet to 250′ wide, with generally N.-S. trend, the dikes being basalt and occasionally slickensided, larger dikes cutting off the veins completely, with the more important orebodies occurring at the points of intersection, and having a series of faults, mainly parallel to the dikes. Ore occurs in shoots of 3 to 5′ width, and 50 to 600′ length, widening at intersection of veins with dikes. Ore is strongly auriferous and fairly argentiferous chalcopyrite, associated with pyrite and pyrrhotite with gangue of silicious altered country rock, ore ranging 0.5 to 2% copper, and $8 to $20, and occasionally up to $100 gold per ton. Pay shoots extend, in some cases, from wall to wall, and from local enrichments, the walls in some cases being very indistinct, and ore shading into the country rock. There are several veins, the more important being the Centre Star, Le Roi and War Eagle, on which the mines are opened, these being shear zones, carrying chalcopyrite disseminated mainly in pyrrhotite, with some pyrite and arseno-pyrite.

The Rossland group, which now has a total acreage of about 775 acres, includes the Le Roi, Centre Star, War Eagle and Iron Mask mines, which are practically one, all connected by drifts and crosscuts, with about 58 miles of workings. Mines are worked by overhand stoping, partly on the shrinkage system and partly timbered with square sets, cut from round timber. Electric haulage is used throughout, 13 electric locomotives hauling 2-ton side dumping cars to the underground ore pockets of the Centre Star shaft.

The Centre Star mine has a 2,200′ 68° inclined shaft, with 16 levels opened at intervals of 125 to 175′. The shaft is concreted from the 12th level to the bottom. The mine has 8 or 10 different orebodies, but ore comes principally from the Centre Star vein, averaging 0.6% copper, 0.3 oz. silver, $8 to $10 gold per ton.

In the Centre Star-War Eagle-Iron Mask group, ore is mined from the Centre Star veins, Main, North and South, as well as from the Iron Mask, War Eagle, Josie, Poorman and Mugwump veins.

The Le Roi group produces ore from the Le Roi main South, Intermediate, North Peyton and Hollywell veins.

Electric power for the complete operation ofthe mines is taken from the Bonnington Falls plant of the West Kootenay Power & Light Co., controlled by Cons. M. & S. Co., 35 miles distant, at 60,000 volts, stepped down at the mines to 2,000 volts for distribution and use. The compressor room has a 120-k.w. alternating current generator, driven by an alternating current motor, supplying current at 250 volts for electric motors on surface and underground, and for lighting. Air for drilling is furnished to all the mines through one system.

The mines are gold, rather than copper producers.

The **Richmond-Eureka** mine, at Sandon, has argentiferous lead and ores, developed by tunnels aggregating 1¼ miles in length. Ore is transed to bin on C. P. R. R. tracks at Sandon by 4,000′ aerial tram.

The **Sullivan mine**, at Kimberly, is a lead-zinc producer, whose ore rs in replacement deposit, in a fine grained argillaceous quartzite. Ore is a ture of fine-grained galena, zinc blende, and iron sulphide. The ore-shoot vs a maximum stope width of 125′. Developments principally by tunnels and s. Workings total 8 miles. A low-level tunnel, 2 miles long, equipped with ble standard-gage tracks, has been driven to open up this property, which ie of the most important zinc mines developed in North America for many s. The ore is complex, but experimental work has proven that it can be factorily milled. It will go to a 400-ton mill at company's smelter; the conrate being shipped to Trail, B. C., for treatment by the electrolytic process.

The **Molly Gibson** mine, bought 1910, formerly owned by Molly Gib- Mining Co., Ltd., and later by La Plata Mines, Ltd., has a regular fissure in granite containing highly argentiferous lead-zinc ore. Developed by over miles of tunnels. An aerial tram 2 miles long connects the mine and mill, e a second, five miles long, connects mill and loading bins, 5 miles from tenay lake. The mine is equipped with 100-ton mill, operated by water power, two air-compressors.

The **St. Eugene mine**, at Moyie, has produced over 1,000,000 tons of r-lead ore. The mine has about 20 miles of workings, is equipped with 0-ton mill, but considerable of its equipment has been dismantled. Now operated by a small force and shipments of crude ore are regularly made.

No. 1 Group, at Ainsworth, 400 acres, has a contact deposit between mite and a dark lime schist. The ore consists largely of oxides of iron, and lead in a silicious lime gangue. Principal value is in silver. Develop- by tunnel and winze, totals 1¼ miles. Equipment includes a 2-stage, 11x 8″ Jenckes air compressor, driven by belt from 150 h. p. 2,080-volt motor, r being supplied from a 350 k. w. generator at Highland Mill, Cedar creek, ′ distant; and an aerial tram, connecting mine ore bins with loading bins, on of Kootenay lake. Storage capacity at mine and lake bins is about 700 tons.

Highland Group, 240 acres, has a series of fissure veins. Ores are r-lead and development is by 3⅛ miles of tunnels. Equipment includes ll air compressor, driven by water power, and a single rope aerial tram ′ long, connecting mine ore bins with 150-ton mill at Kootenay lake. Power nill is from a 350 k. w. generator, driven by a Pelton wheel under a head 000′.

The Ottawa mine has a fissure vein in granite. Development by 2 of tunnels and winzes. Principal metal is silver, associated with copper, and zinc sulphides, some barite in gangue.

The Silver King mine on Toad mountain, back of Nelson, has mineral- fissure veins in granite, yielding high-grade silver-copper ores. De- ment by 4 miles of tunnels and winzes. Equipment includes single rope tram 4½ miles long, connecting ore bins at mine with shipping bins on R. R. tracks at Nelson.

Details of all the mines are too lengthy for insertion, but the following table summary of the facts concerning the principal properties.

Name	Class of ore	Development in 1918 feet	Total in miles	Drilling in 1918 feet	Production in 1918 tons	Production to date tons
War Eagle	gold, copper	4,274	40.98	4,833	42,298	2,060,441

Reduction works: the Trail smelter near the International boundary treats all kinds of ores and does an extensive custom business, which will be mainly smelting concentrate and refining copper from the Canada Copper Corporation at Princeton.

There are two sampling mills, equipped with crushers and Vezin samplers: No. 1 mill, for copper ores, of 200 tons hourly capacity; No. 2, for lead ores, of 100 tons hourly capacity.

The smelter has a calcining department, and blast-furnaces for copper and lead. All the copper ores are bedded and hauled from the beds (of 21,000 sq. ft.) by electric locomotives to the charge bins, and from these to the furnaces. Lead ores for the roasting department are delivered to beds by a system of belt conveyors and drawn from these beds by a conveyor over an electric scale to the roasters.

The calcining department consists of three 22½′ 7-deck Wedge roasters and five 26′ Godfrey furnaces. The roasted ore is sintered in 32 Huntington-Heberlein sintering pots and 3 Dwight-Lloyd sintering machines, fumes being passed through the Cottrell electric precipitator.

The 1,800-ton copper smelter has 4 blast furnaces, 2 of 35′ and 2 of 25′, taking a 32 oz. cold blast. Two 12′ Great Falls type converters are in operation making blister copper.

The 350-ton lead smelter has one 45x180″ and three 45x180″ blast furnaces with mechanical feed, reducing mainly calcined ores. Crude lead ores are roasted in seven 26′ Godfrey furnaces, which reduce the sulphur from the original ten. of 16% to 8%, and these calcines are re-roasted in fifteen 9′ Huntington-Heberlein sintering pots, yielding a product carrying only 4½% sulphur. The sintered ore, carrying 30 to 50% lead, is smelted in the blast-furnaces, each making 50 to 85 tons of lead bullion daily, with about 4% matte fall. This matte is roasted and again put through the blast-furnaces, and slags are granulated. Blast-furnace gases are passed through a Cottrell precipitator.

An electrolytic lead refinery, handles anodes cast from the silver-lead bullion. This plant, of 100 tons daily capacity, was the first electrolytic lead refinery ever built, and uses the Betts process. The lead is of exceptional purity, with an average assay of about 99.997%, which means that a short ton of lead carries only about 1 oz. of impurities, which is excellent work.

The silver refinery, taking silver sludge from the electrolytic lead tanks, has a water-jacketed reverberatory furnace for the production of dore bullion, and the necessary kettles, tanks, and bluestone plant for parting the precious metals with sulphuric acid; also furnaces for melting and casting the silver and gold bullion. The silver bullion is 999 fine and the gold bars are 995 fine.

The electrolytic copper refinery now handles 50 tons per day, having been enlarged in 1918 at a cost of $250,000. A wire-rod mill is also to be built costing $75,000.

Blast is supplied at 32 oz. for all furnaces, by one No. 9, and one No. 11, one No. 11, and one 400 cu. ft. Root blower, and one 200 cu. ft. Connersville blower.

An electrolytic zinc plant was erected in 1916. The process is similar to that used at Anaconda, Mont., but is the direct result of the operation of an experimental plant treating ore from the Sullivan mine and producing 1,000 lb. of zinc per day.

The plant contains two driers, three 18x5′ ball mills, thirteen 7-deck 22½′ Wedge roasters, a large leaching building, where the ores are leached by counter current continuous process in Pachuca tanks and thickened in Dorr thickeners, purified in Pachuca tanks, and filtered with Kelly and Oliver filters, electrolytic tank rooms, where the solutions are electrolyzed in concrete electrolytic tanks; thirteen 1,000 k. w. motor-generator sets; the necessary transformer plant to reduce the 60,000 volt current with which the plant is supplied; and a melting plant with two reverberatory furnaces for melting the cathode zinc.

U. S. Patent No. 1,320,805 [illegible] 4, 1919, was issued to R. H. Stewart, S. Blaylock, [illegible] Vaughan, [illegible] Batchelder, of this company, for [illegible]

emical extraction of zinc from ores or other zinc-containing material in which zinc has been made soluble by roasting, the process above.

The zinc concentrator, with daily capacity of 400 tons, is equipped with a 6x6′ ll mill, a standard 24″ 17-cell Minerals Separation flotation machine, concen- ting tables, filters, thickeners, and complementary appliances. This plant is be increased to 2,500 tons capacity. Briefly, the method consists in removing ittle of the heavy galena on tables, the middling is subjected to wet magnetic paration for removal of pyrrhotite, and finally to preferential flotation for paration of the blende from the galena. Concentrate from the mill goes to the ctrolytic plant described above.

Other accessories to the Trail smelter are copper and zinc-casting depart- nts, sulphuric-acid plant (2,879 tons in 1918), hydro-fluosilicic plant (196 tons 1918), and bluestone plant, all recently overhauled and in good order.

Power for the reduction works is electric throughout, and brought from nnington falls, on the Kootenay river.

The works have a central heating station and well-equipped machine, car- ter, boiler, and electric shops. The assay-office, which handles an unusual iety of work, in great detail, is exceptionally commodious and well equipped.

Production, including custom ores:

	Ore Smelted, tons.	Gold, oz.	Silver, oz.	Lead, lb.	Copper, lb.	Zinc, lb.

Company at present is the only one in the world producing electrolytically ned copper, gold, lead, silver, and zinc at one plant; also making sulphuric , hydrofluosilicic acid, bluestone, and manganese dioxide. Trail is a metal- rical center using the latest processes, not following recent practice, but a ler in devising new methods.

While Cons. M. & S. has many mines, its future apparently depends on the e ones described, especially the Sullivan mine.

Its custom business is important and will expand. The management is en- rising, competent, and eminently fair in its dealings with the companies that ore to its smelter.

PPER MOUNTAIN MG. & DEV. CO. **BRITISH COLUMBIA**

Office: 5406 Union Ave., South Tacoma, Wash. Mine near Quatsino, reported sold, 1917. Fully described Vol. XII.

RK-PROVINCE MINES, LTD. **BRITISH-COLUMBIA**

Office: Kaslo, B. C. Mine at Zwicky, B. C.

Officers: W. E. Zwicky, pres.-gen. mgr.; Henry Giegerich, v. p.; W. H. gess, sec.-treas., with I. B. Sherwood and R. E. M. Strickland, directors. sfer office: Kaslo. W. H. Burgess, registrar.

Inc. May, 1915, in British Columbia. **Cap.**, $1,000,000, 10c par, 8,500,- issued; increased July 17, 1919, to $1,250,000; shares $1 par. Bonds issued, 00. Net indebtedness at end of 1919 was $4,000.

Property: 13 claims, 9 crown granted, containing about 580 acres on S. Fork of Kaslo creek in the Slocan district. Company is a consolidation e Cork and Province groups.

The ore occurs in fissure veins in slate, which have a N. E.-S. W. course 68° dip. The shoots are 6′ to 30′ wide, containing silver-lead, and zinc ore.

Development: a 1,400′ crosscut tunnel, intersects the Black Fox and the Cork veins, at depth of 300′ and has 2,300′ of workings. The Black Fox vein cut at 700′ from the portal is 4′ to 6′ wide, but has no commercial ore at this point and will be explored. The Cork vein cut at 920′ is strong and wide and contains 4 productive ore shoots averaging 8′ wide for lengths of 50 to 325′. Ore reserves are said to be 10,000 tons.

Equipment: 100-ton concentrator, hydro-electric plant, sawmill, compressor and electric lighting system.

Production: mine yielded 1,206 tons previous to consolidation, and about 933 tons in 1915; 45 in 1916; 414 in 1917; 733 in 1918. Ore shipments averaged 35 oz. silver and 49% lead in 1918.

Operations were resumed in June, 1919, but suspended in October; 250 tons of lead concentrate, and some zinc was shipped. Management is optimistic for the future after re-financing.

DELLIE MINING & MILLING CO. BRITISH COLUMBIA

A reorganization, 1918, of the Silver Hoard Mining Co., described in Vol. XIII.

Officers: W. H. Carder, pres., Carder, Wash.; Dr. E. N. Northrop, v. p.; L. R. Hawley, sec.-treas., Spokane, Wash.

Inc. 1918, in Washington. In summer of 1919, company levied an assessment of 1c. per share in order to pay off its heavy indebtedness and resume operations.

Property: 5 claims, 202 acres, crown-granted, near Ainsworth, said to carry the same vein stoped in No. 1 mine of Cons. M. & S. Co., 2,400′ away. The vein is in limestone. Milling ore is said to assay 3% lead, 10% zinc, and 8 oz. silver per ton.

Development: 7,000′ of workings. Ore reserves are said to be 50,000 tons.

Equipment: includes hydro-electric power, compressor, hoist and 75-ton flotation plant which started operations in July, 1917.

Production: from 1911 to 1916, reported as 43 cars of ore, assaying 46.9 oz. silver, 4% lead, and 15% zinc, with net smelter returns of $32,000.

Mine was idle in 1916, but worked in 1917 by lessees (W. S. Hawley Co.).

DELTA COPPER CO. BRITISH COLUMBIA

Address: 703 Tegler Block, Edmonton, Alberta.

Property: 25 claims, including the Delta, Chicago, Highland Bay, Hazelton, and Dyke group of claims, in the Hazelton district, adjoining the Roche de Boule mine on the east.

DISCOVERY MINING & POWER CO. BRITISH COLUMBIA

Operates a placer property on Pine creek, Atlin mining division. Gold production for summer of 1919 was about $25,000. Said to be controlled by Fred H. Mobley, of Prince Rupert.

DOLLY VARDEN MINES CO. BRITISH COLUMBIA

Property near Alice Arm, taken over by Taylor Mining Co. (which see) in June, 1919, ending a protracted legal squabble that stopped development of this rich mine for a long time. The Taylor Mining Co. was organized by the Taylor Engineering Co., which met financial disaster when the D. V. M. Co. refused to make the payments due for constructing a railroad to the Dolly Varden mine. In December it was announced that the validity of legislation passed by the Provincial Government, whereby the Taylor Mining Co. became owner of the Dolly Varden, was to be contested in the Dominion courts.

DONOHUE MINES, LTD. BRITISH COLUMBIA

Address: F. M. Hawkes, Seattle, Wash., or James McKieran, Quilchena, Nicola district, B. C.; Jos. T. Knopp, supt.

Property: 8 claims, including the Tubal Cain, King William, and Joshua mines, near Stump lake, Nicola mining division. Ore contains copper, zinc, silver, and gold. Development has followed veins to 400′ in depth. Equipment: includes a 30-ton mill.

The Joshua mine, idle for 30 years, has recently been unwatered, and will start on the 300′ level.

RUM LUMMON MINES, LTD. **BRITISH COLUMBIA**

Address: 1115 Dominion Bldg., Vancouver, B. C.

Directors: T. Pearse, W. Paterson, J. M. Robertson, J. Broatch, Capt. mie, W. P. Sloan, and J. Maitland, all of Vancouver.

Property: 15 claims, at Tidewater, at Miskatlah bay, Douglas channel, fway between Kitimat and Hartley bay.

A shear zone 75′ wide with granite walls carries copper glance in quartz igue, the ore assaying 0.02 oz. gold, 3.2 oz. silver, and 5.26% copper.

Development: by 360′ crosscut tunnel, with depth of 200′.

Equipment: includes a 30-ton mill; heads average 5.9% copper and con- itrate assays 63.5% copper, 1.12 oz. gold, and 30 oz. silver.

JNDEE MINING CO. **BRITISH COLUMBIA**

Property: the Dundee mine, adjoining the Yankee Girl at Ymir. The perty is reported to have very favorable indications of a large tonnage of nmercial ore, having a tunnel 2,954′ long said to prove the ore to 1,100′ depth. thur Lakes, Jr., estimated 100,000 tons ore proven, with a gross value of 0,000, or $380,000 net.

Property has been idle, but work is planned for 1920.

HO SILVER-LEAD MINING CO. **BRITISH COLUMBIA**

Address: L. J. McAtee, sec.-treas., 104 8th St., Spokane, Wash., P. J. nner, supt., Silverton, B. C.

Inc. in Washington. **Cap.,** $150,000; par 10c.

Property: near Silverton, in Slocan mining district, adjoins Standard ver Lead property.

Development: by tunnels. Main ore shoot said to be 8′ in width. Late 1918, company is reported to have arranged for a lease of the Standard Silver id Co.'s mill during part of each month, and in May, 1919, the output was at rate of 4 carloads silver-lead concentrates, and 3 carloads zinc concentrates nthly.

EN-CRESCENT MINING CO. **BRITISH COLUMBIA**

Address: W. Y. Williams, mgr., Coffee Creek Landing, near Ains- rth, B. C.

Officers: A. L. White, pres.; W. J. Nicholls, v. p.; E. B. McBride, -treas., with W. Y. Williams, C. F. Caldwell and W. H. Button, directors, ast report.

Inc. January, 1917, in Washington. **Cap.,** $75,000; shares 5c par; 900,- issued. **Property:** 8 claims, on Kootenay lake, near Ainsworth, B. C.

Development: by 2 shallow shafts and 800′ tunnel. In September, 1917, osscut had opened 6′ of ore assaying 30% lead and 6 oz. silver per ton. Devel- ient was continued in 1918.

Prospects reported by management to be favorable.

FANJAY GOLD MINING CO. **BRITISH COLUMBIA**

Address: A. J. Grover, sec.-treas., Hyde Bldg., Spokane, Wash.

Officers: J. A. Irvine, pres.; J. L. Goodwin, v. p.

Company organized in 1916 to take over the Fawn group of claims, under d. Also leased a 4-stamp mill on adjoining Nugget claim.

The Fawn group is in Sheep Creek district, near Salmo, B. C., and is orted to show an orebody 14″ wide carrying from $21 to $65 gold per ton.

Development: by tunnel. No recent information, probably dead.

LIS SILVER MINING CO., LTD. **BRITISH COLUMBIA**

Office: 31 Wellington St., East Toronto, Ont.

Officers: in 1918.—P. W. Ellis, pres.; M. C. Ellis and R. V. Ellis, .'s.

Inc. in Ontario.

Property: the Eastmont group, about 60 acres, on Ten-mile creek, Slo- mining division. Said to show silver-lead ore, developed by tunnels on 4 In 1918, mine was under lease and bond to H. D. Lea & Co.

ANCIPATION MINING CO., LTD. **BRITISH COLUMBIA**

Office: 502 Credit Foncier Bldg., Vancouver. Wm. Thompson, mgr., B. C.

Inc. 1917 in B. C. **Cap.**, $120,000; par $1.

Property: 15 claims in Coquahalla valley, about 15 miles from Hope, said to show quartz veins.

Development: by tunnels; recent work has been on a narrow, and in places, rich vein, from which small shipments have been made for several years; those in 1918 totaled 18½ tons, yielding 457.5 oz. gold and 79 oz. silver.

ENGINEER MINES **BRITISH COLUMBIA**

Owned by Capt. James Alexander, who was lost in the S. S. Princess Sophia disaster, October, 1918. No information regarding present owners.

Claiming a 20% interest and alleging that the mine is to be sold for $3,000,000 W. P. Grant started suit in the B. C. Supreme Court against Gold Commissioner and Mining Recorder at Atlin, B. C.

Property: 11 claims, on east side of Taku arm, and 25 miles from Atlin, show quartz veins with native gold and tellurides, in shales and greywacke. Deposits range from simple veins a few inches in thickness to compound veins over 200′ thick. Two large central veins of the latter type are "hubs" from which several veins radiate. "Hub A" is 200′ wide and over 300′ long; "Hub B" is 270′ in width.

Development: includes a great number of open-cuts, and several tunnels driven on the most promising-looking veins. Surface work has exposed about 25 veins, up to 4′ in width, a few containing shoots and pockets of bonanza ore; two of these are especially rich—the boulder vein and the shaft vein. Greater part of work has been on vein "E" on which a 275′ shaft has been sunk, with four levels, totalling about 1,100′ of workings. All this work has been in ore. Waste is broken about 10′ ahead of ore, which is afterward taken down with as little shooting as possible, and sorted into 3 grades. The first grade, showing visible gold, is treated in a 5-foot ball mill; the record run of this mill was 2[illegible] oz. of gold from 160 lb. of ore.

A Minister of Mines report for 1918, states "there is every reason to believe that it can be developed into one of the greatest gold-producers on the Continent."

ENTERPRISE MINING, DEV., & POWER CO. **BRITISH COLUMBIA**

Officers: in 1918—Chas. A. Coffin, pres.-gen. mgr.; W. V. Garrett, v. p.; N. L. Jackson, sec.-treas., all of Spokane.

Inc. in Washington. **Cap.**, $250,000; par, 10c.

Property: 7 claims, 2 crown-granted, at Paulson, Trail Creek mining division, said to show three gold veins, two silver veins, and a large lead vein.

Development: by several tunnels, one 300′ long.

EUREKA COPPER MINES, LTD. **BRITISH COLUMBIA**

Address: Nelson, B. C.

Officers: J. J. Malone, pres.; J. G. Bunyan, sec.-treas.; with J. A. Erickson, L. K. Larson, and J. J. Bunyan, of Nelson, and S. G. Campbell, Vancouver, directors.

Property: acquired October, 1918, by Inland Mining Co., which is operating it under lease and bond, and has so far made two payments.

EVA MINING CO. **BRITISH COLUMBIA**

At last accounts, W. C. Bailey, sec., Nelson, B. C.

Inc. in British Columbia. **Cap.**, $1,500,000; par $1.

Property: at Camborne, on Poole creek, Lardeau mining district. Although the mine is one of the most extensively developed properties in the district, it has been idle for several years. Developed by over 5,500′ of workings, with 200,000 tons of ore blocked out; the 30,500 tons already milled showed a gross value of $5.69 per ton.

Equipment: includes a 10-stamp mill and a compressor.

EXPANSION GOLD MINING & MILLING CO. **BRITISH COLUMBIA**

Officers: in 1918—Ed. Richter, pres., Keremeos, B. C.; R. G. [illegible], sec., Bridesville, B. C.

Inc. in British Columbia. **Cap.**, $1,000,000; par $1.

Property: 2 claims, 90 acres, at Camp McKinney, Osoyoos mining [illegible]

ision, said to show gold-silver ore, assaying $4-$5 per ton in three veins, 5′ ide and traceable for 600′.

Development: by 400′ tunnel and several shallow shafts.

'ALLS CREEK COPPER MINING CO. BRITISH COLUMBIA

Officers: in 1918: L. H. Snyder, pres.; R. H. Finley, sec., 63 Ziegler ldg., Spokane, Wash.

Inc. in Washington. **Cap.**, $1,500,000; par $1; assessable.

Property: 6 claims, 2 crown granted, 300 acres, 8 miles from Nelson, id to show 2½% copper ore. Has a 1,500′ tunnel, reaching a depth of 500′.

'ERGUSON MINES CO., LTD. BRITISH COLUMBIA

Controlled by Geo. Alexander, of London, Eng., represented by Jas. Ander- n, Kaslo, B. C. Company is in hands of receiver and mine leased for company's ccount.

Property: the Ajax, Nettie L., and Silver Cup groups in Trout Lake ining division, with over 2 miles of workings. Considerable ore was shipped 5 to 20 years ago; 550 tons ore shipped in 1912, assaying 40 oz. silver and 60% ad.

IFE MINES, LTD. BRITISH COLUMBIA

Address: Rossland, B. C. Chas. Dempster, gen. mgr.

Property: the Hattie Brown claim at Rossland and the Dykehead, Ben ur, Three Bells, and Fife claims at Fife, near Christina lake, 12 miles E. of rand Forks, Boundary district, B. C. Claims show a vein up to 30′ in width, rrying about 6′ of smelting ore, with balance of concentrating grade, developed a glory hole, an 80′ shaft and a main tunnel having a 235′ winze.

Ore: contains chalcopyrite, carrying gold and silver values, claimed average 3 to 6% copper and $4 to $8 gold per ton.

Equipment: includes necessary mine buildings and a 5-drill air com- essor. Property considered promising. Idle.

IRE VALLEY GOLD MINING CO. BRITISH COLUMBIA

Office (in 1918)—404 Brokerage Bldg., St. Paul, Minn.

Officers: H. G. MacRae, pres.; C. P. Nash, v. p.-treas.; with Geo. R. ocum, Geo. W. Markham, all of St. Paul; A. O. Cochrane, sec., Vernon, B. C.; d C. A. Carnes, Chicago, Ill.

Inc. in British Columbia. **Cap.**, $1,000,000; par $1.

Property: 3 crown-granted claims, 135 acres, 47 miles E. of Vernon, id to show gold-silver ore assaying about $7 per ton.

Development: 1,700′ of workings. Idle.

ISHER MAIDEN MINING CO. BRITISH COLUMBIA

Officers: J. L. Prickett, pres.; Wm. Huntley, v. p.; H. S. Stoolfire, sec.- as., Sherwood Bldg., Spokane, Wash., with John O'Connor, directors.

Cap., 1,500,000 shares, 10c par; 1,000,000 issued.

Property: the Fisher Maiden group, 7 miles from Silverton, Slocan dis- ct, B. C., reported sold to Barney Crilley and J. J. Malone, on a 3-year bond d lease, 1917. Claims said to carry silver, lead, and zinc.

No recent information, probably idle.

.ORENCE SILVER MINING CO., LTD. BRITISH COLUMBIA

Offices: Hutton Bldg., Spokane, Wash., and Ainsworth, B. C.

Officers: F. R. Wolfle, pres. and gen. mgr.; A. F. Kelly, v. p.; D. E. nders, sec.-treas., with J. A. Lavender, J. H. Noble, and J. E. Blazier, directors. H. Hewer, gen. supt.; J. H. Noble, mill supt.

Inc. July 1, 1911, in Washington, and in November, 1917, in British lumbia. **Cap.**, $1,250,000; $1,175,000 outstanding; $1 par. Stock trans- red at company office, Spokane. Annual meeting, May 15.

Dividends: in March, 1919, initial dividend of $17,650, 1½c a share, in rd a second dividend was paid; later payments to be made quarterly.

Property: 8 claims, crown granted, 370 acres, 3 miles N. of Ainsworth. ims on the west side of Lake Kootenay, extend west from shore about 2 miles.

Ore: lead, zinc and silver in E. W. fissure veins in quartzite and slate. ree ore-shoots have been developed, one said to have over 400′ of commercial

ore. Milling ore said to contain 10 to 20% lead, 8 to 15% zinc, and 6 oz. silver per ton.

Development: the main working tunnel (N.-S.) is 3,600' long. It is connected by raises with No. 2 tunnel, 360' above; the latter is 2,400' long and has over 10,000' of workings at average depth of 700'. No. 3 and 4 levels have about 700' of workings. Company states that it has 600,000 tons of ore blocked out that averages 14% lead, 10% zinc, and 4 oz. silver.

Equipment: includes 250-h. p. compressor, 350-h. p. hydro-electric plant and 1,800' aerial tram from No. 3 tunnel to the mill. The 300-ton concentrating mill on the shore of Kootenay lake was completed May 1, 1917. Water power is developed at Woodberry creek, under 350' head. Total cost of improvements to January 1, 1919, is $225,000. A 500' surface tram runs from tunnel portal to terminus of an 1,800' aerial tram that runs to the mill. A 40-h. p. gasoline motor hauls ore in 10 car trains.

Production: 1,850 tons of concentrate in 1919, valued at about $70 per ton net at smelter.

FORTY-NINE MINING CO., LTD. (THE) BRITISH COLUMBIA

A subsidiary of the Alaska-British Columbia Metals Co., which see.

Offices: 701 Rogers Bldg., Vancouver, B. C., and 1 Wall St., New York.

Officers: S. I. Silverman, pres.; H. B. Price, v. p., 227 Pemberton Block, Victoria, B. C.; Silas P. Silverman, sec.-treas., 701 Rogers Bldg., Vancouver, B. C., with C. F. Caldwell and O. B. Bush, directors.

Inc. 1918, in British Columbia. **Cap.**, $1,500,000; par $1; outstanding 1,100,000 shares. Registrar and transfer agents, U. S. Corporation Co., New York City. Listed on New York Curb. Sales $5 high, $1 low, 1919.

Property: 5 claims and 2 fractions, 200 acres, on W. slope of Mt. Dilworth, in Salmon River district, 20 miles N. E. of Stewart, B. C., or Hyder, Alaska. There are 2 parallel veins, the larger of which is 40' wide and exposed for 700' in length. The second vein, 50' from the other is 8' wide.

Development: on the Forty-Nine claim there is 20' of ore in the croppings of the vein, averaging $40 per ton in silver and gold. One 12" streak assayed 987 oz. silver and 1 oz. gold per ton. A moiled sample in a 20' trench averaged 50 oz. silver per ton. A tunnel is being driven on this shoot at depth of 100'. In January, 1920, width and value persisted for 25', also in a raise above the tunnel.

On the Occidental claim there is a 10' vein of high grade ore. The tunnel is in 25', and ore has been averaging $100 per ton. In February, 1920, 2' of ore assayed $400 per ton in silver and gold, the remainder $100 per ton.

On the Dumas claim there is said to be a large showing of high-grade ore. 1' of the same averaging 300 oz. silver and ½ oz. gold per ton.

On the Yellowstone fraction claim, an opencut has struck high grade ore, some of it running from $200 to $300 per ton in silver.

On the Chicago claim an orebody from 100 to 200' in width, of milling grade, has been opened. This orebody is said to be the largest in the district.

GALENA MINING & MILLING CO. BRITISH COLUMBIA

Company was formed to take over the Galena Farm silver-lead-zinc mine in the Silverton district, B. C. The estate of the late Patrick Clark of Salt Lake City holds 75% of the stock, and the A. W. McCune interests of Salt Lake City the remainder. P. W. Clark is manager, and A. King in charge of the mine.

Development: exploration has been kept well ahead of milling operations, the last orebody opened up said to be 11 to 14' wide, as disclosed in raises 100' apart on the intermediate level. Ore said to be worth about $20 a ton.

Equipment: includes a 100-ton concentrator, erected early in 1917. Daily output of concentrate is 35 tons. Additional tables and flotation machines installed during 1917 raised the capacity to 150 tons of ore daily. Recovery is 90% lead on tables and 80% zinc by flotation. Rolls and Huntington mill do the crushing.

GENERAL MINING, MILLING & LEASING CO.

Officers: W. H. [illegible], Hyde Bldg., Spokane, Wash.

Kelly, sec.: Chas. V. Bobb, mgr., with W. T. McCurry, directors, at last counts.

Has a lease on the Lucky Strike and Wisconsin mines, on a tributary of idge Creek, 7 miles W. of Kootenay landing, said to show a 30' vein in Nelson anite, traceable for 3,000'. Ore in pits along vein reported to assay $25 to $40 ld and 3 to 7 oz. silver per ton.

Development: 2 tunnels claimed to open up ore valued at $1,000,000, ich is doubtful. No recent information; probably idle.

EORGIA RIVER MINING CO., LTD. **BRITISH COLUMBIA**

C. H. Dickie, Duncan, B. C., chief owner.

Cap., $25,000; par $25.

Property: 8 claims on George River, 20 miles from Stewart, shows free lling gold ore, worked during the summer of 1918; but a mill is needed to at the ore before property can make a profit.

BSON MINING CO. **BRITISH COLUMBIA**

Officers: D. K. May, pres., Rookery Bldg., Spokane, Wash.; Robt. inning, v. p.; E. H. Latham, sec.-treas., Kaslo, B. C., with Jos. Daschbach, and E. Archer, directors.

Cap., $2,000,000; par $1; outstanding July 1, 1919; 1,421,963 shares issued.

Annual report, year ended July 1, 1919, shows: receipts from stock sales, 2.152; from ore sales, $803; accounts payable, $16,930; total expenditures, 12,092.

Property: 12 miles W. of Kaslo, has silver-lead-zinc ore. Several hun-ed feet of tunnelling was done about 20 years ago by former owners. In 18, as much more underground work was done and company installed water wer equipment and a compressor. Mine idle in 1919, though some milling has been found.

The title is in litigation, as J. M. Wolbert and J. Chassy of Spokane claim alf interest in the mine.

ACIER CREEK MINING CO., LTD. **BRITISH COLUMBIA**

Officers: in 1918, R. T. Elliott, pres.; R. M. Stewart, v. p.; with H. ckle, H. A. Munn, and J. A. Mora, directors, all of Victoria, B. C.

Inc. in British Columbia. **Cap.**, $500,000; par 50c.

Property: 7 claims, crown-granted, 250 acres, on N. bank of Glacier ek, in Portland Canal mining division, said to show a vein 4 to 10' wide with d ore.

Development: by tunnels, with several hundred feet of workings.

)LD CURE MINING CO. **BRITISH COLUMBIA**

Officers: Chas. F. Caldwell, pres., Kaslo, B. C.; J. F. Blake, v. p.; Clar-e Marsh, sec.-treas., 314 Dalton St., Spokane, Wash., with A. G. Copeland, ectors.

Inc. in 1917, in British Columbia.

Property: 7 claims on south fork of Kaslo creek, Slocan, said to show eral veins of silver-lead ore from which high grade ore was shipped in the ly days.

Development: by tunnels. Reported that operations were resumed July 1919.

LDEN CANYON GOLD & SILVER MNG. CO., LTD. **B. C.**

Officers: W. J. McMillan, pres.; Peter Hamilton, v. p.; with R. J. Mc-llan, all of Vancouver.

Property: in Slocan region, said to show ore assaying as high as 60% inmmy.

Development: several hundred feet of tunnels. Shipments total 100 recent information; probably idle.

WONDER GROUP **BRITISH COLUMBIA**

W. S. Harris and Dennis Comeau of Hazleton and operated W. Sutherland, 1917.

ns on Rocher de Boule Mt., about 1 mile from Hazel-veins of chalcopyrite ore assaying 8% copper. No recent

GORDON BAY MINES, LTD. **BRITISH COLUMBIA**

Address: Consolidated Mining & Smelting Co., Trail, B. C.

Property: on Cowichan lake, is being operated by Cons. M. & S. Co. Some 4 to 5% ore was mined in 1918, and diamond-drilling was being done at last accounts.

GRANBY CONS. M. S. & P. CO. **BRITISH COLUMBIA**

Offices: 718 Granville St., Vancouver, B. C., and 52 Broadway, New York. Mines at Phoenix and Hidden Creek, B. C., and Valdez, Alaska; and other places in B. C. and Alaska. Smelters at Grand Forks and Anyox, B. C.

Officers: W. H. Nichols, pres.; E. P. Earle, W. H. Robinson, Edw. Thorne and F. M. Sylvester (mg. dir.), v. p.'s.; Henry Bruere, B. Hochschild, W. A. Paine, J. B. P. Herreshoff, S. H. Steele, and Chas. Hayden, directors; Edward Everett, sec.; H. Harvey, asst. sec.; G. W. Wooster, treas.; H. T. Mahan, asst. sec.; O. B. Smith, supt. of mines; C. M. Campbell, supt. at Phoenix mines; E. E. Campbell, supt. at Anyox mine; W. A. Williams, supt. at smelters; A. J. Bone, supt. Anyox smelter.

Inc. March 29, 1901, by special act of the British Columbia Parliament. Cap., originally $15,000,000; shares $10 par; changed, 1906, to $100 par; increased to $20,000,000 in February, 1914, to provide for conversion of bonds. $15,000,420 outstanding. **Bonds:** authorized February 25, 1913, $5,000,000, first mortgage, 6%, 15-year, convertible at par; June 30, 1919, $1,799,800; series A, of which $931,900 are stamped bonds; dated May 1, 1913. Series A bonds are convertible until May 1, 1923, at holders' option, into stock at par with cash adjustment of accrued interest and current dividend. Bonds of general issue redeemable at 105 plus interest after 10 years, 4% to be retired by purchase at $110, annually.

Capital increased to $25,000,000 in February, 1920; also bonds increased by $2,500,000, 8%, underwritten by Hayden, Stone & Co. Capital expenditures during the past 2 years approximate $11,500,000. Shares listed on Boston Stock Exchange.

Boston Safe Deposit & Trust Co., and Lincoln Trust Co., New York, registrars; American Trust Co., Boston, and Title Guarantee & Trust Co., New York, transfer agents; registrar of bonds, Title Guarantee & Trust Co., New York, trustee of bonds, Columbia Trust Co., New York. Annual meeting, first Tuesday in October.

Company was organized to purchase the property and assets of the Old Ironsides Mining Co., Knob Hill Gold Mining Co., Ltd., Gray Eagle Gold Mining Co., Ltd., Granby Consolidated Mining & Smelting Co., Ltd., and the Grand Forks Water & Light Co., at an aggregate cost of $12,097,030. Stock to the amount of $1,402,970 was issued for cash and services rendered.

Comparative General Balance Sheet, years ending June 30:

Property: includes original Granby group at Phoenix in the Boundary ıtrict, B. C.; the Hidden Creek mine on Granby bay, Observatory inlet, B. C.; ıpper Key and Belcher groups at Belcher mountain, Wash.; the Oversight ıup; the Bonanza Creek mine; 30 quartz claims on Granby Peninsula; Mamie d Dean mines on the Kasaan Peninsula; the Midas mine at Valdez, and the mine adjoining the Dean on Prince of Wales island.

Company has carried on exploratory work for 2 years on a property on the stall river where results are said to be satisfactory. Also owns a large interest a coal mine and coking plant at Crows Nest Pass, and a 100,000-h. p. waterwer plant at Kettle Falls. The smelter at Grand Forks, operated since 1901, ıs closed down June 20, 1919. Company also owns the Cassidy coal mine of er 800 acres at Nanaimo, on Vancouver island, 70 miles N. of Victoria.

The Phoenix Mines.

The Granby or Knob Hill properties at Phoenix, B. C., 43 claims and fracns, 1,050 acres. The property had 2 distinct sets of orebodies. The largest d longest worked were those of the Knob Hill-Ironsides mines; the other one, e-half mile east, was the Gold Drop. Mining operations were stopped June 14, 19. though the mines still show 2,513,636 tons of low-grade ore, of which ıount about 500,000 tons is available. The geology and development are ıcribed in Vol. XIII.

During 1918 shipments from all sources totaled 310,943 tons. Mining, ıshing, and loading Victoria ore was $1.25, and development 33c. per ton. covery reported from the smelter for Phoenix ore amounted to 19.58 lb. cop-, 0.239 oz. silver, and 0.447 oz. gold per ton, the best recovery obtained since)9.

Mining operations ceased at these mines on June 14, 1919. The shutdown ich was rapidly approaching on account of exhaustion of orebodies was hased somewhat by a shortage of coke, due to labor trouble at the local mines.

Grand Forks Smelter: blown out, June 20, 1919. Plant is described in l. XIII; mines and smelter in B. C. are well described in "Min. & Sci. Press" February 24, 1917. During the year tonnage treated in the Grand Forks elter totaled 313,133 tons of Granby ore, 7,200 tons of foreign ore, 16,168 tons converter slag and matte, and 187 tons of flue dust.

Hidden Creek or Anyox Mines.

Address: E. E. Campbell, supt., Hidden Creek, B. C.

The Hidden Creek mine is located on Granby (formerly Goose) bay, Obvatory inlet, south of and parallel to Portland canal. It is probably the largest ıper mine of British Columbia. The 9 claims cover the top and sides of a 920' high, enclosed by 2 branches of Hidden creek and 2 miles from Anyox, smelter site and seaport town of the company.

Geology: the ore occurs as a mass of solid sulphides, pyrite and chalpyrite, or mixed with country rock in shear zones, in crushed and schistose ıllite. The rocks are folded and mashed but are part of the cover of the

great granite mass forming the Coast range. There are 2 deposits, one 25 to 40′ wide, traced 1,400′ said to average 6%, the other estimated to be 100′ wide and of unknown length. Development by diamond drill holes shows the ore to extend 300′ below sea-level, a vertical distance of 1,250′ below outcrop.

Development: by tunnels, with principal workings on the 750′ crosscut main tunnel, which is about 450′ from the surface. New work for the last year totaled 3,185′ at a cost of $26.16 per foot, making a total of 34,000′. Diamond-drilling amounted to 11,972′ at a cost of $2.71 per foot; total drilling amounts to 99,152 feet.

Cost of ore delivered on cars was $1.38 per ton, an increase of 18.2 cents. The mine was operated 312 days, with an average number of 243 men, and produced 683,889 tons of ore, a decrease of 205,719 tons from the previous year. Average grade mined was 1.88% copper, compared with 2.14% in 1918, and 2.08% in 1917. During the year, new ore amounting to 1,321,250 tons was added to reserves.

Anyox Smelter: this is the company's headquarters and chief plant. There are 4 furnaces, 52″ wide and 30′ long, making it the largest pyritic smelter in the world, as it treats from 2,000 to 2,500 tons daily. Company has laid out a town, installed water works, electric plant, graded streets, built stores, hospitals, etc. To supply fuel for the smelter, coal is brought from Vancouver Island and made into coke at Anyox, in a plant completed in 1919. By-products are saved. The works were described in "The Canadian Mining Journal" of November 15, 1919.

Company also owns the Bonanza group, adjacent to the Hidden Creek mine. The original estimate of ore reserves (including Bonanza) was 14,516,700 tons. June 30, 1919, the reserve was 11,222,702 tons, averaging 2.24% copper. The low grade ore, averaging 0.65% copper, amounts to 11,504,850 tons (including Bonanza), most of it, amenable to flotation concentration.

Alaskan Mines.

The Midas mine at Valdez, shipped 3,459 tons during early part of 1918 and was then closed, owing to cost of transportation. The year previous 25,350 tons were shipped, assaying 3.24% copper, 0.476 oz. gold, and 0.32 oz. silver. Ore reserves amount to about 136,000 tons, grade not given.

The Mamie mine was closed in July, 1918, as the compressor house was burned down. Very little, if any, ore of commercial value remains in the mine. The year previous 3,102 tons ore of 1.90% copper was shipped.

The It mine shipped 1,560 tons of ore during first half of 1918 and then was abandoned after doing considerable development. The year previous there was shipped 11,776 tons ore of 4.89% copper.

Production: for years ending June 30, except 1916, which is for nine months ending March 31:

	Ore Tons (a)	Cost M'ng	Per ton Sm.	Total	Lb. Cu. per ton	Copper lb.	Silver	Gold, Oz.	Cost (b) cents

Custom ore is not included in the figures for 1917, 1918 or 1919.
(a) In 1916 custom ore amounted to 1½% of total ore treated.
(b) After crediting gold and silver. (c) Estimated.
(d) July to December, inclusive.

The Anyox mines in 1919 yielded 11,100 oz. gold, 425,111 oz. silver, and 20,000,000 lb. copper from 655,427 tons of ore.

Reserves: present ore reserves exceed 11,000,000 tons developed and 10,000,000 tons probable ore.

Granby is a strong and well managed company, but its large construction expenses have used up its surplus, hampering its expansion. New financing in 1920 includes $5[illegible] of convertible debentures. Expenditures on the [illegible]

al mine, coke plant, and smelter recently amounted to about $5,000,000, financed ɔm treasury and temporary loans.

REAT OHIO COPPER MINE **BRITISH COLUMBIA**

Sargent & Munro, owners, New Hazleton, B. C.

Property: adjoins the Butte Rocher de Boule mine and is operated by ıings and Trimble, under lease and bond. A well defined fissure vein in ınodorite, traceable at surface for 700', carries an orebody 4' wide, giving ıays of 22.5% lead, 9.5% copper, 134 oz. silver, 8.6% zinc and 0.04 oz. gold.

Developed by 355' tunnel, open cuts and drifts. Ore occurence and ıditions are similar to those in the Rocher de Boule, but further development :essary to determine value of mine. No recent information.

REAT LAKE MINING & MILLING CO. **BRITISH COLUMBIA**

Owns a property on Thurlow Island, which was reported November, 1919, ler lease to the Ladysmith Smelting Corporation.

IBBELL ISLAND COPPER CO. **BRITISH COLUMBIA**

Office: 203 First National Bank Bldg., Bellingham, Wash. Mine at bbell Island, Skeena River division, Cassiar district, B. C. Idle since 1906, ing to lack of funds. Fully described, Vol. XI, Copper Handbook.

DLEY GOLD MINING CO., LTD. **BRITISH COLUMBIA**

A Canadian re-incorporation, 1918, of the Hedley Gold Mng. Co.

Offices: 42 Broadway, New York; and Hedley, B. C.

Officers: I. L. Merrill, pres.; W. B. Dickson, v. p.; J. D. Clarke, sec.-ıs., with W. D. Thornton, E. C. Congdon, G. E. Tener, G. P. Jones, Veryl :ston, Marcus Daly, and W. E. Corey, directors. W. S. Harper, asst. sec.-ıs.; G. P. Jones, gen. supt., Hedley, B. C.

Inc. 1913, in British Columbia, as successor to the Yale Mining Co. ɔ., $2,400,000; shares $10 par; all issued. Guaranty Trust Co., New York, ısfer agent; Mechanics & Metals Nat. Bank, New York, registrar. Annual :ting, second Wednesday in April, at Hedley, B. C. Listed on New York :b.

In September, 1919, quarterly dividend was passed to conserve surplus for development.

Property: the Nickel Plate and Sunnyside mines, 31 claims, crown-granted, and a mill site, 1,370 acres in all, on Nickel Plate Mountain, and in Similkameen Valley, Osoyoos mining division, Boundary district, Hedley, B. C. Also owns the Copper Flat property near Silver City, N. M.

Geology: the Hedley ore deposits are of contact metamphoric origin, and occur at contact of dikes and sheets of gabbro in altered limestones; they are irregular in outline, usually have a well-defined boundary on the side of the gabbro, and dip about 24°. Ore occurs in shoots. Nickel Plate shoot is 15' wide, 40' thick, and 1,500' long. Principal ore mineral is arsenopyrite, with which occurs chalcopyrite, pyrrhotite, sphalerite, pyrite, gold and sometimes tetradymite; the valuable content of the ore is gold alone. In the association of gold with arsenopyrite in deposits of this origin the Nickel Plate ore deposits are unique and have no known counterpart in North America, excepting perhaps the White Caps at Manhattan, Nevada.

Development: 2 tunnels, 900' and 1,160' long and a 35° incline shaft 970' deep. Greatest depth of workings are at 5,200' elevation, 670' below the outcrop. Company plans sinking to 1,000' level. Shrinkage stoping is used, and no timbering required. New work in 1918 totaled 490', compared with 1,03[illegible] in 1917, in addition to 3,766' of diamond-drilling.

Reserves: Jan. 1, 1919, were 263,000 tons of $9.40 ore, 87,650 tons of $[illegible] ore. The 900' level has the highest grade ore, and which is said to extend lower so that deeper development will give increased reserves. On account of low prices the mill was closed during winter (1919-'20); and development work only carried on.

Ore is transported from the mines to the mill at Hedley by means of electric and gravity tramways. The former is 1 mile long, while the 45° gravity tram is 10,000' long, with a 4,000' drop.

Equipment: includes an air hoist, two compressors, each of 2,000 cu. ft. capacity and driven by 440 h. p. motors; also a 200-ton 40-stamp mill equipped with 24 Frue vanners and 12 Deister tables.

Electric power supplied by company's hydro-electric plant on the Similkameen river, with 2,100 h. p. twin turbines. Powerhouse has a 1,250 k. v. a. alternating current generator. Total cost of plant, $192,009, charged to capital account.

Recent production:	Ore Tons	Ave. Assay	Gold Rec.
1919	60,000	$8.00	$497,000*
1918	67,313	10.34	690,711*
1917	71,207	11.29	737,840*
1916	73,491	10.65	711,997
1915	74,625	11.65	796,592
1914	78,494	10.80	797,340
1913	70,796	12.03	802,330
1912	70,455	11.19	748,133

* Including sale of arsenic to Tacoma Smelting Co., recovered in concentrates.

Conditions in the lower levels of the mine have changed considerably in the past four years. While the orebodies are larger and stronger and of practically the same grade, the specific gravity has increased due to an increase in arsenopyrite, which adds to the cost per ton of ore milled. Concentrate tonnage rose from 3,831 tons in 1913 to 6,218 tons in 1915, and to offset this increase in costs the company installed a cyanide plant. War conditions during 1918 prevented extensive development and not enough new ore was opened to maintain the amount milled. The president says, "The mine still looks fairly well and when prices for labor and supplies come down to near pre-war-time levels, as we expect to earn a fair rate of interest on our stock; with more development we can get the mine back into better shape." Hedley is a good [illegible]

ERCULES MINING CO. **BRITISH COLUMBIA**

Idle. Nearest P. O.: Jedway, Queen Charlotte island, B. C. Claims are ar the Ikeda mine, on Moresby island. Apparently has little or no development.

EWITT-LORNA DOONE MINES **BRITISH COLUMBIA**

Operated by Clarence Cunningham, Sandon, B. C., under lease and bond om Silver Tip Mining & Power Co.

Property: 12 crown-granted claims, 1,200 acres timber, and a 125-ton tation mill, located at Silverton, in Slocan mining district. Ore is lead-zinc.

Development: by tunnels to depth of 1,200′; lowest level, No. 8, pro- les most of output.

Production in 1918, reported as 19,400 tons ore, grade not given.

IGHLAND VALLEY MINING & DEVELOPMENT CO. **B. C.**

Office: 610 Hutton Block, Spokane, Wash. **Mine address:** Ashcroft, itish Columbia.

Officers: Frederic Keffer, pres. and gen. mgr.; Sigmund Dilsheimer, v. Chas. G. Hall, sec.-treas., with H. C. Haas, Jos. McCarthy, C. L. Baker, S. S. Clintock, and E. H. Knight, directors.

Inc. 1915, in Washington. **Cap.,** $1,500,000; shares $1 par, non-assess- e; 1,219,712 outstanding. Bonds outstanding, March, 1919, $25,000 at 7%.

Total receipts from ore shipments and concentrates in 1917 reported as 6,584.

Property: the Chataway and Sanson or Tamarac groups, 15 claims, ut 600 acres, 28 miles S. E. from Ashcroft, a station on the C. P. R. Com- y paid $50,000 for the Chataway group and has the Sanson group of 11 claims ler bond.

Copper ore with small silver and gold values occurs in a contact vein between nite and quartz-feldspar porphyry. Vein is from 3 to 17′ in width, and an body has been opened by a drift for 400′. Ore carries chalcopyrite in a aceous gangue. Average assays are 5% copper, with about 25c. in gold and er.

Development: by 500′ tunnel and shaft to depth of 130′. Total work ounts to 1,500′ of drifts and tunnels, with 300′ raises and stopes. Reserves prise about 8,000 tons above the lower level, where 100′ of drifting is said to n 6% ore.

Equipment: includes 1,000′ tramway and 50-ton mill using flotation and ing a 90% extraction.

Producton: in 1917, 48 carloads of concentrate and 4 of crude ore net- $106,584 at smelter.

The mine was idle during the greater part of 1919, pending financing. If er development proves satisfactory the mill will be enlarged and better sportation provided. Reported November, 1919, that creditors had agreed ccept 1/10 in cash and 1/10 in one, two, three and four months, and the nce in 7% preferred shares.

Is a clean cut and creditable mining promotion.

BSON SILVER LEAD CO. **BRITISH COLUMBIA**

Address: Box 1123, Spokane, Wash., and Ymir, B. C.

Officers: George T. Reynolds, pres.; W. L. McEachren, v. p.; W. B. d, Jr., sec.-treas., Ymir, B. C.; C. H. Harvey, asst. sec. and treas.; preceding F. C. Buchanan, F. R. Monfort and W. A. Buchanan, directors. W. T. owell, mgr.

Inc. 1911, in Washington. **Cap.,** $1,500,000; shares $1 par; outstanding Stock transferred at company's office. Annual meeting in January. ting expenses in 1915, $30,977.

Property: Yankee Girl mine, 3 claims, patented, 126 acres, at Ymir, mining district, B. C., said to show lead-zinc ore in contact deposits granite, slate and schist; strike N. E. S. W., dip 60°. One orebody is e 90′ long, another 400′ long. Ore [illegible] $20 gold, 6.5 oz. silver 6% lead per ton. The main vei[illegible] on 300′ in nnel; is 5′ to 7′ wide and aver[illegible] per ton. kon vein is also ore bearing.

Development: 4 tunnels. No. 1, 1,600′ long; No. 2, 2,100′ long and 40[illegible] below the surface; No. 3, 400′ long and 175′ below No. 2; No. 4, 2,100′ long and 600′ below No. 2, is driven in the footwall and for the first 1,160′ nearly parallel the vein. At No. 4 tunnel level the Yukon vein is estimated to lie 100′ N. E. of the tunnel. Company claimed to have 400,000 tons ore blocked out. Total underground workings over 6,000′.

Equipment: includes 2 air compressors and a 6,000′ tramway.

In 1918, shipments amounted to 8,847 tons ore, most of it going to the Canada Copper Corp. Company ignores requests for information.

HOWE SOUND CO. **BRITISH COLUMBIA**

New York office: 734 Fifth Ave. **Mine office:** Britannia Beach, B. C.

Officers: Evander B. Schley, pres.; W. H. Gelshenen, v. p.; Wm. J. Walworth, v. p. and sec.; K. B. Schley, treas., with exception of Wm. J. Walworth, H. M. Hanna, Jr., G. H. Howard, C. E. Dunlap, Reeve Schley, Chas. C. Raynor, and G. B. Schley, directors. Emil Richter, asst. sec.-treas.; E. B. Schley, chairman executive committee; C. P. Browning, mine supt.

Inc. Aug. 22, 1903, in Maine. **Cap.,** $3,000,000; shares $1 par; 1,984,150 issued. Bankers Trust Co., New York, transfer agent. Chase National Bank, New York, registrar. Listed on New York Curb. Bonds: $4,573,000 20-year 6%. Shares sold, 1918, $6⅞ high, 2⅞ low; in 1919, 5⅞ high, 3⅛ low.

Dividends: 15c in 1918, 20c in 1919, and 5c in January, 1920. The total $793,656.

Company owns the entire stock issue of the Britannia Mining and Smelting .., Ltd., which in turn owns the Britannia Power Co. and the Howe Sound ower Co. Howe Sound also owns 53,800 shares of the total issue of the El otosi Mining Co., which, in turn, owns a large majority of the stock of the ihuahua Mining Co.

Britannia Mining & Smelting Co., Ltd.

Property: holdings at end of 1918, were 317 crown-granted mineral ims and 17 beach lots of 14,822 acres, 212 mineral claims of 8,800 acres; imber licenses of 4,366 acres; a total of 23,622 acres. During the year 8, $113,605 was spent for new property in prospecting, surveying, crown anting, etc.

Geology: the orebodies consist of a series of roughly parallel lenses of alcopyrite and pyrite in schist, and large masses of silicious material ough which chalcopyrite and pyrite are irregularly disseminated. All orebodies developed thus far are confined to about 100 acres, the re-inder of the company's holdings being undeveloped.

Development: by a main working tunnel and various large glory holes nnecting with tunnels 500, 600, 700, 850 and 1,050′ below the outcrop the ter being known as the 1,000′ level. The working tunnel or 2,200′ level 2,200′ below the outcrop and 1,200′ below the old workings. At 3,922′ m the portal a shaft connects with the 1,050′ level. Work on the Daisy mour crosscut, the 3,100 crosscut and the 4,100′ tunnels was continued ring 1918, at a cost of $168,097. These tunnels open up the orebody so t in future all the ore will be dropped to the lowest or 4,100′ tunnel which is to the orebins at the top of the mill. Four levels have portals on h side of Britannia mountain. Two other levels, the 1,200′ and 1,600 are w being driven through the mountain. In 1918 the Bluff mine on the st, and the Empress mine on the east, were extensively developed and ping started. Underground work in 1918 totaled 25,432′.

Ore reserves: Jan. 1, 1918, in Britannia mine, broken ore in stopes has n increased 312,487 tons, increasing the total stored to 1,581,641 tons 3% copper. Reserves in place amounted to 8,205,755 tons, averaging 2% per.

Equipment of the shaft includes a double-drum electric hoist on the 0′ level and a Gates crusher in the rock-raise between the 1,050′ and 0′ levels, placed on the 1,800′ level and run by a 75-h. p. motor. This e, 200′ east of and connected with the shaft, serves as a storage bin ore, with capacity of 4,000 tons above the 1,800′ level and 2,000 tons ow the 1,800′ level. The raise is lined with 12″ by 12″ timbers. Electric ors haul the ore from the chute to the portal of the tunnel. From the tal the ore is hauled 3 miles by electric railway to head of a 33% incline, 0′ long, vertical drop of 1,450′, which leads to the bins of the concen-or at the water's edge. Other similar raises, equipped with crushers, driven in different localities to give flexibility to the operation.

By system of dams, intakes and pipe lines, Britannia creek has been ressed to produce over 8,000-h. p. during most of the year. Work done 917, to develop Furry creek produces over 2,500-h. p., which will be ased by additional installations in the future. As reserve power, there steam turbine plant of over 3,000 h. p. capacity located at the beach.

Equipment: includes 8 compressors, some driven by water wheels, some steam, and some by either [illegible] -generated electricity, with l capacity of nearly 20,000 [illegible] per minute.

The four units of the new [illegible] originally ated to handle 2,000 tons d[illegible] and addi- machinery to care for 2,[illegible] capable reating 800 tons daily, will [illegible] trans-

ferred to the new mill. This will bring the capacity of the new mill approximately 3,000 tons.

In general the system of milling consists of coarse crushing, jigging by Hancock jigs, fine crushing in tube mills and Hardinge mills, and flotation in Minerals Separation machines, Shipments of concentrates to the smelter, resulting from treating 730,303 tons in the mill amounted to 63,055 dry tons and assayed per ton, 0.048 oz. gold; 1.56 oz. silver; 14.37 copper; 3.32% zinc.

There are 2 townsites in connection with the company's operations, one at Britannia Beach, on the shore of Howe Sound, and the other, known as the Mine Townsite, laid out at the portal of the new tunnel. It has all necessary buildings for equipment and men, the mine buildings being the best and most comfortably equipped in British Columbia. There is a large company store at Britannia Beach.

Total tonnage milled in 1918, 730,300 tons; cost per ton, $0.693; mining costs, including development and crushing, $1.77 per ton.

Production is as follows:

Year	Copper Lb.	Gold Oz.	Silver Oz.	Total Value
1918	18,322,482	3,045	98,131	.....
1917	16,357,329	992	91,504	.....
1916	16,288,835	791	91,905	(a)$6,042,[illegible]
1915	9,058,045	397	50,306	1,676,[illegible]
1914	11,841,232	213	68,515	1,640,[illegible]
1913	13,167,000	89	72,300	2,052,[illegible]
1912	14,300,000	...	76,500	2,388,[illegible]
1911	8,685,000	...	46,000	1,074,[illegible]
1910	520,000	1,000	7,500	68,[illegible]

(a) includes lead and zinc values.

The Britannia proved a hard problem to handle for years, but has made money under the present management, which is thoroughly capable. A successful future seems certain, and the results are a tribute to the far-sighted judgment and persistency of Mr. G. B. Schley.

Mexican Properties.

The El Potosi and Chihuahua mining companies comprise 415 acres in the Santa Eulalia mining district, eighteen miles from Chihuahua, where the company's narrow gauge railroad connects with the National Lines of Mexico. The Santo Domingo, the producing claim of the Chihuahua Mining Co., adjoins the 200 acre claim of the Potosi Company. Other claims are within a two mile radius of the Santo Domingo.

Development work in 1918, showed that previous ore estimates were conservative, and a new deposit of galena found in the large iron-silver body, has added greatly to reserves. During 1918, shipments were 140,000 tons of ore classified as follows:

	Tons	Aver. Oz. silver	Aver. % [illegible]
Lead carbonate	73,883	14.92	[illegible]
Lead sulphide	20,014	21.49	[illegible]
Iron sulphide	48,061	36.31	[illegible]

The ore mined was shipped to the A. S. & R. Co.'s plant. Shipments were maintained steadily throughout, almost the [illegible]. The mine workings and development for several years were [illegible] Mexican foremen; the American staff, etc., being held in El Paso until 1918, when they returned. W. J. Quigley is manager [illegible] operations.

UDSON BAY ZINC CO., LTD. **BRITISH COLUMBIA**
Operations carried on by Maurice W. Bacon, of Spokane, apparently thout profit to company. Requests for information not replied to.

)AHO-ALAMO MINE **BRITISH COLUMBIA**
Owned by Clarence Cunningham, Sandon, B. C. Said to show a conlerable tonnage of milling ore which is shipped to the Alamo concenitor at Alamo.

:EDA MINES, LTD. **BRITISH COLUMBIA**
Ikeda Bay, Queen Charlotte Island, B. C. At last accounts, R. R. Mcnnan pres.; S. J. Castleman sec.-treas., both of Spokane. Property was der management of Mr. Ikeda in 1918.

Inc. Sept., 1910, in British Columbia. **Cap.**, $850,000; shares $1 par.

Property: the former holdings of the Awaya-Ikeda Co., Ltd., taken er for $200,000, include 42 claims, 2,100 acres in several groups on Ikeda y, at the southern end of Moresby island, 3 miles from Jedway, and nnected therewith by government rail and telephone. Steamer connecn is had with Vancouver, 450 miles distant. The Lily group, 8 claims, acres, crown patented in 1912, on the southwestern side of Ikeda bay, covered May, 1898, by Arichka Ikeda, and developed by him until taken er by the present company, September, 1910.

Geology: the group shows limestone and slate cut by dikes of greenne and diorite, having well defined flat fissures at right angles to and ween the vertical main fissures. Ore occurs in a series of veins of 2 8′ width, the largest orebodies lying along the horizontal main fissure. e vein principally developed is of 5 to 30′ width, proven for 1,000′ in gth and about 300′ in depth. The ore shoot, up to 20′ in width, carries ses of chalcopyrite, averaging, as mined, about 2.5% copper, with a ngue of silicious country rock and occasional stringers of quartzite l limestone. The ore mined by the former owners averaged about 4% per, 2.2 oz. silver and $2.25 gold per ton.

Development: the Lily mine has 4 tunnels connected by winzes. No. 3 nel, 940′ long, driven on the vein for 660′, has about 5′ of chalcopyrite of d average tenor and ends in a 40x50′ chamber from which considerable has been stoped, the ore in the chamber apparently being not the same that followed in the tunnel, lying about 45′ to the N. and found by sscutting.

Production: smelter returns in 1918 totaled 358 tons of ore, yielding 84 lb. copper, 77 oz. gold, and 987 oz. silver. The property has reached stage where it requires a 50-ton mill to treat the 2nd class ore, of which e is 7,000 to 8,000 tons in sight.

The output in 1919 was 165 tons of ore yielding 54 oz. gold, 800 oz. er and 43,700 lb. copper.

)EX MINING CO. **BRITISH COLUMBIA**
Address: F. J. Edwards, mgr., Slocan, B. C.
Property: the Index mine on south fork of Kaslo creek, near Slocan, aining veins of silver-lead ore. A long crosscut tunnel is being driven ut No. 2 vein and a drift is being run on No. 1 vein. A new compreshas recently been added to the equipment. The Flint claim, also a r-lead property, was acquired in December, 1919, at a cost of $22,500.

)IAN MINES CO., LTD. **BRITISH COLUMBIA**
Property is in Salmon River district, N. E. of Stewart, [illegible]
, a vein from 12 to 20′ wide had been opened [illegible]
shoot assaying from $40 to $120 per ton.

.AND MINING CO., LTD.
Address: Walla Walla, Wash., and Nelson, B.
Officers: Albert Niebergal, pres.; J. F. Talaber
treas.; with C. E. Nye, D. Donovan, H. Ib
:tors W. M. Myers, mgr.
Inc. in Washington. **Cap.**, $1,500,000; shares $1
Property: all near Nelson in the Grand Fork

consists of the Inland gold mine, closed as being unprofitable; the Berlin gold-silver-copper mine, under lease since October, 1918, to the Griswold-Billingsley Co.; the Eureka copper mine acquired from the Eureka Copper Mines, Ltd., in October, 1918; and the Granite-Poorman gold mine, acquired July, 1919, from the Kootenay Gold Exploration Co.

Development: the Eureka and Granite-Poorman have been extensively opened by tunnels and shafts, exposing a considerable quantity of ore.

Equipment: steam and electric power, compressors, hoists, pumps, aerial trams and 10 and 20-stamp concentrating plants with ball-mill.

Production: definite figures are not yet obtainable, but the Eureka has shipped several thousand tons of smelting ore, and the Granite-Poorman has been operating on and off for 30 years. Ore and concentrates are sent to the Granby smelter.

INTERNATIONAL EXPLORATION & DEV. CO. B. C.

Mail returned, 1919, from former address, James McIntire, 525 Rookery Bldg., Spokane, Wash.

Officers: T. A. Farrell, pres.; S. A. Haynes, sec.-treas., with E. T. Smith, R. L. Smith and J. W. Osborne, directors. Leroy Way, Old National Bank Bldg., Spokane, agt.

Cap., $500,000; shares $1 par.

Organized to locate, acquire and develop prospects, eventually disposing of them to operating companies. A 3-year option for $60,000 was taken on 7 claims near Paulsen, 17 miles from Grand Forks, B. C., and several claims were exploited 12 miles from Grand Forks. Company probably idle.

IRON MASK MINE BRITISH COLUMBIA

Owned by Kamloops Copper Co., at Kamloops, Yale district, B. C.

Shaft is down 780′ and diamond-drilling under way. Has 300-ton mill with flotation unit.

IRON MOUNTAIN, LTD. BRITISH COLUMBIA

Address: R. W. Mifflin, treas.-supt.; D. E. McLaughlin, sec.

Property: the Jersey and Emerald mines in Sheep Creek camp, Nelson mining division. The Emerald is the largest producer of lead-silver ore in the district, and employs about 20 men. In 1918 ore shipments totaled 3,176 tons. A concentrator, built in the fall of 1919, handles 30 tons daily, running two shifts.

JACKSON BASIN ZINC CO. BRITISH COLUMBIA

Probably liquidated as property was acquired by Utica Mines, Ltd., in 1919.

JEWEL-DENERO MINES, LTD. BRITISH COLUMBIA

Secretary's office: W. Robertson, 71 George St., Edinburgh, Scotland. **Mine office:** Greenwood, B. C.

Directors: J. Galloway, chairman; J. E. Rogerson and W. W. Stuart. **Inc.** Nov. 22, 1912, in Edinburgh.

Cap., £70,000; shares 5s each; 279,400 shares issued. Authorized bond issue, £12,500, 8%; £11,202 issued.

Property: the Jewel gold mine at Greenwood and the Idaho Alamo mine in the Slocan district, B. C. The Jewel mine is developed to depth of 500′ by shafts and crosscuts and started production in 1911. Produced 16,525 tons of ore in 1914, yielding £31,360. In 1915 only development work was done and in 1916 the mine was being operated by lessees. Equipment includes a 15-stamp cyanide mill.

KAMLOOPS COPPER CO. BRITISH COLUMBIA

General office: 609 First National Bank Bldg., Duluth, Minn. **Mine address:** Kamloops, Yale district, B. C.

Officers: at last accounts, E. G. Wallinder, pres.-mgr.; W. H. Hoch, v. p., with G. Carlson, S. H. Hudson, F. M. Needham, J. J. Eklund, F. Hoch, Theodore Michel, Otto Johnson, directors; W. W. Blackshaw, 1412 Tower Ave., Superior, Wis.; Otto Johnson, treas.; John Jeffatty.; A. E. Wallinder, supt.

Inc. Sept. 7, 1909, in Arizona. **Cap.**, $3,000,000; shares $10 par, part id; 128,561 issued, none preferred. First-mortgage bonds on Iron Mask ne amount to $210,000; and convertible 6% notes, $128,500.

Accounts for period of 2 years show revenue of $337,454 of which ore es netted $109,330. Balance at end of September, 1916, was $77,572. cess of current assets over liabilities was $33,840. No statement since.

Property: 10 claims, 2,041 acres, 228 acres mineral land, including the n Mask mine, 7 miles S. W. of Kamloops.

Geology: the Iron Mask shaft is sunk on a shear zone, mineralized for to 30′ in width, with segregations of better grade ore forming a pay- eak of variable width, carrying chalcopyrite, associated with magnetite in hloritic gangue, containing orthoclase intercrystallized with copper sul- de. The country rock is a diorite with smeary basic patches of gabbroic terial. The Iron Mask orebody averaged 28′ in thickness, and was lenti- ar in shape above the 690′ level; here it was cut off by a horizontal fault. has been found below this level by diamond-drilling from the 750′ level l is being opened up. The ore is troublesome to concentrate by ordi- y methods owing to its chlorite and quartz-orthoclase gangue.

The mine shows several orebodies besides the Iron Mask, all of them to "igneous after effects," and occurring in fresh diorite, filling fissures replacements along fissures and in patches, the ore consisting of ortho- e, chlorite, epidote and other secondary pneumatolytic minerals, with rlocked chalcopyrite, pyrite, magnetite, etc.

The Erin orebody shows excellent ore and numerous pits at various nts on the property all show ore.

See Annual Report of Minister of Mines, British Columbia, 1915, for iled description of geology, workings, etc. Examined by Walter Har- Weed.

Development: includes the 780′ Iron Mask shaft and over 18,000′ of kings, on 9 levels; the 330′ Erin shaft sunk on ore for 300′ with 600′ of ts and crosscuts; the 50′ Lucky Strike shaft and 3 other prospect shafts. tric power is obtained from the City of Kamloops power-station. In and 1918, approximately 8,000′ of diamond-drilling was done.

Equipment: includes 300-ton flotation mill, one 150-h. p. compressor, 225-h. p. motor for the "Iron Mask" hoist and 8 smaller motors, 6′ ple-drum hoist, 3 air compressors of 1,300 cu. ft. capacity, good for 15 s, an electric-light plant and a sawmill. Transportation is by a good on road with steep grades, leading to the railway siding below Kam- s. The management plans a 2½-mile tram, having a drop of 1,100′, n financial conditions are better.

Production: the mill was not operated to capacity during 1918, total nents of copper concentrates amounting to 2,800 tons.

It is understood that the English corporation has extended the time urther payments on the property.

ILOOPS MINES, LTD. BRITISH COLUMBIA

Office: 151 Coronation House, 4 Lloyds Ave., London, E. C., En pany in hands of trustees, as property is under lease and bond to loops Copper Co.

G EDWARD MINES, LTD. BRITISH COLUM

dle. D. Braithwaite, sec.-treas., Fairview, Boundary district, B. nc. 1904, in British Columbia. Cap., $500,000; sh roperty: 10 claims, 500 acres, in the Similkamee of workings, said to show a sulphide orebody 6 pper.

G SOLOMON COPPER MINING CO., LTD

ffice: 206 Penfield Bldg., Philadelphia, Pa. h Columbia.

fficers: A. S. Anderson, pres.; Philip Singleton, Nolte, treas. Directors, preceding and B. L. and Geo. T. Storey.

Inc. July 2, 1908, in British Columbia. **Cap.**, $1,000,000; par $1; issued 685,005 shares.

Property: 133 acres patented claims, near Cowichan, Vancouver Island, B. C., includes the King Solomon and Queen of Sheba claims, showing two fissure veins in syenite and diorite.

Development: by 700' tunnel and two open quarries, 125 by 50 and 50 by 70'. Operations confined to small amount of development work, since 1917, pending construction of railway (C. P. R.)

Equipped with 65-h. p. steam engine, air compressor, saw-mill, house, etc.

About 800 tons of ore shipped to Tyee smelter returned 8 to 9% copper, 1 oz. silver and small amount of gold. No production 1917-1919.

KITSALIS MOUNTAIN COPPER CO. BRITISH COLUMBIA

Address: Usk, B. C.

Officers: J. D. Wells, pres.; Jesse Brooks, v. p.; A. J. Thomson, treas. and mgr., Usk; with S. H. Davis, and Jas. Darby, directors.

Inc. in British Columbia. **Cap.**, $500,000; par $1.

Property: 6 claims in Omineca division, one mile from Usk, with workings but 200' above Grand Trunk R. R., shows several quartz veins opened by cuts and tunnels showing ore carrying argentiferous bornite and chalcocite, with free gold in both quartz and bornite. (See 1917 Annual Report of Minister of Mines, British Columbia).

Development: by tunnels, with several hundred feet of workings. Where cut in the tunnel the quartz vein has practically no sulphides and is of little or no value, but a new vein is said to look encouraging and work will be continued on it.

KOOTENAY BELLE GOLD MINE BRITISH COLUMBIA

M. M. McCune, mgr., Sheep Creek, via Salmo, B. C.

A. W. McCune, Salt Lake City, in 1918, had a bond on this property, together with the Queen Vancouver, and Alexander mining groups, in the Sheep Creek gold camp of the Nelson mining division. The Queen is credited with a past production of $1,300,000, and the Kootenay Belle $100,000 in gold.

Properties had been idle several years, but new management had started a 3,000' crosscut tunnel, which will cut several parallel veins on the property. At last accounts was employing 25 men and planning to build a mill.

KOOTENAY BONANZA MINES, LTD. BRITISH COLUMBIA

Office: 901 Vancouver Block, Vancouver, B. C.

Officers: W. Finch Page, pres., London, Eng.; A. E. Rand, v. p.; R. Lennie, sec.-treas.; preceding with A. C. Burdick and J. A. Hen[illegible] directors.

Inc. in British Columbia. **Cap.**, $3,000,000; shares $5 par; outstanding $200,000. Company organized to take over the Silver King mine from the bondholders of the Hall Mining & Smelting Co., Ltd.; the claims of the Kootenay Development Syndicate, Ltd.; Dandy & Ollie Cons. Mines, Ltd., and of the Starlight Mines, Ltd., as well as other properties.

Silver King and Dandy groups of claims were sold to the Silver King Mines, Ltd. The company now holds 34 other claims, comprising the North Star, Great Western Starlight and Irene groups, comprising practically all the mineral area of Toad mountain, at Nelson, B. C.

KOOTENAY GOLD EXPLORATION CO. BRITISH COLUMBIA

Company defunct. Property acquired July, 1919, by Inland Mining Co., which see.

LADYSMITH SMELTING CORPORATION, LTD.

Address: F. A. Sieberling, Goodrich Tire & Rubber Co., Akron, O.

Operating office: Col. W. L. Stevenson, mgr., H. W. Aldrich, gen. supt., Ladysmith, Vancouver Island, B. C.

Property: 1,247 acres, including 13 claims, crown granted, 342 acres, 45-acre smelter site and 800 acres timber lands. Owns the Ladysmith

ter, and mineral lands on Mt. Sicker, Vancouver Island, purchased from Tyee Copper Co., in December, 1916, for $275,000. In January, 1920, 14 tional copper claims were acquired.

The Tyee mine, on Mt Sicker, in the Somenos district, 11 miles N. W. Duncans, and about 80 miles from Victoria, yielded only 1,200 tons of in 1907, and has been idle since. The orebody was rich, but shallow, and ough it was explored thoroughly, nothing of value was found.

Smelter: known as the Ladysmith works, is well located, on a 45-acre on Oyster harbor, and treated custom ores from as far N. as Alaska as far S. as Mexico. The smelter was remodeled and practically rebuilt -1910. There is a 40x210' wharf, having an electric hoist, connected, by elevated incline trestle with the smelter bins, which are of 5,400 tons city. The works are terraced throughout, permitting handling of ma- l by gravity, and have a capacity of 500 tons daily.

The furnace building has 42x130' and 48x160' Allis-Chalmers blast fur- s, of 200 and 300 tons daily capacity, respectively.

Smelter production was 3,604,474 lbs. copper in 1903; 5,045,000 lbs. in ; 3,039,398 lbs. copper, 103,474 oz. silver and 5,952 oz. gold in 1905; ,431 lbs. copper in 1906; 2,145,058 lbs. copper in 1909; 45,758 tons of ore, ling 3,392,901 lbs. copper, 41,128 oz. silver and 10,041 oz. gold in 1910 911, 42,030 tons of custom ore were treated. Closed down, 1911.

The 250-ton mill was remodeled and flotation installed, 1917.

In 1918, the smelter was in operation for 5 weeks and closed down be- e sufficient ore could not be obtained to keep even one furnace running. orted November 1919 that company had taken a bond on a property be- ing to the Green Lake Mining & Milling Co., located on Thurlow Is- , and that New York interests had bonded the Tyee mine.

IARK MINING CO. **BRITISH COLUMBIA**

Address: Illecillewaet, B. C.

Officers: Wm. B. Dornberg, pres. and mgr., Spokane, Wash.; Geo. L.), v. p.; A. H. Blair, treas., Yakima, Wash.

Inc. in Washington. **Cap.,** $200,000; par 10c.

Property: 16 claims on Revelstoke division, near Illecillewaet, has pro- d considerable high-grade silver-lead ore. The main tunnel or 400' is 700' long; and the ore body has been mined out above this level. A e 140' deep with 100' of drifting is said to expose the downward ex- on of the orebody. Future of property said to depend upon the ex- and value of the new ore and upon development of a quartz vein n is supposed to be an entirely new ore bearing zone.

Equipment: includes 250-h. p. hydro-electric plant to run the compres- hoist, and concentrator.

QUETI ISLAND MINING CO., LTD. BRITISH COLUMBIA

dle and company regarded as dead. Last address: Vancouver, B. C.

Officers: R. A. Mather, pres.; A. D. Tennant, v. p.; John D. Mather, Geo. E. Winter, treas.; Percy Williams, mgr., at last accounts.

nc. 1910. **Cap.,** $50,000 shares 25c par.

Property: 3 claims, 150 acres, on Lasqueti Island, at the S. W. end of da Island, on the Gulf of Georgia, 35 miles from Vancouver.

Development: by tunnel on 30' veins known as St. Joseph, having reaks, of 6 to 24' width, said to carry ore averaging 10% copper an old per ton.

ROI No. 2, LTD. BRITISH COLUMBI

ing director and transfer agent, who was sent to the Washington tentiary. The company was reorganized, and a statement ma operations from April, 1914, to April, 1918. The income was which $228,161 was from ore shipments; expenditures totaled $2 ing a balance of $2.653. On the balance sheet was an item $2,99 as over-issued shares. Total assets were $5,533 with indeb $71,291, or a net deficit of $65,758. To avoid litigation, on acc over-issue of stock an increase in capitalization was made to cov

Early in January, 1920, shareholders were notified that the the mortgagees had commenced proceedings to foreclose the mo unless $12.000 was paid on account, company would eventua property. It was suggested that a syndicate be formed to foreclose the mortgage, and reorganize the company with a sm

LYNN CREEK ZINC MINES CO. BRITISH C

Address: Vancouver, B. C. W. C. Woods, pres.; G. Phill last accounts.

Property: on west fork of Lynn creek, near North Vancou lead-zinc ore. Development is by tunnels. In 1918, only the a sessment work was done to patent the claims.

MAPLE LEAF MINING CO. BRITISH CO

Officers: H. W. Young, pres.-mgr.; John Donaldson, sec.-t of Grand Forks; with J. B. Miller, S. B. Sangers, Thos. Dunl Brown, and H. W. Collins, directors.

Property: on N. fork of Kettle river, 40 miles from Grand F to show lead ore, with a small amount of platinum.

Development: tunnels, longest about 200'. Reported, May, a small copper smelter was being built to handle 50 tons of ore

MASTODON MINING CO. BRITISH CO

J. W. Evans, mgr.

Property: 10 claims, 23 miles N. E. of Revelstoke, between and Carnes creeks, N. W. Kootenay district, shows zinc and lead

Development: consists of a 110' shaft with some driving open cut work, said to have been very encouraging.

McKINLEY MINES, LTD. BRITISH CO

Office: Rossland, B. C. Mine near Franklin, Boundary distri

Officers: B. Lequime, pres.: H. W. Warrington, v. p.; A. M. sec.; C. L. Hammond, managing director.

Property: 4 claims, on the N. fork of Kettle river, about 34 m of Grand Forks and 18 miles from the Kettle Valley railway term

Orebodies occur as sulphides and oxides of iron carrying gold per. Several tunnels on property. Results of extensive diamon not reported. Claims were under bond and lease to the British Copper Co., 1912, and a long tunnel driven. James Breen, of Spok 75% of the stock. The company was promoted by P. A. O'Fa spent $30.000 supplied by F. A. Heinze, in diamond drilling, befo abandoned the proposition. Property is too inaccessible to work grade ore profitably. No recent information.

MINING CORPORATION OF CANADA BRITISH CO

For office and directors, see description under Ontario.

Property: gold quartz claims on Proserpine mountain, 4 mi Barkerville, Cariboo district, acquired 1919. In November, 50 employed on preparatory work and exploration under direction Bryce. Diamond drilling was also to be done. Indications said to Later in 1919 the Pioneer mine on Cadwallader creek, Lillooet, by road from Mission station on the Pacific Great Eastern line chased for $100.000.

Development: by a 280' shaft.

Equipment: includes two 3-drill compressors, hoist, stamp 190-h. p. water wheel.

Production: $37,921 in gold from 3,248 tons of ore.

INNEAPOLIS & TEXADA COPPERITE CO., LTD. **B. C.**

Offices: 1311 Washington Ave., N., Minneapolis, Minn., and Vananda, :xada Island, B. C.

Officers: A. Stremel, pres.; E. E. Rorem, 1st v. p.; John Kraft, 2nd p.; A. E. Barker, sec.; John F. Danek, treas.; above, with Eden Schmidt, lmer Olson, B. F. Laflin and W. H. Curtis, directors.

Inc. in Arizona. **Cap.**, $1,000,000; shares $1 par; 400,000 issued.

Property: 5 claims, 225 acres, on Texada Island, 47 miles N. W. of ncouver, said to show 2 main veins, the Swan and the Paxton, contain- copper ore, with gold and silver. Paxton vein is said to be traceable 00′ on surface. Value of property is entirely prospective.

Development: 200′ shaft, with 300′ of drifting; also a number of test s. Considerable mill ore extracted in this work, reported to average copper, 2% lead, and $5 per ton in gold and silver.

In December, 1918, a contract was made with British interests who, s reported, have been making a detailed examination of the property, in- *ding* diamond drilling.

)LLY GIBSON MINING CO. **BRITISH COLUMBIA**

Address: Rossland, B. C.

Property: 8 claims, in Grand Forks mining district, 4 miles S. W. of ılsen, on the C. P. R. R., shows a mineralized area 1,500′ long. Vein ere opened is about 8′ wide, and ore assays up to $14 in gold and 2 oz. silver per ton.

Development: by several hundred feet of tunneling. Reported in Nov., 9, that ore has been found in lower tunnel, assaying $48 to $125 per ton.

)LYBDENUM MINING & REDUCTION CO., LTD. **B. C.**

Address: Riel, B. C.

Property: 21 claims on the Alice Arm branch of Portland Canal, 15 es from Anyox. The group shows a series of quartz veins in a miner- ed zone, 60′ wide, which for a length of about 800′ show small bunches)re containing silver, lead, zinc, and molybdenum. A 4,000′ aerial tram nects the mine and mill.

The property has been tied up by litigation since 1916. In June of that r, the court at Victoria issued an order requiring that the property be ed on the market at a fixed price of $150,000.

THER LODE SHEEP CREEK MINING CO. **B. C.**

Probably dead and property sold, but no confirmation obtainable.

Address: Sheep Creek, B. C.

Officers: Alex. L. Smith, sec., transfer agent and registrar, Cornwall, .; John McMartin, pres.; J. R. Rutherford, gen. mgr., in 1916.

Inc. in Maine. **Cap.**, $1,250,000; shares $1 par. A dividend of 11% was ared in December, 1915.

Property: at Sheep Creek, West Kootenay district, B. C., shows gold in an orebody said to have a maximum width of 35′ on 6th level.

Equipment: includes 10-stamp mill and cyanide plant, connected with mine by a 3,600′ aerial tram.

In 1914 ore mined and milled amounted to 20,000 tons; bullion recov- reported as $100,000. Owing to lack of power the mine has been ating only about 9 months of the year.

UNTAIN CHIEF MINING CO. **BRITISH COLUMBIA**

Address: Renata, B. C.

Officers; J. W. Evans, pres.-mgr.; J. H. Lawrence, sec.-treas., with A. ash, Chas. F. Blacha, and W. A. Gordon, directors. **Inc.** in 1918.

Property: 5 claims, 3 miles from Renata, on Lower Arrow lake. Strip- and open cut work in 1918 is said to have disclosed an orebody 5′ wide 00′ long, in limestone, near the contact with an intrusive granite. Ore s about 2½ oz. silver and 3½% copper. In 1918, about 600 tons of vere shipped from old workings. In September, 1919, a 200-ton ship- was made. A hoist and compressor were installed late in 1919, and ine is being put in condition to ship up to 500 tons per week

MOUNTAIN CONS. MINING CO. BRITISH COLUMBIA

Property: 7 miles from Sandon, B. C., consists of two claims said to show a small, but rich vein in granite. Ore is silver-lead, with a little gold. The mine is in rough country and can be worked only in the summer. Operations each season said to result in a profit. Reported October, 1910, that company expected to realize $25,000 from one carload of ore.

MOUNT SICKER & B. C. DEV. CO., LTD. BRITISH COLUMBIA

Idle. **Office:** 30 George Square, Glasgow, Scotland. Fred L. Smith, chairman; John D. Steel, sec.

Inc. Oct. 20, 1898, in Great Britain. **Cap.,** £125,000; shares £1 par. Lands are on Mt. Sicker, Vancouver Island, B. C.

MULTIPLEX MINING, MILLING & POWER CO., LTD. B. C.

Address: P. O. Box 424, Revelstoke, B. C.

Officers: O. T. Bibb, pres.-mgr.; F. G. Wrightson, sec., with Jos. Stevenson, L. P. Schooling, and J. G. Hilbery, directors.

Inc. April, 1914, in British Columbia. **Cap.,** $1,000,000; par $1; non-assessable; 339,391 shares in treasury.

Property: 18 claims, 830 acres, 1¾ miles E. of Cambourne, at junction of Poole and Mohawk creeks, in Lardeau district, West Kootenay, said to show silver-lead-zinc ore in fissure veins, also gold ore in quartz veins of different type. It is said that $25,000 has been spent on development work by tunnels, with about 1,500′ of workings. Company planned to build a hydro-electric plant in 1919.

NEW CANADIAN METAL CO. BRITISH COLUMBIA

S. S. Fowler, Nelson, B. C., mgr. Control is held in France.

Property: the Bluebell lead-silver mine at Riondel, near Ainsworth, B. C.

Geology: the deposit is a replacement in limestone, irregular masses of ore following the bedding, with tongues projecting into the foot-wall country of pre-Cambrian sediments.

Development: mine is 600′ deep on incline of 35°, with extensive workings extending under Kootenay lake. The mine was flooded 1917, by an inrush of water; the old pump could not handle the water and a new 1,000-gal. pump has recently been added.

Equipment: includes mill and Blake crushers, rolls, jigs, two Huntington mills, Wilfley and Deister tables. The mill was not operated in 1918.

Production: shipped 5,000 tons of oxidized ore from surface workings in 1918.

NEW DOMINION COPPER CO., LTD. BRITISH COLUMBIA

Controlled by B. C. Copper Co. Mines considered exhausted and of no commercial value. For description, see Vol. XII.

NEW ERA MINING CO. BRITISH COLUMBIA

Address. Camborne, B. C. W. E. Morphy, mgr.

Property: lease and bond on 3 crown-granted claims above mine, including the old Beatrice mine, near Camborne, Lardeau mining division. The mine which has 1,400′ of tunnel work, was closed down some years on account of the low price of silver. Ore said to assay about 3% lead and 100 oz. silver per ton. Company expects to work the mine during winter.

NEW HAZELTON GOLD-COBALT CO. BRITISH COLUMBIA

Address: Nicholas Thompson, pres., Vancouver, B. C. R. Daly Thomskill, sec.-treas.

Property: near Hazelton, on W. slope of Rocher De Boule mountain, 5 miles from Carnaby, shows a 2′ vein in granodiorite. This vein contains bunches and bands of ore varying from 3 to 18″ in width; ore is auriferous arsenopyrite with some molybdenum. In 1918, a 25-ton shipment assayed 1.24 oz. gold; 1.4% MoS_2; 1.18% MoO_3; 1.12% cobalt; 0.6% copper; 8.98% arsenic.

Development: by tunnels, the main one is over 700′; a second tunnel lower, in about 200′.

An aerial tram carries the ore 1,000′ down the mountain, from which it it is packed 5 miles to the Grand Trunk railway.

Property shows another vein which is supposed to be a continuation he main Rocher De Boule vein.

BLE FIVE MINING CO. **BRITISH COLUMBIA**

Operated by Jas. Dunsmuir, Victoria, B. C.; Paul Lincoln, mgr.

Property: the Noble Five and Deadman groups between Sandon and y in the Slocan mining division, has been extensively developed during past 8 years. The present lowest level has a 4,000′ crosscut, 1,100′ be- upper workings, and about 3,000′ below apex of the Noble Five and Chance veins, proving the continuity of the veins at depth. The s contain silver-lead ore and development said to warrant the new on mill built in 1919 to replace an old one operated years ago. A 4- artment, 1,100′ raise with 2 ore ways connect the upper workings with ower level which is to be the main haulage way. Company employs een 30 and 40 men. Said to have ore reserves sufficient to keep the busy for 2 years or more.

s an old and well known mine that produced bonanza ore from its r levels.

)NDAY MINES CO. **BRITISH COLUMBIA**

)ffice: 704 Paulsen Bldg., Spokane, Wash.

)fficers: R. C. Lammers, v. p.; J. M. Scott, sec.; J. B. White, treas., H. S. Burdick, directors.

:ap., $750,000; shares 25c par; 1,800,000 issued.

'roperty: the Noonday and other claims near Sandon, B. C.

levelopment: by tunnels, with several thousand feet of workings, which opened 14,000 tons of $17.50 lead-silver ore. A long development tun- to be driven through the properties.

promising prospect. Shipments have been made at various times.

SEMEN EXPLORATION CO. **BRITISH COLUMBIA**

ffice: 1048 McKnight Bldg., Minneapolis, Minn. **Mine office:** Cap- Vananda, Texada Island, B. C.

fficers: E. E. Rorem, pres.; W. H. Curtis, v. p.; C. A. McKenzie, sec.; T. Rorem, treas.; B. F. Laflin, A. E. Barker and Eden Schmidt,)rs; Robt. Forbes, cons. engr.; Jas. Forbes, Sr., supt.

c. in Arizona. **Cap.,** $500,000; shares $1 par; issued, $375,000.

operty: 23 claims, 1,000 acres, 730 patented, on Texada Island, B. C., contact deposits between limestone, granite and diorite. Copper as chalcopyrite and bornite, with gold and silver values. The Cap- :laim has an 80′ vertical shaft that showed 10′ of ore., said to have ed 4% copper and $6 gold and silver. Test shafts along the vein for hundred feet show a continuity of the vein, and crosscutting proved e about 25′ wide. The Cameron claim, adjoining the Texada iron)wned by the Puget Sound Iron Co.—on which extensive develop- as been done, has a capping of magnetic iron with large lenses of yrite. The vein is reported to be over 180′ wide and is thought to 4% copper. The Aladdin claim carries silver-lead ores. It has a tical shaft with about 250′ of crosscutting. The Aladdin, De Ore, zzard claims are leased to the Minneapolis & Texada Copperite Co., hich is now developing.

)orted 1919, that British interests are making a detailed examination)roperty, including diamond-drilling.

npany's property covers about 4 miles along the various veins, is ent to tide water transportation and about 20 miles from a smelter.

T GOLD MINES, LTD. **BRITISH COLUMBIA**

ress: 901 Vancouver Block, Vancouver, B. C.

cers: A. C. Burdick, pres.; Geo. Rorie, sec.; with J. M. Turnb

R. S. Lennie, W. R. Robertson, and W. B. Pool, directors. R. H. Stewart, mgr., 736 Granville St., Vancouver.

Inc. in British Columbia. **Cap.**, $1,050,000; par $1. Cash on hand in November, 1919, amounted to $28,855.

Property: 15 claims, including the Mother Lode, Searchlight, and Nugget groups, in Sheep creek district, 15 miles from Salmo, claims show veins in schistose quartzite.

Development: by tunnels. A 1,250′ tunnel cut vein of the Mother Lode mines in January, 1920, on the Sheep creek side of the mountain, 600′ beneath the old Nugget workings. This work cost $26.84 per foot. The shoot is 12′ wide, 3′ of which is good ore.

Equipment: includes a 14-drill compressor and a 100-ton mill which was on the Motherlode property when it was acquired by present company.

Past production reported as 37,153 oz. of gold.

NUMBER ONE MINE **BRITISH COLUMBIA**

Owned by J. M. Harris, Sandon, B. C., and F. T. Kelly.

Property: 5 claims, 231 acres, shows a fissure vein containing silver-lead ore, cutting through slate, and porphyry.

Development: by 3 tunnels, 200, 500 and 700′ in length. Total output to date, 312 tons of ore. Owners report $22,270 received from ore sales in 1918, with operating expenses of $16,702 and $3,000 paid as dividends.

OLALLA COPPER MINING & SMELTING CO. B. C.

Office: 305 Colt Bldg., Paterson, N. J. **Mine office:** Olalla, Yale district, B. C.

Officers: Robt. Gaede, pres.; Jos. Bamford, Jr., v. p.; John E. Tyler, sec.-treas.

Inc. Oct. 19, 1901, in Maine. **Cap.**, $8,000,000; shares $25 par. Annual meeting, first Monday in August.

Property: 32 claims, crown-granted, 1,183 acres, and a 92-acre mill, smelter and town site in Olalla, in the lower Similkameen and Keremeos camps, Osoyoos district, 4 miles from a railway. Lands show contact deposits between diorite and felsite, with orebodies in both, but mainly in the felsite. Twelve claims adjoin the town site of Olalla, and the Dividend group of 7 claims is 17 miles distant. Vein under development claimed by management to carry bunchy replacement deposits of chalcopyrite, with garnetite and magnetite gangue, in limestone, near intrusive contacts, assaying 1.5 to 5% copper, a little silver and $1 to $7 gold per ton.

Development: by 70′ shaft, and tunnels of 642′, 600′, 150′ and 112′, with 1,504′ of workings. There is no power equipment. Property idle, but under 25-year lease to Yale Development & Construction Co., organized among the stockholders of this company. No recent information.

OREGON & B. C. MINING & DEV. CO., LTD. **BRITISH COLUMBIA**

Office: 826 Northwestern Bank Bldg., Portland, Ore. Mine at Copper Mountain, near Princeton, B. C.

Officers: W. J. Peddicord, pres.; Walter T. Woodew, v. p.; G. Evert Baker, sec.-treas.-gen. mgr. at last accounts.

Inc. Jan. 6, 1906, in Oregon. **Cap.**, $150,000; shares 10c par; non-assessable; issued, 1,455,000 shares.

Property: 8 claims, crown-granted, 379 acres, well timbered, in the Yale district, B. C. Claims show diorite cut by diabase carrying pockets, stringers and disseminations of chalcopyrite, bornite and magnetite, without quartz. The ore carries from 1½ to 3½% copper and is said to show as high as $4.50 gold per ton.

Development: a 176′ tunnel, reported to show 40′ of mineralized ground carrying chalcopyrite and bornite, the last 8′ of the tunnel said to show an 8′ vein of solid ore, with 18″ to 2′ of talc gangue. Claims adjoin the Sunset mine and other properties of the British Columbia Copper Co. Management expects to resume development work. No recent information.

UTSIDER MINE **BRITISH COLUMBIA**

Owned by Martin Woldson, Spokane, Wash., and associates.

Property: 8 claims, at Maple bay, 35 miles from Stewart, formerly own as the Brown Alaska property which was equipped in 1916 with an rial tram from the mine to the beach. Several thousand tons of ore as- ying about 2.8% copper, were shipped during 2 years operations. Shows veral veins from 6 to 30′ in width. The ore is low grade and silicious.

Development: by tunnels, the longest about 800′. Five hundred feet of w work in 1918, opened an oreshoot 200′ long and 16′ wide, assaying 2% pper.

Equipment: includes two compressors. Power is supplied by a 24″ lton water wheel.

NAMA MINE **BRITISH COLUMBIA**

H. Giegerich, Kaslo, B. C., owner. The mine, W. of Whitewater, in Slocan country, is developed by 2,000′ of tunnels and drifts to depth of ′. Reported to carry a contact vein, from 3-5′ wide, that averages 120 oz. ver. Small shipments made to the Trail smelter. Developing with a all force. No recent information, probably idle.

RADISE MINES **BRITISH COLUMBIA**

Owned by R. Randolph Bruce, Invermere, B. C., Robt MacDonald, supt.

Property: in Windermere mining division, shows silver-lead carbonate in limestone. Ore assays 35 to 45% lead and 35 to 45 oz. silver per ton.

Development: by tunnels, with 7,000′ of workings.

Production: in 1918, shipped over 2,700 tons of ore, an increase of 400 s over previous years. Employs 35 to 40 men.

ONEER MINE **BRITISH COLUMBIA**

Sold in 1919 to Mining Corporation of Canada, which see.

RTLAND CANAL TUNNELS, LTD. **BRITISH COLUMBIA**

E. J. Hearn, sec., 214 Belmont House, Victoria, B. C.

Officers: R. I. Elliott, K. C., pres.; J. A. Mara, R. M. Stewart and J. Waghorn, directors.

Inc. Aug. 23, 1912, in British Columbia. **Cap.**, $700,000; shares 25c par.

Property: 10 claims, crown-granted, near Stewart, Portland Canal, B. Company was organized to drive a crosscut tunnel to intersect the series of Glacier Creek, previously worked in the Portland Canal and he Stewart Mining Co.'s properties. The tunnel, over 3,000′ long, has ar failed to disclose orebodies of permanent commercial values. Idle 1914, owing to lack of funds.

EMIER MINING CO., LTD. **BRITISH COLUMBIA**

Address: R. K. Neill, mgr., Premier mine, via Stewart, B. C.; or Ameri- Smelting & Refining Co., 120 Broadway, New York City.

Officers: R. W. Wood, pres., Fernie, B. C.; H. A. Guess, of A. S. & o., v. p. and managing director, 120 Broadway, New York; Minor C. , v. p.; with R. K. Neill, mgr., W. R. Wilson, H. B. Price, W. C. Potter, tors, W. E. Merriss, sec.; L. A. Chapin, treas.

Property: the Premier or Bush mine, with the 8 Cascade Falls claims, ed in 1910 by William Dilworth and the Bunting brothers. Claims 4 and 8 contain the Premier mine. The property is adjacent to the a line, on the east side of Cascade creek a tributary of the Salmon and 14 miles from Stewart at the head of Portland Canal.

he claims were formerly owned by the Salmon-Bear River Mining Co., Canadian Mining Journal' of October 7, 1919), which did a little ing and tunneling, but neglected to open the great outcrop of the ade vein now being worked. The claims were idle until the summer 4, when W. J. Rolfe examined them for a Canadian company. The was traced for 800′ down the hill, the surface stripped and the es cut at regular intervals all exposed pay ore, some high-grade. ine was then bonded to New York interests and work re-started in ter of 1914, in charge of H. P. Plate, who drove 3 exploratory tun- After 18 months work, at cost of $60,000, the option was given up.

In 1918 R. K. Neill examined the ground and bonded it for $100,000. A few yards crosscut work in the reopened tunnel showed that it paralleled the vein and was 6' from it. An 82' crosscut showed ore that averaged $ per ton in gold and silver. Recent work has blocked out 1,000,000 tons $30 ore.

Development: by an adit, 600' long, opening milling ore the entire length, also 2 shoots 70' long, assaying $100 and $200 per ton, respectively. Two lower adits, 250 and 710' below the upper one, were in 400 and 5 February, 1920. Diamond-drilling is under way from the upper adit.

Production: during the winter of 1918-'19, 512 tons of ore shipped, averaged $350 per ton in gold and silver. In 1919, 490 tons of ore yielded oz. of gold and 108,285 oz. silver.

In October, 1919, the American Smelting & Refining Co. obtained a interest in the mine.

In December, M. D. W. Bacon, of Los Angeles filed suit against M Neill, claiming a half interest in the mine, based on an alleged partnership between them.

The Premier is evidently a big potential producer, equal, if not greater than the Tonopah Divide in Nevada.

PRINCETON MINING & DEV. CO. **BRITISH COLUMBIA**

Address: Princeton, B. C.

Officers: F. F. Foster, pres.-mgr.; G. E. Murphy, v. p.; Perley Russell, sec.-treas.

Inc. Oct. 12, 1917, in British Columbia. **Cap., $150,000:** par 10c; non-assessable; 500,000 shares issued.

Property: the Copper Farm group of 3 claims, 156 acres, 4½ miles S. of Princeton, on Great Northern R. R.

On the upper levels the vein shows 6" of ore assaying up to 16% copper and 2 oz. silver. On the lower level the vein is shattered and displaced. It is said to have large tonnage of milling ore blocked out.

In 1918, only $1,000 was received from ore sales; operating expenses reported as $6,000. Work was resumed in December, 1919, and machinery is to be erected in the Spring of 1920.

PTARMIGAN MINES, LTD. **BRITISH COLUMBIA**

Address: care H. H. Johnson, Victoria, B. C.

Property: 8 claims at 5,300' elevation, 15 miles inland from the mouth of Bear River, on Bedwell Sound, Vancouver Island. Considerable development work was contemplated on this property, but all work was suspended shortly after the outbreak of the European war.

Claims are on Big Interior mountain and show gossan outcrops underlain by chalcopyrite-magnetite ore. No recent information.

QUATSINO COPPER CO. **BRITISH COLUMBIA**

Dead. Succeeded 1916 by Coast Copper Co., which see.

QUEEN BESS MINE **BRITISH COLUMBIA**

Owners: Clarence Cunningham, London, B. C., and Dr. J. G. Cunningham, Spokane.

Property: 9 claims, N. W. of Sandon, show silver-lead ore in three veins developed by tunnels and by a 300' shaft. Spent $50,000 for equipment in 1918. Shipments, reported to aggregate several hundred tons per month, are made to the Alamo mill at Alamo, owned by the same people. Record of output not available.

QUEEN BESS MINES CO. **BRITISH COLUMBIA**

Address: O. A. Thomas, pres. and mgr., Hoge Bldg., Seattle, Wash.; E. Max, sec., Kamloops, B. C.

Property: 6 claims on E. side of North Thompson river, 2 miles south of Blackpool Station on Canadian Northern Ry., said to show fissured greenstone, with silver-lead and zinc ores. Veins are from 2 to 6' wide.

Development: 300' shaft and several tunnels, with several hundred feet of workings in which sufficient ore was considered in sight to warrant building a 50-ton concentrator which began operating in February, 19

UEEN MINES, INC. **BRITISH COLUMBIA**

Address: E. V. Buckley, mgr., Salmo, B. C.

Property: the Queen, Yellowstone and Alexandria mines and a mill- e on Sheeps Creek, near Salmo, said to show several veins containing gold e. Recent work has been concentrated on the Queen group, developed by)' shaft with drifts run every 100'.

Equipment: includes 20-stamp mill.

Property was under option to Tonopah Belmont M. Co., in 1916.

Mine credited with total production since 1908 of $700,000 in gold.

Reported in 1919 that property had been bonded to A. W. McCune, Salt ke City. See Kootenay Belle Gold Mine.

JESNEL FORKS GOLD MINING CO. **BRITISH COLUMBIA**

See Bullion Mining Syndicate.

\MBLER-CARIBOO MINES, LTD. **BRITISH COLUMBIA**

Address: Three Forks, B. C.; Sandon P. O., B. C.

Officers: A. F. McClaine, pres.; Alfred Coolidge, sec.-treas; W. A. meron, supt., with J. F. Hall, C. L. MacKenzie, Johnston Armstrong and Cornwell, directors; A. E. Cable, asst. sec.; J. A. McPhee, asst. treas.

Cap., $1,750,000; shares $1 par; all issued. Listed on Spokane Exchange.

Balance sheet of December 31, 1918, covering 8 months, showed total re- pts of $83,708, which included balance forward, $20,833; ore in transit and smelter, $62,775. Disbursements were $38,777, including $17,233 for ore duction and development, $10,119 for general mine expense, and $7,606 for ling expenses. Net earnings amounted to $44,930. Cash on hand amounted $44,930, not including $10,800, ore on hand and in transit. At end of Jan- y, 1920, cash amounted to $20,000.

Dividends: 1915-'16, $52,500; 1916-'17, $87,500; 1917-'18, $17,500. The ıpany is reported as having paid 22c per share in as many consecutive install- ıts prior to suspension of dividends in 1903. Total dividends including Sep- ıber 1, 1917, said to be $542,500; exact records not available.

Property: 5 crown-granted claims, at the head of McGuigan creek, near ·ee Forks, Slocan mining district, has been operated for many years as a er-lead and zinc mine, and has been extensively developed at depth. On 14th level a 5,000' crosscut was run, but development there was disappointing, orebody apparently not extending that far. The Jennie and Last Chance ms were acquired for $65,000, of which the final payment of $25,000 was le in January, 1920.

Development: for last 8 months of 1918, amounted to only 200'. In uary, 1919, the superintendent stated that there was sufficient ore in sight ceep the mill operating for one year. In July, 1919, company purchased 2 ›ining claims, mentioned above, which are said to have 1,600' of the vein. November, 1919, company was mining ore from the 1,000', 1,200' and 1,300' ls.

Concentrator during last 8 months of 1918 treated 5,400 tons of ore, pro- ing 400 tons lead concentrate and 310 tons zinc concentrate.

The product is lead and zinc concentrates and crude lead ore. The first- s crude ore runs from 148 to 165 oz. silver and 50 to 58% lead, and the lead :entrate averages from 70 to 100 oz. silver and 32 to 40% lead. The zinc :entrate runs 35 to 37% zinc and about 25 oz. silver; it is sent to the lter at Trail.

Management is considered "honest, efficient, and extremely conservative," gives out but little information.

:O MINING & MILLING CO. **BRITISH COLUMBIA**

J. M. Harris, pres. and mgr., Sandon, B. C.; F. T. Kelly, sec.-treas., ion.

Inc. Sept. 18, 1896, in British Columbia. **Cap.,** $1,000,000; par $1; out- ding 958,200; non-assessable.

Gı earnings for 1918 were but $4,023, and operating expenses $3,020.

Dı **ends:** to 1919 totaled $332,492.

Property: the Reco mine, a formerly famous producer, 5 claims, near

Sandon, B. C. Claims show 2 fissure veins in slate and porphyry carrying silver-lead ore.

Development: by tunnels, with about 15,000′ of workings. Output in 1918 reported as only about 37 tons of ore.

RECORD MINING CO. **BRITISH COLUMBIA**

Address: Exchange Nat'l Bank Bldg., Spokane, Wash.

John R. Cassin, trustee; W. H. Turner, mgr.

Cap., $100,000; shares 10c par; 600,000 issued.

Property: the California mine, about 3 miles from Nelson, said to show a 4-8′ vein with 6″ shoot of gold-silver-zinc ore, developed to 500′ vertical depth with 1,300′ of workings. Shipments by former owners reported to total $50,000. In 1918 considerable development was done, but no shipments made. Employed about 8 men.

RED CLIFF MINING CO. **BRITISH COLUMBIA**

Idle. Bankrupt. Mine at Stewart, Skeena district, B. C. See description in Vol. XII.

RELIEF MINING CO. **BRITISH COLUMBIA**

Address: Erie, B. C., and Bayfield, Wis.

Officers: Frank Stark, pres.; H. J. Wachsmuth, v. p. and treas.; W. C. R. Liehy, R. J. Nelson and A. D. Westby (mgr.), directors; F. V. Holmes, sec.

Inc. March, 1914, in Arizona. **Cap.,** $300,000; shares $1; 250,000 shares issued. First Nat'l Bank, Bayfield, Wis., registrar. Annual meeting, first Tuesday in May.

Property: 6 claims, patented, 186 acres, on Salmon river, in West Kootenay, Nelson mining division, 14 miles N. from Erie B. C., said to show sulphide ore in a quartz fissure vein in diorite. Vein strikes N.-E. with dip of 85°. Pay ore occurs in shoots, from 50-170′ wide, and is said to average $ per ton in gold.

Development: to 416′ depth by 4 tunnels, each 1,200′ long.

Equipment: includes 14-drill compressor, pump, steam power and 75-ton cyanide mill.

Mine is credited with production of over $500,000. In 1918, shipments to Greenwood smelter amounted to 85 tons concentrates resulting from 1,241 tons ore treated. Eleven men were employed and $13,700 was spent on new equipment. In July, 1919, a fire destroyed much of the surface equipment. Work will be resumed.

ROCHER DE BOULE COPPER CO. **BRITISH COLUMBIA**

Temporarily idle.

Office: 419 D. F. Walker Bldg., Salt Lake City, Utah. Mine at Hazelton, B. C.

Officers: M. S. Browning, pres.; A. Fred Wey, v. p., and S. A. Douglas, directors.

Inc. Oct. 15, 1911, in Arizona. **Cap.,** $1,000,000; shares $1 par; non-assessable; fully issued, fully paid. Listed on Butte (Mont.) Exchange. Annual meeting, October 20.

Property: 6½ claims, crown grant, 325 acres with 50 acres millsite and 100 acres other lands, in Hazelton district, 9 miles from the Grand Trunk Pacific railroad.

Ore occurs in fissure veins in granite, veins having an E.-W. strike with dip of 60°. Five ore-shoots developed had average width of 5½′, 3,000′ long and proven to depth of 150′, according to management.

Development: by shaft and 800′ tunnel. Copper occurs as chalcopyrite and bornite.

Mine was under lease to Montana Continental Dev. Co. from 1917 to February, 1916, and during this time value of shipments totaled over $700,000.

Equipped: with 240-h. p. hydro-electric plant, aerial and surface tramways, compressor and saw-mill by lessees who worked mine on royalty basis.

For several years this mine was the most important in the district. The exhaustion of the developed orebodies in the upper levels caused a decrease

duction in 1918, and in October, 1918, the property was shut down until cons should become normal.

Production: from April, 1915, to the time it closed down, was 39,833 s of ore, containing 4,214 oz. gold, 62,865 oz. silver, and 5,746,306 lb. copper. detailed descriptions, see the 1914, 1916, 1917, and 1918 Annual Reports the Minister of Mines, B. C.

SEBERY SURPRISE MINING CO., LTD. BRITISH COLUMBIA

Head office: Nelson, B. C. **Operating office:** Sandon, B. C.

Officers: H. L. Hollis, pres.; W. C. Boyden, v. p.; Otto T. Langbein, treas. J. P. MacFadden, gen. supt.

Property: company operates the Surprise and Ivanhoe mines near don, shipping to concentrator at Rosebery, and the Canadian mine, now er development; it also operates the Bosun mine at New Denver, the nhoe mill at Sandon, and the Rosebery mill at Rosebery, B. C.

Bosun mine: near shore of Slocan lake, half-way between New Denver Silverton, was worked about 15 years ago, but only acquired by present ıpany in 1917. Vein is large and carries lenses of galena ore carrying zinc ıde, but running high in silver. The blende ore is said to assay 70 to 90 oz. er and between 45 and 55% zinc. Old workings consist of 5 tunnels driven the vein and opening it to a depth of 400'. Recent work comprises an exion of old workings and driving the lower or No. 6 tunnel a half mile to ı a depth of 800' on the vein. Sixty men employed. Production for 1918, ɔrted as 27,764 tons of ore; grade not given.

Surprise mine: 3 crown-granted claims, 93 acres, 2 miles N. E. of San-, has lead-zinc ore in a fissure vein in slate. Development: a main tunnel 3,000' long, with total workings of 15,000'. Mill feed assays 62 oz. silver, lead, and 16% zinc. Output in 1918 totaled 13,998 tons of ore.

Ivanhoe group: acquired under option in 1918, from **Minnesota Silver** located in the divide between Sandon and Four-mile crek, though in elopment stage, is producing. Its output in 1918 was 53 tons, but in Sepber, 1919, it had reached 1½ cars daily. The company also owns the Moni-Ajax, and Canadian groups in the same locality.

Rosebery concentrator: acquired in 1917, was built by original owners he Monitor, Ajax, and Bosun properties. Present owners have spent over 00 in remodeling the mill. Ivanhoe concentrator operated until February, on Surprise ore, then closed temporarily. All concentrates are shipped to United States under a long-term contract.

It is probable that the Surprise mine has passed its zenith, but with the ent efficient management and the acquisition of new properties the com- has a most promising future.

SSLAND KOOTENAY MINING CO., LTD. BRITISH COLUMBIA

Idle since 1904. **Office:** 325 Crown Court, Old Broad St., London, E. C., **Mine office:** Rossland, Trail district, B. C.

Officers: C. Williamson Milne, chairman; Dr. G. Schack-Sommer and el W. Harris, directors; W. S. Gregg, sec.

Inc. May 17, 1902, in Great Britain, as a reconstruction of Rossland-t Western Mines, Ltd., and Kootenay Mining Co., Ltd. **Cap.,** £150,000; es £1 par; issued, £148,607.

Property: 171 acres, at Rossland, carrying auriferous and argentiferous er ores, of low grade, and 113 acres placer at West Kootenay. The com- also owns 2,615 shares of the Santa Eulalia Development Co., Ltd., owning Nueva Chihuahua property at Santa Eulalia, Chih., Mex. Revolutionary conns have prevented any work for several years in Mexico.

'H MINES, LTD. BRITISH COLUMBIA

In 1917, company went into voluntary liquidation and property was offered ale. Reported in March, 1919, that company was being reorganized. No ls of officers or capital.

Property: the Ruth and Hope mines, near Sandon, were worked during and small shipments made. In September, 1919, reported that the vein

had been cut in the lower tunnel 600′ from the portal, and where cut had a width of 8′.

SALMON BEAR RIVER MINING CO. **BRITISH COLUMBIA**

Property: the Bush mine, now operated by the Premier Mining Co. Ltd., which see.

SILVER BELL MINE **BRITISH COLUMBIA**

Owners: R. F. Green and Sam Green, Kaslo, B. C.

Property: a high-grade silver-lead mine on S. fork of Kaslo creek. **Development:** by tunnels. Several carloads of ore shipped in 1919.

SILVER CREEK MINES, LTD. **BRITISH COLUMBIA**

Address: Revelstoke, B. C. D. Woolsey, mgr., Albert Canyon, B. C.

Officers: J. H. Brasetti, pres.; D. Molsey, v. p. and mgr., with Patrick Treanor, directors; H. C. Forsyth, sec.; J. B. Watson, treas.

Inc. Sept., 1918, in British Columbia. **Cap.,** $750,000; par 50c; issued 700,000 shares; non-assessable.

Property: the Woolsey group, 11 claims, unpatented, about 500 acres, 7 miles by trail from Albert Canyon Sta. on C. P. R., shows a fissure vein in slate and gneiss. Ore is silver-lead, with a quartz gangue.

Development: by tunnels. Property is a promising prospect.

SILVER CROWN MINING CO. **BRITISH COLUMBIA**

Office: 505 Rookery Bldg., Spokane, Wash. **Mine office:** Trout Lake, B. C. **Officers:** Fred Hamilton, pres.; A. C. Bartels, v. p.; A. Herman, sec.-treas., with Geo. Skore and H. C. Weyerhoist, directors.

Inc. Feb., 1917, in Washington. **Cap.,** $125,000; shares 10c par; assessable; 852,250 issued.

Property: 3 claims, 150 acres, in West Kootenay mining division, B. C.

Geology: fissure vein in granite and limestone, dipping 45° and pitching N. W. Shoots are from 18 to 36″ wide. Ore contains silver and lead, assaying $125 per ton. **Development:** by 1,300′ tunnel to depth of 550′.

Production: in 1917 was $65,000. No recent information; probably idle.

SILVERED-COPPER MINING CO. **BRITISH COLUMBIA**

Office: 1621 Madison St., Denver, Colo. **Mine office:** Aldermere, Omineca district, B. C.

Officers: F. Thoman, pres.; C. W. Peaslee, v. p.; C. A. Hubbard, sec.-treas.; C. E. Thoman, gen. mgr.

Inc. March 23, 1908, in Arizona. **Cap.,** $1,000,000; shares $1 par; non-assessable; issued, 568,754 shares. Debentures, $50,000 authorized and issued.

Property: 6 claims, 300 acres, in the Hunter Basin, Omineca district, about 15 miles from the railway at Telkwa, shows a bedded agglomerate of volcanic rocks, chiefly diorite, beds standing almost perpendicular and strike N. 35° E. Orebodies occur as true fissure veins in diorite. Ores contain bornite and chalcocite. Three cars ore shipped to smelter in 1914 said to have averaged a little over 100 oz. silver and 5% copper per ton.

Development: by a short tunnel, numerous pits and open cuts, with a total of about 200′ of workings.

SILVER HOARD MINING CO. **BRITISH COLUMBIA**

Reorganized as the Dellie Mining & Milling Co., which see.

SILVER KING MINES, LTD. **BRITISH COLUMBIA**

Office: Trail, B. C. **Mine address:** Nelson, Kootenay Lake, B. C.

Officers: Jas. J. Warren, pres.; S. G. Blaylock, v. p.; T. W. Bingay, sec.; W. M. Archibald and R. S. Lennie, directors. Company is owned jointly by the Kootenay Bonanza Co., and the Consolidated Mining & Smelting Co., of Canada, Ltd., in the proportion of ¼ and ¾, respectively.

Property: 5 claims, on Toad mountain, back of Nelson, B. C., including the old Silver King mine, formerly owned and operated by the Hall Mining & Smelting Co., Ltd. Mine is opened by a shaft to the 10th level, showing 3 well-defined veins in diabase schist. The ore occurs where the veins are intersected by 2 dikes, and in the altered surface zone is principally bornite, with tetrahedrite, iron pyrites and silver occurring in the unaltered zone below. Gold is present

small amounts. Considerable ore was extracted in the past from above the level in the Main vein. The South vein and the K. vein were practically unched. Ore reserves are estimated at 100,000 tons. Ore in the Main vein has n proven to a depth of 1,130′ by diamond drill borings.

Equipment: includes electrical motors of 50-h p., a 100-h. p. electric np, an 1,850′ tramway, and all necessary mine buildings. Shut down 1915-16. 1918 mine was kept unwatered and 6,180′ of diamond-drilling was done. ore was shipped.

LVERSMITH MINES, LTD. **BRITISH COLUMBIA**

Offices: Sandon, Slocan district, B. C. John B. White, pres., 1017 Paul- Bldg., Spokane, Wash.; Oscar V. White, gen. mgr.

Company is the successor of Slocan Star Mines, Ltd., which went into liquiion in 1917. Present company organized in 1918, acquired entire assets of can Star Mines by assuming a $98,000 bond issue and a $24,000 floating inedness. Shareholders of Slocan Star were given share for share, upon ment of 3½c additional. For every $5 so paid in, shareholders received one re of preferred stock.

Cap., $750,000, of which $150,000 is 7% preferred, par $5, and $500,000 mmon stock, par 20c; assessable, of which $165,193 and $103,044 issued, rectively. Preferred stock must be retired before dividends can be paid upon mmon. In February, 1920, preferred shares could be retired at rate of $5 h without interest, and common to be issued at 15 cents. At end of 1919 standing bonds were reduced to $40,000. Cash assets at end of 1919 were 513, plus $40,000 for concentrate in transit. The profit in 1919 was $41,754.

Failure of Slocan Star Mines is laid to excessive construction costs due to milling, hydro-electric, and other equipment, failure to keep development ad of extraction, and largely lack of sufficient capital.

Property: at Sandon, Slocan district, consists of the Slocan Star and bbit Paw groups of 12 crown-granted claims, which were involved in the tracted and costly apex litigation between the Star Mining & Milling Co., intiff, and the Byron N. White Co., in the Supreme Court of B. C. for about years. Holdings also include a patented millsite and extensive water rights.

Ore carries silver, lead and zinc, occurring as large shoots in the Slocan r lode, a strong fissure vein in slate, traceable over a mile. This strikes E.-S. W., dips S. 47° and is 6 to 8′ wide, bulging in places to as much as across.

Development: by 10 main tunnels, No. 10, the lowest, is 2,300′ long; l workings over 15,000′. Reserves have been practically exhausted down to level. From the 6th level to surface several shoots of sphalerite with side- gangue were left intact in former years. Reported in May, 1919, that the rk disclosed a new oreshoot 400′ long, that had a width of 7′ for half this dice and averaged 4′ wide for the other half. It continues up to the 200′ level, a fault cuts it off on the 400′ level. Shipments totaling 500 tons are said to e averaged $121 per ton. In June, a new orebody 3′ wide was reported cut the 8th level. On No. 10 level the main shoot is 450′ long and 4′ wide. Reves were given as 90,000 tons at end of 1919.

Equipment: added recently includes 15-drill compressor, 1,500-h. p. elecal plant, 4,000′ aerial tram connecting mill with shipping bins at Sandon, and ation units added to the 100-ton concentrator, increasing capacity to 250 tons l is level with No. 10 adit. There are 64 men employed.

Production: in 1919 was $219,432 from crude ore shipped and concenes from 14,235 tons milled. Expenses were $175,382.

VER STANDARD MINING CO. **BRITISH COLUMBIA**

Office: 506 Winch Bldg., Vancouver, B. C. **Mine office:** W. C. Norrieventhal, New Hazleton, B. C.

Owners: J. W. Stewart, Angus Stewart, D. McLeod, and the estate of A. L. McHugh.

Gross earnings in 1916 were $49,000, and $65,000 in 1918.

Property: the Silver Standard mine, 14 crown grant claims, 700 acres, iles N. of New Hazelton, in Omineca district, said to show 9 fissure veins

in calcareous sandstone, dipping 62° and pitching N. 50° E. Veins are fr
12 to 72" wide and 3 of them carry profitable ore. Shoots are 100 to 200' lo
Ore is a sulphide, mill ore averaging 0.10 oz. gold, 30 oz. silver, 3% lead a
11% zinc.

Development: by 1,300' tunnel to be extended 200', and total of o
4,000' of workings to 500' depth. Mining is by shrinkage stoping. Reser
are 15,000 tons. No. 4 vein has a continuous shoot over 400' long.

Equipment: includes Jenckes hoist, 350 cu. ft. compressor. In 191
50-ton concentrator of the Faust type was completed on Two Mile creek, abo
miles from the mine. Ratio of concentration is 5 to 1. Ore is hauled by tru
from mine to mill. In 1918 lead concentrate assayed ½ oz. gold, 200 oz. s
55% lead and 4% zinc, shipped to Trail, B. C. Zinc concentrates that ave
0.3 oz. gold, 140 oz. silver, 35-40% zinc, and 5% lead, were shipped to U. S
Zinc Co., Okla.

Production: in 1916, 707 tons of ore yielded 444 oz. of gold, 269,624 o
silver, 110,868 lb. lead, and 297,372 lb. zinc. The 1917 figures are not availab
In 1918, 3,370 tons of ore were milled, producing 185 tons lead and 500 tons zi
concentrates, containing approximately 600 oz. gold, 450,000 oz. silver, 950,000 l
lead, and 860,000 lb. zinc.

The property was closed down early in 1919, but work was resumed May
The mine is well located for cheap mining; wood and water are plentiful and ra
way transportation is within a short distance.

SILVER TIP MINING & POWER CO. **BRITISH COLUMBIA**

Office: J. H. Beattie, 718 Green Bldg., Seattle, Wash.

Officers: at last accounts, A. Julian, pres.; G. B. Gilfillan, v. p.; M. S
Davys, engr.

Inc. Jan. 15, 1910, in Washington. **Cap.**, $1,000,000; shares $1 par; 615,8

Development:
50 and 100 levels.

Equipped with a small, efficient plant, including a compressor. Owners hope levelop sufficient tonnage to warrant building a mill.

OKANE MINING & DEV. CORP. BRITISH COLUMBIA

Office: Nelson, B. C.

Officers: J. A. McLean, pres.; F. A. Starkey, v. p.; Chas. F. Caldwell, .; C. M. Leamonth, sec.; W. F. Baker, treas., with H. T. Hodge, and M. C. nahan, directors. C. M. Moir, mgr.

Inc. May, 1917, in British Columbia. **Cap.**, $1,500,000; par $1.

Property: the Monarch mine, 7 claims, in Nelson mining division, 37 es from Trail, said to show 2 fissure veins between diorite footwall and nite hanging-wall. Vein matter consists of quartz, calcite, pyrite, and chal- yrite. No. 1 vein is proven for 800′ by open cuts and pits, and varies up 20′ in width. Several cars of ore shipped assayed 3½% copper, and $1.50 to 0 gold and silver per ton. No. 2 vein opened by open cuts and 150′ tunnel, aid to be traceable for a mile on surface. Shipments amounted to about 170 s in 1918.

OKANE ROCHER DE BOULE MINING CO. B. C.

Officers: P. J. Jennings, pres., 1314 Addison St., Spokane, Wash. P. A. dy, v. p.; John J. Jennings, sec.-treas., at last accounts.

Inc. April, 1916. **Cap.**, $100,000; shares 10c par; 600,000 shares sub- bed by incorporators, balance in treasury.

Property: 7 claims, including Spokane & Washington and has bond on y West group, near New Hazelton, B. C. Ore so far developed said to y 7% copper, $2 gold and 15 oz. silver per ton.

Development planned is 1,000′ drift tunnel on vein giving 1,000′ back at and cutting beneath four ore-shoots. In 1917, $30,000 was to be spent in alling compressor plant, power station on Mission creek, an aerial tram and on road, an ambitious program for this amount of money.

No recent information; probably idle.

ANDARD SILVER LEAD MINING CO. BRITISH COLUMBIA

Offices: Empire State Bldg., Spokane, Wash., and Silverton, B. C.

Officers: W. J. C. Wakefield, pres.; Geo. H. Aylard, v. p.-gen. mgr.; s. Hussey, sec.-treas., Victoria, B. C., with Henry White and W. A. Corey, ctors.

Inc. Dec., 1910, in Washington. Operated under present management e 1911. Controlled by the Finch-Campbell-Clark estates of Spokane. ., $2,000,000; shares $1 par; fully paid; non-assessable; all issued. An- l meeting, first Tuesday in May. Security Transfer & Registrar Co., New k, registrar and transfer agent. Listed in Spokane and on New York b.

Annual report for 1918 showed a profit for the year of $114,764, compared $377,494 in 1917. The surplus increased from $202,801 to $317,565. In 1919, the mine earned a profit of $8,788, but June operations were at a of $15,637. Balance at end of 1919 stated to be about $300,000.

Dividends: 1912, $425,000; 1913, $650,000; 1914, $475,000; 1915, monthly at of 2½% commenced September 10, total for year, $250,000; in 1916, $600,- in 1917, $300,000; none since; a total of $2,700,000 to 1920.

Property: 10 full claims, 6 fractions, 600 acres, 2 miles N. E. of Silver- located on Slocan Lake, B. C. The claims carry fissure veins in slate and bitic schist. Ore carries silver, lead and zinc in a quartz-pyrite gangue. occurs as gray copper and ruby. The orebodies occur in the form of ular masses along the vein, varying in width from 1′ to 25′.

Development: tunnels numbered from 1 to 7, inclusive, open the to a depth of 800′; tunnel No. 8, now being driven, gives an additional 400′ e reserves are not reported, but management claims that reserves any years of profitable operations. By December, 1919, a new ore , 5 and 7 levels had been opened for over 300′ in length. The idth, and averages 16% zinc, 5% lead and some silver. es are readily concentrated and constitute the bulk of the wever, a large amount of material in the vein in

which ruby silver and zinc blende occur as streaks and coatings and in which galena is found in a very finely divided state in graphitic schist and slate. Such ores are treated successfully by using Wyman pneumatic flotation machines which have given a total recovery of 93-95% of the value in the mill feed. The ore as sent to the mill averages 24% lead, 35 oz. silver and 14% zinc.

Equipment. 150-ton concentrator, hydro-electric power plant on Four Mile creek and an 8,000′ tramway connecting mine and mill. Seventy-five men employed.

Production: in 1918, silver-lead ore realized $112,898, and zinc ore, $227-338, a total of $340,236, compared with a total of $881,616 in 1917. Other years follow:

Year	Ore, tons	Silver, oz.	Lead, lb.	Zinc, lb.
1916	69,764	.....	.....	.....
1915 (b)	39,447	.....	.....	.....
1914 (a)	49,720(b)	1,050,000	10,000,000	5,000,000
1913	13,959	1,081,849	17,988,805	.....
1912	9,702	811,823	13,497,260	.....

(a) Approximate production. (b) Gross; tons milled, 44,806 in 1914, 35,920, in 1915.

Mill shut down by labor trouble for four months preceding August, 1919, when work was resumed and concentrates shipped.

STAR MINING & MILLING CO. **BRITISH COLUMBIA**

See Silversmith Mines, Ltd.

SUNLOCH MINES, LTD. **BRITISH COLUMBIA**

Officers: R. H. Stewart, pres. and mgr.; W. P. Tierney, v. p.; with W. J. Wilson, H. Rindal, Stuart Campbell, and R. J. Winters, directors, all of Vancouver.

Inc. 1917. **Cap.,** $1,000,000; par $1.

Property: Sunloch group, 22 claims, on Jordan river, 42 miles by road from Victoria; also an option on adjoining Vulcan group. A logging railway connects the property with tidewater.

Development: has been confined almost entirely to one claim, Sunloch No. 6, on which there are 3 well-defined ore-bearing zones, known as the River, Cave, and Archibald lodes. A tunnel on the River zone cut 5′ of 1.9% copper ore, 20′ of 3.7% ore, and 3′ of 3.8% ore, partly opening 280′ along vein at a depth of 240′. An adit on the Cave zone passed through 60′ of 4% ore; at 180′ a crosscut S. cut 60′ of 0.9% ore, 20′ of waste, 36′ of 2.58% ore, including 11′ of 5.1% ore, this at a depth of 240′ from surface. A diamond drill hole, 150′ farther in than the crosscut and at a depth of 400′ cut about 15′ of ore assaying 0.65 to 7.9% copper. Less work has been done on the Archibald zone, but it is considered equally promising. Work on opposite side of river shows that the Cave zone continues into the Vulcan group.

Development on the property has shown that property has merit and that warrants further development. Reported in October, 1919, that Cons. Mng. & Sm. Co. is considering building a 500-ton mill to treat the ore.

SURF INLET GOLD MINES **BRITISH COLUMBIA**

Corporation sold its property to Belmont Surf Inlet Mines, Ltd., for 20% of the capital stock of that company.

SURPRISE MINE **BRITISH COLUMBIA**

Owned and operated by Rosebery Surprise Mining Co., which see.

TACOMA STEEL CO. **BRITISH COLUMBIA & WASHINGTON**

Tacoma Bldg., Tacoma, Wash. **Mine offices:** Van Anda, Texada I., and Darrington, Snohomish county, Wash.

R. Balkwill, pres.; E. M. Shelton, v. p.; A. F. Eastman, sec.-tr.; D. C. Stephens, supt.

Organized originally $5,000,000). Paid five $35,000 dividends [illegible] at Darrington, carrying gold-copper ore, idle for [illegible] coal-bearing properties in Washington, 208 acres of [illegible]

s lands on Vancouver Island, B. C., and the Marble Bay copper mine, 3,000 res. crown-granted, near Marble Bay harbor, at the northern end of Texada and.

The Marble Bay mine, about one-fourth mile from the Cornell and Copper ieen mines, has ore of similar nature occurring as lenticular shoots, carrying gentiferous chalcopyrite, with bornite, in a garnetiferous marble. The mine developed by a 1,600′ three-compartment shaft, showing, on the lower levels, vein of 18′ width, with copper values unchanged and gold values gaining with pth. Recent development work mainly between 1,600′ and 1,750′ below sea el.

Development: work in 1919, entirely by diamond drilling between 16th d 17th levels.

Equipment: includes steam and electric power, with 5 hoists, 5-drill and -drill air compressors. There is a wharf, on Marble Bay, having large ore nkers, connected with the mine by a ground tram. In connection with the ne there is a limestone quarry and 4 kilns, with daily capacity of 300 bbls. lime.

Production: 11,697 tons of gold-silver-copper ore in 1917; 626,422 lb. of pper in 1918. Employs 80 to 100 men.

ARHEEL COPPER CO., LTD. **BRITISH COLUMBIA**

C. J. Lincke, supt.

Property: the Tarheel group of claims, near Golden, B. C., on the ddle fork of the Similkameen river, Golden mining division. Reported in ptember, 1919, that company expected to ship several carloads of ore that ould assay about 15% copper.

ASSOO MINING & SMELTING CO., LTD. **BRITISH COLUMBIA**

Out of business. Property now owned by F. C. Elliott, of Victoria, B. C., d J. E. Cortell, of Seattle, Wash., described , Vol. XIII.

AYLOR MINING CO., LTD. **BRITISH COLUMBIA**

Office: Victoria, B. C., and at Dolly Varden mine, Alice Arm, B. C.

Officers: A. J. . Taylor, pres.; with R. P. Butchart, H. C. Chiene, C. M. owlson, and J. F. Tener, directors. D. E. Young, gen. mgr.; R. B. McGinnis, st. supt.; H. S. Brownin, accountant.

Inc. in June, 1919, with capital of $1,500,000, $1,200,000 paid up, by the aylor Engineering Co., to take over the property of the Dolly Varden Mines . This ended a legal squabble that tied up the property for some time, and as a much discussed matter in the Provincial Legislature. The Taylor Engiering Company constructed a railway from tidewater to the mine, but the ines company failed to pay for the work done, which drove the Engineering mpany into financial distress as it owed $462,500 borrowed to pay construcn bills. Meanwhile, the Dolly Varden company gave the Temiskaming Ming Co., of Ontario, an option on the mine for $900,000. Finally, the Legislature ve owners 10 days in which to pay off all labor claims and the Engineering mpany's account. The D. V. mines company defaulted, so the Engineering mpany took possession, paid off the debts and organized the Taylor Mining . for development of the mine. In December it was announced that the lidity of the legislation ordering the transfer was to be contested in the ominion courts.

Property: the Dolly Varden and Wolf silver mines, 480 acres of pat- ted ground, on the Kitsault river, 18 miles from Alice arm, near Granby bay. ilroad connects mine with tidewater, 18 miles distant. Mine is described in ng. & Min. Jour." of March 13, 1920, by Robert Dunn.

Geology: ore occurs in a shear zone in andesite, the ore being con- ered as secondary. Near the surface native silver occurs in extremely rich eaks. Lower down, ruby, silver, argentine, and stephanite also occur and at 0′ in depth ruby silver is the principal mineral. Fine-grained pyrite, carrying ld ues occurs from surface to bottom level (300′ in 1919). Faulting g is common and make a complex structure.

to depth of 300′ by 3,000′ of drifting in several tunnels, Besides this tunnel work, 9,000′ of diamond drilling has

shown ore to depth of 500'. The work so far done is said to have developed about 45,000 tons ore, an amount which will probably be increased by further work. Samples of shipping ore gave 244 oz. silver, 18% lead, 12.4% zinc.

Equipment: includes 18-mile railway from mine to Alice Arm and 2.00 aerial tram, etc. The railway was extended to the Wolf mine in 1920.

Company was reported to be planning a 150-ton concentrator with final separation by flotation, 700 h. p. hydro-electric plant, etc.

Production: total shipments amount to 7,000 tons, and silver output in 1919, was 400,336 oz. from 6,373 tons of ore.

The Wolf group: 2 miles N. of the Dolly Varden, on opposite side of river, also belongs to the Dolly Varden group. Ore is similar to the Dolly Varden, though a little lower in silver.

Development: consisting of 85' of tunnels, 770' of open cuts, and 4,80 of diamond-drilling has shown probable existence of 120,000 tons ore containing about 1,800,000 oz. silver, and over 400,000 tons of lower-grade ore.

TIDEWATER COPPER CO. **BRITISH COLUMBIA**

A subsidiary of the Alaska British Columbia Metals Co., 74 Broadway, New York. H. B. Price, pres.-gen. mgr. The A. B. C. Co. owns 90% of entire stock issue. Dan M. Drumheller, Jr., supt.

Inc. in Washington. **Cap.**, $1,000,000; par $1. **Bonds:** $300,000, 7-year 7% first mortgage conv., guaranteed by A. B. C. Co.

Property: 8 claims, 300 acres, also an 80-acre manufacturing site on the beach, 200 miles N. W. of Seattle, Wash., by boat to Sydney inlet on west coast of Vancouver Island, B. C. Property formerly known as the Indian Chief claims, has been worked by many different companies since 1897, and is said to have produced 15,000 tons of 4½% copper ore. Ore is a contact deposit of garnetized limestone containing bornite, with small quantities of chalcopyrite and chalcocite, capping a granodiorite hill.

The present company acquired the property in 1916, and in 1917 built a 100-ton flotation mill, operated a few months at a considerable loss, due, it is reported, to unsatisfactory machinery, and to an irregular ore supply, often of low grade. A new 300-ton mill was under construction, March, 1920. A 3,000' aerial tram connects the mill and mine, which is opened by tunnels.

The Provincial Mineralogist reports that (Annual Report of Minister of Mines of B. C. for 1917): "The south orebody in the No. 2 adit has a length of 480' with a width of 4' to 40' and a vertical development of 180'. Until further work is done, no reliable estimate of tonnage is possible. There are no well-defined walls, but vein material merges into barren rock similar to the gangue, and this change is erratic and irregular."

The company claims to have 500,000 tons of developed ore assaying 2% copper, 1 oz. silver, and 40c gold per ton, with a net value of $4 per ton. Production costs when milling 200 tons of $8.20 ore per day are estimated by company (January, 1919) as follows: Mining, $1; milling, $1.25; tramming, 10c; freight and smelting, $1; new development, 30c; amortization, 10c; overhead, 25c; a total of $4 per ton, an estimate which is regarded as far too low. (See Annual Report of Minister of Mines, British Columbia, for 1917, pp. 248-250, and in the 1918 report, p. 266.)

TRAIL SMELTER **BRITISH COLUMBIA**

Owned by Consolidated Mining & Smelting Co. of Canada, Ltd., and described under that title.

TREASURE MOUNTAIN MINING CO. **BRITISH COLUMBIA**

Officers: W. B. Dornberg, pres.; J. C. Edwards, v. p.; W. W. Dreyfus, sec.-treas., all of Spokane, Wash.

Cap., $1,000,000; par $1; non-assessable.

Property: 6 claims, 20 miles N. of Tulameen on Kettle Valley R. R., Similkameen division, Yale mining district, shows veins with silver-lead ore developed by several tunnels, longest over 800', with about 1,500' of workings. Ore is said to be of good grade. Property is 20 miles from railroad. No information since 1918.

'RUE FISSURE MINING & MILLING CO. BRITISH COLUMBIA

Officers: G. F. Park, pres.; T. W. Mitchell, sec., both of Cincinnati,)hio. A. C. Houston, supt., Ferguson, B. C.

Cap., $2,500,000; par $1; non-assessable.

Property: 8 crown-granted claims, and 160-acre millsite on Trout Lake ivision, West Kootenay district, ½ mile from Ferguson, shows silver-lead-inc ore with some gold, which assays to 75 oz. silver, 35% lead, 25% zinc, and .15 oz. gold. Developing in 1918 and 10 men employed.

'YEE COPPER CO., LTD. BRITISH COLUMBIA

Smelter and assets sold in December, 1916, to the Ladysmith Smelting Cor-oration, Ltd., which see.

'NION MINING CO. BRITISH COLUMBIA

Address: Grand Forks, Lewis Johnson, part owner and mgr.; company ot incorporated.

Property: 4 claims, 150 acres, Gloucester camp, Grand Forks division, 'ale district, shows gold-silver ore.

Development: by 4 tunnels, with several hundred feet of workings. 'he mine is 27 miles from rail, and transportation and smelting charges absorb ost of the value. Owners have been trying to raise money to build a mill.

Production: in 1916, 605 tons of $35 ore; in 1917, 751 tons shipped re-urned $31.80 per ton; in 1918, 153 tons assaying $6.20 to $12.80 gold and 31-50 z. silver per ton.

'NITED METALS MINING CO. BRITISH COLUMBIA

D. J. Hancock, supt.

Property: 3 claims, 14 miles up Illiance river, showing numerous quartz eins in sedimentaries; continuity of ore-shoots in length and depth is very rregular. Mineralization consists of galena and zinc-blende, carrying high sil-er values. Property has been undergoing exploration, no ore being shipped, hough high-grade ore has been sacked, ready for shipment.

Reported in September, 1919, that all right, title, and interest in the com-any had been sold to D. J. Hancock for $25,000, and that the only interest the tockholders have remaining is the division of the money to be paid by him.

JTICA MINES, LTD. BRITISH COLUMBIA

Office: Kaslo, B. C.

Officers: Chas. F. Caldwell, pres.; T. R. French, sec.-treas., with H. R. Vade, F. T. Abey, and V. D. Williamson, directors. W. C. Sivyer, R. H. Voor-ees and W. Tolman, directors.

Inc. in British Columbia. **Cap.,** $2,000,000; shares $1 par; non-assessable; ,600,095 issued; 200,000 shares offered at 10c each in December, 1919, to pay ressing debts. Auditors' report, January 12, 1918, showed cash on hand, $213; uildings, equipment, etc., $28,470; mine, $1,427,945; stock discount, $184,628; otal assets, $1,690,310. Liabilities included accounts payable, $6,994; bills pay-ble, $7,500; profit and loss, $75,690. An initial dividend of 2c was paid in June, 917, followed by 2c in September. These two dividends, together with fact that melters refused to accept the ore on account of the high zinc content, left the reasury in a depleted condition at end of year.

Property: silver-lead-zinc holdings in Ainsworth district, B. C.

Development: by tunnels to 1,200' below vein outcrop. Workings cover ver 6,000'. In 1918, the mine operated only about 3 months, due to lack of unds. Output was 222 tons of ore, which produced 13,661 oz. silver, and 10 ons lead. Operations were suspended in April, 1919, but in November some re was being mined.

/ALDEZ ISLAND COPPER CO. BRITISH COLUMBIA

Address: Victoria, B. C.

Officers: F. E. Rosher, pres.; C. B. Rosher, sec., with G. A. Fraser and E. Brammer, directors. T. H. Kerrnish, supt.

Cap., $500,000; shares non-assessable.

Property: 19 claims, Copper Mt. group, about 730 acres, at head of Gowland harbor, on Quadra Island, 120 miles N. W. of Nanaimo, is one of oldest locations on coast, but has never been thoroughly prospected until re-

cently. Ore is chiefly chalcocite and bornite, occurring along joint planes and shear zones, apparently as isolated ore bodies of lenticular shape. The Senator claim is said to have the best showing, and yielded most of the ore shipped in 1918. Property needs further development. See Annual Report of Minister of Mines, British Columbia, 1918.

VAN ANDA COPPER & GOLD MINES CO., LTD. B. C.

Inactive. H. W. Treat, gen. mgr., and L. Goodacre, trustees; Jas. Ryan, agt., Van Anda, B. C. Company is presumably alive, but not operating.

Property: 20 claims, crown-granted, 840 acres, including the Copper Queen.

The Copper Queen mine has lenses of rich ore, mainly bornite with some chalcopyrite along a diorite-limestone contact. The deposit has one main ore-shoot, 150′ long and 30′ wide. See Texada Id., B. C., by R. G. McConnell, Geol. Survey Canada Memoir 58, 1914, pp. 566-64.

The Copper Queen shaft is 600′ deep with a winze 240′ deep on the 300′ level. In 1918 the mine was operated under lease by Thomas Davis, of Seattle, Wash.

VANCOUVER MINING DEV. SYNDICATE BRITISH COLUMBIA

Address: Vancouver, B. C.

Directors include Nicol Thompson, A. M. Whiteside, J. H. Gross, A. H. Wallbridge, and A. E. Smith, all of Vancouver.

Inc. in 1919. **Cap.,** $500,000; $100,000 issued. The Syndicate was formed to bring mining prospects of British Columbia to the attention of the investing public, helping prospectors who have located promising properties, but who lack the means to develop them.

VAN ROI MINING CO. BRITISH COLUMBIA

Controlled by Le Roi No. 2, Ltd., Rossland, which holds 63,193 ordinary and 10,483 preference shares, out of 90,000 and 30,000 issued.

Office: Leonard Rowell, 4 Broad St. Place, London, E. C. 2, Eng.
Mine office: Silverton, B. C.

Directors: Lord Ernest Hamilton, chairman; A. B. Dealtry, T. Lloyd, supt.

Inc. July 9, 1908. **Cap.,** £34,500 in 30,000 £1 pfd. and 90,000 1s. ordinary shares.

Property: the Vancouver group of claims in Slocan district, B. C. Operations were resumed early in 1917 at mine and mill. Ore contains silver, lead and zinc.

VERONICA GOLD MINING CO. BRITISH COLUMBIA

Inc. 1916. **Cap.,** $250,000; par 25c. T. T. McCredy, Dr. J. W. Talledge, D. A. McIntosh, Geo R. Leask, Fred Bryan, and Ed. McMahon, of Spokane, Wash., incorporators.

Property: Eclipse group of 6 claims, adjoining Homestake group on Perry creek, Southeast Kootenay district. No recent information.

VICTOR SILVER LEAF MINING CO. BRITISH COLUMBIA

Officers: R. Abernethy, pres.; E. R. Abernethy, sec.; C. E. Berry, treas., all of Spokane, with Geo. F. Gundry, and John Tospon, directors.

Cap., $1,500,000; par $1; non-assessable.

Property: 3 unpatented claims, 10 miles E. of Fort Steele, said to show gold-silver-lead-zinc ore in 3 shoots. No shipments have been made, though sorted ore is said to assay $100 per ton.

Development: by tunnels, longest 400′. Early in 1918 company was planning to erect a mill, but funds failed to materialize and little work was done on the property. In November, 1919, reported that company was again trying to finance the erection of a 50-ton mill.

VIKING COPPER CO. BRITISH COLUMBIA

S. D. Craig, John Vedaa and J. G. Vedaa, owners. Van Anda, B. C.

Property: 3 claims, 143 acres, on S. side of Texada island, 65 miles N. of Vancouver, shows copper-gold-silver ore. Small shipments reported 7.9% copper. Developed by shallow shafts.

ASHINGTON MINE, LTD. **BRITISH COLUMBIA**

Idle.

Directors: J. L. Retallack, O. T. Stone and W. H. Burgess, sec., all of aslo, B. C., and Clive Pringle, Ottawa, Ont.

Inc. in British Columbia. **Cap.,** $300,000; par $1; assessable.

Property: Washington and Slocan Bay groups, in McGuigan basin, ocan district, was, for several years, the largest shipper of that section. t ore became baser in depth and property was closed down in 1911. ine is said to contain large bodies of complex lead-zinc ore in its lower els, which can now be profitably concentrated.

ESTERN BELLE MINING CO. **BRITISH COLUMBIA**

Address: S. R. Green, sec.-treas., Spokane, Wash. Colen Smith, pres., th Samuel Smith, L. V. Wells, A. McCormick, directors.

Cap., $200,000; par 10c; assessable.

Property: 4 claims, 7 miles N. E. of Idaho-Continental mine, but in Kootnay district, B. C., said to show silver-lead ore in vein 12 to 20′ wide, aceable for 3,000′. **Development:** by tunnels.

ESTERN MINE EXPLORATION SYNDICATE **B. C.**

Address: Vancouver, B. C. Is doing development work on a copper operty at Tacla lake in central B. C., and on a placer gold property at orsefly, in Cariboo mining district.

ESTERN MINING & DEVELOPMENT CO. **BRITISH COLUMBIA**

Dead.

Inc. July, 1915, to take over the Yreka group, Quatsino Sound, Vanuver island, B. C., but apparently never did so. See Vol. XIII.

EST KOOTENAY POWER & LIGHT CO., LTD. **B. C.**

Controlled by Consolidated Mining & Smelting Co.

Office: Rossland, B. C.

Company owns three hydro-electric plants with a revenue-producing ad of 22,360 h. p., current being supplied to mines and works along the International boundary. Company is an important accessory to mining in itish Columbia.

HITEWATER MINES, LTD. **BRITISH COLUMBIA**

Controlled by J. L. Retallack & Co., of which W. H. Burgess, of Kaslo, mgr. Mine was one of the earliest producers in Slocan district, and as sold over 20 years ago to Whitewater Mines, Ltd., of London. Reorted that Retallack & Co. are now operating it under lease.

Property: at Retallack, on a branch of the C. P. R. R., was worked der lease in 1918; 15 men employed.

Production: 1918, consisted of 409 tons of silver-lead ore, and 135 tons ver-zinc ore.

HOLE CHANNEL MINES CO. **BRITISH COLUMBIA**

Company organized in December, 1919, to develop 6 claims on Prinss Royal island, 3 miles north of the Belmont Surf Inlet mine. A 1,500′ nnel is to be driven to open a 12′ vein which has been traced for 3,500′ on rface.

OLF GROUP **BRITISH COLUMBIA**

See Taylor Mining Co., Ltd.

OLVERINE MINING & DEVELOPMENT CO. **B. C.**

Succeeds Kootenay Dev. Co., Ainsworth, B. C. Jere Madden, pres., apid River, Mich. J. Cleveland Haas, Wellington Apts., Spokane, manag- g director, and J. F. Carey, of Spokane, Wash., director.

Property: the Nicollet group of 14 claims on Kootenay lake, north of nsworth and adjoining the Highland and Florence mines (Florence Mng. .). Veins in metamorphic rocks are said to carry rich silver-lead ores.

[redacted] since 1917.

[redacted] **MINE** **BRITISH COLUMBIA**

[redacted] Clarence Cunningham, Sandon, B. C.

[redacted] claims, in 2 groups, acquired from Miller Creek Mng. Co. [redacted] Mg. Co., in 1913, for $75.000. Ore is lead-silver.

New owner seems to have found the main vein so unsuccessfully sought by former owners, as it was reported in 1918, that $125,000 worth of ore had been shipped, and the daily output in September, 1919, was 100 tons. Ore is milled in the Alamo concentrator at Alamo, on the Kaslo-Nakusp Ry. See Alamo mine.

YALE DEVELOPMENT & CONSTRUCTION CO. B. C.

Has a 25-year lease on property of Olalla Copper Mining & Smelting Co., which see.

YMIR-WILCOX DEVELOPMENT CO., LTD. BRITISH COLUMBIA

Office: J. C. Breese, 1580 Sherman Ave., Evanston, Ill.

Officers: W. S. Mason, pres. and treas.; J. C. Breese, sec., with C. F. Poppenhusen, E. R. Johnston and B. J. Jayne, directors.

Inc. June 29, 1911, in British Columbia. **Cap.,** $500,000; shares $1 par, non-assessable; 400,000 issued.

Property: 6 patented claims, 188 acres, near Nelson, B. C. Examined by Arthur Lakes, Jr. Ore carries gold and some silver. Under development in 1917, but no later information.

MANITOBA

The Province has a richly mineralized belt that extends easterly for 100 miles from the Saskatchewan border, at Lake Athapapuskow, to Flin Flon lake (formerly called Wekuska). The deposits at Flin Flon, Schist and Copper lakes are near the west end of this belt, and include the Great Sulphide mine, Mandy mine and several other properties. The Pine River area, on the east arm of Athapapuskow lake, is said to rival the Flin Flon. At Herb lake, at the east end of the belt, the Rex mine, Dauphin and other properties are being opened up.

The Flin-Flon and Schist Lake districts have attracted much attention since 1916, because of the large size and richness of the copper deposits found there. They are situated 650 miles N. W. of Winnipeg and 90 miles N. W. of The Pas, northern Manitoba, and reached by steamer from The Pas to Sturgeon lake, thence 40 miles east to Flin Flon lake.

The rocks are greenstones, conglomerates, etc., intruded by quartz porphyry dikes and masses. The ores are sulphides and carry copper, gold and silver, with some zinc.

BROOKLYN MINING CO. MANITOBA

Bert Clarkson, pres., Buffalo, N. Y., A. L. Anderson, supt.

Property: in Gold Lake area has been worked since March, 1919. In November, drifting was in progress on the 100′ level.

BRUCE CONS. MINING CO. MANITOBA

Address: Winnipeg, Canada.

Officers: Col. Wm. Grassie, pres., with E. D. Alderson, W. B. Tayl[illegible], J. J. Papineau and Dr. Halpenny, directors.

Cap., $2,500,000; par $1.

Property: 275 acres in Gold Lake area.

CALUMET-CORBIN MINES CO. MANITOBA

Succeeded by Dominion Gold Mining Co., q. v.

Wm. Bracken, pres.; J. K. Heath, s. p.; Erik Honeiker, [illegible], last accounts.

Inc. Jan. 11, 1915, in Maine, as a reorganization of the Calumet-Corbin Mng. Co. **Cap.,** $2,500,000; shares $1 par. Paul Revere Trust Co., registrar. Shares in [illegible] Calumet-Corbin Co. [illegible] tain terms for those [illegible] Leased on [illegible]

Company had a [illegible] Gold [illegible] in Gold Lake mining [illegible] of gray quartz, in [illegible] tive of the [illegible]

AREA OF MANITOBA
251,832 SQUARE MILES

UNITED STATES

SHOWING THE NEW MINING DISTRICTS.

ton gold with no silver contents. Some development work is said to have been done in 1916.

It appears that the Gold Lake lease covers a swamp in which quartz is found. Such quartz exposures are known at a great many places in Western Canada, but so far as known none of them are now commercially worked.

The New Era mine near Idaho Springs, Colo., taken under lease for $150,000, was lost through default of semi-annual payments of $7,500 in 1916, with local debts of $10,000. The Montana holdings were previously abandoned.

It appears that the company had no real property and its stock represented nothing but paper. The sponsors for the stock were apparently interested in stock dealing, not mining, and caveat emptor applies to all stock buyers.

DOMINION GOLD MINING CO. MANITOBA

(See Calumet-Corbin Co.) **Office:** 802 Pioneer Bldg., St. Paul, Minn.

Officers: at last accounts, Bernard Noon, pres.; J. P. Fetsch, v. p.-treas.; J. E. Liebe, sec., with N. L. Watson and George Werner, directors.

Inc. Oct. 5, 1915, in Arizona. Cap., $2,500,000; outstanding Dec. 1915, $1,500,000; shares $1 par. Registrar & Transfer Co., New York, registrar and transfer agt. Cash on hand, November 8, 1915, $5,500. Outstanding shares, 1,500,000, used in the purchase of property.' Of this amount 1,000,000 shares were set aside to be given to stockholders of the Calumet-Corbin Mines Co. of Maine, in exchange for stock of that company, received by them in exchange for stock of the old Calumet-Corbin Mining Co., of Ariz., when the reorganization was effected early in 1915. "Reason for the gift of this stock to the stockholders of the Calumet-Corbin Mines Co. is stated by those giving it to be because they feel a certain measure of responsibility for the failure of the old Calumet-Corbin Mining Co., to make good, and because their efforts to bring it to a successful issue through its reorganization into the Calumet-Corbin Mines Co. failed." If the whole 1,000,000 shares are exchanged it will make the Dominion Gold Mining Co. a stockholder in the Calumet-Corbin Mines Co. to that extent.

Property: 6 claims, 280 acres, held by location, not contiguous, in the Gold Lake mining district, 100 miles N. E. of Winnipeg, Manitoba. Nearest P. O. is Manigotagan, at mouth of Manigotagan River, on eastern shore of Lake Winnipeg. Mine reached by boat to Manigotagan from either Selkirk on Red River, 23 miles north of Winnipeg, or from Gimil, or Icelandic Riverton, on the Gimil branch of the C. P. R. R.

The Gold Seal and Gold Pan claims, which were said to belong also to this company and to the Calumet-Corbin, were reported "abandoned 1915" at the office of the New York Curb.

The property is practically undeveloped. The country generally is covered by a swamp. Claims are said to show quartz veins "well exposed at the surface, except where covered by the swamp," and to contain considerable free gold. Stock is a rank gamble and unfavorably regarded. No recent information.

FLIN FLON SYNDICATE MANITOBA

See Great Sulphide Co.

GABRIELLE MINES, LTD. MANITOBA

Office: Winnipeg, Canada.

Inc. in 1919. **Cap.,** $1,000,000; par $1.

GREAT SULPHIDE CO. MANITOBA

Address: J. E. Hammell, [illegible]

Property: the Hammell [illegible] Pas, northern Manitoba. [illegible] have been put down to [illegible] over a length of 2,500' and [illegible] per ton in gold, silver, [illegible]

)00,000 tons of ore, averaging 1.7% copper; 1.5 oz. silver, and $1.40 gold ton, while 50,000,000 tons is considered a possibility, if not a probability.

Property requires an 80-mile railroad connection to the Pas and it was orted, that the Government had definitely promised this road, if the idicate would erect a smelter with a capacity of not less than 2,000 tons lay. A year's option on the property was given to W. B. Thompson erests in March, 1920. The price is $1,500,000 cash; $200,000 is to be nt in exploration.

)LD PAN MINING CO. **MANITOBA**

Officers: Jas. H. Ashdown, pres.; F. O. Fowler, v. p.; Gordon McTavish, -treas., with E. F. Hutchings, S. Hart Green and Sam Scott, directors. J. B. ell, cons. engr., Toronto. Frank Phillips, mine supt.

Property: at Big Rice Lake, 130 miles N. E. of Winnipeg, was idle for ie time previous to the reorganization in 1919 and the finances of the company e in bad shape. In November, 1919, 200,000 shares of 8% preferred stock ; offered to the public.

Development: by 150' shaft, from which some rich specimen ore is said iave been taken during the past 3 years.

Though an adverse report on property was made by R. W. Brigstocke in ruary, 1920, management decided to continue work awhile.

:RB LAKE GOLD MINES, LTD. **MANITOBA**

Offices: Herb Lake, via The Pas, Manitoba, Canada, and Makeever s., 170 Broadway, New York City.

Officers: M. M. Makeever, pres.; J. S. Cooper, v. p.; Sanford Makeever, -treas., above with C. C. Pringle, J. R. Campbell, Barney Asran, directors. lter Neal, mgr.; J. R. Campbell, Supt., Herb Lake, via the Pas, Manitoba.

Inc. in Manitoba, Canada. **Cap.,** $1,000,000; par $1; all issued.

Property: 7 claims, about 300 acres on N. E. shore of Herb lake, Pas ing district, Manitoba, Canada. Claims said to show a quartz fissure vein vide in hornblende schist, traceable for a distance of 1,700'. Ore is free ling gold reported to average $27 per ton. Pay ore shoot is 75' long, depth determined. Overhand stoping methods are used for mining ore.

Development: by 65° inclined shaft, 130' deep, and 420' of workings. blocked out is estimated at 4,000 tons.

Equipment: 5x7" steam hoist, 300 cu. ft. air compressor, pump, 30-ton lgamation mill with Deister and Overstrom tables.

Production: from May to November, 1918, reported to have shipped l bullion to value of $27,323.

Mine closed since 1918 on account of labor shortage.

URA MINES, LTD. **MANITOBA**

Inc. in October, 1919. **Cap.,** $2,000,000.

Property located in the Rice Lake district, Manitoba, Can.

NDY MINING CO. **MANITOBA**

Address: H. C. Carlisle, supt., The Pas, Manitoba, Canada.

Subsidiary of the Tonopah Canadian Mines Co (holds 85% of shares), h is controlled by Tonopah Mining Co. of Nevada, with head office at itt Bldg., Philadelphia, Pa.

From December 1, 1916, to December 31, 1917, the income was $223,055, expenditures left a deficit of $6,489. During 1918 the income was $537,043, hich $68,199 was profit. Current assets at the end of 1918 were $268,421, liabilities, including $208,260 loan from Tonopah Mining Co. of Nevada, $225,321.

Property: at Schist lake, north of The Pas, Manitoba, is developed by shaft and diamond-drill exploration below this depth. A shoot of high- copper ore has almost all been extracted to the bottom level, yielding 20,000 tons. The remains 200,000 tons of low-grade ore, too poor to mine r present condi

Equipment: steam hoist, tramway.

Production: for 1916 the total output was 3,588,000 lb. copper, the former year, and 5,904 tons valued

at $88 per ton in 1918. In 1919 company expected to ship 15,000 tons, the total value for 10 months' production was $750,000. Ore is taken by teams and barges to The Pas, 161 miles distant, and from there by rail to Trail, B. C., for reduction.

NORTHERN MANITOBA MINING CO. **MANITOBA**

Address: The Pas, Manitoba.

Officers: H. S. Hohnson, pres.; R. Kerr, sec.

Cap., $1,000,000; par $1.

Is a local enterprise, financed by The Pas people.

Property: 3 gold claims at Herb lake. Developed by 120′ shaft. A one-car shipment in 1918 is said to have given returns of $81 per ton, but work was stopped on account of lack of money.

Equipment: costing $12,000, includes a 40-h. p. boiler, and a compressor.

NORTHERN MANITOBA MINING & DEV. CO. **MANITOBA**

Operated by Canadian Exploration Co., Makeever Bros., 170 Broadway, New York, hold a stock interest.

Property: the Moosehorn and Rex gold claims on Herb lake, via The Pas, northern Manitoba. In August, 1917, an 80′ shaft in the former had opened 30″ of ore, while at 110′ in the latter there was 49″ of $36 ore.

A 40-ton mill erected in 1917 was operated for 3 months and then closed down with total production of $28,000.

Reported late in 1919, that property had been sold.

PAS CONSOLIDATED MINES, LTD. **MANITOBA**

Address: The Pas, Manitoba.

Reported in February, 1919, that company had acquired the Dauphin-Elizabeth mine and would operate it. Makeever Bros., of New York, gave up their option after sinking a 50′ shaft.

STAR LAKE GOLD MINES, LTD. **MANITOBA**

Office: 509 Merchants' Bank Bldg., Winnipeg, Manitoba, Canada.

Officers: W. R. Milton, pres.; J. H. Hicks, sec.; J. W. Harris, treas.; with E. R. Potter and John Smith, directors.

Inc. Nov., 1915, to purchase the property of the Penniac Gold Reef Mines, Ltd. Terms of purchase were as follows: owners agreed to take 333,333 shares of stock and to set aside 33,333 shares for development purposes. Stockholders in the Penniac Mines to receive 200,000 shares and to pay to the Star Lake $25,000 to liquidate liabilities of old company, amounting to $15,000, and leave a surplus for development work. Star Lake Co. agreed to have $100,000 in treasury within 6 months from November, 1915, otherwise vendors could cancel agreement. 125,000 shares offered to public at $1 par.

Cap., $1,000,000; shares $1 par; non-assessable; 500,000 issued. "An extraordinary 'speculative investment' is offered to the public for a limited number of 6% preferred shares at par, to be redeemed later at 15% above par," the wording of a circular.

Property: 6 patented claims, 200 acres, on Star Lake, eastern Manitoba, said to show a quartz vein in a shear zone of Keewatin conglomerate near contact between granite and schist. Vein minerals include quartz, gold-bearing pyrite and arsenopyrite. Samples cut for 10 to 15′ across the vein said to run $3.50 to $5.80 per ton. The Penniac company is reported to have spent $100,000 on development work, consisting solely of test pits and a 90′ shaft, said to close two lodes. The main shear zone is said to be 200′ wide, with two veins and several lesser parallel quartz veins with strike N. 35-45° E. and dip N. W., all showing gold in payable quantities. Property reported on by R. C. Wallace, University of [illegible]; W. H. Jeffrey, [illegible] Tretheway of Toronto, and [illegible]

[illegible] shaft and [illegible] Reserves estimated [illegible]

[illegible] mill, [illegible] ral buildings. Mas[illegible] [illegible] platinum content of [illegible] [illegible] ly idle.

NEW BRUNSWICK

STERN CANADIAN COPPER CORPORATION, LTD. **N. B.**
Mail returned 1918, from former address.
Fully described in Vol. XIII.

TERCOLONIAL COPPER CO. **NEW BRUNSWICK**
Office: P. O. Box 294, Pawtucket, R. I. **Mine office:** Dorchester, West-eland county, N. B.
Officers: Darius L. Goff, pres.; T. J. Edwards, sec.; F. J. Powers, treas.
Has been idle several years. Property described in Vol. XIII.

NOVA SCOTIA

ADFORD MINES, LTD. **NOVA SCOTIA**
Halifax, Nova Scotia.
Officers: E. F. Heifler, pres.; A. E. Abrams, v. p.; v. p.; W. C. Milner, -treas., with Paul J. Engel, Jr., 37 Wall St., New York, and G. J. Partington, ifax, directors.
Inc. Oct. 3, 1914, in Nova Scotia. **Cap.,** $500,000; shares $1 par; out-ding, 440,000 shares. Transfer office and registrar, Security Reg. & Transfer New York. Listed on New York Curb.
Property: at Sheet Harbor and Tangier, Nova Scotia, contains ore i gold and silver values.

PE BRETON COPPER CO., LTD. **NOVA SCOTIA**
Mine near Coxheath, Cape Breton county, N. S.
Cap., $2,000,000.
Property: the old Coxheath mine and adjoining lands, 10 miles from ney, Cape Breton, shows several cupriferous veins, of which the principal, aging 10′ width, traverses felsite and diorite, carrying argentiferous and ferous chalcopyrite, in a silicious gangue, ore averaging about 4.5% copper. pest shaft, 420′. Idle many years.

ETICAMP COPPER CO., LTD. **NOVA SCOTIA**
Idle. **Office:** 37 Sackville St., Halifax, N. S. **Mine office:** Cheticamp, rness county, N. S.
Officers: Edward Staris, pres.; John W. Regan, sec.-treas.; Milton V. idin, supt., at last accounts.
Inc. May, 1904, in Nova Scotia. **Cap.,** $3,000,000; shares $1 par, as a ger of the Eastern National Copper Co., Ltd., and 3 other corporations.
Property: 950 acres, freehold, also a 200-acre mill and smelter site, 1,000 s timber lands, and 200 acres water frontage, with a government license exploring and locating mines on 50 sq. miles.
Property shows a mineralized zone, in micaceous schist, of 350′ width, eable 1½ miles, carrying 4 orebodies, of which 3 are developed by a 200′ t and by tunnels of 25′, 35′ and 115′, claimed by company to show 250,000 of exclusively sulphide ore, averaging 2.5 to 3.5% copper, 18% lead, 30 oz. r and $2 to $30 gold per ton. Nearest railroad is 38 miles, but mine is only 6 miles from tidewater. Property considered promising, though estimates onnage and values are excessive.

MINION MINING CO. **NOVA SCOTIA**
Tangier, Halifax county, N. S. W. J. Prinsk, mgr. Company owns a mine at Tangier. Last production reported was 419 tons ore, yielding 57 old. No recent information.

DENVILLE CONS. MNG. CO., LTD. **NOVA SCOTIA**
cy: 170 Summer St., Boston, Mass. **Mine office:** Goldenville, county, N. S. Can.
E. Makepeace, pres.; E. B. Estes, sec.; J. A. Floyd, treas.;

foregoing, with A. C. Post, W. E. Bremner, G. F. Rooke, T. H. Richardson and H. N. Wright, directors.

Inc. June 16, 1916, in Nova Scotia, as a reorganization of the Goldenville Mining Co., Ltd. **Cap.**, $2,400,000; shares $1 par; 2,000,000 outstanding. Bonds authorized, $60,000, all outstanding.

Property: 501 acres on St. Mary's river, Goldenville, N. S., said to show narrow quartz veins in quartzite, with E.-W. course. Pay ore occurs both in shoots and streaks. Gold is coarse.

Development: by vertical and incline shafts to 750′ depth. Workings total 5,500′.

Equipment: 500-h. p. hydro-electric power plant, 50-h. p. electric hoist, 1,000 cu. ft. compressor, turbo-pump, 40 stamps (20 dropping) using amalgamation. Seems a promising mine, but results are withheld.

Production: 45,388 tons to 1919. No yield given, but recovery is about 90%.

GOLDENVILLE MINING CO., LTD. NOVA SCOTIA

Reorganized in 1916 as the Goldenville Consolidated Mining Co., Ltd., which see.

GREAT BRAS D'OR MINING CO. NOVA SCOTIA

Baddeck, Victoria county, N. S. **Mine office:** Middle River, Victoria county, N. S. D. J. Patriquin, mgr. Operates a gold mine. Last production reported was 775 tons ore, yielding 262 oz. gold. No recent returns.

LAKE COPPER MINING CO., LTD. NOVA SCOTIA

Idle. **Office:** care Dr. H. Mackay, New Glasgow, N. S. Mine office: Polson's Brook, Antigonishe county, N. S. A. G. Baillie, gen agt.

Inc. January, 1908. **Cap.**, $2,500,000; shares $1 par.

Property: 6,400 acres, on Polson lake, said to show a vein 5′ wide traceable a mile and carrying auriferous and argentiferous copper ore. It has a 103′ shaft with 554′ of workings.

LOON BROOK MINING CO., LTD. NOVA SCOTIA

Office: 1 Leys Ave., Letchworth, Herts, Eng. **Mine office:** Montague, N. S. E. Romilly Smith, mgr.

Operating a gold property and 10-stamp mill with cyanide unit in Montague district, N. S.

Last production reported was 118 tons of ore, which yielded 400 oz. gold. No recent returns.

MONTAGUE GOLDFIELDS, LTD. NOVA SCOTIA

Head office: 80 Granville St., Halifax, N. S. **Mine office:** Montague, Halifax county, N. S.

Officers and directors: Jas. Farquar, pres.; E. S. Romilly Smith, mgr.; R. G. Rent, sec.-treas.; A. Gerhardie, supt.

Property: in Halifax county, shows a 4″ quartz vein, between slate hanging and slate foot-wall. Ore is free milling. In 1918 a recovery of more than 2 oz. gold per ton was being made.

Development: by 300′ shaft. Reported in July, 1919, that 5 ore shoots had been cut on the 300′ level and that sufficient ore was blocked out to keep a 10-stamp mill a year. The present mill will be replaced by a new one.

Examined 1918, by C. A. Burdick.

NOVA SCOTIA MOLYBDENUM CO., LTD. NOVA SCOTIA

In 1918 company was operating a molybdenite deposit at New Ross, Lunenburg county, under management of H. C. Burchell of Windsor. Ore occurs in a pegmatite dike and is said to assay ½-1% molybdenum sulphide. Shaft is by 100′ shaft.

RENFREW GOLD [illegible] LTD. NOVA SCOTIA

Controlled by M. J. [illegible] Ltd., Cobalt, Ontario.

SCHEELITE MINES NOVA SCOTIA

Controlled by M. J. [illegible] Cobalt, Ontario.

TOMMY BURNS GOL[illegible] LTD. NOVA SCOTIA

Controlled by Tomm[illegible] Co. of Toronto, Ltd., tion of Pope and Ches[illegible]

Property: 134 acres, ½ mile from Brookfield, the nearest R. R. station, to show a fissure vein, 2½-3½′ wide, running E.-W., with dip 30°, and :able at surface for 900′.
Development: by 108′ shaft, sunk on the vein and drifts on the 50′ and levels.
Equipment: includes a 5-stamp mill, boiler, hoist and pump. A pleas- prospect.
According to T. A. Rickard, who made a report on the gold deposits of a Scotia for the Provincial government, none of the Nova Scotia gold de- s can be relied upon to carry their values to any great depth.
No recent information, presumably defunct.

NTWORTH COPPER CO., LTD. **NOVA SCOTIA**

Idle. **Address:** Wentworth, Cumberland county, N. S.
Inc. 1907, to acquire lands, bought at foreclosure sale, of the Cumber- Copper Co. Company apparently holds property for speculation purposes work has been done since purchase.

ST GORE ANTIMONY CO. **NOVA SCOTIA**

Address: N. O. Carpenter, mgr., West Gore, N. S.
Property: the Rawdon mine, opened 1884, worked intermittently until ber, 1914, and regularly since then. Company is closely allied with the St. n's Smelting Co., Manchester, England, which refines the product.
The main deposit is up to 4′ wide and has been opened for 200′ on one The ore consists of stibnite and native antimony, associated with pyrite, z and calcite. Country rock is a soft slate.
Development: by shafts, the main one, 502′ deep, with a 332′ winze be- his level.
Production: about 1,200 tons of ore monthly, yielding 110 tons of con- ates containing 38 to 45% antimony. No recent information.

ONTARIO

The mining companies of the Cobalt, Porcupine and Kirkland districts are ed under those headings. All others are grouped in a general section, precedes the districts named.

XO MINES, LTD. **ONTARIO**

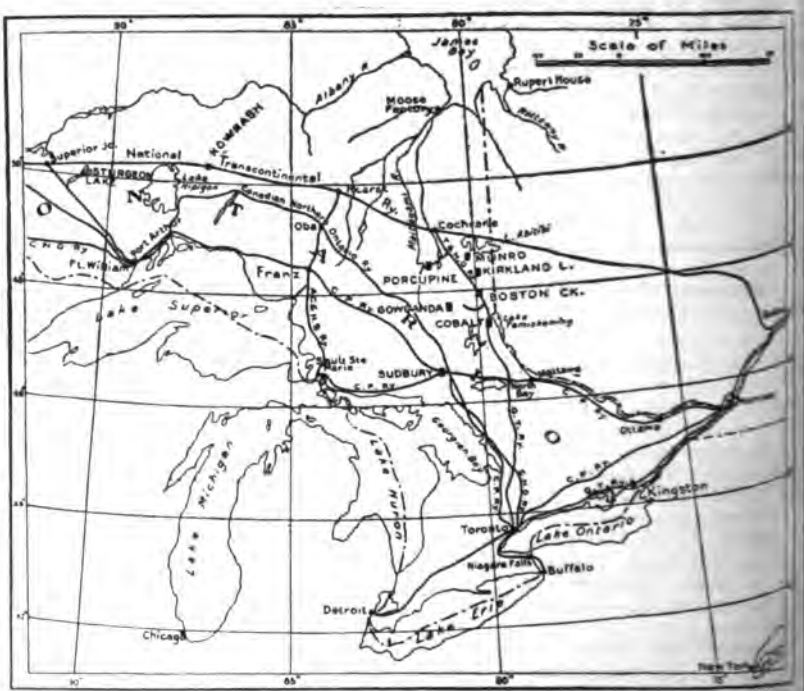
The Magpie, opened up in 1911, is developed by a 4-compartment shaft to depth of 250', with main levels at 125' and 205'. The orebody, mainly siderite, is said to be 50' wide over a distance of 1,500' and when roasted makes a fair Bessemer ore.

The Helen high-grade sulphur ore is mixed with Magpie raw ore and roasted, product being a very desirable Bessemer ore, which runs 52% iron and 0.04 phosphorus. Shipments from the Magpie are sent to the Sault blast-furnaces. Employs about 250 men when working to capacity.

ALGUNICAN DEVELOPMENT CO. ONTARIO

Haileybury, Ont., Canada. Holding company of the Jualin-Alaska Mine Co., which see. Also has done development work on a molybdenite property in Brome Twp., Renfrew Co., Ont. Hector Drolet, mgr. at last report.



MAP SHOWING MINING DISTRICTS OF ONTARIO

ALLIED GOLD MINES, LTD. ONTARIO

Address: 55 Yonge St., Toronto; and 1905 Dime Bank Bldg., Detroit, Mich. **Mine office:** Boston Creek, Ontario.

Officers: F. L. Smith, pres., Detroit; Angus Smith, v. p.; A. W. Bruning, sec.-treas., with J. H. Remick and W. H. Muir, directors. F. C. Combs, engr. R. W. Norrington, mgr. Shares offered by R. M. Norrington & Co., 30 E. 42nd St., New York.

Inc. October, 1918, in Ontario. **Cap.**, $2,000,000; par $1; outstanding $1,250,000; non-assessable. Listed on New York Curb. Prices, 1⅛ to 1⅜, 1918. Management states that $30,000 was spent on development in 1918.

Property: 12 claims, 7 patented, 480 acres, in Boston Creek district, Ontario. The company was organized to acquire large acreage of gold-bearing land in this area, following the success of the Miller-Independence Mines,

joins on the S. the Renaud-Cullen group of the Allied company. The group said to have several quartz veins with one well-defined fissure showing almost oss the property. This is developed by a 100′ shaft, and diamond-drilling rk.

Company also has an option on the O'Donald property, which shows comrcial ore at depth, and also on the property of the Boston Creek Mining Co. the eastward.

Equipment: electric hoist and compressor.

No ore is blocked out as yet; but property is considered a promising prost fully warranting development.

LIE ISLAND COPPER MINE. **ONTARIO**

Office: 225 Water St., Kenora, Ont., Can. Owned by F. W. Moore et al.

Property: 4 claims, the S 777, K. 312, K 314 and K 315, 156.64 acres in all, the east end of Allie Island, about 15 miles from Kenora.

Geology: claims cover an outcrop of serpentine, or chlorite-schist, rying small pellets or crystals of native copper. Country rock is dolomite, red trap and greenstones. Orebody claimed to be ½ mile long, with a maxim width of 700′.

Development: is surficial only, 40 and 20′ pit-holes, showing ore in bot-. Ore said to average 1½% copper. Owners planned development work last account.

ERICAN MOLYBDENITE, LTD. **ONTARIO**

Formerly known as the Dominion Molybdenite Co. Property sold to Molybum Products, Ltd., which see.

GONAUT GOLD MINES, LTD. **ONTARIO**

Address: Royal Trust Bldg., Montreal, Quebec.

Officers: J. H. Rainville, pres.; John W. Morrison, gen. supt.; J. E. rdman, cons. engr.

Organized 1919, to take over La Mine D'Or Huronia (which see), at Gauer, Larder Lake district. Reported in November, 1919, that the shaft had n deepened from the 80 to the 200′ level, and the re-modeled stamp-mill put operation. Electric power is obtained from Associated Goldfields at Larder e.

Production: in 1919, was 125.34 oz. gold, valued at $2,619.

SOCIATED GOLDFIELDS MINING CO. **ONTARIO**

Controlled by Associated Gold Mines of Western Australia, Ltd.

Office: 306 C. P. R. Bldg., Toronto, Ontario.

Officers: Geo. A. Mackay, pres.; C. G. Daimpré, gen. supt.

Inc. 1914, in Ontario. **Cap.,** $5,000,000; $1 par; 2,500,000 issued.

Property: about 2,000 acres, includes the Harris-Maxwell the Kerr-Addi-, and the Reddick mines, now known as Blocks B, C, and D, respectively, ted in Larder Lake district, Ontario. Block B mine is opened to the 500′ l, with workings practically all in silicified dolomite. In 1918, 400′ of work done in this mine; and 700′ in the Reddick. An extensive development paign is now under way.

Block D, 2 claims, shows alternating lands of dolomite and green schists, former containing a network of quartz veins some of which show coarse l. The mine has a shaft 100′ deep with several hundred feet of underground kings and considerable diamond-drill exploration. On the Kerr-Addison a little surface work has been done. The two properties have been worked desultory manner since about 1908.

Equipment: electric power, hoist, 2,700 cu. ft. compressor, 30-stamp , etc.

GOLD MINES, LTD. **ONTARIO**

$2,000,000, par, $1. Listed on Toronto Standard Stock Exchange. c. low, 40c. high, 1918; 35c. low, 40c. high in 1919.

: 42 acres, and options on 400 acres additional in four separate arts of the West Shining Tree district, 60 miles S. of Por- veins, five of which have been stripped and examined.

Veins well defined, and about 2′ in width. Company was planning develop in 1919-20.

AURUM MINES, LTD. ONTARIO

Office: 420 Bank of Hamilton Bldg., Toronto, Ont., Canada.

Officers: Sir Henry M. Pellatt, pres.; Col. J. B. Miller, v. p.; with W. Reid, A. E. J. Blackman and A. H. Jeffrey, directors. C. H. Manuel, H. M. Asling, treas.

Inc. in Ontario. **Cap.,** $1,500,000; shares $1 par; 800,000 shares ing.

Property: 2 patented claims, 80 acres, adjoining the Croesus Munro Township.

Ore: occurs in quartz and schist veins in basalt, dipping N. W. average value of the gold contents is as yet undetermined. Mine exa W. J. Trethewey and A. G. Kirby, who recommended diamond-d attempt to pick up the Croesus vein. No recent returns.

BEAVER AUXILIARY MINES CO. ONTA

Seventy-five per cent. of company's capitalization is held by Beav Mines, Ltd., which see. H. Donaldson, supt.

Property: 120 acres, at Elk Lake, Ont., carries silver ore, milling grade. **Development:** 330′ main shaft, crosscuts and drifts. ment: hoist and surface buildings. No work has been done on the for several years.

BOSTON CREEK GOLD MINES, LTD. ONTA

Address: Imperial Bank Chambers, N. F. Ont.

Officers: F. M. Richardson, pres.-mgr.; W. B. Albright, Quillman, sec.-treas.

Inc. in 1916 to take over mine from the R. A. P. Syndicate, Sherwin-Williams Paint Co. interests, who spent $250,000 on the **Cap.,** $2,000,000; shares $1 par; 1,050,000 shares issued and 999,995 for two years. Security Transfer & Registrar Co., New York. Listed on New York Curb, and on Toronto Stock Exchange. low, 39c. high, 1918; 18c. low, 33c. high, 1919.

Property: 21 claims, 100 acres, in Boston Creek township, 45 of Cobalt and 382 miles N. of Toronto and crossed by the T. & N. simple gold-quartz, like those of Porcupine, occur in two parallel 250′ apart. The Kenzie vein is of replacement type in a "pillow stone, a few inches to 5′ wide, showing spectacular free gold greenish quartz, with associated iron and copper pyrites, galena

Development: by 300′ shaft with drifts on vein at 100′, 200 a winze to 400′ level. Brokers letters claimed $1,500,000 worth out and that the company was sacking high grade ore. Equipment gasoline and electric hoists and buildings, etc., for 40-50 men

Property considered good and directors are as high grade as the stock offered at 50 cts., boosted to $1.50 and declining to 60c. is so extravagantly lauded by various brokerage houses as to suspicion.

Property will, it is believed, eventually be a milling prop well with the various Porcupine companies. Mine was idle for account of disagreement between company and R. A. P. Syndicate the Boston Creek was using. Reported that the two companies solidated.

BOSTON-PARRY SOUND COPPER CO.

Mine office: Parry Sound, Parry Sound district, Ont. in Maine. **Cap.,** $1,000,000; shares $1 par. Is a close cor

Property: 200 acres, in the vicinity of the Wilcox mines. Idle some years, but owners are well-to-do and expect erty some day.

BRITISH-AMERICAN NICKEL CORP., LTD.

Office: Citizens Bldg., Sparks St., Ottawa, Ont. **Mine** Nickelton, Sudbury, Ont.

Officers: J. H. Dunn, pres.; W. A. Carlyle, v. p. and managing direc.; H. Coade, sec.-treas.; F. J. Brule, chief engr.; E. Hibbert, supt. of mines; J. Carlyle, supt. of smelter; R. L. Peek, supt. of refinery; J. H. Gillis, supt. onst.; Frank E. Lathe, chief chemist; T. N. Hay, purch. agt.; R. F. Howard, . engr.

Inc. August, 1913, in Canada. **Cap.,** $20,000,000 common stock, all issued: 00,000 first mortgage bonds, 6%, all issued; $10,000,000 6% debenture k authorized, of which $3,500,000 has been issued: $14,000,000 stock and 00,000 bonds held by British Government, out of $25,000,000 issued.

Property: in the Sudbury nickel district, Ontario, the Corporation owns 90 acres, of which 12,590 acres are within a mineral bearing zone, the nce being non-mineral and required for smelter townsites, etc. Included he above are the following mines: Murray, Whistle, Wild Cat, Jackson, el Lake group, W. D. 16, Elsie, Gertrude, Victor, Lady Violet and Falconge. Lands contain 21 known orebodies, 7 of which have been developed. company has spent $900,000 on diamond-drilling from 1907 to 1918.

Development: the Whistle mine has been developed and is ready for proion, but the Murray mine, having shown a much larger orebody has been ted as the property on which work is to be concentrated. In all, the com- has developed by diamond drilling over 18,000,000 tons of ore, 14,000,000 of h is in the Murray mine, about 4 miles N. W. of the town of Sudbury.

Equipment: the surface works at the Murray mine consists of steam . rock crushing and sorting house with a capacity of 200 tons of ore per air-compressors, and the usual shops and change-house.

Plans made for the smelter provide for the construction of 2 blast furnaces hearths 50x360″, 3 Pierce-Smith converters, 13x30′, to be erected in a rn plant with full equipment of cranes, flues, stacks, bins, shops, power and tramming system, all machinery to be steam driven. An electrolytic ry, using the Hybinette process for the separation of copper and nickel he precious metals from the matte, is constructed at Deschemes, Quebec, ill have a capacity of about 10,000 tons nickel per annum. The smelter is kelton, 3 miles N. W. of Sudbury. The new plant was blown-in on Jan- 17, 1920, and 3 days later No. 1 furnace was reducing 660 tons of charge One converter was at work on the 21st.

is the intention of the management to have all employees reside in the of Sudbury, and cars or suburban trains will be provided for their transion. The mines are connected with the Canadian Pacific, the Canadian rn Ontario and the Algoma Eastern railroads.

E MINES, LTD. **ONTARIO**

pany is a reorganization of the Calumet & Montana Mining Co., which last accounts the company had one claim of 51 acres in Coleman Town-

ship, Cobalt, Ont., said to show fissure veins in diabase carrying silver. Developed by 225' vertical shaft with 500' of underground workings.

Reported in 1918, that a new company, Three Star Mining Co., was operating the property of the C. & M. Cons. Mining Co., of which company there is no recent information. Former office was at Cobalt, Ont.

CAMBURN SILVER MINES, LTD. ONTARIO

Address: Toronto, Ont.

Inc. in 1919. **Cap.**, $1,500,000; par $1.

Property: company is doing exploratory work in the old Leroy Lake property, Gowganda district.

CANADIAN AMERICAN RESOURCES, LTD. ONTARIO

Address: 927 Fifth Ave., New York.

Officers: Alex. Alexander, pres., New York; L. E. Denyes, v. p., Toronto; Dr. R. G. Bogart, sec., Kingston, Ont.; Geo. B. Leighton, treas., New York; with Jacob Ruppert, and Geo. B. Gifford of New York, and S. W. Jenkins of Catherines, Ont., directors.

Inc. in Ontario late in 1919. **Cap.**, $50,000,000. Company was organized to aid the development of mining and oil properties.

CANADIAN COPPER CO. ONTARIO

Entire stock of company taken over by International Nickel Co. of Canada Ltd. and company dissolved.

CANADIAN EXPLORATION CO., LTD. ONTARIO

Offices: 28 Victoria Sq., Montreal, and Naughton, Ont.

Mine closed and plant sold, property was described in Vol. XIII.

CANADIAN SMELTING & REFINING CO. ONTARIO

Out of existence, described in Vol. XIII. Former office, Orilla, Ont.

CANE SILVER MINES, LTD. ONTARIO

Company was organized by Toronto interests several years ago, to operate silver property in Cane Twp., near Kennebeck Station. Reported late in 1919 that company proposed to give a 10-year lease on the property, but some owners were opposed to the plan. A little development has been done.

CATHERINE GOLD MINES, LTD. ONTARIO

In October, 1919, company expected to commence sinking a shaft on property in Catherine Twp., Boston Creek district, which is said to have good surface indications.

CHENEY COPPER CO., LTD. ONTARIO

Office: 5 Melinda St., Toronto, Ont.

Officers: D. M. Robertson, pres.; R. P. Gouch, v. p.; G. Taylor, treas.; preceding with J. S. King, G. P. McCallum, J. L. Coffee and G. Wade, directors, all of Toronto.

Inc. in Ontario. **Cap.**, $2,000,000; shares $1 par; fully paid and assessable. No bonds. No stocks in hands of the public.

Property: 700 acres, of which 400 are held by Crown patent and balance under Mines Act of Ontario. 28 miles from Thessalon, Ont., on railway and 40 miles east of Sault Ste. Marie.

Geology: Lands show a series of three parallel veins exposed by outcrops, trenches and open cut for 1½ miles, with width of 4' to 12'. Strike north 16° west with dip of 75° to south. Veins are mostly quartz with pockets or lenses of specular iron, iron pyrites and copper minerals.

Development: by a 10' shaft, crosscuts and surface pits. Property now idle.

COBALT-FRONTENAC MINING CO., LTD. ONTARIO

Address: [illegible] Flecher, mgr., Flinton, Ont.

Officers: [illegible] Millan, pres.; Noah Dyment, v. p.; M. Dyment, treas.

Property: [illegible] Fleece mine, near Flinton. Developed by shaft.

Equipment: [illegible] mill and cyanide plant.

Production: [illegible] gold, yielding $300.

MBIA COPPER MINING CO. **ONTARIO**

le. Mail returned, 1919, from former address, 510 Chamber of Commerce, t, Mich. Mine near Parry Sound, Ont.

all other deductions; deducting the preferred dividend of $133,689, left a balance of $41,240, or only 2c. a share for the $41,834,600 outstanding common stock. Report for 6 months ended September 30, 1919, shows surplus, after charges, Federal taxes and preferred dividends, of $510,602, equivalent to 30c. per share, compared with $2.04 in corresponding 6 months of 1918. For the 9 months ended December 31, 1919, net profits were $1,799,957, compared with $5,072,45 in this period of 1918.

Copper-nickel properties consist of mines with an estimated developed reserve of 20,000,000 tons, smelting plants at Copper Cliff, Canada, handling 15 tons daily, separating and refining plants at Constable Hook and Camden, N. J. Company also absorbed the Orford Co., Anglo-American Iron Co., Vermilion Mining Co., American Nickel Works, Nickel Corporation of Great Britain and the Société Minière Calédonienne.

Property: company is the world's largest producer of copper nickel ores and copper nickel matte. Ore was discovered 1884, mining commenced 18 and smelters were started in 1888. It consists of about 18,000 acres, mostly the south range of the Sudbury nickel belt. The ore consists of a mixture chalcopyrite, pyrrhotite and pentlandite in a norite gangue. The ore may massive sulphides, as in the Creighton mine, or disseminated sulphides scatter through the gangue, as in Crean Hill mine. For geology, see Eng. & Min. Jo Vol. 101, No. 19.

Total production is obtained from Creighton and Crean Hill mines 19 miles from Copper Cliff.

The Creighton mine has 3 incline shafts with vertical depth of 1,000'. pit mining was practised until 1912, when underground stoping began. mine is developed to the 12th and partly developed to the 16th level.

The No. 3 incline shaft, with 5 compartments, handles the entire No. 2 shaft being used for handling men and supplies only. Tramming main levels is by electric locomotives, with 4-ton cars.

Primary crushing of ore is done underground. The crusher is the jaw 42x30" and is set at 6". Shafts are equipped with electrically-driven operating in balance, mechanical appliances being in use for quick loading skips. All buildings are of concrete, steel and brick, fireproof construction.

Secondary crushing is carried out in the ore-house, which has a capacity 500 tons per hour, followed by screening and hand sorting on picking Concrete bins of 3,000 tons capacity are situated under the picking belts.

The electric hoist is operated on the Ilgner system, hoisting 9-ton skips 2,500' per minute. The mine has 4 compressors, 3 of 5,000 cu. ft. capacity, one of 2,500 cu. ft., sufficient for 175 drills. Production is 3,500 tons per

The Crean Hill mine, about 2 miles east of the Victoria, has an inclined 4-compartment shaft, 780' deep. The production is about 450 tons daily.

Surface equipment includes rock-house for crushing and sorting ore, power house, workshops, warehouses, etc.

No. 2 mine at Copper Cliff, is developed to a depth of 860', and produces about 200 tons of sorted ore per day. Equipment is similar to that at Crean Hill. The total output of ore in 1918 was 1,230,509 tons.

A quartz quarry about 15 miles south of Copper Cliff produces silica for fluxing, during the summer months, and is so arranged to provide storage for crushed quartz need in the winter.

The International through the Huronian Co., a subsidiary, has a hydro-electric plant at High Falls, 30 miles from Copper Cliff, utilizing an effective head of 85', which yields about 10,000 k. v. a. The current is transmitted at 35,000 volts.

Ore from the Crean Hill mine goes to the smelter; that from the Creighton mine to the roast yard about 13 miles from Copper Cliff, in part to the smelter. The yard is about 7,500' long and contains space for 122 roast beds, using wood as fuel. Ore is re-loaded by steam shovel, taken to the smelter, and dumped into bins.

The blast furnace building contains 8 furnaces, 5 of which are 4' deep, a 3' 6" jacket having been inserted between the upper and lower sections to lower the settlers sufficiently to receive molten converting slag.

The charge of raw and roasted ores is practically self-fluxing, but about % coke is used. The slag carries about 32.5% silica. This matte averages CuNi.

The reverberatory department contains a fine grinding plant, 4 Wedge sters and 2 reverberatories, one working. The ore is ground in ball mills roasted in Wedge furnaces. The reverberatory furnace smelts about 500 in 24 hours. It burns pulverized coal, crushed so that 75% will pass 200 h and is blown in by fan blast; about 100 tons a day is consumed. Matte ages 23% CuNi.

Matte is blown in 5 basic converters of the horizontal type, exactly as in conversion of copper matte, but is stopped as soon as the iron is eliminated. l product contains 24% copper, 55% nickel, and 0.5% iron. Slag contains silica, and 4% copper-nickel, most of it recovered in settlers. Matte is cast iron molds, broken up, and treated in The International company's Canadian ery at Port Colborne, Ontario, and at Bayonne, N. J.

The Port Colborne refinery, near the Lake Erie entrance of the Welland al, erected at a cost of $5,000,000, produces 15,000,000 lb. of nickel and 8,000,000 f copper yearly. The plant finished in June, 1918, is described in Eng. and ing Journal, March 8, 1919.

The year ended March 31, 1917, was the company's most profitable year; that time earnings have rapidly fallen. Demand ceased when the Armistice signed and operations were cut to ⅛ normal.

Orig-l capital, £600,000, increased July, 1908, to £850,000; in £500,000 cumula-e 7% preferred shares, £5 par; £300,000 ordinary shares, £1 par, and 0,000 deferred shares, £1 par; totaled issued capital £750,000. Reor-nized July 22, 1914, with authorized capital of £2,400,000, in shares of £1; ,000 being in 7% cumulative preferred shares; 1,000,000 in 7% non-cumu-ve preferred shares, and 900,000 ordinary shares increased 1918 to present ital.

Dividends: 7% has been paid regularly on preferred shares; dividends ordinary shares; 6% in 1905; 10% in 1906; 12½% in 1907; 15% in 1908, 9 and 1910; 16¼% in 1911 and 1912; 21¼% in 1913; 35% in 1914; 20% 915 and 1916, on new capital; 20% less tax in 1917; interim of 1s per e. less tax; final of 3s per share free of tax in 1918; interim of 1s per re free of tax to May 1, in 1919.

Dividends: on former deferred shares were 18% in 1906; 33% in 1907; in 1908, 1909 and 1910; 55% in 1911 and 1912; 85% in 1913.

Net profits: £111,320 in 1909; £114,107 in 1910; £140,803 in 1911; 6,650 in 1912; £191,047 in 1913; £248,088 in 1914; £285,282 in 1915; 6,460 in 1916; £327,248 in 1917; £531,845 in 1918. Reserve fund in 1918 £450,000; cash balance £34,888.

Property: over 14,000 acres in the Sudbury district, and mining rights bout 12,000 acres near to and including Bruce Mines, about 29,000 acres ll. In the Sudbury district the Levack, Garson, Victoria, Worthington, e copper-quartz mines are worked. The Blizzard, Frood Extension, cw h Star are held in reserve. The Bruce mine is opened v ucing quartzose-copper ore, used as flux in the con-

Development: the Levack mine, purchased in 1913; is opened by a 3-compartment inclined shaft, 590′ deep, with 7 levels. In 1918, ore had been developed on 5 levels, and proved to a depth of 1,400′; reserves estimated at 6 to 8,000,000 tons of ore.

The Garson mine has a 3-compartment 1,000′ shaft. Diamond drilling has proved ore to 1,300′ depth.

The Victoria for a long time the company's chief producer is the deepest mine in Canada. At last accounts the 3-compartment shaft had reached the depth of 2,600; and was being sunk to 3,000′ depth.

The orebody at the Worthington mine, 750′ deep, is a mixture of very high-grade ore and rock, which is close sorted. The orebody is a brecciated basic dike and not typical of the Sudbury deposits. (For geology see Economic Geology, Vol. X, No. 6.)

The North Star shaft is 400′ deep. The Blezard mine was worked by open-pits.

The Frood Extension mine has a 4-compartment shaft, 1,000′ deep; levels at 400, 750, and 900′. The main orebody lies at 1,000′ depth. Work at this mine was stopped when the war started.

The copper-nickel ratio in the ore from these different mines varies widely.

Smelter: the 1,500-ton smelter at Coniston, Ont., 7 miles E. of Sudbury, was blown-in May 15, 1913. It has 4 blast furnaces, 50x240″, and 4 Peirce-Smith basic converters with shells 10′ in diameter and 25′ 10″ long. Ores are smelted in blast furnaces and matte bessemered to a rich matte containing 41% copper, 41% nickel, 17% sulphur, and less than 1% iron. This product is shipped to the company's refinery at Clydach, in Swansea Valley, South Wales, where the metals are separated and the nickel is refined by the Mond process.

Refining works: at the Clydach works the matte is dead-roasted and treated with dilute sulphuric acid, which permits the extraction of about 65% of the copper and 2% of the nickel. The residue, after drying, assays 45 to 60% nickel, and is treated in charges of 500 kgs. with water-gas in a reduction tower, at a temperature of about 300° C. This tower has shelves and the ore is moved from shelf to shelf by automatic rakes, the lower shelves being cooled. After treatment in the reduction tower the charge is transferrd to a volatilizing tower and treated with carbon monoxide at a temperature of about 100° C. The residue therefrom is returned to the reducing tower and the charge goes forward and back between the 2 towers for 10 to 15 days, and when 60% of the nickel has been volatilized as nickel carbonyl, the residue of the charge is returned to the reverberatory furnace. The nickel carbonyl is treated in a decomposing apparatus wherein the metal is recovered in granules, assaying 99.4 to 99.8% nickel and the copper is turned out as bluestone, of which the company markets considerable quantities for use in agricultural purposes.

All the Canadian plants are up-to-date and operated electrically, power from 3 hydro-electric plants, 2 of which are the property of the Lorne Power Co., a subsidiary of the Mond Nickel Co. The growth of the company's operations within the past several years has been phenomenal.

Production: the mine output for 1911 was 163,352 tons, 117,658 tons in 1912, 408,638 tons in 1915, 382,913 tons in 1918. Production is not reported but unofficial estimates four years ago placed the annual output at about 4,000,000 lb. fine copper and 5,000,000 lb. nickel, with a possible maximum production of 10,000,000 lb. copper and 15,000,000 lb. nickel.

MURRAY-MOGRIDGE MINES, LTD. ONTARIO

Is a reorganization of the Murray-Mogridge Co. The shareholders of old company received 1,928,870 shares of new stock and New York interests took 200,000 shares, at $1 a share, the proceeds to be used to pay off all obligations and to give funds for the development. By November, $100,000 had been paid [illegible]

Property [illegible] Lake, near Bourke [illegible]

is several gold quartz veins which have been under development by a 200' id another 100' shaft, for several years.

ATIONAL MINES, LTD. **ONTARIO**

Operating under lease, the King Edward mine, which see. Development iderway at 1,000' depth and flotation plant erected to treat ore and tailings. o recent information.

ICHOLS CHEMICAL CO., LTD. **ONTARIO**

Subsidiary of General Chemical Co.

Office: 222 St. James St., Montreal, Canada.

Officers: E. S. Pincott, mgr.; H. V. Smythe, mine supt.

Property: the Northern Pyrites mine on Vermillion Lake at North ines, Ont., Canada, shows veins averaging 45' in width for 1,000' in length, ith strike N. E. and dip 55° N. W. Mine said to have the largest pyrite posit under development in Canada.

Equipment: includes 2-mile Leschen aerial tram, Lambert hoist, com- essor and concentrating mill. Shipments to the United States are made a Graham on the Grand Trunk Pacific R. R. and the Great Lakes. Em- oys 130 men. Company does not publish financial or statistical reports.

About 95,000 tons of pyrite produced in 1915; 103,337 tons in 1918. ork resumed in Oct., 1919, after having been shut down. Reported in ovember, 1919, that an ore dock costing $100,000 would be built on the ission River at Fort William, Ont., to handle the pyrites from North nes, and also from the output of a pyrite property at Mokoman, 30 miles . of Port Arthur.

ORTHERN PYRITES CO. **ONTARIO**

Property owned by the Nichols Chemical Co., which see.

RE CHIMNEY MINING CO., LTD. **ONTARIO**

Office: 100 Clyde Block, Hamilton, Ont. **Mine office:** Northbrook, ontenac county, Ont.

Officers: A. E. Fletcher, pres.; F. E. Misener, v. p.; O. E. Dores, sec.- as.; preceding, with C. H. Siple, S. G. McKay, H. A. Baldwin, R. W. omas, Chas. Zinn and S. A. Fletcher, directors. W. G. Anderson, gen. gr.

Inc. October 11, 1909, in Ontario. **Cap.,** $1,200,000, in 3,000,000 shares; r 40c, non-assessable. Increased April, 1918, from $600,000. Annual meet- g, last Tuesday in October. The property was bought for 850,000 shares stock.

Property: about 1,200 acres, in the Eastern Ontario mining district, 50 les from Kingston and about 11 miles from Kaladar, the nearest C. P. R. station. Claims show conglomerate, quartzite and schist, reported to ve a vertical interbedded, jasper vein, of the so-called "iron formation" o 18' wide on the surface, with hornblende schist on the hanging to N. E. conglomerate and quartzite to S. E., and a basaltic footwall. In 1918, ppany acquired the Big Dipper mines a gold property of about 1,240 s.

Development: by 403' shaft, with total workings of 2,000'. Crosscut at is reported to have disclosed a vein of sulphide ore carrying galena chalcopyrite with gold-silver values.

Equipment: includes three 100-h. p. tubular boilers, two 1,000 cu. ft. mpressors, a hoist, 20-stamp mill with amalgamating plates, tables and agnetic separator. The mill capacity is about 200 tons a day. No ore mined in 1918, as an electric plant was under construction.

E EXTENSION MINING CO., LTD. **ONTARIO**

Address: Vineland, Ont., Canada.

Officers: David Fretz, pres.-mgr.; S. Spiece, v. p.; Geo. Laws, sec.-treas., J. O. Moore and S. R. Lupton, directors, at last report.

Inc. November 1, 1913, in Ontario. **Cap.,** $1,500,000; shares 50c par.

Transfer office: 354 Hudson St., Buffalo, N. Y. Annual meeting, 2nd nesday in January.

Property: 167 acres at Northbrook, Lennox and Addington counties, Ontario, said to show gold-silver-lead-zinc-copper ore, in six veins, from a few feet to 40' wide, in diorite and schist. Developed by a shaft 53' deep. A prospect.

PARAGON-HITCHCOCK MINES, LTD. ONTARIO

Address: Collingwood, Ont., Canada. **Mine office:** Wabun, Ont.

Officers: Donald McKay, pres.; W. R. Hitchcock, v. p.; David Melrose, sec.; W. T. Herrington, treas.; E. H. Hitchcock, C. W. Pitt, W. A. Hamilton, R. Fregehen, J. P. Welsh and T. R. Gilpin, directors.

Inc. February 12, 1917, in Ontario. **Cap.,** $1,100,000; shares $1 par; 200,000 issued, non-assessable.

Property: 4 claims in Tudhope Twp., Ont., near rail and 2 claims 4 miles away.

Geology: the Hitchcock property is a heavily-timbered, low-lying tract with diabase showing as the only rock exposure. Four well-defined silver-bearing veins can be traced through this exposure, one of which is opened by a 200' shaft, with a drift said to show native silver.

Reported October, 1919, that two drifts were being driven on the 200' level of the Paragon shaft one of which showed native silver ore.

Equipment: boiler, steam hoist, and compressor, pump, and camp accessories.

PARRY SOUND COPPER MINING CO., LTD. ONTARIO

Office: 500 Germania Life Bldg., St. Paul, Minn. **Mine office:** Parry Sound, Ont.

Officers: Frank Johnson, pres.; Otto Monson, sec.-treas.; president with John Ogren, A. Linderholm and F. X. Benning, directors.

Inc. March 23, 1899, in Ontario. **Cap.,** $5,000,000; shares $1 par; issued $4,500,000. Liabilities are given at $45,000 floating indebtedness. Annual meeting, second Tuesday in August.

Property: the McGowan and Wilcox mines, 10 claims, 1,000 acres, one-half freehold and one-fifth held subject to a $3,000 mortgage, on the east shore of Georgian bay.

The Wilcox mine has 4 parallel veins in a width of about a quarter mile, with a 145' shaft on a 20' vein in granite-gneiss, traceable 1,000', containing auriferous and argentiferous bornite, assaying 2.8 to 11% copper. There also is an opencut, 20x150', 18' deep, showing 3% chalcopyrite ore.

The McGowan mine has shafts of 100', 100' and 250', and a 150' cross-tunnel, showing bornite and occasional chalcopyrite, with quartz gangue. A smelter shipment of 240 tons of selected ore returned 17% copper and $5 per ton in combined gold and silver.

Equipment: includes a 10-stamp mill, hoisting machinery and several buildings. Idle, but management plans further work.

The Wilcox mine reported sold September, 1917, for $30,000. No later information.

PATRICIA SYNDICATE ONTARIO

Formerly the Boston Hollinger, is controlled by Chas. O'Connell and Montreal interests. The 80 acres at Boston creek has been under development since October, 1917. Main vein of bluish quartz said to be 2 to 4 feet and developed to a depth of 200'. Ore which is free-milling is said to run $20 to $22 gold per ton, and is treated in a 40-ton mill with a 92% recovery, but has been idle during winter months due to lack of fuel.

PITTSBURGH & NORTHERN ONTARIO EXPL. & DEV. CO. ONT.

Head office: Toronto, Ont.

Cap., $100,000; par $10.

Company was incorporated about August, 1919. Details of organization and holdings not yet obtainable.

PROSPECTOR'S DEVELOPMENT CO., LTD. ONTARIO

Incorporated August 1919, by John B. Holden of Toronto, Paul Oakes, pres. of Lake Shore mine; H. H. Johnson, of the Tough-Oakes, Wright and others.

Cap., $2,000,000; par $1. No promotion issued, all shares remaining in treasury.

Company plans the systematic development of promising mining prop-s in Northern Ontario, aiding prospectors to do preliminary develop-t.

A. P. GOLD MINING CO. **ONTARIO**

Head office: Toronto.

Cap., $2,000,000; par $1.

This company was incorporated about September, 1919, further details available, but evidently a reorganization of the syndicate of same name, h sold part of its property to the Boston Creek Gold Mines Ltd., and reported, 1918, to be considering a merger with that corporation.

P MINING DEVELOPMENT & PROSPECTING CO. **ONTARIO**

Address: Boston Creek, via Krugersdorf on the Ont. Northern Ry.

Property: the original "find" at Boston Creek shows a gold-bearing tz vein on which shaft has been sunk.

Equipment: includes hoist, compressor, etc. No recent information. R. A. P. Co.

VES-DOBIE MINES, LTD. **ONTARIO**

Address: Marton H. Jacobs, Gowganda, Ontario.

Inc. June, 1917. **Cap.**, $2,000,000; $1 par.

Property: at Gowanda. Operated to 100′ depth with over 700′ of work-Six men employed at mine, 1919, and a mill was to be purchased.

INCO MINES CO. **ONTARIO**

Organized, 1919, to operate the Big Four group of claims in the Gow-a district of Ontario. Details not available, but the statements issued o strongly unfavorable comment in a well-known mining journal.

ERIOR COPPER CO., LTD. **ONTARIO**

Office: Sault Ste. Marie, Ont. **Mine office:** Superior Mine, via Algoma ral Railway, Algoma, Ont.

Officers: G. R. Nicholson, pres.; C. H. L. Jones, v. p.; Emory W. Clark, and treas., at last accounts.

Inc. September 13, 1901, in Ontario. **Cap.**, $3,000,000; originally $1,500,-increased, 1903, to $2,000,000, and again July 29, 1907; shares $10 par; d, $2,402,160. The company was organized with non-assessable stock, special act of the provincial parliament of Ontario rendered the stock sable. Total assessments to December 31, 1910, were $132,080.52. Se-Trust Co., Detroit, registrar and transfer agent. Annual meeting, d Thursday in June.

Property: 11 claims, crown granted, 800 acres, in an unorganized min-district of Algoma, shows granite and chlorite schist carrying fissure of 10′ and 70′ estimated average widths, traceable 7,000′. The quartz carry chalcopyrite with a little chalcocite, estimated by the manage-to average 4% copper, 1 oz. silver and 40c gold per ton.

Development: amounting to 1,233′, includes a 400′ shaft and 949′ tunnel 5 shallow shafts, a 189′ tunnel and many surface cuts.

Ore is reported to show 4,000 tons of ore on the dump, with 140,000 d out, apparently a serious over-estimate.

Equipment: includes a 150-h. p. steam plant, 12-drill compressor, engine changing house, boarding house, machine shop, smithy, office, store wellings, and a 50-ton concentrator.

he mine has been idle since December, 1908.

DISH-CANADIAN GOLD MINING CORPORATION **ONTARIO**

ddress: Mine Centre, Northern Ontario.

roperty: the Foley mine, 6 miles S. of the Canadian National Railroad, ed in December, 1919.

evelopment: by 1,000′ of shaft work with 2,000′ drifts and crosscuts, is o have developed a large tonnage of $14 ore.

quipment: includes 20 stamp mill with cyanide plant; a 1,600′ aerial o be constructed early in 1920.

SYMMES-YOUNG SILVER MINES, LTD. ONTARIO

Head office: Toronto, Ont.

Cap., $2,000,000; par $1.

Company was incorporated in August, 1919, but details not yet ascertainable.

TASH-ORN MINES, LTD. ONTARIO

Office: 1009 Calvert Bldg., Baltimore, Md.

Officers: Jos. Castelber, pres.; L. H. Nachman, v. p.; L. B. Bernei, sec.; J. L. Orn, treas.

Inc. August 2, 1916, in Ontario. **Cap.,** $3,000,000; par $1; 2,454,92[illegible] shares issued. U. S. Corporation Co., New York, transfer agent. Listed on New York Curb.

Property: at Tashota and Kowkash, Ont., where the discovery of rich gold ore in 1917, was followed by a boom.

TAYLOR MOLYBDENITE MINE ONTARIO

Property in Renfrew county is owned and operated by A. M. Taylor, who has shipped ore that assayed 5.3 to 6% molybdenum. A concentrator treats the lower grade ore making an 86% product, with a 92% recovery.

THREE STAR MINING CO. ONTARIO

Reported in 1918, to be developing the property formerly worked by the Calumet & Montana Cons. Mining Co., which see. No recent information.

THUNDER MINING CO., LTD. ONTARIO

Address: Dominion Reduction Co., Cobalt, Ont. Julius Cohen, mgr.

Inc. October 7, 1916, in Ontario. **Cap.,** $2,000,000; **shares** $1 par; 1,6[illegible] issued. Entire capitalization owned by the Dominion Reduction Co. (66[illegible] Kerr Lake Mining Co (22%) and Wettlaufer-Lorrain (12%).

Property: the St. Anthony Gold Mining Co.'s ground at Sturgeon Lake, Ont. Considerable development was done and ore milled in 1918.

TIP TOP MINE ONTARIO

Address: Col. S. W. Ray, owner, Port Arthur, Ont. Mine near Kashaboiwe, Thunder Bay district, Ont.

Property: 4 claims, freehold, 336 acres, 6 miles by rail S. W. of Kashaboiwe station, Canadian Northern railway. The claims are near Rose Lake, and show schist quartzite and greenstone of Keewatin age, cut by quartz porphyry dikes. The ore occurs in lenses 5 to 40′ wide, in the site and quartz porphyry. One body of chalcopyrite and pyrite ore, stoped for 8 to 25′ wide and 70′ long, yielded 4,000 tons of ore said to have averaged 5.3% copper.

Development: by 208′ incline shaft, dipping 70° N. with workings on levels. This work is estimated to show 45,000 tons of ore, of 4 to 6% copper.

Equipment, includes a 150-h. p. steam plant, with 50-h. p. hoists, and a 6-drill air compressor. See Ontario Bureau of Mines Report, 19[illegible] 209. Idle in 1918 and 1919.

TISDALE GOLD MINING CO., LTD. ONTARIO

Inc. October, 1910, in Ontario. **Cap.,** $500,000 shares $5 par. See Dome Mines, Ltd.

TWO LAKES COPPER MINING CO., LTD. ONTARIO

Idle. **Office:** Oil City, Pa. Mine office: Sowerby, Algoma, Ont.

Officers at last report: Dr. E. L. Dickey, pres.; S. F. Amsler, v. p.; D. Bailey, sec.; J. C. Wilkins, treas.; F. W. Bailey, gen mgr.; preceding and J. W. Russell, C. W. Coulter, G. W. Freeman and Edw. Schwabe directors.

Inc. October 12, 1906, in Ontario. **Cap.,** $500,000; shares $1 par, assessable; issued, $270,000. Annual meeting, first Tuesday in Nov[illegible]

Lands: 8 claims, 1 fractional, 300 acres, freehold, including the Thompson and Tupper mines, 8 miles from Thessalon, and 4 from a railway. The property shows pre-Cambrian slate, conglomerate and greenstone, cut by a number of flat ore veins, 3 of 2 to 10′ estimated average width, [illegible]

ılphide ores of about 4.5% copper, with small quantities of silver and gold.

Development: by shafts of 50', 25' and 10'.

Equipment: includes a 60 h. p. boiler and 35 h. p. hoist. At last reports ıe management was planning further development as soon as the finan- al situation improved, but is apparently still adhering to a once popular watchful waiting" policy.

/ACHMAN MINING CO., LTD. **ONTARIO**

Office: Dryden, Ont. **Cap.,** $500,000.

Company was organized in 1918, by Robert Wachman, 4439 So. Michi- ın Bldg., Chicago, Ill., to acquire 2,100 acres of mineral lands at Contact ıy, Vermillion lake.

Main vein of tract is said to be traceable 2,640', and to show silver and ee milling gold ore for a length of 400'.

In November, 1919, 60 men were employed in building camps and nking, as company planned sinking three 800' shafts during the winter, and ection of a 20-stamp mill.

/ASAPIKA GOLD MINES, LTD. **ONTARIO**

To be reorganized in 1920 with capital of $6,000,000; $1 par.

Address: Isbell, Plant & Co., Standard Bank Bldg., Toronto, Ont.

Cap., $1,000,000; shares $1 par. Listed on New York Curb as a pros- ct.

Officers: Geo. R. Rogers, pres. and mgr.. F. M. Connell, v. p.; with J. ahay and Geo. A. Young, directors.

Property: the Ribble claims, 120 acres and 3 more optioned (1919), near asapika lake, West Shining Tree district, in the Sudbury division, Ont., miles from rail. Examined in March, 1917, by G. R. Rogers, who reports e main vein to lie between andesite and rhyolite porphyry. Ore is gray ıartz impregnated with iron pyrite, with some free gold. The vein ex- ısed for 1,800', "averages 5 ft. 1 in." in width; a 7' width sampled in shaft depth of 50' assayed $11.20. R. E. Hore, says: the quartz veins in the asapika are narrow, a foot or two being a good width, but the ore is not vein quartz, but largely silicated rock. The Ribble or main vein is de- loped by a shaft 200' deep, sunk in the hanging wall, the showing on the Y level warranted sinking shaft to 200 feet. A 150-ton mill is planned.

EST TREE MINES, LTD. **ONTARIO**

Officers: Senator Geo. W. Fowler, pres.; C. S. Corson, v. p.; Gidson ant, sec.-treas.; with W. D. McKay, W. J. J. Butler, Geo. R. Rogers, and E. Way, directors.

Inc. in Ontario. **Cap.,** $3.000,000; par $1; treasury 1,000.000 shares. alt in on New York Curb, shares sold 15c low (November), 37c high, ıe, 1919.

Property: 4 claims, 183 acres, in Macmurchy Twp., Sudbury district, ıt., adjoins Wasapika Mines, 60 miles S. of Porcupine district. Pros- ctus issued states that there are 15 veins on the property, all with free ld showing in the quartz.

Development: three 50' shafts, with 10,000' of stripping. Shaft sinking progress October, 1919.

Property: is an attractive prospect that requires further development prove its real value.

HITE RESERVE MINING CO., LTD. **ONTARIO**

Address: 802 Lumsden Bldg., Toronto.

Officers: J. A. McAndrews, pres. and mgr.; A. E. Marks, v. p.; with B. Mayfair, directors, Dan McDonald, supt., Cane P. O., Ont.

Inc. June 17, 1914, in Ontario. **Cap.,** $1,000.000; par $1; outstanding [illegible] shares. Traded on Toronto exchange. Shares sold at 20c, 1919.

[illegible]perty: 3 claims, 2 patented, 130 acres, in Twp. of Whitson, Maple [illegible] and 40 acres, in Twp. of James, both said to show fissure veins [illegible] cobalt and nickel ore, occurs in shoots of variable size [illegible] of value.

Development: several shafts, deepest 140', and total workings of 1,000'. No ore is mined as work is confined to development and exploration in order to block out ore reserves.

Equipment: includes an I-R hoist, and a 9-drill compressor.

COBALT DISTRICT.

ADANAC SILVER MINES, LTD. ONTARIO

Office: Excelsior Bldg., Toronto. **Mine address:** Cobalt, Ont., Can.

Officers: R. A. Cartwright, pres.; Alex. Faskin, v. p.; M. R. Cartwright, treas. and managing director; with E. M. Campbell, and C. L. Sherrill, directors; Jas. Aitcheson, sec.

Inc. March, 1915, in Ontario. **Cap.,** $3,000,000; $1 par.

A merger with the Victory company to form a $3,000,000 corporation, Adanac to get $1,000,000 in shares, will take place in 1920.

Property: in Coleman Twp., Cobalt district, Ont., adjoins the Temiskaming, showing smaltite, niccolite, and a little silver.

Development: by 400' shaft. Work now concentrated on 310' level, where high-grade ore was found. Diamond-drilling from the 310' level was commenced in December, 1919. Property is in the prospect class.

ALADDIN COBALT, LTD. ONTARIO

Liquidators: Frank F. Fuller, sec., 638 Salisbury House, London Wall, London, E. C., England and R. Simpson, Toronto. **Mine address:** Cobalt, Ont.

Directors: D. H. Herbert, chairman, Lt. Col. Chas. Gold, Capt. C. R. S. Jorgensen, and S. B. Peech.

Registered April 23, 1913. Acquired all the capital of the **Aladdin Cobalt Co., Ltd.,** registered in Canada with a capitalization of $500,000, shares $1 par. Canadian shareholders received 5 fully-paid £1 shares for every ten $5 shares held. Controls Chambers Ferland Co.

Cap., £500,000; shares £1 par; 499,993 shares issued. Stock is to be listed on Toronto Exchange. Balance sheet for fiscal year ending April 30, 1916, shows expenditures, £12,432 and a deficit of £28,758.
$5 shares held.

Chambers Ferland Co.

Address: 58 Wellington St., Toronto.

Inc. 1908 in Ontario. **Cap.,** $2,500,000; par $1. Is practically an operating subsidiary of A. C. Co., Ltd.

Company to be absorbed by Kirkland Lake Prop. Ltd. in 1920, shareholders given 7 Aladdin shares for 2 K. L. Prop., i. e. 100 Aladdin shares entitle holder to 28 4/7 new company shares, the fraction payable in cash amounting to 2 shillings.

Aladdin Cobalt Co., Ltd.

J. A. McVichie, mgr.

Dividends: ½% January 24, 1916; 2% February 28, 1917, none reported since. The total is $48,000.

Property: the Chambers Ferland mine at Cobalt, Ont., supposed to have the extension of the Nipissing vein system. Company also controls the Bonetal property at Kirkland Lake. The Chambers-Ferland had 125 acres, but in December, 1919, sold 23 to the Northern Concentrator Co.

Ore: silver in veins of calcite. Property supposed to have good chance of becoming a large producer, but the output has been comparatively small.

Development: work on the whole had been disappointing up to 1919, when 1,300' of work on the 275 and 425' levels was done, opening $150,000 worth of new ore.

Equipment: new equipment installed includes double-drum hoist, 12" crusher, 125-h. p. boiler, ore bins and an ore house with engine.

Production: for fiscal year ending April 30, 1916, amounted to 72 tons. Estimated production from May 1, 1916, to September 30, 1916, 200 tons.

390,523 oz. In 1918 the yield was 107.445 oz. from 3,175 tons of 18.3 oz. e and 40 tons of high-grade ore. Shipping steadily to Northern Customs Concentrator in 1920.

AILEY COBALT MINES, LTD. **ONTARIO**

John L. Woods, pres.; Floyd Weed, supt.

Inc. August 15, 1906, in Ontario. **Cap.**, $5,000,000, shares $1 par. Trust Guarantee Co., Ltd., Toronto, Can., transfer agt. and registrar. In 1914 company, being deply in debt, including about $90,000 owing to E. A. Benson, former esident, a permanent liquidator was appointed. A Protective Committee was rmed by Buffalo stockholders to guard their interests. It is said that E. A. nson. former president, and other promoters issued 4,250,000 shares of stock themselves, retaining 750,000 in the treasury for financing the property. This omotion stock, it is claimed, was disposed of, and the treasury stock remained sold, with the foregone result of such practice. Company now in hands of uidators.

Reorganization Committee: because of the bankrupt condition of the mpany and appointment of liquidators by Supreme Court of Ontario, the foving consented to act as a committee and prepare the plan for reorganization: bert G. Wheeler, Jr., chairman; Wm. E. Stevenson and H. S. Langdon, with alter Laier, sec., 22 William St., New York. Lawyers' Title Insurance & Trust ., New York, is depositary.

Reorganization plan: as finally worked out, provides that the liquidators nsfer the Bailey mine and its assets to a new company, to be known as the iley-Northern Customs, Ltd. Holders of existing stock consenting to plan ill receive one share of new stock for each ten shares of old. The capitalization the new company to be $1,250,000, with $50,000 in the treasury.

The proceedings brought by the Protective Committee of Buffalo against former directors of the Bailey Company in Canada resulted in a default lgment being obtained against all of the directors who are Americans. The ffalo committee requested the liquidators to institute like proceedings in the ited States.

Judgment obtained by E. A. Benson for the $90,000 due him was purchased the Profit Sharing Construction Co. of New York and the Reorganization nmittee, headed by A. G. Wheeler, Jr., negotiated with the Profit Sharing nstruction Co. as the owner of the judgment, for the purpose of bringing ut a reorganization. The Buffalo Protective Committee opposed this action, ich is responsible for the delay.

Property: 38 acres, adjoining the Penn Canadian mine in Coleman Twp., issing district. Several veins have been opened up, from which shipments e been made at different times. Developed by shaft. Lowest workings on fifth, or 280′ level. In 1913 underground work totaled 1,370′.

Property in charge of caretaker since 1914.

Ten years of litigation was settled in favor of majority shareholders, ruary, 1920.

ILEY-NORTHERN CUSTOMS, LTD. **ONTARIO**

Recently incorporated to operate the property of the Bailey Cobalt Mines, which see.

AVER CONS. MINES, LTD. ONTARIO

Lumsden Bldg., Toronto, Ont. **Mine office:** Cobalt, Ont.

Officers: F. L. Culver, pres.; F. C. Finkenstaedt, v. p.; H. E. Tremain, treas.; preceding officers, Wm. T. Mason, F. L. Lovelace, W. E. Stevenson, J. Mercer and H. L. Churchill, directors; L. W. Ledyard, supt., c/o Beaver e, Cobalt.

Inc. February, 1907. **Cap.**, $2,000,000; shares $1 par, fully paid, all issued. on Trust Co., Toronto, and Security & Registrar Co., New York, transfer ts. Annual meeting in April. Stock listed on Toronto Stock Exchange.

Comparative General Balance Sheet, years ending February 28:

Accounts payable, etc.	29,527	23,477	22,620
Total	$3,072,687	$2,897,994	$2,780,818

Ore sales, actual, were $341,380 in 1918; $295,878 in 1917; $423,587 in 1916.

Dividends: $60,000 in 1914; $120,000 in 1915; $60,000 in 1916; none since 1916. The total is $650,000.

Property: 2 claims, patented, 60 acres, in Coleman Twp., Cobalt district, adjoining the Temiskaming mine, and 120 acres, James Twp.; also owns approximately 7/8 of entire stock of Kirkland Lake Mining Co., Teck Twp., which see, and a ¼ interest in the Beaver Auxiliary Mines Co.

Ore: silver, cobalt, and arsenic in narrow calcite veins, in diabase and the Keewatin formation. Ore occurs as high-grade in pockets and shoots, not as milling ore.

Development: by 1,650′ vertical shaft, which encountered the diabase-Keewatin contact at a depth of 1,570′. During 1918, underground work totaled 1,441′, compared with 4,952′ in 1917. Naturally, war conditions prevented normal working.

The high-grade ore on the 1,600′ level was the deepest occurrence of such ore at Cobalt. In 1919, management reported that high-grade ore had been found on the 200, 600 and 700′ levels.

Equipment: includes a 150-ton concentrator, giving an extraction of about 80%, blacksmith shop, dwellings, etc.

Production:

Year	Tons Milled	Tons Concts.	Oz. Ag. in Concts.	Total Oz. Ag. Prod.	Earnings
1918	.....	...	.....	385,043	$393,000
1917	.....	...	.....	372,973	354,300

(a) Before providing for business profits, war tax, or income tax. (b) cit. (c) Feb. 1, 1920.

Balance sheet as of Oct. 31, 1918, showed assets, $5,786,702, which includes iagas mine, $3,985,700. Agaunico mine, $3,655; Maidens McDonald prop- $72,000; Montgomery Maiden property, $65,000; machinery, plant, build- and real estate, $132,049; Coniagas Reduction Co., Ltd., stock, $249,400; in bank and on hand, $553,767; accounts receivable, $510,206, which in- es ore account, $458,773, and general $50,582. Liabilities include surplus 1,533,326. At end of Oct., 1919, current assets were $652,838, and liabilities 092. Reserve for depreciation was $255,000.

Dividends: to 1919, company had distributed $9,240,000, of which $7,200.- or 180% of capital, was paid as dividend, and $2,040,000, or 51%, as

Property: the Coniagas mine, 40 acres on the townsite of Cobalt, Coleman Twp. In 1915 the company purchased 198 acres of Lot 15, Con. I, Bucke Twp., known as the Agaunico mine, in which considerable development work was done a few years ago on a promising vein of cobalt and nickel ore. No work is now being done save on the Ankerite property in Deloro Twp. The Coniagas mine contains a large number of small but very rich veins carrying silver with small amounts of nickel, cobalt and arsenic. Bought Maiden McDonald property, adjoining the Ankerite, for $20,000 in September, 1917.

Development: totaled 33,735' of underground workings on October 31, 1918. New work for year ending Oct. 31, 1918, amounted to 1689'. Development work was confined to following small stringers and exploration on all levels and driving numerous crosscuts through unexplored ground. No important new orebodies were developed during the year, though considerable tonnage of low-grade ore was disclosed.

Ore reserves: management states that extent of low-grade ore is very difficult to determine, but estimates of F. D. Reid, mine engr., indicate that a 3-year supply is available. The company also has 155,000 tons of tailing sand and 40,000 tons of slime tailings which contain 782,900 oz. of silver.

Equipment: complete, including a 60 stamp mill handling 160 tons daily and a cyanide plant, built to treat about 6 tons daily of low-grade concentrate from canvas tables and the decomposed gouge from the mine, but shutdown in November, 1917, as canvas tables were discarded and Callow flotation cells substituted.

During year ending Oct. 31, 1918, mill treated 68,597 tons ore, or an average of 3.38 tons per stamp per 24 hours, compared with 60,929 tons, an average of 3.07 tons per 24 hours for the previous year. Mill heads average 15.94 oz. silver per ton, compared with 18.56 oz. for the previous year, and 25.76 oz. the year before that.

In 1918 a total of 529 tons concentrate was shipped that average 1164 oz. silver per ton, and 867 tons of low-grade slime of 244.8 oz. per ton.

The number of men employed in mine and mill is about 100.

Production, years ending October 31:

Year	High-grade ore, tons	Tons Concts.	Cost per Oz. silver Cts. (a)	Cts. (b)	Ounces Silver	Price Silver
1919.....	...	.....	.....	....	940,267	10[illegible]
1918.....	63	1,396	33.87	7.98	824,264	94 [illegible]
1917.....	124	742	21.36	4.31	1,344,267	70 [illegible]
1916.....	193	648	15.24	4.27	1,773,286	65 [illegible]
1915.....	267	607	13.62	3.25	2,002,053	49 [illegible]
1914.....	485	688	12.44	3.58	2,497,394	56 [illegible]
1913.....	735	1,034	8.76	4.32	3,252,566	64 [illegible]

(a) includes all expenses except shipping, smelting, refining and marketing charges which are under (b).

Total production of mine to Oct. 31, 1918, amounted to 26,254,260 oz.

Ore and concentrates are treated by the Coniagas Reduction Co., which see below.

Coniagas is one of the big producers of Cobalt, having yielded over 000,000 oz. of silver and paid $9,240,000 in dividends and bonuses in 13 years.

Coniagas Reduction Co., Ltd.

Entire stock issue owned by the Coniagas Mines, Ltd., except 6 issued to directors to qualify.

Inc. in Canada. **Cap.,** $250,000; shares $100 par.

Owns a smelter and refinery at Thorold, Ont. R. L. Peek, supt.

During fiscal year ending Oct. 31, 1918, company shipped 2,390,[illegible] silver, and treated 2282 tons ore, dry weight. Company produces silver, and the oxides of cobalt and nickel.

ROWN RESERVE MINING CO., LTD. **ONTARIO**

* Includes $144,000 (1913, $308,877) profit on Porcupine Crown, Ltd., investment.
† Deficit.

Property: original holdings at Cobalt consist of 23 acres in Kerr Lake, eloped by the Crown Reserve mine, which has been one of the heaviest pro- ers in Cobalt. The company co-operated with the Kerr Lake Mining Co. he draining of Kerr Lake, but the results were disappointing to Crown erve in that no new valuable veins were found. The pumping out of the made it possible to obtain ore containing over 2½ million oz. silver, which rwise could not have been extracted, and the small veins discovered, not hemselves of great importance, were sufficient to pay for the whole cost he operation. Total amount of mud and water removed to Jan. 1, 1916, was it 700 million gallons.

The Crown Reserve Co. owns 60% of the stock of the *Porcupine-Crown es. Ltd.*, from which it received $144,000 in dividends in 1915. This mine closed down in July, 1918, on account of abnormal conditions, but opera- ; will be resumed. It is estimated to have $500,000 in ore reserves. Company s jointly with Kerr Lake Mining Co., Ltd., the Drummond Fraction property l which it received a profit of $9,844 in 1916; no work was done on this erty in 1918. Also operates the Silver Leaf mine of the Silver Leaf Mining Ltd. In 1918, one ton of high grade and 2,216 tons of milling ore were ed from the Silver Leaf. The company closed down the Reward mine in ornia, in 1918, and dropped the Walsh and Alice options.

Development: in 1918 amounted to 2,500′, making 38,144′ to date. In 1919 any purchased 2 claims in Larder Lake area which are said to have prom- showings. Development work in the unexplored east end of the property of rich ore on the 150′ level in December, 1919.

large section of the old workings is to be reworked by quarrying.

The future of the Crown Reserve Mining Co. depends upon its ability to acquire new properties. It was in following this policy that in 1915 it exercised an option on the property of the Globe Cons. Mining Co. in Trinity county, Cal. (see Globe Cons. Lease, Inc.), but as results were not satisfactory, work was stopped. An option on gold claims in the Boston Creek district of Ontario was given up, owing to poor developments. About 90% of the shares in the Reward mine, Inyo county, Cal., was purchased, but work there was stopped in 1918.

DOMINION REDUCTION CO., LTD. ONTARIO

Offices: Cobalt, Ont.

Officers: D. M. Steindler, pres.; Mortimer B. Davis, v. p.; H. M. Thompson, sec.-treas., with A. A. Allen and L. L. Steindler, directors. Albert Wood, supt.

Inc. 1912, in Ontario. **Cap.**, $2,000,000; shares $1 par; $1,600,000 outstanding. Nearly all stock is held by the directors.

Company took over the Nova Scotia mill at Cobalt. Mill has 40 stamps, and treats custom ore, including low-grade ore from the Kerr Lake and Crown Reserve mines, with which the mill is connected by an aerial tram. All ore is purchased outright and reduced to bullion; payment is made in cash on the bullion. Company also owns and operates the property of the *Croesus Gold Mines, Ltd.*, in Munro Twp., 50 miles E. of Porcupine; has an interest in the St. Anthony, or Thunder mine, at Sturgeon Lake, and operates the Nova Scotia mine.

FOSTER MINING CO. ONTARIO

Owns the Foster mine at Cobalt, closed down for several years, reopened 1918, by lessees, C. L. Campbell of Montreal, and W. Fairburn. Reported in 1919, that high-grade ore had been cut, and 20 men were working under H. G. Carmichael, manager.

GENESEE MINING CO., LTD. ONTARIO

Head office: Cobalt, Ont. **Executive office:** 442 Powers Bldg., Rochester, N. Y. L. F. Steenman, mgr.

Officers. C. F. Wray, pres.; C. F. Crandall, v. p.; Alexander Russell, sec.-treas.; L. F. Steeman, gen. mgr., with A. H. Dewey, C. D. Van Zandt, H. H. Gorsline, J. G. Comerford and G. H. Welch, directors.

Inc. 1915, in Ontario. **Cap.**, 1,000,000 shares; $1 par.

Company has a 6 years lease on the U. S. claim, north of the north claim of the Chambers-Ferland. Property was idle 6 years, but developments in the Chambers-Ferland have given hope to the Genesee management.

Development: 572' shaft, with 1,450' of workings on 500' level. Two veins of low-grade ore are said to have been cut.

GLEN LAKE COBALT MINES, LTD. ONTARIO

Mail to company returned, 1918; probably idle.

Inc. July 9, 1914, in Ontario. Had a lease on the Foster mine of the

ıter Cobalt Mng. Co., Ltd., about 40 acres on and under Glen Lake, Ont. oreshoot, small but high-grade, was found on the 50′ level in March, 6. A long crosscut was run from the old Foster shaft out under n Lake to within 40′ of the Bailey line. The management expected to another crosscut parallel to the Bailey line with the hope of finding ension of the Bailey veins.

Company operated mine on a royalty basis paying 15% for 200 oz. ore l under, and 25% for higher grade ore.

ıRGRAVE CONSOLIDATED **ONTARIO**

A merger of the Hargrave Silver Mines and Reliance companies in cember, 1919. Capital is $2,500,000, of which $1,000,000 goes to the mer and $800,000 to the latter company. Shares $1 par.

ıRGRAVE SILVER MINES, LTD. **ONTARIO**

Company merged, December, 1919, with Reliance Co., to form Hargrave ısolidated, with same capital as H. S. M. Ltd., but free of debt.

Office: Excelsior Life Bldg., Toronto, Ont. **Mine address:** Cobalt, Ont.

Officers: Geo. H. Sedgwick, pres.; Jas. Ritcheson, sec.; J. T. Shaw, r.

Inc. 1908, in Ontario. **Cap.,** $2,500,000; shares $1 par; all issued. Stock ed on New York Curb and in Toronto. Shares sold 2½c low, 8½c high 1919, and 2½ to 12c in 1918.

Property: 40 acres in Porcupine district and 40 acres in Cobalt dis- ːt, adjoining the Kerr Lake mine on the east and on the south, and said carry the extension of the Kerr Lake No. 3 vein. Drifting on this vein orted to have disclosed ore assaying 5,000 oz. silver per ton.

Development: by two shafts connected on the 255′ level with ap- ximately 1 mile of lateral workings.

Under former management property is credited with production of ,000 oz. silver. Shipping about 1,000 tons of dump ore to the Dominion ıduction Works, October, 1917.

Cobalt mine was closed down at the end of 1913 after a report made the former manager, who stated that all known orebodies had been ıausted down to 375′ depth. After three years, in January, 1917, when ːr prices rose to 70c, mine was reopened and some very rich ore found 75′, 375 and 250′. In 9 months of 1918 about 600′ of work was done, and tons of ore shipped returned 15,694 oz. of silver, valued at $13,343.

IDSON BAY MINES, LTD. **ONTARIO**

Office: New Liskeard, Ont.

Officers: F. L. Bapst, pres.; A. A. McKelvie, v. p.; F. L. Hutchinson, .-treas.; with Thos. McCamus, H. P. Burgard, W. H. Kinch, and C. L. ːrrill, directors. C. C. Sherrill, mgr.

Inc. July 16, 1909, in Ontario, as an operating subsidiary of the Temis- ning & Hudson Bay Mining Co. **Cap.,** $3,500,000 shares $5 par, out- ıding September 1, 1915, $3,200,050. Control **Dome Lake Mining & Mill- Co., Ltd.,** through ownership of 1,596,545 shares. Traded in on Toronto ck Exchange.

Balance sheet for year ending August 31, 1918, shows assets of $3,429,782 ich includes: mining claims, at Cobalt, $2,953,228; at Gowganda, $44,900; ms in Teck & Lebel twp., $18,193; plant concentrator and equipment, ,798; accounts receivable, $150,112; ore on hand, $14,100; 894,045 shares me Lake M. & M. Co. stock, $187,506; stock of Mines Water Supply Co., 43; cash $11,926. In fiscal year ending August 31, 1919, net profits were htly over $3,000, and ore reserves estimated to contain 100,000 oz. of sil- Liabilities show: bills and accounts payable, $94,672; wages due, 25, capital stock, $3,200,050.

Receipts in 1918 were $129,861: ore sales giving $124.839. Expenditures e $97,458, leaving a profit of $32,402, plus balance of $100,233 from 1917, ɔtal of $132,636.

Dividends: total to 1919 was $778,909, last one of 2½% paid August 1913.

Property: 9 claims, 340 acres, at Cobalt. No. 1 mine was re-opened in June, 1916, and stoping operations started. Several promising veins have been found carrying good silver value, and are being further developed. The Temiskaming & Hudson Bay was finally absorbed in 1919.

New work for 1918, totaled 564', compared with 1,652' in the previous year.

Ore reserves on August 31, 1918, were estimated at 4,774 tons broken ore with silver content of 24,600 oz.; and 7,450 tons of ore in sight, with 35,550 oz.

No work was done on the Gowganda property in 1918, or at Camp No. 2, or at Kirkland Lake. Company acquired additional interest in the Ferguson mine, now owning two-thirds. Property adjoins the Lake Shore mine on the east, and is one-half mile west of the Tough-Oakes mine. For work done at the Dome Lake M. & M. Co., Ltd., see under Porcupine district in this volume. In March, 1920, it was decided not to spend any more money on the Dame Lake.

Equipment: complete mining machinery and a stamp mill.

Production, years ending August 31:

	Tons Milled	Oz. silver per ton	Recovery %	Cost per ton—Mining	Cost per ton—Milling	Silver cost per Oz., Cts.
1918.....	20,540	9.51	72.02	$2.13	$2.36	62.57
1917.....	18,247	17.3	83.2	2.59	2.09	43.57

KENEBEC SILVER MINES, LTD. ONTARIO

Mail returned, 1919, from former address, W. H. Jeffrey, mgr., Temiskaming district, via Cobalt, Ont.

Development: on the Veteran claim, 2 veins have yielded some high-grade silver ore. Ore occurs in Keewatin formation.

Equipment: includes boilers, hoist, and 5-drill compressor. No recent information; probably idle.

KERR LAKE MINING CO. ONTARIO

Reorganized, November, 1917, into Kerr Lake Mines, Ltd., of Ontario, which see.

KERR LAKE MINES, LTD. ONTARIO

A reorganization, November, 1917, of the Kerr Lake Mining Co., of New York. Owns entire capital stock of Kerr Lake Mining Co., Ltd. The change was made to eliminate the expenses and taxes of the New York holding company.

New York office: 61 Broadway. **Mine office:** Cobalt, Ont.

Officers: Adolph Lewisohn, pres.; Sam. A. Lewisohn, v. p; E. H. Wentlake, sec.-treas.; with J. H. Susmann, J. Parke Channing, D. M. Steindler, J. Steindler, and Wm. B. Joyce, directors. Mine manager, H. A. Kee.

Inc. 1917, in Ontario. **Cap.**, $3,000,000; par $5. Reduced September, 1919, to $2,400,000; par $4. Bankers Trust Co., New York; Federal Trust Co., Boston; Trust and Guarantee Co., Ltd.; Toronto, transfer agents; Equitable Trust Co., New York; Old Colony Trust Co., Boston; Union Trust Co., Ltd., Toronto, registrars.

Balance sheet of August 31, 1919, show assets: $3,039,591, which includes Kerr Lake Mining Co., Ltd., $2,400,000; 150,000 shares, 5c a share; Wettlauffer Lorrain Silver Mines, Ltd.; $7,500; U. S. Liberty Bonds $630,136; cash $1,956. Liabilities include, capital stock $3,000,000; Kerr Lake Mining Co., Ltd., $9,000; other $30,591; total, $3,039,591.

Income account shows dividends received from Kerr Lake Mining Co., Ltd., $653,000; interest $4,641; a total of $657,641. Expenses were $35,0[illegible] dividends paid $600,000; balance forward, $22,153.

Dividends [illegible] predecessor and present companies totaled $8,9[illegible] [illegible]arly has been paid since 1911.

Kerr Lake Mining Co., Ltd.

Office: 61 Broadway, New York. H. A. Kee, gen. mgr., Cobalt, Ont. ntire stock issue owned by Kerr Lake Mines Ltd., of Ontario.

Balance sheet of August 31, 1919, shows assets: $2,885,032, which includes mining property, ore on hand, sold and in transit, $320,285; cash, 787,522; investments in Canadian and U. S. bonds, $1,647,544; Kerr Lake line Ltd., $9,000; other $40,680. Liabilities: 400 shares of capital stock at ar, $100, $40,000; accounts payable, $6,366; accrued wages, $1,030; reserve or outstanding liabilities and taxes, $301,017, leaving a surplus balance of 2,436,619 after payment of $653,000 in dividends.

Total proceeds from ore sales in 1918 were $1,637,144. Operating expenses include $257,626 for production and development, $133,270 for shipment and treatment, $41.510 for general expenses, $13,275 written off on roperty acquired, estimated for taxes, $123,291. Operating profit for the ear was $956,258.

Dividends: to August, 1918, amounted to $7,717,000. Payments are at ie rate of $1 per share annually.

Property: one patented claim and two fractional claims, 57 acres in oleman Twp., Nipissing district, Cobalt, Ont.

Geology: for description of these features see Nipissing Mines Co. The re occurs in small vertical fissure veins in Huronian slate and conglomerate, both veins and ore being of the character typical of the Cobalt district. The ore-shoots vary from a few feet to 400′ in length and occur n an area of about 8 acres.

Development: to depth of 475′ by several vertical shafts, deepest 487′, ith a total of 56,921′ of underground workings. New development for he fiscal year, 1919, amounted to 2,382′, compared with 3,088′ in 1918. ater work has failed to find new veins of importance.

To test the ground below the diabase the winze was sunk on the Keeatin vein to a depth of 150′ below No. 6 level, or 475′ below the surface. he winze is entirely in the Keewatin formation below the diabase contact, and 3 levels driven from the winze show the vein to be weak and less ineralized as it leaves the contact, confirming the general belief that ommercial ore is probably confined to the diabase near or above the ontact.

Ore reserves: on September 1, 1919, approximated 300,000 oz. silver, n the high-grade and 200.000 ounces in the low-grade milling ore, compared with 1918 reserves of 639,800 oz. silver in milling ore, and 997,500 oz. n high-grade ore.

Equipment: includes 12-drill air compressor, 10x12 Jenckes hoist, sorting and jigging-plant of 125 tons daily capacity, fully equipped machine hop and a pot melting furnace to melt the rough metallics into bullion, nstalled in 1915.

Production: for year ended August 31, 1919: 259 tons of ore averaging (with bullion), 3,323 oz. silver, 274 tons averaging 391 oz., 30 tons veraging 644 oz., and 28,362 tons of mill ore containing 17.30 oz. silver er ton. Shipping ore yielded 989,673 oz. The total was 1,482,649 oz. silver. n addition there was produced 90,586 lb. cobalt, and 137 lb. mercury. Cost f production was 40.81c. per ounce. Total production for previous year as 2,582,993 oz. silver, at a cost of 24.74c per oz., 199,331 lb. cobalt, and 45 lb. mercury. In October, 1919, production amounted to 112,000 oz. ilver.

Ore reserves are approaching exhaustion, but during 1920 the company ill explore and develop the areas in the immediate vicinity of the main ein system by systematically crosscutting from the walls of old stopes at avorable horizons.

A ROSE CONSOLIDATED MINES CO. ONTARIO

Dissolved in 1918, La Rose Mines, Ltd., assuming liabilities and assets of ie holding company.

LA ROSE MINES, LTD. **ONTARIO**

Office: 260 St. James St., Montreal, Quebec.

Officers: D. Lorne McGibbon, pres.; Shirley Ogilvie, v. p.; S. J. Le Huray, sec.-treas., with E. W. Nesbitt, Edwin Hanson, David Fasken, V. E. Mitchell, W. M. Dobell and W. A. Black, directors. G. C. Bateman, gen. mgr.

Inc. in Ontario. **Cap.**, $7,500,000; shares $5 par reduced November, 1917, to $1,500,000, par $1. Bankers Trust Co., New York, and Royal Trust Co. Toronto and Montreal, transfer agents. Guaranty Trust Co., of New York, registrars.

Company owns **Lawson Mines, Ltd.**, and **Violet Mg. Co.**, also 97,260 shares 90% of **University Mines, Ltd.**

The report of La Rose Mines for the year ended December 31, 1918, shows: Total receipts, $319,289; cost of mining and all other expenses, $273,745, leaving net profit for year, $45,544, carried to balance sheet. Dividend of $30,000 was paid in 1918. The balance sheet at end of 1918, shows:

Balance sheet as of Dec. 31, 1918.

Assets: total $2,017,530, which includes: mines, mining claims, etc. (including 97,260 shares of stock in University Mines, Ltd.), $1,456,151; advances to Univ. Mines, Ltd., $27,903; buildings and equipment, $49,760; supplies, $113,079; cash in banks, $195,288; call loans, $58,245; Victory Loan investment, $100,000.

Liabilities: capital stock $1,500,000; surplus, $456,046; reserve, Univ. Mines, Ltd., $27,903, accrued expenses on ore, $13,441; accounts payable, $16,300; unpaid payroll, $3,837.

Dividends: total to 1919, $7,505,410. La Rose Cons. Mines Co. during its existence paid $5,911,640.

Property: 6 patented claims, 359 acres, in Nipissing district, Cobalt, Ont., includes the La Rose, Princess, Lawson, University, and Fisher-Eplett mines all practically worked out, and the Violet mine which adjoins the O'Brien on the east. In 1918, new work in the La Rose totaled 438', but no new ore was found. Work was discontinued in 1914 on the Princess and Fisher-Eplett claims as extensive development work failed to find new orebodies. In 1918, investigation of old workings on first level of Princess mine disclosed some ore in the walls of stopes, which was mined and company unwatered second level for same purpose. The Violet shaft, sunk in 1917, is 415' deep, and its levels cut several veins, some with milling ore and a little high-grade ore. A boundary dispute with the O'Brien company was dismissed late in 1919, with costs assessed to the O'Brien.

Equipment: complete and modern in all respects.

Production: total to 1919, 38,238 tons of high-grade ore and concentrates from milling ore, yielding 24,484,052 oz. silver with net smelter returns of $12,606,235.

Year	Prod. Oz. Silver	Net Value	Cost Prod. per oz., c.	Net Sell. Price per oz., c.	Net Profit	Dividends	Surplus
1918.....	288,556	$268,525	87.17	99.83	$45,544	$30,000	$456,046

La Rose is a liquidating property unless new properties are acquired.

LAWSON MINES, LTD. **ONTARIO**

Subsidiary of the La Rose Cons. Mines Co., Ont.

LORRAIN CONSOLIDATED MINING CO. **ONTARIO**

Officers: D. M. Steindler, pres.; J. Cohen, mgr.; J. G. Harkness, sec. Cobalt, Ont., Canada.

Mark Harris & Co., Standard Bank Bldg., Toronto, Can., are underwriters of 250,000 shares of stock.

Property: at Cobalt is said to show a vein 5-8" wide of calcite and smaltite on which 260' shaft has been sunk. At about 65' vein dipped out of sight but was again found at 263'. No commercial ore encountered yet.

Development: work in progress, 1917, but stock is considered a speculation pure and simple. No later information, probably idle.

cKINLEY-DARRAGH-SAVAGE MINES, LTD. ONTARIO

Offices: Trusts & Guarantee Bldg., Toronto; and Cobalt, Ont. Treas**ers office:** 100 Sibley Block, Rochester, N. Y.

Officers: J. R. L. Starr, pres.: Thos. W. Finucane, v. p.; Harper Sibley, as., with H. W. Sibley, Jas. S. Watson, T. R. Finucane, and G. L. Thompson, rectors; J. H. Spence, sec., Toronto; A. G. Beckwith, asst. treas.; T. R. nucane, gen. mgr.

Inc. 1906, in Ontario. **Cap.,** authorized $2,500,000; issued, $2,247,692; ares $1 par. Traded on New York Curb. Prices 46c. low, 75c. high in 1919.

Comparative General Balance Sheet:

* Includes $15,000 for contingencies.

Statement of financial position of company as of December 15, 1919, showed: h and bonds in bank, $331,409; ore in transit and at smelter, $86,500; ore dy for shipment, $76,086; total, $493,995.

Comparative Statement of Operations:

ar	Gross Oper. Profit	Deductions	Net Oper. Profits	Interest	Total Net Profits
18.....	$342,167	$46,505	$295,662	$13,056	$308,719
17.....	299,126	43,977	255,150	4,645	259,795
16.....	304,637	28,967	275,670	6,634	282,304
15.....	260,424	28,991	231,433	5,224	236,657
14.....	328,850	30,876	297,974	9,678	307,652
13.....	816,025	53,098	762,927	8,560	771,487

Dividends: 2% in 1907; 9% in 1908; 10% in 1909; 15% in 1910; 50% in 1; 50% in 1912; 32% in 1913; 18% in 1914; 12% in 1915, 1916, 1917, 1918 1919. Total, 256%, or $5,686,735 to January 1, 1920. Present rate of 3% rterly yields 20% on current price of stock.

Property: 1 claim, 40 acres, the McKinley-Darragh mine at southern of Cobalt lake; 1 claim, 40 acres, the Savage mine, on the east side of Cart ; 40 acres in Bucke Twp., the Bennett claim. The McKinley-Darragh, which oins the Nipissing and La Rose holdings, has been the most important pro**er.** Deepest workings are at 400', where the contact with the Keewatin nation is exposed.

Development: work in McKinley amounted to 8,200' in 1918, the largest age of any year. This large amount of exploration was responsible for the ased costs, but it served to find several payable orebodies. Several small s were developed in the lower levels of the mine, but no large orebodies of ance were found. There is only a small area of favorable ground on the er levels yet to be explored. The Savage is practically worked out.

Ore reserves: estimated January 1, 1919, to contain 852,754 oz. of silver; compared with 1,076,182 oz. January 1, 1918, and 1,714,302 oz. January 1, 1917. Reduction in reserves is due to exhaustion of the Savage mine.

Costs at the McKinley-Darragh mine:

Year	Tons Milled	Costs: Mines	Mill	Mktg.	Total
1918	67,020	$2.75	$1.53	$1.19	$7.36
1917	68,142	2.47	1.33	1.06	6.93
1916	62,676	1.98	0.95	1.08	5.15
1915	50,912	1.78	0.93	1.01	4.71
1914	45,098	2.22	1.44	1.70	6.[illegible]
1913	48,761	2.44	1.39	1.88	7.[illegible]

Extraction on all ore milled was 86.9% in 1913; in 1914, 85.1% on McKinley ore and 64.1% on Savage ore; 80.9% in 1915; 86.98% in 1917; 87.23% in 191[illegible]

Production:

Year	Ounces Silver Shipped: McK.-D.	Savage	Total	Cost per oz.	Profit per [illegible]
1918	886,398	.....	.....	$0.6842	$0.31[illegible]
1917	1,020,545	.....	.....	0.5052	0.3[illegible]
1916	1,055,996	.....	.....	0.4073	0.2[illegible]
1915	803,717	256,419	1,060,136	0.2871	0.2[illegible]
1914	1,051,925	208,121	1,260,046	0.3130	0.2[illegible]
1913	1,672,431	556,066	2,228,497	0.2230	0.3[illegible]

Output in 1919 was valued at $815,902. Total silver shipped to end of 19[illegible] was about 18,900,000 oz.

Future of McKinley-Darragh-Savage has been brightened by develop[illegible] at depth, and property may continue dividends for some time yet, as the [illegible] mill tailings are now being treated in an oil flotation plant installed 1919-20.

MERCER SILVER MINES, LTD. ONTARIO

Offices: 103 Bay St., Toronto and Cobalt, Ont.

Out of business, described in Vol. XIII.

MILLER LAKE O'BRIEN MINE ONTARIO

Address: M. J. O'Brien, principal owner, Cobalt, Ont.

Operating officials: J. G. Dickenson, mgr.; B. C. Crowe, mine supt. Cumings, mill supt.; Alex. Starke, sec-treas.

Property: has been one of the leading silver producers in the Gowgan[illegible] district. Vein said to be 10' wide and to contain five 5" streaks assaying [illegible] oz. silver per ton. Developed by shafts; No. 2, the deepest, 450', at last acco[illegible]

Equipment: includes hoists, 20-drill compressor, and a mill; a hydr[illegible] electric plant between Gowganda and Burke lakes is equipped with 2 turbi[illegible] and a 900 h. p. generator.

Production: figures not available, but reported to be 631,671 oz. [illegible] 1918.

MILLERETTE SILVER MINING CO., LTD. ONTARIO

Controlled by M. J. O'Brien, Ltd., Cobalt, Ont. No information is avail[illegible]

MINING CORPORATION OF CANADA, LTD. ONTARIO

Office: Bank of Hamilton Bldg., Toronto. **Mines and works:** Cob[illegible] Ont.

Officers: Sir H. M. Pellatt, pres.; J. P. Watson, 1st v. p.; W. P. [illegible] Parker, 2nd v. p.; with G. M. Clark, R. E. G. van Cutsen, D'Arcy Weather[illegible] J. G. Watson, directors. W. W. Perry, sec.; C. E. Watson, mgr., Cobal[illegible] M. F. Fairlie, mill mgr. Scott Turner, cons. engr.

Inc. March 20, 1914. **Cap.,** $2,075,000; shares $1 par; all issued; 1,911,[illegible] shares were held by the Canadian Mining Corp., Ltd., in liquidation.

Capital increased to $8,300,250, shares $5 par, in 1917. Traded in [illegible] Toronto Stock Exchange, shares sold, $2.12 low, $4 high in 1918; $1.50 low $2.50 high in 1919.

April 1, 1914, the Mining Corp. of Canada acquired the mining prop[illegible] ties formerly operated by the Cobalt Townsite Mng. Co., Ltd., Cobalt [illegible]

g. Co., Ltd., City of Cobalt Mng. Co., Ltd., and the Townsite Extension ies, Ltd., total area, 183½ acres, at Cobalt. In 1915, the property of the le Nipissing Mining Co., 40 acres, was acquired. On January 1, 1917, iness and assets of Canadian Mng. Corp'n. were acquired.

Owns entire capitalization, $250,000. of Cobalt Reduction Co., Ltd., rating a 300-ton mill and 140-ton cyanide plant.

In November, 1919, company bought control (70%) of the Buffalo ies Co.

Comparative Balance Sheet, years ending December 31:

ce to balance sheet	$3,025,357	$3,448,377	$2,447,582

Dividends: in 1916, 25% and 2½% bonus; in 1917, 18¾%; in 1918, %; in 1919, 37½%. The total is $4,876,756.

Property: the City, Cobalt Lake, Little Nipissing, and Townsite Silver s at Cobalt, Ont. The second named was exhausted and closed at of 1918. The Townsite at the end of 1918, had but 205,000 oz. silver ; ore reserves; exploration work has been finished on this property.

Geology: ores occur in narrow calcite veins in Huronian conglomerate and Keewatin formation. The high-grade ore in 1918 assayed 1953 oz. silver per ton, the milling ore, 35 oz. silver per ton, and average of total ore treated was 41 oz. per ton.

Development: vein 32 of the City mine yielded most of 1918 production; reserves have been increased by the discovery that in some stopes the silver content extends out into the wall rock. There is little virgin ground left on the property, but exploration is vigorous; that of 1918 totalled 6,540', at cost of $16.52 per foot. Total openings are over 22 miles. Mining costs were $7.30 per ton in 1918; $4.74 in 1917, and $3.87 in 1916. Exploration of new areas in the other mines should reveal orebodies, but the Townsite is near exhaustion.

Ore reserves: at end of 1918 were 314 tons of rich ore, containing 391,450 oz. of silver, and 29,257 tons mill ore containing 849,111 oz., a total of 29,571 tons with 1,240,550 oz. silver, compared with 31,364 tons and 1,545,370 oz. in 1917; and 64,751 tons and 3,235,000 oz. in 1916. Tailings contain 1,000,000 oz. additional, which will be retreated.

Company examined 164 properties in North America during 1918, 90 in 1917, and 65 in 1916. Two are now being developed in British Columbia, which see under company's name. Exploration was also started at Butte, Ontario, searching for radium ore.

In the Casey district, Ontario, the company is developing the Nelson and other claims. A separate company controlled by the Corporation operates a fluorspar property near Madoc, in eastern Ontario. In 1917 an option was closed on a quartz gold property in the Yenesei district of Siberia, after considerable development had been done, but due to the political condition of the country the mine was closed temporarily. The company also plans to develop a large coal field at tidewater in the Far East, and is negotiating for a lead-zinc silver mine there. Properties in China, Mexico and South America have also been examined.

Production: ore is treated at the Cobalt Reduction Co.'s plant.

Year	Tons ore treated	Oz. Silver per ton	Extraction per cent	Total Oz. silver Rec.	Total costs per ton	Total costs per Oz.
1918(a)	42,482	41.01	95.71	1,667,344	$24.51	60.9¢
1917	84,085	56.49	94.43	4,485,541	19.26	36.1
1916	114,392	42.29	92.14	4,457,440	13 43	34.4
1915	132,879	37.86	90.72	4,563,957	10.15	29.5

(a) does not include 17,632 tons tailing treated with a total silver recovery of 40,908 oz., or 57.04%.

Total production, to 1919, totals 29,204,217 oz.. The company is one of the largest silver producers in Canada. Its 3 Cobalt properties are nearing exhaustion, but under present management there seems little doubt that other good properties will be acquired and the company continue paying dividends. Reported in November, 1919, that company had purchased control (70%) of the Buffalo Mines, Ltd.

NIPISSING EXTENSION MINES, LTD. ONTARIO

Officers: A. J. Young, pres.; W. E. Stevenson, v. p.; with Albert Loring; J. W. Pickup, and Abbott Kimball, directors. E. H. Birkett, mgr.

Inc. 1919, in Ontario. **Cap.,** $3,000,000, issued $2,000,000.

Company has purchased property formerly owned by **Nipissing Ex. Mng. Co.,** 40 acres in Peterson Lake area of Coleman Twp., also property once owned by **Farah Mng. Co.;** this has been unwatered and development resumed.

NIPISSING MINES CO. ONTARIO

Company's assets and business acquired in September, 1917, by the Nipissing Mines Co., Ltd., of Ontario. Nipissing Mines Co., described in Vol. XIII.

IPISSING MINES CO., LTD. **ONTARIO**

Company took over assets and business of the Nipissing Mines Co., Maine, which controlled the Nipissing Mining Co., Ltd., which see.

Head office: Excelsior Life Bldg., Toronto, **New York office:** 165 oadway.

Dividends: paid to April 20, 1920, a total of $21[illegible],000, equal

Property: 8 claims, 846 acres at Cobalt, Ontario, Canada, has fissure veins, from ½" to 12' in width, occurring in Huronian conglomerate or Keewatin formation. The ore carries silver, with cobalt, arsenic and mercury.

Development: total work in 1919 amounted to [illegible], compared with 7,815' in 1918. There are 10 working shafts on the property. The No. 64 shaft is 1,003' deep; work there in 1919 gave no [illegible]. At the beginning of 1919, several orebodies have been found, all of which have proved up well. Shaft 73 produced most of the ore mined in 1918. Shaft 63 was pumped out in 1918 and work resumed on the Silver veins. In 1919, tunnel 96 opened No. 99 and 109 veins, which are small but very rich.

Ore reserves: January 1, 1920, were 116,061 tons, assaying 54 oz. silver per ton, or 6,354,656 oz. in all, compared with 6,095,[illegible] on January 1, 1918.

Early in 1919, the company acquired an interest in [illegible] acres 20 miles S. E. of the Burkburnett oil pool, in Clay [illegible], Texas. Drilling was started in May, and by March, 1920, a depth of [illegible]' had been reached.

Equipment: includes a mill for high-grade ore, [illegible], down in 1918, on account of the high price of mercury; a [illegible] mill for ore, cyanide plant, air compressors, power house, [illegible] and new flotation plant of 10 Callow cells treats tailings.

Year	Production: Ore, tons	Silver per ton, oz.	Total silver, oz.	[illegible]

*Net loss.

Dividends: fiscal year ending April 30, 1915, No. 1 to 4 inc., $168,[illegible] April 30, 1916, No. 5 to 8 inc., $168,127, No. 9 to 11 inc., $126,096. L[illegible] one, Jan. 2, 1917. Total is $462,063.

Property: 224 acres underlying Peterson Lake at Cobalt, almost s[illegible] rounded by holdings of the Nipissing Co. The most important lease w[illegible] that of Seneca-Superior, now exhausted. Company operated the Merc[illegible] Reliance and Peterson Lake mines, the last named in the Nova Scotia s[illegible] tion. All leases given by company have now expired.

Development: the Peterson Lake area has been prospected thro[illegible] shafts No. 2 and 3 and the Nova Scotia territory opened up; several ve[illegible] have been found here, but to date commercial ore has not been found [illegible] paying quantities. During the year new work totaled 3,556'.

Production: in 1913, 1,230,732 oz. silver; in 1914, 1,608,550; in 1915, 22[illegible] 295; in 1916, 11,204 oz.

The company's property has been well prospected in Nova Scotia ter[illegible] tory, but the Little Nipissing & Susquehanna tracts are promising and [illegible] large part of the company's ground under Cart Lake is still unexplored.

Mine was practically closed down from February to April, 1917, wh[illegible] entire management changed.

Two years' litigation between the company and the Dominion Red[illegible] tion Co., resulted in a recent judgment by the Supreme Court of Can[illegible] awarding to the company the 250,000 tons of slime in Peterson Lake, deriv[illegible] from the company's ore, and valued at $1,473,186. In December, 1919, No[illegible] shaft was being unwatered and exploratory work started.

PITTSBURG AND LORRAIN SYNDICATE ONTARI[illegible]

J. A. Rice, mgr. **Property:** the Currie Mine, adjoining the Wettlaufe[illegible] in South Lorrain, Ontario, Canada, said to show rich silver ore in pocke[illegible]

Development: is by shaft, to 300' level. Diamond-drilling to 900' dept[illegible] 1917. Leases the Wettlaufer 25-ton mill, increased daily capacity to 40 t[illegible] in 1919. Mill at present is retreating old tailings.

RIGHT OF WAY MINES, LTD. ONTARI[illegible]

Office: Central [illegible]ber, 46 Elgin St., Ottawa, Ont.

[illegible] C. [illegible]outh, v. p.; E. A. Larmouth, sec.-treas.; direc[illegible]

A. [illegible]

Inc. September 11, 1909, in Ontario. **Cap.**, $2,000,000; shares $1 par; standing $1,685,500. **Transfer office** 46 Elgin St., Ottawa, Ont. Annual ting in February.

Shares selling around 5c per share, 1916, sold in the boom days as high 10.50. The company has paid 66⅔% on the old capital of 500,000 shares the new capital of 2,000,000 shares.

Annual report for 1918 shows gross receipts $48,089; operating expenses 835, leaving a net profit of $2,254. Adding the previous balance, etc., e was available $5,873. Depreciation and general expenses reduced this 515.

Dividends: $252,825 to March, 1917.

Property: 3½ acres adjoining La Rose mine at Cobalt, and mining its 3½ miles of the right-of-way of the T. & N. O. Railway. The mine duced a large amount of silver for a few years, though for the past four rs but little rich ore has been found.

Development: to a depth of 465'.

Production: in 1918 was 162 tons of high-grade ore, concentrates, and allics returning $50,384. In 1917, 186 tons ore were produced with a ie of $54,441.

MISKAMING & HUDSON BAY MINING CO., LTD. **ONTARIO**

Company dissolved 1919, former address New Liskeard, Ont., Can.

Officers: F. L. Bapst, pres.; A. A. McKelvie, v. p., with T. McCamus, . Ritchie, W. H. Kinch, Chas. L. Sherrill, F. L. Hutchinson, sec.-treas., ve are directors. D. A. Mutch, mgr.

Inc. July 29, 1903, in Ontario. **Cap.**, $25,000; shares $1 par; outstanding 51 Annual meeting, last Tuesday in October. Company is a holding oration, whose operating company is the Hudson Bay Mines, Ltd., ch in turn controls Dome Lake Mining & Milling Co., Ltd.

Balance sheet for year ending Aug. 31, 1918, shows: assets $2,812,001, ch includes stock of Hudson Bay Mines, Ltd., 546,000 shares, $2,730,000; , $1,166; Hudson Bay Mines, Ltd., accounts receivable, $76,075; Gow- ia claims, $4,500; furniture, $260. Liabilities include: outstanding capital k, $7,761; balance, loss and gain account, $2,804,240.

Dividends: during 1915-'16 one 300% dividend was paid, bringing total lends paid since incorporation to 1915 to 25,000%, or $1,940,250. Opera- s are described under titles of the subsidiary companies.

Assets of T. & H. B. distributed and charter surrendered in 1919, shares of . M. Co. held by T. & H. B., distributed pro rata to shareholders.

MISKAMING MINING CO., LTD. **ONTARIO**

Office: Standard Bank Bldg., Toronto. **Mine office:** Cobalt, Ont., Can.

Officers: J. P. Bickell, pres.; W. J. Sheppard, v. p.; with Geo. E. Drum- d, W. Linton, Geo. N. Miller, H. D. Symmes, J. B. Tudhope, directors. . Van der Voort, sec.; P. W. Cashman, treas.; L. J. Pashler, asst. treas.; . Cooper, mgr.

Criticism of the mine management and dissension among the share- ers culminated when H. B. Wills, a broker, and M. Morgenstern, a eholder accused the management of distorting facts in reports to share- ers. As a result of these charges an examination of the mine was e by Balmer Neilly of the Penn-Canadian mines, who estimated 11,572 of positive ore broken, or 4,000 tons less than official reserves. As ius shareholders still doubted the correctness of these estimates, Doug- Mutch of the Hudson Bay mine was employed to sample the mine. He

estimated reserves of 10,816 tons of ore, containing 393,800 oz. silver. Exploration of the lower contact at 1,600' in depth was unsatisfactory and results generally do not warrant further expenditure.

Inc. 1906, in Ontario. Cap., $2,500,000; shares $1 par; non-assessable, all issued. Union Trust Co., Toronto, transfer agent; Chartered Trust & Executive Co., Toronto, registrar. Annual meeting first Monday in February. Listed on Standard Stock Exchange, Toronto. Shares 34c low, 35½c high in 1918; 30c low and 52½c high, 1919.

On December 28, 1917, a shareholders' meeting authorized the purchase from **Beaver Consolidated Mines**, of 871,525 shares of **Kirkland Lake Gold Mining Co.**, at 40c a share. This is half the Beaver Company's interest. Money for development work at Kirkland to be advanced equally by the companies. This deal is said to have been blocked by two shareholders.

Company controls the Wright-Hargraves Mines, Ltd., at Kirkland Lake, developed by 425' shaft. A 110-ton mill to be erected.

Dividends: 15% in 1908; 6% in 1909; 11% in 1910; 9% in 1911; 12% in 1912; 3% in 1913; none in 1914; 3% in 1915; 9% in 1916; and 12% in 1917; 3% in 1918; nil in 1919; 2½% in 1920; a total of $2,175,000. Earnings were $295,252 in 1919; and surplus on mining account was $70,448, compared with $135,394 the previous year. The total surplus at end of 1919 was $864,[illegible]. Earnings in 1919 were small, as mill ran but 44% of the time.

For 1918 the following figures have been reported: current assets, $[illegible]114, which includes $700,000 in Victory bonds; profit, $135,395; earnings $425,014, of which $368,724 came from ore sales; operating expenses, $[illegible]801; total assets, $3,893,463, of which $2,427,802 is in properties.

1913.....	438,455	320,881	117,574	196,[illegible]

* Deficit.

Property: in which the company is directly or indirectly interested—Daile claims, 20 acres; Gans property; McDonald claims, 40 acres in North Cobalt; Peterson claims, 40 acres; Osland claim, 40 acres each in McCool, Cook, and Barnet townships; the Morrison claims, commonly called the Red Jacket, and the North Dome property, in the Porcupine mining division. The Red Jacket was leased in 1916 to a syndicate which unwatered it.

Ore: high-grade silver, containing arsenic and smaltite. Ores occur in veins where they cut contact of the Keewatin formation with a diabase sill. Pay ore is found in shoots.

Diamond-drilling has proved that another contact occurs below the base sill at a depth of about 2,000′

Ore reserves: estimated February 7, 1918, at but 829 tons containing 41 oz. silver. The report of the manager at that date stated future possities of the property depend on finding ore in the Gans lot above the sill, on the Temiskaming and Gans lots below the sills.

Development: by 1,600′ vertical shaft and 4,000′ of workings.

Equipment: includes a compressor for 20 drills, a Nordberg hoist with lrums and capacity of 2,500′. Electric power is hydraulically generated. e 40-stamp mill is equipped with concentrating machinery and handled tons of low-grade ore a day until compelled to close, 1918, owing to ɔility of mine to furnish over 40 tons ore daily. Reported that an important body had been opened on the 500′ level in 1919.

Production: 11,300,000 oz. of silver from 246,000 tons to end of 1918. e yield in 1918 was 420,076 oz.; in 1919, 243,037 oz. silver.

ETHEWEY SILVER-COBALT MINE, LTD. **ONTARIO**

The Trethewey mine was acquired January, 1920, by the Coniagas comy for $100,000.

Office: 1601 Royal Bank Bldg., Toronto. **Mine office:** Cobalt, Ont.

Officers at last accounts: S. R. Wickett, pres.; J. B. Tudhope, v. p.; with don Taylor, J. B. Bickell, W. J. Sheppard and T. E. Leather, directors; J. Pashler, sec.-treas.; I. S. McReavy, mgr.

Inc. 1906, in Ontario. **Cap.,** $2,000,000; $1 par; non-assessable; outɪding, $1,000,000. No bond issues. Annual meeting, February. Toronto ɪeral Trust Corporation, transfer office. C. E. Robin, registrar. Listed New York Curb. Shares 30c. low, 52½ high, 1919.

Reported that 1918 net value of year's production was $250,534; operating . $147,166; operating profit, $103,368. Current assets, $171,600, and current ilities. $20,000. Company bought 370,000 shares of Castle Mining Co. stock, $78,230 was spent on property in 1918.

Dividends: total 133% to January, 1919.

Property: one patented claim, 40 acres, Coleman township, Cobalt. dist; also owns control in Rochester Mines, Ltd., of Cobalt. Ore deposits d silver and cobalt and occur between conglomerate and diabase. Pay occurs in shoots. At Gowganda company is opening the Castle mine, and spent $80,000 to end of 1919.

Development: by vertical shaft, greatest depth 250′, and total linear ɛnt of workings 25,650′. The limited productive area of the property, about ɛres, to a depth of 250′, is practically worked out. In 1918, production came n walls of old stopes, was very low grade, and only made profitable by high e of silver. Estimated ore reserves at end of 1918, contained 159,172 oz. ɪpared with 264,044 oz. the previous year, a decrease of almost 40%.

Equipment: compressors, hoists and other necessary mining machinery, des a 30-stamp concentrating mill with a capacity of 100 tons daily. A 100-flotation plant has recently been erected to treat slime dumps which con-65,000 tons of 4.7 oz. material. Several months' operation said to have wn a profit of $1.50 per ton.

Production: in 1918, the mill treated 24,514 tons ore at a cost of $2.21 ton.

The Castle property at Gowganda, acquired in 1918, is next to the Millerɛ-O'Brien, and a level at bottom of the 380 ft. shaft is said to have as good ɪes as the vein cut on the level above. The Major property at Gowganda optioned in 1919, and a lease also taken on 112 acres under Miller lake.

IVERSITY MINES, LTD. **ONTARIO**

Is a subsidiary of the La Rose Consolidated Mines Co., which see.

ETTLAUFER-LORRAIN SILVER MINES, LTD. **ONTARIO**

Office: 61 Broadway, N. Y. **Mine office:** South Lorrain, Ont.

Officers: H. Lockhart, Jr., pres.; D. M. Steindler, v. p.; E. H. Westlake, treas.; the foregoing, and T. L. Herrmann, J. H. Sussmann, W. J. Ma-

gavern, Wm. J. McWhiney, J. L. Mitchell and Herman Cook, directors. H. A. Kee, mgr.

Inc. November, 1908, in Ontario. **Cap.**, $1,500,000; $1 par; non-assessable; outstanding, 1,416,590 shares. Annual meeting, fourth Monday in January. Bankers' Trust Co., New York, and Trust & Guarantee Co., Ltd. Toronto, transfer offices; Security Transfer & Registrar Co., New York, registrar. Listed on New York Curb.

Balance sheet, Dec. 31, 1918, showed total assets, $1,520,180, which include mine property, $1,383,112; U. S. Liberty bonds, $60,390; cash, $22,719.

Operations ceased in 1913, owing to exhaustion of ore, and efforts to find other bodies in the property practically abandoned.

During recent years the company's properties were operated under a lease to the Comfort Mining & Leasing Co., Ltd. In Sept., 1917, the Pittsburg Lorrain Company leased the mine, paying $2,210 in royalties in 1918.

WRIGHT-HARGRAVES MINING CO. ONTARIO

Property owned by Temiskaming Co., which see.

KIRKLAND LAKE DISTRICT

BALDWIN GOLD MINING CO., LTD. ONTARIO

Address: 301 Dominion Bank Bldg., Toronto. W Wilson, mgr., Mile 167, T. & N. O. Ry. Kenogami Lake, Ont.

Officers: F. W. Tanner, pres.; F. W. Gates, v. p.; J. A. Cherry, sec.-treas.; with H. J. Dudley and Jas. Gorrie, directors.

Inc. January, 1917, in Ontario. **Cap.**, $2,500,000; par $1; outstanding 1,805,000 shares. Listed on Toronto Exchange, but no quotations given in published lists for 1919.

Property: 160 acres, in Eby Twp., Kirkland Lake mining district. Gold was discovered on tract in 1910 and property bought in 1917 from Mr. Jas. Gorrie for 1,500,000 shares. Ore occurs in quartz veins.

Development: on one vein includes a 200′ shaft, with 500′ of workings; said to expose ore of "large amount but not estimated."

Equipment: includes a hoist and compressor. Property is a prospect undergoing development; Tanner, Gates & Co., of Toronto, are helping finance the company.

BOURKES MINES, LTD. ONTARIO

Address: J. J. Byrne, mgr., Bourkes, Kirkland Lake, Ont.

Cap., $2,500,000; $1 par.

Property: the south half of Lot 9 in second concession of Benoit Tp., at Bourke's siding, N. W. of Kirkland Lake, developed by 200′ shaft and 1,500′ of workings. A 28″ gold quartz vein exposed at 200′ depth.

Equipment: 80-h. p. steam boiler, 210 cu. ft. compressor, 2 Jenckes hoists; a mill being planned and buildings for 50 men.

BURNSIDE GOLD MINES, LTD. ONTARIO

Address: Charles Richardson, mgr., Kirkland Lake, Ont.

Inc. July, 1913, in Ontario. **Cap.**, $3,000,000.

Is a subsidiary of the Kirkland-Lake Proprietary, Ltd. Owns 3 claims joining the Tough-Oakes gold mine at Kirkland Lake.

Mine was operated in 1918 by the Aladdin Cobalt M. Co.

In 1918, development was resumed and shaft No. 2 was sunk to 420′ on vein No. 3; high values were found on the 120′ level. A 30-ton mill was operating in Feb., 1919. A consolidation with Kirkland Lake Proprietary Ltd. and Tough Oakes was planned.

CANADIAN-KIRKLAND GOLD MINES ONTARIO

Address: George Tough, sec., Haileybury, Ont.

Property: 4 claims at Kirkland Lake shows a number of promising veins on which development work was started in 1917. Crown Reserve Mining Co. acquired control and [illegible] in May, 1919.

ELLIOTT-KIRKLAND [illegible] INES, LTD. ONTARIO

[illegible]; Kirkland

Officers: S. H. Worth, pres.-treas.; R. H. Lyman, v. p. and mgr.; W. A. ordon, sec.; with John M. Wood and E. W. Kearney, directors.

Inc. December, 1916, in Ontario. **Cap.,** $2,000,000; par $1. Traded on oronto Stock Exchange.

Property: 2 gold-bearing claims, 85 acres, at Kirkland Lake, developed y a 520′ shaft and extensive diamond drilling. As commercial ore was not ound on the lower levels, work was stopped temporarily in 1919.

Equipment 60-h. p. boiler, hoist, compressor, and quarters for 18 men.

RANBY-KIRKLAND GOLD MINES, LTD. **ONTARIO**

Head office: Toronto, Ont. E. Croteau, supt.

Cap., $2,000,000; par $1.

Property: 2 claims, 85 acres, in twp. of Lebel, 1 mile N. E. of Tough-akes mines, on which trenching has disclosed 3 promising veins. Company ans sinking shaft.

UNTOON-KIRKLAND CO. **ONTARIO**

Cap., $1,500,000. Traded in on Toronto Exchange.

Reported, Oct., 1919, that company had given an option on 500,000 treas-ry shares at 20c. each—the money to be used for further development. The roperty was idle during the war.

IRKLAND LAKE EXPLORATION, LTD. **ONTARIO**

Office: Pinners Hall, Austin Friars, London, Eng.

Officers: C. H. Villiers, pres.; H. J. Hollingsworth, and R. D. La Bere, irectors. E. C. Wheater, sec.

Inc. January, 1914, in England, to acquire mining properties in Ontario, anada. **Cap.,** £150,000; shares £1 par; 26,000 issued. On June 30, 1916, ssets included stocks and bonds at cost, £10,320; interest in the Kirkland ake district, £1,650. Organization expenses, £5,498; exploration, etc., £12,-1; cash, £116.

Property: in Swastika district, near Porcupine, Ontario, Can., and an terest in claims adjacent to the Tough Oakes mine. Is a holding company, active during the war.

IRKLAND LAKE GOLD MINING CO., LTD. **ONTARIO.**

Is a subsidiary of Beaver Cons. Mines, Ltd.

Address: 810 Lumsden Bldg., Toronto, Ont. **Mine office:** Kirkland ake, Ont.

Officers: F. L. Culver, pres.; J. H. Black, v. p.; R. Graham, sec.-treas.; . E. Tremain, asst. sec.; with Wm. T. Mason, directors.

Cap., $2,000,000; $1 par; 1,743,050 shares are owned by Beaver Cons. ines, Ltd. Shares 91c. low, $1.26 high, in 1918; 92c. low, $1.08 high, 1919, on oronto Curb.

Property: 362 acres in the Kirkland Lake district. Development work .s been confined to one claim on a vein which has been traced 1,400′ on rface and proved on 7 levels underground.

Development: by a 700′ shaft (No. 2), with levels 100′ apart. The third vel shows from 5 to 12′ of ore, assaying $7 to $12.80 per ton. The ore oot is 160′ long on the third and 220′ on the fourth level, and the high lues continue down to the 700′ level. The 3-compartment main shaft near nter of property connects with No. 2 shaft. Workings total 5,210′, but stoping has as yet been done.

Equipment: includes steam plant, electric motors, double-drum hoist, 12-drill and smaller compressors and a 150-ton mill, completed in 1918, with 8′ Hardinge mill, Dorr classifier, tube mill and 15 solution tanks. Mill was erated until labor troubles caused a 4 months' shutdown in 1919. Operation umed Dec., 1919.

Production: in 19[illegible], 11,324 tons of ore yielding 2,675.05 oz. gold and [illegible] oz. silver, of a total value of $56,262, representing a recovery of $4.97 per n. t.

IRKLAND LAKE PROPRIETARY, LTD. **ONTARIO**

Office: J. J. Sneddon, sec., Finsbury Pavement House, London, E. C. Eng.

Directors: H. G. Latilla, chairman; A. Burt, J. D. G. Simpson and G. F. Wyatt.

Inc. November 27, 1913, in England. **Cap.,** £200,000; shares £1 par; 100,000 issued and fully paid. Last annual meeting was held Oct. 17, 1918.

Company's assets are share holdings in the following companies: Tough Oakes Mines, Ltd.; Burnside Gold Mines, Ltd.; Sylvanite Gold Mines, Ltd.; Teck-Hughes Gold Mines, Ltd., and Sudbury Syndicate, Ltd.

Balance sheet Aug. 31, 1918, shows general expenses, £22,696; cash, £86; debtors, £35,566; loans and interest, £34,202; shares and interests in properties at cost, £111,492.

A merger with Aladdin Cobalt, Ltd., and through it with A. C. Co., Ltd. and Chambers Ferland Mining company, was made in 1920; see Aladdin Cobalt, Ltd.

KIRKLAND-PORPHYRY GOLD MINES, LTD. **ONTARIO**

Address: Kirkland Lake, Ont.

Officers: Henry Cecil, pres.; M. P. Vandevoort, sec.-treas.; with A. R. Porter, B. P. McAvoy and Wm. Linton, directors; J. C. Houston, mgr.

Inc. in Ontario. **Cap.,** $3,000,000; par $1; 1,623,005 shares issued. Bonds: $540,000 outstanding of an authorized issue of $800,000.

Property: 9 claims, 3 patented, approximately 360 acres, at Kirkland Lake, formerly operated by Orr Gold Mines, Ltd. The tract is said to show porphyry cut by quartz veins with N. 60° E. strike and dip of 75° S. E. Ore occurs in shoots up to 12′ in width, assaying about $13 gold per ton.

Development: by 400′ vertical shaft, with 800′ of workings. Management claimed ore reserves of 65,000 tons, valued at $800,000, and to have spent $120,000 on the property in 1918.

Equipment: includes hoist, compressor, and electric power. Plant building a cyanide mill. Company in liquidation, Nov., 1919.

KITCHIGAMI GOLD DEV. CO. **ONTARIO**

Officers: John Daniell, pres., Calumet, Mich.; John MacRae, v. p.; Chas. Chynoweth, sec.; Jas. T. Fisher, treas.

Inc. 1915, in Arizona. **Cap.,** $300,000; shares $2 par; 100,000 shares subscribed at 25c.

Property: 160 acres, Gordon McGuire claims, on Goldfish lake, Macassette township, Ont., Kirkland district, adjoining the Goldfish Lake Gold Mines Co. Ground acquired on advice of Chas. W. Botsford, E. M.

Some diamond-drilling was done in 1916, without important results.

LA BELLE KIRKLAND MINES, LTD. **ONTARIO**

Property: the Gibson group of claims at Goldfish Lake, Kirkland Lake district, Ont., said to show molybdenite and gold ore in Keewatin formation. Developed to depth of 350′ by shafts and crosscuts, showing several 2′ strings of high-grade ore. Diamond drilling totaling 5,000′ is said to indicate ore to 700′ depth.

Equipment: includes compressor and hoist good for depth of 1,000′.

Suspended operations, July, 1917, pending financing. Plans were on foot, 1919, to sell treasury stock and resume operations.

LAKE SHORE MINES, LTD. **ONTARIO**

Address: Kirkland Lake, Ont.

Officers: Harry Oakes, pres. and man. dir.; A. G. Slaght, v. p.; C. Wettlaufer, 2nd v. p.; Dr. W. P. St. Charles, treas.; with Louis Oakes, W. Wright, and A. E. Wende, directors. Kirkland Securities, Ltd., sec.; R. Coffey, mgr.

Inc. February 25, 1914, in Ontario. **Cap.,** $2,000,000; par $1. Trust and Guarantee Co., Ltd., Toronto, transfer agent and registrar. Traded on Toronto Exchange. Price record, 91c. low, $1.26 high in 1918; 92c. low, $1.08 high in 1919.

Balance sheet, Nov. 30, 1918, shows assets of $1,462,023, which include cash, $49,417; other current, $137,579; buildings and equipment, $160,564; property, development and organization expenses, after charging off $90,000 as provision against exhaustion, $1,112,632; exploration, $1,831. Current liabilities were $84,841; capital stock, $1,332,203; surplus for year, $44,978.

At end of 1919 current assets were $112,620; current liabilities, $41,947; ɔme, $307,531; operating expenses, $209,258. The profit of $98,273 was re-ed to $38,273 by deductions for ore exhaustion.

Dividends: 4 quarterly dividends of 2½% paid to October 25, 1919, a ıl of $200,000.

Property: the Lake Shore gold mine, on Kirkland Lake, adjoins the k-Hughes on the east.

Development: 400′ shaft and several thousand feet of workings. In year ending Nov. 30, 1918, new work totaled 2961′, of which 1141 was on No. ein, and 1920′ on No. 2 vein; 80% of all drifting was on ore of milling de. The ore contains gold telluride, and the shoots persist in both size and ıe to the 400′ level. New work in 1919 amounted to 1,864′, with 6,035 tons of 60 broken ore in reserve.

Equipment: includes 7-drill electrically-driven compressor, fully ipped shaft-house, heating plant, continuous decantation cyanide plant, with ıpacity of 60 tons daily.

Production: the mill started operating March 8, 1918, and during the ıainder of the year treated 14,948 tons of ore, recovering $24.76 per ton. ı a total bulion production of $370,128. Expenses were $139,096, leaving a fit of $234,978, before making the $90,000 provision for exhaustion. In y, 1919, production amounted to $42,136 from the treatment of 1,750 tons ɔre, a recovery of $24.08 per ton. In the following month, the mine closed ;n, and the pumps were pulled, allowing it to fill with water, as a result of ıbor strike which lasted several months. Production resumed November,), and shaft deepened to 600′. The output in 1919 was $294,514 from 11,907 ; of $24.67 ore.

NAKER KIRKLAND GOLD MINES, LTD. **ONTARIO**

Address: G. A. Bagshaw, Haileybury; and T. J. Flynn, mgr., Kirkland ;e.

Inc. in Ontario. **Cap.,** $1,500,000; $1 par.

Officers: G. A. Bagshaw, pres; Frank L. Mapes, v. p.; F. Haak, sec.-ıs., both of Rochester, N. Y.; with Edward Moir, Marcelles, N. Y., and n Kavanagh, Rochester, directors.

Property: four claims, adjoining the Lake Shore on the S., is said ıhow a number of gold bearing veins, on one of which a shaft has been k to depth of 175′, with drifting in progress on 150′ level.

TARIO-KIRKLAND GOLD MINES, LTD. **ONTARIO**

Address: Haileybury, Ont.

Officers: Frank Huth, pres.; Walter E. Hurd, v. p.; with Ralph Hurd, A. Dalton, Henry Haertel, Wm. H. Meyer and H. S. Sonder, directors. W. A. ·don, sec.; M. A. Riley, treas.. Ralph Hurd, mgr., Haileybury, Ont.

Inc. 1918, in Ontario. **Cap.,** $1,500,000; par $1; outstanding 965,006 res. By Dec., 1919, 400,000 treasury shares had been sold to provide cash development work.

Property: 2 patented claims, 88½ acres, S. E. of Lake Shore mine, kland Lake, Ont. Ground shows gold bearing quartz veins in porphyry and glomerate.

Development: by 300′ vertical shaft, and two levels. **Equipment:** in-ies a 50-h. p. electric hoist. Reported that a 100-ton mill would soon be ed.

R GOLD MINES, LTD. **ONTARIO**

Address: Kirkland Lake, Ontario, Canada.

Inc. 1917. **Cap.,** $3,000,000.

Owns or did own the Orr group under option to Kirkland-Porphyry Gold ıes Ltd., 1917-1919. Conflicting reports regarding ownership were current

[illegible] GOLD MINES, LTD. **ONTARIO**

[illegible] of Kirkland Lake Proprietary.

[illegible] 1913, in Ontario. **Cap.,** $2,000,000.

Owns the Wright and Robbins claims adjoining the Tough-Oakes gold mine, Kirkland Lake. Work to date has been chiefly surface exploration.

TECK-HUGHES GOLD MINES, LTD. **ONTARIO**

Office: 14 Wall St., New York. **Mine office:** Kirkland Lake, Ont.

Officers: C. L. Denison, pres.; R. W. Pomeroy, v. p.; Geo. C. Miller, with A. W. Johnston and J. F. Thompson, directors. Wm. C. Himrod, treas; D. L. H. Forbes, gen supt.

Inc. in Ontario. **Cap.**, $2,500,000; $1 par; 2,134,000 issued. **Bonds:** $250,000. Traded on Toronto Stock Exchange.

Statement for year ended Aug. 31, 1918, showed an expenditure of $259,694. Income was $107,280, leaving a deficit of $152,415. Current assets were $59,885 and current liabilities $18,957.

Property: 4 miles from Swastika, in Kirkland Lake district, Ont. **Development:** by 600′ shaft, with five levels showing the vein to be 5′ to 30′ wide.

Equipment: hoist, 10-drill compressor, and milling plant, including ball and tube mills, cyanidation by counter current decantation, and Oliver filter. Electric power is supplied by the Northern Ontario Light & Power Co. of Cobalt, whose power plant is 65 miles distant.

Production: commenced in March, 1917, was continued until July, 1918, when property was closed on account of war conditions; reopened late in 1918. From Aug. 31, 1917, to July 2, 1918, the mill treated 15,879 tons ore of an average value of $7.87 per ton. In 1919, property produced 18,387 tons of ore, yielding $169,590.

TOUGH-OAKES GOLD MINES, LTD. **ONTARIO**

(Subsidiary of Kirkland Lake Proprietary, Ltd.) **Office:** 119 Finsbury Pavement, London, E. C. 2, Eng. **Mine office:** Kirkland Lake, Ont.

Officers: G. R. Bonnard, chairman; R. Simpson, E. H. R. Trenow, directors. C. O. Connell, mine mgr.; H. J. Almond, sec.

Inc. in England, Jan., 1914. **Cap.**, £500,000; shares £1; 230,007 outstanding. Organized to acquire 426,388 fully paid shares of the Tough-Oakes Mining Co., registered in Canada, with a capital of $3,000,000 (£600,000), in $5 shares, together with an option on a further 85,555 shares at 15s. each and 85,555 at 20s. On Feb. 28, 1919, company had 426,843 shares of Canadian company.

During 1915, two dividends of 2½% each were paid by the Canadian company and during 1916 four dividends of 2½% each.

For details of property see Tough-Oakes Mining Co., Ltd.

TOUGH-OAKES MINING CO., LTD. **ONTARIO**

Head office: Toronto, Ont. **Mine office:** Kirkland Lake, Ont.

Officers: Harry Oakes, pres., with Dr. R. J. Robins, J. B. Holden, J. Y. Murdoch and A. Burt, directors. Col. H. H. Johnson, gen. mgr. C. L. Richardson, mgr.

Inc. 1913, in Ontario. **Cap.**, $3,000,000; par $5; 531,500 issued; 426,843 shares owned by Tough-Oakes Gold Mines, Ltd. Operations for 1919 gave a net loss of $105,934.

On account of litigation the mine was closed down in 1918, but reopened March, 1919.

Dividends: to July, 1917, totaled $391,125.

Property: 185 acres in the Kirkland Lake district, Ont. **Development:** by shafts to 500′ depth, with extensive underground work. Ore is largely a hard mineralized feldspar-porphryry, with a net work of quartz stringers. The lode traverses conglomerate and graywacke.

Equipment: includes a 120-ton milling plant, using ball and tube-mills and the counter current decantation system of cyanidation.

Production: in 1918 was 22,000 tons yielding gold and silver worth $139,683.

Recent production figures are not obtainable. In April, 1919, seven drills and 98 men were employed and new work totaled 1,000′. A vein of $20 ore is said to have been found.

ITED KIRKLAND GOLD MINES, LTD. **ONTARIO**
Address: Kirkland, Ont.
Officers: R. T. Shillington, pres.; W. G. Ellis, v. p.; H. A. Day, sec.-
., with Levi Dodge and Ed. Kert, directors.
Inc. in Ontario. **Cap.,** $2,000,000; shares $1 par; 1,000,000 issued.
Property: 135 acres near the Teck-Hughes mine, Kirkland Lake dis-
Ont. Geologic conditions are said to be similar to adjacent producers.
Development: by surface prospecting; No. 1 shaft being sunk in Sep-
er, 1917.
Company may have fair prospects, but has received considerable over-
nistic advertising by brokers. No recent information.

ST KIRKLAND GOLD MINES, LTD. **ONTARIO**

Officers: F. C. Preston, pres.; H. L. Gibson, v. p., with W. E. Pres-
as. Cowan and Wm. C. Offer, directors.
Inc. April 5, 1919, in Ontario. **Cap.,** $2,000,000; par $1; 1,200,000 shares
anding.
Property: one claim, 50 acres, in Porcupine district, ¼ mile S. of Dome
, Ltd., said to show several quartz veins in quartz-porphyry. When present
any acquired the property there were two 90' vertical shafts, and a 50'
e shaft; 82 tons of ore shipped from the latter said to have realized $13,170.
output to date reported as $14,511.
Power and machinery installed, and considerable ore developed above 200'
in 1919. Electric power installed 1920, and 800' crosscut on 200' level started
eleven parallel veins.

IDSON CONS. GOLD MINES, LTD. **ONTARIO**
Address: Porcupine, Ontario.
Officers: G. C. Crean, pres.; H. B. Sutherland, v. p.; H. H. Sutherland,
director, with W. C. Lacey, directors. L. C. Platt, sec.-treas.; N. J. Evered,
F. D. Henderson, mine supt.
Inc. 1919, as a reorganization of the Davidson Gold Mines, Ltd. **Cap.,**

$5,000,000; $1 par. Shareholders were to receive a bonus of one share of new stock for every share in original company. After issuing sufficient stock to pay for additional acreage, new company will have 1,000,000 shares in treasury, in addition to $125,000 cash. Half a million treasury shares were, it is said, underwritten at 75c. net, to provide funds for operations.

Property: 5 claims, in Porcupine area, showing a 5½' vein of gold-bearing quartz, developed by 500' shaft. A winze put down 300' below the 500' level is said to show ore. A second shaft was sunk to open an orebody disclosed by diamond drilling between the 550 and 650' levels. This ore is reported to be 25' wide and to average over $24 per ton.

The adjacent ground acquired in the reorganization has increased the holdings to a total of 420 acres.

Over 2,115' of diamond drilling, and several thousand feet of underground development work has been done. The ore is treated in a 10-stamp mill and mill heads are reported to have run as high as $20 per ton. Electric power is purchased.

It is claimed that over $83,000 was spent on development work in the 3 months ended January 1, 1918.

Production: in 1919, mill treated 3,831 tons, yielding $27,089.

DAVIDSON GOLD MINES, LTD. ONTARIO

Reorganized, 1919, as Davidson Cons. Gold Mines, Ltd., which see.

DOBIE MINES, LTD. ONTARIO

Office: 201 Inspector St., Montreal. H. E. Carmichael, mgr., Porcupine, Ont.

Officers: Frank C. Armstrong, pres., 25 Broad St., New York; S. J. Le Huray, sec.-treas., 260 St. James St., Montreal. Directors: F. C. Armstrong, Geo. C. Loveys, Donald D. Fish, B. Osler, and W. A. J. Chase.

Inc. March 27, 1911, in Ontario. **Cap.**, $1,500,000; outstanding, $1,200,000. Of the issued stock, 1,100,000 was given to the owners in payment of the property and $100,000 stock was purchased by the Tisdale Gold Mng. Co., to provide funds for development purposes. Transfer agents: Toronto General Trusts Corp., Toronto; Investment Trust Co., Montreal. Listed on Toronto Standard & Mining Exchange, and traded in on the unlisted department of the Toronto Stock Exchange, and on the New York and Boston Curbs.

Property: 17 claims, crown patented, in Tisdale Twp., Ont., taken over from the Tisdale Gold Mng. Co., Ltd. Idle several years.

DOME EXTENSION MINING CO. ONTARIO

Head office: 36 Toronto St., Toronto, Ont., Can. H. C. Anchor, mgr., South Porcupine, Ont.

Officers: W. S. Edwards, pres.; J. S. Tomenson, v. p.; Alex Parker, sec.-treas., with J. S. Wilson, A. S. Wigmore, directors.

Inc. Jan., 1911, in Ontario. **Cap.**, $3,000,000; par $1; 2,300,000 shares issued. Annual meeting in May. Listed in Toronto and on New York Curb.

Property: 198¼ acres adjoining Dome Mines, Ltd., on the east, in the Porcupine district. An option to the Dome Mines, Ltd., given in 1919, provided that the latter company should spend $3,000 a month on exploration and development, and had until March 15, 1920, to purchase the property for 75,000 shares of Dome Mines, Ltd. stock. By December, work at 600' depth had revealed considerable ore, and crosscutting at 1,150' was started.

Development: 3 shafts and over 10,000' of underground workings, said to have opened a considerable tonnage of low grade ore.

DOME LAKE MINING & MILLING CO., LTD. ONTARIO

Offices: New Liskeard, Ont., and South Porcupine, Ont.

Officers: F. L. Bapst, pres.; A. A. McKelvie, v. p.; F. L. Hutchison, sec.-treas., with Thos. McCamus, W. H. Kinch, S. J. Dark and Chas. L. Sise, directors. Carl Frank, supt.

Inc. Aug. 26, 1912. **Cap.**, $3,000,000; $1 par; 2,750,000 shares outstanding. Controlled by Hudson Bay Mines, Ltd., which owns 894,045 of the outstanding shares. Trusts & Guarantee Co., Ltd., Toronto, transfer agent.

eting, second Monday in February. Listed in Toronto and on New York b.

Statement for 1918, showed revenue of $97,416; and expenditures, $115,487.

Property: 3 claims, patented, 120 acres, in Tisdale township, Porcupine, wing gold ore in quartz veins, regarded as replacement deposits. The veins N. 10° E. and have a dip of 70°. The mineralized zone traverses a basaltic k, and runs through the entire group.

Development: to depth of 600' by vertical shaft and 16,853' of work- s. Work in 1918 was confined to drifts on the 3d, 4th, 5th and 6th levels on 3 vein, west of shaft. Two ore-shoots were found on the 5th level; one long, the other but 25'; the ore in these shoots varied from $9 to $13.40 per ton. ken ore in stopes at end of 1919 was 2,422 tons, assaying $9.70 per ton.

Equipment: includes Vulcan hoist, compressor and 200-ton mill. A ton cyanide plant was completed in 1918.

Production: r	Tons Milled	Gross Value	Value per ton	Extraction %	Costs per ton
).....	4,433	$23,832	$6.50	78.85	.....
).....	11,929	115,202	9.65	84.5	8.73
'.....	16,388	68,214	4.16	66.1	8.14
).....	6,540	25,629	3.92	....	....

In September, 1919, shareholders authorized a $100,000 bond issue to raise ds for further development. Work was resumed early in 1920.

ME MINES, LTD. **ONTARIO**

* Deficit.

Property: 6 claims, 240 acres, in Tisdale township, Ont. The ... shows the veins of milky quartz usual in the district, the ore carrying free gold and auriferous pyrite. They form a stockwork whose net ... of interlacing stringers cut schists and intrusives of pre-Cambrian age. The ... body is over 100' across in places, and has been proved by diamond drill work ... a depth of 1,200' or more. The original outcrop, a dome-shaped hillock ... 30' high, showed so much free gold at one place that it was called the Golden Stairway. The gold occurs irregularly in the quartz, as large irregular ... entirely without walls and extremely uneven in value. It is mainly found ... near the contact of an intrusive porphyry with sedimentaries, and is capped ... slate. Development has proven the existence of quite as good ore at 700' ... in diamond drill holes at 1,150' vertically below the surface, as that mined ... the surface and in the upper levels.

Company has an option until March, 1920, on the 5 adjoining claims of the Dome Extension Mining Co., and spent $22,669 in 1917, and $3,000 a month ... 1919, diamond drilling and doing 2,730' of new underground work.

Development: the Dome mine has 3 working shafts, the main shaft being 1,200' deep. Considerable exploration and diamond-drill work has been done on the orebody, especially during the period December, 1917 to June, 1919, when the mill was idle on account of war conditions.

Reserves above the 700' level are estimated as 3,499,832 tons, averaging $... per ton, while the underlying block of ground down to a depth of 1,150' has a large tonnage of potential ore. An official estimate of reserves made April, 1917, was 2,250,000 tons averaging $5.32 per ton. In 1918, the average ... value of the ore reserves was $5.10 per ton.

Up to 1918, over 750,000 tons had been mined and milled and 321,000 ... remained in stopes. Stoping costs in that period were 47c. per ton. New methods of mining and ore handling installed in 1919, will, it is said, make a notable saving in costs. A square-type shaft was sunk on the footwall side of the ore-bearing zone, to a depth of 1,000', with stations at 100' intervals, ... loading pockets for ore and waste on several levels. The eighth level at a vertical depth of 850', is the main haulage way, all ore going to a 36 by 54 ... jaw crusher just below the station. Ore passes are so arranged that all the ... mined above this level, estimated at 2,000,000 tons, will be moved mechanically after it is loaded into cars. Shaft No. 2 is utilized as a main chute or pass from the upper workings to No. 8 level. Electric locomotives are used for haulage. Ore is hoisted by skips working in balance, taking 4 tons per trip at a speed of 1,100' per minute.

Equipment: is modern, extensive, and all electrically driven, by power obtained from Wawaitin Falls, 13 miles from the property. Three-phase current is supplied over the company's own transmission line at 12,000 volts, stepped down to 550 volts by 600 k. w. transformers.

The cyanide mill is of 1,500 tons daily capacity. It contains ball-mills (instead of the stamps formerly used), tube-mills, thickeners, agitators, and filter-presses. The mill was idle from December, 1917, until June, 1919.

Production:

Ore Milled, Tons	Value per ton	Recovery %	Cost per Ton Mining	Reduction	General	Total
187,580	$7.04	.....	....	....	....	....
247,000	$4.27	97.67	$1.42	$1.05	$0.32	$2.79
459,530	4.73	92.98	1.44	1.05	0.30	2.70
347,640	5.50	92.88	1.22	1.01	.32	2.56
248,550	4.68	90.6	1.38	1.12	.46	2.97
145,305	8.77	94.51	1.86	1.69	.64	4.19
101,812	10.72	95.63	1.31	2.35	1.29	4.95

The Dome is a big low-grade mine in which some extraordinarily rich ore ound. The mine and mill are well equipped to handle 1,500 tons daily, and r normal conditions will earn a handsome surplus. From 1914 to 1917, isive, the cost of producing 300,000 oz. of gold was $11.80 per oz., but $11 is considered ample to cover all expenses.

LD CENTRE MINES, LTD. **ONTARIO**

Head office: Dominion Bank Bldg., Toronto. **Mine office:** Timmins, ario.

Property: located on the south, west and north sides of Pearl Lake, Tisdale Twp., comprises 347 acres, of which 113 acres are under Pearl Lake, Gillies Lake. The area added by acquiring the Extension and Jupiter mines is 127 and 79 acres, respectively. The immediate object of amalgamation was to secure the right to use the Extension main shaft for deeper exploration of McIntyre property on N. side of Pearl Lake, as development work had opened large orebodies at 1,000' depth in both mines.

In 1918, a long term option was obtained on controlling interest in Newray property adjoining the [illegible] on the [illegible] under option in 1918, [illegible]

vember, 1919, company took an option on property of Martin Gold Mining . Hurricanaw River district near Amos, Quebec.

Geology: the tract shows a broad band of schistose quartz porphyry, ween two areas of altered volcanic schist, basalt and associated lavas.

Exploration has shown that the best gold ore occurs in the altered volcanic ist, at or near the quartz porphyry contact; development in the quartz porphyry ay from the contact has not shown much gold. Orebodies are lenticular in m and very irregular, the shoots consisting of quartz more or less interbanded h mineralized schist. The discovery of orebodies has been rendered difficult the presence of compression faults which have displaced portions of the ore much as 130'. Eighty per cent. of ore milled is heavily mineralized schist.

Development: to depth of 1,500' by shafts, with stations at 1,125', 1,250', 1,375', the latter being the new main haulage-level. Total work, 57,965' at of June, 1919, not including 26,907' of diamond drilling. The McIntyre-iter veins are from 24' to 50' wide, with rich stringers running out along the it-planes in the walls.

Ore reserves:

	Tons	Average Value	Total Value
e 30, 1919	433,057	$11.00	$4,777,324
e 30, 1918	459,276	9.80	4,490,432

(a) Year ending March 2. (b) 15 months, ending March 31. (c) 15 months led June 30, 1917. (d) Year ending June 30.

For calendar year 1919, company milled 185,018 tons yielding $1,978,013.

Mine development during the past few years has been very satisfactory as veins on the lower levels show as much commercial ore as the upper work- and lateral development on the upper levels has opened up entirely new These results and the acquistion of adjoining properties, assures productive life to the company, which is now the second largest gold Canada.

W PORCUPINE IMPERIAL MINES, LTD. ONTARIO

Successor of Porcupine Imperial Mines, Ltd. H. L. Taylor, pres.

Cap., $3,000,000; $1 par. Holders of Porcupine Imperial stock received share of new stock for two shares of old company's stock.

Property: ¼ mile S. W. of Dome Lake, mine in Porcupine district is to show several veins of gold ore, under development for several years by shaft with about 500' of workings. Some diamond drilling has also been

Is a reorganization of the Rea Consolidated Gold Mines, Ltd.; stock being exchanged at the rate of 1½ shares new stock for each share of Rea Consolidated stock.

Property: North ½ of lots 6 and 7, Concession III, about 320 acres, comprise the Rea mine, at Porcupine, Ont, 1½ miles from Schumacher, the nearest railroad station. The veins are well-defined quartz fissures, strike N. E. and dip N. W.; ore-shoots occur as lenses in and along shear zones.

Development: 2-compartment vertical shaft, sunk 420' on vein, with levels at 200, 300 and 400'. The oreshoot is cut and displaced by a fault at depth of 240'; below the fault the vein is not of the same character. The ore-body above the fault was stoped for about 300' in length, 4½' wide, and 200' in depth and is said to have produced 19,500 tons of ore, averaging $11 per ton. Diamond drilling is said to have cut 12' of quartz showing free gold at 630' vertical.

Equipment: includes 10-stamp mill, hoist, 6-drill compressor, pump and boiler.

Production: mill treated 11,607 tons of ore yielding $125,000 in bullion in 1915. It resumed treatment in May, 1917. Output in 1918 was 401 tons of $3.78 ore.

In November, 1917, property was taken under control by the Crown Reserve company of Cobalt, but option was relinquished in 1918 and McIntyre-Porcupine Mines, Ltd. then took a 2-year option on 1,500,000 shares at 45c. per share.

An immense quantity of literature has been published about this mine, mostly in the interest of speculators. Evidently, the management is trying hard to make it a large producer.

NORTH DAVIDSON ONTARIO

Address: L. G. Harris, managing director, Royal Bank Bldg., Ont. T. Jeffrey, pres.

Property: Lot 3, Con. 6, Tisdale Twp., Porcupine.

Development: by diamond drill work, 1919.

NORTH DOME MINING CO. ONTARIO

Owned by Temiskaming Mining Co., Ltd., which see.

NORTH THOMPSON (ASSOCIATED) GOLD MINES, LTD. ONT.

Merged, 1917, into Porcupine V. N. T. Gold Mines, Ltd., which see.

NORTH WOODS MINING CO. ONTARIO

Office: 115 Broadway, New York.

Officers: John C. Hicks, pres.; Ernest Sharp, v. p.; A. J. Dunkle, sec.; Charles S. Rees, treas.

Inc. 1914, in Ontario. **Cap.**, $2,000,000; $1 par; all issued. Shares closely held.

Property: 127 claims, 1,080 acres, in Tisdale and Whitney townships, heart of the Porcupine district, close to the principal mines.

Development: only nominal exploration has been done owing to abnormal conditions. In the fall of 1919 some drilling was done, and work is to be resumed in the summer of 1920.

PEARL LAKE GOLD MINES ONTARIO

Bankrupt. Property acquired, 1915, by McIntyre Extension Mines, Ltd., subsidiary of the McIntyre-Porcupine Mines, Ltd.

PORCUPINE CROWN GOLD MINING CO. ONTARIO

Offices: Dominion Exp. Bldg., St. James St., Montreal, Quebec; Toronto St., Toronto.; and Timmins, Ontario.

Officers: J. W. Carson, pres. and managing dir.; W. J. Gear, 1st v. p.; J. G. Ross, 2nd v. p.; with C. A. Smart, J. W. Rost, A. G. Gardiner, R. S. Lay, ford, F. S. Meighen, Ziba Gallagher, Chas. C. Dickson, directors; [illegible] sec.-treas.; John Reid, asst. sec.-treas.; Samuel W. Colver, Consulting engr.

Inc. in October, 1915. Cap. $2,000,000; shares $1 par. Canada Co., Montreal and Toronto, [illegible]

ital stock owned by Crown Reserve Mining Co., Ltd. Traded on New York rb, and on Toronto Stock Exchange.

Balance sheet of December 31, 1918, showed net profit for the year $4,814, npared with $109,421 in the previous year, making a total with balance brought ward of $282,130. Expenses absorbed $10,174, leaving surplus of $271,956. sh at end of 1919 was $174,576, and total surplus, $224,611.

Dividends: 3% quarterly was paid from 1914 to August, 1917. Total that date was 42%, or $840,000.

Property: one patented claim, 40 acres, at Porcupine, shows quartz ore h free gold and sulphides in veins in schist. Orebody is 5' wide and 1,100' g. Vein strikes N. and has dip of 70° S.

Development: to depth of 1,100' by vertical shaft. New work to July, 8, totalled 700', until property was shut down. Work was resumed early in 9. Ore is mined by shrinkage stoping.

Equipment: includes 150-ton cyanide mill. Total cost per ton ore was 7 in 1916, and $7.07 in 1917.

Production:	Tons Treated	Value per Ton	Extraction	Net Value Bullion
8	10,907	$9.64	97.09%	$124,474
7	37,722	10.97	97.09%	.....
6	51,273	12.11	97.14%	571,652
5	41,326(a)	14.46	97.70%	613,565
4	40,857	17.18	97.26%	689,151

(a) Not including 5,093 tons tailing, assaying $3.15 per ton, treated with an raction of 85%.

The company's prospect of finding new veins is not generally regarded as orable since the quartz-porphyry throughout the western portion of the prop- y has been proved non-productive. At the beginning of 1919 mine reserves re of estimated value of $500,000. In December, 1919, the company was gotiating for the Moneta property which lies west of the Hollinger.

RCUPINE EXCELSIOR MINING CO., LTD. ONTARIO

Mail returned 1919, from former address at Porcupine, Ont., Canada.

Officers: P. Cameron, pres.; Wm. Duncan, sec.; G. L. Wheeler, asst.

Property: claims, Nos. 13890, 13891 and 900 P. in Shaw Twp., Nipissing trict, Ont., formerly owned by the Tommy Burns Mining Co.

RCUPINE KEORA MINING CO., LTD. ONTARIO

Address: W. B. Gunton (who is in control), Toronto, Ontario.

Inc. 1912, in Ontario. **Cap.**, $2,000,000; $1 par; over 1,500,000 outstand- Listed on Standard Stock Exchange of Toronto, and to be traded on New k Curb.

Property: 5 claims, 200 acres in Whitney Twp., Porcupine district, 5 [illegible] E. of the Hollinger and 3 miles N. E. of the Dome.

Development: by incline shafts and extensive drifts to depth of 200' ein No. 1. Diamond drill work and underground development is said to w 40' of $6 ore, but over $70,000 has been spent since February, 1919, in lling the other veins of the tract. Three drill holes indicate the existence two comparatively long and wide shoots of high-grade ore in No. 5 and 6 s at incline depths of from 250 to 480'. Results are considered to be orable for development of a tonnage of ore in No. 5 vein, estimated to exist block 100' by 100' by 20' of a total value of $1,500,000. This ore will be proven by the summer of 1920. Company started shaft sinking late in and will erect machinery. Is regarded as a property of merit, with prom- prospects.

RCUPINE MINES SYNDICATE ONTARIO

Care Mark Harris, Mutual Life Bldg., Buffalo, N. Y. Was a new scheme the above named promoter and his associates.

Presumably organized to acquire the Cross Veteran location, 160 acres, in [illegible] Not regarded favorably.

PORCUPINE PREMIER GOLD MINING CO., LTD. **ONTARIO**

Office: G. W. Fields, treas.-gen. mgr., 53 State St., Boston, Mass. B. M Walton, supt.

Inc. in Massachusetts. **Cap.**, $1,000,000; shares $1 par. Traded on Boston Curb.

Property: 40 acres in Whitney Twp., 110 acres in Deloro Twp., Porcupine district, Ont., Can. Also said to own Standard group of about 110 acres south of Dome Lake property, and the Virtue mine near Baker, Oregon.

Development: on the Porcupine property consists of two shafts, one 200′ deep, with drifts and crosscuts. Mines are in the prospect stage and are outside of the proven belt, but are regarded as worthy of prospecting. Company's promoter is also treasurer and general manager. No recent information, probably idle.

PORCUPINE VIPOND MINES, LTD. **ONTARIO**

Merged, 1916, into Porcupine V. N. T. Gold Mines, Ltd., which see.

PORCUPINE V. N. T. GOLD MINES, LTD. **ONTARIO**

Office: 50 East 42nd St., New York. **Mine office:** Schumacher, Ontario, Canada.

Officers: Henry H. Ward, pres.; H. A. Poillon, v. p.; Chas. C. Dickson v. p.-treas.; H. F. Karst, sec.; C. H. Poirier, mgr., with L. A. Sorenson, and J. A. Carey, directors.

Is a merger of the Porcupine Vipond and North Thompson Mine companies. **Inc.** 1917. Stock traded in on Toronto Exchange.

Property: about 160 acres, adjoining the Hollinger on the west, in the Porcupine mining district, Ontario, Canada. Claims show several quartz veins, one cut on 600′ level reported to average 20′ in width.

Ore: gold quartz, occurs in fissure veins, said to be 3′-10′ wide, which run N. E.-S. W. and are vertical. Pay ore occurs in a shoot 900′ long. Formation is an amygdaloidal basalt.

Ore reserves: in the Vipond, April 1, 1916, estimated at 68,145 tons in place, valued at $8 per ton, and 22,850 tons already broken, but not hoisted, averaging $6.25 per ton, a total of 91,000 tons, valued at $688,600.

Development: by 600′ shaft.

Equipment: includes hoist, 2 compressors, hydro-electric and steam power, and 140-ton mill, which employs the continuous decantation process and is equipped with crusher, 6′ Hardinge ball mill, classifiers, Dorr agitators and Dorr thickeners. The mill was treating 100 tons daily, August, 1917.

Production: 15,134 tons of ore yielding 3,977 oz. gold in 1918. In 1919 explored Krist mine under contract.

In 1918, mine was closed down and lower workings allowed to fill with water. Company was to re-open mine in December, 1919, sink shaft to 800 or 1,000′ level, and enlarge the mill to handle 300 tons. Management claims ore has improved with depth, and that ore reserves will assay about $10 per ton.

PORCUPINE WHELPDALE MINES, LTD. **ONTARIO**

Address: B. J. Simons, sec., 911 Royal Bank Bldg., Toronto.

Cap., $2,500,000; $1 par.

Property: north half of Lot 11 in Tisdale Twp., Porcupine, opened by a 114′ shaft and equipped with steam boilers, hoist, compressor, etc.

PRESTON EAST DOME MINES, LTD. **ONTARIO**

Office: 7 Melinda St., Toronto, Ont., Canada.

Officers: Lt. Col. D. M. Robertson, pres.; Gordon Taylor, sec.-treas. with C. L. Sherrill, R. T. Shillington and D. L. White, Jr., directors.

Inc. 1911, in Ontario. **Cap.**, $3,000,000; shares $1 par; 2,500,000 shares outstanding. Stock listed on New York Curb. Toronto General Trusts Corporation, Toronto, transfer agents.

Property: 3 claims, patented, in Tisdale Twp., Porcupine, Ont., adjoining the Dome Mines, Ltd.

Ore: which occurs in narrow veins in quartz-porphyry, carries coarse gold, associated with pyrite and zinc-blende. Company is idle, pending outcome of further development on the Dome Mines property.

:HUMACHER GOLD MINES, LTD. **ONTARIO**

Head office: 85 Bay St., Toronto, Ont. **Mine office:** Schumacher, Porpine district, Ont.

Officers: F. W. Schumacher, pres.; F. L. Culver, v. p.; J. Y. Murdoch, :.-treas.; H. E. Tremain and C. A. Covert, directors; T. J. Harwood, mgr.

Inc. July 16, 1914, in Ontario. **Cap.,** $2,000,000; shares $1 par; 1,850,000 ued. Traded on Toronto Stock Exchange.

Balance sheet for year ended July 15, 1918, showed assets totalling $1,968,582, luding property, $1,393,970; plant and equipment, $198,239; development, 5,606; current assets, $38,267, and discount on shares, $202,500. Liabilities luded current, $24,707; and surplus, $81,902.

Revenue from bullion, etc., was $242,061, of which $8,888 was profit, com-ed with a loss of $7,696 in the previous year.

Property the Schumacher mine, at Porcupine, Ont., adjoining the Mcyre on the W. for ⅛ mile, and the Acme mine of the Hollinger Consolidated ⅜-mile. Vein outcrops are numerous and extensive, occurring in an E.-W. zone 1,000′ wide. The No. 1 vein is traceable for 1,150′, and is from 50 to 60′ le.

Development: to depth of 600′, with about 12,000′ of work at main or rking shaft. Two orebodies cut on the 600′ level by diamond drilling have yet been mined. The main shaft was to be sunk to 1,000′ in 1919. A second ft, 400′ deep in December, 1919, is also used.

Reserves: 99,425 tons, averaging $6.78 per ton.

Equipment: includes 180-ton mill containing Hardinge and tube mills, l 300-ton continuous decantation cyanide plant.

Production: March 31, 1917, to March 31, 1918, 45,373 tons of ore yield-$259,365. Output in the calendar year 1918 was 4,463 oz. gold from 19,098 s of ore.

)MMY BURNS GOLD MINING CO. **ONTARIO**

Address: H. B. Hatch, Porcupine, Ont.; and Phil. Moore, Brookfield, va Scotia.

Officers: W. E. Beattie, pres.; L. M. Myers, v. p.; with V. Marone and Fairbrother, directors. A. W. Young, sec.-treas., at last accounts.

Inc. in Delaware. **Cap.,** $3,600,000; shares $1 par; Registrar & Transfer , 32 Nassau St., New York, registrar and transfer office.

Owns all but 5 shares of stock of the Tommy Burns Gold Mines, Ltd. ance sheet of January 31, 1916, shows no other assets besides this stock and 00 cash. Balance sheet of the same date for the Tommy Burns Gold Mines, l, gives this stock a value of $99,995 and shows $4,000 cash and total develop-nt expense of $5,645.

Not favorably regarded. No recent information.

ST DOME CONSOLIDATED MINES **ONTARIO**

Head office: Traders Bank Bldg., Toronto. **Mine office:** Porcupine, tario.

Officers: Sir Henry M. Pellatt, pres.; Hugh Blain, v. p.; C. H. Mana-, sec.-treas., with J. A. Murry, R. L. Baker & Co., and G. A. Stimson, directors.

Inc. 1915, in Ontario, to take over property and assets of the West me Mines Co. **Cap.,** $3,000,000; $1 par; 2,000,000 shares offered in exnge for 3,000,000 shares in the old company, leaving 1,000,000 in the treasury provide funds for development. Annual meeting in April. Listed on New k Curb and in Toronto.

Balance sheet of December 31, 1917, showed total assets of $3,009,935, with h on hand $52,718; property and equipment, $2,000,000; discount on treasury k, $749,965; deferred development, $166,250. Accounts payable were $9,935.

Property: 176 acres, in Tisdale Twp., Porcupine, Ont., adjoins Dome e on W. Idle from 1912 to 1915, after fire destroyed many lives besides face equipment worth $75,000. Property shows a quartz vein proven to th of 1,800′. There are also 8 other veins as yet undeveloped.

Development: by 70° incline shaft, 365′ deep, sunk on a quartz vein averages 5′ in width and in some places 8′. Workings total about 4,600′

Reserves in September, 1917, were estimated to be worth $2,000,000, the ore assaying $6.17 to $8 per ton. In 1918, a test run of 300 tons ore was made at the Dome Lake mill. This ore assayed $9.55, and an 86% recovery, or $8.21 was saved. Milling and transportation cost $6.05, and indirect charges were $1.21, so that the net profit was only 93c. per ton. Under normal conditions costs would not exceed $6, and mine could be operated with a profit of $3.55 per ton, but 93c. being too low for safety, mine was closed down.

Equipment: includes 12-drill compressor, electric motors and transformers, 4 boilers, drills, etc.

QUEBEC

ALBERT COPPER CO. QUEBEC

Office: 25 Broad St., New York. **Mine office:** Capelton, Sherbrooke county, Quebec. Was organized to take over the mining interests of the Nichols Copper Co. in Quebec.

ASCOT MINING CO. QUEBEC

A close corporation owning an old copper mine near the Eustis mine, in Ascot township, Sherbrooke county, Quebec. See Vol. XII.

BRITISH MINERALS CORPORATION, LTD. QUEBEC

Owns the Siscoe mine, located on an island in Lake De Montigny, 40 miles by river from Amos, on the National Transcontinental Ry. Mine shows quartz veins and stringers in diorite and greenstones. Veins are from 22" to 10' in width. Developed by shallow shafts, deepest 100'. An 8-ton sample assayed $39.64 gold per ton. Property is considered worthy of exploration.

CANADIAN WOOD MOLYBDENITE CO. QUEBEC

Described in Vol. XIII. Property taken over, 1917, by Dominion Molybdenite Co., which see.

DOMINION MOLYBDENITE CO. QUEBEC

Absorbed the Canadian-Wood Molybdenite Co.

Inc. 1917. **Cap.,** $500,000.

Property: the Moss mine, near Quyon, Pontiac county.

Development: by opencuts, exposing molybdenite in reddish gneissoid granite. A 200' shaft has stopes connecting with the open cuts. The ore is principally finely disseminated in flakes of ½" or less, and is hand sorted. Present company did 12,000' of diamond drilling, which is said to have blocked out considerable ore.

Equipment: includes 150-ton mill, using crushers, dryers, ball mills and Callow flotation machines. Ore containing as low as 1% MoS_2 gives 95% recovery.

Production: from March, 1917, to January, 1919, over 43,000 tons of 1% ore had been mined and milled. Mine was closed down in July, 1918, on account of the poor market for molybdenum.

EASTERN MINING & MILLING CO. QUEBEC

Fred. M. Connell, pres.

Property: the Huntingdon copper mine, 409 acres, near Eastman, Que. The ore deposit is a well mineralized mass of greenstone between serpentine and schist. The mineral is chalcopyrite.

Development: by tunnels. Company has a 250-ton flotation plant built to treat the 50,000 tons of ore on the dumps. Up to first week in February, 1918, the mill had treated 6,000 tons assaying about 2% copper. Concentrates were shipped to Nichols Copper Co. The plant was closed down for several months in 1919, but has been reopened. See Canadian Mining Journal, August 6, 1918, "The Huntington Copper Mine, Quebec."

EUSTIS MINING CO. QUEBEC

Office: Eustis, Sherbrooke county, Quebec, Can. W. E. C. Eustis, 131 State St., Boston, Mass., pres., sec.-treas.; F. M. Passow, supt.

Inc. 1878, in Quebec, and operated as a close corporation.

Property: near Sherbrooke, carries 4 parallel interbedded lenses of

cupriferous pyrite, in talcose schist crossed by dioxite dikes, the cupriferous belt being traceable for 2 miles. The orebody is worked through an inclined shaft to a depth of about 3,450' on the incline, with an average dip of 45°. Lenses are 3 to 60' in width, averaging about 2.5% copper, up to 60 cts. per ton in combined gold and silver values, and 40% sulphur, but with considerable variations, are occasionally carrying up to 50% sulphur. Footwall vein, or lens 4 to 20' thick, 50 to 100' long. Main vein 20 to 60' thick, 100 to 120' long. Shaft vein, 3 to 15' thick, 50 to 100' long. No. 1 vein 2 to 25' thick, 20 to 120' long. Footwall and shaft lenses richest in copper, averaging 4 to 8% while others carry 2½% copper with 42 to 48% sulphur. Property is primarily a producer of pyrite, for the sulphuric acid trade.

Development: the mine, opened 1870, and producing for 80 years, has a 7x7' crosscut tunnel, 1,000' long and a 3,000' shaft, sunk at 20 to 45°, with double skip tracks. The mine is dry, most of the water coming from surface and the upper stopes, but the limited quantity of mine water is very acid, and contains copper in solution, which is precipitated as cement copper on scrap iron as it leaves the tunnel, through which it is conducted by a launder. Mine is served by the Boston & Maine railway. About 150 men are employed in the mine and mill.

Equipment: includes a 150-h. p. electric hoist, good for 3,500' depth, and two 8-drill, 2-stage air compressors, 1 run by steam and 1 by electricity.

The 300-ton mill, three-fourths mile from the mine, is connected therewith by an electric tram, equipped with three 3-ton cars. The mill has a 150-h. p. electric equipment. Ore is dumped onto grizzlies, coarse ore falling to the sorting floors and conveyor belts, where hand-picked and cobbed. Ore sufficiently rich for shipping is reduced to 2½" size, and concentrated ore is reduced to ⅛" size, by crushers and ball mills, going thence to an 8-compartment classifier with spigots discharging to 8 Wilfley tables. Middlings from coarsest tables are returned to ball mills and from finer tables, to the re-crushing department.

Selected ore and concentrates are shipped to various acid works, and there burned for sulphur, the cupriferous cinder remaining then being shipped to the Norfolk smelter, where it is treated for copper. Production is about 30,000 tons of cupriferous pyrite yearly.

FEDERAL LEAD & ZINC CO. **QUEBEC**

Address: J. C. Beidelman, 315 Transportation Bldg., Montreal, Quebec.

Property: claims at Blende, 45 miles back of Cascapedia, Gaspé peninsula, Quebec. Examined in 1918 by Walter Harvey Weed.

Well mineralized fissure veins lie in slates cut by quartz-porphyry and later basic rocks. Ore consists of sphalerite and galena in quartz and spar.

Development: by 1,400' of drift and crosscut work with tunnel entrance and connection with shaft at depth of 92'. Ore opened above the tunnel is estimated at 60,000 tons, worth $860,000 gross and $479,000 net. Possibilities are considered good.

INDIAN-PENINSULA MINING CO., LTD. **QUEBEC**

Office: W. E. Simpson, Cobalt, Ont., and 52 Broadway, New York.

Officers: W. J. Haines, pres.; P. G. Grant, v. p.; with S. D. Wright, W. H. Storey, A. W. Porter, Frank Groch, and W. E. Simpson, directors.

Inc. July, 1918, in Ontario. **Cap.**, $1,000,000; $1 par; all issued; non-assessable. Annual meeting, Friday before first Monday in September.

Company controls the St. Maurice Mines Co., Ltd., which see.

MARTIN GOLD MINING CO., LTD. **QUEBEC**

Property: in the Hurricanaw district, 40 miles by river from Amos, on the National Transcontinental Ry., consists of parts of lots A and 37, ranges VIII and IX, Dubuisson Twp. Shows a quartz vein in greenstone, 2 to 10' wide, exposed for over 700' by stripping and trenching.

Development: 125' vertical shaft with 75' of drifting on vein at bottom level. In 1918, company built and operated a small experimental 10-stamp mill. Ore is said to have yielded good gold value, but work was discontinued in July, 1919, on account of financial difficulties. Reported in November, that the McIntyre-Porcupine company of Ontario had taken an option on the property.

MUTUAL CHEMICAL CO. OF CANADA, LTD. QUEBEC

Address: Hugh B. Lee, supt., Black Lake, Quebec.

Property: the Belanger mine, 250 acres in Coleraine Twp., Megantic county, Quebec. Ore is chromite occurring in serpentine.

Development: by shafts, deepest 200', with workings on 90' and 190' levels exposing ore for 500' in length with crosscuts each 50'.

Equipment: includes an electric hoist, compressor, and 100-ton mill, making an 80% extraction. Concentrate assays 50% chromic oxide.

NORTH AMERICAN MAGNESITE CO., LTD. QUEBEC

Address: 36 Board of Trade Bldg., Montreal, Quebec.

Officers: E. Liersch, pres.; C. L. Higgins, v. p.; W. J. Phelps, sec.-treas.; with C. O. Clark, L. N. Benjamin, A. W. Gifford, A. Letang, and Jas. N. Laing, directors, all of Montreal. W. P. Boshart, supt., Calumet, Que.

Cap., $200,000; par $100; issued $186,000.

Property: 300 acres, in Greenville Twp., Argenteuil county, Quebec, said to have 1,000,000 tons of magnesite. Mining is by open-cut methods.

NORTON, A. O. QUEBEC

Office: Coaticook, Quebec. A. O. Norton, owner and mgr.; W. Jenkin, mine supt.

Property: 600 acres, freehold, except 150 acres, title covering only mining rights, includes the Suffield, King, Silver Star, and Marrington mines, in Ascot township, 7 miles from Sherbrooke, with railroads within 2 miles on either side.

The mines show 3 lenses, of 3 to 20' width, 1 proven to depth of 400', estimated by owner to average 4 to 5% copper, from a trace to 10% zinc, 5 to 25 oz. silver, and $1.50 gold per ton. The King mine has a 165' incline shaft with about 500' of workings. The Suffield mine has a 350' shaft with about 1,200' of workings, showing ore assaying 3% to 4%, and combined gold and silver values of $2 to $12 per ton, with about 25% sulphur. The Marrington mine, 100 acres, 1½ miles from Suffield, and about 1 mile from Capelton, is opened by a 260' shaft with about 400' of drifts, developing a lens about 75' wide at surface, said to carry at depth 5 to 7' of good ore. Little development work has been done since August, 1914, and no shipments have been made from the property.

Equipment: includes a steam plant, 100-h. p. boiler, a 50-h. p. double cylinder steam hoist and a straight-line air compressor. In 1918, electric power was installed, also compressor and 100 h. p. motor. A 100-ton flotation mill was built in 1919. Property considered promising.

ST. MAURICE MINES CO., LTD. QUEBEC

Office: W. E. Simpson, Cobalt, Ont., and 52 Broadway, New York.

Officers: W. J. Haines, pres.; A. E. Doucet, v. p.; W. H. Storey, sec.-treas., with W. E. Simpson, S. D. Wright, A. W. Porter, and P. G. Gram, directors.

Inc. June, 1916, in Quebec. **Cap., $750,000; $100 par; all issued:** non-assessable. Annual meeting, first Monday in September.

Property: 5 claims, 683 acres, at Indian Peninsula on Lake Keewagama, 20 miles S. of Amos, Quebec, on the National Trans. Ry. Ore carries molybdenite, treated in a 100-ton mill, employing the Groch flotation system.

WEEDON MINING CO., LTD. QUEBEC

Office: 263 St. James St., Montreal. **Shipping office:** Room 560, 11 Broadway, New York. L. D. Adams, gen. mgr.

In 1915 acquired the property of the East Canada Smelting Co., at Weedon from the Precious Metals Corporation of New York. Controls the Zinc Co., Ltd., which operates a lead and zinc mine at Notre Dame des Anges, Portneuf county, Quebec; also the Canadian Zinc Products Co., Ltd., which operates a zinc oxide plant at Notre Dame des Anges.

Property: 375 acres in Wolff county, Province of Quebec. Has produced 260,000 tons of cupriferous pyrite ore, mined for sulphur as well as copper in the last 6 years. Average assay is 3.3% copper, 40.8% sulphur, trace of lead, 0.77% zinc, 0.5 oz. silver, and 20c. gold per ton.

Geology: ore occurs in two lenses in schist. Main orebody is 570' long nd from 15 to 45' wide, with dip of 45° N. E., and course N. 37° E.

Development: by two shafts 700 and 900' deep, and 9 levels driven to ıe limits of the ore. **Reserves:** on January 1, 1917, were about 200,000 tons.

Equipment: 2 air hoists (60-h. p.), one 150-h. p. electric hoist, 2 comressors (one electrically driven, 1,600 cu. ft. capacity), and all necessary buildıgs, shops, etc.

The zinc mine is developed by one 300' shaft. It is equipped with a 150-ton ɔncentrating mill using tables, flotation unit, and magnetic separation. Proıces zinc concentrates containing 42% zinc and lead concentrates averaging)% lead, 65 oz. silver, and $13 gold per ton.

Transportation: at copper mine 3½ miles of aerial tram to railroad, costing :. per ton.

At zinc mine there is 4 miles of teaming. Mining costs at copper mine in)16, including development and all overhead charges were $2 per ton. Comete cost at zinc mine for concentrates, f. o. b. cars, was $6 per ton of crude ore.

Production of copper in 1916, 5,640,000 lb. Mine output in 1919 about 80 to)0 tons daily, or 25% of that in 1917-18. Company does not give out any inɔrmation.

SASKATCHEWAN

EAVER LAKE GOLD MNG. CO. **SASKATCHEWAN**

Mail returned, 1919, from Prince Albert, Saskatchewan, Canada.

Property: 32 claims acquired in 1914, from the Prince Albert Epl'n Co., ı the north shore of Beaver Lake, 118 miles from Le Pas, the nearest R. R. ɔint, on the Can. Northern Ry., out of Winnipeg.

On the Prince Albert claim, at the contact of the Huronian schist and ıurentin diorite, a 48" quartz outcrop can be traced for a considerable disnce. A 70' incline shaft, sunk on the vein, is said to show a 4 to 5' vein avering $16 in gold and 2 oz. silver per ton. Probably idle.

YUKON TERRITORY

ΓLAS MINING CO. **YUKON**

Dead: In February, 1916, holdings were taken over by the Yukon Copper ., Ltd., which see.

ANADIAN KLONDYKE MINING CO., LTD. **YUKON**

Is a subsidiary of the Consolidated Gold Fields of South Africa, Ltd. On ɔvember, 22, 1917, the Granville Mining Co (which see), the bondholding comıy, applied for a receiver for the Canadian Klondyke Mining and Canadian ondyke Power companies.

Address: Dawson, Yukon Territory. H. G. Blankman, receiver-manɛr.

Inc. March 5, 1913, in Canada. **Cap.,** $8,000,000 shares $5 par; $6,000,000 ued. When the receiver took over the property on January 5, 1918, total liabili; (excluding claims of litigants) were $662,038, which included $158,570 in ges. Balance sheet of December 31, 1918, showed current assets of $506,900, current liabilities of $30,569; total assets, $4,156,837. The profit and loss tement for the year showed a gross profit on operation of $216,963. Gold ırns were $452,648, and total income was $487,120; operating charges absorbed 0,157. Net profit to surplus was $44,570.

Property: 15½ placer claims and hydraulic lease No. 18, about 26,000 es, in the Klondyke valley, with total production to date of nearly $12,000,000.

In 1918, company operated 3 dredges which handled 4,300,910 cu. yds. at a ıl cost of 10.28 c., and yield of 11.19c. per cu. yd., compared with a cost of 6c. and yield of 14.76c. in 1917, and cost of 14.22c. and yield of 14.21c. in 1916.

Development: by open-cut, with a 120′ shaft in ore.

Equipment: includes 800-h. p. steam plant, hoist, with a tram line and 2,000-ton ore bins on the sea. Has 1,500-ton coarse crushing plant and 150-ton concentrator.

Company expected to start regular operations in 1919.

HYDRO-ELECTRIC SMELTING CO. NEWFOUNDLAND

Developing an old copper property on Little Bay, Newfoundland, operated by a British company, 1878-1890, at last account.

REID-NEWFOUNDLAND CO. NEWFOUNDLAND

Address: St. Johns, N. F.

Property: a copper mine at New Bay, N. F., was under development in 1907, but has never been a producer. Company owns the railroad and steamship lines of Newfoundland.

TERRA NOVA PROPERTIES, LTD. NEWFOUNDLAND

Secretary and office: E. A. Sursham, Fleetway House, Farrington St., London, Eng. **Mine office:** Millertown, Newfoundland. Mayson M. Beeton, chairman; William Scott, gen. mgr. at Grand Falls, Newfoundland. Is a subsidiary of the Anglo-Newfoundland Development Co., Ltd.

Company owns rights over about 2,500 sq. miles, held by 99-year lease, in the central part of Newfoundland, surrounding Red Indian lake. The principal property is Buchan's River mine, about 5 miles W. of the lakes on the N. shore. Ore occurs in sericitic schists formed of volcanic grits, the vein having strike of N. 51° E. and dipping about 30°.

Development: consists of a 370′ shaft with several levels, having long drifts on the vein. The one orebody thus far found varies from 5 to 10′ in thickness, is 350′ long, horizontally, and 370′ in downward extension. The ore is a complex sulphide carrying 2.36% copper, 8.14% lead, 20.38% zinc, 6.70 oz. silver and $2.72 gold per ton.

Examined and reported on by W. H. Weed.

YORK HARBOUR MINE NEWFOUNDLAND

Idle. **Former address:** York Harbour, Birchy Cove, Bay of Islands, N. F. The mine, 4,000′ from the bay, at elevation of 1,000, carries cupriferous pyrite. The ore is compact and close-grained with 2% to 4.5% copper and 35 to 41% sulphur, the sulphur being valuable for the manufacture of acid.

Development: by 360′ main shaft sunk at an angle of 72° to the S. E., practically the same as the dip of the ore lenses. Levels are opened at 60′ intervals, with drifts driven S. W. along the strike of the orebodies.

Equipment: included a 250-h. p. steam plant, with a 50-h. p. Flory hoist and an 8-drill Norwalk high-altitude air compressor. Company supposedly bankrupt and property has been closed down for years.

MEXICO

Owing to the unsettled political condition of this country, and to the numerous massacres of American men in the revolutionary States of the nation, the mining industry of Mexico has been greatly depressed for six years past, and many companies formerly prosperous, have stopped work, while others have maintained merely nominal operations.

As an instance of the burdens under which mining companies operate, in addition to a 25% increase in rail freight and supplies, and the frequency with which bullion was stolen by so-called bandits, the Batopilas Mining Co. of Chihuahua pays 10% of its gross output for taxes. Another example is the Guanajuato Reduction & Mines Co. of Guanajuato; owing to the prohibition on gold exports from the United States in 1918-'19, the company had to pay a premium of $53,558 to obtain Mexican currency with which to meet payrolls, taxes, and supplies purchased in Mexico.

AMERICAN SMELTING & REFINING CO. **MEXICO**

See same title under United States mines.

EXPLORATION CO. OF ENGLAND & MEXICO, LTD. **MEXICO**

In liquidation, 1917.

EXPLORATION CO., LTD. **MEXICO**

Office: H. F. Wreford, sec., 24 Lombard St., E. C., London; P. L. Foster, 61 Broadway, New York.

Directors: R. T. Bayliss, chairman and mng. director; J. H. M. Shaw, mng. director; J. R. Maguire, J. E. D. Ryder, G. D. Smith, and O. E. Warburg.

Inc. March 21, 1904, in Great Britain, to acquire the assets and undertakings of a company of same name, registered June, 1896, except certain assets and liabilities which had been acquired by the Exploration Assets Co., Ltd. The company carries on a general financial business and holds interests in the Tomboy, El Oro, Santa Rosa, Buena Tierra, Greene-Cananea Copper, Chile Copper, Natomas Co., South African Real Estate Trust Ltd., and other concerns, and floated the Mexico Mines of El Oro, Ltd.

Cap., £750,000; shares £1 par; reduced Nov., 1916, to £375,000; shares 10s. par. For every 5 old shares, holders received 3 fully paid shares and £2 of the Assets Company's debenture stock.

Dividends: declared by former company: 1896, 2s; 1897, 2s 6d; 1898, 3s. 6d.; 1899, 3s.; 1902, 1s. Dividends paid by present company: 1905, 1s.; 1906, 1s.; 1907, nil; 1908, 1s.; 1909, 1s. 6d.; 1910, 1s.; 1911, 1s. 6d.; nil in 1913, 1914 and 1915; 1s. in 1916; 6d. in 1917; 9d. in 1918.

For year ending December 31, 1916, there was a net profit of £3,251, making with balance forward, £97,457. Investments were valued at £617,863. For 1917, the profit was £21,024, plus £60,210 from 1916. The dividend absorbed £18,750, and £62,484 was carried forward. Investments were £262,530 plus £183,757 of British Treasury Bills. In 1918 the profit was £31,742, plus £62,484 from 1917. Investments were £305,779 plus £173,692 cash and War Bonds.

INTERNATIONAL CO-OPERATIVE HOLDING CO. **MEXICO**

Dead. Former office was at Las Cruces, New Mexico. See Vol. XIII.

MEXICANA; COMPANIA METALURGICA **MEXICO**

Offices: 82 Beaver St., New York; 26 Ave. 16 de Septiembre, Mexico City, D. F.

Officers: Geo. Foster Peabody, 2nd v.-p.; R. E. Safford, sec.; Peabody & Mason Smith and Isaac

Inc. 1890, in New Jersey. Cap., $4,000,000; shares $100 par; fully issued: in $1,000,000 cumulative 8% preferred stock, $1,250,000 guaranteed 6% second preferred stock, and $1,750,000 common stock

Bonded debt $2,774,700 first gold 5s. dated July 1, 1901, due July 1, 1931; interest payable at the company's New York office. Coupon (principal may be registered) $1,000, and registered in multiples of $100. Guaranty Trust Co., New York, trustee. Authorized $3,000,000, of which $732,700 held alive in sinking fund. Subject to call at 110 and interest. Sinking fund, 2% per annum of amount outstanding; bonds so purchased being kept alive and the interest thereon added to the fund. Interest paid without deduction for normal income-tax. Guaranty Trust Co., New York, registrar.

Property: interests are extensive, including control of numerous subsidiary mining, transportation, and land companies, among the more important being the **Sombrerete Mining Co.**, and the **Mexican Lead Co.**, at Sombrerete, Zacatecas, Mex., the **Montezuma Lead Co., Alvarez Lead & Timber Co., Mexican Mineral Railway Co.**, and **Potosi & Rio Verde Railway Co.**

The **Veta Rica** mine, owned outright, is at Sierra Mojada, and is an important silver-lead producer. Development is by a 600' shaft.

Other important producers are the silver-copper mines at **Concepcion del Oro,** State of Zacatecas. The **San Pedro** and **San Pablo** mines at Diente in Coahuila, 12 miles from Monterrey, are also important producers of lead, and the mines of the San Pedro district at San Luis Potosi are heavy producers of silver, gold, and lead ores, constituting the main supply of ore for the company's custom smelter at San Luis Potosi. Smelter has been operating since February, 1918.

At the **Diente** group, including the San Pedro, San Pablo, and Zaragoza mines, J. S. Carnaham, mgr, silver ore was originally discovered in caves in cliffs of hard blue limestone. It is found in so-called chimneys or pipes, the largest one being beneath a cave 150 meters wide and of same height. The ore bodies extend from near the crest of the cliffs or 3,266' above the valleys down to the deepest workings. The ore chimneys are connected by thin seams and stringers which are a guide in exploration work. The silver occurs in cerussite changing to galena in depth. Mining is by panel slicing under mats of timber. (See Brinsmade, "Min. & Sci. Press," November 22, 1919.) Monthly production averaged 1,000 tons, but in December, 1919, ore extraction was suspended though development continued.

Equipment at Diente: steam boilers, Frazer and Chalmers engine-driven Bullock generators, motor-driven compressor, Lidgerwood hoist, ventilating fans, machine-drills, 3-rail gravity surface tram 1,000 meters long, Hallidie single-rope aerial tram, and 2,200-meter aerial tram to loading-bins at rail.

The **San Luis Potosi** smelter, blown in February, 1918, treating 1,000 tons daily, includes 12 furnaces for the reduction of gold, silver and lead ores and a special copper department of 100 tons daily capacity. The works have steam and electric power, and employ about 1,000 men. In addition, there has lately been completed the Carmen 250-ton cyanide plant for cyanidation of lower grade ores from the San Pedro mines.

The company is a large producer of lead and silver, with copper and gold secured mainly as by-products, and is active and enterprising in the rejuvenation of old properties and the development of new mines.

MEXICAN CORPORATION, LIMITED (THE) MEXICO

Offices: A. A. Kelsey, 1 London Wall Bldgs., London, E. C. 2, England; 61 Broadway, New York; and Edificio La Mutua, 522, Mexico City.

Directors: F. W. Baker, R. T. Bayliss, Walter McDermott, F. A. Govett, A. S. Elmore, Herbert Guedalla, J. A. Agnew, and Lord Brabourne. Consulting engineers: J. A. Agnew, L. Chevrillon, and Hugh Rose.

Inc. August, 1919, in Great Britain. **Cap., £1,000,000;** £1 par; £962,75 allotted, of which £850,000 is held by Consolidated Gold Fields of South Africa, Consolidated Mines Selection Co., Central Mining Corporation, Imperial &

'oreign Corporation, Lena Goldfields Co., Lake View & Oroya Exploration, and ıe Exploration Co., Limited.

When the company was formed 25% of the capital stock was underwritten y the Camp Bird Co., 25% by Santa Gertrudis, and 15% of the capital, or 50,000 shares reserved for subscription by Santa Gertrudis shareholders. Additional shares accrued to Camp Bird, through the shareholding in Santa Gertudis.

Seventy-six thousand shares were offered at par in September, 1919, to amp Bird shareholders at the rate of one share in the Mexican Corporation for very 23 shares held in Camp Bird.

By November 28, 1919, £108,040 had been paid in and preliminary expenses of 1,583 incurred.

Company was organized to acquire three promising properties in Mexico.

(1). A 25-year lease on the holding of the **Teziutlan Copper Co.**, at a Aurora, State of Puebla, on the railway line, consisting of 2,500 acres of ineral land, together with a 3,000-h. p. hydro-electric plant, a 500-ton mill and nelter.

The mine has 600,000 tons of sulphide ore blocked out that will assay 2.4% ›pper, $1.75 gold and silver, and 5.5% zinc, and diamond-drilling has revealed ldditional ore. This ore needs concentration by flotation, followed by smelting. he plant requires improvements that will cost $500,000, to be repaid at the rate 20% from the annual profit. The Mexican operating company gets 37½%, ıd the Teziutlan Copper Co., 62½% of the remaining profit. A yearly profit $230,000 is estimated, aside from probable profits from custom ores treated zinc recovered. See Teziutlan Copper in Volume XIII of this Handbook.

(2). The holdings of the **Fresnillo Mining Co.**, at Fresnillo, Zacatecas, mprising the Proaño mine and a total of 733 acres mineral land. The Proaño as worked from 1550 to 1873, when pumping expenses and low silver prices used its shut-down. In 1919 there was 600,000 tons of tailing left, assaying 0.05 . gold and 3.2 oz. silver per ton, besides 3.5 oz. of mercury.

Development: to depth of 1,500' with workings on 50 veins. Equipment cludes a 1,000-h. p. gas engine power plant and 500-ton cyanide mill.

Reserves are estimated as follows:

		Average assay		Total contents	
		Gold,	Silver,	Gold,	Silver,
ıtcrop ore	Tons	dwt.	oz.	oz.	oz.
›sitive	2,000,000	0.12	5.25	12,000	10,500,000
›bable	2,000,000	0.12	5.25	12,000	10,500,000
Totals	4,000,000	0.12	5.25	24,000	21,000,000
Dump ore:					
ıide	60,000	0.09	4.9	270	294,000
lphide	365,000	0.12	6.5	2,190	2,372,500
Total	425,000	0.11	6.3	2,460	2,666,500

It is estimated by company that with silver at $1 an ounce, the net profit will $2.10 per ton and the profit from the tails $1 a ton.

The power-plant is to be enlarged to 3,000-h. p. and the mill to 2,000 tons ›acity at a cost of $2,000,000.

The company engineers estimate an annual return of 33% on the investnt in the Teziutlan and Fresnillo properties.

(3) a 22% interest in the **Esperanza Company's** new mine in Jalisco.

The rejuvenation of these mines is not an easy matter, nor are the ores ;h grade. Moreover, $2,500,000 must be spent to enable the Teziutlan and Fresılo mines to make 33% annual return. The undertaking is a large one, but the hands of people who are accustomed to handling enterprises of this kind, that success is confidently expected.

MINERALES Y METALES, COMPANIA DE **MEXICO**

Subsidiary of American Metal Co., Ltd. **Office:** 61 Broadway, New York.

Cap., $2,500,000: $100 par; of which A. M. Co. owns 24,423 shares. Increased from $1,250,000 in 1917.

Company owns the following properties:

Guadalupe—Mines and smelter	Nuevo Leon
Cerralvo—Mines and smelter	Nuevo Leon
Providencia Mines	Zacatecas
Santa Eulalia Mines, under lease and bond	Chihuahua
Guanacevi—Mines	Durango
Oil leases	Vera Cruz

Company manages or controls the following properties:

Agujita Coal Mines	Coahuila
The Torreon Smelter	Coahuila
Paloma Mines	Coahuila
Parrena Mining Co.	Coahuila
Penoles Mines	Durango
Monterrey Smelter and Refinery	Durango

1. The mines near Guadalupe, owned outright, cover 2,270 acres, and yield lead and zinc ores shipped over an 18-mile narrow-gauge railway to the treatment plant at Guadalupe. This smelter has a blast-furnace with capacity of 75,000 tons lead ores annually, making 7,000 to 8,000 tons of bullion. There is also a calcining plant for zinc-carbonate ores, capable of handling 7,000 tons per month from the mines near Guadalupe, and the company's other mines and custom ores. At Guadalupe there is also a modern power-plant, offices, workmen's houses, schools, hospitals, and other miscellaneous equipment.

2. *Cerralvo.*—This unit of 750 acres, includes a mine and smelter. The concentrate is either shipped out or treated at the smelter at Cerralvo. The mine produces 1,200 tons of 40% lead ore and can furnish 300 tons of zinc carbonate ores monthly. The Cerralvo smelter treats 35,000 tons of lead ore per annum. Transportation between the mine and smelter and the railroad junction at Herreras is by means of automobile-trucks.

3. *Providencia Mines*—These mines are capable of producing 4,500 tons of lead-silver ores per month, averaging 18% lead and 13 oz. of silver; also 1,500 tons of oxidized zinc ores running about 35% zinc. The ore goes by aerial tramway and narrow-gauge railway to the National Railway at Saltillo. The lead ores are sold in the United States and the lead-silver ores treated at the various smelting-plants controlled by the company. A first-class power-plant is under construction at these mines.

4. *Guanacevi*—In Guanacevi the company, in 1919, acquired valuable silver properties covering 415 acres. As Guanacevi is remote from a railway and in an unsettled district, the company has not yet begun operations there. Work already done on the properties is said to show that they are worth more than the amounts invested.

5. *Santa Eulalia*—These properties cover 2,935 acres, operated under lease and bond. The leases run from 10 to 15 years and require the payment of royalty. The properties are still in the development stage. Ores will be transported by aerial tram from Santa Eulalia to the main line of the National Railway.

6. *Vera Cruz Oil-lands*—Early in 1917, before the enactment of the new oil-land laws in Mexico, company acquired 6,710 acres of oil-land under lease in the State of Vera Cruz, adjacent to producing properties. No development work has been undertaken owing to high cost of [illegible] and unsettled conditions.

7. *Railway equipment*—The company owns [illegible] locomotives and 900 cars, which it was compelled to [illegible] product over the National lines.

8. *Real estate*—The company owns office [illegible] and Saltillo; also a recreation park in Monterrey.

9. *Compania de Combustibles Agujita, S. A.*—Incorporated in 1917 with a ital stock of 45,000 shares of P100 each. Of these shares the Minerales Co. ıs approximately 55,000, the rest being owned by Mexican citizens. The com- y owns coal-lands aggregating 2,700 acres at Agujita and 1,525 acres at npacitos. The developed tonnage is estimated at 18,000,000 tons, and the ıes are capable of maintaining a production of 45,000 tons per month. A dern washery, recently completed, serves a coking-plant with a capacity of 00 tons at Agujita and 500 at Lampacitos. The largest proportion of the put of the Agujita Co., both coal and coke, goes to the Minerales Co. and the ional railway lines. The excess is sold to domestic consumers through a fuel- ing company, which the Minerales Co. also controls.

10. *Fuel Sales Co.* (*Cia. de Combustible Nacional y Transportes, S. A.*)— s company was incorporated with 1,250 shares of P100 each, of which the ıerales owns 750, for the purpose of disposing of the excess production of l and coke not required by Minerales and its subsidiaries or by the National lway companies. This company has its own transportation equipment, con- ing of three 90-ton locomotives and 60 standard-gauge cars, and maintains etail-sales agency in Sabinas and Mexico City.

11. *Compania Metallurgica de Torreon*—This company has a capital stock 50,000 shares of P80 par value, of which the Minerales Co. owns approxi- ely 83%. The company owns 503 acres, including mines and a large smelting- lt near Torreon. The plant consists of nine lead blast-furnaces and one per blast-furnace, with an annual capacity of 400,000 tons. There is a copper verter to treat copper matte, and two Dwight-Lloyd roasting-machines, and the necessary auxiliaries, such as power-plant, etc. This plant has been rated as a custom smelter for the past 15 years. The normal production is 00 tons of silver-lead bullion per annum and 2,500 tons of blister copper. company has an extensive townsite, with dwellings suitable both for laborers officials, offices, hospitals, schools, etc.

12. *Parrena Mining Co.*—The capital stock of this company is P500,000, of ch the Minerales Co. owns 50%. The company owns mining properties in Sierra Mojada district, covering 475 acres, from which are produced lead- er, copper, and zinc ores. The Parrena Co. also owns a 50% interest in the Salvador mine in the same district, which has been producing for over 30 s. The Parrena Co.'s own properties are still in the development stage, ough the value of the production up to date covers development expenses.

13. *Cia Minera Paloma y Cabrillas, S. A.*—This company has a capital k of 72,000 shares of P50, which is distributed throughout the United States, ico, and foreign countries. The company owns 278 acres of mining prop- s near Higueras, in the State of Coahuila, and is connected with the National way lines at that point by an aerial tramway. The mine is equipped with nate power-plant facilities as well as offices, workmen's houses, hospitals, ols, etc., and is capable of producing 5,000 tons monthly of iron-lead ores aining 15% lead and 3 oz. of silver, and 800 tons of zinc carbonate ores aining 32% zinc.

14. *Compania Minera de Penoles, Durango*—This company has a capital k of 120,000 shares of P30 each. Its property, which is one of the best and est known in Mexico, covers 7,123 acres, from which 15,000 tons of lead- ores are being produced monthly, containing 14% of lead and 13 oz. of and 1 oz. of gold.

The Mapimi smelter also owned and operated by this company has five blast- and a roasting-plant for the treat 400,000 tons of charge per there is also an arsenic plant arsenic as a by-product ing operations. smelter, as well n. A 25-mile narrow mine and smelter National Railway production of 25,000 tons white arsenic. ated a leasing ; S. A., plant

16,074-meter pipe-line, having pumps at Santa Agueda and Santa Rita. The mines and works are connected by a 30-kilometer private railway, equipped with 9 locomotives and 250 cars.

Compañia del Boleo treats 1,000 metric tons daily, the ores averaging from 4 to 5% copper. There are 7 blast-furnaces in operation, with a capacity of 200 tons each per 24 hours. The ores are mainly oxidized and contain a large amount of moisture as delivered to the smelter. The products shipped are black copper assaying 93% in that metal and matte containing 63% copper.

In 1918 the company employed 3,500 men. Almost all hand labor is Mexican with some Yaqui Indians. Europeans are only employed as foreman and for special work.

Production: in 1918-'19 averaged 1,673,776 lb. of copper per month from ore that averaged 3.49% copper; 29,120,000 lbs. in 1910; 27,686,400 lbs. in 1911, and 28,336,000 lbs. in 1912. The production of ore mined for 1911 was 355,[illegible] tons of 3.47% ore; 364,850 tons of 3.51% ore in 1912; 371,300 tons in 1913; 324,[illegible] tons in 1914; 316,800 tons in 1915. The smelter handled 356,700 tons of ore in 1911; 360,000 tons of ore, yielding 12,650 tons of copper in 1912; 374,350 tons yielding 3.47% or 13,000 tons copper in 1913; 324,000 tons, yielding 3.53% or 11,480 tons of copper in 1914; 317,000 tons, yielding 3.62%, or 11,500 tons of copper in 1915; 290,000 tons of 3.79% ore for 11,000 tons of copper in 1916; and 258,[illegible] tons of 3.56% ore for 9,225 tons metal in 1917. Reserves of ore amount to [illegible] year's supply.

The company's policy of secretiveness concerning mine operations, together with its refusal to permit inspection by visiting engineers and geologists, has made it impossible to give detailed information concerning a unique ore deposit and its exploitation. The property is one of exceptional merit and has been ably managed for many years. Company has been able to continue operations despite revolutionary disturbances in Mexico.

Producing at rate of 1,600,000 lb. of 3% copper ore monthly in 1917, about 1,800,000 lb. in 1918; and 1,300,000 lb. monthly in 1919.

ESMERALDA COPPER MINING & SMELTING CO.

Idle. Mine near Santa Catarina del Norte, Baja California, Mex., known as La Esmeralda, is opened by shaft, with considerable development.

ESPERANZA MINING CO. **BAJA CALIFORNIA**

Secretary and office: E. W. Nicholson, 801 Land Title Bldg., Philadelphia, Pa. **Operating office:** P. O. Box CCC, San Diego, Cal. Mine at Ensenada, Baja California, Mex. Geo. P. Brown, gen. mgr.

Property: 83 hectares, and 40 acres miscellaneous lands, on Coche island, on the Pacific coast, shows diorite cut by veins having 3 lenticular shoots, carrying carbonate and sulphide ores, estimated by company to average 40' width, 300' depth and 1,100' length, and to contain an average of 2% copper, 3% zinc, 2 oz. silver and $3.50 gold per ton.

Development: about 8,500' of workings, showing 150,000 tons of [illegible] grade ore, with about 100,000 tons blocked out for stoping. Has received $450,000 from shipments to the Denver, Pueblo, San Francisco and Tacoma smelters.

Unsettled conditions in Mexico since 1914 have prevented [illegible] property.

GULF COPPER CO. **BAJA CALIFORNIA**

Head office: Phoenix, Ariz. Mine at Angeles Bay, Gulf of California, Mexico.

Cap., $1,000,000; shares $1 par. J. H. Baker, pres. and gen. mgr.; Anthony, mgr. engr.; J. H. Louden, directors.

Property: 40 hectares, about 100 acres, at north end of Angeles bay, [illegible] miles N. W. from Guaymas and about 90 miles S. W. from Pilares. Claims show silicious schists cut by porphyry dikes and a vein running [illegible] dipping at 45° [illegible] ranging from 5 to 42' in width.

Ore: bla[illegible]ud sulphide of copper said to average 4% [illegible] trace of gold [illegible]

Develop[illegible] with 1,363' workings, including [illegible]

ein 175'. Has shipped 300 tons, 25% picked ore, and has several thousand tons f low-grade ore on dump. Property considered promising if properly financed nd handled. Presumably idle; no recent returns received.

AN JUAN REDUCTION CO. **BAJA CALIFORNIA**

Address: San Antonio, Baja California, Mexico. Paul Knapp, gen. ıgr.; J. C. Puttner, mine mgr.; David Lawrence, mill supt. Operates a mine ielding gold-bearing arsenopyrite ore, 5 miles E. of Triunfo.

The reduction plant has dry rolls, Hardinge mills, roasting furnaces, and yanide department. No recent information is available.

/EST MEXICO MINES CO. **BAJA CALIFORNIA**

Office: Krape Inv. Co., Gas & Electric Bldg., Denver, Colorado. **Mine ffice:** San Antonio, Baja California, Mexico.

Officers: W. G. Krape, pres.-mgr.; D. H. Lawrence, v. p.-supt.; H. C. an Norman, sec.; T. Williams, treas.

Inc. January, 1912, in Arizona. **Cap.**, $3,000,000; shares $1 par; non-sessable; outstanding 1,985,000 shares. Annual meeting, first Wednesday in nuary.

Property: 3 claims, about 30 acres, in the San Antonio district, 38 miles of La Paz, Lower California, Mexico. Veins are both fissure and contact, ntaining gold and silver. Pay ore occurs in shoots and streaks, the main ebody varying from 3' to 14' wide. Sulphides appear at 275' depth.

Development: by inclined shaft, greatest depth being 340' and extent of eral workings 5,000'. Company claims to have 15,000 tons in reserve with a)ss value of $400,000.

Equipment: includes a 3-stamp concentrating mill.

Production: total production said to be $20,000 from 6 shipments of assaying $192 to $326 per ton.

In 1914 the Wm. G. Krape Inv. Co. was selling this stock at "12½c. per re. fully paid and forever nonassessable" on the installment plan, a statement : is itself a warning.

STATE OF CHIHUAHUA

MOLOYA MINING CO. **CHIHUAHUA**

Office: 203 Broadway, New York. **Mine office:** Baca, Chihuahua, ico.

Officers: Nils O. Bagge, pres.; W. H. Schlofield, v. p.; C. I. Morey, sec.-; preceding officers and W. M. Jermyn, directors; Victor C. Joslyn, mine

nc. 1903, in Arizona. **Cap.**, $2,000,000; shares $1, in $800,000 partici- non-cumulative 10% preferred stock, and $1,200,000 common stock, all ding. New York Trust Co., registrar. Holds title to lands through de Almoloya, S. A., a Mexican corporation.

operty: 177 hectares, including the San Enrique group adjoining the rero mine, and 4 other groups, about 4 miles from Baca, in the Allende ct, with rail transportation over a standard-gauge line to the Cigarrero

eology: the Sierra de Almoloya is an isolated mountain range, about s long and 2 wide, carrying limestone beds of the Comanche series of the Cretaceous, extensively fractured by several systems of faulting, with zones of 50 to 90 metres width, principal zones being the northeast system, cene age, of which the most prominent is the San Pedro fault zone, and 40° W. system of Miocene age, which are the sources of large and rich ambers, the most important orebodies occurring at the intersection of faults. Lands adjoin the Cigarrero mine on the northeast, and carry the ion of the San Pedro fault, proven by diamond-drilling to occur between ' and 9 e so fa ockets, in leached shear zones, carrying low

station on the Kansas City, Mexico & Orient railroad. These properties were purchased from Don Francisco Diaz in 1908, by the late Ernesto Madero.

Owing to conditions in Mexico it is impossible to get recent information.

BATOPILAS MINING CO. **CHIHUAHUA**

Address: 49 Cedar St., New York City. **Mine office:** Batopilas, Chihuahua, Mexico. John R. Harbottle, gen. mgr. in Mexico.

Officers: F. D. Merchant, pres.; N. F. Palmer, v. p.; W. M. Brodie, v. p.; S. Elliott, v. p., with Jas. Marwick, Geo. W. Field, Gates W. McGarrah, Geo. Rowland, E. L. Stevens, all of New York; F. A. Drury, Worcester, Mass.; Robt. M. Currier, Boston; A. B. Parker, Edward L. Stevens, L. H. Scott and Geo. Rowland, trustees; E. W. A. Jorgensen, sec. and asst. treas.; L. H. Scott, treas.

Trustees: foregoing with Alton B. Parker and eight others.

Inc. 1887, in New York. **Cap.**, $9,000,000; shares $20 par; 446,599 issued. **Bonds:** authorized $1,000,000, 1st mtge. 6's, dated Dec. 1, 1887, for 15 years, outstanding $366,500. Bonds were extended to December 1, 1927. Shares listed on the New York and Boston Stock Exchanges. Annual meeting, third Tuesday in April. Union Trust Co., New York, and State St. Trust Co., Boston, transfer offices. Farmer's Loan & Trust Co., New York and Old Colony Trust Co., Boston, registrars. Shares, old, $1 low, $1¼ high in 1918; $1⅛ low, $2 high in 1919.

Dividend: one of 12½c a share was paid December 31, 1907.

Balance sheet as of December 31, 1914, the last issued, shows assets $12,794,479, of which amount $12,485,435 represents mines, real estate, buildings, equipment, etc., and $207,322 current assets; current liabilities, $37,258, accrued liabilities, $24,950. Total surplus December 31, 1914, $3,365,771. On April 1 1917, cash in Mexican silver, etc., totaled 6,187 pesos; cash in New York funds $29,000. The 98,555 (pesos) Chihuahua currency, which company was forced to purchase, is worthless. Company has filed claims for $390,000 against the Mexican Government, and $150,000 more will be filed.

Property: concessions to 61 square miles of richly mineralized lands near Batopilas, in the Andres del Rio mining district, in the extreme southwestern part of the State of Chilhuahua, Mexico. When 1913 began the company had titles in the silver zone for 2,137 acres, and in the auriferous zone 3 miles up the river, for 140 acres. On account of the revolution it has been impossible to comply with the provisions of the contract covering what is known as the concession and time allowances have been granted. In addition, the company owns 130,000 acres of ranch and timber lands.

Ore: native silver occurring with calcite in veins in diabase. The San Miguel property contains many veins, some of which have been worked for more than 100 years. The main veins are the San Antonio, Cancio, Cinco de Mayo, Diablo, Carmen, and Veta Grande now worked out. During 6 months in 1913 the average assay for low grade ore from the San Miguel mine, which produced ¾ of the silver output, was 9.27 oz. per ton, while the ore from the Porfirio Diaz Tunnel group averaged 6.55 oz. per ton. High-grade ore produced during 4 months, 609 tons, averaged 411 oz. per ton.

Development: over 10 miles of adit levels and 77 miles of workings. The principal mines are the Porfirio Diaz Tunnel on the Todos Santos Group, the San Miguel mine, El Escritorio, and El Camuchin. Work at El Escritorio and El Camuchin was unsatisfactory in 1913 and they were closed down.

Equipment: the Hacienda San Antonio contains a 125-stamp mill with a daily capacity of 400 tons, electric light plant and air-compressor, all run by Pelton wheels capable of furnishing 550-h. p. The San Miguel Hacienda contains a 25-stamp mill for high-grade ores, cyanide plant, amalgamating pans, reverberatory plant, a roasting and lixiviation plant for concentrates, with a daily capacity of 8 tons, machine-shop, foundry, office buildings, dormitories, boarding houses, etc.

Power obtained from the Batopilas River by means of a dam 764' long and an aqueduct 9,900' long. The water after being used in the San Antonio plant is siphoned under the river and runs to the San Miguel Hacienda, where 2,5[illegible] is developed by turbines.

Production and profits have been as follows:

Year	Ore Treated, Tons	Silver, Oz.	Operating Profits
1915	.....	156,862	.....
1914	6,630	188,087	$10,556
1913	20,887	374,174	60,068
1912	34,032	564,398	80,046
1911	33,073	516,688	17,409*
1910	43,612	730,697	106,258*

* Deficit.

At a special meeting called in August, 1916, company's charter was amended, uthorizing the management to conduct mining operations in the United States. ompany did some exploration work near Joplin, Mo., in 1918, but results were nsatisfactory. It also has options on coal lands in Missouri.

Since 1910, only about one year's work has been done by the company (in 913) and since 1915, operations have been conducted on a share basis by loyal lexicans. About 40,000 oz. silver ore was produced from May to October, 1919. he management is not particularly optimistic for the near future, because of nsettled and unsafe political conditions. In December, 1919, the manager re- irned to the mine to prepare for resumption of full scale operations.

UENA TIERRA MINING CO., LTD. **CHIHUAHUA**

Office: T. D. Pillans, sec., 24 Lombard St., London, E. C. 3, England.

Directors: R. T. Bayliss, chairman; Lord Arthur Butler, W. McDer- ott, J. H. M. Shaw; R. M. Raymond, cons. engr.; A. C. Brinker, gen. mgr., 09 Mills Bldg., El Paso, Texas.

Inc. Feb. 10, 1912, in England. **Cap.**, 330,000 shares, £1 par; all is- ed and fully paid.

Property: acquired from the Exploration Co. of England and Mexico, td., the Buena Tierra mine, 89 acres, in the Santa Eulalia district, Chihuahua, miles S. E. of Chihuahua. Purchase price was £300,000, payable £178,201 sh, £121,799 in fully-paid shares. Property reported on by R. T. Bayliss and . M. Raymond.

Dividends: 5% each in 1912 and 1914; nothing since.

Ore: principally lead and zinc carbonates assaying 10 oz. silver, 15% ad and 25-50% zinc. There is also a low-grade mixed sulphide. Ore-bodies cur in limestone lying almost flat, but instead of following the fissures, spread t into flat beds near them, their average width is 30', average thickness, 40'. e Chorro orebody has a depth of over 1,000'. Developed orebodies are most merous at 450' depth, but most of the mines have ore down to a depth of 1,300'. e reserves estimated in 1917 as 281,500 tons.

Development: by shafts; Buena Tierra shaft is 1,400' deep. Raises are t up from the levels at intervals of 75-200' and the ore is mined in small nches, little powder being required and practically no timber.

Operations were resumed in May, 1918, but Mexican troubles have interfered th production during the past few years and property has not been steadily erated. Lead ore is shipped to the A. S. & R. Co.'s smelters at Chihuahua or Paso, and the zinc ore to the United States.

JENA VISTA GOLD MINING CO. **CHIHUAHUA**

Owned by El Rayo Mines Co., which see.

NDELARIA MINING CO. **CHIHUAHUA**

Office: 111 East 34th St., New York.

Officers: A. S. Dwight, pres.; D. E. Moran, v. p.; C. I. Reeves, sec.- as.; and H. J. Stehli, directors.

Property: in the State of Chihuahua, but details not obtainable.

IHUAHUA-ESPERANZA GOLD MINING CO. **CHIHUAHUA**

Subsidiary of the Dolores Esperanza, which see.

IHUAHUA MINING CO. **CHIHUAHUA**

Controlled through stock ownership by El Potosi Mng. Co., a subsidiary of Howe Sound Co.

Offices: 734 Fifth Ave., New York City, and Chihuahua, Mexico.

Officers: G. B. Schley, pres.; E. B. Schley, v. p.; W. J. Walworth, sec.-treas.; C. G. Raynor, asst. sec.-treas.; W. J. Quigly, mgr., Chihuahua.

Inc. Jan. 8, 1890, in New York. **Cap.,** $600,000; $1 par; outstanding, 587,806 shares. Stock transferred at company's New York office. Annual meeting, second Monday in January. Stock is closely held.

Property: in the Santa Eulalia district, Chihuahua, Mexico.

Ore: lead, silver, and zinc occurring as replacement deposits in limestone.

Development: by vertical shafts to a depth of 1,800'. Operations have been hampered by the revolution, though shipments of zinc ore were made in 1915 and 1916. No work was done in 1919. See El Potosi Mining Co.

CUSI MINING CO. **CHIHUAHUA**

Office: 144 South Wabash Ave., Chicago, Ill.

Officers: Potter Palmer, Jr., pres.-treas.; Honore Palmer, v. p.; A. M. Murphy, sec.; all of 721 Peoples Gas Bldg., Chicago.

Property: the Promontorio mine and other claims at Cusihuiriachic, Chihuahua, Mexico, showing veins of silver-lead ore.

Equipment: includes a 250-ton mill.

Company reported to have given a lease on the mine, on a royalty basis.

DESCUBRIDORA MINING & DEVELOPMENT CO. **CHIHUAHUA**

Owned by El Rayo Mines Co. See Dolores-Esperanza of America.

DOLORES ESPERANZA CORPORATION **CHIHUAHUA**

Succeeds Mines Company of America.

Office: Room 226, 111 Broadway, New York City.

Officers: H. S. Black, pres.; W. E. Reis and A. T. Black, v. p.'s; with W. T. Graham, Frank Ray, E. N. Skinner, and E. L. Gruver, directors. J. D. Gruver, sec.-treas.

Inc. Jan. 18, 1919, in Maine. **Cap.,** $2,000,000; shares $2 par; 864,8[illegible] outstanding. Bankers Trust Co., New York, transfer agent. Equitable Trust Co., New York, registrar. Listed on New York Curb.

On February 11, 1919, directors of the Mines Company of America were authorized to sell all the company's property to the Dolores Esperanza Corporation for $600,000 cash, this money to be used to pay off all debts and to meet expenses. Old stockholders could buy new stock at $2 per share up to number of shares held.

Balance sheet, June 30, 1919, showed assets totaling $1,733,351, including cash and U. S. Government certificates, $130,824; second installment on capital stock due July 7, $824,595; investments in subsidiary companies, $771,906; and sundries, $6,025. Liabilities included capital stock, $1,729,634, and sundries $3,717.

Ownership in companies is as follows:

Per cent. of subsidiary owned by Dolores Esperanza.	Par value of shares	Number of shares owned
99—Dolores Mines Co.	$5.00	396,[illegible]
100—Chihuahua Esperanza G. M. Co.	1.00	2,411,[illegible]
75—Consuelo M. M. & Power Co.	1.00	1,826,[illegible]
99—El Rayo Mines Co.	2.00	355,[illegible]
100—Creston Colorada Co.	100.00	1,[illegible]
33⅓—La Dura Mill & Mine Co.	10.00	33,[illegible]
33⅓—Compania Minera Gloria Fortuna	1.00	8,[illegible]

Dolores Mines and El Rayo Mines each own ⅓ of La Dura and For[illegible] capitalization.

Dividends: (by Mines Co. of America) total paid to Dec. 31, [illegible] amounted to $4,958,600, including a dividend in 1906 in stock of the Dolores Mines Co.

Chihuahua-Esperanza Gold Mining Co.

Property: adjoining that of the Dolores Mines Co., Chihuahua, on the west, consists of 3 claims, 304 acres. Company also owns 10,000 acres of [illegible] miles north of Dolores.

Geology: formation is similar to that of the Dolores. Fissure veins ur in rhyolite dikes cutting andesite; 3 vein-systems exist. Development ounts to 502'. Ore reserves said to total 2,500 tons worth $15 per ton. La eranza mine has great possibilities.

Consuelo Mining, Milling & Power Co., Mexico.

Property: adjoins that of the Dolores Mines Co., west of Madera, in huahua, on the south and east, and consists of 77 pertenencias, 190 acres, a half interest in 9 pertenencias, 22 acres, also a water-right on the Tutuaca r. The formation is similar to that of Dolores. No systematic development been done; the value of the ground is prospective.

Creston Colorada Co., Mexico

Mine office: Torres, Sonora, Mexico.
Inc. February, 1902, in Ohio. **Cap.**, authorized and outstanding, $100,- par $100. Annual meeting, first Saturday in November.
Property: 27 claims, 828 acres, commonly known as "Minas Prietas" ck mines), in Sonora, at La Colorada, a station on the narrow-gauge Mexico on Ry., 12 miles east of Torres, on the Southern Pacific R. R. of Mexico, 200 miles south of Nogales, Ariz. The mines have been worked for 100 s and have produced regularly during the last 33 years, but are now con- ed depleted. Gross production estimated at over $112,000,000.
The property is divided into 4 different mines: the Creston Colorada, Ama- s, Grand Central, and Verde. The claims contain a number of producing s, and cover the latter for 8,000' along their strike. Company also owns ace rights to 7,000 acres land, including the mining claims. It also owns a r-right on the Matape river.
Ore: veins have a general E.-W. strike, dip N. 55° to 90°, and vary in h from 3' to 40'. Larger orebodies occur principally in diorite, metamorphic s and quartz porphyry. The Creston ore, or east end ore, is a highly frac- l quartz. The Colorada is a harder quartz. Sulphides of silver, iron, lead zinc occur from the surface down. Streaks of high-grade sulphide shipping are occasionally found. The Verde ore is a hard quartz, at times very ctory. The Amarillas-Grand Central ore is a highly oxidized quartz, con- ng free gold in places. Average values in ores, as milled, are said to be gold and 40% silver.
Development: in 1916 totaled 2,075', compared with 2,578' in 1915. k was divided as follows: Creston mine, 1,473'; Colorada mine, 226'; Ama- -Grand Central mine, 376'.
Ore reserves: estimated Jan. 1, 1917, as 190,350 tons, average assay per ton, or a gross value of $937,591, as compared with 200,300 tons, average $4.89 per ton, the previous year; gold figured at $20 per oz., silver at 75c. The Amarillas-Grand Ceneral mine has one dump of tailing containing tons which will be retreated.
Equipment: at the Creston mine includes steam hoist and compressor foundry, etc. The Colorada cyanide plant receives Creston ore over a erial tramway, and the Colorada ore over an 800' incline tramway. The Grand Central mine includes steam operated hoisting and compressor electrically-driven crushing plant; also a 450-ton cyanide plant, which re from the Creston, Amarillas and Colorada over aerial tramways. plant, 18 miles from the mines, on the Matape river, supplies water es through a 5" pipe.
cyanide plants: in 1916 extensive shut-downs were in order, disturbances. The Amarillas-Grand Central unit was oper- treated 14,550 tons of ore. Extraction amounted to 73.8%, and 53.3% by cyanidation.

Production:

Year	Creston mine, tons	Colorado mine, tons	Am.-G. C. mine, tons	Old tailing, tons	Total tons	Value per ton
1916	12,400	2,150	.....	.....	14,550	$5.65
1915	98,662	18,854	10,365	3,469	131,350	4.80
1914	94,655	18,090	10,887	3,243	126,875	4.67

The Creston-Colorada mines were badly damaged by Mexicans (bandits) in 1919, who looted pillars of good ore, fired the shaft sets, burned buildings and cyanide tanks, and stole the metal from all machinery. It will require a large amount of time and money to put the property in shape for operating.

Dolores Mines Co., Mexico.

Inc. Nov., 1903, in Mexico. **Cap.**, authorized and issued, $2,000,000; full paid and non-assessable; par $5. No bonded debt. U. S. Mortgage & Trust Co., New York, transfer agent. Guaranty Trust Co., New York, registrar. Annual meeting, first Tuesday in December. Listed on New York Curb.

Entire capital stock of this company was formerly owned by an English company called Dolores, Ltd.; dissolved February 25, 1908, by exchange of stock, share for share, of Dolores Mines, Ltd. The company owns 33⅓% of the La Dura Mill & Mining Co.

Property: 17 contiguous claims, 250 acres, in Chihuahua, west of Madera, a station on the Mexico Northwestern Ry., about 250 miles S. W. of El Paso, Texas, and 200 miles N. W. of the city of Chihuahua. Mines are reached over a 45-mile trail, requiring 7 days' time for pack trains. Company also owns 3 detached mineral claims, 126 acres, near Dolores, and all surface rights to 12,500 acres, also a water right on the Tutuaca river. The main group, as shown by developments to date, contains 4 main vein systems, known as the Alma, San Francisco, West San Francisco, Washington and Arco Iris dikes, covered for 8,000′ on the strike of the Alma vein system, 4,000′ on the San Francisco vein system, 3,800′ on the West San Francisco, 1,000′ on the Washington, and 2,600′ on the Arco Iris vein system.

Geology: vein systems consist of rhyolite dikes in andesite; the veins are fissures in these rhyolite dikes, strike north and dip 55° to 90°. Ore-bodies occur at or near intersections of side fractures and within the boundaries of the dike. Dolores ore is a very hard quartz, containing about 2% sulphides of iron, silver and occasionally lead and traces of zinc. Values in ore are approximately 40% gold and 60% silver.

Development: in 1916 totaled 1,795′ as compared with 2,833′ in 1915, all done by hand and above the 500′ level. The 600′ and 700′ levels are under water.

Ore reserves: were estimated Jan. 1, 1917, as follows:

	Tons	Value per ton	Gross value
Ore in place	135,628	$13.80	$1,872
Broken ore	13,595	14.10	19
Total	149,223	$13.83	$2

Compared with 125,663 tons of $14 ore with gross value of $1,768,[illegible] January 1, 1916. Value is based on $20 per oz. for gold and 50c. per oz. for silver.

Equipment: includes steam-operated crushing, concentrating and cyaniding plants, also compressor and hoisting plants, machine shops, etc. A power-driven Reidler pump, 2½ miles east of the mine on the Tutuaca river, supplies all necessary water. Electrical equipment to supplant steam power is in place. Transmission line connects Dolores with Madera; line is designed for 60-cycle current of 33,000 volts. Power will be furnished from a plant built near Madera, to consist of three 320-k. w. generators driven by type oil engines of the "Snow" make.

In the re-modeled mill a 15x24" Blake crusher replaces 3 small machines; belt conveyors and steel ball mills replace stamps and Bryan mills. Extraction is about 87%, 18% by concentration and 69% by cyanidation. Bullion is sent to Maurer, N. J. Concentrates are shipped to the El Paso smelter.

Company employs about 365 men under normal conditions, only 17 being Americans. The small amount of development work done in recent years gave good results.

The orebody found in 1915 is over 265' long, with indications of greater length. New company expects to reduce power costs to one-third when the plant is run by electricity.

El Rayo Mines Co., Mexico.

Mine office: Santa Barbara, Chihuahua, Mexico.

Inc. Feb. 13, 1906, in Maine. **Cap.,** $1,000,000; outstanding $714,000; shares $2 par. No bonded debt. Annual meeting, second Tuesday in February. Listed on New York Curb. Company is the American holding company for the El Rayo Mining & Development Co., S. A., a Mexican corporation. Owns the Descubridora Mining & Development Co. and Buena Vista Gold Mining Co.

Property: 21 claims, 766 acres, in the State of Chihuahua, S. W. of Santa Barbara, the terminal of a branch line of the Mexican Central Railway. Mines can be reached from Santa Barbara over an 8-mile trail. Company also has a 14-year lease on about 12 square miles of timberland, adjoining the mining property. El Rayo is at an elevation of 7,200' above sea level. The mining claims cover the N. S. strike of the producing veins for over 2 miles.

Ore: gold-silver in fissure veins in rhyolite, which dip from 50° to 90°. The gangue varies from a friable and oxidized quartz at the north end to a harder sulphide-bearing quartz at the center and south end of the property. The north end contains about 4% sulphides, chiefly iron, with traces of lead and zinc. Copper sulphides are found occasionally. The metal content is about 74% gold and 26% silver. The ore shoots are irregularly shaped lenses which occur at vein junctions or intersections with main fracture.

Development: underground workings extend to depth of 1,400' and total 19,000'. The Adela mine covers 4,700' of the vein system at the north end. The El Rayo mine covers 2,300' of the vein system and adjoins the Adela. The Descubridora mine covers 5,000' of the vein system on the extreme south end of the property.

Ore reserves: were estimated Jan. 1, 1917, as:

	Tons	Value per ton	Gross value
Ore in place	65,210	$11.58	$755,283
Broken ore	13,328	10.77	143,542
Total	78,538	$11.44	$898,825

Compared with 75,038 tons of $10.48 ore with gross value of $786,825 on January 1, 1916. Value is based on $20 per oz. for gold and 50c. per oz. for silver.

Equipment: includes a 1,950 cu. ft. steam operated compressor plant. A 2-mile aerial tram furnishes the necessary fuel, lumber and mining timbers.

Mill: includes 160-ton crushing, concentrating and cyaniding plants. From the storage bin at the portal of the 1,100' level of the Adela mine the ore is trammed 1,300' in 6-ton cars to the mill storage bin. Course of ore through plant is as follows: from bin through 9"x15" Blake crusher, set at 1" discharge; [illegible] by conveyor belt to bin, by Challenge feeder over conveyor belt to one set of 16"x36" Traylor rolls, discharge to 2 sets of 14"x30" Traylor rolls, to [illegible]; overflow to tables, oversize in closed circuit returned to 7'x14' tube-[illegible] discharge to classifier, overflow to tables, oxersize in closed circuit returned to [illegible] mill. Pulp treated by cyanide solution. Resulting bullion and concentrates marketed in America.

[illegible] of entire plant was finished in 1917. Electricity is furnished,

MIRASOL; COMPANIA MINERA DEL. CHIHUAHUA

Address: C. B. Clyne, Mills Bldg., El Paso, Tex. E. W. Enriquez, supt., Cusihuiriachic, Chihuahua.

In 1919, it was reported that a 200-ton mill was under construction and the ore was being shipped to smelter at Chihuahua.

PALMAREJO & MEXICAN GOLD FIELDS, LTD. CHIHUAHUA

Office: E. B. Brown, 10 Austin Friars, London, E. C. 2, England.

Directors: Sir W. B. Perceval, chairman; G. Hallett, H. G. Tollemache and E. Turk. W. D. Hole, mgr.; E. T. McCarthy, cons. eng.

Inc. June 25, 1898, in Great Britain. **Cap.,** £565.000, in 200,000 A shares of 6 pence each, 21,000 pfce. shares of £1,, and 1,400,000 of 5s., of which 120,000 pfce. and 835,978 ord. issued.

Bonds: £25,000 of prior lien, due April, 1921; £28,330 of 5% 1st, £18,797 of 7% second, and £93,500 of 6½% third mortgage debentures.

Accrued debenture interest on March 31, 1918, was £43,348. Property was in hands of Receiver from December, 1914, to August, 1918.

Property: 127½ sq. miles of mineral and timber lands in the Hurwaja district of western Chihuahua. Reserves estimated as 319,000 tons proven ore averaging 45 s. ($10.80), and 2,000,000 tons of possible ore of similar value.

Equipment: an old 60-stamp mill and treatment plant, which will be remodelled.

Operations were suspended from 1912 until late in 1918.

PARCIONERA CONSOLIDATED MINING CO. CHIHUAHUA

Address: Jos. S. Qualey, pres., 25 Pine St., New York City. Mine office Santa Eulalia Chihuahua, Mex. Ernest Henderson, sec. Is a close corporation, shares $100 par.

Property: a silver-lead mine, with some copper. Idle on account of Mexican revolution.

RIO PLATA MINING CO. CHIHUAHUA

Office: 654 W. 51st St., New York.

Officers: H. W. Miller, pres.; Archibald Nesbitt, v. p.; J. J. Bonneau, sec.; Lincoln Bonneau, treas., with Geo. F. Parker, John C. Hanson, W. Green, Jos. Coult, R. N. Brundage, A. P. Roth, D. J. Dwyer, and J. H. directors.

Inc. April 7, 1906, in Arizona. **Cap.,** $2,000,000; shares $5 par; outstanding $1,872,590. Stock transferred at company's office, New York Co., New York, registrar. Annual meeting in January, at Phoenix, Ariz. Bolocalization of the company completed October 15, 1910.

Company controls the Trinity Cons. Hydraulic Mining Co. in California.

Dividends: initial dividend, 1½%, paid Dec., 1909; quarterly dividends 2% from March, 1910, to December, 1911, inclusive; none in 1912; February 1913, 1%; none since.

Property: the mines and reduction works of the Cia Minera de la de Plata, S. A., of Mexico; 187 acres mining land, 2,700 acres ranch and lands and water rights, located 6 miles S. of Guazapares, Chihuahua, miles from El Paso. Holdings include the Santo Nino, David, Santa Santa Barbara, Cleopatra, La Ultima and Enrique silver mines. The ore in the Santa Barbara fissure vein, dipping 17°, with average width of 4 to

Development: by tunnels, with about 3,000' of workings.

Equipment: includes hydro-electric plant and an auxiliary steam 25-stamp mill, 60-ton concentrator and an 80-ton cyanide plant.

Operations have been greatly interfered with on account of the revolu but property not molested. A new staff was sent to the mine in May, 1913 withdrew shortly after, as they reported the mine to be worked out, which doubted.

RIO TINTO COPPER CO. CHIHUAHUA

Mine and works office. Terrazas, Chihuahua, Mexico.

Office: James Corrigan, gen. mgr.; H. A. Eye, supt.; Capt. A. Murray, mine supt.; H. L. Schneider, smelter supt.; J. M. Baker, smelter man; F. W. Topken, master mechanic in 1913.

Inc. in Ohio. Is a holding company for Mexican subsidiaries. Operated a close corporation under the control of Corrigan, McKinney & Co.

Property: the Rio Tinto Mexicano mine and works bought 1908 for 87,500, and the property formerly held by the San Rafael Copper Mining Co. he first named is about 25 miles north of Chihuahua City and comprises a main act of 153 hectares, and a smaller tract of 6 hectares, including nearly all the veloped mineral property of the Terrazas camp, except a few lead mines. The act includes the Rio Tinto mine, and properties formerly worked by the Rio into Mexicano Mining Co., Boston & Mexican Mining Co., Dragoon Mining o. and San Rafael Copper Mining Co. The principal properties are the Rio into Mexicano, San Rafael, Promontorio, Verde and Colombia mines, all con-cted underground. The company also owns the Savanarola group, at Savana-la, about 50 miles south of Chihuahua and 35 miles west of Ortiz, carrying lver-copper and lead ores.

The Rio Tinto Mexicano mine opened 1860, closed 1902, reopened 1905, has en owned and operated by a number of different mining companies until pur-ased by this company from Messrs. Enrique and Juan A. Creel.

Geology: the claims cover contact deposits between limestone and al-red andesite, there being 5 known orebodies in a metamorphic zone traced 500 metres. The orebody has a minimum width of 2', maximum of 100', and erages 20' across. Ore also occurs between the limestone bedding planes, ar a large quartz ledge, and the orebodies, while erratic in size and occurrence, e connected and practically continuous. The limestone has an average dip 45° N.-W., and the property has also some silver-lead ore. The gangue is ainly limestone, somewhat garnetiferous. Extensive diamond-drill borings ow large orebodies containing workable copper ore.

Development: by a number of shafts to a depth of 400'; has about 3 iles of workings. The ground is firm, requiring no timbering, pillars having en removed to give chambers up to 100' square.

The San Rafael mine has a 440' two-compartment shaft. The Promontorio ine has 2 shafts, 1,000' apart, the main shaft being 350' deep. The Colombia ine has a 275' shaft, with about one-half mile of workings.

Equipment: includes steam and gas power, air compressors, etc.

Ore is carried from mines to smelter by a mile long narrow-gauge railway, uipped with a 6-ton Porter locomotive and 5-ton iron ore cars.

Smelter at Terrazas, one mile from the mine, connected by ½ mile ur with the main line of the Mexican Central railroad, has two 300-ton x192" blast-furnaces. The converter department has 1 stand and 3 shells, ith a 40-ton electric traveling crane and a relining plant. The power plant has 250-h. p. compound engine, direct-connected to a No. 8 Connersville blower, d a 100-k. w. generator supplies current for the other machinery.

Production: 1906-1910 was 9,150,000 lb. copper; 27,000 metric tons elted averaged 2.5% copper, mining cost being $3.50 per ton, and smelting st $3.50 per ton, or a cost for finished copper of 12.5c. per lb. The ore, though w grade, exists in large quantities, and the mine bids fair to become a producer, pable of making 1,000,000 lb. fine copper monthly.

The mine and smelter operated intermittently throughout the earlier revo-tions, but the intolerable conditions since 1913 have kept them closed.

AN FRANCISCO DEL ORO MINING CO., LTD. CHIHUAHUA

Reorganized as San Francisco Mines of Mexico, Ltd., which see.

AN FRANCISCO MINES OF MEXICO, LTD. CHIHUAHUA

Offices: W. Maclachlan, 65 London Wall, London, E. C. 2, England; d The London Syndicate of Mexico, 20 Avenida del 5 de Mayo, Mexico City.

Directors: Earl of Denbigh, chairman; T. Ford, J. Hatfield, J. Kitchin. . Maclachlan, A. S. Northcote, and A. J. H. Smith. W. S. Harrison, gen. mgr.; nor & Allen, 17 Madison Ave., New York, cons. engr.

Inc. March 27, 1913, in England. **Cap.**, £650,000; outstanding £350,000; ar 6% mar. **Bonds:** £200,000 convertible first mortgage debentures, in nomination of £100 and £ 20 each; int. payable April and October 1, was paid October 1, 1914; payment of the next six half-yearly installments has been

Company was a large producer of silver lead ore prior to the Madero revolution, in 1917, the Santa Eulalia property was leased to Compania de Minerales y Metales for 10 years, on a royalty of 15% on net smelter returns, the minimum to be $300,000, payable monthly in advance in installments of $2,500.

It does not seem likely that San Toy can pay dividends on its present production.

SIERRA CONSOLIDATED MINES CHIHUAHUA

Office: 120 Broadway, New York, N. Y.

Officers: J. B. Cotton, pres.; Robert Linton, v. p.; F. R. Kennedy, sec.-treas.; H. B. Paull, auditor.

Directors: Robert Linton, E. R. Grochau, J. F. Bankerd, T. F. Cole, J. B. Cotton, L. D. Ricketts, C. d'Autremont, Jr., F. R. Kennedy, and H. B. Paull.

Inc. Aug. 18, 1909, in Arizona. **Cap.**, $5,000,000; $10 par; 76,500 shares issued, fully paid 223,500 shares part paid at $7 each, $1,564,500; total outstanding $2,329,500. Stock transferred and registered at the company's office. Annual meeting, first Tuesday after first Monday in May at Warren, Arizona. Stock listed on New York Curb and traded in on Boston Curb.

Property: embraces mines, mineral and timber lands, water-rights, and surface acreage for power plants and reduction works. The mineral properties consist of 1,235 acres, in Ocampo, Pinos Altos, Socorro, and Yepachic, in the district of Rayon, State of Chihuahua, Mexico. The timber lands comprise 80,000 acres all in Chihuahua. The company has water-power rights on Jesus Maria arroyo, a stream that flows through Ocampo, and to the Basaseachic falls 18 miles from Ocampo.

Development: was carried on by the company from 1909 to 1912 on Matulera, Belen, Santa Eduviges, Guadalupe, San Ramon, El Conico, San Estanislao, and La Cumbre mines, and about 13,000′ of work had been done when operations were suspended on account of the revolution. No work has been done on the property since, but the mines can be reopened in short time when conditions permit.

The underground work has developed six ore-shoots blocking out approximately 100,000 tons of ore, averaging $12 per ton in gold and silver, basing the value of silver at 50c per ounce. The silver occurs as argentite, with some associated gold, in a silicious gangue. The ledge matter is an andesite breccia cemented with quartz.

Equipment: the equipment for a mill is at the mine ready for erection as soon as operations can begin, consists of the following: A 20 by 10″ Blake crusher, ten 1,500-lb. stamps, two 4 by 20′ tube-mills, three 15 by 45′ pachuca agitators, two Dorr thickeners, Esperanza classifier, 135-ton Oliver filter, Gaynor centrifugal dumps, all necessary solution tanks, steel zinc-boxes, Johnston precipitate press, tilting furnace for refining precipitates and all other necessary accessories. The electric generating station, 6 miles from Ocampo, on one of the company's timber tracts, consists of 66″ by 16′ Brownell tubular boilers, with feed waterheaters, pumps, etc.; three 100-h. p. Russell high-speed automatic engines belted to 75-k. w. generators; three 75-k. w. oil-cooled transformers; and all necessary lightning arrestors, switch-board apparatus, Tyrell regulators, etc. The current is generated at 2,300 volts and raised to 22,000 volts for transmission to Ocampo.

Sierra Mining Company, S. A.

Principal office: Juarez, Chihuahua. Mines and works at Ocampo, district of Rayon, Chihuahua, Mexico. This company is the Mexican title-holding and operating corporation for the Sierra Consolidated Mines Co.

STATE OF COAHUILA

)AHUILA MINING & SMELTING CO., LTD. **COAHUILA**

Office: 614 Penobscot Bldg., Detroit, Mich. **Operating office:** Apartado . Monterrey, N. L., Mexico. **Mine office:** Jimulco, Viesca, Coahuila.

Officers: H. T. Ambrose, pres.; Frank J. Llewellyn, v. p.; Walter E. ırker, sec. and gen. mgr.; Archibald Cattell, treas.; preceding, with J. Kirby, ., Sidney B. Cohn and C. F. Jennings, directors; J. C. Treadwell, supt.; Alex. cCormick, mine supt.; Harry Reed, mill supt.

Inc. January, 1902, in Mexico. **Cap.,** $500,000 gold; shares $1 par; non-sessable, fully issued.

Dividends: 10% in 1902; 6% in 1904; 29% in 1905; 30% in 1907; 10% in 09 and 16% in 1910, a total of 101%, or $505,000. Annual meeting, first Wed-sday in February.

Property: includes holdings in the Mapimi, Viesca and San Juan de ıadalupe districts, containing the (1) Santa Maria, Sultana, and other mines at mulco, carrying auriferous and argentiferous copper and lead ores, opened a 700′ main shaft, and a 1,000′ main tunnel, with steam and electric power; ?) the Alberto mine, in the Mapimi district, was said to have made regular ship-ents of high grade ore to the Mapimi smelter, 1910; (3) a 250-ton smelter, ith steam and electric power, connected with the mines by rail, blown-in early 03, but idle since 1909. The revolution in Mexico has practically stopped all ining in Coahuila and the mines are closed down until peace and safety again evail.

ONTINENTAL MINING CO. **COAHUILA**

Mine office: San Antonio, Texas.

Officers: Otto Wahrmund, pres.; C. T. Priest, San Antonio, v. p.; S. . Newton, sec.

Inc. April, 1905, as a reconstruction of Continental Copper Co., **Cap.,** ,000,000; shares $10 par. Is closely allied in ownership and management with e Jimulco Mining Co.

Property: the Panuco mine with 65 hectares, opened in 1700 and worked intervals since. Property was bought from the Panuco Copper Co.

Ore: deposit is a chimney of breccia, cemented by metallic sulphides, ainly chalcopyrite, but with a little chalcocite, in a quartz gangue, the country ck being granite. The ore is reported to average about 3½% copper.

Company owns a 40-mile railway, from Monclova to Panuco. Old com-ny invested about $1,000,000 in the property and improvements. Largest pro-ction, under former ownership, was 1,466,059 lb. fine copper in 1902, and a

The mine carries silver-bearing copper ores, with considerable development. Mill has 40 stamps, 3 crushers and Frue vanners.

EL ORITO MINING & MILLING CO. DURANGO

Address: care Robt. F. Fitz, gen. mgr., P. O. Box 275, Los Angeles, Calif. **Mine address:** Yerbanis, Durango.

Officers: Wm. Grote, pres., Elgin, Ill.; A. W. Church, v. p.; C. R. Hayson, sec.; J. A. Waterman, treas.; with J. A. Rovelstad, E. S. Eno and F. E. Ackerman, directors.

Inc. May 10, 1910, in Arizona. **Cap.,** $500,000; shares $100 par; outstanding, $432,500. Annual meeting, third Monday in May.

Properties: 233 pertenencias containing free milling gold property, at Peñon Blanco, and a copper property at Velardeña, Durango, Mex.

Development: one vertical and one incline shaft, depth 375' with deeper workings at 475'. Total underground workings 1,500'.

Equipment: includes a 3-stamp mill. Mines closed down owing to revolution, but management states operations will be resumed as soon as possible.

ESPERANZAS MINING CO. DURANGO

Idle for several years. Mine at Estación Symon, San Juan de Guadalupe, Durango, Mexico. Joseph Steel, gen. mgr., at last accounts. **Cap.,** $2...

Property: includes the Montaña de Cobre, Esperanza and other claims.

GUANACEVI TUNNEL CO. DURANGO

Mine at Guanacevi Santiago Papasquiaro, Durango, Mexico.

Inc. 1904, in Arizona. **Cap.,** $5,000,000; shares $5 par. Debts amounted to $150,000 in 1912 and have since increased.

Property: is in hands of trustee until conditions in Mexico permit financing company sufficiently to carry on the extensive development plans. There are 22 properties, including timber rights and original concessions, to possess large bodies of gold and copper ore. The mine has 3 shafts of 300' depth each, with tunnels of 1,250' and 1,400', the main tunnel, 7x9', planned to be driven about 3 kilometers, management estimating that in this distance a large number of veins carrying lead and copper ores should be cut, the cost being estimated as likely to cost about $250,000.

The L. Diamond Co., of Boston, was never a representative of the corporation, but a number of brokers bought stock and combined to unload on the public at unduly high prices.

Idle for several years.

LUCIA MINING CO. DURANGO

Office: 15 William St., New York. **Mine office:** Pánuco de Coronado, San Juan del Rio, Durango, Mexico. H. M. Hubbard, v. p.; Myra B. ..., sec.-treas.

Inc. 1900, in West Virginia. **Cap.,** $25,000; shares $5 par. This company is controlled by the San Luis Mining Co. and its property is described under that title.

NATIONAL MINES & SMELTER CO. DURANGO

Office: Magee Bldg., Pittsburgh, Pa. **Mine office:** Magistral, Durango, Mexico.

Officers: S. H. McKee, pres.; Wm. L. Curry, v. p.; John S. ..., sec.-treas.; Renald Ailes, financial agt.; E. A. Kennedy, supt.; R. W. ...

Inc. 1911. **Cap.,** $2,500,000; issued, 1,700,000 shares. Authorized ... collateral income bond issue; issued, $375,000. Company owns all the ... of the Santa Maria del Oro Mines Co., which company purchased ... the Lustre Mining & Smelting Co. from old stockholders, paying for ... stock and bonds of the National Mines & Smelters Co.

Property: the Magistral and Cocinera mines, 32 claims, 441 ... 1,080 acres of mineral lands, 397 hectares of mill and smelter sites, ...s lands and leasehold timber lands. The Magistral mine is ... ...s and 9 shafts and has a large body of slightly cupriferous ... ...nestone gangue, carrying 0.5 to 5% copper, probably averaging ... ...z. silver and 15 to 20 grams gold per metric ton.

The Cocinera mine developed an ore-shoot, 1,000′ long, 15′ wide and said to age $10 in gold and copper with a little silver. Depth over 600′.

Ore reserves: in this and the Azurite mines are estimated by the management at 190,000 tons, developed in new ground since 1911. The old company reported reserves of 185,000 tons in other and entirely distinct orebodies, in 1910.

Equipment: is complete, including a central power plant having two 1,000-h. p. and two 350-h. p. gas engines, one 200-h. p. and three 400-h. p. gas producers, 2,300-volt 3-phase generator, two 6-drill air-compressors and 10 hoists from 100 to 300-h. p. The 40-stamp mill, 750-lb. heads, has Huntington mills, 1 tube mill and 10 Frue vanners.

The smelter has 6 blast-furnaces, including two 150-ton hot-blast furnaces and three 200-ton furnaces, air for blast being heated by waste gases in a specially-designed heater. Produced 8,000 tons matte sent to the A. S. & R. Co. at Aguascalientes, averaging 15 to 17% copper, $155 gold and $4 silver per ton.

The old company apparently spent a million dollars or so for installation before the mines were sufficiently developed to provide the ores necessary to keep the various plants running and in 1907-08 became financially embarrassed. The mines are not yet on a profitable basis, but with the new concentration plant, completed in 1915, it is expected that the property will yield a satisfactory return on the investment, as soon as operations become normal in Mexico.

The plant is reported to have been badly damaged by bandits.

PENOLES MINING CO. (CIA MINERA DE PENOLES) DURANGO

See Minerales y Metales, Compania de, under "Mexico."

SAN LUIS MINING CO. DURANGO

Office: Myra B. Martin, sec., 15 William St., New York. **Mine office:** Rancho de Coronado, Durango, Mexico.

Officers: David F. Beggs, pres. and treas.; C. P. Jacobs, F. C. Hanford, S. Raymond, Wm. T. Read and Walter S. Logan, directors.

Inc. 1900, in West Virginia, and cap. increased, 1905, to $3,000,000; shares par. First dividend, 1%, was paid January, 1906, and a second dividend was paid July, 1916. Direct title to this property is held in the name of Lucia Mining Co. Annual meeting, last Tuesday in February.

Property: 225 pertenencias, 500 acres, and a 25-acre millsite, in the San Luis and Panuco de Coronado districts of Durango. The property shows trachyte and porphyry, carrying fissure veins and contact deposits, whose ores are estimated by the management to average 3% copper, 12% lead, 1% zinc, 35 oz. silver and $4 gold per ton, mainly from sulphide ores. The mines were discovered 1650, and worked more or less irregularly until 1830, when closed on account of water and Indian troubles, remaining idle until reopened, 1901, by present company.

The Potosina mine is said to show, at the western end, a considerable body of smelting grade and a large quantity of milling ore.

The San Gonzalo mine, 450′ deep, has a vein showing mainly low-grade ore carrying silver values above, with copper on the lower levels, and is also reported to have a 2′ vein carrying 25 kgs. silver per ton, with some gold.

The Sidney has a 2′ vein of galena, giving assays up to 45% lead, 4 oz. silver and 3 grams gold per metric ton, opened by a shallow shaft, but has been idle for some years on account of water.

The San Lucas mine, 19 hectares, about 35 miles N. W. of Gabriel, is an old property claimed to have nearly 2 miles of workings, carrying mainly lead silver ores, and is idle.

The San Pablo mine has parallel veins said to carry 6 to 36″ paystreaks of high-grade ore, giving assays up to 16% copper, 360 oz. silver and 14 grams gold per ton, opened by a 175′ vertical shaft, equipped with headgear and hoist.

Equipment: at the various mines includes steam plants, claimed to be 750 h. p., with 6 hoists and 2 air compressors of 12 drills combined [illegible] Buildings include a machine shop, carpenter shop, smithy, offices, 4 [illegible] and a large number of dwellings for workmen, with a total of 175 [illegible] 3 crushers, 1 jig and 4 Bartlett tables. Concentration [illegible] more satisfactory than leaching.

Inc. Sept. 13, 1906, in New Jersey. **Cap.**, authorized and outstanding $1,000,000 6% cum. pfd. and $500,000 common, reduced from $2,000,000 and $5,000,000 respectively June 24, 1916. Shares: preferred $50; common, $1 par. Preferred stock has preference as to assets and is subject to call at par, and accrued dividends an any dividend date. Stock transferred at company's office. Annual meeting, first Friday after second Tuesday in June at 15 Exchange Place Jersey City, N. J. Fiscal year ends December 31.

Dividends: preferred, 1907, to Oct., 1913, inclusive, 6% per annum; none reported since. Common, none. Preferred payable April and October 1 at 50 Broad St., New York.

Property: 5 claims, 300 acres, covering 3,200' on the main Pinguico vein, near Guanajuato, Gto. **Ore:** silver-gold. **Development:** Pinguico shaft, 80 deep, and the Fortuna, 670' deep, with several miles of underground workings. **Equipment:** includes a 40-stamp mill and a cyanide plant. Capacity under normal conditions, about 8,000 tons per month.

In March, 1920, company was unwatering the Esperanza mine at Santa Ana. K. A. Cunningham in charge.

GUANAJUATO REDUCTION & MINES CO. GUANAJUATO

Address: Columbus, Ohio. Mines and mills at Guanajuato, Gto., Mex.

Officers: C. L. Kurtz, pres., Columbus, Ohio; Wm. G. Moore, v. p. Geo. D. Bounton, v. p.; Philadelphia; C. J. Kurtz, sec.-treas.; with C. J. Schlichter, Wm. D. Sherrerd, Robt. T. Moore, Geo. W. Chase, W. G. Moore, G. D. Bouton and L. O. Bailey, directors. W. G. Wheaton, auditor; H. P. Smith, gen. mgr. at Guanjuato; August McDonald, mill supt.

Inc. 1904, in Colorado, as a consolidation of several silver and gold mines in the Guanajuato district. **Cap.**, $75,000; $1 par. Stock transferred at company's office, Columbus. Empire Trust Co., New York, registrar. Annual meeting, first Tuesday in February, at Colorado Springs, Colo. Listed on New York Curb.

Bonds: authorized $3,000,000; outstanding, $2,800,000, first mortgage 6%, 20-year, $100, $500, and $1,000 gold bonds, dated July 1, 1904, due July 1 1924; interest January 1 and July 1, at office of the trustee, Empire Trust Co., New York.

Bond interest was deferred January 1, 1915, and operations temporarily suspended in August, 1916, due to the revolution in Mexico and also to the inability to secure cyanide and other supplies.

The company was unable to convert its product into cash on account of the Mexican revolution and defaulted, July 1, 1914, interest on its first mortgage 20-year 6% bonds; this interest was paid in January, 1915. On February 1, 1916 interest was paid for the period July 1, 1914 to January 1, 1915.

Comparative Income Account, years ended December 31:

Year	Gross Earnings	Operating Expenses	Net Earnings	Bond Interest	Balance for Year
1917.....	$1,214,145	$1,043,940	$170,205	$168,000	$2,205

(a) Includes deduction of $64,191 for conversion of accounts from 2 to 1 ratio to U. S. currency. (b) Deficit.

Property: a group of famous bonanza silver mines in the Guanajuato

Development: a total of 8,130 meters of new work was done in [illegible] tonnage in any one year. No new large orebodies were found, but profitable ore were favorable.

Operating results for 1918:

Mine	Production, tons	Silver, grams	Gold, grams	Cost	Profit	Reserves, tons
yac—Valenciana	6,187	279.6	2.33	$3.34	$1.17	11,544
avillas—Cata	15,054	233.9	2.81	3.03	0.69	50,913
ado—San Miguel....	30,612	269.0	2.43	2.93	1.54	54,233
ado—Kurtz	18,895	218.1	2.18	....	....	49,575
ado—Rayas	16,169	269.0	3.94	3.69	....	26,055
ado—Garrapata	32,477	200.0	2.99	2.10	1.14	63,818
ips	68,194	158.1	1.40	0.49	1.37	440,400
Totals	187,588					696,538

In addition to the above reserves there is a probable tonnage of 138,022, aging 242 grams of silver and 3.31 grams of gold. The grand total of 834,560 compares with 870,444 tons in 1916, and 772,980 tons in 1917.

Equipment: includes the Bustos 160-ton stamp and concentrating mill Flores cyanide plant. Crushed ore is sent from the mill to the treatment s through 6,000′ of 8″ pipe. A new 200-ton mill with 20 stamps, ball-mill cyanide plant is under construction.

Production, year ending December 31:

	Tonnage	Silver, grams	Gold, grams	Extraction, Silver, %	Extraction, Gold, %	Cost Mining per ton	Cost Milling per ton
...	187,760	209.7	2.29	78.08	80.39	$2.91	$2.10
...	.....	.....	....	.....	.....	....	....
...	64,030	245.7	2.49	80.18	85.35	1.44	1.68

Since April, 1918 mine and mill have been operating full capacity, the first in 5 years. Normal output is 230,000 tons of ore per annum, and with sil- t $1.30 an ounce, company should soon be able to make up for the long period activity.

PRIETARY MINES COMPANY OF AMERICA GUANAJUATO

Office: 25 Broad St., New York; or D. C. Catlin, 60 Broadway, New

Officers: D. C. Catlin, pres.; E. J. Page, v. p.; Chas. E. Pope, 2nd v. p.; . Pope, sec.-treas.; above with Horace E. Parker, Wm. A. Robinson, Jr., dore Dwight and W. B. Cogswell, directors.

Inc. 1907, in Nevada. **Cap.**, $3,000,000; shares $5 par; $2,250,500 issued. **Is:** authorized, $750,000, 6% convertible; outstanding, $703,400. New Trust Company, registrar. Stock transferred at company's office. Annual ng, second Monday in June. Is a holding company, controlling through ownership the Mineral Development Co., the Providencia M. & M. Co. of ajuato, Mexico; and the Carmen Syndicate, which see under Sonora.

Latest financial report available, year ending May 31, 1914, showed assets: rty, $2,249,000; stock, bonds and notes of subsidiary and other companies, 542; accounts receivable, $31,076; cash, $5,427; furniture, $313; accounts organization of company, $132,632; loss and gain $8,700. Liabilities, amount- $3,737,193, include outstanding stock, $2,250,500; outstanding bonds, $703,- stock exchanged for Min. Dev. Co. shares, $6,380; accounts payable, $5,996; ngent, $21,417.

The 1915 annual report contains a reference to necessary "additional financ- when the orebodies of the Nueva Luz mine have been more thoroughly ped and when political conditions in Mexico permit the reopening of the de Dolores mine.

Company has an option on and is developing the Carmen mine in the district of Sonora, with Frank W. Royer in charge. A 25′ vein has opened, 15′ assaying 20 to 35 oz. of silver per ton. Conditions on the 150′ are extremely good.

Inc. Feb. 15, 1916, in Delaware. **Cap.**, $1,000,000; shares $5 par; 100,000 preferred; issued 10,000 preferred, 100,000 common, no bonds. Company organized to take over a deposit of jamesonite—a lead-antimony ore—on one of the properties of the Cortez Associated Mines Co., which see, in Zimapan, Mexico.

Property: 48 hectares, 120 acres patented, Zimapan, State of Hidalgo, Mex., said to show ore carrying jamesonite, consisting of 50.8% lead and 29.5% antimony, and carrying silver. The occurrence is fully described by W. Lindgren and W. L. Whitehead, Econ. Geol., July, 1914, p. 435, and R. W. Raymond, E. & M. Journal, January 2, 1915, p. 9.

Operations were conducted under great difficulties in 1916, but were suspended in April, 1917, due to trouble with bandits and excessive taxation. The great lead-antimony mass does not seem to persist, but a silver-lead-antimony vein was disclosed, which would be valuable were it in the United States.

CORTEZ ASSOCIATED MINES — HIDALGO

Office: 53 State St., Boston, Mass. **Mine office:** Jacala, Hidalgo, Mex.

Officers: Joseph S. Fay, pres.; Olof Wenstrom, v. p.; Freeman Hinckley, sec.-treas.; preceding officers, Wm. F. Ray, Robt. A. Manning and Philip W. Wreen, directors.

Inc. Jan. 3, 1910, in West Virginia. **Cap.**, $1,500,000; shares $3 par, non-assessable; $825,000 issued. Company began business with $275,000 cash, and early in 1919 had about $1,500 cash plus its holdings in the Antimony Corporation. Boston State Safe Deposit & Trust Co., transfer agent. Stock is listed on the Boston Curb. Annual meetings, first Tuesday in March.

The company is primarily a development and holding corporation, formed to explore and develop mining properties until they are ready to produce, and then to promote an operating company.

Property: 1,079 pertenencias, 2,666 acres, in 4 groups, in the districts of Jacala, Zimapan, and Ixmiquilpan, about 20 miles distant. The lands include the entire old mining camp of Jacala.

The Jacala property shows thickly bedded blue limestone intruded by granular monzonite with alteration along the contact and mineralization of the metamorphosed limestone by copper and silver-lead sulphides. The intrusive mass is 1¼ miles long and 700′ wide. The contact zone carries numerous orebodies showing chalcopyrite and magnetite below the 300′ zone of oxidization.

Careful exploration has shown that most of the ore-shoots are low in copper and carry but 1 to 3 oz. in silver. Main development is by the Cortez Level tunnel, which has opened up about 35,000 tons of pyritic ore containing magnetite and chalcopyrite, the average copper contents being 1.72%. Several hundred thousand tons may possibly be developed here, and as the ore contains 35% iron, it will be valuable for a flux.

The Humboldt, Cortez, Abeja and Santa Maria show promise of making producing mines. The Humboldt has a magnetite-garnet outcrop, explored by the 1,304′ Humboldt tunnel with drifts and a 130′ incline winze, mostly in ore. The Santa Maria 394′ shaft has developed a body of soft, leached copper-bearing gossan of 6,000 sq. ft. area. This shaft will connect with the Humboldt tunnel.

Small replacement deposits of silver-lead ore in limestone also occur at Jacala, but the Carmen mine is the only one of promise. This well-known producer, 1½ miles north of Jacala, yielded 40 oz. silver-lead ore for many years. The mine workings are on the contact between limestone and porphyry and developed a replacement chimney of silver-lead ore in limestone, worked by an incline shaft to a depth of 900′. The company's new work has not yet cut the downward continuation of this ore shoot.

The San Nicholas group includes the Soledad and Ensino Largo mines.

Zimapan lies in a broad, arid valley with the 4,000′ deep Mocteruma canyon 9 miles west and the 3,000′ deep Toliman canyon 6 miles west. The mines are in the Toliman canyon and on the ridge between it and the Mocteruma. The ore deposits lie around a large intrusion of monzonite porphyry and are contact deposits carrying copper, or silver-lead deposits in the surrounding limestone, especially along fissures and intrusive dikes. The latter form pipes or chimneys, either vertical or inclined. The copper properties at this place [illegible]

actically undeveloped, but a contact deposit showing disseminated copper pyrite, ıc blende and galena, promises to develop a large tonnage.

The Sirena lead-antimony mine lies 9 miles north of Zimapan. Ore occurs a replacement deposit, in Cretaceous limestone, cut by a porphyry dike, and parently follows the bedding of the limestone, dipping about 40° S. The ore massive and consists of pyrrhotite, arsenopyrite, blende and jamesonite, form- an orebody 700′ long and 30′ thick.

In 1916, the company sold its Sirena property to the Antimony Corporation.

The mines have been closed down since 1913, owing to revolutionary dis- rbances, during which period all supplies were stolen and machinery destroyed. ıxation became very onerous, and company will have to be reorganized before erations can be resumed.

RANADENA MINING CO. **HIDALGO**

Closed down by revolution. Mine at Santa Barbara, Hidalgo, Mex., pro- ces silver-lead ore with a small amount of copper. Fully described Vol. X.

IDALGO COPPER MINING & SMELTING CO. **HIDALGO**

Office: Avenida 16 de Septiembre No. 26, Mexico D. F. **Mine and rks office:** Zimapan, Hidalgo, Mexico.

Officers: Sydney Ludlow pres.; Ricardo T. Sobey, v. p.; R. A. Mills, .; Hedley Ludlow, treas.; preceding, with George A. Camphuis and W. H. mstrong, directors; Hedley Ludlow, gen. mgr.; Jas. H. Armstrong, supt.; nio Lopez, engr.; Halarion Diaz, chemist.

Inc. Aug. 14, 1907, in Arizona. **Cap.**, $2,000,000; shares $10 par, in 000,000 preferred and $1,000,000 common stock. Annual meeting, third Mon- in August.

Property: 44 mines, 500 acres, with a 500-acre millsite, said to carry per ores, with small amounts of lead ore. Lands show monzonite-porphyry l limestone, with contact ore deposits. Copper ores are estimated by the npany to average 2.8% copper and 800 grams silver per ton. The mines yield reat variety of ores, including oxides and carbonates, and sulphides of lead copper.

Development: by shafts and tunnels, with a total of 3,000 meters of kings, estimated to show 50,000 tons of ore, with 20,000 tons blocked out for ning.

Equipment: includes a small steam plant and 16 buildings. Company loyed about 800 men at the mines and works when operating.

The 50-ton smelter, at Zimapan, 5 miles from the mine, received ore by pack- n. Copper is smelted to a 20% matte that is sent to the Aguascalientes lter. The lead smelter was run after many years' idleness, in 1913, on ore n Nevada group of mines, averaging 25% lead and 900 grams silver. Com- y planned installing oil engines and electric light, etc., at smelter in 1917. bably closed down, owing to disturbed conditions in Mexico. No recent rns secured.

CHUCA; COMPANIA BENEFICIADORA DE **HIDALGO**

*52.7% of capacity in 1915; 56.6% in 1916; 53.2% in 1917; 80.7% in 1918; 0.2% in 1919; and 98.3% by July, 1919. The low capacity was due to the revolution in Mexico, which caused a loss of at least $1,500,000 in possible profit.

From January, 1910, to June, 1919, inclusive, the total output was 30,709,871 . of silver and 163,930 oz. of gold from 2,215,399 tons of ore. The average ade was 13.9 oz. silver and 1.48 dwt. gold per ton.

The Santa Gertrudis management has anticipated the depletion of its mine buying another to take its place, and with its 1,500-ton mill working at full pacity, and present high prices for silver, good dividends should be earned.

November, 1919, through The Mexican Corporation, Ltd., which see, company quired a 25-year lease on property of the Teziutlan Copper Mining & Smelting . The mines, 500-ton mill, power-plants and smelter, are in the State of axaca. Prior to 1913, when the revolution prevented operation, the annual tput was 7,000,000 lb. of copper, with a fair quantity of silver and gold. There re 2,500 men employed. Control was also obtained on the Fresnillo Mining ., which has a mine in Zacatecas.

STATE OF JALISCO

;UILA CONSOLIDATED MINING CO. JALISCO

Address: 185 Summer St., Boston, Mass.

Officers: D. E. Makepeace, pres., Attleboro, Mass.; E. B. Estes, sec.; A. Floyd, treas.

Inc. 1917, in Arizona. **Cap.**, $1,200,000; shares $1 par. Company is a re-anization of the Aguila Amalgamated Mining Co., described Volume XI, which succeeded the Mazeppa Cons. Mining Co. Stockholders in the old npany were given the option of exchanging their holdings on a basis of 1 re of new for each 5 shares of old and payment of 4c. per share of new stock.

Property: near Cinco Minas, said to have one-half mile of workings and how ore assaying from $100 to $160 per ton, mainly in gold and silver. Mine ow operated by W. S. King, under a 5-year lease.

AJAC MINES CO. JALISCO

Address: Guadalajara, Mexico.

Officers: W. L. Barclay, pres.; J. I. Higbee, v. p.; W. J. Pentland, gen. ; C. A. Sidler, sec.-treas.

Inc. Dec. 16, 1910, in Delaware. **Cap.**, $2,500,000; shares $1 par. Com- was formed for purpose of purchasing the Refugio, Animas, and Tres [illegible] mines in the Hostotipaquillo district. Later an option was taken on the [illegible] and Mexicano mines.

[illegible]ty: the Refugio mine, 125 acres, was worked for 25 years prior to [illegible] by present owners, down to the 500' level. The main vein has a [illegible]5' with well-defined walls. Ore contains gold and silver with [illegible]alue of $15.00 per ton. The Animas property, 144 acres, lies west [illegible]d is apparently on the same vein. The ore is said to contain [illegible]nd $3 to $5 gold per ton.

[illegible] both mines is by means of tunnels, the Animas having [illegible]ga. The Tres Estrellas property, 120 acres, is a mile from [illegible] been developed at depth.

Equipment: includes a 15-stamp mill and a 50-ton cyanide plant in course of construction. Hydro-electric power is used. The revolution in Mexico has interfered with operations, and the mines have only been worked intermittently since 1914. In 1919, the manager wrote that a strong effort was being made to complete the mill during that year.

AMPARO MINING CO. JALISCO

Office: 541 Drexel Bldg., Philadelphia, Pa. **Mine office:** Etzatlan, Jalisco, Mexico.

Officers: A. F. Bracher, pres.; W. H. Kister, and A. S. Miller, v. p.'s; Henry Freund, treas., with J. H. Stopp, F. W. Stanton, Alfred Gratz, G. B. Reimensnyder, J. H. Scott, L. H. Adler, Jr., and C. K. Smith, Jr., directors. J. S. Williams, sec.; J. H. Howard, gen. mgr.; W. Howard, asst. mgr.; C. F. Joyce, mine supt.; W. R. Askew, engineer.

Inc. 1902. **Cap.**, $2,000,000; shares $1 par; reduced from $3,000,000 in 1907.

Financial Statement, years ending December 31:

Year	Revenue	Net Profit	Dividends	Balance	Current Assets	Current Liabilities
1918....	$1,707,197	$308,595	$300,000	$8,595	$1,470,256	$174,710
1917....	1,220,964	178,065	320,000	.....	1,293,455	517,850
1916....	1,297,236	456,970	400,000	56,970	1,377,538	428,056

Dividends: the total is not available, but for the last 3 years amounts to $1,020,000. One of 5% was paid in November, 1919.

Property: includes the Canada, La Union, San Juan, Amparo, San Domingo and Natividad mines, and Rancho Embocado of 4,390 pertenencias, 7 to 9 miles S. of Etzatlan, State of Jalisco.

Development: by general shaft to depth of 1,300'; also has an auxiliary shaft. New work in 1916 totaled 10,501'; 9,806' in 1917; and 13,690' in 1918. The orebody at 1,100' was good, but the shoot was very spotty on 1,300' level. In 1918 further discoveries of good ore were made, and a large tonnage of probable ore developed.

Ore reserves: of positive, probable and prospective ore have varied from 750,000 tons in 1908, to 472,350 in 1916; 481,572 in 1917; and 481,000 in 1918, only there is an increase in positive ore. Shrinkage stoping is practiced, resulting in reduction of costs.

Equipment: electrically driven throughout, including hoists, compressors, 65 drills, underground hoists, pumps, sorting plant, aerial tram, telephone line, crushers, 50 stamps, 4 tube-mills, concentrators, Dorr classifiers, Pachuca tanks, and 3 Oliver filters; also a ranch and hospital.

Production: 50,000 tons in 1908; 63,398 in 1909; 68,217 in 1910; 73,783 in 1911; 92,365 in 1912; 104,330 in 1913; 87,320 in 1914; 114,166 in 1915; 99,040 in 1916; 84,277 in 1917; and 120,046 in 1918. Recent work is given below:

Year	Tonnage	Silver, grams per ton	Gold, grams per ton	Extraction,%	Total Cost
1918.....	120,026	315.7	7.90	89.30	$18.85
1917.....	84,277	326.0	7.93	87.84	19.70
1916.....	99,040	320.0	9.95	91.10	—
1915.....	114,166	310.0	7.60	.....	—

CINCO MINAS CO. JALISCO

Offices: 61 Broadway, New York; and 1026 Citizens National Bank, Los Angeles, California.

Officers: James W. Gerard, pres.; Marcus Daly, v. p.-treas.; T. D. McCarthy, sec., with Mrs. J. W. Gerard, and H. E. Crawford, mgr. Geo. F. Zoffman, supt.

Inc. March, 1910. **Cap.**, $500,000; $100 par; all issued. Transfer office, 61 Broadway, New York.

Property: in the Hostotipaquillo district of Jalisco. Examined by A. B. Farish.

Geology: deposit is a fissure vein with andesite hanging and dacite footwall; it is 10 to 40′ wide, dips 65° S.-W., and has a N. 45° W. course. Ore shoots are 500 and 250′ long by 25 and 20′ wide. Ore is a sulphide assaying 12 oz. silver and $2 gold per ton.

Development: by 900′ vertical shaft and 1,000′ of tunnels. Workings aggregate 35,600′. Reserves are estimated as 500,000 tons. Mining is by overhand stoping and back filling.

Equipment: electric power, 500-h. p. hoist, compressor, pump, tram, and 600-ton cyanide mill.

No production figures are obtainable, but mine and mill are operated to full capacity, and little time was lost by the revolution.

EL FAVOR MINING CO. **JALISCO**

Offices: Makeever Bros., Journal Bldg., Boston, Mass., and 170 Broadway, New York. Mine at El Monte, Hostotipaquillo district, Jalisco, Mex.

Officers: Sanford Makeever, pres.; Dr. H. D. Meredith, v. p.; J. L. Makeever, treas.; M. M. Makeever, sec.; Walter Neal, gen. mgr.; J. H. Nelson, supt.; J. G. Murphy, cons. engr.

Inc. July, 1906, in Arizona; protocolized, 1906, in Mexico. **Cap.**, $3,500,000; shares $1 par. Stock not listed. After 6 years of development work, mine paid total dividends of $210,000 in 1913-1914. Property said to represent investment of $1,000,000.

Property: 476 acres mineral land and extensive surface areas at El Monte, 75 miles N. W. of Guadalajara, Jalisco, Mex. A branch line of the Southern Pacific R. R. runs to Quemada, near the mine, and the Chapala Hydro-Electric Co. furnishes power for $50 per h. p. year. Vein reported as 10′ to 14′ thick with shoots of bonanza silver-gold ore workable to 1,300′ by tunnels.

Development: by over 3 miles of workings to No. 7, the deepest, level. In May, 1919, a new orebody assaying $140.80 in silver, free from manganese, was opened on No. 7, also on No. 3; while rich ore was found on No. 5. These discoveries are considered to be of great importance. Reserves are said to be sufficient to supply mill for several years.

Equipment: includes 250-ton cyanide mill, equipped with 35 stamps, crusher, tube-mills, Dorr classifiers and thickeners, Oliver filters, pachuca tanks, Wilfley tables. Extraction claimed to be nearly 90%. Total production to date reported as $1,500,000.

Mill buildings, burned by bandits in 1918, were rebuilt; and in September, 1919, daily output was 55 tons of $12 ore. Capacity of mill is to be increased.

KEYSTONE MINING CO. **JALISCO**

Office: at last report at Shamokin, Penn. Is a reorganization of Keystone Copper Smelter Co., of Philadelphia, and is the holding company for the Mexicana Co., Tapalpa district, Jalisco, Mexico. W. H. Childs, gen. mgr.

Property: about 100 hectares, in 5 groups, in Tapalpa, including the Mexicana, America and Palma groups; also timber rights to 50,000 acres of adjoining lands. Principal development is on La Mexicana group, 82 hectares, 15 miles west of Tapalpa, mine having a 200-metre crosscut tunnel, cutting 4 veins, with about 1 mile of workings. Veins are fissures in porphyry, averaging 5′ width, carrying auriferous and argentiferous chalcopyrite, sphalerite and pyrite.

Equipment: includes steam and electric power and 30-ton mill. The entire plant was enlarged and remodeled and resumed operations in January, 1912. Presumably idle, 1915-19, owing to unsettled conditions in Mexico.

LA REGINA MINING CO. **JALISCO**

Office: 2120 W. Tioga St., Philadelphia, Pa. **Mine office:** San Martin [illegible], Jalisco, Mexico.

Officers: Chester P. Ray, pres.; F. W. Schmidt, v. p.; A. W. Brack[illegible] sec.-treas.; M. J. Slattery, gen. mgr.; John P. Delaney, supt.

Inc. Nov. 1, 1909. **Cap.**, $1,000,000; shares $1 par, as successor of [illegible] Copper & Gold Mining & Smelting Co. **Debentures**, $200,000 author[illegible]

[illegible] La Perla, La Fe, La [illegible], carrying auriferous

and slightly argentiferous chalcopyrite. The Ajax mine shows a 12′ vein estimated to average 4% copper, 2 oz. silver and $1.33 gold per ton.

Development: property as a whole has 8 shafts, of 100′ average depth, with a total of about 1,000′ of workings, claimed to put in sight 125,000 tons of auriferous copper ore. Development in recent years has been confined to the gold-silver vein, said to show at depth of 115′, ore averaging 2 oz. silver and 15 grams gold per ton.

Equipment: includes a steam hoist and air compressor, at the San Vicente group. The mill has a 25-ton Elspass mill, 25-ton experimental cyanide plant, Huntington mill and 3 Pachuca tanks. Idle on account of political disturbances in Mexico.

MAGISTRAL-AMECA COPPER CO. JALISCO

Mine office: Ameca, Jalisco, Mexico.

Officers: H. L. Percy, pres.; Fred M. Lyon, v. p.; Geo. C. B. Robinson, sec.-treas.; Jas. P. Harvey, gen. mgr., and H. N. Manington, directors; Percy A. Babb, cons. engr.

Inc. May 20, 1909, in Arizona. **Cap.,** $1,500,000; $1 par; issued, 1,250,000 shares. Holds direct title to lands through Magistral-Ameca Copper Co., S. A. inc. in Mexico. Annual meeting, second Wednesday in November.

Property bought of Las Moras Copper Mining Co., for $100,000 by Patrick Clark, Jas. P. Harvey, H. L. Percy and Fred M. Lyon, the first named selling his quarter interest to his associates for $55,000.

Property: 74 pertenencias, 185 acres, known as the Mina Magistral in the Hacienda Hegira, 8 miles S. W. of Ameca, has veins in diorite that are cut by porphyry dikes. The veins occur on dike contacts and show outcrops of silicified rock with quartz stringers and hematite. The vein varies from 4 to 25′ in thickness and carries lenticular orebodies connected by mere films of quartz or fissures with wall rock impregnated with chalcopyrite. The Magistral ore shoot occurs where 3 veins intersect. The ore carries copper sulphides (chalcopyrite), and averages from 4 to 7% in copper with about $2 in combined gold and silver value.

Development: by 321′ shaft, and by tunnels with about 1 mile of openings, developing copper ground for width of 5 to 50′, said to assay 4 to 7% copper. The Magistral was worked many years ago for bluestone, used by neighboring mines in the process of treating silver-lead ores.

Equipment: includes two 80-h. p. high-pressure boilers and a 150-h. p. tandem compound engine, with hoist good for 500′, at the Magistral. The mines are connected with Ameca by a good wagon-road, 8 miles long, with a 1½% grade, built with the idea of using it for railway tracks in the future. About 100 men are employed. The concentrator was re-built in 1914. It includes a ball-mill and flotation plants.

Owing to disturbed conditions in Mexico, operations have been greatly interfered with. No recent returns securable, but it was reported in March, 1918, that work had been resumed, treating 100 tons daily. Letters to previous address in Los Angeles returned in March, 1919.

MASCOTA COPPER CO. JALISCO

Supposedly dead. **Mine office:** Ameca, Jalisco, Mexico.

Officers: Chris D. O'Brien, Sr., pres.; J. M. Bowler, v. p.; Byron J. Mosier, sec.-treas.; Chris D. O'Brien, Jr., gen. mgr., at last accounts.

Inc. June, 1908, in Arizona, as successor of Independence Mining & Smelting Co. **Cap.,** $1,500,000; shares $1 par.

Lands: 46 hectares, said to include an antigua mine, in the Guanango division of the Mascota district, 24 miles from the Mexican Central line. The claims show an 8′ fissure vein in porphyry, said to be traceable about 2,000′ and proved to depth of 486′. The ore is reported to average 5% copper, 7 oz. silver and 6 grams gold per ton.

Development: includes 300′ shaft and 375′ tunnel, with 4,825′ of workings, estimated to show 40,000 tons of ore, with 28,000 tons blocked out for stoping.

Equipment: included 50-h. p. steam plant, with 3-drill air-compressor

5-ton wooden stamp-mill, with 10 Allis-Chalmers gravity stamps, and a small centrator, equipped with 2 Overstrom tables, a vanner, 4 slime tables and a r. Operations suspended for several years on account of revolution.

EXICANA MINING CO. **JALISCO**

Is the operating subsidiary company of the Keystone Mng. Co., of Shamokin, which see.

)LOLOA MINING CO., LTD. **JALISCO**

Controlled by Makeever Bros. of Boston, Mass.

Address: Hostotipaquillo, Jalisco, Mexico.

Officers: W. G. Miller,, pres.; F. G. Stevens, managing director; W. Mathews, treas. and gen. mgr.; Edward Fenley, supt., at last accounts.

Inc. 1908, in Canada. **Cap.,** $250,000.

Property: 130 hectares, include antiguas opened by the Spaniards in 16th century, reopened in 1904. Several fissure veins in andesite carrying d-silver ore were worked in 1914, and shipments made to the El Favor mill.

Development: by Mololoa tunnel to depth of 800. In 1919 the Soledad ot of the Mololoa mine was said to show silver ore which, on No. 6 level, ond the fault, was 12′ wide and assayed $38.50 per ton. The ore carries so e manganese that cyanidation will extract 85% of the silver.

N FELIPE MINING CO. **JALISCO**

Address: Hostotipaquillo, Jalisco, Mexico. Col. N. Z. Seitz, pres. and mgr.

Inc. 1902, in Arizona. **Cap.,** $1,000,000; shares $1 par.

Property: includes a 50-ton mill. The company is said to have paid dends from stock sales and was considered by Horace J. Stevens as a rank of stockjobbery. Probably defunct.

MEXICO, D. F.

S ESTRELLAS, COMPANIA **MEXICO, D. F.**

Address: El Oro, Mexico.

Property: a large gold-silver mine and extensive equipment adjacent El Oro and Esperanza. No information procurable.

ORO MINING & RAILWAY CO., LTD. **MEXICO, D. F.**

Offices: T. Dundas Pillans, sec., 24 Lombard St., London, E. C. 3, Eng-; 61 Broadway, New York.

Directors: R. T. Bayliss, chairman; H. V. Hart-Davis, Alfred Naylor, Breitmeyer, P. L. Foster, J. H. M. Shaw, R. M. Raymond. **Staff:** A. F. n, gen. mgr.; F. Jenkin, asst. mgr., El Oro, D. F., Mexico.

Inc. July 27, 1899, in Great Britain, to acquire the capital stock of the erican Mng. Co. and the American Railroad & Lumber Co., the former ing the El Oro Gold & Silver mine in the El Oro district of Mexico, the latter owning the railroad connecting the mine with the Mexican onal Ry. Purchase price was £886,072; paid £820,084 in cash and ,988 in stock. The two American companies have since been dissolved. ., £1,150,000; outstanding shares £1 par. £1,147,500 issued. Annual ing in October. Listed on London Stock Exchange.

Accounts for fiscal years ending June 30:

	Bullion Recovered	Railway Receipts	Deprec.	Loss on Exch.	Deprec. of Invest's	Profit
..	£75,541	£7,944	£25,000	£20,444	£21,343	£78,398*
..	415,436	35,497	25,000	23,242	.....	103,690

* Deficit.

No statement of accounts has been rendered since the above.

Dividends: 148% from 1900 to 1913; 1913-'14 to 1915-'16, nil; 1916-'17, 1917-'18, 5%; 1918-'19, 5%, October 31, 1919. The total is £1,955,750.

The El Oro Mng. & Ry. Co., Ltd., owns 42,687 shares (par £1), and £14,000

7% debentures of the Suchi Timber Co., Ltd., which declared a dividend of 5% on June 30, 1913.

Property: the San Antonio, San Rafael, Trianon, Diamante, Ofir, and Carmen No. 2 claims, 786 acres, at El Oro, 100 miles northwest of Mexico City. In 1912-1913, the adjoining Ofir claim, 11⅛ acres, was bought for £130,000 cash. This claim controls the rights of the San Rafael vein in depth. Ore is gold bearing. Orebodies vary in width from 10′ to 60′.

Development: by shafts from 1,500′ to 1,600′ deep. **Equipment:** includes a 200-stamp mill, 8 tube-mills and a cyanide plant. Mine and mill operations were resumed October, 1916, with 100 stamps and 70 were in operation at last accounts.

Production for years ending June 30:

Year	Tons Milled	Value	Costs	Profit	Yield
1913	433,708	$5.04	$3.59	$1.45	$2,188,723
1912	387,157	5.75	3.79	1.96	2,228,190
1911	360,294	6.63	3.90	2.73	2,389,340
1910	316,138	8.10	5.17	2.93	2,562,705
1909	285,181	8.56	5.42	3.14	2,442,374

No later information is available, save that at the end of 1918 the monthly output was 30,000 tons of ore, and that costs were $7 per ton. The usual annual reports are being withheld on account of the political situation.

ESPERANZA, LTD. **MEXICO, D. F.**

Office: C. L. Johnson, sec., No. 1 London Wall Bldgs., London, E. C. 2, England. **Office of American company:** E. L. Gruver, pres., care Hayden Stone & Co., 25 Broad St., New York City.

Directors: R. J. Frecheville, chairman; F. W. Baker, Sir F. M. Crisp, A. A. Kelsey, Charles Hoyle, gen. mgr.; E. Ph. Herivel, asst. mgr.

Reg. Oct. 6, 1913, in Great Britain. **Cap.,** £455,000; shares £1 par; all issued and credited, except seven, as fully paid. Acquired by agreement with the Guggenheim Exploration Co., and the Venture Corporation, Ltd., 449,800 shares of $5 each, all the capital except 200 shares, in the Esperanza Mng. Co. of New York, inc. in New Jersey, and owning gold and silver mines covering 390 acres, adjoining the El Oro mine at El Oro, Mexico. Purchase price was £454,993 in fully paid shares.

Financial Statement, years ending December 31:

)16...	892,085	702,234	.....	+189,851	56,250	301,732

Property: 6 patented claims, 390 acres, adjoining El Oro mine, at El ro, shows fissure veins in shale, cut by andesite intrusions. The dip is 70° the S. W., and course N. 45° W. The ore shoots are from 50 to 150′ long, id from 2 to 100′ thick.

The San Rafael vein is traceable for 10,000′ through El Oro district, but is it by many transverse faults which displace the orebodies. The Esperanza in fills a fault that has a displacement of 500′. The San Rafael vein fills a ult fissure whose displacement is approximately 1,000′ vertical. This vein irrows at depth of 2,000′ in the Esperanza mine and extends for 2,500′ through e property, with 7 payable branch veins.

Company has under option and made first payment on the Union en Cuale ines, near Banderos bay, 25 miles from Las Pinas, Jalisco. The property shows ry large and persistent veins of zinc ore carrying silver and gold, as well as id ore. These veins were worked until 1893 for the silver only, two of the ines yielding about 6,000,000 ounces up to that date.

If the Esperanza completes payment, and spends approximately $2,000,000 equipment, development, etc., the mines should produce 2,000 tons of ore daily.

Development: at El Oro, by vertical shafts, 1,600, 1,000, and 400′ deep. d a 1,000′ tunnel for tramming. Deep work on the San Rafael and San rlos veins showed that the limit of pay ore had been reached.

Recent work shows the following results:

ar	Feet	Total, feet	Reserves, tons	Profit in reserves
18.....	4,817	183,637	35,131*	£19,322
17.....	9,908	178,820	65,368	39,727
16.....	8,900	168,912	111,723	.....

* Plus 50,000 to 100,000 tons of payable fills.

Equipment: electric power, 400-h. p. hoist, and cyanide mill, using 120 mps and 14 tube-mills of 1,000 tons daily capacity. The stamps are being placed by ball-mills.

Production: ar	Tons Milled	Value per Ton	Year	Milled Tons	per Ton Value
18.....	200,589	$9.88	1916.....	113,921	$6.67
17.....	200,548	10.00	1915.....	22,684	.....

During most of the years, 1914 and 1915, revolutionary disturbances prevented work, production being 143,670 tons ore, yielding $1,180,184. Operations were suspended from February 25, 1915, until April 23, 1916.

Extraction in 1918 was 86.43% of the gold and 68.25% of the silver. To end of 1918 the total output was $78,003,993 (Mexican gold currency) from 2,82[illegible] tons ore.

MEXICO MINES OF EL ORO, LTD. MEXICO, D. F.

Officers: 2 St. Helen's Place, London, E. C. 3, England; and 18 Rue Chaveau-Lagarde, Paris, France.

Directors: Sir E. M. Clarke, Don Guillermo de Landa y Escandon, F. J. Fournier, H. Higgins, and Sir R. J. Price, F. L. Allan, resident manager, El Oro, Mexico; J. Vincent, asst. mgr.; C. R. Pinder, cons. engr.

Reg. Oct. 14, 1904, in England. **Cap.,** £210,000 shares £1 par; increased from £180,000 in July, 1914; 180,000 shares issued and fully paid; [illegible] to be issued for acquisition of the Nolan properties.

Financial statement for year ending June 30, 1916, showed that owing to suspension of operations due to the revolution, there was a loss of £21,855. Balance forward on June 30, 1916, was £59,073, compared with £91,127 the previous year. For 1917 there was a profit of £271,174, of which £115,500 was distributed. Balance forward was £214,747. Assets exceeded liabilities by about £295,000. For 1918 the profit was £264,606. Dividends absorbed £199,500, and £179,465 was carried forward. In 1919 the profit was £196,222, of which £189,000 was paid in dividends.

Dividends, including bonuses:

Property: company was formed to acquire by agreement with the Exploration Co., Ltd., 26.63 hectares (65.79 acres), total with surface rights, 75 acres, adjoining the Esperanza mine, near El Oro, Mexico. The land, formerly held by the Mexico Venture Syndicate, Ltd., includes the Mexico gold and silver mine. The properties of the Compania Miniera de Oro Nolan were acquired in January, 1915, for 30,000 fully paid shares. The ore is gold and silver bearing, occurring in fissure veins.

Development: by the North shaft 1,574' deep, and the South shaft, 1,467'.

Ore reserves: on June 30, 1917, were estimated at 457,100 tons, $11.89 gold, and 8 oz. silver; while in 1918 they were 416,200 tons, and 379,000 tons in 1919.

Equipment: includes a 40-stamp mill, 7 tube mills, and a cyanide plant.

This famous and efficiently managed property appears to have passed the zenith of its career and to have become a liquidating asset.

STATE OF MICHOACAN

RIO COPPER CO. **MICHOACÁN**

Idle owing to political disturbances in Mexico. **Mine office:** Ario de osales, Ario, Michoacán, Mexico.

Officers: Frederick Moser, pres.; Geo. H. Walsh, Jr., treas.; A. P. tramler, supt.

Cap., $2,000,000; shares $10 par. Holds lands through Ario Copper Co., . A. **Inc.** April 13, 1907, in Mexico. **Cap.,** 500,000 pesos.

Property: 126 hectares, including the Flora, Roma, Bohemia, San Anonio and San Valentin mines, old properties showing silver and copper ores, bout 5 miles from the Inguaran mines, on the projected line of the Morelia y 'acambaro railway, partly constructed.

Development: principal work is on the Flora and Bohemia mines, with shafts aggregating 500′ depth, and 12 tunnels, aggregating 2,600′ length. La loma has ore assaying up to 25% copper. Equipment includes steam and gasone power. Patzcuaro, 70 miles distant, is the nearest railway point.

NGUARAN; COMPAGNIE D'. **MICHOACÁN**

Office: 56 Rue de Provence, Paris, France. **Mine office:** Inguarán. Ario, lichoacán, Mex. Ch. Laforgue, gen. mgr.; Maurice Armand de Lille, agt.; . L. Phillips, supt.

Inc. Jan. 15, 1898, in France. **Cap.,** 12,000,000 francs, shares 500 francs ar. Is controlled jointly by the French house of Rothschild and the Banque lirabaud; a considerable portion of the company's stock is owned by the Comanie du Boleo. Property is said to have cost 1,500,000 pesos, and company eported to have expended about $8,000,000 thereon, which is undoubtedly an verestimate.

Property: 185 hectares, and a mineral zone of 5,000 additional hectares, n the Tacambaro district 70 miles north of the Balsas river, Michoacán, lying n the plateau of the volcano Jorullo, 1,500′ above the plains.

Geology: the Inguarán mountain is traversed by a dike 2,000 to 3,000′ ide, of fine-grained pink granite, traceable several miles across country. The ranite rock is sprinkled with specks of chalcocite and chalcopyrite forming a isseminated, or so-called porphyry deposit whose payable ores occur in belts or ands in the dike. Proved depth of the ore is about 300 meters, at which point apparently cuts off.

Development: by a 2,500′ tunnel and 2 main shafts, deepest 350, with evels opened at 80′ intervals. Both ore and country rock are exceedingly firm, ttle timbering being required. Estimates of size and value of the orebodies ary greatly, but the best authorities estimate an average of 3.25% copper, with ,000,000 to 3,000,000 metric tons of ore blocked out. The ore is not well adapted o wet concentration as the metallic sulphides are firmly interlocked with the ranite minerals, but it is admirably adapted to treatment by froth flotation, and pparently could be put about 8 or 10 into 1.

The Inguarán was the particular bugaboo of the copper situation at the end f the nineteenth century, the exigencies of the buyer's demanding that there lways be some mine, just about to begin production, that can make several undred million pounds of copper yearly at a merely nominal cost. The Inguarán as a large body of low-grade ore, but it is not equal in quantity or quality to at of any of our "porphyry coppers."

The property has been idle some years and cannot become a serious producer ntil rail connections are secured.

ICHOACAN RAILWAY & MINING CO., LTD. **MICHOACÁN**

Address: G. A. Mitchell & Co., secretaries, 2 Suffolk Lane, Cannon St., ondon, E. C. 4, England. **Mine office:** Angangueo, Michoacán, Mexico. **Vorks office:** Ocampo, Zitacuaro, Michoacán, Mexico.

Directors: G. A. Mitchell, chairman; C. H. Potter, W. J. H. Moll, and . R. Scott.

Inc. Jan. 29, 1889, in Great Britain. **Cap.,** £105,364; £1 par; in £21,015

assessable. Debentures, $1,000,000 at 6%. Owns a 72% stock interest in the Cia. Minera Explotadora El Magistral y Anexas, and also sundry lands acquired from the Bankers Mining & Development Co.

Property in the Magistral district shows contact deposits between limestone and diorite. The deeper workings show chalcopyrite associated with hematite having garnetiferous quartz gangue in the sulphide zone.

Due to the revolution the property has not been operated since 1913.

TEZIUTLAN COPPER CO. **PUEBLA**

Inc. in New Jersey. Cap., $1,000,000; shares $100 par. Entire stock issue owned by Teziutlán Copper Mining & Smelting Co. Fully described Vol. V, Copper Handbook.

TEZIUTLAN COPPER MNG. & SM. CO. **PUEBLA**

Office: 82 Beaver St., New York. R. E. Safford, sec.

Property leased for 25 years to The Mexican Corporation, Ltd. (which see), company receiving 37½ per cent. of the net profit of operations. See Vol. XIII for details of organization.

STATE OF SAN LUIS POTOSI

DOLORES MINE **SAN LUIS POTOSI**

Address: American Smelting & Refining Co., Matehuala, San Luis Potosi, Mexico.

Geology: ore occurs as contact deposits in limestone and porphyry. The shoots are large for this type, one being 300′ long, 70″ thick, and 300′ deep. The contact rock contains pyrite and chalcopyrite, and averages 3% copper, $1.50 gold and 2 oz. silver per ton, with 40% silica.

Development: by 326′ shaft and crosscut adits. Underground work is done on contract.

Equipment: is driven by power from the Matehuala smelter, 8 miles distant. Mine has 25-drill air-compressor, side-dump steel cars, machine-shop, assay-office and hospital, and employs 700 Mexicans.

Production: averages 500 tons daily, but can be increased to 1,000 tons.

MATEHUALA SMELTER **SAN LUIS POTOSI**

Owned by American Smelting & Refining Co.

Address: 120 Broadway, New York; and Matehuala, San Luis Potosi, Mexico.

Company operates a smelter, acquired in 1910 from National Metallurgical Co., drawing ores from the nearby mines of La Paz and Catorce.

The smelter on the Mexican Central railway, has a complete plant including jaw-crusher, sampler, ore-bedding plant, 4 hand-fed blast-furnaces, total capacity of 400,000 tons annually, 3 cycloidal blowers giving 24-oz. blast pressure driven by 180 and 200-h. p. steam engines, 5 boilers, forehearths, slag-cars, electric locos for slag dump, generators, machine-shops, and 30-ton reverberatory furnace for smelting flue-dust. The plant turns out a matte averaging 45% copper and 42% sulphur, which is sent to the Aguascalientes smelter for conversion. The smelter was idle in 1916, but was blown-in early in 1917, and operated continuously since then.

NATIONAL METALLURGICAL CO. **SAN LUIS POTOSI**

Smelter was acquired 1910, by A. S. & R. Co., which see.

SANTA MARIA DE LA PAZ Y ANEXAS; NEGOC. MIN. DE

Office: Avenida Uruguay 70, Mexico City, Mexico.

Officers: José de Caso, pres.; Vincente Etchegaray, Deogracias Adolfo Prieto, Baltoasar Marquez, Jose Sainz, and Eusebio Gomez Allende, assistant presidents; Manuel F. Garrido, mgr. and cons. engr.; Geoffrey M. Watneys, managing director.

Inc. in Mexico, in 1864. Reincorporated March 29, 1917, and capitalization changed from 240,000 pesos to 625,000 pesos; 25 pesos par. Listed on Mexico City Exchange.

Net profit in 1918 was 947,377 pesos. Monthly expenses are 125,000 pe-

Dividends: from 1895 to 1904, inclusive, 5,778,270 pesos. A distribution 2 pesos per share is paid monthly besides extras, the total being from 30 to 35 os per annum.

Property: 282 hectares in the Matehuala district of San Luis Potosi. : mines are opened to depth of 1,500'. The ore, which is a hard quartz with ite, occurs in fissures along porphyry dikes, averaging 32 oz. silver per ton.

Equipment: steam, air, and electric power, with total capacity of 2,500-). The 300-ton concentrating mill and 80-ton smelter are idle as ore is sent smelters at Matehuala and Monterrey.

Production: in 1918, 54,267 kg. (1,728,000 oz.) of silver. Monthly out- is 6,000 kg., to be increased in 1920 to 8,000 kg. There are 1,600 men employed.

RO GENERAL; CIA. MINERA DEL SAN LUIS POTOSI

Sold property to the Cia. Metalurgica Nacional de Matehuala, San Luis osi, Mex., which is controlled by the American Smelting & Refining Co.

RO GENERAL De CHARCAS MINE SAN LUIS POTOSI

Mine address: Charcas, San Luis Potosi, Mexico. Owned by Cia. Metal- ica Nacional de Matehuala, controlled by the American Smelting & Refining Mine was formerly owned by the Cia. Minera del Tiro General, S. A.

Property: 72 pertenencias, 178 acres, with 46-acre millsite, and 50-acre n, in the Venado district. The mine was worked on a small scale for 3 uries, and in a larger way since 1859. It shows 2 main ore zones, carrying ire veins in porphyry, near a limestone contact, with a generally E.-W. strike dip of about 70°. The N. vein, of 3 to 8 meters width, with known length 00 meters, is opened to depth of 1,361', showing chalcopyrite and sphalerite nated by the management to average 2% zinc, 430 grams silver and 8 grams per metric ton. There are 9 tunnels with 13,129' of workings.

Equipment: includes a 700-h. p. steam plant, with hoists of 100-h. p. and h. p. and a 10-drill air compressor. There is a 10-stamp mill and a 150-ton entrator, having crushers and 5 sets of rolls, with trommels and other neces- equipment. The mill has 10 pneumatic dry concentrators, which treat hide ores and give a preliminary lead concentrate cut out from the final concentrate, the latter being a 45% zinc product, secured largely from rosin

STATE OF SINALOA

)IX CONSOLIDATED MINING CO., LTD. SINALOA

Office 516 Grant Bldg., Los Angeles, Cal. **Mine office:** Choix, Sinaloa, ico.

Officers: C. J. Heyler, pres.; A. E. Pomeroy, 1st v. p.; J. R. Thomas, A. M. McDermott, supt., with Richard Lamson, directors.

Inc. May, 1902, in Arizona. **Cap.**, $5,000,000; shares $1 par; non-assess- issued, $3,155,534. Is protocolized under laws of Mexico. Owns 45% of tock issue of Los Platanos Development Co. Annual meeting, first Monday ctober.

Property: 269 hectares, in El Fuerte district or Sinaloa and Urique dis- of Chihuahua. Orebodies are contact deposits between diorite and limestone porphyry and limestone, with fissure veins in granite and quartzite carrying and silver.

Shipments of 1,062 tons of ore, to the Aguascalientes smelter, gave returns 1.5 to 28% copper, with gross values of $127,915, and net value of $47,940.

A 100-ton smelting plant, purchased 1911, has never been erected owing to utionary disturbances.

In March, 1919, secretary reported that half of property had been leased to Mining & Smelting Co. (which see).

[illegible] MINING & SMELTING CO. SINALOA

[illegible] care Choix Consolidated Mining Co., 516 Grant Bldg., Los [illegible] McDermott, gen. mgr.

[illegible]

BONANZA MINING CO. SONORA

Office: Cananea, Sonora, Mexico.

Officers: T. Evans, pres.; C. T. Knapp, v. p.; Geo. Young, sec.-treas.; Casey Stiles, asst. sec.-treas.; and R. E. Howe, directors. Is the operating Mexican corporation of the Superior Bonanza Mining Co., which see.

Inc. June 7, 1904, in Mexico. **Cap.,** authorized and issued, 10,000 pesos par value of shares $1 (Mexican). Holds title to the mineral properties of that company, located near Imuris, Sonora, Mex., consisting of 198 pertenencias, or approximately 491 acres. Controlled through stock ownership by Greene Cananea Copper Co. Contains a silicious ore, low in copper content, but with some gold. Mine has been worked for the past two years, to provide a reserve of flux for the Cananea ores.

BOSTON-MOCTEZUMA MINING CO. SONORA

Address: W. C. Humphrey, Nacozari, Sonora.

Directors: C. P. Vaughn, Ira Vaughn, and Oliver Cutts of Philadelphia, and L. V. Banker of Newton, Mass. Organized in Mass., December, 1919.

Property: the Cieneguita silver mine, 20 miles S. of Nacozari, developed by several thousand feet of tunnels, opening large quantities of $10 ore.

BOSTON SONORA MINES CO. SONORA

Probably dead.

Inc. about Dec., 1911, in Arizona, by Thomas Patterson, Wm. A. Clark, H. C. Wilderson, James V. Howard and Royal B. Young, all of Massachusetts. **Cap.,** $1,000,000; shares $5 par.

Property: at Cananea, Mexico, includes several claims near the Calumet-Sonora (Carnegie Lead & Zinc Co.) ground, crossed by several replacement veins showing bunches of good ore in the shallow pits and prospect shafts thus far put down. Is a prospect only.

BUFA MINING, MILLING & SMELTING CO. SONORA

Office: 1030 Van Nuys Bldg., Los Angeles, California. Mine at La Bufa, Sahuaripa, Sonora, Mexico.

Officers: Wm. E. Richardson, pres. and gen. mgr.; H. A. Sibbet, v. p.; Baron W. Riley, sec.

Inc. 1902, in Arizona. **Cap.,** $1,500,000; shares $1 par. Has paid 5 dividends, last being $60,000, July, 1905.

Property: 123 acres, showing 6 fissure veins, 2 of which average 4' width, are opened by a 600' incline.

Ore: said to assay 10% copper, 10% lead, 4% zinc, 150 oz. silver and $2.50 gold per ton. Values are in argentiferous tetrahedrite and copper sulphides.

Development: shafts of 300' and 600', and a 225' tunnel, with 8,000' of workings; 20,000 tons of high-grade ore said to be blocked out, with low-grade ore on the dump.

Equipment: includes a 120-h. p. plant, with hoists, air compressors and 7 power drills.

The 35-ton concentrator has a small sampling mill attached. There also is a 20-ton leaching plant. The smelter, at the mine, includes 10-ton and 25-ton reverberatory furnaces. Product is matte carrying 50% copper, 600 to 800 oz. silver and 1.5 oz. gold per ton, shipped by burro, to Aguascalientes, via Guaymas, for refining. Production, 1906, was about 750,000 lb. fine copper.

Secretary reported in June, 1919, that mine had not been operated for over 8 years, due to the revolution.

CADENA DE COBRE MINING CO. SONORA

Address: care C. A. McDonald, sec.; Bisbee, Ariz. Mine office: Sahuaripa, Sonora, Mexico.

Officers: Emil Marks, pres.; C. H. Holz, v. p.; M. Newman, sec.; R. F. Koehler, J. Pennypacker and John Treu, directors; Arthur Hook, mgr. engr.

Inc. Jan. 5, 1905. **Cap.,** $1,000,000; shares $1 par.

Property: 83 hectares, in Los Chinos mountains, on the Yaqui river, shows iron outcrops up to 300' in width.

Development: by the 96′ Bisbee tunnel, showing ore assaying 4 to 25% pper. Idle on account of revolutionary disturbances in Mexico.

ANANEA CONSOLIDATED COPPER CO. **SONORA**

Owned by Greene Cons. Copper Co., which is controlled by the Greene-manea Copper Co. (q. v.).

ANARIO COPPER CO. **SONORA**

Address: care Cameron Michel & Co., 8 West 40th St., New York, and oom 23, First National Bank Bldg., Douglas, Arizona.

Officers: James P. Harvey, pres. and mgr.; F. O. Schellenberg, v. p.; M. Simonton, sec.; Jacob Schaefer, Jr., treas. Directors: James P. Harvey, O. Schellenberg, Hon. John B. Wright, Wm. McDermott and B. A. Packard.

Inc. in Arizona, with capital of 2,000,000 $1 shares; 600,000 issued; but incorporated in Delaware, with capital of $20,000,000; shares $10 par value;),000 issued. Registrar & Transfer Co., New York, transfer agent. Commer-l Trust Co., New Jersey, registrar. The company owns all the capital stock El Canario Copper Co., S. A., and Mountain Consolidated Copper Co., S. A., h of Mexico, which see.

RACAHUI MOUNTAIN COPPER CO., LTD. **SONORA**

Office: 3222 Jefferson St., Kansas City, Mo. Mine near Llano, Mag-ena, Sonora, Mexico.

Officers: M. H. Greene, pres. and gen. mgr.; Chas. M. Howell, v. p.; J. Sprink, sec.-treas., with T. McClure, J. C. Brewer, Thos. James and Wm. Berryhill, directors.

Inc. May 20, 1907, in Arizona. **Cap.**, $1,500,000; $1 par; issued 964,000. nual meeting, first Tuesday in June.

Property: 2 groups, 50 hectares, 9 miles S. E. of Llano, shows copper-ring veins in granite.

Development: by shafts of 50′ and 410′, and a 195′ crosscut tunnel.

Equipment: includes a 40-h. p. boiler and 8x10″ hoist good for 1,000′ th. Idle since 1910, but company has no bonded indebtedness, pays all taxes expects to resume work as soon as peace is restored in Mexico.

RMAN CONSOLIDATED COPPER CO. **SONORA**

Mine near Arizpe, Sonora, Mex. Joseph Backus, of Virginia, Minn., pres., orted to have taken over the property for an indebtedness of $50,000 in 1916, to be planning organization of new company.

Inc. 1906. **Cap.**, $500,000, increased to $750,000; shares $2.50 par. Held to lands through Compania de Oro y Plata, S. A., inc. in Mexico.

Property: 351 pertenencias, 877 acres, in 9 groups, in the vicinity of the razzini and Chispas mines, show several strong silver veins, with 1,911′ of kings. The Carman and Don Placidio groups have dumps carrying about 0 tons of ore, claimed to average 4.65% copper, 62.2 oz. silver and 0.21 oz. l per ton. Shipments to El Paso smelter have given returns ranging from 98 to $4,575 per ton.

RMEN SYNDICATE **SONORA**

Subsidiary of Proprietary Mines Co. of America, in Guanajuato, Mexico.

Office: D. C. Catlin, 60 Broadway, New York. Original members of dicate were D. C. Catlin, E. B. Kirby, C. E. Knox, and G. W. Cannon, who cribed $19,000 to take up property.

The Proprietary Mines Co. issued $35,000 two-year, 7% notes due May 25, , convertible into shares of a company to be organized if the Carmen prop-is purchased, on the basis of $8 par value for each dollar of notes sub-ed. The privilege of conversion may be exercised up to April 10, 1921. l of new corporation will be $1,500,000.

Property: 136 acres, includes the Carmen, Chonita, Carmen Anexas, and Angeles mines in the Arizpe district, Sonora, 58 miles by road from Cananea , thence 15 to 18 miles to the mine; or 32 miles from Nacozari. Cost of rom Nacozari is $7 to $8 per ton. Examined by N. H. Burley, H. V. W. Royer, and Sill & Sill.

main vein, 15 to 24′ wide, outcropping for a length of contact between andesite and rhyolite or latite; other veins

Development: mainly by tunnels, one of 1,200′ with 2 shallow shafts and a total of about 3 miles of workings. These workings are not sufficient to block out any large amount of ore, but show that the property has merit.

Equipment: includes 100-h. p. steam plant, a 6-drill compressor and all necessary mine buildings and houses for employes.

A small smelter has crushers and rolls, a 75-ton calcining furnace and two 50-ton reverberatory furnaces, burning wood. Smelting plant inadequate and poorly adapted for the ore. Idle, pending restoration of peace in Mexico.

CONSOLIDATED SONORA MINES CO. SONORA

Address: C. P. Shaver, sec., care Bank of Thibodaux, Thibodaux, La., who says nothing has been done at the mine near Fronteras since 1914. See Vol. XIII.

COPETE CONSOLIDATED COPPER CO. SONORA

Office: 15 William St., New York.

Officers: Wm. T. Read, pres.; F. C. Hanford, v. p.; Myra B. Martin, sec.-treas., with Ralph Melczer and John C. Morrow, directors.

Inc. March, 1906, in West Virginia. **Cap.**, $1,000,000; shares $1 par, non-assessable; issued 549,170½ shares. Annual meeting, first Wednesday in March.

The company was organized to develop the property owned by the Melczer Mining Co., legalized in Mexico, the entire stock issue of which is held by the Copete Consolidated Copper Co.

Property: 70 pertenencias, comprising the Last Chance, Copetito, Jalisco, Santiago, and El Copete claims, about 173 acres, at El Copete, Sonora, show an immense gossan capping, apparently the remnant of a great blanket vein, the greater part of which has been eroded away.

Development: by several tunnels and a 615′ shaft with about 7,000′ of workings. Ores are mainly low-grade copper with considerable iron pyrite, gold and silver, giving average assay value of $6 per ton. The bottom of the ore zone seems to have been reached at about 300′.

It is believed that those in control of the company will use every effort to bring the enterprise to a successful issue and the past may be considered a closed chapter. Those interested in the history of the company will find it given in Vols. X and XI, The Copper Handbook.

Idle on account of the revolution.

COPETE MINING CO. SONORA

Office: 15 William St., New York. Myra B. Martin, sec.

Inc. 1900, in West Virginia. **Cap.**, $5,000,000; shares $5 par. Owned stock of the Melczer Mining Co., transferred, 1906, to Copete Consolidated Copper Co., which see.

CUBANA CONSOLIDATED COPPER CO. SONORA

Mine near Arizpe, Sonora, Mexico.

Inc. Jan. 6, 1903, in Arizona. **Cap.**, $500,000; shares $1 par.

Lands: 244 hectares, bought for $20,000; show 6 orebodies, of 4′ to 30′ width, of which 3 carry estimated values of 12% copper, 10 oz. silver and ¾ oz. gold per ton.

Development: 6 shafts, deepest 102′, and a number of tunnels, longest 250′ and 575′, with a total of 1,415′ of underground openings. Mine is about 3 miles from Cananea. Sample carload smelter shipments returned 23% copper with fair gold and silver values. Property considered promising, but idle at last accounts.

DEMOCRATA CANANEA SONORA COPPER CO. SONORA

Office: Fourth National Bank Bldg., Cincinnati, Ohio. Mine at Cananea, Sonora, Mexico.

Officers: H. [illegible] Hoffman, pres.; C. E. Hoffman, v. p. and gen. mgr.; Herbert H. Ho[illegible]; H. W. Santen, sec., with R. C. Swing, directors.

Inc. May [illegible] Arizona. **Cap.**, $3,000,000; shares $10 par; issued $2[illegible]70. C[illegible] registrar. Annual meeting, last Tuesday in M[illegible]. [illegible] lying between the Copete and Ve[illegible] Co., [illegible] mines. Orebody is of contact m[illegible]

norphic origin, consisting of a breccia of fragments of altered limestone, cemented y quartz, bornite and copper pyrite, in a fracture zone 50′ wide in limestone. The orebody lies about 300′ north of the Democrata shaft and also outcrops in patches of garnet rock surrounded by diorite porphyry, good carbonates being ined at the surface.

Development: comprises a 700′ shaft and 1,600′ tunnel, with 5 miles of orkings. On the 500′ level, the known orebody proved to be larger than previously estimated and the stopes yielded 5% ore. The East orebody near the Kirk mine, developed by tunnel workings, has also materially increased the proven re reserves. Average assays at present are 3½% copper and 1.5 oz. silver per on.

Equipment: includes electrically-operated hoists and air-compressor. melter contains 3 blast-furnaces of 250 and 300 tons daily capacity. A converter nd electric power plant were completed in November, 1917.

When in full operation company employs 600 men.

Production: in 1916, 8,950,000 lb. copper; 306,000 oz. silver; 1,265 oz. old; and from November 1, 1917, to December 31, 1918, a total of 15,221,504 lb. f copper, 8,877 oz. of silver, and 334 oz. of gold.

Operations have been intermittent due to the revolution. Work was resumed 1915, and continued until March, 1919; there was a suspension until October, hen one furnace was blown-in and 300 men employed. Property is a valuable ne.

OLORES MINING & DEVELOPMENT CO. **SONORA**

Dead. Described in Vol. XIII. See Empire Mining Co.

ULUTH-MOCTEZUMA MINING CO. **SONORA**

Inactive. **Office:** Room 610 Lonsdale Bldg., Duluth, Minn.

Officers: Geo. H. Crosby, pres.; Cassius Bagley, v. p.; A. O. Rabideau, c.; all of Duluth.

Inc. 1909, in Minnesota. **Cap.,** $500,000; shares $10 par; $300,000 issued. exican holdings forfeited on account of excessive taxes. Minnesota iron lease ld for enough to clear up indebtedness on same.

ULUTH-SONORA COPPER CO. **SONORA**

Address: 602 Palladio Bldg., Duluth, Minn. Mine near Cananea, Sonora, exico.

Officers: B. Silberstein, vice-president, preceding with W. D. Under-ll, sec.. Theron H. Hawkes., treas, with Geo. M. Tallant and A. F. orton, directors. P. C. Probert, mine and smelter supt. and purch. agt.

Property: about 3,621 acres, embracing a part of the former holdings the Calumet & Sonora Co., and the South Cananea, or Mitchell property. The tter shows a strong vein with wide silicious outcrop and has been developed a 400′ shaft and some underground work, but an examination of dumps fails show ore. Norton shaft, one-fourth mile distant, said to be 293′ deep and to ow good ore. Remainder of property considered of questionable value. Idle ice 1910. Is a prospect only.

ASTERN CANANEA DEVELOPMENT CO. **SONORA**

Mine about 18 miles N. E. of Cananea, Sonora, Mexico. John Martin, supt., last accounts.

Property: said to show copper sulphide ore, is developed by shaft, held der lease and bond from M. L. Fay, of Duluth, Minn., who controls the Fay anea Copper Co., the owner of the mine through the Cananea Eastern Mining ., S. A., a Mexican corporation. No returns secured, and idle for years.

ANARIO COPPER CO. **SONORA**

Owned by Canario Copper Co., which see.

Address: Nacozari, Sonora, Mexico; and Room 23 First National Bank Douglas, Arizona.

Management: James P. Harvey, res. mgr.; S. H. Pyle, supt.; C. H. engr.; John H. Banks, cons. engr.

Includes El Canario mine, 15 miles east; and the Lillie and mines, 3 miles west of Nacozari, Sonora. El Canario adjoins

La Caridad of the Moctezuma Copper Co. Geologic report of the Lillie made by C. H. Dunning, gives but little data on which to base an opinion.

El Canario ores carry enargite, and run from 2 to 18% copper, with some silver. The property is crossed by the El Caridad vein and two east-west cross-veins. An 800′ tunnel, whose face is 500′ below outcrop, has not yet cut the intersection of veins as planned. Work temporarily discontinued to carry on development of the Lillie mine near Nacozari.

The Lillie Mine has a vein from 40 to 60′ wide, which consists of a replacement of limestone between quartzite, intersected and parallelel by andesite porphyry dikes. The vein outcrops boldly for several thousand feet.

Development is by tunnels; No. 3 will gain a vertical depth of 600′, and is expected to enter the ore-zone 500 to 600′ from the portal, and 500′ under the large high-grade ore stope above in the No. 1 tunnel. Thirty-three cars of high-grade ore have been shipped to the Copper Queen smelter at Douglas, Arizona, from surface workings.

The Lillie Segunda mine joins the Lillie mine on the south. The geologic conditions are said to be similar to that of the Pilares mine in the same district, owned by the Moctezuma Copper Co. The main 250′ shaft on the north end of the orebody, encountered sulphide ore at a depth of 20′ and extending to a depth of 100′, where the foot-wall zone was encountered. The ore averaged 2.25% copper with 1.75 oz. silver per ton. The 100′ crosscut shows ore for 110′ and was extended to intercept another ore-shoot. The 250′ level encountered commercial ore at a point 310′ from the shaft. By January, 1920, the heading had averaged 4½% copper and 2 oz. silver.

Equipment: the main shaft is equipped with 60-h. p. hoist and compressor, capable of furnishing about 1,300 cu. ft. of air per minute. An air pipe line has also been extended to the Lillie No. 3 tunnel.

The Lillie and Lillie Segunda mines embrace 278 pertenencias. A tunnel-site has been located on the east side of Lillie Segunda mountain, where an air-compressor and other machinery will be installed to drive a 3,000′ tunnel to crosscut the Segunda orebody 700′ below the surface. The tunnel-site is 1½ miles from Nacozari. Recent development is said to be highly favorable, and it looks as if the Lillie Segunda would make up for the disappointing results in other properties owned by this company.

ELENITA DEVELOPMENT CO. SONORA

Office: Room 3300, 120 Broadway, New York.

Officers: Henry B. Paull, pres.; Thomas H. Collins, v. p.; Frederic J. Kennedy, sec.-treas., with Thomas F. Cole, and John F. Bankerd, directors.

Inc. March 15, 1907, in Arizona. **Cap.,** authorized 40,000 shares, par $10, $400,000; issued 6,000 shares at $10; 21,310 shares at $9 paid in; part paid stock subject to final call of $1 per share; in treasury 12,690 shares.

Property: Bonanza de Cobre mining claim, 182 pertenencias, approximately 450 acres at Cananea, Sonora, Mexico. Title to property held by the Lomita Mining Company, S. A., a Mexican corporation.

Inc. in Delaware. **Cap.,** $2,000,000: $1 par; non-assessable; 1,000,000 outstanding.

Company owns entire capital of Compañia de Plata El Progreso, a Mexican corporation, which see.

El Progresso, Compania de Plata.

Subsidiary of El Progresso Silver Co., which see for address and officers.

Staff: Andrew Marfarlane, gen. mgr.; W. C. Laughlin, cons. met.

C. Shotwell, cons. min. eng.; Jackson Elliott, mill supt.; E. E. Noon, mine ot.; J. V. Macfarlane, engr.; John Logan, assayer; A. C. Burnett, accountant.

Property: the Progreso-Colorada mine of 28 acres, opened in 1895, and jacent ground acquired in 1919, in the central part of Sonora, near junction of : Yaqui and Sonora rivers, and 160 miles S. of the international boundary. arest town is Suaqui de Batuc. Nearest rail is Verde, on the Mina Prietas e, a narrow-gauge road joining the Southern Pacific at Torres. In 1919 a mile wagon-road was built to connect with the Moctezuma-Lampazos wagon- id, giving a direct route to Nacozari, 110 miles distant. Economic condi- ns in the district are generally favorable. Shallow workings on the vein have lded silver worth $1,500,000. Mine examined by W. A. Farish, James Mac- lane, W. C. Laughlin, and Walter Harvey Weed (May, 1919).

Geology: the district shows uptilted limestones and overlying tuff beds, by intrusive igneous rocks and by andesites; the fissure veins are in the rusives. At Progreso-Colorada, the country rock is quartz-diorite. The k north of the Progreso vein is a porphyritic andesite, badly altered by vein- ming agencies, and impregnated with magnetite, pyrite and chalcopyrite. merous well-mineralized fissure veins, characterized by banded quartz, cut se two rocks, and carry shoots of rich silver-gold ore. Five nearly parallel ns which occur in a zone 500′ wide, are of the typical silver-gold type, run and W., and dip N. Only two, the Progreso and Colorada veins, 200′ apart l parallel, have been mined, but all five can be developed and mined from the v shaft now being sunk, and all five may be expected to show ore to depths 500 to 1,000′.

Progreso vein is developed to depth of 300′ by 2 shafts developing the vein a length of 500′ or more. The ore shoot is from 7.8 to 13′ wide in the old pes, and is continuous for a length of 500′ on the 215′ level.

Reserves, above 215′ level total 21,800 tons, averaging 33 oz. silver and gold per ton. There is also about 10,000 tons of indicated ore in the mine, l 5,100 tons of $26.25 ore on dumps.

The **Colorada** vein has been opened to a depth of 130′ and a length ng its outcrop of 355′. On the 130′ level continuous ore is exposed for a gth of 147′. Samples cut for a length of 100′ along this level averaged 6′ le and assayed 24.5 oz. silver and $1.60 gold. Reserves in Colorada mine, as March, 1919, are 5,00 tons of $25.25 ore, plus 2,600 tons on dumps containing 17 oz. silver and $2.75 gold per ton.

Old Colorada and San Jose veins also show very promising outcrops opened shallow shafts.

The new 500′ shaft now being sunk will have levels at 100′ intervals, begin- g at 200′. New work late in 1919 cut ore 9′ wide, that assayed $15 to $45 ton. The San Fernando vein south of the main shaft, was opened in 1919 a 30′ shaft in $22 ore.

Equipment: is complete for an output of 300 tons per day, including 80-). hoist, 8-drill compressor, sinking pump, 10 machine-drills, and 100-ton mill sisting of stamps, tube-mill, concentrates, and cyanide plant, to be enlarged 00 tons.

The mill started in October, 1919, and has treated dump ore from El Pro- so averaging $26.66 per ton. Profits are expected by manager to be over 00 daily when the mill is fully equipped.

Progreso-Colorada is considered a promising young mine, containing a d tonnage of high-grade ore and a mill in which to treat it.

TRIUNFO CONSOLIDATED MINING CO. **SONORA**

Mine office: Bacoachi, Arizpe, Sonora, Mexico.

Officers: at last accounts, A. C. Chalot, pres. and gen. mgr.; Dr. S. vton Leo., v. p.; A. L. King, treas.; preceding, with T. B. Johnstone, Albert neman, Julius G. Miller, Henry Stern, Wm. H. Freystadt, I. Neuberger, A. Wand, D. Powdermaker, Dr. Moritz Gross, Adolph Oltmann and John H. wn, directors; John Martin, supt.

Inc., in Arizona. **Cap.**, $2,000,000; shares $1 par. Property is held ugh a Mexican corporation with capital of 10,000 pesos, shares 100 pesos

par, entire stock issue of which is owned by El Triunfo. Annual meeting first Monday in October.

Property: 136 acres, in 12 different groups, principal property, about 4 miles from the Picacho mines, about 8 miles S. W. of Bacoachi, 2 miles from the Sonora river and about 75 miles by wagon road from Cananea. Lands carry 5 veins 2′ to 5′ wide, said to be traceable 2 miles, and to carry azurite, malachite, bornite, chalcopyrite and chrysocolla, all silicious, and occasional native silver, with a claimed average value of 5% copper, 25 to 600 oz. silver and $3 gold per ton.

Development: about 7,000′ of workings, main shaft 400′ deep, connecting with a tunnel for extraction.

Equipment: includes a 90-h. p. steam plant at the mine, small sawmill, 50-ton reverberatory furnace and 26 buildings. Wells provide water for boilers and potable use.

A 50-ton mill has a 25-h. p. steam engine and 4 Behrend tables, with a 3-inch pipe-line to the Sonora river, where there is a small pumping station.

Company paid a dividend of 1% in August, 1911. During 1912, company operated its smelter (reverberatory), shipping matte to El Paso, running $25 per ton.

Transportation facilities are poor, nearest railroad station being at Cos[illegible] miles distant by mule trail.

Closed down since 1913 on account of unsettled political conditions and insecurity of property rights during revolution.

EL VAN COPPER CO., S. A. SONORA

Mine near Nacozari, Sonora, Mexico. Not operated for several years; several claims forfeited to government for non-payment of taxes.

EMPIRE MINING CO. SONORA

Mine address: care Ben Bound, supt., Cananea, Sonora, Mexico. [illegible] Mexican holding company of the **Dolores Mining Development Co.**

Property: the Major Domo copper mine, 85 hectares, a few miles [illegible] Cananea. A 200′ shaft shows a N. E.-S. W. vein, 2½′ to 3′ wide. Company also owns the Dolores, Empire, Bonanza, Spanish, Golden Cross and Providencia, silver-gold properties, 65 hectares, in the Magdalena district, Sonora, Mexico. Planned erecting a 3-unit Pittman mill at the Golden Cross property, 14 miles S. W. of Cananea. No recent reports received: presumably idle.

ESMERALDA COPPER CO. SONORA

Has no representative at former mine office: Llano, Magdalena, Sonora, Mexico. F. C. Emery, pres.; W. D. Fredericks, mgr., at last accounts.

Property: 88 hectares, has about 300′ of workings, showing copper with silver said to increase at depth. Presumably idle.

ESQUER y CIA; ALEXANDER SONORA

Mine at Baroyeca, Alamos, Sonora, Mexico. J. J. Esquer, mgr., at last accounts.

Property: the Mexicana, Esperanza and other mines, developed by shafts and tunnels, carries auriferous and argentiferous copper ores; idle for years.

FAY-CANANEA COPPER CO. SONORA

Probably dead. Last address: 2105 East Superior St., Duluth, Minn. Mine near Cananea, Sonora, Mexico. Described in Vol. XII.

GARRETSON-SAHUARIPA CO. SONORA

Probably dead. Mine at Calera, Sahuaripa, Sonora, Mexico. [illegible] Farnsworth, pres.; Laurens Enos, v. p.; W. H. H. Davenport, sec.; [illegible] Sherman, treas.; John A. Moore, supt., at last accounts.

Inc. 1903, in Arizona. Cap., $600,000; shares $100 par; non-assessable; issued, $450,000.

Property: 96 hectares, and 14,000 acres of surface rights, about 30 miles S. E. of Sahuaripa, includes La Calera mine, having 6 orebodies in development, of 3′ to 6′ width, estimated by company to average [illegible]

oz. silver and $14 gold per ton, which is interesting, if true. Mine has ut 1,200' of workings.

The smelter, 1 mile from the mine, has a 50-ton 29"x48" Garretson itic blast furnace. Idle for years awaiting construction of the Sonora ntral railway from Tonichi, which has been surveyed to pass through s property.

EENE CANANEA COPPER CO. **SONORA**

Office: 42 Broadway, New York.

Officers: W. D. Thornton, pres.; Cornelius F. Kelley, v. p.; Jos. W. en, sec.-treas.; E. J. Dudley, asst. sec.; W. S. Harper, asst. treas.; H. B. ill. aud.; Robert M. Raymond, Cornelius F. Kelley, Walter Douglas, W. Thornton, Wm. E. Corey, John D. Ryan, Jos. B. Cotton, Jos. W. Harri- n and L. D. Ricketts, directors.

Inc. Dec. 26, 1906, in Minnesota. **Cap.**, $60,000,000; shares $100 par; ed $50,000,000. The New York Trust Co. and Old Colony Trust Co., ton, transfer agents; Bankers Trust Co., New York, and State Street st Co., Boston, registrars. Shares listed on the New York and Boston k Exchanges.

The Greene Cananea owns practically entire stock issue of Cananea sol. Copper Co., the operating company which holds title to the Mexi- properties. The steps by which this result was reached are given in XIII.

Balance Sheet, years ending December 31, for Greene Cananea and sub- ries:

rty: mineral lands held under title from the Mexican government 14,062 hectares, or approximately 34,738 acres. The surface lands the company comprise 130,414 hectares, or approximately 322,123 of the mines, works, offices, warehouses, stores, etc., of the ocated on its own land and in addition the company owns properties in Cananea, which are occupied by its local

y of 16,000 inhabitants, located 40 miles south

of the international boundary line, on a branch railway of the Southern Pacific lines of Mexico.

Geology: the producing mines of the company are situated in the Cananea mountains, which rise from the headwater valleys of the San Pedro and Sonora rivers in northern Sonora. The mines are distributed along a mineral belt, or series of belts, about 6 miles long, in a N. W.-S. E. direction, and about 2 miles wide. The oldest rock is pre-Cambrian granite, which is overlaid by Cambrian quartzite, in turn overlaid by Cambrian limestone. Breaking through these rocks, and covering much of the mineral belt, is a series of eruptives of Tertiary age, in which 12 different rocks may be recognized, one, a bedded tuff, the others massive. Three main classes of ore deposits may be recognized: (1) Deposits containing secondary chalcocite together with iron pyrite either massive or disseminated along shear zones in diorite porphyry; (2) Contact deposits containing chalcopyrite associated with iron pyrites and some zinc blende in a matrix of altered limestone; (3) Disseminated chalcopyrite associated with zinc blende in a diorite porphyry breccia.

The great mines of Cananea are the **Veta Grande, Oversight** and **Capote,** which have had large bodies of high-grade ore and now have large bodies of direct smelting ore and also contain great deposits of concentrating bodies. This ore contains copper as chalcocite, disseminated through diorite porphyry in broad shear zones.

The Capote mine differs from the Veta Grande and Oversight in that the ore occurs not only disseminated in diorite porphyry but also in the underlying granite. There are 3 principal ore shoots connected by continuous ore on the various levels. The ore in the upper levels is chiefly chalcocite, but the new shoot consists of massive pyrite with primary chalcopyrite and bornite in granite. This mine has attained a depth of over 1,050', and has ore on each level from the 1st to the 10th. The Capote mine yields both concentrating and direct smelting ores. A new 5-compartment shaft was completed to the 12th level in 1916, to provide an outlet for the new orebody on the lower levels, and has been completely equipped. The pumping stations at Capote No. 15 shaft were completed in 1917 and 1918, while No. 16 was equipped with a hoist, ore-pockets, and stations in 1919.

The **Cobre Grande** mine, the original mine of the Cananea Consolidated Copper Co., has been idle for some years, save to supply converter lining. The ore occurred in a wide vein traversing both altered limestones and igneous rocks.

The **Kirk** mine is situated in an extensive area of highly-altered limestone capped with diorite porphyry and cut by small, irregular dikes and intrusions of the same material. The ore is not adapted to concentration and it is necessary to hand-pick it as mined. The sorted ore carries a desirable high percentage of lime and iron.

The **Chivatera** has a large body of oxidized ore containing about 2% copper, but averages 12 to 15 oz. silver and some gold. As the orebody now stands it contains several years' reserves on the basis of 150 to 200 tons daily production, and there is a considerable territory lying ahead of present exploration that gives promise of important development.

The **Sierra de Cobre** property was acquired by purchase from the Phelps-Dodge interests several years ago, and since its acquisition has proved to be one of the largest and most profitable productive mines.

The ore from this mine occurs in limestone. Fissures extending out from the Eureka fault have acted as channels for mineralizing solutions, making ore along the veins and for a considerable distance into the walls, replacing the limestone by pyrite and chalcopyrite along the bedding planes. There appear to be notable bodies of heavy sulphides on and below the level of the Combination tunnel and these sulphides have been developed with very satisfactory results. The Sierra de Cobre property also has an

ctensive area of undeveloped ground lying in the limestone areas, along hich smelting ore has been found in the Kirk mine and elsewhere.

The **Elisa** mine contains a number of lenses of ore lying approximately ırallel to a nearly vertical fault between limestone and the diorite porhyry. These lenses occur in the limestone at the fault and back of it ır a distance of 150', along a zone some 1,500' in length. The ore consts of a garnet matrix containing chalcopyrite and iron pyrite. It is a esirable ore for the smelter, being more than self-fluxing, containing about)% of lime in addition to the iron. Recent developments in the Elisa ine have been satisfactory and a large amount of first-class ore has been ɔened up on the deeper levels. The ore from this mine is now delivered rough the Combination tunnel to bins at the Capote mine.

The **Henrietta** is a small mine whose ore occurs on a contact between orite porphyry and quartz porphyry. The orebodies are not large and e ore is silicious. New development work in the vicinity of Henrietta ıs not yet shown workable orebodies.

The **Puertecitos** mine and the town of that name are located at the . W. end of the mineral belt and at the terminus of the narrow-gauge ilroad of the company. The Puertecitos ore deposit has a great outop of limestone altered by igneous contact metamorphic action to lime-iron-ırnet rock and containing carbonates of copper and some chalcopyrite ıd bornite. Large areas of this outcrop contain enough copper to warnt mining, which is carried on by means of large quarries. The ore as ined is not sufficiently rich to be sent direct to the smelter, but has to broken and hand-sorted, yielding about 4 tons of waste material to each ɔn of ore.

During 1917 an important development was made near the Campaña ıaft, in a hitherto unproductive zone of large extent. Orebins were cometed, and in 1918 a 3,000 cu. ft. compressor was installed.

The **Elenita** mine, one of the earliest producers of the camp, located ıuthwest of Puertecitos, has been reopened with a view to again putting in the producing class. The ore from the mine is similar to that of ıertecitos.

The **Cananea Duluth** mine has an orebody about 1,200' long with a aximum width of 200'. This orebody is a neck of diorite intruded in ıdded tuffs. The intrusion is shattered, altered and for 200' to 300' below e surface is impregnated throughout with pyrite and copper minerals. n the 600', the lowest level, the central portion is not commercial; the lues being concentrated around the border of this long canoe-shaped oreɔdy. The ore carries good silver and gold values, with about 2% copper. ractically all of the product of this mine is concentrated before smelting. ıe shaft is being sunk below 600'.

The **American** mine, idle since 1907, produced only such ore as was ɔtained through development work. Not fully developed, though there e sufficient indications of ore occurrences to warrant a resumption of velopment operations. Mine has a 3-compartment shaft to the 100' level d ore bins of 900 tons capacity.

Development: total development work since the organization of the mpany, December, 1906, to 1918, is 100 miles, which does not include 53 iles done under previous management. Development work done in 1918 ıounted to 13⅛ miles, compared with 5 miles in 1917, 11 in 1916 and 1½ 1915. Development of new ore has kept pace with that extracted.

Equipment: power is delivered from a central power plant at the ıelter, and electrical power is used exclusively except for the steam pumpg plant at Ojo de Agua. The power house, also containing the boiler ant, has three 1,500 k. w. and one 3,000 k. w. horizontal Curtis turbines, livering current to the switchboard at 2,300 volts. Electrical energy is ansmitted to various parts of the property at from 2,300 to 11,000 volts. ıe furnace blast is supplied by 7 Curtis engines and 1 piston blower, havg a combined capacity of 176,000 cu. ft. of free air per minute. The blast

is conveyed to the furnace through a pipe 6' in diameter. Converter blast is supplied by 5 blowing engines having a total piston displacement of 55,000 cu. ft. of free air per minute, and is conveyed to the converters through two 30" pipes. In the power house there is also one 6,000-cu. ft. capacity compound condensing air compressor, furnishing air to the mines for drilling and other purposes; also one 1,200-cu. ft. compressor, used to furnish air for ramming converter lining and for sundry pneumatic tools around the works. Condenser water is cooled in a spray-pond.

There are 16 boilers, with a total capacity of 6,034 b. h. p. Crude oil, imported free from the United States, under a Federal concession, is used as fuel. The waste-heat boiler plant nearby consists of 7 Stirling water-tube boilers having a combined nominal capacity of 2,700 b. h. p., heated by the waste gases of 2 reverberatory furnaces. In connection with the waste-heat plant there is a battery of 4 Green economizers, consisting of 288 tubes each. All boilers are equipped with Foster superheaters. The feed water is carefully measured after a simple treatment for the removal of scale-forming material, and is fed to the boilers by means of electrically-operated plunger pumps. The power house is equipped with 2 condensing current barometric condensers, each having a separate water pump and separate dry air-pump. All engines are operated condensing except those whose exhaust is used in heaters.

At the Sierra de Cobre mine, in the Capote basin, there is an Ingersoll-Rand air-compressor having a capacity of 2,500 cu. ft. of free air per minute, which is directly connected to a 2,300-volt A. C. motor. This machine is used to boost the pressure in the mains in the outlying districts. There is also a 3,000-cu. ft. machine erected in 1918. Fuel oil is stored in 3 steel tanks with a capacity of 10,000 bbl. each.

The main shops near the smelter include a 200-ton hydraulic press, milling machine, 1,500-lb. steam hammer, foundry, pattern and electric shops.

Water supply: the principal supply of the company comes from the Ojo de Agua, 9 miles from the town, where a pumping plant, with water-tube boilers, using crude oil as fuel, runs a Reidler high-duty compound condensing engine delivering 1,500,000 gal. of water per day against a pressure of 967'. A 10" main connects the pumping plant with a 600,000 gal. tank on a hill near the concentrators. The Ojo de Agua supply is used exclusively for domestic purposes and for feed water for the boilers and is delivered under substantial working pressure. A very well equipped fire department with a complete system of mains to pressure tanks, is maintained. Water from the mines is delivered to the concentrator through wooden pipes and is there used in milling operations.

Reduction works: the concentrating department has a capacity of [illegible] tons per day, including a crushing plant, sampling mill, gravity and flotation plant.

The crushing plant has storage bins holding 2,000 tons, ore from the mines being delivered in Ingoldsby side-dump cars of 30 tons capacity each. From the storage bins ore is fed to a 30" conveying belt by automatic feeder. This belt delivers the ore to 2 grizzlies, inclined at 48° with openings. The screened ore falls on an 18" conveyor, transferring to a 24" conveyor, taking it to the mill bins of 4,800 tons capacity.

The oversize from the grizzly goes to two 36" picking belts, where first-class ore and also pieces of wood and steel are sorted out. The ore left on belt is then delivered to crushing bins and fed by automatic plates to feed to five 10x20" Blake crushers of the Cananea type, which reduce the ore to 1½" size. This crushed ore passes to 16x36" rolls, breaking to pieces which pass a 2-inch ring. This product is delivered to a 24" conveyor which delivers to the mill bins, together with the grizzly undersize. The crushing plant is electrically driven and has a capacity of 2,000 tons per 24 hours. An automatic sampler at the head of the 24" conveyor cuts out

ieth of the total ore, which is ground and automatically cut to sample. rejects drops to elevator and return by conveyor to mill bins.

Ore from the 4,800-ton storage bins is fed by automatic feeders into h section. Concentration begins on all material finer than 2" ring. The rse of the ore is as follows:

The ore is delivered to two ⅝" trommels, the undersize passing to two trommels. The undersize of the latter goes to two 3/16" trommels and undersize from these to four 2 mm. trommels. The various coarse sizes n screenings are passed to Hartz jigs, and all tailings from jigs coarser ı ⅜" ring are passed through rolls, elevated and returned to screen, so no material coarser than ⅜" goes to the Hardinge mills. The coarser erial is concentrated on 20 concrete Hartz jigs in each section. The ailings finer than ⅜" pass to 3 Hardinge mills and are ground to about n. The discharge from the Hardinge mills is deslimed in a drag-belt sifier, the coarser sands are classified, the resulting product being ted on 30 tables. The fine sands and slimes are treated on 36 vanners. ings from tables and vanners are settled out and sent to the slime plant further treatment. The mills are 8′ by 28", and are driven by 150-h. p. s-Chalmers motors.

The tailings, containing a gross value of nearly $2 per ton in copper, r, and gold, are impounded in a dam, the slime settling. The clear r is pumped back for re-use in the mills but is first passed through ipitating tanks, where the dissolved copper is precipitated and recov-. Concentrates are delivered in narrow-gauge cars to the spreading

All ores, concentrates, fluxes and secondaries for blast-furnace treat-t are weighed and delivered to the main receiving bins by the com-'s narrow-gauge railroad. The bin system consists of 11 wooden and el bins, having a combined capacity of about 3,000 tons. From the ving bins all material is discharged on a conveyor belt which passes ugh the sample mill on its way to the ore-bedding plant, described by e in "Min. and Sci. Press" of November 8, 1919. In the sample mill ore is crushed to about 4" through a 24x36" Farrel crusher. One-tenth he ore stream is cut out and passes through a 10x20" crusher of the inea type; one-tenth of this is cut and passed through a Gates gyratory her, one-fifth is cut and passed through a set of 17x27" rolls, when the sample is cut out, amounting to about one-four-thousandth of the nal material. This final sample is quartered down, dried and prepared he laboratory. The reject from the sample mill is elevated back to the conveyor system. All material is sampled in this manner with the ption of concentrates, which are hand-sampled.

The ore after passing the sampling mill is conveyed to the spreading and distributed evenly over the entire length of the bed by an over-belt which is automatically tripped. The bedding plant is of steel ruction being 453′ long, and 198′ wide, and contains 3 ore beds of t 9,000 tons capacity each. The composition of each bed is known in ace and in this way an even mixture is assured to the furnaces. When l is completed it is reclaimed by a machine which advances into the of the pile and discharges on to a conveyor which delivers the mixed re into bins over the blast furnaces, each bin having a capacity of 75 The reclaiming machine has a capacity of about 175 tons per hour. is dropped by gravity from the 75-ton bins above the furnaces hoppers holding 2,000 lb. There are 5 such hoppers to and these are discharged either directly into the furnace or by means of arc-gates.

furnace contains 8 blast-furnaces, 48x210" at the 10′ 5"x19′ inside of brick lining, each settler overflows continuously into self-dumping slag Trains of 6 to 8 cars are hauled to the dump

by electric locomotives. The matte is tapped from the settlers into 60-t cast-steel ladles and transferred to the converters by electric crane

Gases from the furnaces are discharged into a steel balloon flue, thro through 2 cross-flues and 2 goose-necks into the main brick dust cham From here the gases pass through a flue to another chamber, thence brick-lined steel stack. All flue-dust is drawn from the dust chamb balloon flue into small cars and trammed to the reverberatory fu The coke bins at the west end of the furnace building have a capac about 3,000 tons.

The roaster building contains ten 18' six-hearth McDougal and calciners. There is a special bedding plant for the roasters, consis 4 bins of 500 tons capacity and 2 beds of 3,000 tons each. The mixed charge is reclaimed and delivered by conveyor belts into 60-ton bin and charging into the roasters. The roaster product is hauled by motor in 5-ton cars to the reverberatory furnaces.

The reverberatory plant consists of two 19' 6"x100' oil-fired fu Waste gases fire two 250, three 300, and two 500-h. p. Stirling placed parallel, and then pass through 4 units of Green economizers taining 1,152 tubes, thence through a brick flue 130' long to a stack diameter by 152' in height. Slag is skimmed into 112-cu. ft. elec tilted slag cars and hauled to the dump by electric locomotive. tapped into 66-cu. ft. ladles and hauled to converter buildings in ba from which it is transferred to the converters by electric cranes.

The converter building contains 3 electric cranes of 40, 50, and capacity, 6 electrically-operated stands of the Great Falls type of with 7 basic-lined shells, 12' in diameter, for same.

The copper from the Bessemer converters is poured into the 2 straight-line electrically-operated casting machines, each equip tilting ladles of 66 cu. ft. capacity. Each machine has a chain of casting bars weighing about 260 lb., dumping into molds from wh are removed by drag conveyor to the buillion platforms. The bar then stacked by an air-operated radial crane, picked up on trucks, and loadde into standard-gauge railroad cars. The converter skimmed into ladles, transferred by crane to slag cars, hauled by motor to pits and reclaimed by a 10-ton steam shovel. It is then in narrow-gauge cars to the receiving bins of the main sprocket system.

The converter gases pass through balloon flues of steel con and enter into a steel dust chamber, with a circular arch roof ha radius. The gases then pass to a steel stack 12' in diameter by

The company owns and operates 36 miles of standard and gauge railway, including branches, spurs and sidings. The nar line is double-tracked from the smelter to Capote basin, and has 65, and 70-lb. steel rails. The equipment includes 3 standard-gau narrow-gauge locomotives, all oil burners, and about 140 cars which are 25 and 30-ton steel ore cars. The railway system has connection with the Nogales and Naco branches of the Southern Pa of Mexico, and by this line with the El Paso & Southwestern Naco, Ariz. In 1918 the railway handled 1,838,256 tons of freig

The Cananea Consolidated Copper Co. operates practically public utilities in Cananea. Its Public Service Department water system; an electric light system; a telephone system drops and approximately 450 telephones; and many other utilities. The company's Mercantile Department operates a large department store located near the smelters and 8 branch tered throughout the various camps. The [illegible] include 619 buildings, consisting of rooming houses, [illegible] dences, bunkhouses, etc.

The following table summarizes operations:

ar	Ore Concentrated tons	Cost of Milling	Products Smelted, tons	Cost of Smelting
8.....	289,098	$1.25	902,520	$3.38
7.....	171,202	.....	481,632	2.61

a) To July 31, 1906. (b) August 1, 1906, to December 31, 1907.

First quarter of 1920 yielded 10,000,000 lb. copper and 400,000 oz. silver.

The Cananea Consolidated Copper Co., S. A.

Mines and works: Cananea, Sonora, Mexico. C. E. Mills, pres.; T. as, v. p. and gen. supt.; Geo. Young, sec.-treas.; Casey Stites and W. arper, asst. sec'ys; T. Evans, traffic mgr. and purch. agt.; G. W. Prince, ter supt.; F. J. Strachan, mill supt.

Inc. Sept. 30, 1899, in Mexico. **Cap.,** 20,000 pesos, shares $1 gold par. e stock owned by Greene Cananea Copper Co. the C. C. C. Co. being y the operating company, holding direct title and right to operate roperty, as is necessary under the laws of Mexico.

RRERO MINING CO. SONORA

s the Mexican incorporation of the Victor Mining & Smelting Co., t owns 2 properties in Magdalena district, Sonora, Mexico, 10 miles S. f Cananea. Properties about one-half mile apart, contain 15 and 32 nencias, respectively.

RIS COPPER CO. SONORA

ld its property, El Caridad group, to the Moctezuma Copper Co., of Dodge Corp'n, February, 1916. Company has no assets.

FORD MINING & MILLING CO. SONORA

dress: H. B. Brandenburg, Nogales, Arizona; or Mark Wondless, illo, Sonora.

perty: a silver mine, 34 miles N. W. of Hermosillo.

elopment: by over 3,000' of workings, opening milling and ship-

ment: 20-ton plant using Hardinge mill and a cyanide installation.

SILLO COPPER CO. SONORA

1914 Columbus Savings & Trust Bldg., Columbus, Ohio. Operat-

ce: Aptdo. 98, Hermosillo, Sonora, Mexico.

ficers: J. L. Zimmerman, pres.; C. P. West, v. p.; F. E. Resler, sec.; Whitaker, treas., with A. J. Rushing, R. D. Wood, L. A. Clark, A. W. and E. C. Pixley, directors. R. D. Wood, gen. mgr., and James , supt.

Feb. 13, 1909, in Mexico. **Cap.,** $1,500,000; shares $1 par; non- le; issued $1,047,267. Authorized bond issue, $200,000 of 7% con- gold bonds, amount outstanding $85,860.

perty: about 1,300 acres, with 200 acres of mill and smelter sites, Hermosillo district, about 28 miles N. W. of Hermosillo, consists of , reported to carry porphyry and lime cut by granite. The Picacho

and Verde Grande have contact deposits in limestone, near igneous intrusives, carrying oxidized ore giving assays of 6% copper, 8 oz. silver and $1 gold per ton. La Cobriza group and La Verde have contact deposits between granite and quartzite, of 30′ to 60′ claimed width, traceable 7,000′, carrying auriferous and argentiferous copper ore said to assay 5.5 to 20% copper, with gangue of talcose limestone. Company reports 7 orebodies under development of 10 to 100′ width, averaging 5.44% copper, 8.6 oz. silver, and 75c gold per ton.

Development: by 20 shafts and tunnels with over 7,000′ of workings reported to show over 200,000 tons of ore. Some shipments made carrying 20% copper, 30 oz. silver, and $1.25 gold per ton.

Equipment, includes a 100-ton Allis-Chalmers blast-furnace and several hundred horse-power of boilers, 40-h. p. hoist, 6-drill air-compressor, large churn-drill, 22-h. p. traction engine, boilers, etc. Smelter is 1½ miles from principal workings, consisting of large buildings, assay office, machine and blacksmith shop, 3 large boilers in engine room, coal and ore bins and reservoirs holding thousands of barrels of water, and with an inexhaustible supply of good water.

Company recently installed an oil engine and rock-drills for sinking shafts and crosscutting sulphide orebody.

Management expects to continue development but will not mine ore until the smelter and oil flotation plants are in operation, and the company is in shape to handle its own concentrates.

Company recently acquired a ranch of 25,000 acres lying between the mines and Hermosillo for the timber and agricultural land, and the new road through this tract will shorten the haul to Hermosillo several miles.

INTERNATIONAL COPPER ORE CORPORATION SONORA

Office: 424 Scarrit Bldg., Kansas City, Mo. A. M. Conard, Superior, Ariz., was president at last accounts. **Mine office:** Noria, Sonora, Mex. Is the Mexican operating corporation of the Sonora Copper Smelting Co.

INTERNATIONAL MINES DEVELOPMENT CO. SONORA

Main office: 523 Los Angeles Investment Bldg., Los Angeles, Cal. **Eastern office:** Room 1606, 20 Broad St., New York.

Officers: Max Muller, pres.; P. Schabarium, v. p.; N. S. Hanks, sec.-treas.; above with Augustin Freese, H. J. Wendler, S. A. Joseph and C. F. O'Brien, directors. A. C. Barke, mgr.

Cap., $3,000,000; shares $1 par; $2,400,000 issued. Stock listed on New York Curb.

Property: the Santa Rita, Santa Gertrudis, Santa Ana and El Carmen mines, 160 acres in Sonora, Mexico, about 200 miles from Bisbee. Company also reported to have a 5-year option on the Ash Peak mine at Clifton, Arizona. The Mexican properties have been silver-gold producers in the past, but are undeveloped and owing to revolutionary conditions will probably remain undeveloped for some time to come. Their position aggravated by being in the Yaqui zone. The Santa Rita is an "ancient" or old Spanish mine. It was worked by a 1,500′ open-cut and numerous narrow drifts, etc. The veins contain a number of pockets of rich ore. Seventeen adobe furnaces were kept in blast in the early times. The group of all the Mexican mines of this company, which are close together, is for the treatment of large bodies of milling ore amenable to cyanidation.

JUANITA MINING CO., S. A. SONORA

Office: Sellwood Bldg., Duluth, Minn. **Operating address:** Bisbee, Ariz. **Officers:** Byron M. Pattison, v. p. and mgr.; Lemuel E. Smith, sec.-treas.

Property: about 1,000 hectares, known as the Juanita group, adjoining the Carnegie L. & Z. Co. property, 3 miles N. W. of Cananea, cut by several narrow fissure veins in volcanic tuff beds. These carry small oreshoots with chalcopyrite, galena and sphalerite. No. 1 shaft is 220′ deep and there also is a 75′ shaft. Work suspended since 1910 owing to political disturbances in Mexico. Is an undeveloped prospect.

A COBRIZA DE COBRE. **SONORA**
Address. Rafael Elias, Cananea, Sonora, Mexico.
Property: 14 claims, adjoining Carnegie L. & Z. property on S. E., ows several veins in bedded volcanic tuffs with complex, silicious lead-pper-silver ore. Developed by 200' shaft with short drifts in ore.
A COBRIZA MINING CO. **SONORA**
Described in Volume XIII. Property acquired by Aztec Consolidated ning Co., which see.
A EXPOSICION MINING CO. **SONORA**
No information about this company has been obtained since 1917. See l. XIII.
MPAZOS SILVER MINES CO. **SONORA**
The only data obtainable about this corporation is from George Gra-n Rice's "Industrial and Mining Age."
Office: formerly at 40 Exchange Place, New York; or the Registrar & nsfer Co., 900 Market St., Wilmington, Del.
Officers: at last accounts, W. Barrett Ridgely, pres.; Newhouse Hotel, Lake City, Utah. H. J. Wendler, v. p.-gen. mgr.; I. H. Weinberg, sec.; n C. S. Herzig and J. J. Harper, directors. Judge H. D. Rummel, rleston, W. Va., attorney.
Inc. Jan. 15, 1918, in Delaware. **Cap.,** $3,000,0000; $1 par; 2,000,000 ed.
Property: the Lampazos mine, now owned by Max Muller and Epes dolph, 443 acres, containing 17 mines, 4 of which have been developed. mine is reported to have 200,000 tons of 30-oz. silver ore, blocked out continuous bands of ore for 1,500 to 2,000', that extend down to bottom ine, 750' below surface. A 12-mile wagon-road was constructed.
The Lampazos is a good mine whose name has been clouded by scan-us promotion methods.
NITA MINING CO. **SONORA**
Holding company for the Elenita Development Co., which see.
MINA MEXICO **SONORA**
Address: Potter Palmer, 144 S. Wabash Ave., Chicago, Ill. E. P. Ryan, C. D. Cline, cons. engr.
Property: closed for 4 years owing to the revolution, but reopened in 1920. The workings and machinery are said to be in good condi-A 50-ton flotation plant is to be added. The smelter will not be for the present.
REINA UNION MINING & REDUCTION CO. **SONORA**
Property: near San Javier, Hermosillo, Sonora, Mexico, includes the ores mine, said to show a fissure vein carrying lenses of complex lead-er-sulphide ore with gold and silver.
Development: by shaft, cut a vein that assayed from 15 to 30 grams and 400 grams silver per ton.
Equipment: includes steam and electric power, and an air compressor.
Idle for several years, owing to revolution in Mexico.
GHLIN MINING CO. **SONORA**
Address: W. C. Laughlin, or George Schrotter, San Javier, Sonora, ico.
roperty: Las Animas silver mine at San Javier, leased from the an Mining Co., of Cleveland, Ohio. A leaching plant to handle 50 to ns of ore a day was put in operation early in 1918.
NION CONSOLIDATED COPPER CO. **SONORA**
ddress: C. B. Bell, Douglas, Ariz., owner.
roperty: 660 acres, in Cerro Tordillo section of the Ajo mountains, Fronteras, Sonora, Mexico, shows a 3' to 20' vein traceable a mile, arries high-grade copper, gold, silver, zinc ore in a contact deposit in ear an intrusion of porphyry.
evelopment: by 5,000' of tunnels and shafts to depth of 500'. Ship-of 1,500 tons made 1914, returned 15% copper, 15 oz. silver and 0.1

The property was worked in 1882-'86, acquired by present [illegible] and considerable work done in 1912-'13-'14. C. B. Bell plans [illegible] operations when peace is restored in Mexico.

MOUSE MINING CO. SONORA

Address: H. J. Wendler, mgr.; Buena Vista, Montezuma district, Sonora, and Charleston, W. Va.

Property: a silver mine on which a 50-ton flotation mill was erected in 1917 and a large quantity of silver ore developed to depth of 300'. The company plans construction of a reverberatory matting furnace in 1920.

LUCKY TIGER COMBINATION GOLD MINING CO. SONORA

Office: 1012 Baltimore Ave., Kansas City, Mo. Mine office: Ensenada, Sonora, Mexico.

Officers: J. Z. Miller, Jr., pres.; W. A. Moses, E. D. Fisher, and A. F. Mosier, v. p's.; O. V. Dodge, sec.; H. Vanderslice, treas., with F. D. Winning, asst. treas.; G. M. Smith, W. G. Catron, John Kelley, J. T. Mollenick, L. R. Budrow, gen. mgr., and H. B. Duke, directors; D. J. Haff, counsel; O. E. McMullen, asst. sec. and auditor

Inc. March 16, 1903, in Arizona. Cap., 800,000 shares; $10 par; 715,[illegible] shares issued Annual meeting, third Monday in March. Company owns the entire capital stock of Tigre Mining Co., S. A.

Financial Statement, years ending December 31:

Year	Revenue	Operating Charges	Operating Profit	Dividends	Current Assets	Current Liabilities
1918.	$2,636,810	$1,351,539	$1,251,583	$786,871	$768,363	$208,[illegible]

Total		

Property: the El Tigre mine, 6 claims, 587 acres, at El Tigre, Montezuma district, Sonora, Mexico, contains veins of gold-silver-lead-copper ore cutting through rhyolite. Vein is 25' wide, proved for 4,000' in length, runs N.-S. with average dip of 65°.

Development: by 1,300' incline shaft and 5,000' tunnel, with over 2 miles of workings. Ore is mined mostly by overhand shrinkage, and [illegible] haulage is employed underground. Company also has zinc leases in Oklahoma, and to the end of 1918 had spent $180,558 on their development.

Equipment: includes electric power, 25-h. p. electric hoist, 250-ton central [illegible] mill and cyanide plant. Reported extraction in 1916 was [illegible] concentrates averaging 31 oz. gold, 683 oz. silver, 2.93% copper, [illegible] lead [illegible] being satisfactory; a plant was [illegible] reagents [illegible] consumption and lower costs.

[illegible] tons in 1913; [illegible]

1914 [illegible] $2,638,937. Ore [illegible]

silver [illegible] December 1919, [illegible]

Company has been able to continue operations and shipments more or
s regularly, notwithstanding disturbed conditions in Mexico during the
st years, but it issues no production figures, merely a balance sheet.

ANHATTAN DEVELOPMENT CO. **SONORA**

Owns Arnold Mining Co. property near Santa Cruz, Sonora, Mexico.

ANHATTAN EXPLORATION CO. **SONORA**

Office: 52 Broadway, New York. **Mine:** at Hermosillo, Sonora, Mex.
Officers: John M. Bishop, pres., Washington, D. C.; A. H. McCarthy,
p.; T. Addison Bell, sec.-treas.; with Gen. Jas. S. Clarkston and Wm.
rney, directors.
Inc. Feb. 6, 1909, in Maine. **Cap.**, $2,000,000; shares $100 par; $1,806,000
standing. Company is a close corporation.
Property: several valuable properties near La Dura in the Yaqui River
trict, Central Sonora. Two of the properties, the Promontorios, silver-
d and the Mesita, copper-silver-lead ore, had just reached the shipping
ge when the Mexican revolution stopped all operations, May, 1912. Com-
y expects to resume operations as soon as country is once more safe.

NTO MINE **SONORA**

Address: D. L. Fain, mgr., Carbo, Mexico. J. C. Underwood, pres.
e in 1918 it was reported that this property had been reopened.

RIA MINING CO. **SONORA**

Office: 516 Providence Bldg., Duluth, Minn.
Officers: Joseph Backus, pres., Virginia, Minn.; Jas. A. Butchart, sec.-
s.; with Thos. F. Brady, Martin Trewhella and Thos. A. Armstrong,
ctors.
Cap., $500,000; shares $1 par.
Property: the Carmen mine, in Arizpe mining district, Sonora.
Ore: silver, gold, in veins in andesite and rhyolite.
Development: by shaft; greatest depth 350', with 3,000' of underground
kings. Had been idle 4 years, owing to the revolution, but resumed
k in February, 1917. Rich silver ore was extracted but on account of
dits work was again suspended.

LCZER MINING CO. **SONORA**

See Copete Consolidated Copper Co.

SA RICA GOLD CO. **SONORA**

Address: A. G. Frick, sec., Freeport, Ill.
Inc. 1905, in South Dakota. **Cap.**, $3,000,000; $3 par; 700,000 issued to
Smith, A. F. Tanner, and others of Chicago, the organizers.
Property: 415 acres, 40 miles E. from Sahuaripa, Sonora. About 3,000'
evelopment has been done, mainly on the surface. No work is being
, but taxes are paid and a caretaker is in charge.

XICANA DESSARALLADORA DE MINAS (MEXICAN DEV. & MNG. CO.) **SONORA**

Address: C. N. Knutsen, mgr., Cumpas, Sonora, Mexico.
In May, 1919, it was reported that this company, headed by L. G.
d, had leased the San Nicholas silver mines from the Transvaal Co.
property is 15 miles west of Cumpas, in the Moctezuma district, and
been examined by W. H. Weed for the Transvaal Co.
Equipment: includes a 50-ton flotation plant yielding 2 tons of con-
ate daily assaying 800 oz. silver, 80% lead, and 6% copper. Concen-
is sent to El Paso. Fifty men are employed.

XICAN EXPLORATION & MINING CO. **SONORA**

Controlled by Pacific Smelting & Mining Co.

XICAN METALS CO. **SONORA**

Office: 35 Congress St., Boston, Mass.
Officers: Geo. E. Keith, pres.; Geo. H. Woodman, v p.; Sumner M.
, sec.; Harold C. Keith, treas.; with Eldon B. Keith, directors.
nc. Aug., 1916, in Arizona. Cap., $5,000,000; shares $5 par; assessable;
issued; $2.55 paid.
succeeded the Arizpe Mines Co. and holds title to property

through the Moctezuma-Arizpe Development Co., legalized in Mexic Fully described in Vol. XI, Copper Handbook.

Old Colony Trust Co., registrar; Federal Trust Co., transfer agt. Annual meeting, second Monday in September. Listed on Boston Curb.

Mexican property near Cananea, Sonora, Mexico, closed down in autumn of 1914. After geological survey of property made by J. M. Litch checked by A. H. Rogers, Boston, and Franklin W. Smith, of Bisbee, it was decided to sell or abandon such property as directors considered unworth and to purchase new properties.

Company took a 5-year lease in 1917 on the Ajax property at Cripple Creek, Colo. The ore assays $25 to $40 per ton, and is said to have yielded about $20,000 net monthly.

MEXICO MINING, REFINING & EXPLORATION CO. SONORA

Mail unclaimed, at former office, 501 I. W. Hellman Bldg., Los Angeles, California.

Officers: Wm. T. Calderwood, pres. and gen. mgr.; Dr. Chas. B. Nichols, v. p.; F. C. Lamb, sec.-treas.; preceding with E. B. Lovie, C. A. Neil, L. A. Davis and A. A. Snodgrass, directors. B. A. Ogden, supt.; A. Wainwright, engineer.

Inc. 1905, in Arizona. **Cap.**, $5,000,000; $1 par. Annual meeting, second Monday in April, at Nogales, Ariz.

Property: El Creston de Cobre mine, 35 miles west of Hermosillo, an antigua dating from the eighteenth century. The property carries ore bodies, 2 of which are said to be 30′ wide, and traceable 1,400′, with ore averaging 4% copper, 8 oz. silver and $1 gold per ton.

Development: by 8 shafts, deepest 300′, and 4 tunnels with 1,000′ of workings estimated by the company to show 100,000 tons of ore.

Le Cobriza mine, at Soyopa, is said to show a 16′ vein with a 7′ pay streak, carrying copper-silver ore.

Equipment: includes 235-h. p. steam plant, 2 hoists, 6-drill air compressor, and 20-ton mill. Company was planning to erect a 100-ton smelter but revolution interfered. No recent information secured.

MINA MEXICO MINING CO. SONORA

Out of business. Succeeded by the Minas de Mexico, S. A., Compania de, which see.

MINAS DE MEXICO, COMPANIA DE SONORA

Office: Mina Mexico, Sonora, Mexico.

Officers: H. L. Hollis, pres., 1025 Peoples Gas Bldg., Chicago, Ill.; P. Ryan, v. p.-gen. mgr., 1202 Mills Bldg., El Paso, Texas; J. M. Gonda, sec.; E. F. Bryant, treas.

Property: the copper mine formerly worked by the Mina Mexico Mining Co. at Mina Mexico, Sahuaripa district, Sonora, Mex.

Equipment: includes a power plant, small mill and smelting plant. Property has been in charge of caretaker for several years, will be operated when Yaqui River branch of the Southern Pacific has been rebuilt.

MINERA CONSOLIDA LOS AZTECAS, S. A., COMPANIA SONORA

Controlled by Aztec Consolidated Mining Co., which see.

Inc. in Mexico. **Cap.**, 10,000 pesos; 1 peso par; 9,997 held by Aztec Cons. M. Co. Company holds title to Mina Verde and La Polka mines.

MINES COMPANY OF AMERICA SONORA

Acquired by Dolores Esperanza Corporation, which see.

In a statement dated January 25, 1919, company said that on account of the revolution in Mexico, it had been unable to operate, was subjected to great expense, and had incurred debts the inability to pay which endangered company's title to its property.

In 1910 and 1911, a total of 581,014 tons of ore yielded $5,670,[illegible], which $1,933,053 was profit. Raids occurred at Dolores and El Rayo in 1912. The latter was closed for some months in 1913, but was re-opened in February, 1914, for a time. Efforts to work El Rayo and Creston mines were suspended, but in 1916 the latter was operated at a loss of $239,[illegible]

INNEAPOLIS COPPER CO. **SONORA**

Mine address: Cumpas, via Nacozari, Sonora, Mexico.

Officers: J. W. Christy, pres.; James Thompson, sec.; F. A. Guice, gen. r.

Inc. June, 1906, in South Dakota. **Cap.** $1,000,000; shares, $10 par; o inc. in Mexico as Minneapolis Copper Co., S. A., the South Dakota poration being a holding company. Is operated in the United States ler the title of Minneapolis Copper Development Co., the reason for ich has not been explained.

Property: 277 hectares, about 30 miles S. E. of Cumpas. Property ries several fissure veins, in andesite, with N. E. strike, of which 4, under elopment, are of 5′ to 8′ estimated average width, carrying tetrahedrite, imated by company to average 10% copper, with traces of lead and zinc, o 40 oz. silver, and $1 and upwards in gold, with occasional very high ays.

Development: the Archipelago mine, the principal property, has a 250′ line shaft, and the mine as a whole has about 8,000′ of workings, mostly ore.

Equipment: includes a 35-h. p. gasoline hoist and 5 buildings. There lso a 75-ton smelter, built in 1912. Transportation is by wagon-road to npas, freight being carried in two 90-h. p. gaso-electric trucks.

Operated under lease, 1917, by Samuel E. Greenidge, of Douglas, zona. No later returns received.

)CTEZUMA COPPER CO. **SONORA**

Fully described under title of Phelps Dodge Corporation, U. S.

)UNTAIN CONSOLIDATED COPPER CO., S. A. **SONORA**

Owned by Canario Copper Co., which see.

Office: Room 23 First National Bank Bldg., Douglas, Ariz. **Mine ad-**ss: Nacozari, Sonora, Mexico.

Officers: same as Canario Copper Co. **Management:** same as El Can-Copper Co.

Property: Batamoti mine, containing 63 pertenencias, situated about 7 :s west of Purica station which is on Nacozari railroad, about 10 miles th of Nacozari, Sonora, Mexico.

Geology: the Batamoti vein is from 350 to 500′ wide and heavily min-ized on the surface for a length of 2,000′. The wall rocks consist of esite and monzonite. The mineralization occurs in acid-porphyry and ceous rocks. The orebody is cut off on the west by a large quartz-por-ry dike, and on the east by an extensive granite-porphyry intrusion.

Development: old workings consist of 300′ shaft and several tunnels racing about 6,000′ mining work, mostly in the andesite on the foot-wall of the main orebody. New work consists of 350′ crosscut tunnel to cut orezone the full width of 500′. Tunnel is said to be in ore, sampling 1.5 to 9.9% copper. Upon completion of tunnel, a drift will be run n the bottom of the old shaft 1,100′ west to intercept the main orebody depth of about 1,000′.

A road has been surveyed from Purica to the mine, a distance of 8 s. The maximum grade will be 8%. Work was started on road-build-May, 1919.

:OZARI CONSOLIDATED COPPER CO. **SONORA**

Controls the Tharsis-York Co., which see.

Office: First National Bank Bldg., or P. O. Box 1074, Douglas, Ariz. **e office:** Pilares de Nacozari, Sonora, Mexico.

Officers: John G. Alexander, pres.-gen. mgr.; T. D. East, v. p.; B. R. ell, sec.; Roy Hiatt, treas.; with L. M. Williams and R. C. Heath, direc-Fred Alexander, mill supt.; George Motz, mine supt. and purch agt.

Inc. July, 1907, in Arizona. **Cap.** $6,000,000; $5 par; increased Feb., from $3,000,000; 658,848 issued; 541,516 shares in treasury, February 919. Annual meeting, second Monday in July.

Balance sheet of February 14, 1919, showed cash on hand, $2,969. Oper-

ating expenses at the mine from November, 1917, to February, 1919, were $15,899. Mine expenses for year ending November 1, 1919, were $

Property: 17 claims, 502 acres, in 3 contiguous groups, adjoining the Pilares mine of the Moctezuma Copper Co. on the E. and S. The Galera tract shows andesite and brecciated rhyolite cut by several large quartz veins containing copper lead and zinc sulphides, with gold-silver values. The Tharsis-York or Central group was acquired by the company in December, 1918, by purchase of a majority of the Tharsis-York stock. This land, with that of the Copper King group, to the east, contains a big outcrop or red 'reef', 600' wide, of brecciated silicious vein-matter, which is regarded by the Nacozari Cons. management as an extension of the Pilares deposit.

Development: by a main crosscut tunnel to cut the Pilares reef at a depth of 600'. This tunnel was advanced 1,440' in 1919, and at 4,000' from portal cut a diabase dike forming south wall of Pilares lode. On the main tunnel level 100' of drifting was done; total work, 11,500', including shafts, crosscuts and tunnels. The workings of the 400' San Pablo shaft on the Galera group develop ore that is mined for shipment, the last carload being said to assay 0.89 oz. gold, 98.89 oz. silver, 21.6% lead and 1.04% copper, or a value of $113 per ton.

The San Pedro claims of the Moctezuma Copper Company, have been leased to this company and a drainage-tunnel is being driven to connect with the San Pablo shaft. By acquiring control of the Tharsis-York property, the company was able to resume work on the main tunnel, stopped since April, 1917. Total development work for year 1919 was 2,140'.

Ore reserves: reported to be 15,000 tons of $35 ore; 60,000 tons of $ ore; and about 500,000 tons of $10 to $12 ore.

Equipment: includes compressor, air drills, and a 100-ton concentrator with flotation unit. Company plans erection of a 200-ton smelter.

NORTHERN SIERRA MADRE MINING CO. SONORA

Address: D. E. Alexander, Humboldt Savings Bank Bldg., San Francisco, Cal. Mine near Soyopa, Sonora, Mex.

Officers: Chas. K. Blender, pres.; Carlo Giovannetti, v. p.; John O'Donnell, sec.; Fred Townsend, treas.; preceding, with D. E. Alexander, Fred Trevarrow and E. C. Curtis, directors, at last report.

Inc. Aug. 2, 1901, in California. **Cap.**, $300,000; shares $1 par.

Property: La Reina de Cobre and Providencia copper mines and El Colosus silver-lead mine, 25 miles west of Suaqui de Batuc. La Reina shows diabase, shale and limestone, carrying orebodies of sulphide ores with quartz gangue.

Development: by 633' of workings. Management estimates 4,854 tons of ore in sight, with 3,214 tons blocked out for stoping. Idle some years.

NORTH TIGRE MINING CO. SONORA

Address: R. D. Brown, pres., and F. J. Holmes, mgr., Douglas, Ariz.

Property: La Protectora, La Protectora No. 2, and the Esperanza groups, leased to North Tigre Leasing Co., of Bisbee and Douglas, 2½ years. The mine is said to be located on the Lucky Tigre lode, which on this group is 4 to 20' wide and carries ore said to assay over 100 oz. silver, 6 to 7% copper and 25% lead.

Development: is by tunnels, the lowest, No. 8 tunnel, having a vertical depth of 800', with total of 5,000' of underground workings. Ore in sight is said to total 30,000 tons, worth $1,250,000. A 5' vein of ore carrying 1 to 2,000 ounces native silver per ton, was cut early in 1920.

Equipment: includes a 50-ton mill with flotation unit, completed February, 1920. Power is purchased from the Copper Queen plant at Douglas over a branch line run from El Tigre mine.

PACIFIC SMELTING & MINING CO. SONORA

Office: 20 Broad St., New York. **Mine and smelter office:** Fundicion, Sonora, Mex.

Officers: Melbert B. Cary, pres.; Geo. M. Ryall, v. p.; Nelson S. Hunt

, sec.-treas.; preceding, with Ronald E. Curtis, Howard McWilliams Charles E. Wetmore, directors. Thornton C. Kirkland, asst. gen. mgr. Inc. Oct. 6, 1909, in Maine. **Cap.**, $8,000,000; shares, $5 par, issued in 7,850 convertible cumulative 7% preferred stock and $6,262,150 com- stock; all issued. United States Corporation Co., New York, registrar. ıal meeting, third Monday in January, at Augusta, Maine. Listed on York Curb.

Holdings: company controls the Douglas Copper Co. and Mexican oration & Mining Co. by ownership of 98% of the capital of each com- . These companies hold practically the whole of the capital of 5 diary Mexican corporations, viz.: the Anita Mines Co., Yaqui Mining and the following smelting companies: Compania Metalurgica y Re- ora del Pacifico, S. A., owning the Fundicion smelter; the Mexican rican Smelting & Refining Co., S. A., owning the Guaymas smelter he Sinaloa Smelting Co., holding the Mazatlan, or Sinaloa smelter con- on.

Anita Copper Mines Co., S. A., owns the Anita mine with 330 acres, 25 north of the Fundicion smelter and station of that name on the ıern Pacific Railroad of Mexico. Mine has been developed to a depth 0' on the dip of the vein and ore reserves above the 7th level were esti- d by Courtney de Kalb at 55,000 tons, that average $2.58 gold, $1,17 in and 3.99% copper.

Geology: the Anita (or El Cobre mine), has a shear zone 115' wide with ›rite foot and rhyolite hanging wall. This zone traceable for several sand feet, with N.-S. strike and dip of about 45° W., carries ore in 5 s, or chimneys, the principal one being opened from the surface down e 8th level, branching at the 6th level. Faulting, cross-faulting and iation occur with displacements up to 200'. Ore is said to be a meta- tic replacement of diorite accompanied by a contact metamorphic sit. It contains the usual oxide minerals succeeded in depth by chal- rite.

Development: comprises a 900' inclined main shaft with 9 levels opened about 7,415' of workings. There are also 4 other shafts.

The surface equipment consists of 2 cross-compound 2-stage Rand ›ressors of 3,000-cu. ft. combined capacity; a Risdon second-motion x hoist, 14x21"; three 150-h. p. boilers; generator for light and power; crushers, picking tables, shops, assay office, office buildings, ware- s, dwellings, supplies, etc.

The Pirita mine, 81 acres, 5 to 7 miles from Victoria station contains ic ore having small values in gold, silver and copper. The deposit will ually become of value to the company for fluxing purposes.

Yaqui Mining Co., S. A., owns several slightly developed mining prop- s including the Rosamond and Aurora mines with about 1,600' of de- ment work, exposing commercial copper-silver ore.

Compania Metalurgica y Refinadora del Pacifico, S. A., owns the Fun- n smelter, built originally to treat the ores of the Anita mine and to do m business. The plant has a capacity of 350 tons a day, but was de- d and in part equipped for 3 times that amount. It has one 42x160" furnace, sampling mill, power house, shops, administration buildings, n electric plant for lighting and power purposes, all machinery except- rard locomotives being motor driven. The plant is of modern design in excellent condition. Plant idle for 5 years.

The L'Aime lime quarry, has 75 acres of limestone averaging 1.2% with about $1 in gold.

Mexican-American Smelting & Refining Co., S. A., owns the Guay- amelter with 250 acres, at Batuecas, a suburb of Guaymas, on tide ing between the Bay of Guaymas and the S. P. R. R. of Mexico. plant was erected by William C. Greene, founder of the Greene-Cananea ıer Co.

The Sinaloa Smelting & Refining Co., S. A., owns a concession from

ating expenses at the mine from November, 1917, to February, 1918, \$15,899. Mine expenses for year ending November 1, 191

Inc. June 25, 1908, in Arizona. **Cap.**, $3,000,000; shares $10 par.

Company supposed to have been organized as successor of the Sonora pper Co., but apparently owns only a 50% stock interest in that company, l title to the Mexican property is held in the name of the International pper Ore Corporation, which is controlled, in some manner, by this com- y, the corporate relations being neither clear nor satisfactory.

Property: about 500 acres, including the Cobre Grande, 123 acres, 5 es east of Noria, the principal mine, is not considered worthy of the ney spent upon it and the past history of the president is such that the pany is regarded with much suspicion.

NORA DEVELOPMENT CO. **SONORA**

Office: 500 New Ridge Bldg., Kansas City, Mo. **Mine office:** Cumpas, ora, Mex.

Officers: H. P. Wright, pres.; D. J. Haff, 1st v. p.; H. C. Page, 2nd v. p.; A. Rule, treas.; J. W. Amerman, sec.; with William Huttig, directors. national Commission Co., Y. Soto, mgr., agents.

Inc. in Arizona. **Cap.**, $2,500,000. **Reorganization** completed in 1919, standing shares reduced to $500,000. Company absorbed the Good- Mining & Milling Co., and its

Property: 320 acres; 50 acres; Nacozari Copper acres; Sturmo, 40 acres; La Gran 35 acres; Wostenholm, 35 acres. show drifts, ary plans a

Extensive drilling at La Verde, of the Transvaal mine proper, has developed a large tonnage of low-grade primary ore, averaging 1¾% copper and estimated by the management at 3,000,000 or more tons, which will doubtless be treated some day by flotation methods. The drills have shown the ore to extend to a depth of 1,100'.

The **Cobre Rico mine** has 2 shafts, No. 1 of 100' and No. 2 about 140' deep, with several tunnels and about 16,400' of workings, (including diamond drilling) developing several orebodies in a mass of brecciated rock, locally called trachite. Ore is estimated to average about 2% copper, 1 to 2 oz. silver and a trace of gold. Management estimates 2,500,000 tons available in this mine.

The **Buckeye mine** has about 10,000' of tunnel work, on a blanket vein of 6" to 4' thickness, showing ore reported to have given average returns of 12% copper and 8 to 10 oz. silver, with a trace of gold. There are about 5,000 tons of high grade ore left in the mine and a considerable amount of low-grade ore of no present commercial value. The mine, however, has been thoroughly explored in the bottom, or lower tunnel level and the ore shoot found to have played out.

The **San Nicolas mine** is a silver property about 8 or 10 miles from the Transvaal. It shows a vein varying from 1 to 4' in width, carrying silver-lead ore said to change to copper in the lower workings. The mine is reported to have yielded 6,000 tons of 60 oz. silver ore and still has between 2,000 and 3,000 tons of 50-oz. silver ore. It is regarded as a promising prospect, especially for lateral development. In May, 1919, it was reported that the San Nicolas Leasing Co. operating as the Mexicana Dessaralladora de Minas, had secured a lease on this mine. A 50 ton flotation plant was erected.

The **Ultima Chanza mine** has a 300' incline shaft and a 100' winze, with about 5,000' of workings, developing a fissure vein of 10" to 42" width. The management estimates 50,000 tons of ore in sight, averaging 10% copper, 5 oz. silver and a trace of gold. This property is a good, but small mine, needing further development. Equipment includes a steam plant and hoist.

The nearest rail station is at Nacozari, 30 miles north, but the Cananea, Rio Yaqui y Pacifico railway has surveyed a line to within 9 miles of the smelter. The company has built about 35 miles of wagon roads and 25 miles of trails at a cost of $50,000, with a maintenance charge of about $5,000 yearly.

The main camp is at La Verde, 25 miles S. W. of Cumpas, where mining operations are centered. There are 20 buildings, including 3 power plants, machine shop, carpenter shop, smithies at the principal mines, 2 laboratories, a boarding house, general store, with a branch store at the smelter, a hospital and several dwellings.

Smelter: at Cumpas, about 25 miles from the mines, was located at this point because of a good site and ample water supply. Equipment includes a 125-ton 42"x120" El Paso Foundry & Machine Works water-jacket blast furnace, with room for 2 additional furnaces of the same size. There is a reverberatory furnace, of 50 tons daily capacity, and a sampling mill, capable of sampling ore to feed 3 furnaces. The smelter power plant includes three 80-h. p. Babcock & Wilcox boilers, an Allis-Chalmers tandem-compound engine and a Connersville blower. This smelter was blown in May 1, 1906, treating ores from the Buckeye and San Nicolas mines and doing a little custom business, producing matte shipped to the Laurel Hill works of the Nichols Copper Co., and from May 1, 1906 to November 3, 1907, a period of 18 months, the smelter, in operation about two-thirds of the time owing to scarcity of freighting outfits, smelted 18,550 tons of ore having an average assay tenor of about 10% copper and 8 oz. silver for copper ore, and 2% copper and 60 oz. for silver ore, making 3,089 tons of matte, yielding 2,178,555 lbs. fine copper, 407,607 oz. silver and 240 oz. gold.

[illegible] ment work done on the property since [illegible] veins of rich ore and large deposits of low

rade ore. The property will be worked on a large scale when given the ail connections now lacking but absolutely essential to the successful exloitation of the ores.

TRENTON-SONORA MINING CO. **SONORA**

Mine office: Tarachi, Sonora, Mexico.

Property: 4 miles S. of La Calera, includes the San José, Santa Edu-iges, El Porvenir and other mines, carrying copper ores, with values mainly in ilver. The San José mine is reported to show an 18" paystreak of highly urriferous chalcopyrite.

Development: by a 200' shaft sunk on the vein, equipped with a hoist. There is a mill and a smelter. No recent returns. Probably idle owing to Mexican conditions.

UNITED MEXICAN MINES **SONORA**

Idle at last reports. Mine near La Verde via Cumpas, Sonora, Mexico. O. .. Neer, mgr., Douglas, Ariz.

Property: 40 miles S. of Nacozari, includes the Veta Grande and Cerro Gordo groups, near the Transvaal mine.

Mines show rhyolite, granite and porphyry, with several orebodies occurring n fissure veins, and as breccia deposits between trachite and granite. Ores are opper sulphides.

VICTOR MINING AND SMELTING CO. **SONORA**

Office: 315 Schultz Bldg., Columbus, Ohio. **Mine address:** Cananea, Sonora, Mexico.

Officers: S. D. L. Jackson, pres.; M. F. Cole, v. p.; F. P. Jackson, sec.-reas.; preceding, with J. S. MacLean, W. H. Sartain, C. Thornton, Chas. Schindler and C. A. Stillwagen, directors. W. A. Woodlief, fiscal agent.

Inc. May 9, 1905, in Arizona. **Cap.**, $1,500,000, increased 1907, from 1,000,000; shares $10 par; issued, 90,000 shares. Title to property is held hrough the **Guerrero Mining Co.**, legalized in Mexico. Annual meeting, 2nd Monday in January.

Property: 47 pertenencias, in 2 groups in the Magdalena district, about 2 miles S. W. of Cananea, shows fissure veins in granite-porphyry intruding edimentary rocks.

Development: by 5 short tunnels, about 1,500' of workings, showing igh-grade copper ore with small gold and silver values, in 2 veins of about ' and 70' width, latter without ore.

Mine was ordered sold at receiver's sale, September 11, 1916, at Nogales, Ariz.

WASHINGTON MINES DEVELOPMENT CO. **SONORA**

Office: Douglas, Ariz. **Mine office:** Washington Mine, via Huepac, Sonora, Mex.

Officers: F. O. Bostwick, pres.; Geo. Cass, v. p.; Albert Sames, sec.-reas.

Inc. 1911, in Arizona. **Cap.**, $1,500,000; shares $10 par; issued 130,000 hares.

Property: 27 hectares in the Arizpe district, 60 miles from Nacozari, he nearest rail point. Claims show several big "pipe" deposits composed of brec-iated rhyolite in dacite. Ore is reported to average 3.2% copper, 0.35% tungstic cid, 1.5 oz. silver and some gold.

Development: by a total of about 6,000' of workings said to show 00,000 tons of ore blocked out for stoping.

It was reported in 1918 that L. D. Ricketts and J. S. Douglas had acquired he Washington mine. The price was said to be $400,000, of which $25,000 was aid down.

YAQUI CANYON COPPER CO. **SONORA**

Probably dead. Described Vol. XIII. Formerly at Suaqui de Batuc, Ures, Sonora.

YAQUI COPPER CO. **SONORA**

Found. See Vol. XIII.

Property: owns 25 sq. miles of mineral bearing land, including the Rosario mine and Sabana Grande mine nearby, at San Juancito, Honduras, C. A.

Development: results may be shown as follows:

Year	Footage	Ore Mined, Tons	Reserves, Tons	Value per Ton	Cost per ft.	Cost per Ton
1918.....	11,266	74,816	282,559	$15.15	[illegible]	[illegible]
1917.....	9,581	83,052	303,296	9.21	$12.21	$0.87
1916.....	12,637	81,513	312,143	9.51	9.91	0.97
1915.....	13,000	90,162	343,716	9.76	10.18	1.09

The Rosario contains about 20 mineral bearing veins, which have been or are now being worked. The south San Miguel was the main producer in 1918.

Geological investigations of the entire zone, as well as surrounding country, were concluded in 1916. Electric haulage on the Peña Blanca and lower 600 levels was very satisfactory.

Two crosscuts have been driven—the Peña Blanca—Esperanza, beginning at the S. E. end of the Esperanza No. 3 and running in a S. W. direction to develop the southern territory, and the Peña Blanca S. W. crosscut, starting at the junction of the Southwest and Jucuara veins in Block 84, and planned to reach Jucuara gulch. With this connection made, additional water power and cheap timber are obtainable from the western side of the mountain. The cost of timber was reduced from $22.50 to $12.50 per 1,000 board feet since the tramroad was completed. Rock passed through was not favorable for ore deposition. The Esperanza crosscut opened some ore, which is being developed.

Exploration of other properties is part of the regular work of this company. Results have been as follows:

Company spent 37,871 pesos for prospecting and development on the Chile Mountain concession without promising results. Three gold-silver veins of low value did not persist at depth and work was stopped.

An option on the Guasucaran area was dropped, also on Santa Rosa de Potosi. Some work is under way at the Aurora-Santa Elena group, adjacent to the Rosario.

The most promising property is the Sabana Grande, 40 miles west of the Rosario, which has been under development since 1915, and on January 1, 1919, contained 18,190 tons of ore averaging $57.40 per ton in silver and gold. A mill, described later, has been erected, and contains a flotation plant, the first of its kind in Central America.

Equipment: at Rosario, 1,200-h. p. hydro-electric plant, hoists, 5, 6, and 7-ton electric locomotives in the mine, 2 air compressors, machine-drills, sawmill, 350-ton cyanide mill using aluminum dust precipitation, machine shops, assay office, hotel, store, schools, hospital, and garrison consisting of a commandant, 58 officers and men.

At Sabana Grande—three 50-h. p. oil-driven air compressors, and 35-ton mill containing 100-h. p. Fairbanks-Morse oil engine, jaw-crusher, 4x6' ball-mill, Dorr machinery, K. & K. flotation machines, and Oliver filter, laboratory, shops and dwellings.

Production:

Year	Ore Treated, Tons	Extraction Silver, %	Extraction Gold, %	Extracted Silver, Oz.	Extracted Gold, Oz.	Total Cost per Ton
1918.....	143,050	86.75	88.31	1,587,468	9,748	$9.41
1917.....	141,218	93.79	94.00	1,670,612	13,790	7.49
1916.....	128,030	89.04	94.24	1,810,886	14,989	6.31
1915.....	117,790	87.45	92.32	1,748,803	15,211	5.74

New York & Honduras Rosario is an extensive property making good profits. Its resources are extensive, and exploration continues to open up new mines. Reports contain a wealth of interesting mining and metallurgical information.

WEST END OPOTECA MINES CO. HONDURAS

Subsidiary of West End Consolidated Mining Co. of Nevada.

Inc. 1920. Cap., $3,000,000; $1 par.

Property: 1,500 acres, including the Opoteca gold-silver mine, upon which nearly $100,000 has been spent. The mine is fully equipped, and extensive development work has revealed ore in 20 places.

NICARAGUA

BABILONIA GOLD MINES, LTD. NICARAGUA

Office: 1 London Wall Bldgs., London, E. C. 2.

Officers: J. H. Cordiner James, chairman, with J. A. Agnew and A. Pomeroy, directors. G. G. Hay, sec.; J. V. Lake, mgr.; James Brothers, cons. engs.

Inc. in England, June 9, 1911, as Sierra Guaranty Syndicate, changed Dec., 1911, to present title. **Cap.,** £200,000; shares £1 par; 170,007 issued, fully paid; 150,007 shares held by Lake View & Oroya Exploration, Ltd.

A profit of £1,290 ($6,200) was made in 1917.

Property: 3 gold claims—Crimea, Babilonia, and Santa Maria—at La Libertad, Chontales district, Nicaragua.

Development: ore reserves at end of 1917 were estimated as 37,095 tons, averaging 37s. 6d. ($9) per ton. Mining has been much hampered by water.

Equipment: includes 75-ton pneumatic (Holman) stamp-mill and cyanide plant.

Production:

Year	Tons	Value	Year	Tons	Value
1917	22,328	£42,941	1915	9,586	37,152
1916	19,344	40,526	1914	7,675	21,155

COCO RIVER MINING CO. NICARAGUA

Office: was at 50 Broadway, New York.

Officers: J. G. Turrif, pres.; H. A. Currie, v. p.; Gordon D. Bruce, 120 Broadway, New York City, sec.-treas.; A. A. Holland, managing director; J. A. Calder, J. T. Brown and J. H. Lamont, directors, at last accounts.

Inc. in Delaware. **Cap.,** $1,000,000; $1 par; 500,000 issued. U. S. Corporation Co., 28 Cedar St., New York City, registrar and transfer agent.

Property: 175 acres in Cabo Gracias district, Nic., C. A., 60 miles inland and 3 miles from navigable river, via Cabo Gracias.

Ore: free milling gold quartz said to average $5 per ton, including all developed oxidized ore.

Equipment: costing $125,000, includes 200-ton mill "of ironwood and mahogany," electric motors, etc. A report by A. A. Holland, mining engineer, is said to give 2,000,000 tons blocked out and 4,000,000 partly blocked out.

Company planned installation of 300-h. p. hydro-electric plant on Coco river and to enlarge mill to 500 tons daily capacity, addition of cyanide mill and disintegrator.

Management expected to make a 95% extraction less $1 a ton for all costs, leaving a profit of $1,875 daily when treating 500 tons. Costs seem to be figured too low. Nothing new available early in 1920. Probably dead.

CONSTANCIA-SIEMPRE VIVA MINES NICARAGUA

Property: in the Pis Pis district, now producing from $20,000 to $30,000 gold per month. The mill extracts 95% of the metal.

EDEN MINING CO. NICARAGUA

Controlled through ownership of 55% of capital stock, by Tonopah Mining Co. of Nevada.

Office: 572 Bullitt Bldg., Philadelphia, Pa., and Bluefields, Nicaragua, C. A.

Officers: J. H. Whiteman, pres.; C. R. Miller, v. p.; C. A. Higbee, Baston Hoopes, H. D. Moore, Samuel Bell, Jr., G. S. Munson, and W. I. Forbes, directors; F. S. Bickmore, sec.; W. H. Blackburn, con. eng.; M. B. Huston, gen. supt. The engineers responsible for bringing the property to the productive

stage were Louis Garbrecht, J. L. Phillips, and Robert Hawxhurst, Jr., successively.

Inc. Nov. 24, 1914, in Delaware. **Cap.**, $1,000,000, all outstanding; shares $1 par, non-assessable. Company office, transfer office, Fourth St. National Bank, Philadelphia, registrar. Annual meeting, first Wednesday in May.

Property: 9 square miles in the Pis Pis mining district, which is 100 miles in direct line from the town of Prinzapolca on the east coast of Nicaragua. Transportation of supplies from the United States involves 1,200 miles by ocean steamer, 90 miles by coast schooner, by barges up to Tunky, transfer into "pipans" to Miranda on the Tunky river, and finally 7 miles by narrow-gauge railway to the mine. The full distance from Prinzapolca is 187 miles. It costs from $90.78 to $131.28 per ton to carry freight from New Orleans to the mine. The rainy season lasts for 8 months, when wheel vehicles cannot be used. The Tunky Transportation & Power Co. which operates the railway and power-plant is controlled by the Eden company.

The financial statement for the year 1918 shows that receipts totaled $428,327, of which $355,000 was loans from the Tonopah Mining Co. Expenditures were $433,320. Cash on hand decreased from $13,172 to $8,178 at end of 1918. Current assets amount to $453,305, and liabilities $56,528. Loans from the Tonopah Mining Co. total $1,994,000. The Eden company lent the Tunkey Transportation & Power Co., a subsidiary $408,309.

Development: as the property is mountainous, the veins are all opened by tunneling, there being 6 main adits at an elevation of 652 to 1,307 ft. above sea-level. The main tunnel has an electric haulage system, the locomotive handling 20 tons a trip. The two veins so far developed—the Culebra and Eden—strike E. and W. and N. and S., respectively and dip steeply, so that shrinkage stoping is used. The oxide ore near the surface breaks easily; but the deeper ore is difficult to blast. The Culebra vein is rather more uniform in value than the Eden, in which the values are bunchy. The main tunnel will be driven 1,000 ft. to get under a known ore-shoot in the Hidden Treasure vein. Ore reserves are estimated as 107,879 tons, worth $11.92 per ton, equal to 2½ years supply for the mill.

Equipment: includes fully equipped machine-shops, sawmill, ice plant, wireless station for distant communication, hydro-electric plant of 700-h. p. turbine and 500 kva. generator, since increased to 1,400-h. p., sub-station, electric locomotive, two 600-cu. ft. air-compressors, drills, and 150-ton cyanide mill including ball and tube-mills.

Production: the mill started in November, 1918, and produced $45,947 to the end of the year. The extraction in December was 95.1%.

In 1919 the mill treated 36,159 tons of $12.94 ore, yielding $445,350. Costs averaged $10.65 per ton.

According to W. H. Blackburn, there should be a satisfactory profit for each month's operation in the future.

LA LUZ & LOS ANGELES MINING CO. NICARAGUA

Offices: 511 Fifth Ave., New York; and Frick Bldg., Pittsburgh, Pa.

Officers: J. Gilmore Fletcher, pres.; Jesse C. Scobey, mgr., at Pittsburgh; H. A. Watson, gen. mgr., Prinzapolca, Nicaragua; H. G. Smith, mill supt.; Dr. Benjamin Cuadra, attorney at Prinzapolca.

Property: near the Eden mine, but on a different branch of the Prinzapolca river, in the Pis Pis district, Nicaragua.

Ore is a soft altered shale, a considerable portion locally known as 'mantle' being no more than a stiff clay. Mine is generally regarded as a large, low-grade gold property, whose reserves of oxidized ore are nearing the end. The future of the mine depends upon a successful treatment of the underlying low-grade base ores.

Equipment: includes a milling plant employing six 3½' Huntington mills fitted with 20-mesh screens, and amalgamating inside and outside. Recovery by amalgamation averaged from 60 to 75% for a 7 year period, and quicksilver consumption was but 0.144% of that fed to the mills. The bullion is 840 fine in gold and 150 fine in silver.

Company has been working for 15 years, but informs us in effect that it considers it inadvisable to give out any information. It is said that production and profits have been regular for many years, and that property has been efficiently managed.

NICARAGUA MINING CO. **NICARAGUA**

Office: 1218 Locust St., Philadelphia, Pa.

Officers: B. C. Warnick, pres.; C. J. Fox, v. p.; W. H. Steigerwalt, sec.-treas.; with C. A. Daniel, W. H. Bilyeu, W. S. Duling, Barry Searle (cons. eng.) and J. M. Steele, directors. W. B. Daniel, gen. supt.

Cap., $2,000,000; $1 par; non-assessable; 1,000,000 being issued early in 1920.

Property: in the Pis Pis district, 100 miles from the Atlantic Coast, 60 miles from Prinzapolca, which is 90 miles north of Bluefields. Supplies are handled by the Tunky Transportation & Power Co., a subsidiary of the Tonopah Mining Co.

Andesite is the prevailing rock of the district, and is cut by diabase dikes and by numerous quartz veins. The main vein system runs N. E. and S. W. and dips 25 to 75° N. W. The vein zone contains many branch, cross and parallel veins, and is cut by faults. The vein quartz contains gold and silver, together with a complex mixture of copper, lead and zinc sulphides.

The company owns the following mines:

(1) the Concordia group discovered in 1894, from which gold worth $1,200,000 was extracted by simple amalgamation, which only saved 46%. The claims cover an area of 300 by 10,000', and include water-power sites that will generate from 300 to 1,000 h. p.

(2) the Lone Star claims of 113 acres, also 1,070 acres of farm land and a 5-acre water power site, completely equipped with 30-stamp mill, 500-h. p. hydro-electric plant, shops, etc., costing $270,000. This mine has yielded $1,200,000; though only 50% of the assay value was recovered.

Development work has proven a block of ore averaging 8½' thick, 925' long, and with an average back of 456', which contains 262,383 tons of ore averaging $10.82 per ton. Gross value of ore developed, $2,839,931. With an 80% recovery, net gross value is $2,271,953. With a working expenditure of $4 per ton or $1,052,531, the net profit is $1,222,415. A 150-ton mill is expected to treat this tonnage in 5 years.

(3) the Bonanza Mars mines of 335 acres, plus 1,600 acres of farm land, together with general equipment, consisting of hydro-electric plant, 100-ton stamp-mill and cyanide plant, houses, etc., which cost $400,000. Reserves are estimated at 2,000,000 tons with over 90,000 tons that will average $12 per ton, available. This mine has yielded over $1,200,000.

The consolidation of these producing properties and their operation by modern methods, are expected to yield large returns.

TONOPAH NICARAGUA CO. **NICARAGUA**

Controlled by the Tonopah Mining Co. of Nevada.

Property: the Santa Rita mines, 30 miles from the Eden Mining Co.'s mine. Diamond-drilling was completed in July, 1918. Work to date has developed 984,232 tons of carbonate ore, assaying 63 cents gold and 4.832% copper; 63,556 tons of sulphide ore, averaging $3.41 gold and 10.287% copper, and 08,800 tons of sulphide ore, containing 27 cents gold and 3.365% copper. There is also 35,500 tons of tailing, assaying $2.73 gold and 1.97% copper. The aggregate is 1,492,088 tons, carrying 91 cents gold and 5.059% copper. Work has been suspended until it is practicable to erect a mill, for which tests have been made.

SALVADOR

BUTTERS DIVISADERO CO. **SALVADOR**

Property taken over August 5, 1919, by El Salvador Silver Mines Co., which see.

BUTTERS POTOSI CONSOLIDATED MINES, INC. **SALVADOR**

Property acquired August 5, 1919, by El Salvador Silver Mines Co., which see.

WEST INDIES

Including Cuba, Hayti, San Domingo, and Porto Rico.

CUBA

METAL MINES OF THE REPUBLIC

The following mines, active at last accounts, are grouped by States:

Pinar del Rio

Asiento Viejo (copper).
El Brujo (copper).
Buena Vista Mining Co. (copper).
Cia. Minera de Cobre de Pinar del Rio y San Juan (copper).
Constancia (copper).
Francisco Mining Co. (copper).
Matahambre (copper).
Mercedita (copper).
San Gumersindo (copper).
Cia. Minera Occidental de Cuba (copper).

Mantanzas

Jack (chrome-iron).

Santa Clara

Carlota (copper and sulphur).
Mercedes (iron and copper).

Oriente

Cauto Mining Co. (manganese).
Cia. Mercantil de Crediror (manganese and copper).
Cuban Mining Co. (manganese).
Juragua Iron Co. (iron ore).
Ponupo Manganese Co. (manganese).
Spanish American Iron Co. (iron ore).

Mining in Cuba was extraordinarily active in 1917-18, but very dull during 1919, when one of the largest mining properties was closed indefinitely. The chrome and manganese deposits were examined for the U. S. Government in 1918 (described in Bull. 380 of the U. S. Geological Survey and in Bull. 153, September, 1919, of the A. I. M. & M. E.)

CUBA COPPER CO. CUBA

Office: 60 Wall St., New York.

Operations discontinued January, 1919, on account of low grade of the ore and abnormal conditions. Equipment being sold. See Vol. XIII for history and description of operations since 1907.

LOS CERROS COPPER CO. CUBA

Office: Blackstone Bldg., Cleveland, Ohio.

Officers: W. I. Boardman, pres.; W. C. Watkins, v. p.; Sherman C. Dalbey, sec.; W. L. Rees, treas.; Col. D. H. Pond, gen. mgr.

Inc. Aug. 12, 1905, in Arizona. **Cap.**, $500,000; shares $100 par.

Property: 2 claims, 100 acres, also 1,500 acres of non-mineral land, near Fomento, Prov. de Sta. Clara, Cuba, opened by 3 shallow shafts and 5 tunnels, longest 250', showing ore assaying 10% copper, 20 to 25% zinc, 20% sulphur and 30% silica, with gold and silver values. Zinc apparently decreases at depth

he vein has a 12' to 15' gossan outcrop along its strike. Property is an antigua st operated in 1750. The ore though mostly low-grade and zinciferous can be ncentrated and property is considered worthy of further development under mpetent direction.

IATAHAMBRE MINES **CUBA**

Address: A. H. Diaz, Consulado 57, Havana, Cuba. D. F. McCorick, Matahambre, Pinar del Rio.

Property: 12 patented claims, leased by estate of M. L. Diaz, about 000 hectares, in province of Pinar del Rio, 110 miles west of Habana.

Geology: ore occurs in lenses in a series of fault veins cutting the dimentary rocks; the ore is a clean sulphide which carries copper (17%), ld and silver.

Development: by 600' vertical shaft and tunnels.

Equipment: includes double-drum Lidgerwood hoist, Ingersoll comessor, De La Vergne oil engines, tramway, and 200-ton concentrator. A powerant is to be built.

Production: 6,000,000 lb. in 1914; 40,000 tons of 12% ore in 1915; 80,000 ns in 1916; and 25,000,000 lb. in 1918.

INAR COPPER CO. **CUBA**

Address: C. H. Hyde, 120 Broadway, New York.

Officers: C. H. Hyde, pres.; Caldwell Hardy, v. p.; with W. H. Hinkle, J. R. Muurling, G. H. Rohrdanz, and C. S. Sweetland, directors.

Cap., $5,000,000; shares $1 par; $3,546,000 outstanding. Listed on New ork Curb. Registrar & Transfer Co., New York, agents.

Property: El Mono claims adjoining the Matahambre copper mines, ar city of that name in Pinar del Rio, Cuba.

ONUPO MANGANESE CO. **CUBA**

Out of business. Formerly controlled by Chas. F. Rand, 61 Broadway, New ork City. See Vol. XIII for description.

EST INDIES MINES DEVELOPMENT CO. **CUBA**

Address: 25 Broad St., New York.

Property: the Constancia and other copper mines near Viñales, Western Cuba, and north of the Matahambre mine. M. Paetzold, former Austrian nsul at Habaña, controls mines.

HAYTI AND SANTO DOMINGO

LANTON COPPER MINING SYNDICATE **SAN DOMINGO**

Inactive. **Address:** The Bourse Bldg., Philadelphia, Pa. **Mine office:** caro, San Cristobal, Santo Domingo.

Officers: E. J. Hedden, pres.; H. A. Smith, sec.; J. B. Thom, treas.; th M. W. O'Boyer, A. D. Blackinton, J. F. Wilt, directors. F. T. Eddingfield, r., Santo Domingo; Otto Peterson, supt.

Inc. Feb. 16, 1910, in Delaware. **Cap.,** $500,000; shares $25 par; nonessable; $360,000 outstanding. Authorized bond issue, $400,000; $180,000 tstanding. Annual meeting, first Monday in January. **Total receipts from** sales from October, 1915, to July 15, 1916, amounted to $45,193, or net cash, ,440, for 857 tons selected ore, the ore averaging 12.4% copper and $1.60 in gold l silver. Shipments from January-July, 1917, totaled 231 tons of 12.78% per ore. This ore is hand sorted about 10 into 1. Property examined and orted on by F. Lynwood Garrison, Thos. F. Donnelly, Henry D. Adams, and T. Eddyfield.

Property: 1,700 acres, held under government concession, including the caro mine, on the Rio Nigua, 27 miles west of San Domingo, bought of San ristobal Mining Co. Property shows orebodies in limestone, near a porphyry ntact, one orebody in the Bucaro mine carrying chalcopyrite, bornite and chalcite, all auriferous and argentiferous.

Development: by tunnels, the work aggregating 3,500' in 1917. Com[redacted] 35,000 tons ore blocked out and that property is near the profitable

stage. The Ferdinand vein opened for 200′ on No. 1 level is said to average 16′ of 4% ore for 150′, and has 25,000 tons nearly probable ore. The Santiago vein appears to be 40′ to 80′ wide and assays ½ to 1½% copper for levels 130′ apart along 200′ drift.

Company out of funds and properties idle.

HAYTI MINES CO. HAYTI

Address: 25 Broad St., New York City.

Inc. 1910, in New York. **Cap.,** $1,000,000; shares $5 par; non-assessable.

Is a New York corporation. Property is held by the Minière de Terre Neuve, a Haitian corporation, whose title is direct from Haitian government, to whom company must pay 5% royalty on all copper or other ores mined, from a concession covering 250 square miles N. W. of Gonaives, Hayti.

The property contains at Memé a contact metamorphic deposit of bornite ore in garnetized Tertiary limestone, invaded and altered by andesite and by quartz diorite. Also veins of copper ore in the eruptive rock at and near the village of Terre Neuve. Considerable surface stripping and numerous shallow shafts and short tunnels have been driven on the property, and shipments of sorted ore made to New York smelters. Reports on property made to Vogelstein & Co. by Duncan Rogers and Bela Low. Examination also made by J. E. France and W. H. Weed.

PORTO RICO

Several copper deposits are known in this island, some of which were prospected 75 years ago, but since American ownership no mines have been worked or even prospected. The Department of Agriculture and Labor was to issue a bulletin on mining opportunities in this Territory.

ABUNDANCIA; MINA LA

Mine near Rio Blanca, Porto Rico, opened in 1869. Produced a small quantity of rich oxidized ore from a paystreak of 8 to 15″, carrying bornite and chalcopyrite averaging 10 to 12% copper, in a 6 to 10′ vein of cupriferous pyrrhotite. Idle for several years.

SOUTH AMERICA

ARGENTINA

FAMATINA CO., LTD. **ARGENTINA**

The company's property is operated by a receiver and manager, appointed June 27, 1913, on behalf of the prior lien and other debenture holders.

Office: 638 Salisbury House, London, E. C., England. **Directors:** Wm. Parker, D. H. Bayldon, and G. E. Stephenson. F. F. Fuller, sec.

Company is a reconstruction of the Famatina Development Corporation, Ltd. **Inc.** June, 1912. **Cap.,** £800,000 shares 10s. par; 1,523,489 issued and fully paid, of which 1,126,165 are credited 7s. paid. Bonds authorized, £200,000 5%, of which £151,500 are issued.

Property: 850 acres, in 4 groups, in the Mexicana district of the Sierra Famatina range, province of Rioja, Argentine Republic, including the 6 principal mines of the district, the Upulungos group, Mellizas group, Compania group and San Pedro group. These lands lie at an elevation of 15,000' and are very difficult of access and transport.

The company has inherited a troublesome problem and a variety of financial as well as mining troubles. Fresh capital was put into the company in 1912, with the understanding that the property would be profitable as soon as smelting was resumed. The then manager, Mr. Parker, stated, May, 1913, that the assay-value of the ore had been overestimated, and that the ore extracted is lower grade than previously reported. The smelter is not yet complete nor running smoothly, and the finances of the company are in a bad way, the £20,000 guaranteed by the big stockholders having been spent and the directors seeking further funds. Mines regarded as good, but company overcapitalized.

No recent information is available, save that the property was examined in 1919 by Bancroft Gore, of New York. Operations are to be resumed 1920, the new machinery ordered including a 7,000 cu. ft. blower.

NATIONAL LEAD CO. OF ARGENTINA **ARGENTINA**

Subsidiary of National Lead Co. of 111 Broadway, New York, organized to manufacture mixed metals in the republic.

BOLIVIA

ARACA; COMPANIA MINERA DE **BOLIVIA**

Office: Oruro or Santiago, Bolivia. Mine at Araca, Bolivia.

ARAMAYO FRANCKE MINES, LTD. **BOLIVIA**

Office: H. F. Ings, sec., 148½ Fenchurch St., London, E. C. 3, England. **Mine office:** Quechisla, Bolivia.

Directors in England: F. A. Aramayo, chairman; Bernard Dale, L. A. Pensington, Robt. G. Ribon, and F. J. Torromé.

Directors in Bolivia: F. A. Aramayo, chairman and managing; C. V. Aramayo, C. Navarro, and M. Roberts (gen. mgr.).

Inc. Oct. 17, 1906, as Aramayo Francke & Co., Ltd. **Cap.,** £600,000; shares £1 par; £597,090 outstanding. Name of company changed to present title, January, 1911.

Profits have been as follows: £135,764 in 1914; £3,504 in 1915; £167,559 in 1916; £[illegible]8,314 in 1917.

Dividends: 6d in 1909; 1s 6d in 1910; 2s in 1911; 3s in 1911-12; 3s 6d in

1912-'13; 2s. in 1913-'14; 1s. 6d. in 1914-'15; 3s. in 1915-'16; 3s. in 1916-'17; 6s. in 1917-'18; and 3 s in 1918-'19 to February, 1919.

Property: consists of the consolidated mining rights over the mountain group of Chorolque, 817 hectares, containing tin, bismuth and wolfram, the concentration works of Santa Barbara, Santa Elena and Sala-Sala; the establishments of Cotani, with its mines; the Quechisla smelter; the mines at Tasna, covering 1,460 hectares, with concentrator and smelter at Buen-Retiro; the mines at Churquini, Chocaya, 81½ hectares, the estates of Quechisla and Atocha and the concentrating plant at Asllani, besides other mining rights of lesser importance.

At Chorolque the company operates 2 groups of mines, the Chorolque at 18,000', with veins averaging 3' wide cutting andesite near limestone contact. Company operations at Chocaya yield silver-tin ores from narrow (1'-3') veins in dacite intrusive in slate. At Tasna, bismuth ores are mined.

Production—the products are varied, as shown below:

Year	Black Tin, Tons	Copper Matte, Tons	Silver, Oz.	Wolfram, Tons
1916-'17.....	2,059	118	523,284	227
1915-'16.....	2,095	19	110,000	148
1914-'15.....	2,060	111	.....	...
1913-'14.....	3,442	342	.....	...

Company is one of the largest operators in Bolivia.

BERENGUELA TIN MINES, LTD. BOLIVIA

Office: G. E. Elgee, sec., Leadenhall Bldg., London, E. C. 3, England

Directors: J. Macandrew, chairman; J. L. Barber, J. D. Campbell, C. M. Read, and J. W. Read. C. L. Price, mgr.

Inc. April 20, 1905, in Great Britain. **Cap.**, £20,000; £1 par; £ issued.

Profit in 1917 was £9,083, of which £4,000 was distributed; £9,038 was carried forward.

Dividends: 20% in 1916 and 1917.

Property: 123 acres of tin claims at Berenguela in Bolivia, equipped with a concentrating mill.

Production: 202 tons of tin concentrate (71% metal) in 1914; 193 tons in 1915; 324 tons in 1916; and 348 tons in 1917.

CASA BELIN HERMANOS BOLIVIA

Office and mine at Potosi, Bolivia.

COROCORO DE BOLIVIA, COMPANIA BOLIVIA

Mine office: Coro Coro, La Paz, Bolivia. G. B. Lott, mine supt.

Inc. April 23, 1873, in Bolivia. **Cap.**, 1,025,000 bolivianos.

Property: 500 hectares; is the largest copper mine in Bolivia, employing, at last accounts, about 1,000 men. Mine 530 meters deep, is opened on steeply inclined sandstone and conglomerate strata carrying native copper, all rarely native silver, with occasional cuprite and chalcocite.

Development: by six vertical shafts timbered with 8x10" Oregon pine and equipped with electric hoists ranging from 50 to 180 h. p. The ore when mined is soft, and even when dry disintegrates in the hand. The copper is between the grains of sand so that grinding in the usual sense is not necessary. Two 12x18" jaw crushers will disintegrate 1,000 tons in 10 hours. Jigs save 95% of the total mill recovery. Capacity of mill is 200 to 250 tons of ore per day with heads assaying 2 to 3% copper.

Equipment: includes a narrow-gauge line between shafts and mill, operated by gasoline locomotive, 1,500-h. p. Diesel engines and a mill. The product is exported as "copper mineral," production ranging from 800 to 1,000 quintals of 46 kilos, monthly, of "barillas de cobre" of about 85% average copper tenor. Copper sulphide, as chalcocite, is exported as crude ore at the rate of 1,500 metric tons monthly of 18% copper.

COROCORO UNITED COPPER MINES, LTD. BOLIVIA

Registered office: 5 Lothbury, London E. C., England. Main office

7 Rue des Italiens, Paris, France. **Mine office:** Corocoro, La Paz. Bolivia.

Officers: Baron René de Batz, chairman; J. L. Barber, P. Bebin, A. Berthin, N. Berthin, G. Charbonnel, F. Harrington, L. Monnier, Baron C. Portalis, and Baron F. Portalis, directors; G. Bryans Wolfe, sec. in London; Roger Leo, sec. in Paris; F. J. Dorrian, gen. mgr.

Inc. Aug. 6, 1909, in Great Britain. **Cap.**, F700,000; shares Ff par; 673,607 issued, fully paid. Company took over the properties of J. K. Child & Co., Ltd.; Sucesión Noël Berthin; Compañia Sud Americana de Cobre de Corocoro, and Carreras Hermanos.

Profit for year ended June 30, 1918, was £168,128, of which £155,448 was paid in dividends. Balance earned to 1919, was £41,547. Reserves total £170,000.

Dividends: 120 francs in 1912-'13; 60 centimes in 1913-'14; 1 franc in 1914-'15; 3 francs in 1915-'16; 6 francs in 1916-'17; and 6 francs in 1917-'18.

Property: 515 hectares at 12,000′ elevation, in the Corocoro district of central Bolivia. The principal mines are the Vizcachani, Santa Rosa and Gualatiri. The first was formerly owned by J. K. Child & Co; the second, by Carreras Bros., and the third by the Noël Berthin estate.

Geology: the copper is found native in several beds of sandstone inter-stratified with reddish and brownish shale. The ore-bearing beds occur in 2 series, separated by a strong fault. Beds to the east of this fault are known as "ramos" and dip east, the copper-bearing strata being succeeded by a considerable thickness of red slates capped by green slates and limestone, overlain in turn by red clay and brown sandstone. Beds west of the fault are known as "vetas," or veins, and are much harder than the copper-bearing ramos. The mineralization is not uniform and the native copper occurs in particles scarcely visible to the naked eye, as well as in grains, plates, threads and, sometimes flat masses weighing several hundred pounds. The main fault, known as Dorado vein, is also mineralized, and was once the main producer of the company, yielding sulphides and arsenides of copper. It is supposed that this fault was the feeding fissure whose solutions spread into the sandstone and were precipitated by organic matter; but there are also other geological theories.

The mine workings have not yet crosscut very far into the series, but show at least 4 ramos and 6 vetas, the four former are divided into 7 cuerpos, or beds, and the 6 veins into 10 to 14 beds. Some of these beds have 7 to 8 meters of homogeneous ore, the white ramos being 30 metres wide on the 10th level of the Vizcachani shaft, of which 8 meters are mined as ores. The beds average 10 meters workable thickness with an average content of 3½%.

The district is extremely arid, without timber, and almost without shrubs, and extensive use is made of a local fuel, called taquia, which is currently used for firing boilers and also for drying ores, and in the past was even used for smelting.

Work was recently started on the croppings of several beds where the mineralization appears in the shape of sulphides. These sulphides, after hand-sorting, are bagged and shipped. Company has erected a flotation plant for the concentration of the ores; the starting capacity being 125 tons daily.

Development: the mine openings in the conglomerate strata stand fairly well, though with some crushing, and levels average 25 metres apart. Winzes are inclined, with steps cut. Little timbering is used, except for shafts, owing to its great cost, timber being imported mainly from North America, and the workings are secured principally by the poteo or dry-walling system. Steel is used for arching lateral workings.

The property is divided into 4 operating units, the principal and active sections being the Corocoro and the Guallatiri. The former has a vertical shaft 300 meters deep, equipped with a steam plant, and ore-sorting and crushing plant. The Guallatiri has shafts of 180 and 350 meters.

Equipment: ore is treated in 3 mills of 10 to 100 tons daily capacity, making a product known as "barilla," or crude copper mineral, of 80 to 88% copper tenor, which is shipped to Europe for refining. An electric power plant of 500-k. w., in which alternators are driven by semi-Diesel engines, has been erected, and a further increase of 300-k. w. is contemplated.

Production: in 1912 was 4,100,000 lb. fine copper; in 1913, 3,784,000 lb.; in 1914, 4,150,000; in 1915, 7,166,000; in 1916, 11,300,000 lb. During 1917-18, there was mined 169,561 tons of ore, averaging 3.83% copper. This was sorted to 118,209 tons containing 5.49%; while mill products, etc., amounted to 22,633 tons, averaging 2.87%. Total copper output was 14,311,360 lb.

Owing to the remote and almost inaccessible location of these mines, past production has been small, compared with possibilities, but the company is making progress and output is steadily increasing since rail communication has been established. The property is considered decidedly promising.

EMPRESA AVICAYA BOLIVIA

Mine address: Aricaya, via Pazña, Bolivia.

EMPRESA NUEVA PENNY & DUNCAN BOLIVIA

Office: Oruro, Bolivia. Mine at Morococola, Bolivia.

EMPRESA SOUX HERNANDEZ BOLIVIA

Office and mine at Potosi, Bolivia.

HUANCHACA DE BOLIVIA, COMPANIA BOLIVIA

Offices: C. Fresno, Calle Pratt 141, Valparaiso, Chile; and J. del Rio, 22 Rue de la Pepinière, Paris, France.

Directors: A. Alessandri, pres.; R. Couzinier, v. p.; C. E. Devincour, M. Edwards, and R. Wedeles; J. C. Tonkin and T. E. Allen, min. engrs.

Inc. 1873, in Bolivia. Cap., 40,000,000 francs; shares f. 125 par, all issued. Listed on Paris Bourse.

The year 1917 resulted in a loss of £27,989 with debit balance of £58,607, and £64,583 in reserve fund.

Dividends: £2,112,000 from 1899 to 1908, inclusive; nothing since.

Property: 3,300 acres, including silver mines at Pulacayo (or Huanchuca), Potosi, Bolivia. **Equipment:** includes 25-mile railway, and 2 smelting works.

Production: 1,168,000 oz. of silver in 1917.

HUAYUA-POTOSI y MILLUNI, COMPANIA BOLIVIA

Office: Huet Hnos, La Paz, Bolivia. Mines at Milluni, Bolivia.

INTERNATIONAL MINING CO. BOLIVIA

Offices: W. R. Grace & Co., 7 Hanover Square, New York; and La Paz, Bolivia.

Officers: D. S. Inglehart, J. Louis Schafer, J. E. Zallas, and J. M. Connal, manager, directors.

Inc. July 1, 1918. Owns tin and wolfram mines in Bolivia.

LLALLAGUA TIN CO. CHILE AND BOLIVIA

Address: Oruro, Bolivia, and Arica, Chile.

Cap., £425,000. Financial statement for 1917 showed a profit of £1,407,048, of which £637,500 was distributed in dividends. Reserve fund totaled £1,316,000, including £850,000 for dividends and interest; £153,000 for new works and £93,000 for exploitation.

Development: by a main haulage tunnel called Siglo XX, which is 8,420 meters long, and cost 1,394,365 bolivianos. At the beginning of 1918 ore reserves were 261,902 tons, averaging 14.33% tin, equal to 37,544 tons of metal.

Production: 7,460 tons of "barilla" (tin concentrate) in 1916, compared with 11,250 tons in 1917. Costs averaged $172.80 in 1916, and $156.80 per ton of concentrate in 1917.

At Arica, Chile, company operates a smelter of 1,500 tons monthly capacity of concentrate. Is one of the greatest tin producers in the world.

OLLA DE ORO (BOLIVIA) GOLD MINE, LTD. BOLIVIA

Office: 33 St. Swithin's Lane, London, E. C., Eng. **Directors:** A. F. Martin, chairman; R. R. Harris and W. E. Hall. E. T. Roe, sec. J. G. Prentice, mgr., La Paz, Bolivia.

Inc. Aug. 18, 1909, in England. Cap., £40,000; shares £1 par; all issued.

Dividends: 5% in 1913; 6¼% in 1914.

Property: 5 groups, 302 pertenencias, 720 acres, on the Umahamba vein.

La Paz, Bolivia, carrying gold ore in quartz veins in slate and quartzite. Vein s 2-6′ wide and ore averages about ½ oz. gold per ton with a little silver.

Development: by several tunnels, longest 800′.

Ore reserves: estimated at 35,000 tons in sight with 9,600 tons broken ore in stopes.

Equipment: includes mining plant and a mill with 140-h. p. turbine, Hardinge ball and 2 pebble mills, compressor, electric power and tram lines. Plant capable of treating over 100 tons daily. Over 85% of the values are saved by amalgamation.

Production: owing to loss of mill was but 9,920 tons in 1914; 21,426 ons in 1915; yielding 4,949 oz. gold. In 1916 various lawsuits involving title to ompany's claims were decided in its favor.

Company has had severe hardships to combat, cloudbursts wrecking the mill n December, 1912, and again in March, 1914, so that both mining and milling perations were transferred to a new site. Ore value had decreased to 0.3 of n ounce gold for 5′ width, at last reports.

)PLOCA DE BOLIVIA; CIA MINERA y AGRICOLA **BOLIVIA**

Office: Santiago, Chile. Mines at Chocaya, Bolivia.

)RURO; COMPANIA MINERA DE **BOLIVIA**

Main office: Huerfanos 1326, Santiago, Chile. Mine at Oruro, Bolivia.

Officers: Don Leonidas Vial, pres.; Don C. A. Solar, L. B. Borgono, arlos Besa, A. G. Errazuriz, J. A. Orrego, directors. H. F. Grondijs, cons. engr.; . F. Bliek, mgr.; M. G. Sohnlein, mill supt.

Cap., Bolivianos, 4,000,000. outstanding 300,000 shares. Financial statement for 1918 shows net profit of Bs, 664,910, bringing reserve fund up to s. 3,532,497. **Dividends:** has paid 15 dividends of Bs 2. per share.

Property: at Oruro, includes the Mina Socovan, Itos, La Colorado, tocho, and Escuelas, in which are several veins, the principal ones being the olores and the Purisima.

Development: at Mina Itos by 420 m. shaft on a vein 0.40 m. wide, hich, in 1918, produced 7,246 tons of ore that averaged 16.5 kilos silver and 30% tin per ton. The Mina Socovan has 270 meter shaft from which 10,360 ns of ore was mined in 1918 that averaged 7.17 kilos silver and 1.69% tin.

Reserves: at Mina Socovan, about 23,900 tons that average 5.5 kilos ver per metric ton, and 1.15% tin. Mina Itos reserves total 3,700 tons, and erage 28 kilos silver and 3.0% tin.

Equipment: includes hoists, 100-h. p. compressor. Diesel engine, elec- c power, buildings, etc. Mill at Machamarca includes McDougall and Merton asters, Hardinge mill, tables, jigs, etc.

Production: in 1918 was 1,110 tons of barilla (concentrate) carrying 41% tin.

Company has a good property, ably managed.

For geology of district, see Miller-Singewald Min. Deposits of So. America, 110.

.TINO; SIMON I. **BOLIVIA**

The largest tin operator in Bolivia, owning the Huanuni mines.

)RCO TIN MINES LTD. **BOLIVIA**

Office: H. F. Ings, 148½ Fenchurch St., London, E. C. 3, England.

Directors: E. Hooper, chairman; L. A. Kensington, R. G. Ribon, and Macandrew. A. B. Reece, gen. mgr.; M. Roberts, cons. engr. Avelino Araayo & Co., general agents in England.

Inc. Sept. 27, 1912, in England. **Cap.,** £140,000; shares £1 par; 120,075 ted. Debentures: £19,900, 6%.

The year 1917 ended with a loss of £272. Current assets were £11,381, and ilities, £58,003. Profit in 1918 was £777, and indebtedness to Avelino Aramayo ounted to £57,202.

Property: 400 acres, 25 miles from Potosi, Bolivia. Mines were worked he 16th century for silver, but are now worked for tin. The district is mounous, up to 17,000′ at one point. (See Eng. & Mng. Journal, February 24, 1917).

Geology: the Porco company is working tin deposits in igneous agglo-

merate, tuff and quartz porphyry. The San Jose vein is a shattered zone with orebodies of massive pyrite, low in tin, but with 8 oz. silver per ton. One shoot is 500' long and 6½' wide. Another is 170' long and 8' wide, assaying 3% tin.

Development: by tunnels, open cuts and drifts. Reserves in 1918 were 315,000 tons of 1.67% tin content.

Equipment: includes 2½-mile aerial tram and a 100-ton mill, 2 ball mills, screens, jigs, Wilfley tables, Huntington mill, classifiers, Humboldt tables, buddles, etc. The tailing is cyanided for the silver. Mill at Agua Castillo recovers only about 60%.

Production: in 1915, 168,000 lb. tin; in 1916, 443,500 lb.; in 1917, 20,404 tons of ore yielding 307 tons of tin oxide; in 1918, 274 tons of tin. Mill ore averages 2½% tin and 12 oz. silver per ton; 20,404 tons of ore yielding 307 tons of tin oxide, compared with 17,320 tons of ore and 274 tons of tin in 1918.

ROYAL SILVER MINES, LTD. BOLIVIA

Operates silver-tin mines at Potosi, mining through the Socovan Real. This company, together with Bebin Hermanos and Louis Soux, control operations at this famous camp.

SAN JOSÉ; CIA. MINERA DE BOLIVIA

Is a Chilian company operating tin mines at Oruro. See Cia. Min. de Oruro.

TOTORAL; SOCIEDAD ESTANIFERA BOLIVIA

Office: Santiago, Chile. Mine at Totoral, 7 miles from Pazna, Bolivia.

UNCIA; COMPANIA MINERA DE BOLIVIA

Office: Oruro, Bolivia. Company owns mines at Uncia, and the Huanuni mine.

BRAZIL

The mineral deposits of Brazil include two important gold mines and the remarkable diamond bearing conglomerates and gravels near Diamantina, in Minas Geraes, about 360 miles due north of Rio de Janeiro. It is also the world's largest producer of monazite sand. Manganese is at present the most important mineral product of Brazil, though the great deposits of iron ore are without doubt the most extensive undeveloped deposits of any country in the world.

BRACUHY FALLS CO. BRAZIL

Address: Joaquin de Almeida Lustoza, Ouro Preto, Brazil.

Property: the Serra do Mascate, Mendonca, and Inhotin iron deposits containing over 29,000,000 tons of iron ore.

BRAZIL; CIA. de MIN. y MET. do BRAZIL

(Brazilian Mining and Metallurgical Co.)

Address: Rio de Janeiro, Brazil.

Property: iron mines acquired from Antonio da Costa Lage of Rio.

BRAZILEVIA, COMPANHIA METALLURGICA BRAZIL

Address: Rio de Janeiro, Brazil.

Property: 8 manganese mines in State of Minas Geraes, estimated to contain 100,000,000 tons of ore.

BRAZILIAN IRON STEEL CO. BRAZIL

Address: M. Harder, Rio de Janeiro, Brazil.

Property: the Cana and Santa Anna iron ore deposits containing 10,000,000 tons, and the Algeria and Cota deposits of 10,000,000 tons. A concession is held for construction of a railway.

ITABIRA IRON ORE CO., LTD. BRAZIL

Office: R. S. Long, 81 Gracechurch St., London, E. C. 3, England.

Directors: G. W. B. Pease, chairman; Sir A. J. Dorman, F. W. Lee, J. Whishaw, I. H. Benn, P. M. Gotto, and F. A. E. Samuelson. G. H. Robinson, engr., Itabira, Brazil.

Inc. March 31, 1911, in England. **Cap.,** £2,000,000, in 500,000 shares, 359,438 issued; and 1,500,000 ord. £1 shares, all issued.

Notes: £345,000, holders having the right to form a new company to take over the property in 1921.

Property. 18,271 acres in the Province of Minas Geraes, Brazil. Ore reserves are estimated at 140,000,000 tons of hematite, assaying 69% iron; also 20,000,000 tons of second grade, and 330,000,000 tons of soft ore. A royalty of 6d. (12c.) per ton is payable to the B. H. Syndicate, Ltd., the previous owners.

OURO PRETO GOLD MINES OF BRAZIL, LTD. **BRAZIL**

Office: G. H. Wells, 6 Queen St. Place, London, E. C. 4, England.

Directors: J. Taylor, chairman; E. Beer, M. Paisant, R. Taylor and E. F. H. de Wael. A. J. Bensusan, mgr.; John Taylor & Sons, mgrs.

Inc. July 10, 1914 (originally Jan. 31, 1884), in England. **Cap.**, £100,000 in 60,000 10% non-cumulative pfd. and 40,000 ordinary £1 shares, of which 12,212 and 39,422 are issued respectively. Recent profits have been £7,402 in 1914; £9,545 in 1915; £7,243 in 1916; and £4,834 in 1917. Working capital at end of 1917 was £35,692.

Property: a concession of 3½ sq. miles in the province of Minas Geraes, Brazil, including the Passagem mine, which had reserves estimated at 74,700 tons at the end of 1915, and 61,230 tons at end of 1917. It is second only to the Morro Velho in importance and worked since 1817.

Equipment: includes 80-stamp mill and cyanide plant, extracting 92% of the gold. The Santa Anna section of property contains workable manganese, which is being shipped. Ore is somewhat refractory, containing arsenic.

Production:	Tons	Gold, Oz.	Value
1918	63,400	22,532	£90,130
1917	82,500	28,840	115,432
1916	87,600	30,244	121,233
1915	85,400	30,203	120,591

In Nov., 1919, the mine yielded 7,200 tons, from which £13,280 was recovered. The geology of the district and mine are described by Miller & Singewald, in Mineral Deposits of South America, 1919.

ST. JOHN DEL REY MINING CO., LTD. **BRAZIL**

Office: S. E. Berry, Finsbury House, Bloomfield St., London, E. C. 2, England. **Mine office:** G. Chalmers, supt.; A. G. W. Chalmers, asst. supt., Morro Velho, Minas Geraes, Brazil.

Officers: Sir H. P. Harris, chairman; J. R. Remnant, E A. Goulding, H. LeRoy Lewis and C. F. W. Kup, managing directors.

Inc. 1830, in England. **Cap.**, authorized, £800,000, in 600,000 ordinary, 100,000 preference, and 100,000 second preference shares of £1. Issued, £646,265, in 546,265 ordinary and 100,000 preference shares, fully paid. In 1891 capital was increased from £252,000 to £432,000; in 1893 to £462,000; in 1895 to £500,000; in 1895 to £600,000, in 1904 to £700,000, and in 1910 to £800,000. Preference shares are entitled to a non-cumulative dividend of 10% (paid free of income tax in December and June), and to priority for capital, without further participation. Second preference shares will be entitled to a non-cumulative dividend of 10%, and to priority for capital over ordinary shares, without further participation. Net profit for year ended February 28, 1917, was £132,637; £157,736 in 1918; and £119,000 in 1919. Reserve fund is £100,000.

Dividends: from 1842 to 1867, £896,500 on ordinary shares; since then these shares received a total of 320% to 1910, after which 10% per annum to 1917, and 3¼% in 1918.

Property: the Morro Velho and Cuba gold mines and iron deposits in State of Minas Geraes, Brazil. Considered the oldest and deepest modern mine in the world, as work has been continued since 1830, and workings are 6,126′ deep vertical. The iron deposits contain 300,000,000 tons of ore, carrying 60% metal. There is also a manganese deposit assaying 47 to 51% Mn, and 8 to 11% Fe.

Development: amounts to about 4,000′ yearly. Below No. 20 level, 5,900′ deep, there has been opened 844′ of lode. Temperature on the 6,100′ level is 99° for the air and 108° for the rock. Reserves are estimated at 1,209,104 tons.

Equipment: complete mine, mill, and power plants. Treatment is by 30 stamps, 7 tube-mills, concentrators, roasting furnaces, cyanidation and filters. Aerial trams are used to advantage. Company operates a store, hotel, medical

Owns entire capital stock and bond issue of the Braden Copper Co. Farmers Loan & Trust Co., New York, registrar. D. A. Crockett, 149 Broadway, New York, transfer agent. Annual meeting, fourth Monday in June.

In December, 1915, offer was made by the Kennecott Copper Corp. to purchase the stock of the company, payment to be made in Kennecott Copper Corp. stock. As an alternative stockholders had the privilege of receiving $15 in cash for each share of the Braden Copper Mines Co. As a result of this offer the Kennecott now owns 99% of the stock of the company, which, based on the market value of stock at the time the offer was made, cost $42,281,300.

Combined Income and Surplus Accounts, years ended December 31:

	1919*	1918	1917	1916
Operating revenue	$977,848	$19,247,230	$13,041,925	$12,648,111

Braden Copper Co.

Office: 120 Broadway, New York. **Mine office:** Sewell, Chile.

General officers: same as Braden Copper Mines Co. G. G. Thomson, purch. agent; Fred Hellman, cons. min. eng.; E. A. Cappelen Smith, cons. met. eng.; H. A. Guess, cons. mill eng.; T. H. Thomas, cons. elect. eng.; S. B. Williamson, constr. eng.; B. T. Colley, mgr. welfare dept.

Operating officials in Chile: S. S. Sorenson, gen. mgr.; L. E. Grant, asst. gen. mgr.; F. D. Helmerich, gen. mine supt.; R. E. Douglass, gen. mill supt.; W. L. Stevens, smelter supt.; J. Chambers, railroad supt.; H. W. Jones, plant comptroller.

Inc. June 18, 1904, in Maine, and name changed to present title, Aug. 9, 1904. **Cap.**, $2,332,030 shares; $10 par; non-assessable; fully issued. Company is protocolized in Chile. Is controlled, through ownership of entire stock issue, by Braden Copper Mines Co. Has a $4,000,000 issue of 6% first-mortgage convertible bonds. Annual meeting, fourth Tuesday in July.

In June, 1919, the floating debt was $21,626,569, compared with $22,031,550 on December 31, 1918. Practically all of this amount has been advanced by the Kennecott Copper Corporation.

Property: the Teniente mines, 606 claims, 7,580 acres, including 16 acres at Rancagua. Mines are reached from Valparaiso by the Chilean State railroad, 158 miles to Rancagua, and from that point by company's narrow-gauge railway, 43 miles to the smelter and mill at Sewell, and 1½ miles farther to the mines. The elevation is 7,700 to 9,000', the mine being in a very rugged region on a part of the main range of the Andes.

Company has purchased 10,000 acres of mountain land, for a tailings site, which will hold 200 million tons of tailings. It is 8 miles from the mill and together with the dam, will cost $1,200,000.

Another purchase of 40,000 acres surrounding the mine put all the company's works, including the new smelter under construction at Caletones, on the company's own land and carries smoke easements on adjacent tracts.

A third purchase included sundry lots of land and water rights needed for the new power plant on the Pangal river and a right of way for the power line. Large additions were made to the mining property during 1917 and 1918.

Geology: all the rocks are igneous and the rock at the mine is an andesite surrounding a plug of tuff, which fills the throat and crater of a volcano. This light gray tuff is no longer loose and friable, but cemented into a hard concrete-like mass. The ore deposit is unique, being a series of irregular lenses of ore formed about the border of the old plug, slightly tilted to one side. (Graham.) On one edge erosion has removed the mineral deposit. The volcanic vent is of nearly circular section 4,000' across, and filled by tuff and an agglomerate of rounded boulders of all sizes. The crater rim is surrounded by highly fractured and brecciated andesite, the fractures being mineralized around the circumference. The ore zone has been further fractured by porphyry dikes, which occasionally cut into the tuff.

The orebodies occur around, but outside the rim of the crater, in the andesite near its contact with the tuff. The ore consists of shattered andesite, often finely brecciated near the tuff contact, copper minerals filling the cracks and openings. The ore bodies are limited on one side by the tuff, but in the andesite the grade becomes lower, passing from breccia to fractured rock and fading out in the more blocky country rock. The fractures in the rock range from a mere film of sulphide up to seams 3 to 4" thick of mixed bornite and chalcopyrite, mainly the latter. The orebodies dip at 70° toward the center of the crater.

Five distinct orebodies have been proven, and four, the Fortuna, Teniente, Centinela and Bornite, are worked. All are marked by strong outcrops stained with copper minerals. The zone of oxidation is shallow, ranging from a few feet to 150' in depth, and as the deposit consists of disseminated ore, it is believed that values will persist to great depth.

The Fortuna orebody is typical of all the deposits. It is lens-shaped in [illegible] section, is developed for 3,000' in length and has a maximum width of [illegible] the 4th level, 1,425' beneath the outcrop, little increase in size can

be expected, as the rock is denser and ore is lower grade. The copper occurs as bornite and chalcopyrite, associated with ankerite and quartz. The Fortuna orebody is developed and ready for ore extraction. The shrinkage stoping system, similar to that employed at the Ray Cons., is used. Stopes are carried up 7 metres wide, with 5-metre pillars. The topography of the country is such that shafts are practically unnecessary; all ore can be taken out through tunnels, and, even though parts of the mine are very wet, pumps are not required.

The mine was gophered by former owners for high-grade ore, which was followed and extracted wherever found. Average grade of Fortuna ore is lower than in El Teniente mine, but workings show copper sulphides and occasional metallic copper throughout the brecciated material for depth of 2,000'.

The **Teniente** orebody, which is supposed to be in the crater of the old volcano, is the largest and most important orebody of the property, having a length, on No. 1 level, of 4,800', an average width of 300', and depth of 840'. It is in this orebody that the greatest increase of tonnage is to be expected. It is much the largest of the various orebodies and, with the exception of the small Bornite orebody, the richest.

No. 1 Teniente level and No. 2 Fortuna level have been extended along the tuff contact entirely around the crater, 2½ miles. The Teniente is the oldest mine of the district, having been worked by the Spaniards for the high-grade ore in the small veins.

The **Centinela** orebody is being mined above Teniente No. 3 level and will probably extend below it. The Bornite orebody worked out above the 4th level, is rich, but small, and no great extension in depth is looked for. Reginiento No. 2 orebody lies beyond the Fortuna, is lower grade and its size has not yet been determined.

New work from 1916 to 1918 inclusive aggregates 276,728'.

In 1918-19, development was mainly on the Teniente side, where large quantities of good ore was disclosed. The new ore-pass gathering system has been completed and ore caved down on the Teniente side will be sent to C level through passes, where it will be handled by motors to other passes, thence by the main electric railroad haulage-level, to the crushing plant at the mill. This new railway, completed April, 1918, is entirely underground; its grade being but 0.5% trains of fourteen 22-ton cars are used. The two-unit (5,000 cu. ft. each) compressor station is underground. Mining methods were described by Frank Cameron in the "Min. & Sci. Press" of September 20, 1919.

The main 3-compartment 9'x20' shaft, between C level and Fortuna known as shaft A, is to be 1,650' deep.

Ore reserves: calculated by Fred Hellmann, are as follows:

Year	Positive	Copper, %	Probable	Copper, %
1918.....	173,506,356	2.45	90,000,000	1.88
1917.....	149,192,000	2.42	90,000,000	1.88
1916.....	131,680,000	2.40	88,000,000	1.89

Electric power is used throughout. It is generated at the Coya hydro-electric plant on the Cachapoal river by four 2,000 k. w. Pelton wheels and generators and a 4,000 k. w. vertical Francis turbine with generator, a total capacity of 15,000 k. w. Power is delivered to mine and mill at Sewell over a 16-mile 33,000-volt transmission line.

To handle 10,000 tons of ore per day, an additional hydro-electric power plant on the Pangal river, 6 miles from the Cachapoal power plant, will develop a total of 15,000 k. w. by three Pelton impulse wheels and generators. A new transmission line has been erected between these two power stations; a new and second transmission line having already been installed between Cachapoal and Sewell, carrying current at 66,000 volts for the new smelter at Caletones and mill and mine at Sewell. The new power plant was expected to be ready early in 1920.

The motor-driven aerial tram, 2,630 meters long, with 550 meters drop and 1,000 tons daily capacity connecting the mine and mill, at Sewell, is used as a store delivery system. The main line, of 2,000 meters length, runs from the mill

to the central transfer station, where connection is made with a 1,000-meter line to El Teniente mine and a 500-meter line to La Fortuna mine. The 5-mile aerial tram from the mill at Sewell to the new smelter at Caletones will be ready at latter part of 1920.

Ore treatment: at the Sewell smelter there will be a 12,500-ton coarse-ore bin and a 10,000-ton crushing plant finished in 1921. The treatment plant is being enlarged from 7,400 to 10,000 tons daily capacity. The flow-sheet includes coarse-ore bin, gyratory crusher, rolls, Symons disc crushers, fine-ore bin, 16 Marcy mills, impact screens, trommels, Wilfley tables, 30 Hardinge mills, classifiers, two 60′ Dorr thickeners, 11 gear-driven Minerals Separation flotations units of 20 cells each, Callow flotation units and Rateau-Battu-Smoot turbo-blowers of 20,000 cu. ft. of air per minute at 7 lb. pressure for the Callow plant; also a concentrate mixing and loading plant.

An experimental leaching plant was in operation during 1915, testing the process for extraction of copper from concentrate; it is believed that process can be successfully carried out on a commercial scale, but cost of plant would be large and inadvisable at the present time.

A sulphuric acid plant provides the acid required in the flotation cell. Wilfley table concentrates are roasted in two Wedge 7-hearth furnaces. The feed carries from 6 to 7% moisture, 16% copper, 13.6% silica, 28.6% iron, and 33.3% sulphur. Hearth temperatures, from 1 to 7, respectively, are 380, 460, 600, 750, 790, 680, 630°C. The furnace shaft makes one revolution in 3 min. 20 sec. and 12 h. p. is required to operate the furnace when treating 35 tons of concentrates per 24 hours. The calcine contains 2% sulphur.

The lead chambers are four in number (being added to), each with a volume of 46,750 cu. ft. and constructed of timber framing and ⅛-inch lead sheets.

Since the smelter at Sewell was completed, several improvements have been made, the most important being the addition of nodulizing kilns. These are similar to the kilns used in the manufacture of Portland cement. In 1918, 76% of the concentrate was reduced to nodule form. The 4th and 5th nodulizers are largest ones ever built, being 8′ in diameter and 100′ long. Heat is applied by an oil burner at discharge end. By feeding nodules instead of raw concentrates, the blast furnace capacity has been almost doubled, and coke consumption was practically cut in two.

On account of an irregular oil supply, a coal pulverizing plant was added to the nodulizers.

The smelter equipment consists of 14 storage bins for concentrates, lime, coke, etc.; 4 sinter grates, with a daily capacity of 50 tons concentrates, roasted to 40 tons; 5 nodulizing kilns; 2 blast furnaces, whose daily capacity is 300 tons raw concentrates, or 600 tons nodulized concentrates; 3 Pierce-Smith basic-lined converters, two having 33 tuyères, and the other 17 tuyères; 1 copper casting apparatus.

The new smelter at Caletones, 5 miles from Sewell, will be completed and in operation in 1921.

The complete works, including the concentrators and smelter, are planned to eventually treat 10,000 tons of 2% ore daily, at an estimated cost of 7½c. per lb. laid down in New York. Work was stopped during the war, but resumed late in 1919, and is now being carried on in accordance with the original plans prepared under direction of H. E. Skougor.

Production:

Year	Milled, tons	Copper, %	Concentrate, tons	Copper, %	Mill recovery, %	Blister output, lb.	Price received, cts.	Cost per lb., cts.
1919.....	.....	.....	.....	.....	.....	47,000,000	.....	.....

1913.....	.....	.....	.....	.....	.....	18,098,000	.....	.....
1912.....	.....	.....	.....	.....	.....	9,500,000	.....	.....

Although operations at the Braden property have not yet fulfilled the expectations of its sponsors, it is believed that the treatment problems are solved, and with the completion of plant extensions and of the new smelter at Caletones, the profits will be large, though no prediction is ventured as to the date of dividends. Known ore reserves will last 35 years on a 10,000-ton a day basis, and extent of the orebodies is as yet only partly known.

CALAMA: COMPANIA DE MINAS y FUNDICION De CHILE

Reorganized 1913 as Compania Miñera de Calama. In August, 1916, property was sold to the Chile Copper Co., which see.

CARRIZAL; SOC. DE MINAS y FUNDICIONES DE CHILE

Owned by the American Smelting & Refining Co. Company operates two smelting plants running throughout the year.

Caldera: this smelting plant contains 3 copper blast-furnaces and converters, reducing 5,000 to 7,000 tons of charge monthly, mainly copper ore purchased from local mines. The plant ships from 400 to 600 tons a month of converter copper, which goes to Tacoma, Wash., for refining.

Carrizal: this copper smelter, at Chanarcitos, contains but one blast-furnace, handling from 1,300 to 1,800 tons of charge monthly, the ore coming largely from the Astillas mine, which the company owns. The 300 tons a month of copper matte which the furnace produces is shipped to Tacoma.

At Carrizal Bajo a new concentrating mill started in 1919, treats about 500 tons daily of dump ore from the Carrizal Alto district.

The copper mining industry of both the Caldera and Carrizal districts was practically suspended in the early part of 1919 on account of the low price of copper, but operations were resumed late in the year.

CATEMOU: SOCIETE DES MINES DE CUIVRE DE CHILE

Main office: 50 Boulevard, Emil Jacquemin, Brussels, Belgium. **Office:** 5 Rue du Helder, Paris, France. **Operating and works office:** Estacion Chagres, Aconcagua, Chile. A. W. Lehman, gen. mgr.

Officers: Eugene Renevey, chairman; Max Lyon, managing director; Georges Renevey, Jean Renevey, Robert de la Bouglise and Robert Franklin, directors; Joseph Wouters, sec. in Brussels; Henry Saloman, in Paris.

Inc. June 2, 1899, in Belgium. **Cap.,** f. 5,000,000; shares f. 500 par, divided into 10,000 preference shares at 8%, and 35,000 ordinary shares; non-assessable. Debentures f. 1,500,000 5% bonds. Annual meeting, last Friday in June.

Dividends: 4% in 1910, 5% in 1911, 6% in 1912, 6% in 1914, 8% in 1915, 12% in 1916; 8% in 1917.

Lands: 155 claims, with sundry miscellaneous tracts held in fee and under government concessions, including the Finca de Nilhue, total holdings of 30,000 acres, in the districts of Putaendo, Los Andes, Melipilla, La Ligua, Quillota and El Nilhue. Property includes numerous mines in Catemou, Melon, San Felippe de Caracoles and elsewhere, with quarries of fluxing material. The company's cattle ranch, Finca de Nilhue, maintains a herd of 1,200 cattle, for transport and food, and is a valuable factor in reducing costs.

The local management reports that ores average 4% copper, and 2 oz. silver per ton. Veins carry the usual oxidized ores in a comparatively shallow surface zone, changing downward into chalcocite, bornite and chalcopyrite.

Los Mantos, or Mantos Rojos, mine opened in 1820, shows sandstone and limestone, cut by eruptive dikes, there being 2 blanket veins, of 5 to 7 thickness, composed of calcareous matter impregnated mainly with bornite, with accessory chalcopyrite and occasional gray copper, ore ranging 3 to 4.5% copper, 1% lead, 2% zinc and 30 grams silver per metric ton. The oxidation zone has been eroded, leaving only sulphide ores. These blanket veins have been worked since 1835, and the ore, while low in grade, is particularly desirable for fluxing purposes.

Mining is done entirely by tunnels, at vertical intervals of about 50 meters and averaging about 1,200 meters in length with ore reserves developed ahead for 3 to 4 years extraction. Work is by contract, miners being paid 5 to 7 pesos per metric ton for ore won. Only about 8% of the ore broken is discarded as

waste, and ore is concentrated by flotation or smelted direct. Ore is taken to smelters by a 1,580-meter aerial tram, with drop of 750 meters, having 500-kg. buckets. Cables last 2 years and guide cables last 5 years.

In 1918, Los Mantos mine employed 600 men, producing 5,000 tons of ore of 4% copper tenor monthly.

El Soldado mine, one of the Nogales group, and farthest from the smelter, being in the Commune of Melon, on the Calera é Cabildo railway, was opened 1841. This property has 15 known veins, of 5' to 7' average width, carrying copper sulphides, with quartz gangue. The veins have a N. S. strike, with dip of 45° east, and lie on a fault contact between trachyte and feldspar-porphyry. The veins are faulted with throws of 1 to 2 meters. A second but parallel series of dikes and veins, but with reverse dip, intersect the other veins. Dikes of decomposed porphyry running with and alongside these cross veins, show occasional oxidized ores and aluminous silicates. The veins show many antigua openings and ore averages 5 to 6% copper.

Development: by tunnels, greatest vertical depth obtained being 80 meters; old workings are about 150 meters in length. The mine shows some immense chambers, one being called the Cathedral, in recognition of its vast size. In 1916 production was about 600 metric tons of high-grade ore monthly. Transportation by wagon cost 3 to 4 pesos per ton. An aerial tram is planned.

La Union group includes the Restauradora, San José and Vieja mines, producing about 40 metric tons daily of 3 to 4% copper ore, mainly used for fluxing and secured with an average force of 150 men.

Miscellaneous mines include El Nilhue mine, in the department of Putaendo, opened 1886; Las Maquinas de Catemu mine, in the department of Putaendo, opened in 1870; La Esmeralda mine, opened 1860; La Constancia and La Democracia mines, 10 kilometers from the smelter, carrying blanket veins, and La Marquesa, Malva, Tabourina, Caracoles (with 6% ore), Almendro y Pleito and other properties, in various stages of development, some of considerable promise.

The mines and works have telegraph and telephone communication. Forces, 1916, averaged 1,200 men, with the high average wages of 5 pesos for underground workmen, and 4 pesos for surface labor.

Reduction works: include 2 smelters, each with converter plant, with aggregate capacity of 650 to 750 metric tons of ore daily, and 2 concentrating plants employing flotation, one situated at La Poza, 12 kilometers from the second, near Chagres Station on the Andes railroad, and at Chagres smelter.

La Poza smelter, of 300-tons daily capacity, has 2 blast furnaces turning out 50% matte. The converter department has five 57x77" shells, with 12 tuyéres each, of the Copper Queen type, turning out cakes carrying 99.7% copper and 40 oz. silver per ton. There is a 40-ton briquetting plant and the converter department has a quartz mill. Power is furnished by a 165-h. p. Pelton water wheel and a 175-h. p. engine. Furnace blast is supplied by No. 6 Connersville blowers and converter blast is furnished by a Riedler air-compressor, with capacity to reduce 20,000 cu. ft. of free air per minute to 15 lbs. pressure. Fuel is coke, one ton of coke smelting 6 tons of ore, ores treated being highly silicious, with slags averaging 0.4 to 0.5% copper. In 1918 La Poza and Chagres smelters treated 80,000 metric tons of ore, of 6% average tenor, yielding 4,000 metric tons fine copper. Employs 100 men at average wages of 4 pesos daily.

The converting plant at Chagres smelter contains a large horizontal Pierce-Smith machine.

Chagres smelter has 36x84" and 36x120" Allis-Chalmers cylindrical water-jacket blast-furnaces. Ores smelted at this plant carry excess of silica and alumina and are deficient in sulphur, necessitating the free use of low grade auriferous pyrite and limestone, for fluxing. Reverberatory furnaces are 17x55' and 17x85'. A 2,000-h. p. hydro-electric plant has been erected.

Production: was 3,379,947 lb. fine copper in 1907; 4,060,873 lb. in 1908; 4,073,761 lb. in 1909; 4,920,500 lb. in 1910; 4,660,000 lb. in 1911; 6,960,000 lb. in 1912; 5,843,250 lb. in 1913; 7,878,465 lb. in 1914; 7,210,350 lb. in 1915; 11,082,330 lb. in 1916; 9,200,000 lb. in 1917, and 9,100,000 lb. in 1918.

Property is estimated by company to have, with further improvement, a productive capacity of 20,000,000 lb. fine copper yearly.

CENTRAL CHILI COPPER CO., LTD. CHILE

Address: W. A. Habberfield, sec., 15 Angel Court, London, E. C., England. **Mine and works office:** Panulcillo, Ovalle, Coquimbo, Chile. S. Schiff, gen. mgr. at mines; A. J. Goldschmid, chairman and managing director; H. L. Bromhead, Andre Goldschmid and W. H. Patchell, directors.

Inc. June, 1894, as a reconstruction of the Panulcillo Copper Co., Ltd., and reorganized January 1898. **Cap.,** increased November, 1905, to £400,000 shares £1 par; issued £312,468.

Inc. Jan. 11, 1898, and is second reconstruction of the Panulcillo Copper Co., Ltd., registered Jan. 5, 1864, and first reconstructed as the Central Chile Copper Co., Ltd., in June, 1894. **Cap.,** £400,000; shares £1 par; 312,468 shares issued and fully paid. Increased from £300,000 to present amount in November, 1905, 30,000 new shares being offered to shareholders at par.

Financial statement showed a profit of £37,086 in 1915, and a loss of £4190 in 1917. At end of latter year current assets were £94,122, and liabilities £9477. Profits up to 1915 were small.

Dividends: 6 pence per share in 1900, 6 pence in 1901, and 1 shilling in 1907; none since.

Property: 72 acres, including mines at Panulcillo, 25 kilometers N. E. of Ovalle, and mines in the vicinity of Nisñile. The Panulcillo group includes the Panulcillo Alto and San Gregorio mines.

Development: principally by the 1,000-meter San Gregorio tunnel. Ore is mainly chalcopyrite, associated with pyrite, in limestone gangue, with some commercial production of malachite, azurite and chalcocite. During the year 477.5 meters of development work and 266 meters of diamond drilling were done.

The Cocinera and Inagotable mines, are at Ferro Negro.

Equipment: the 400-ton smelter, connected with the Panulcillo mine by tram, is 76 kilometers from Coquimbo. It is equipped with 3 calciners, 2 reverberatory furnaces, and one 46x180" and three 42x84" blast-furnaces. The smelter treats silicious custom ores, company's sulphides furnishing flux. Matte is crushed and exported to New York for smelting.

Production: fine copper, 1913, 2,274 tons; 1914, 2,491 tons; 1915, 2,77[illegible] tons; 1916, 2,721 tons; 1917, 2,817 tons of copper, smelted from 56,869 tons of ore; 1918, 1,821 tons, from 32,063 tons of company and 27,826 tons of purchased ore.

CHANARAL: SOCIÉTÉ des MINES et USINES de CUIVRE de

Office: 94 Rue de la Victoire, Paris, France. **Mine and works office:** Chañaral, Atacama, Chile.

Officers: Eugène Renevey, chairman; preceding officer, D. Bethmont; A. DuBois, A. Delattre, Georges Renevey and R. de La Bouglise, directors.

Inc. July 17, 1906, in France. **Cap.,** 6,000,000 frs.; increased 1910, to 7,000,000 frs.; shares, 500 frs. par.

Property: 925 hectares, including 244 mining claims, the more important being Los Pozos, Las Animas, Cerro Negro at distances of 25 to 35 kilometers from the smelter at Chañaral, with which the mines are connected by rail. Property includes that bought, 1906, of Besa y Ca., and of Las Animas Copper Mining & Smelting Co., Ltd., 1909. Lands are a desert and water is scarce.

Las Animas deposit consists of a lode of 3 veins with parallel strike and dip of 70°, in wall rock of syenite, traceable 2 kilometers. Average width of the 3 veins is about 5', with ore occurring mainly in vertical shoots some over 100' in depth. Oxidized ores, to depth of 150 meters, are succeeded by sulphides, mainly with chalcopyrite, and some cupriferous pyrite. Gangue is silicious or calcareous, or both. Ore shipped to smelter averages 4 to 5% copper.

The mine is opened by 4 shafts, three of which are used for hoisting. The fourth shaft is used at present for pumping. Depths of shafts vary up to 250 meters. The shafts are equipped with two steam hoists and a Diesel engine hoist. Compressed air is used for drilling, pumping and sub-hoisting.

The **Los Pozos** deposit has 2 parallel orebodies in porphyry and syee, one having a silicious and the other a ferruginous gangue. Width of oredies has not been determined; cross-cuts, 70 meters long, still show mineral-d headings and indicate large deposits of the porphyry type. The mine has :n opened by a tunnel 300 meters long and 90 meters below the outcrop, by a 600-:ter drift and by numerous cross-cuts. The mine is being developed by a :tem of raises, winzes and sub-levels, leaving the pillars to be mined later if ing can be done.

The mine is equipped with a compressed air plant, using a Diesel engine.

El Manto Verde mine at Los Pozos, 25 kilometers from Las Animas, s 2 parallel orebodies in porphyry and syenite, one carrying oxidized ores of)ut 6% average copper tenor, there being no sulphides, though chalcopyrite found in the Laura mine, nearby. There are shafts of 80 meters and 195 :ters depth. The mine has extensive and erratic old workings and shows ge bodies of low-grade ore, somewhat refractory.

In addition to the foregoing mines, which are the principal properties, :re is **La Descubridora** mine, formerly an important producer, abandoned depth of 650 meters; the Andacollo mine, with ore averaging about 12.6%; the n Augustin, with 3.5% ore, and the Manto Atacama, with 3% ore. With :ther development the properties of this company can furnish a sufficient riety of ores to permit proper furnace mixtures.

The **Cerro-Negro** deposit has one orebody with ferruginous gangue, t in other respects it is similar to that of the Los Posos. Rich ores only, 10% better, are mined because of heavy cost of transportation due to the distance 50 kilometers from mine to smelter.

The company owns numerous other claims in the districts of Sierra-Aspera, Salado and Pueblo Hundido, some of which are valuable.

The smelter is located at the harbor of Chañaral. It has four water-:ket furnaces, one of 100, one of 80 and two of 50 tons. There are two con-:ter stands. Converter shells are 1.68 meters in diameter and 2 meters in gth. The basic process is used with excellent results in spite of small size converters. Air at 10 lbs., is delivered to the converters by a two-cylinder ect connected double expansion, Walker compressor.

The product of the smelter is bar copper averaging 99 to 99½% copper and ıtaining about 60 grams gold and 150 grams silver per metric ton.

The company owns a shipping pier and lighters. Property is considered uable and management good. No recent data obtainable.

IILE COPPER CO. **CHILE**

Office: 120 Broadway, New York.

Officers: Daniel Guggenheim, pres., Albert C. Burrage, v. p.; Murry ggenheim, v. p.; H. F. Guggenheim, v. p.; W. C. Potter, v. p.; W. E. Bennett, ., with Isaac Guggenheim, S. R. Guggenheim, William Loeb, Jr., John N. :ele, Albert C. Burrage, Jr., Russell Burrage, Chas. D. Burrage, E. A. Guggen-m, H. R. Wagner, and E. A. Cappelen Smith, directors. L. Fredrick, treas.; A. Crockett, transfer agent, 149 Broadway, New York; Judd Stewart, gen. litor and comptroller.

Inc. April 16, 1913, in Delaware. **Cap.,** $135,000,000; shares $25 par; is-:d, 3,800,000; 600,000 shares held in treasury for conversion of $15,000,000 , 10-year and $35,000,000, 6%, 15-year gold bonds. Shares are listed on the w York and Boston Stock Exchange. Company owns entire issued capital ck of the Chile Exploration Co. of New York.

Funded debt:

(1) Collateral trust convertible 7%, 10-year gold bonds, due May 1, 1923, ,000,000 outstanding; convertible into stock at $25 per share; bonds are a ect obligation of the company and are secured by deposit of the entire capital ck of the Chile Exploration Co., the operating subsidiary of the Chile Copper . This is a closed mortgage.

(2) Collateral trust convertible 6%, 15-year gold bonds, series A, due April 1932. This issue of $35,000,000 is convertible into Chile Copper Co. stock at

$35 per share and secured, subject to the convertible 7s, by the capital stock of the Chile Exploration Co..

The first half of 1919 showed a loss of $1,174,367, after paying bond interest of Chile Copper Co.; while the third period returned a net profit of $45,114.

Property: the copper deposits of Chuquicamata, province of Antofagasta, Chile, the largest known in the world, form the crest of a low ridge some distance from the main range of the Andes, 9,600' elevation above sea level. Chuquicamata is about 85 miles E. of the Pacific Ocean on a branch of the Antofagasta & Bolivia Railway, 163 miles from Antofagasta. The company owns 687 mining claims, about 6,700 acres, including 2,075 acres mineral land, plus site, waste dump and [illegible] limestone, iron ore, salt, and sulphur deposits.

Geology: the orebody is 8,000' long, with an average width of 554'. [illegible] length of orebody, as proved up to present time

s about 7,000′ with a maximum width of 1,800′. Since starting operations to nd of 1918, 142 holes were drilled, totaling 60,786′. Small veins of rich ore ut through the mass, but the average of the entire deposit is esimated at 2.12% opper. The copper in the oxidized area occurs in the form of brochantite, with small amount of atacamite and chalcanthite, or natural blue vitriol.

The drill holes show that the oxidized minerals change in depth to sulphides, otably chalcocite, bornite, and chalcopyrite. About two-thirds of the ore deeloped carries brochantite (a basic copper sulphate containing 56% copper) nd the balance copper sulphides. The underlying sulphide ore, practically all re below 400′ from surface, can be treated in the customary way by water conentration and direct smelting. At present the company is devoting its entire ttention to the sulphate part of the orebody, the mining of which is done by team and electric shovels.

In August, 1916, company acquired the holdings of the Compañia Minera le Calama for $1,508,368. The property included an important adjacent group f mines; an antiquated smelter at Calama, 14 miles from Chuquicamata; conderable amount of land at Calama, some with water rights; a water-power oncession near Calama; a group of copper claims near El Abra, 28 miles from huquicamata on a branch of the A. & B. railroad. The mines are located on wo vein systems known as the Panizo-Rosario del Llamo and the Poderosa-San Felipe systems. These have produced much ore carrying 16% to 18% opper. The veins, up to 45′ wide, are strong and persistent, and the ores in the pper levels are oxides of copper, brochantite principally, mixed with chalcocite. n the lower levels the ore is chalcocite and enargite. The dumps of the propty are reported to have sufficient copper content to repay purchase price.

Development: is by open-cut work, like that of the Utah Copper Co., t Bingham, Utah. During 1918, overburden moved from all benches totaled 57,800 cu. yd. averaging 0.37% copper. Bench B was extended to a length of 00′ in ore, averaging 50′ in height; bench C is 3,000′ long and 95′ high. The eduction cut on bench C is 2,300′ long and 32′ high; and bench D has ore 700′ ong by 35′ high.

A notable feature of mining practice at Chuquicamata is tunnel-blasting, vhich supersedes churn-drill blasting, described by Barker in "Min. & Sci. Press" f August 17, 1918. This is so successful and efficient that 70,950′ of tunnels ave been driven for this purpose, 23,739′ being blasted to end of 1918.

Ore reserves: estimated as follows (by tons):

	Oxidized	Per ct.	Mixed	Per ct.	Sulphide	Per ct.	Total	Av. %
918...	336,510,349	1.91	151,000,000	2.98	210,000,000	1.84	697,510,349	2.12
917...	359,000,000	1.91	131,000,000	2.98	210,000,000	1.84	700,000,000	2.12
916...	339,000,000	1.91	151,000,000	2.98	210,000,000	1.84	700,000,000	2.12

Equipment: at mine includes 14 No. 103-C Bucyrus electric shovels, nd one No. 225-B, which are more economical than steam-shovels; 1 Baldwin, Porter, and 13 Panama locomotives; air-compressors, ore cars, railway, shops, nd everything necessary for moving over 10,000 tons daily.

Treatment: the reduction plant 2½ miles from the mine, which started perations May 18, 1915, has a capacity of 10,000 tons a day. The extension of he plant to 15,000 tons per day was finished in 1919, and it is estimated that the lant will be operating on the increased capacity in 1921. Copper is recovered y leaching process, the ore being peculiarly amenable to treatment by this nethod. Careful study of the problem by E. A. Cappelen Smith showed that the re gives little or no slime, and is readily soluble in an 8 or 9% solution of cold ulphuric acid, made at the works. As it contains no arsenic, antimony or bismuth, the solution is not fouled by repeated use.

The ore is broken by two 84″x60″ jaw crushers, 3 No. 10 gyratory crushers, ix 48″ horizontal and twenty-four 48″ vertical Symons disc crushers, to ⅜″ ize. It is then distributed to mastic-lined, concrete vats, of which there are [illegible] wide, 150′ long and 17.5′ high, each with a capacity of 10,000 tons of [illegible] are built of reinforced concrete, lined with mastic 1½″ thick.

[illegible] leaching process requires approximately 6 days for the complete cycle,

par value F. 100; increased to F. 14,000,000 in 1918 by subscription of 40,000 8% preference shares of F. 100 each. Debentures authorized F. 3,000,000, with 5% interest. Total assessments to date F. 3,000,000. Fiscal year ends June 30.

Net profits: were F. 36,000 in 1909-10; F. 195,000 in 1910-11; F. 595,000 in 1911-12; F. 603,000 in 1912-13; F. 318,000 in 1913-14; F. 716,000 in 1914-15; F. 2,043,000 in 1915-16; and F. 1,568,000 in 1916-17.

The fiscal year 1917-'18 left a loss of F. 745,000. Interest on bonds was paid and drawn bonds were repaid.

Dividends: f. 300,000 in 1913-'14; f. 500,000 in 1915-'16; none since.

Property: formerly held by the Compañia Minera de Naltagua, comprises 195 pertenencias of mineral lands and the Naltagua farm with a total of nearly 2,000 acres near El Monte, dept. of Melipilla.

Copper deposits include 3 parallel blanket veins, striking north-south, and dipping about 30° east, with a width of 3 to 30'. They are opened for a length of 5 kilometers, and principally worked in the Trinidad, Las Vacas, San Ramon, Suerte, Venus, Brillante, El Gato, and Esperanza mines. These veins carry oxidized ores, changing at 65' depth to chalcopyrite, bornite and chalcopyrite in disseminated form, averaging 4% copper, and nearly self-fluxing. (2) A blanket vein with 2% copper in a calcareous gangue, used as a flux; the vein has the same strike and dip as the others. (3) A porphyritic formation with low grade values.

Equipment: mine is worked by tunnel only, having no hoists. There are several compressors. The company plans a 2,000-h. p. hydro-electric plant on the Rio Maipo. There is abundant wood on the Naltagua ranch.

Transportation equipment includes several aerial trams and a private railway. The aerial tram from El Monte to San Antonio, where the tower station is located, is 5,600 meters in length, with 22 towers, of 22 meters maximum height, on concrete foundations, having greatest span of 386 meters. An incline tram, at San Antonio, connecting with the lower station of the aerial tram, is 300 meters long, at an incline of 30°, having a double line of rails. A 2½-kilometer railway connects the incline tram with the private rail system, which has a total length of 25 kilometers. Equipment includes 6 locomotives, with 2, 3 and 5-ton ore cars.

An experimental concentration plant to treat 100 tons per day has been erected in order to determine the best method to concentrate these ores.

The 300-ton smelter is at Naltagua, in the valley of the Rio Maipo, adjacent to the Rio Mapocho, 70 kilometers by river to the coast, and 225 kilometers to Valparaiso, with a freight rate of 6 pesos per ton to the latter point. The smelter was blown in 1909. Equipment includes two 40"x160" blast-furnaces. Slags, assaying about 0.4% copper, are granulated, and sluiced to the dump by water.

There are two 17'x55' reverberatory furnaces of the Anaconda type, fired by pulverized coal, the plant being in full operation in 1918.

The converter department has 3 stands, with 9 shells of the Copper Queen barrel type, an electric traveling crane with an hydraulic accumulator for handling the shells and a large Pierce-Smith basic converter.

The smelter power plant includes 770-kw. engines, 4 Connersville blowers and a 200-h. p. air-compressor for converter blast. The boiler plant has two 200-h. p. boilers, three 300-h. p. boilers and a 30-meter steel stack.

Works were described by F. A. Sundt in "Mexican Mining Journal" of October, 1914, and by Mark R. Lamb in "Engineering and Mining Journal" of October 28, 1916.

About 1,500 men are employed at the mines and works, with average wages of 5 pesos at the mines and 6 pesos at the smelter.

Production: has been as follows: 293,209 lb. in 1908-'09; 2,253,000 lb. in 1909-'10; 2,486,772 lb. in 1910-'11; 4,082,892 lb. in 1911-'12; 4,703,005 lb. in 1912-'13; 5,659,356 lb. in 1913-'14; 6,504,004 lb. in 1914-'15; 9,417,692 lb. in 1915-'16; 9,2[illegible] lb. in 1916-'17; and 8,054,497 lb. in 1917-'18. Above figures are for Chile bar assaying 99.1% copper.

PODEROSA MINING CO., LTD. **CHILE**

Office: F. W. Bishop, sec., 145 Dashwood House, New Broad St., London, E. C., Eng. **Operating office:** Casilla 855, Antofagasta, Chile, **Mine office:** Collahuasi, Tarapacá, Chile.

Directors: Chas. Fearn, chairman; L. W. Harris, V. Echeverria and W. J. Barnett. J. H. Ivey, mgr.

Inc. Nov. 27, 1908, in Great Britain. **Cap.,** £500,000; shares £5 par; fully issued and fully paid.

Financial Statement shows:

Year	Revenue	Total Charges	Profit	Current Assets	Current Liabilities
1918.....	£60,100	.....	£18,662*	.....	.....
1917.....	199,370	103,361	£96,009	£244,507	£52,640
1916.....	119,738	52,039	67,699	114,702	.....

* Debit.

Dividends: 5% in 1909; 10% in 1916; 12½% in 1917.

Property: 37 contiguous claims, 185 hectares, or 457 acres, including the Poderosa, which is the principal producer, and the San Carlos, Rosario, and other mines. The lands lie at an extreme elevation of 15,400', among the rounded peaks on the western edge of the Bolivian plateau, a region above the timber line, and barren of vegetation, with the exception of yareta, which constitutes the fuel of the district. Copper mines were worked in this district, during the era of Spanish dominion, and previously by the Indians, as evidenced by remains of ancient furnaces, fragments of matte, scoria and tools left in old workings. Development of the mines was begun 1903, and regular ore shipments were started January, 1906.

Geology: the property shows the Poderosa, or main vein, a fissure without visible outcrop, lying alongside a diorite dike intrusive in dacite. The vein lies under the dike, but in places departs from it. It has numerous branches and parallel fissures. A fault with a horizontal shift of 50' to 100', lessening downward, separates the vein in 3 portions, worked in the Poderosa and San Carlos mines, respectively. The ore occurs in shoots, and carries 8 to 60% copper and 6 to 8 oz. silver.

Development: the Poderosa mine has several shafts, with a winze to 720' depth.

Ore reserves are estimated (1918) at 8,000 tons averaging 22%, and 5,000 tons milling ore averaging 5%.

Equipment: includes power plant, ore-sorting plant, concentrator, etc. There are 175 men on the payroll, 95 being underground.

Production: in 1910 the mine yielded 10,902,080 lb.; in 1911, 6,419,372 lb.; in 1912, 5,077,204 lb.; in 1916; 3,948 tons of 28.7% copper and 9.4 oz. silver ore and concentrate was shipped; in 1917, 6,980 tons assaying 31.55% copper and 13.09 oz. silver; in 1918, 3,309 tons averaging 30.7% copper and 12.45 oz. silver.

Costs in 1917 were £8.44 per ton of ore and £28.86 per ton of copper.

SANTIAGO MINING CO. **CHILE**

Subsidiary of Anaconda Copper Mining Co.

Office: 42 Broadway, New York.

Inc. 1917, in Delaware. **Cap.,** $10,000,000; shares $25 par.

Property: Lo Aguirre mine, situated 20 kilometres W. of the City of Santiago, Chile. The mines consist of five groups, 500 acres, partly acquired by purchase from former owners and partly by denouncement. The Africana mines, also owned by the company, are 3 miles E. of Lo Aguirre; Lo Aguirre and Farfana farms of 17,387 and 980 acres, respectively, were secured for (1) [illegible] rights; (2) control of the intervening space between the two groups of mines; and (3) to avoid liability for damage to farmlands near the proposed [illegible] works.

Development: in Lo Aguirre mine, the ore occurs as a disseminated [illegible]. Work begun in 1914, has developed more than 6,000,000 tons of ore

carrying from 1.75 to 3.5% copper. The average of all tunnel samples was 2.44%. The ore is a mixture of sulphide and oxides. It is believed that the orebody contains a much greater tonnage, estimates showing 16,000,000 tons of probable ore, but a little over 6,000,000 is all that was definitely developed at beginning of 1918.

During 1918, eleven holes, aggregating 4,029', were drilled, in addition to 6,900' of underground work.

In the **Africana** mine the ore occurs in veins. The mine has a 220' shaft, with 350' of workings. Twelve diamond-drill holes, varying in depth from 50' to 388' intersect the vein at undeveloped points. The ore is high grade, running from 4½ to 9%, and is particularly desirable on account of its excess sulphur content, which, manufactured into sulphuric acid, can be used for leaching the oxidized ores of Lo Aguirre mines.

During 1918 the main shaft was sunk 259', while 2,427' of underground work was accomplished.

Equipment: preliminary plans include a 750-ton mill for Lo Aguirre and one of 500 tons for Africana.

SOUTH AMERICAN METAL CO. (THE) CHILE

Subsidiary of American Metal Co., which owns entire capitalization.

Office: 61 Broadway, New York.

Inc. June, 1917. **Cap.,** $250,000.

Company was organized for purpose of conducting a general trading business in South America, especially in Chile, but it also supervises the mining exploration carried on by the A. M. Co. on that Continent.

The copper smelter at Guayacan, province of Coquimbo, Chile, is controlled by the S. A. M. Co.

VACAS; COMPANIA MINERA LAS CHILE

Address: E. David Pope, care El Nilhue, Chagres, Chile.

Property: the Vacas gold mine with 150 hectares, near the Pupio river, at southern end of the Aconcagua goldfield, between latitude 30° 30' and 32° 00' south; and near the Caruto, Magui, Cueca, and Talco mines. Las Vacas is practically the only gold mine now operating in Chile and has been worked for over 100 years.

Geology: the veins are in unaltered and hard granite, and are richest near the contact with andesite dikes that cut and slightly displace them. Pegmatite quartz veins are also common through the granite, sometimes carrying gold which does not persist. The main vein is 3 to 12 meters wide in the upper, and from 5 centimeters to 2 meters in the lower workings. Sulphides exist right from the surface and carry gold in fine-grained friable pyrite, though none is visible to the eye. The ore averages a little less than an ounce per ton.

Development: to a depth of 1,000' or more by incline shaft and cross-cut adit 300 meters long, connecting with shaft at depth of 60 meters. The principal workings are at bottom of the mine.

Equipment: 2 compressors, drills, pumps, geared hoist, and 10-stamp mill with amalgamating plates, classifiers, tube-mill, Dorr thickener, 3 Pachuca agitators, Moore vacuum-filter, and zinc boxes for precipitation of the gold from cyanide solutions. Amalgamation saves 66% of the gold value, but a total recovery of 90% is made.

COLOMBIA

This Republic is best known for its gold and platinum production which comes mainly from alluvial deposits. The emerald mines are quite famous, and deposits of copper, zinc and lead are also known, but practically undeveloped and unworked.

ANGLO-COLOMBIAN DEVELOPMENT CO., LTD. COLOMBIA

Merged with South American Gold & Platinum Co., which see.

BREITUNG MINES CORP. OF DELAWARE COLOMBIA

Office: 11 Pine St., New York City. E. N. Breitung, pres.

Inc. June, 1912, in Delaware, as a holding company to own or control promising or profitable mining properties.

Cap., authorized, $10,000,000; outstanding Dec. 31, 1918, $1,127,790; par, $5. No bonds. Transfer agent, U. S. Corporation Co., New York. Registrar, Bankers' Trust Co., New York. Annual meeting, last Monday in December.

Owns all the capital stock of the Marquette Magdalena Co., a New York corporation protocolized in the Republic of Colombia, S A. Inactive.

BRITISH PLATINUM & GOLD CORPORATION, LTD. COLOMBIA

Office: 73 Basinghall St., London, E. C. 2, England; and Mercado & Co., Buenaventura, Colombia.

Directors and officers: T. J. Ive, chairman; E. Cattanach, Walter Conan, and G. H. Short; C. A. Sack, sec.; Inder, Henderson & Dixon, cons. engrs.; Johnson, Matthey & Co., technical advisors.

Inc. May 2, 1918, in Great Britain. **Cap.**, £250,000; shares £1 par; 150,000 issued; changed 1919 to $1.000,000; $1 par; 600,000 issued in February, 1920.

Property: extensive tracts of placer ground in the Choco district of Colombia, acquired from the Consolidated Colombia Platinum & Gold Mines, Ltd., and from Messrs. Pugliese, Frigerio & Mayolo, the latter holdings said to contain 5,000,000 cu. yds. averaging 2s. per yd.

Lands include: **Bolivar and Colonia,** 2,560 acres of gold-bearing ground, 50 miles S. of Buenaventura, said to contain enough pay-gravel to supply several dredges.

Cimarronas, 7,680 acres, of which 100 acres are prospected and contain 2,904,000 cu. yd. of gravel with 4s. (96c) per yd., recoverable, 25% being gold and 75% platinum. The net value of the proved area is £394,040.

Opogodo, 10 sq. miles, of which 2⅛ miles are estimated to contain 4,181,000 cu. yd. of 25,78d. (61.56c.) to 36.76d. (73.52c.) of dredgable ground, and 60,000,000 yd. of hydraulicking ground worth 10.3d. (20.6c) per yd. Proportions of precious metals are 25% gold and 75% platinum. Net value of proved area is £1,703,145.

Equipment: consists of one dredge of 60,000 yd. monthly capacity. Another dredge is under construction.

CHICAGO; LA MINA COLOMBIA

Address: via Nechi or Zaragoza, Guamoco district, Colombia.

Property: gold-lead-zinc mine in Guamoco district. Ore is a heavy iron sulphide containing gold, the ore varying from $30 to $40 per ton. Plant includes water power, crusher, Hardinge mill, and counter-current decantation system of cyanidation. No figures of production available.

COLOMBIAN CORPORATION, LIMITED COLOMBIA

Office: Henry Richards, sec., 441 Salisbury House, London, E. C. 2, England.

Inc. October, 1919, by the Oroville Dredging Co. to acquire the Constancia mine for $180,000. **Cap.**, £500,000; £1 par. Half of shares are ordinary, and were allotted to Oroville Dredging as the purchase price, the other half are preference shares, entitling holders to half of the profits until a 100% dividend has been paid, and 12½% thereafter.

The mine, worked for 140 years, has 2 parallel quartz lodes of the California type, each about 6' wide and opened for 2,400', out of 16,000' owned. Reserves contain 200,000 tons of $6 ore, with estimated cost of $3.50 per ton. A 100-ton mill is to be erected. The mine is 44 miles S. W. of the Pato mine. Under former ownership production from 1914 to 1918 amounted to 46,000 tons of ore worth $311,000.

COLOMBIAN MINING & EXPLORATION CO., LTD. COLOMBIA

Office: 6 Broad Street Place, London, E. C. 2, England; and Marmato mines, Medellin, Colombia.

Directors and officers: S. H. Jenks, chairman; P. E. Butler, J. H. Iles, N. L. Jenks, mgr.; H. Lovegrave, Sir Newton Moore, and John Morgan; G. V. Hatch, sec.

Inc. Feb. 25, 1908, in Great Britain. **Cap.**, £550,000; shares £1 par; 450,000 issued. **Debentures:** £50,000, 6%, 7 years.

Company has a 40-year lease from the Colombia Government on 900 sq. miles in the Supia and Marmato districts of Colombia. Examined by Charles Olden, L. Parker, H. H. Knox, and A. Wilkinson. Some of the area is leased. Reserves at Marmato contain 400,000 tons of 36s. (8.64 gold-silver ore. Equipment consists of 40 stamps, 3 tube-mills, and cyanide plant. The Mapura property contains large deposits of ore averaging 1os. ($3.84) per ton, which can be mined by open-cut work; a mill of 10,000 tons monthly capacity was ordered in America for this mine early in 1918.

An oil property was being drilled in 1919 and 1920, and work was expected to be finished in July.

CONSOLIDATED COLOMBIA PLATINUM & GOLD MINES, LTD. COLOMBIA

Property acquired in May, 1918, by British Platinum & Gold Corporation, which see.

FRONTINA & BOLIVIA (S. A.) GOLD M. CO., LTD. COLOMBIA

Office: J. J. Truran, sec., 184 Gresham House, London, E. C. 2, England. **Mine office:** La Salado, Colombia.

Directors: S. W. Stephens, chairman; T. H. Alexander, Sir H. P. Harris, R. W. H. O'Neill, and R. C. Lyall. J. Reed, supt.

Inc. July 18, 1911. **Cap.**, £200,000 in 23,390 pfce. shares, all issued, and 176,610 ord. £1 shares, 140,000 issued. Debentures amount to £45,138 10%, redeemable in 1921 and 1926.

Profit in 1917-'18 was £17,354, of which £9,339 was distributed and £4,999 carried forward to 1918-'19, after allowing for interest, etc. Profit for 1918-'19 was £18,309, of which £12,839 was paid in dividends.

Dividends: regular on preference shares and 10% on ordinary in 1911; 10% in 1916; 10% in 1917; 5% in 1918; 7½% in 1919.

Company owns mining rights over 12 sq. miles and surface rights over 40 sq. miles in Colombia, S. A.

Property: the Silencio mine is the main producer. Recent development has been on the 14th and 15th levels. Company also owns an interest in the Marmajito Mines, Ltd., owning adjacent properties.

Ore reserves, June, 1916, were estimated at 42,200 tons; in 1918 a 58,500 tons, worth $18 per ton; and in 1919 at 56,100 tons of $17 ore. In 1919 the Marmajito company was preparing to reopen its properties.

Equipment: includes 10-stamp mill and cyanide plant.

Production, years ending June 30:

Year	Ore, tons	Gold, Oz.	Year	Ore, tons	Gold, Oz.
1919.....	29,020	23,958	1916.....	25,484	22,358
1918.....	27,855	23,895	1915.....	25,971	26,938
1917.....	23,642	20,653			

LIBERTAD, LA MINA COLOMBIA

Address: via Nechi, or Zaragoza, Guamoco district, Colombia.

Property: a gold mine in the Guamoco district, which has been probably operated for over 8 years on a series of rich pockets occurring in quartz vein 2' to 12' wide. Ore is free-milling, and is treated in a 10-stamp mill with concentrator and cyanide plant.

MAMMOTH GOLD, SILVER & PLATINUM MINES COLOMBIA

Controlled by Assets Realizing Corporation of California.

Address: J. V. Priest, 812 Merchants' National Bank Bldg., Los Angeles, Cal.

Property: in Department of Bolivar, Colombia, is a concession of about 48,000 acres with extensive placer holdings as well as quartz veins. Extensive sampling shows that the placer properties carry between $2 and $3 per yd. in gold, with some platinum. This property was carefully examined in 1919, and equipment taken in to work the gravel, using hydraulic

elevators. The quartz mine will be worked later. Other valuable assets on the property include rubber trees, vegetable ivory, mahogany, and peruvian bark. There is also a surface seepage of oil on a part of the property. Management considers this a most valuable asset, and development will be pushed rapidly.

NECHI MINES (COLOMBIA), LTD. **COLOMBIA**

Controlled by Oroville Dredging Co. of California and Pato Mines of Colombia.

Office: 441 Salisbury House, London Wall, E. C. 2, England.

Directors and officers: F. W. Baker, chairman; F. D. Behrend, A. S. Elmore, J. A. Agnew, and H. C. Porter. W. A. Pritchard, mgr.

Inc. Feb. 5, 1914, in Great Britain. **Cap.,** £140,000, in 140,000 pfce. and 140,000 ord. 10s. shares, all issued.

Revenue from gold in 1917 was £98,093, of which £52,267 was profit. Preference dividend absorbed £35,000; and £75,862 was carried forward. Current assets were £144,869, and liabilities, £68,238. Revenue in 1918 was £86,000, of which £25,841 was profit. Dividends amounted to £35,000.

Dividends: 25% on pfd. in 1916; 75% in 1917, and 25% in 1918.

Property: 400 acres of gold-bearing placer gravel land on River Nechi, Department of Antioquia, Colombia. Ninety acres of the tract contain 5,855,900 cu. yds., valued at $4,926,600 gross. The gravel is about 50′ thick.

Production: dredging operations since 1915, are summarized below:

Year	Yardage	Yield	Per Yd.,c.	Cost, c.
1918.....	2,142,929	$437,499	20.40	5.80+
1917.....	1,883,659	489,959	26.00	10.73
1916.....	1,617,975	797,125	49.27	15.20

The output in December 1919, was $39,559 from 84,678 yards.

PATO MINES (COLOMBIA), LTD. **COLOMBIA**

Subsidiary of Oroville Dredging, Ltd.

Office; Henry Richards, sec., 441 Salisbury House, London Wall, London, E. C., England. **Mine office:** Apartado 104, Barranquilla, Colombia.

Directors: Fred W. Baker, chairman; F. D. Behrend, H. S. Derby, A. Stanley Elmore, J. A. Agnew, and H. C. Porter. W. A. Prichard, supt.

Inc. Oct. 5, 1909. **Cap.,** £100,000; shares £1 par; all outstanding.

Financial Statement, years ending September 30:

Year	Gold	Net Profit	Balance	Current Assets	Current Liabilities
1918....	£54,715	£12,832	.....	.....	.....
1917....	130,556	46,822	£183,320	£93,682	£85,543
1916....	144,648	74,894	136,498	144,060	202,087

Property: 40,000 acres of gold-bearing ground on the Nechi river, 6 miles from Zaragoza, Department of Antioquia, Colombia. At last estimates, in 1913, 448 acres contained 19,092,650 cu. yd. averaging 29.1c per yd. to depth of 26.4′.

Geology: the properties lie in an oval basin cut through by the Nechi river and surrounded by crystalline rocks; within the basin are flat tables of bedded gravel with red or blue clay strata that contain beds of peat or brown coal. The gravel deposits grow richer in depth.

Equipment: includes hydro-electric power plant, an 8½ cu. ft. dredge, ice plant, and repair shops.

Production:

Year	Yardage	Yield	Per Yd., c.	Cost, c.
1918.....	1,345,215	$266,062	19.78	11.16
1917.....	1,181,945	650,522	55.40	11.20
1916.....	1,684,721	719,493	48.50	12.46
1915.....	1,308,470	618,884	47.30	11.40

The yield in November, 1919, was $25,342 from 81,413 yards.

SOUTH AMERICAN GOLD & PLATINUM CO. COLOMBIA

Office: 61 Broadway, New York.

Officers: Adolph Lewisohn, pres.; Frederick and Sam A. Lewisohn, v p.'s; F. M. Loper, sec.; E. H. Westlake, treas.; with James McDougall, A F. Keene, J. H. Sussman, and J. Parke Channing, directors.

Inc. Oct. 11, 1916, in Delaware. **Cap.,** $10,000,000; shares $5 par; non-assessable; 1,800,000 issued, of which 1,479,684 are in escrow.

Bonds: $500,000; 7%, 10-year cumulative convertible income notes, due 1926. Listed on New York Curb.

Company is a holding concern for the shares of various corporations owning producing gold and platinum mines in Colombia. Most of the shares are owned or controlled by Lewisohn Brothers, General Development Co., Consolidated Gold Fields of South Africa, Gold Fields American Development Co., and Johnson, Matthey & Co. of London.

Property of Subsidiaries: (1) about 10,000 acres, and (2) 50 miles of river beds and banks in the Intendencia of El Choco, Colombia, accessible from the San Juan river. Exceptional quantities of platinum and gold are said to be available, valued at $70,000,000. The ground carries from 4 cents to $1.60 a yard.

Equipment: includes a dredge with wooden hull capable of digging 40,000 yards per month, and a steel dredge of double that capacity.

Production: in 1917 reported to be worth $700,000.

ECUADOR

Ecuador has only a small gold production, and although deposits of other metals are known, there are no operating mines. The total production of gold varies between $300,000 and $500,000 annually, coming mainly from the veins of the Zaruma district, in the southern part of the country.

SOUTH AMERICAN DEVELOPMENT CO. ECUADOR

Address: Paul C. Schraps, constructing engr., and Lee O. Kellogg, mng. eng., Apartado 655, Guayaquil, Ecuador.

Property: gold mine in the Zaruma district, El Oro province, Ecuador. The nearest town is Portovelo. Transportation of supplies is difficult and expensive, being $85 to $95 per ton from New York. A 90′ headframe costing $10,100 was erected in 1917. This mine contributes nearly all the gold produced in Ecuador. Veins are in fine-grained diorite and are from 15′ wide. Extensive faulting is evident. Ore treated is a mixture of quartz and calcite, with 10% by weight of sulphides.

Equipment: includes water-power, hoist, compressor, stamp mill, and counter current decantation cyanide plant. Reconstruction of the power canal was described by Paul C. Schraps in the "Engineering and Mining Journal" of November 10, 1917.

ZARUMA MINING CORPORATION, LTD. ECUADOR

Office: J. C. Stamfer, 156 Palace Chambers, London, S. W., England.

Directors: J. Rey, chairman; C. Brault, P. J. E. E. Chambost, A. Lund, E. Saladin and J. Vielle.

Inc. Jan. 31, 1913, in England. **Cap.,** £120,000, in 110,000 pfd. £1, 200,000 dfd. 1s. shares; 90,000 of former and all of latter issued.

Property: 1,838 acres in the Zaruma district, Ecuador. The Cruz lode contains reserves of 90,000 tons of £12 gold-silver-copper-lead ore; the Christina 61,000 tons of £10 ore.

PERU

The mineral wealth of Peru has been famous since the days of the Incas, but the principal mineral products of today, copper, silver and lead are produced by the aid of outside capital. The precious metal output

erived chiefly from copper ores, with a smaller amount from lead ores. he vanadium deposits are widespread, but production is mainly from the inasragra mine, owned by the Vanadium Corporation of America, which elds 80% of the world's supply of vanadium.

MERICAN VANADIUM CO. PERU

Merged 1919 into Vanadium Corp'n of America, which see.

NGLO-FRENCH TICAPAMPA SILVER MINING CO., LTD. PERU

Offices: A. Dangerfield, 56 Cannon St., London, E. C. 4, England; F. J. uffner, 27 Rue Laffitte, Paris, France; and Ticapampa, Hwaras (Huuraz), eru.

Directors: E. Quellennec, pres.; Baron J. de Catelin, managing; W. J. usins, M. Hentsch, L. Jumentier, C. Ledoux, P. G. Reumaux and R. de ezillat. P. Fontenay, eng.

Inc. Dec. 10, 1903, in Great Britain. **Cap.**, £140,000; £1 par; 117,171 ued.

Profit: in 1917 was 1,516,042 francs, of which f 790,904 was distributed. eserve funds are f 330,618 for ordinary, and f 457,731 for projected railway nstruction.

Dividends: 169% from 1905 to 1917, inclusive, 27% being paid in 1917.

Property: a silver mine at Ticapampa, province of Hwaras, Peru.

Equipment: mining and milling machinery, and 100 km. railway pro- ted.

Production: 374,400 oz. silver in 1916; 591,100 oz. in 1917.

ACKUS Y JOHNSTON DEL PERU; SOC. MIN. PERU

Main office: 134 Plateros de San Pedro, Lima, Peru.

Officers: A. J. Bennett, pres.; B. A. Simpson, v. p.; with D. C. Babbitt, S. Hunter, and T. P. Jones, directors. N. B. Roper, gen. mgr.; Wm. mpbell, supt. of Morococha mines; S. Herz, supt. of Casapalca mines.

Inc. May 1, 1917, in Peru. **Cap.**, £300,000; shares £1 par, fully paid. mpany purchased practically entire holdings of the Backus & Johnston ., a New Jersey corporation, fully described Vol. XI.

Property: consists of several large groups of copper-silver mines in the orococha district, Peru.

Casapalca Mines: the principal mines in this district are the Carlos ancisco, Upper and Lower, the Cuarenta, Corina and Chuquichuccho. e first named is developed by an adit, equipped with electric haulage, out 5,000′ long, which cuts the vein at a depth of about 2,500′ below the crop. The vein is being worked along a length of 7,500′ from the adit el, and from adits about 1,200′ and higher above the main adit. Ore m the upper workings is sent to smelter over a 4,500′ aerial tramway.

Morococha Mines: the company relies principally upon the Morococha trict for its copper ores, the chief sources of supply being the Huillca, tividad, Churruca, Isabel, Alicia, Favorita, Alapampa, Ombla, San Luis, cchapata, La Vieja, Manuelita, and the mines of the Cia. Santa Clara, . Minera de Pesares and of the Cia. Blanc. All of these mines are oper- d by the company either on account of ownership, by partnership ar- gement or on lease. The completion of the power plant at Bellavista 1913, the arrangement for the rental of further power, with a conse- ntly more complete installation of compressors and machine-drills, and driving of three drainage tunnels have resulted in much lower mining ts and in a much more extensive exploitation of the properties.

The Natividad, the deepest shaft of the district, is 500′ below the drain- tunnel level—a total of 1,000′. To provide for the deeper development his and other mines of the district, a large central shaft is being sunk depth of 500′ below the level of the drainage tunnels and a pumping t capable of handling 10,000 gallons per minute will be installed. The from the Morococha district is transported to the smelter, 32 kilo- ers distant, over the Peruvian Central Railway, which has a branch 14 kilometers long running from Ticlio on the main line to Morococha.

The output of the Morococha is about 4,000 tons a month, averaging 2% copper and 40 oz. silver per ton, including concentrates.

Smelter: the smelter and concentrating plants are situated at Casapalca on the main line of the Peruvian Central Railway, 154 kilometers from the port of Callao, at an altitude of 13,700'. The company is operating at present two of its three furnaces and four 96"x150" horizontal barrel type basic converters. The sintering plant consists of 20 roasting pots of 10 tons daily capacity each, and of two Dwight-Lloyd sintering machines. Flue dust is briquetted and returned to furnaces. The smelter handles a considerable quantity of custom ore.

Concentrating plant: low-grade ores from the Casapalca mines are concentrated in a 200-ton mill adjoining the smelter, equipped with a No 5 gyratory crusher, 2 primary ball mills, one regrinding ball mill; 2 Hancock jigs, 4 Overstrom tables and 5 single-deck and 2 double-deck Deister tables. Product is dewatered in a 30' Dorr thickener and filter-pressed.

The main power plant, situated on the Rio Rimac, 4 miles below the smelter, contains two 800-kw. generators driven by Pelton wheels, transmission being at 10,000 volts. At the smelter there are two 150-kw. and one 125-kw. generators, also driven by Pelton wheels. Air is furnished as follows: for the furnaces, by one 118-cu. ft. and two 200-cu. ft. Connersville blowers, both driven by Pelton wheels, and by one motor-driven turbo-blower of 24,000 cu. ft. capacity; for the sintering pots, by 3 small rotary blowers of the Connersville type: for the converters, by a 14,000 cu. ft. Nordberg blowing engine, direct-driven by a synchronous motor; for the Casapalca mines, by 3 motor-driven air compressors with a combined capacity of 5,000 cu. ft. free air per minute. A 500-ton sampling mill and 16-oven coking plant were erected in 1919.

Production, for the last five years has been as follows:

Year	Fine Copper, lb.	Silver, Oz.	Gold, Oz.
1914	11,115,176	2,948,338	1,734
1915	11,438,165	2,842,477	1,989
1916	19,395,396	3,262,499	2,587
1917	23,647,771	3,492,724	3,494
1918	23,940,043	3,351,294	3,810

CAYLLOMA; CONSOLIDADA SOC. ESPLOTADORA DE PERU

Office: Casilla 178, Valparaiso, Chile.

Officers: G. C. Kenrick, pres.; H. A. Barker, mgr.; L. J. Rosenshine, mill supt.

Inc. 1906, in Chile. Cap., £125,000; shares 5 shillings par. Gross sales of products in 1917 were £34,142.

Property: 500 acres in Province of Caylloma, Arequipa, Peru. The outcrop of vein now worked is over 13,000' long. Company took over property originally worked by the Caylloma Silver Mining Co., formed in London in 1889. The first silver mines of the district were worked by Spaniards in 1630, and prior to that time by the Incas.

The mines, which are at 16,500' elevation, show andesite cut by quartz-rhodonite veins carrying rich silver minerals, together with galena and chalcopyrite. The ores of milling grade average 20 oz. silver per ton, the sorted ore 100 to 300 oz. silver per ton, with some gold.

Development: by 6,000' drainage tunnel tapping center of ore deposit.

Equipment: includes 80-ton treatment plant with 12 Nissen stamps, Deister tables, and cyanide works. Plant was reconstructed in 1919.

Production: the monthly output averages 110 tons of concentrate assaying 6 to 9 kg. (190 to 280 oz.) silver, with gold and lead. Cost of mining is $8; milling, $5; and total, $20 per ton of ore mined.

CERRO DE PASCO COPPER CORPORATION PERU

Office: 15 Broad St., New York.

Officers: L. T. Haggin, pres.; Edward H. Clark, v. p.; H. Esk Mo[illegible] sec.-treas.; S. L. Rawlings, gen. mgr., Lima, Peru.

Inc. Oct. 28, 1915, in New York, succeeding the Cerro de Pasco Copper vestment Co. **Cap.**, 1,000.000 shares, without par value; 898,225 issued. inual meeting second Wednesday in May. Columbia Trust Co., New rk City, transfer agent; Bankers Trust Co., registrar. Shares were $67½ h and $31 low in 1919, range being $52 to $63 in last three months.

Company owns $2,850,000 of the $3,000,000 capital of the Cerro de Pasco ilway Co. In 1917 the Cerro de Pasco Mng. Co. and Morococha Mining were dissolved, and their assets and liabilities were transferred to this poration. All bonds were redeemed in 1918.

Dividends: $1 quarterly has been paid regularly since March 1, 1916, extras of $1.75 in 1917 and $1 in 1918. Total dividends, $19.75 per e to end of 1919. No. 17, of $1 per share, was paid March 1, 1920.

Property: over 940 claims, and 70,000 acres miscellaneous lands in the ococha and Yauli districts and about 400 acres of land that includes :-fourths of the rich Cerro de Pasco district, with a smelter site and isive coal tracts north of Cerro de Pasco.

Cerro de Pasco lies 14,300' above sea level, rendering physical labor fatiguing. The population of the town is about 6,000, of whom only a percentage are white. The region is bleak and all food and supplies be brought in from considerable distances. The year has but 2 ds, the wet and dry, the former from November to April. Both are to be bleak and exceedingly disagreeable. Snow and hail fall at any summer or winter, but rarely remain on the ground as long as 48 , even in winter. The fluctuation between mean summer and winter erature is about 20° F. only, less than the daily variation.

ilver was discovered at Cerro de Pasco in 1630, and the mines pro- , to the close of the nineteenth century, about 450,000,000 oz., from ,000 tons of silver and copper ore, nearly all extracted by hand-work arried 3 to 6 miles on the backs of llamas, to primitive smelters, e the silver bullion was transported by llamas 200 miles to Lima, 1870, when a railroad was completed to Oroya. Formerly only the r ores of 25 to 40% were shipped.

eology: the ore deposits occur in rhyolite agglomerates and tuff, ng the western part of a body of rhyolite 1¾ miles across, that is ive in, and surrounded by limestone. Over an area a mile wide and 2 miles long, nearly every claim carries ore. The orebodies outcrop nently, as crestones, or ridges, and carry gold, silver, copper, lead, nd cobalt. The oxidized zone carries considerable gold, running as

high as 1 to 2 oz. per ton, occurring in rich but erratic shoots. The high silver values usually extend to about 100′ depth only, occasionally running up to thousands of ounces per ton, followed by rich silver-copper ores, which in turn, at a little greater depth, are succeeded by ore low in silver but richer in copper, the copper ores being estimated to have averaged 15 to 30 oz. per ton in the old workings. Primary ores below the water level contain bornite and chalcopyrite, associated with pyrite, tetrahedrite, arsenopyrite and sphalerite, containing little silver and only traces of gold. There are occasional veins of high-grade silver-lead ores, with others carrying up to 8% zinc; practically all the copper ores are bismuthiferous, hence refractory in reduction. The ores carry about 35% silica and 14 to 30% iron, the excess of silica requiring considerable limestone for fluxing.

Development: the Cerro company is working its orebodies through shafts to a depth of 600′. The surface of the property shows scores of tajos, big pits resulting from the caving in of old open cast workings, some of these being 300′ deep. The property lies in a basin, and the mines are very wet, especially below a depth of 400′. The Rumiallana drainage tunnel, begun April, 1877, by Henry Meiggs, was completed 1907, by the Compañia Empresa Socavonera del Cerro de Pasco, with which a financial arrangement was made, through a 5% stock interest given in the Cerro de Pasco Copper Co., obviating the payment of a 20% royalty.

The company disregarded old workings and opened a new mine, by tunnels, of about 2 miles length each, and 5 new shafts. The Diamante, Peña Blanca, Carmen and Noruega 2-compartment shafts have 4 levels opened, and are bottomed at 410′. The Excelsior shaft is 800′ deep with levels 100′ apart and serves the entire mine. Waste is used for filling, timber being very expensive, and used only for lining shafts and timbering important tunnels. The mines are equipped with powerful pumps. Reserves of ore blocked out are said to be kept 4 years ahead of smelter consumption, these including first-grade ore of 8 to 10% copper tenor, with good silver values, and second-grade ore, of uncertain copper tenor, though probably workable in the main.

According to M. R. Walker, the Rumiallana drainage tunnel is a working level, 30′ below the 400′ level. Shrinkage, square set, and cut and fill methods are employed. Reserves averaging 5% copper, were estimated in 1918 as sufficient for 20 years. All hoists are electric. Coal and oil-fired boilers are available. A total of 1,600 h. p. is used at the mines. Electric locomotives run on the main haulage levels, pulling six 22-cu. ft. ore cars; new cars are to be 40 cu. ft. The equipment is equal to 420,000 tons per annum. Underground costs are $3 per ton. When the new smelter is built yearly output will be 70,000,000 lb. of copper.

Present reduction works: at La Fundición, near Tiñahuarea, 9 miles from the mines, are connected therewith by rail. All buildings are of steel frames, covered with corrugated iron. The plant treats a small quantity of custom ores and has a sampling mill with crushers, rolls and chain-bucket elevators. The works are terraced throughout, permitting the handling of material by gravity, and are built on the unit plan.

The furnace building has twelve 2,000-ton flat-bottomed steel ore bins filled from railroad tracks above, and loading into charging cars run alongside, that are drawn by small locomotives on a narrow-gauge track running on either side of each furnace, 2 cars constituting a charge. There are six 56″x180″ water-jacketed blast-furnaces of about 300 tons actual daily capacity each. Slag is granulated by running water. The smelter building has a steel stack, 220′ high and 20′ in diameter. There are three 60′ reverberatory furnaces, fourteen 18′ six-hearth McDougal calcining furnaces and 6 Dwight-Lloyd sintering machines.

The converter department, in a separate building, has 4 Pierce-Smith basic lined converters. Product of the converter is 99% blister copper in cakes, shipped to Baltimore for refining.

The present smelter is old, antiquated and built at too high an elev

n, owing to rarity of atmosphere. It will, therefore, be superseded by a w plant, authorized August, 1919, to be erected near Oroya, the junction int of the Cerro de Pasco Railway and the Central Railway of Peru. iis site, some 2,000′ lower than the present smelter, is much nearer to th the Morococha mines and to the port of Callao from which bullion shipped and where supplies and construction material are received. ielter will embody the most modern and approved ideas.

The **Morococha property:** includes the Gertrudis, San Francisco and n Miguel mines and a one-half interest in the Natividad mine, owned ntly with the Backus & Johnston Co.

The Mina Gertrudis, opened 1897, on the Cerro San Marcello, west of ke Morococha, shows 3 limestone beds with ore impregnations follow- ; the bedding planes; vein has strike of N. 51° E. and nearly vertical). It averages about 2 meters in width, with a paystreak of 60 cm. to 1 ter, carrying gray copper and chalcopyrite averaging about 14% cop- and 1,000 grams silver per metric ton, balance of vein carrying about copper and 300 grams silver per metric ton. The mine has a 12-meter ift, but is developed mainly by a tunnel, just above the level of Lake)rococha, mining through winzes sunk from short crosscuts in the hang- :. Ore is hand-cobbed at the portal of the tunnel.

The Natividad mine is opened to about 300 meters depth, developing ein about 4′ wide, carrying ore averaging 14% copper and 14 to 70 oz. ver per ton. A new tunnel, planned to be 750 meters long, is being ven under the old workings.

The Mina San Miguel is developed by the Copaycocha and Vulcano nels, latter of about 100 meters length, and ore is mainly enargite, with ne tetrahedrite and tennantite, associated with pyrite. Mine was opened 3, and in 10 years produced 6,476,400 kg. fine copper and 10,794 kg. fine ver from ore averaging about 20% copper and 333 grams silver per tric ton.

The San Francisco is opened by a 4,000′ tunnel, known as the Carlos ynaldo adit. Production is approximately 20,000,000 lb. per year, smelted the Cerro de Pasco works.

Cerro de Pasco Railway Co.

Subsidiary of Cerro de Pasco Copper Corporation. Results may be marized as follows:

ar	Revenue	Charges	Profit	Balance available	Dividends	Current assets	Current liabilities
3..	$1,069,056	$744,199	$324,857	$1,472,033	$285,000	$404,321	$65,256
7..	1,043,090	682,570	350,519	1,631,675	484,500	301,206	55,538

The company has a main line of 83 miles, running from Cerro de Pasco Oroya, where connection is made with the Central Railway of Peru, ch runs thence 130 miles to Callao, the latter line being one of the st notable in the world, having cost $43,000,000 and gaining nearly 3 es vertical elevation, reaching the highest altitude of any railroad on globe, having an average grade of 2.5%, with no less than 37 tunnels, uding the Galera tunnel of one kilometer length which cuts through dge of the Andes. The Cerro de Pasco railway has a branch to the l fields, and, with all spurs, sidings and yards, has about 135 miles of ndard-gauge track, laid with 70-lb. rails. Them ain line has an average de of 1.5%, with a maximum grade of 3%, and cost upward of $2,000,000 ipment includes 13 locomotives, in addition to 6 light switching engines he smelter, and 59 steel ore and coal gondolas, with a total of 247 forty- cars, rolling stock being of the best American manufacture. The rail- l is on a paying basis.

The company employs about 2,200 men at the copper mines, 1,500 men he smelter, 1,000 at the Goyllarisquisca coal mine, 400 at the Vincuscan- coal mine, and 200 at the Quishuarcancha coal mine.

In January, 1919, striking workmen at the Morococha dynamited the power lines, causing flooding of lower levels, and American employees had to abandon the camp.

Production: 3,389,787 lb. copper in 1906; 20,258,689 lb. in 1907; 23,646,[illegible] lb. in 1908; 30,327,423 lb. in 1909; 31,713,012 lb. in 1910; 48,600,926 lb. in 1911; 45,272,000 lb. in 1912; 43,856,000 lb. in 1913; 40,753,000 lb. in 1914; 61,000,000 lb. in 1915; 71,452,000 lb. in 1916; 72,650,000 lb. in 1917; 71,910,000 lb. in 1918, and 58,100,000 lb. in 1919. The silver content is important, as it amounts to over 3,000,000 oz. per annum. Output for January and February, 1920, was 9,334,000 lb. copper.

The Cerro de Pasco is undoubtedly the most expensive copper property ever developed, the total investment to date being $25,000,000. The ores are refractory and the great altitude of the smelter, which is 14,300' above sea-level, coupled with inefficient native labor, have given rise to an exceedingly complex and tiresome problem in ore reduction. Estimated cost of production at 8c per lb. and annual output at 70,000,000 lb., earnings per share of the Cerro de Pasco Copper Corporation would be $4.20 on a 14c, $8.40 on a 20c and $12.60 on a 26c copper market.

CERRO DE PASCO EXTENSION, INC.

Name changed to Peruvian Copper and Smelting Co., which see.

CERRO VERDE MINE

Owned by Carlos J. Lohman, Arequipa, Peru. Mine was under [illegible] option from October, 1916, to the Andes Exploration Co. of Maine, a subsidiary of Anaconda Copper Mining Co. J. A. Gibbons, mgr., Arequipa, Peru.

Property: 244 pertenencias, about 20 miles S. E. of Arequipa, [illegible] by automobile road from railway at Taibaya. Elevation of mine is [illegible]

Geology: copper occurs in a disseminated deposit in rhyolite, near contact with porphyritic diorite. Two irregular masses of granodiorite divide the rhyolite mass. An oxidized zone about 220' deep has silicates and carbonates; these pass downward into secondary sulphides changing at 300 to 450' in depth to primary sulphides.

Development: property is being thoroughly prospected by churning and by underground work from a 430' shaft. Work on the 250 [illegible] totals 3,000'. The deposit is said to contain more than 10,000,000 tons averaging between 2 and 2½% copper.

FERROBAMBA, LTD.

Office: F. F. Fuller, sec., 638 Salisbury House, London, E. C. **Operating office:** Arequipa, Peru. **Mine office:** Ferrobamba, Catoche, Apurimac, Peru.

Directors: A. C. Burrage, chairman; A. C. Adams, T. C. J. Burgess, H. W. Bliss, C. D. Burrage, H. W. Brown and A. Solomon.

Inc. Nov. 5, 1909, in Great Britain. **Cap.,** £150,000; 60,000 preferred shares, 10s. par; 36,658 issued; 120,000 ordinary shares, £1 par, fully issued. Is registered in Peru.

The Ferrobamba property is in central Peru at an elevation of [illegible] above the sea and about 45 miles west of Cusco, the terminus of the Southern railway, 500 miles from Mollendo, the seaport. The 207 claims are in 10 groups, covering 2,255 acres, in the Cotobamba district, state of Cusco, Peru. The deposits show oxidized copper ores at the surface, followed by sulphides largely bornite, and can be worked by steam shovels.

Property: includes valuable water-right concessions, from which it is planned to develop hydro-electric power, the rivers being fed by the melting snows of the Andes. The concessions include water rights to the Chalhuahuacho and several affuents, and application has been made for similar rights on the Rio Apurimac, about 25 miles in an air line from Ferrobamba No. 1. Including the last named concession, the available water power is rated at 120,000 h. p.

The property has been divided into 5 zones, or groups, known as Ferrobamba No. 1, Ferrobamba No. 2, Katanga, Charcas and Bonanza.

ions are much the same at these different properties and it is thought that ill can be worked opencast.

Ferrobamba No. 1, 900 acres, shows an enormous mass of garnet rock, pparently of contact metamorphic origin, rocks being hornblende-biotite-granite and limestone altered into wollastonite by contact metamorphism or a remarkable distance, in many places up to 3,000' from any recognized gneous contact. An area of 34 hectares of proven copper ground, 2,300' ong and 1,640' wide, is estimated to carry ore of payable tenor to a depth f 200', or approximately 12,000,000 tons of ore.

Churn-drilling with Keystone drills from 1910 to 1912, together with nderground work in 15 tunnels and in the shafts, proved 6,000,000 tons f ore averaging 3.7% copper and 1.3% sulphur.

Ferrobamba Nos. 2 and 3, 300 acres, constitute the Sulfobamba mine. Development to January, 1913, has proven 778,000 tons of ore carrying .25% copper, with 6.75% sulphur and 532,000 tons too low grade to work.

The Katanga or Reina de Cobre mine, 300 acres, is undeveloped.

The Charcas group, though having an area of only about 35 acres, contains a pyritic orebody 100 meters wide and 800 meters long, carrying chalcopyrite with pyrite, the face of a bluff of ore assaying 5% copper, 3 oz. ilver and 9 grams gold per ton.

The Bonanza claims, 420 acres, lying 9 miles south of Ferrobamba No. , apparently resemble the other properties, but no mining has been undertaken.

Development: 8,300' of tunnel or adit work and continuous operation f 2 churn-drills.

Property has been examined and reported on by Frank Klepetko and V. H. Wiley. Property closed down awaiting railway transportation.

IOROCOCHA MINING CO. **PERU**

Absorbed in 1917 by Cerro de Pasco Copper Corporation, and company issolved.

EW CHUQUITAMBO GOLD MINES, LTD. **PERU**

Office: 459 Salisbury House, London, E. C. 2, England.

Directors: F. Lowy, chairman; F. E. Macfadyen and F. H. McCardie.

Inc. May 22, 1907, in Great Britain. **Cap.**, £50,000; £1 par; 44,869 sued. Year ending June, 1917, showed a loss of £1,577. **Dividends:** 36% om 1907 to 1916.

Property: 142 acres at La Quinua, near Cerro de Pasco, Junin, Peru, ntains 2 replacement deposits of auriferous quartz lying with the bedding limestone where cut by andesite dikes. The ore is 65' wide, and car-s $4 to $25 per ton gold.

Development: by tunnels and open-cuts. A 40-stamp mill and cyanide ant are at work.

Production: £12,567 from 19,360 tons in 1916; £10,743 from 21,333 ns in 1917.

ERUVIAN COPPER & SMELTING CO. **PERU**

Offices: 115 Broadway, New York; and Pachacayo, Peru, S. A.

Officers: F. W. Mason, pres.; J. A. Vandegrift and B. W. Steele, v. p.'s; th J. F. Anderson, and R. R. Carter, directors. M. W. Braden, sec.-eas.; J. N. Vandegrift, mgr.; C. C. Semple, supt.; G. A. Ryder, and Frank iculicich, engineers.

Inc. Aug. 10, 1917, in Delaware. **Cap.**, $10,000,000; shares $1 par; non-sessable; 4,600,000 issued. U. S. Corporation Co., registrar; and transfer ice, 65 Cedar St., New York. Annual meeting second Tuesday in March. n thousand shares were advertised for sale in New York in October, 19, at 65 cents each. Company said to have ample funds in treasury to ry out the construction and development work planned for 1920.

Property: 830 acres of copper-silver and 40 acres of silver-lead claims Yauricocha, in the district of Yauyos, on western slope of the Andes, S. W. of Pachacayo on the Central Railroad of Peru, and 262 kilo-from Callao on the coast. Also owns 4,082 acres of coal land

at Jautenhausi, 20 miles E. of Yauricocha, and 30 miles from Pachacayo. Examined by John Glidden, C. C. Semple, and J. A. Vandegrift.

Geology: the Yauricocha ores occur in a contact between limestone and diorite. The orebody is vertical, runs N. W.-S. E. and has a length of 2,500′. Ore is carbonate, changing to sulphide at water-level at 400 to 500′ below surface. Ore said to average 12% copper, 3 oz. silver, and $2 gold per ton.

Development: at Yauricocha, by 2 vertical main shafts, 225 and 400′ deep, and 4,000′ of workings. Reserves reported as 70,000 tons, plus 60,000 tons of probable ore and 2,000,000 tons possible ore to a depth of 225′. One shaft caved in at 225′. In January, 1920, a crosscut on the 225′ level was reported to have gone through 110′ of 23% ore and the 375′ level showed 130′ of 26% ore. Vein is said to be proven for 2,500′ in length and to 400′ in depth.

At the Felicidad copper mine, 3 miles W. of Yauricocha, little work has been done. The vein is said to be 300′ wide and 4,000′ long on surface, and it is expected to become a large mine.

The Jupiter and La Porfia silver-lead mines, 14 miles W. of Yauricocha and 6 miles E. of the coal mines, have not been worked by this company, though they yielded ore running 51% lead and 100 oz. silver per ton when worked by former owners.

The Jautenhuasi coal properties contain 4 veins of coal 3 to 4½′ thick with no partings. The coal cokes well and is good enough for boilers. Tests made at the Casapalca smelter were satisfactory and the coal gave good results in locomotives of the Central Railroad of Peru. Reserves are given as 40,000,000 tons. The Government of Chile is said to have voted $1,500,000 towards construction of a railway to these mines.

At Rangracancha, 6 miles W., company has another coal mine.

Equipment: includes a 300-h. p. hydro-electric plant, with foundations for 600-h. p. steam and gasoline hoists, compressor, ½ mile of 3′ gage tramway, complete 100-ton copper smelter, with two 50-ton reverberatory furnaces, machine-shop, warehouse, dwellings, and motor road under construction. In January, 1920, 400 men were employed on the motor road and 200 at the mines.

Production: 1,541 tons of ore from the Yauricocha mine, reduced at the Casapalca smelter, averaged 23.68% copper and 2½ oz. silver per ton, giving a gross return of $153,422. None of this ore was selected, according to official reports.

Company proposes to increase the capacity of the smelter to 200 tons per day, which with cost of power plant, road, coal mine expenses, etc., will cost $300,000. Management estimates that treating 200 tons of 10% copper ore daily at a cost of $12 per ton of ore, or 7¼ cents per pound of copper, sold at 18 cents per pound, will yield a daily net profit of $12,600. Deducting $5,025 for charges on metal delivered at New York, plus $2,100 for amount paid M. Larke and associates, previous owners who still retain an interest, leaves a net profit of $5,475 per day, or $1,642,500 per year of 300 days. This estimate does not, it is said, include from $100,000 to $300,000 from precious metals and coal sold. On the present outstanding capital a return of 20 to 30% is therefore expected.

QUEQUENA; COMPANIA MINERA de PERU

Owners: Miguel Gamon y Rubio, Arequipa, Peru, and Manuel Chachilla, Valparaiso, Chile.

Property: about 18 miles S. E. of Arequipa, at an elevation of 11,000′, contains 8 veins carrying from 18″ to 5′ in width. Ore consists of silicate and carbonate of copper, changing with depth to chalcopyrite and bornite, with a quartz gangue and assaying from 4% to 60% copper, and up to 40 oz. silver per ton.

Development: by 2 old shafts, 250′ deep. Has shipped ore containing 20 to 30% copper and 25 to 40 oz. silver per ton. Idle.

TINTAYA MINE **PERU**

Under option to Andes Exploration Co.

Property: 1,320 pertenencias, 10 miles S. E. of Yauri, Cuzco, Peru, and 0 miles by good roads to Chuquibambilla on Juliaua Arzco Ry. Develop- ng by churn-drills and tunnels to prove whether mineralization is limited o contact of sedimentary rocks, or extends into the prophyritic igneous ocks. Silicate and carbonates, as well as cuprite, bornite, chalcopyrite, nd native copper are found.

VANADIUM CORPORATION OF AMERICA **PERU**

Formerly American Vanadium Co.

Office: 120 Broadway, New York; Vanadium Bldg., Pittsburgh, Pa.; Bridgeville, Pa., and Minasragra, Peru.

Officers: J. L. Replogle, pres.; M. G. Baker, v. p.; with Charles M. Schwab, A. A. Ryan, T. Coleman du Pont, Ledyard Cogswell, E. R. Tinker, H. P. Whitney, and Joseph De Wyckoff, directors. E. F. Nickerson, sec.; . K. Diffenderfer, treas.

Inc. 1919, in Delaware. **Cap.**, 300,000 shares, to be increased to 500,000 hares in 1920; no par value; 270,000 issued.

Initial balance sheet of September 16, 1919, gave total assets as $10,177,- 93, including $5,500,000 for mines; $1,000,000 for patents and processes; 2,000,000 for plant; $177,093 for inventories, and $1,500,000 cash.

Income from January 1, 1919, to January 20, 1920, was $1,907,553 from ales, plus $161,674 from other sources, a total of $2,069,227. After paying 741,823 for general charges, $128,334 in dividends, $120,233 for taxes and 68,347 for organization expenses, the surplus was $593,328.

Dividends: initial quarterly of $1.50 per share on April 15, 1920.

Property: vanadium mines at Minasragra, Peru, and smelters at Bridgeville, Pa., where ferro-vanadium is made.

The ore deposits, which are the richest and most productive vanadium eposits in the world, were originally located for coal but their real nature as discovered by the manager of the Hauranca smelter in 1905, who de- ounced them jointly with E. E. Fernandini. The latter sold out to J. J. Flannery, in 1910. A 12-mile railway, covering the most difficult part of the oad, is being constructed from the mines to Lake Pun Run.

Geology: the mines, which produce 80% of the world's supply of vana- ium, are in the Andes at an elevation of 16,800'. The orebody is a lens- haped mass 300' long and up to 30' thick, enclosed in red gypsiferous ales near igneous intrusions of varying composition. The ore is made up f the hydro-carbon mineral quisoqueite, coke and patronite, a greenish- lack sulphide of vanadium. (See Hewitt Trans. Am. Inst. Min. Eng., Vol. 1909). The ore averaged 19% metal, but the reserves are lower grade, ough estimated to contain 30,000,000 lb. vanadium in blocked out and robable ore and 70,000,000 lb. possible ore. Ore is packed on llamas for miles, to the Peru Central Railway.

Production: annual output of vanadium is about 3,000,000 lb., enough r 1,000,000 tons of steel. Ferro-vanadium sells for $7.00 per lb. Output is be doubled in 1920.

In December, 1919, the Vanadium Corporation announced that it had sorbed the Primos Chemical Co. of Colorado, which produces vanadium, ngsten, molybdenum and chrome. Vanadium Co. will sell 93,334 shares $45 a share to pay for Primos.

VENEZUELA

The mineral production of Venezuela has been almost at a standstill r several years, as mining is only done by a few foreign corporations and velopment is retarded by lack of confidence in the stability of the Gov- nment. Gold is the important product, but copper and iron, manganese d lead are mined in small amounts. The total value of the mineral pro-

duction for 1918 was $2,376,540, a decrease of $1,696,400, compared with 1917, the lessened output of copper and asphaltum being responsible for the decline. There are 179 metalliferous properties in operation, 53 subject to assessment work before titles are granted, and 97 merely filings which require the approval of Congress.

The gold-bearing regions have a bad climate, which is a serious hindrance to their development. The chief gold-bearing area is the Guianan highland in the southeastern part of the country, extending from headwaters of the river Yuruari down to the frontier of British Guiana. The gold occurs in shallow but rich alluvial gravel deposits.

Vein mining is practically confined to the Caratal district in the state of Bolivar, 150 miles south of the city of Bolivar. The district is underlain by metamorphic mica schists and hornblende and gneiss with intrusive masses of granite and diorite and later dikes of diabase. The gold quartz veins at Callao are in diorite, near diabase. The veins are small, the main bonanza vein but 2 ft. thick, but the ore is rich, varying between $75 and $90 per ton. It is worked to a depth of 1,100′ and a length of 1,000′ and between 1853 and 1895 yielded 1,438,638 ounces of gold.

Copper mining is practically restricted to the Aroa deposits.

In addition to the companies described in this section the following mining companies operated properties in Venezuela during 1918:

El Dorado Rubber, Balata & Gold Mining Co., owning the Perseverancia, Hechicer and San Carlos, gold quartz mines at Tumeremo, Roscio district, Estado de Bolivar.

Sindicato Aleman Minas Santa Isabel, operating the two Santa Isabel copper properties near Villa de Cura, Zamora district, State of Aragua.

Compañia Nueva Panama, owning a gold quartz mine of this name near El Callao, Roscio district, Bolivar.

Waterman y Compañia, at El Callao, and developing three gold quartz veins on the Esperencia, Las Nieves and Talisman claims, in the Callao section.

Bianchi y Odreman, Poggi Hermanos, Meris y Carlos Palazzi, Antonio Pieve y otros, H. Quensa y Cia, and others are operating placer gold properties, the first named getting out large nuggets, and averaging nearly $10,000 a month, working claims through leasers.

The Compañia La Cumaragua is opening up a promising group of 4 copper mines near Arog, and John C. Prince is developing the Camburito copper mine, and Johann Gathman, The Aroa bis, also near Aroa.

Other copper properties are under development by M. P. Maneiro y E. A. Modiano, at Manicuaro in Sucre; Carlos Stilling at Nirgua; M. Griffe y L. Mercado also at Nirgua.

Garbiel Rafalli developing the Canaima silver-lead property at Santa Rosa y Sta. Teresa in Benitez district of Sucre.

EL AMPARO MINE, LTD. **VENEZUELA**

Address: Guasipati, Roscio, Venezuela.

Property: the old and famous La Paz gold mine in the Roscio district, State of Bolivar, said to be almost worked out late in 1918. Equipped with 10-stamp mill, pans, tables, and cyanide plant.

GOLD FIELDS OF VENEZUELA, LTD. **VENEZUELA**

Address: El Peru, Venezuela.

Property: claims showing gold quartz veins, 4 miles west of El Callao in Roscio district, State of Bolivar, southwestern Venezuela. A plant employing 2 Chilean mills treats $15 to $20 gold ore by amalgamation and cyanid

...and ... ...quipment: includes 20-stamp ...

Production: over 40,000 tons of ore yielding $10 per ton by amalgamation, with $5 in the tails recoverable by cyanidation.

NEW CALLAO GOLD MINING CO. LTD. **VENEZUELA**

Address: El Callao, Venezuela.

Property: the famous Callao mine and the Callao La Union, Nueva Hanza alluvial mines; also the Culebra and El Porvenir vein mines near El Callao in southeastern Venezuela. The old mine is full of water, but some of the lesser mines are very promising.

The company is French and its financial condition is weak owing to the present status of European affairs.

SOUTH AMERICAN COPPER SYNDICATE, LTD. **VENEZUELA**

Office: 2 Broad Street Place, London, E. C. 2, England; and Aroa, Port of Tucacas, Venezuela.

Directors and officers: H. Edwards, chairman; H. D. Boret, T. O. Callender, H. Maubourguet, C. H. McEwen, and C. N. Murphy. C. D. Comrie, sec.; G. B. Butterworth, gen. mgr.; C. H. Stewart, cons. eng.

Inc. March 27, 1907, in Great Britain. **Cap.**, £40,000; shares 2 shillings par; 150,000 issued. Notes £37,500 of 7% issued in November, 1918.

Profit for year ended June 30, 1917, was £28,753, plus £3,167 brought forward; dividends absorbed £30,000; current assets were £93,516, and liabilities £55,448.

Dividends: 25% in 1909; 30% in 1910; 145% in 1911; 250% in 1912; 350% in 1913; 75% in 1914; 62½% in 1915; 150% in 1916; 200% in 1917.

Property: the Aroa mine and the San Antonio and Titiara mines, 55 miles from port of Tucacas, Venezuela. The Aroa vein is 50'-75' wide on the surface, and outcrops for 2,000'. The ore consists of pyrite and chalcopyrite, which as shipped to England, runs 9% copper. The low-grade ore is mixed with oxides and smelted to a matte at the mine. A 200-ton smelter is operated. Extensive drilling is under way in 1920.

The production is not made public, but profits are certainly large, judging by dividends.

YURUARI COMPANY **VENEZUELA**

Letters returned in March, 1919, from Caracas, Venezuela.

Property: gold-bearing gravel in Cicapra district, 25 miles N. W. of El Callao. The gold is in decomposed schist, and churn-drilling is said to have revealed several million yards of ground worth $1 per yd., which could be worked at cost of 50 cents. At last accounts a 200-yard clam-shell dredge was at work.

only 2 to 3% in the raw ore, while the bituminous matter ranges 10 to 17%, and carbon dioxide 7 to 13%. There are 2 roast stalls near the shafts, and at the furnaces the first-fusion product is a matte carrying 40% copper and 0.25% silver. This matte is broken up and roasted in calcining kilns, and the roasted matte, with the addition of 5 to 10% raw matte, is smelted in reverberatory furnaces to white metal carrying 74 to 75% copper and 0.45 to 0.50% silver. The slags from the white metal carry 4 to 6% copper and are returned to the shaft furnaces. Slag is utilized extensively for the manufacture of slag brick and paving blocks. The white metal is ground in Krupp ball mills and sent to the Saigerhütte refinery.

The Kochhütte, at Helbra, is the principal smelter, treating about three-fifths of the total production. There are 8 furnaces, 1 held in reserve, of circular shaft type, using cold blast. The Krughütte treats the rest of the ore. This plant, at Eisleben, near the mines, has 6 furnaces, one being held as a spare, all of circular shaft type, with forehearths, using cold blast.

The Eckardtthütte, at Leimbach, has 4 copper furnaces of circular shaft type, using cold blast. This plant also has 1 lead stack, producing silver and lead matte, and makes a little nickel speiss from resmelted fine dust. The Eckardtthütte has an acid plant, with 72 kilns and 5 lead acid chambers employing the chamber process of acid making.

The Kupferkammerhütte, at Hettstedt, has 3 circular shaft furnaces but employs a hot blast. The acid plant at the Kupferkammerhütte has 52 kilns and 6 lead acid chambers, turning out 50 metric tons of 50° Baumé sulphuric acid weekly.

The Gottesbelohnunghütte is one of the smaller and less modern smelters, equipment consisting of 13 small reverberatory furnaces, 17 roasting furnaces and 2 small furnaces for refining slags.

The Saigerhütte is mainly a refinery, including a desilvering plant operating on the Ziervogel process, which roasts the matte and retains the silver as a sulphate which is dissolved in water and the solution run over metallic copper, which precipitates the silver, the cement silver so secured being pressed and resmelted to metal 999 fine. The final furnace product, after the extraction of the silver, is blister copper of 99.7 to 99.8% tenor.

Production: which was only 5,865,898 lb. in 1867, increased to 15,230,300 lb. in 1877, to 29,176,000 lb. in 1887, and 40,230,400 lb. in 1897. Recent production has been as follows: 42,500,278 lb. in 1903; 41,629,349 lb. in 1904; 43,824,141 lb. in 1905; 40,108,000 lb. in 1906; 38,822,000 lb. in 1907; 39,686,800 lb. in 1908; 41,891,400 lb. in 1909; 44,769,800 lb. in 1910; 45,955,600 lb. in 1911; 45,188,600 lb. in 1912. Production in 1912 was secured from 873,305 metric tons of cupriferous material smelted. Estimates place the 1915 yield at 44,100,000 lb., and in 1916, 59,000,000 lb.

The Mansfeld is handled with high technical skill, and its orebodies by reason of their vast extent, are among the largest known. No detailed information has been available since 1913.

SAXON TIN & WOLFRAM MINING CO., LTD. GERMANY

In March, 1919, realization and distribution of the assets in England was proceeding, in conformity with the Act of 1918. See Vol. XIII for description of company, etc.

GREAT BRITAIN

AFRICAN ORE CONCENTRATION SYNDICATE, LTD. ENGLAND

Secretary and office: J. A. Stocker, 701 Salisbury House, London, E. C. England. A. S. Elmore, Walter McDermott and C. Pakeman, directors.

Inc. June, 1905. Cap., £12,000; shares £1 par; issued and fully paid.

Company owns patents for the treatment and concentration of ores and has erected plants at the Transvaal Consolidated Land & Exploration Co. and Namaqua Copper Co.'s properties in South Africa.

OLCOATH MINE, LTD. **ENGLAND**

Office: R. A. Thomas, mgr., Camborne, Cornwall.

Directors: F. Harvey, chairman; Oliver Wethered, J. M. Holman, E. . Janson, F. A. Robinson and F. W. Thomas.

Inc. July 15, 1895, in England. **Cap.,** £350,000; shares £1 par; all sued. **Debentures:** £75,000 of 6% participating, issued February, 1918.

Operations for the year 1918, resulted in a profit of £22,927, plus 9,548 from previous period. After allowing for depreciation and develop- ent, £11,916 was carried forward. Cash assets exceed liabilities by 30,000. The first half of 1919 resulted in a loss of £19,519.

Dividends: since 1896 total 135%; last one, 7½%, paid 1913.

Property: the most famous tin mine of Cornwall, worked from 1700 1799 for copper and which from 1799 to 1867 yielded ore carrying cop- r and tin, together with small amounts of arsenic, silver, and cobalt, to e total value of £3,234,693.

In 1918, Dolcoath, with the East Pool & Agar, Ltd., purchased the min- al rights to 9,000 acres of the Tehidy Estate for £90,000, Dolcoath taking 66% interest.

Development: by 3,000′ shaft and extensive workings. Prior to 1915, e annual advance was up to 1,500 fathoms, but in 1919 was only 150 thoms. A comprehensive drilling campaign was completed last year.

Equipment: includes machinery for the 3,000′ shaft, 16 Holman pneu- atic stamps, concentrators, and Elmore flotation plant.

Production: ear	Ore Treated, Tons	Black Tin (tons) (70% Metal)	Costs Per Ton
19 (half).....	28,877	387	$11.22
18.....	61,499	827	10.76
17.....	69,714	967	8.64
16.....	79,347	1076	6.52
15.....	82,967	1187	6.36
14.....	105,302	1439	5.80

The old mine still continues to produce considerable tin ore but with- t profit to company's shareholders.

AST POOL & AGAR, LTD. **ENGLAND**

Office: J. F. Maynard, sec., Carn Brea, R. S. O., Cornwall, England.

Directors: H. M. Rogers, chairman; J. M. Holman, J. C. Gardner, W. Loring, and C. A. Moreing. Bewick, Moreing & Co., gen. mgrs.; M. T. aylor, supt.; J. W. Partington, chemist.

Inc. Jan. 11, 1913, in England. **Cap.,** £100,000; shares £1 par; changed 480,000 of 5s. par in August, 1917; all issued. In April, 1919, 120,000 new ares of 5s. each were issued.

The net profit for 1916 was £22,485, of which £9,116 was paid in divi- nds. In 1917, profit was £59,651, and £24,061 in dividends. In 1918, ofit was £103,784, and dividends £60,000.

Dividends: 15% in 1916; 25% in 1917; 50% in 1918.

Property: a 42-year lease on 2 mines at Illogan, Cornwall, that were orked from 1834 to 1912. In 1918 company acquired a 33⅓% interest in e Tehidy Estate for £30,000.

Development: for 1916 amounted to 4,501′; besides 189′ of diamond illing. The vein on the 1,440′ level shows an orebody 39′ long and 5½′ de that carried 55 lb. black tin and wolfram per ton, and another 185′ ng and 6′ wide that assayed 10.8 lb. Other development at this depth s also satisfactory, so that reserves are practically unimpaired.

In 1918, there was 4,115′ of exploration and 1,078′ of diamond-drilling ne with satisfactory results, especially for the drill-holes.

Equipment: includes steam and electric power, Cornish and motor- ven pumps, compressors, hoists, shops, assay office, 10 Holman pneu- tic stamps, 6 tube-mills, 32 concentrators, slime plant, and magnetic

separators. Late in 1919 a flotation process was evolved by which the cassiterite could be floated with a 90% recovery.

Production: years ending December 31:

Year	Tonnage	Black Tin, tons	Wolfram, tons	Arsenic, tons	Tin and Scheelite, tons	Copper, tons	Value
1918.....	75,401	1,280	57	420	1.78	...	£
1917.....	77,287	.....	.....	.....	.....	.....	
1916.....	81,395	706	100	527	....	118	

Costs in 1918 totaled 50/8, or $12.08 per ton, against a yield of 77/, or $18.48 per ton, exchange figured at $4.85.

GEEVOR TIN MINES, LTD. ENGLAND

Office: W. C. Williams, mgr., Pendeen, Cornwall.

Directors: Oliver Wethered, chairman; E. J. Andrews, sec.

Inc. Feb. 22, 1911, in Great Britain. **Cap.,** £90,000; shares £1 par, 120,000 issued; increased in 1919 to £180,000; **Debentures:** £14,700 of 8% outstanding; £25,000 authorized.

Profit for 15 months ended March 31, 1918, was £8,177, of which £6,000 was distributed. Net profit for year ending March 31, 1919, was £17,854. **Dividends:** 10% in 1917; 20% in 1918; 10% in 1919.

Property: 208 acres at Pendeen, St. Just, Cornwall. Three lodes are worked, and a mill containing 4 Holman pneumatic stamps and tables of 100 tons daily capacity is at work. Reserves are given as 140,000 tons of tin-bearing ore. Development in 1918-'19 was quite satisfactory. The Wheal Carn mine has been unwatered and good ore found. Company is also interested in the South Crofty in Cornwall and Rayfield (Nigeria) Tin fields Co.

Production, in recent years:	Tonnage	Tin
1918	25,919	
1917-'18 (15 months)	26,313	
1916-'17 (15 months)	28,683	

Tin concentrate amounted to 439 tons, or 37.9 lb. per ton. Costs around 31/, or $7.44 per ton.

GRENVILLE UNITED MINES, LTD. ENGLAND

Office: H. Batens, mgr., Camborne, Cornwall.

Directors: T. Negus, chairman; J. R. Goold, and E. Hallett, J. Trevithick & Son, engrs.; F. M. Taylor, sec.; J. Nile, mgr.

Inc. July 2, 1906, in Great Britain. **Cap.,** £100,000; shares £1 par, 180,000 issued. In 1919 company was refinanced and two 5s shares issued for original 10s. shares, 3s. 6d. paid, the exchange providing £24,000 for future development.

Dividends: £21 13/6 paid by old company to 1911 on £100,000 shares; 90% from 1911 to end of 1913; nothing since.

Property: a tin-bearing tract at Camborne, Cornwall, on which there is a concentrating plant.

Production: in 1917 was 454 tons of black tin concentrate produced from 40,938 tons of ore, and 228 tons of black tin for first half of 1918.

LEVANT TIN MINES, LTD. ENGLAND

Address: Francis F. Oats, St. Just, Cornwall, England.

Inc. February, 1920, in Great Britain. **Cap.,** £160,000; shares £1 par, 240,000 issued. Company succeeds the Levant Mining Co., organized 1872.

Property: the Levant mine, on a cliff facing the Atlantic Ocean, 3 miles from Land's End in Cornwall, adjacent to the Geevor mine. There are [illegible] of lodes which intersect. They are in granite and [illegible] (clay) [illegible] since 1820, is practically dry, [illegible] being [illegible]

Development: by 1 main and 2 blind shafts, reaching depth of 2,100', nd many miles of workings. There are 3 blocks of unworked ground said o be worth developing.

Equipment: includes steam power, 50-h. p. pump, hoists, 64 stamps, and oncentrating machines.

Production: to end of 1918 the total was 3,800 tons of crude arsenic old for £32,657; 136,562 tons of copper ore for £859,303; and 21,959 tons f black tin for £1,531,977. The last three years for which returns are vailable follow:

Year	Arsenic Tons	Copper Tons	Black Tin Tons	Total Value
1918	52	54	278	£60,137
1917	86	146	372	53,815
1916	202	155	437	49,926

MINERALS SEPARATION, LTD. **ENGLAND**

Office: A. O. Williams, sec., 62 London Wall, E. C., England.

Directors: J. H. Curle, F. L. Gibbs, S. Gregory, H. A. Krohn, W. W. Webster. W Broadbridge, chief eng.; Sulman & Picard, cons. mets.

Inc. in 1903, to carry on metallurgical operations. **Cap.**, £50,000; shares £1 par; all issued and fully paid; increased to $500,000 in November, 1919.

Profit in 1917 was £36,400, and £38,717 was carried over from previous ear. Dividends amounted to £50,000, leaving balance of £25,117 carried orward. Cash assets exceeded liabilities by £81,000.

Dividends: 50% in 1917 and 1918.

The chief assets of the company are a number of patents (said to be ver 50) for flotation processes and machines for recovery of concentrates rom silver and lead, zinc, copper, and other ores. The use of flotation as been as great an advance in the treatment of zinc and copper ores as he cyanide process has been for gold ores. United States, Canadian, and Mexican Minerals Separation patents are owned by Minerals Separation North American Corporation, which see. In August, 1919, the patent rights or Spain were reported licensed to the Peñarroya company (which see) which is to act as agent; also to the Société Minerais et Metaux in France.

NATIONAL MINING CORPORATION **ENGLAND**

Office: Walter McDermott, Moorgate Hall, Finsbury Pavement, London, E. C. 2, England.

Directorate includes Walter McDermott of the Consolidated Mines Selection Co., J. A. Agnew of the Burma Corporation, F. A. Govett of the Lake View & Oroya Exploration Co., F. W. Baker of the Mexican Corporation, E. S. Christopherson of the Consolidated Gold Fields of South Africa, S. Kitzinger of the National Bank of South Africa, H. Strakosch of the Union Corporation, A. S. Elmore of the Chemical & Metallurgical Corporation, and H. Guedalla of the Imperial & Foreign Corporation.

Inc. November, 1919, in Great Britain. **Cap.**, £3,000,000; £1 par. The corporation is organized for exploration, investment and financing of mining properties throughout the world.

The first report, published in March, 1920, shows that 5 shillings per hare had been called, realizing £625,000. Net value of investments was £281,458, and cash on hand £345,891.

In February, 1920, company acquired an interest in the South American Copper Syndicate, Venezuela, which see.

ORE CONCENTRATION CO., LTD. **ENGLAND**

Office: 20, Salisbury House, London, Eng. Directors: Alex. Stanley [illegible], and F. E. Elmore; Walter McDermott and B. C. Hin[illegible] A. Stocker, sec.

[illegible] in Great Britain. **Cap.**, 230,000 ord. shares of £1 [illegible] 20,000 pfd. of £1 each, 8,795 issued.

Company owns the Elmore patents for concentration of ore by the use of oil, and has installed plants at several low-grade copper properties.

SOUTH CROFTY, LTD. ENGLAND

Office: Josiah Paull, mgr., Carn Brea, Cornwall.

Directors: F. Allen, chairman; H. J. Meyerstein, and H. A. Micklem, T. W. Evans, sec.

Inc. July 18, 1906, in Great Britain. **Cap.**, £50,000; shares 5s par; all issued; increased to £100,000 in June, 1919.

Profit for 1917 was £43,852. Dividends were £35,000. Reserve fund is £25,000. Profit for 1918 was £67,554.

Dividends: 321% from 1909 to Dec. 31, 1918, including 60% for 1918.

Property: the Trevenen Sett, arsenic-copper-tin-tungsten mine at Illogan, and the Castle Dinas tungsten mine at St. Columb, Cornwall. Both mines are equipped with concentrating plants.

Development: in 1918, 3,572' of work was done and 2,703' of drilling with disappointing results.

Production, years ending December 31:

	Ore, tons	Gross Yield
1918	70,055	£139,981
1917	67,688	196,545
1916	71,706	103,087

Costs are around 25/- ($6) per ton.

TEHIDY MINERALS, LIMITED ENGLAND

Office: J. F. Maynard, sec., 20 Copthall Ave., London, E. C., England.

Oliver Wethered, chairman of directors; R. A. Thomas, cons. eng.; Berwick, Moreing & Co., gen. mgrs.

Inc. February, 1919, in Great Britain. **Cap.**, £40,000; £1 par; all called up; increased in September to £300,000; 150,000 shares are held by Viscount Clifden.

The Dolcoath and East Pool & Agar companies have large interests in Tehidy.

Property: the mineral rights on more than 26,000 acres in and near west Cornwall, owned by the Basset (since 11th century) and Clinton estates, including the Tincroft and other operating tin mines; also deposits of silver-lead ore, hematite iron, and china clay, considered to be the most important mineralized area in Cornwall. Besides the famous Rogers lode, the ground contains several others. A large production of tin and other products has been made in the past, but there is yet a great area of unexplored ground. The lodes have been worked mainly in the killas (clay slate), but as the tin content increases in the granite, extensions will be made in this formation. It is proposed to start extensive lateral development of the principal fissures. Diamond-drilling is also to be done. Geology studied by Malcolm Maclaren; mining methods by W. A. Macleod.

TINCROFT MINES, LTD. ENGLAND

Office: Wm. Thomas, mgr., Carn Brea, R. S. O., Cornwall. F. E. Martin, sec.

Directors: Jas. Wickett, chairman; T. R. Bolitho, J. Gilbert, H. Bolitho, H. Rich, and W. D. Coode.

Inc. May 20, 1900, in England. **Cap.**, £62,500, in 50,000 priority and 200,000 ord. 5s. shares, of which all and 96,953, respectively, are issued. **Debentures:** £30,000 authorized, of which £10,000 have been issued.

Financial statements show that profits and losses have been erratic, as below:

	Receipts	Working Profit	Net Profit	Loss
.....	£61,979	.....	.....	£15,885
.....	126,385	£19,093	£15,685	.....

WEARDALE LEAD CO., LTD. **ENGLAND**

Office: Harold Chase, sec., Salisbury House, London, E. C. 2, England. E. P. Deas, chairman of board of directors; H. S. Willis, mgr.; Henry Louis, tech. advisor.

Inc. Sept. 18, 1900, in Great Britain. **Cap.**, £100,000; shares £1 par; 97,919 issued.

Profit for year ended September 30, 1918, was £18,143, of which £12,240 was distributed; £7,177 was carried forward. Profit for 1919 was £7,421 net.

Dividends: total 37/10 ($8.98) per share from 1901 to 1918, when 2/6 (60 cents) was paid. The distribution in 1919 was equal to 7½%.

Property: large area of mineral land at Weardale, Durham, containing deposits of galena and fluorspar in limestone. The milling plant was remodeled in 1919.

Property: in 1917, the 5,452 tons of ore smelted yielded 4,348 tons of lead; in 1918, 4,281 tons of ore gave 3,405 tons of lead. Output for 1919 was 1,869 tons of lead, and 11,500 tons of fluorspar.

GREECE

ANGLO-GREEK MAGNESITE CO., LTD. **GREECE**

Office: J. D. Henderson, 24 Finsbury Square, London, E. C. 2, England.

Directors: C. F. Colville, chairman; J. MacLaren, W. G. Waldron and J. Hogg, gen. mgr.

Inc. Aug. 21, 1902, in England. **Cap.**, £125,250 in 50,000 7% cum. pfd., 74,000 £1 dfd. and 25,000 1s dfd. shares, of which 37,845; 65,207; and 15,728 are issued, respectively.

In 1915, profit was £49,359; dividends absorbed £21,310; £18,512 was

carried forward; reserve fund was £32,000. In 1917, profit was £16,167; dividends absorbed, £13,216; £9,956 was carried forward; reserve fund was £32,000.

Dividends: 7% each year on pfd. shares; total on ord. shares since 1904 is 181%, including 15% in 1917; and 1325% on dfd. shares since 1911, the 1917 distribution being 100%.

Property: 5,000 acres near Pyli on the island of Eubea, Greece, mostly magnesite bearing.

Equipment: mining machinery suitable for open-cut work, 4-mile aerial tram, ore trams, etc.

Production: is not given, but operations must be highly profitable, judging by profits. Much of the ore comes to the United States in normal times.

ITALY

ENGLISH CROWN SPELTER CO., LTD.

Office: W. Saberton, sec., White's House, Port Tennant, Swansea, Wales, England.

Directors: R. J. E. Francis, chairman; W. H. Edwards, J. L. Richardson, and Sir G. Thomas.

Staff: E. W. Carlyle, supt.; E. Zay, mine mgr.; G. H. T. Tucker, mill manager.

Inc. March 9, 1883, in Great Britain. **Cap.**, £100,000; shares £1 par; 84,000 issued.

Profit in 1917 was £33,254; dividends absorbed £14,175; £15,326 was caried forward.

Dividends: total 400% since 1883; 15% paid in 1918.

Property: zinc deposits at Oneta, province of Bergamo, Italy.

Equipment: hydro-electric plant and concentrating works in Italy, and smelter in Wales.

Production: 10,862 tons of calamine and blende in 1916, and 5,263 tons in 1917.

LIBIOLA COPPER MINING CO. LTD. ITALY

Office: Bishopsgate House, 80 Bishopsgate, London, E. C. 2, England

Mine office: Sestri Levante, Genoa, Liguria, Italy.

Officers: T. V. Anthony, chairman; H. Hubert James, and Albert Straube, directors; C. J. Whitaker, sec.; Robert H. Craven, mine mgr.

Inc. January, 1867, in Great Britain, and reconstructed 1888. **Cap.** £252,000; shares, £5 par.

Profit in 1917 was £3,037, plus previous balance of £732. Dividend absorbed £3,150. Profit in 1918 was £1,819.

Dividends: 2s 6d in 1903; 3s 6d in 1904; 3s 6d in 1905; 2s 6d in 1907; 2s in 1908; 1s 6d in 1909; 1s 6d in 1910; 2s in 1911; 3s in 1912; 2s 6d in 1913; 1s 6d in 1914; 1s 6d in 1915; 1s 6d in 1916; 1s 3d in 1917, the total being £5 14/ per share.

Property is worked through a subsidiary company, organized under laws of Italy.

Property: 4 claims, leasehold, 1,000 hectares, also a half-hectare mill-site, including the Libiola mine, in the Carrara district, northern Italy. The mine, worked by the Romans, and reopened 1867, has about 12 miles of workings. The veins, in serpentine and diabase, carry chalcopyrite associated with pyrite, ores estimated by management to average 3.45% copper and 45.03% sulphur. A total of 64,440 tons of ore was blocked out for stoping at the end of 1916; in 1918 reserves were estimated at 900 tons copper ore and 11,000 tons pyrite.

Equipment: includes a 150-h. p. steam plant, 60-h. p. electric plant and a 30-h. p. hydraulic plant, with 90-h. p. used at the mine and 150-h. p. at the mill; one hoist, and two air compressors of 12 drills aggregate capacity.

The mine has a machine-shop, smithy and carpenter shop, all of stone, and saw mill. The mill covering 550 square meters, is built of reinforced concrete and stone, and has a daily capacity of 180 tons.

Production: 17,984 tons of pyrite and 1,687 tons of copper ore in 1916, and 16,930 tons of pyrite and 1,252 tons of copper ore in 1917.

Property is well managed and yields small though satisfactory returns. Operations continued without serious interruption during the war, but mine was closed down in 1919.

NORWAY

AAMDALS KOBBERVERK, A. S.

Address: Telemarken, Norway. N. A. Nielsen, Skippergaten 27, Christiania, chairman; H. H. Dahll, Aamdals Verk, Telemarken, mng. director.

Property: about 300 acres, besides considerable forest land. The ore is low grade, carrying chalcopyrite and bornite, averaging 2% copper, with a gangue of slate and quartz. Reserves are 800,000 tons of ore containing 12,000 tons of copper.

The new concentrating works, built in 1915, consist of coarse-sorting house, crusher, mills, jigs, tables and flotation plant for slime. Concentrates contain 25% copper. An electric smelter was being erected in 1919.

Production: 900 tons concentrates per year, equivalent to 225 tons copper.

ALTENS KOBBERGRUBER **NORWAY**

Idle since 1908, and resumption of operations very uncertain. See Vol. XIII for description.

Office: care of Sulitelma Aktiebolag, Helsingborg, Sweden.

DUNDERLAND IRON ORE CO., LTD. **NORWAY**

Office: C. A. Frith, 4 Copthal Ave., London, E. C. 2, England.

Directors: A. O. Cantley, J. H. Gretton and S. C. Magennis, C. Bannatyne, mgr.

Inc. April 22, 1902, in Great Britain. **Cap.,** £700,000; shares £1 par; all issued; originally £2,000,000 **Bonds** £150,000 of prior lien.

Property: iron ore deposits from 3 to 35 miles from Mo, on the coast of Norway, connected by 17 miles of rail with Storforshei, near Mo. About 80,000,000 tons of 39% ore has been proven.

Equipment: the concentrating works at Guldsmedirk, originally consisted of an Edison magnetic process plant as once used in the United States, but it was a failure. Another concentrator of 2,000 tons daily capacity awaits normal conditions before operations start. Product is shipped to England.

FOLDAL COPPER & SULPHUR CO., LTD. **NORWAY**

Office: 7 St. Michael's Alley, Cornhill, London, E. C. 2, England. **Mine office:** W. H. Lund, mgr., Foldal, Lille-Elvedal, Norway.

Sidney St. J. Steadman, chairman of board of directors. W. A. Carlyle, cons. engr.; D. N. Forbes, sec.

Inc. Jan. 27, 1906, in Great Britain. **Cap.,** originally £350,000; shares £1 par, in £150,000 preferred and £200,000 deferred stock. Company reorganized in 1914 and capitalization reduced to £185,000; shares £1 par; 28,000 shares issued, December 31, 1915.

Balance sheet: for year ending Dec. 31, 1915. November, 1916, includes: Assets—mining properties, £60,000; equipment, £52,479; ore stocks, £17,405; provisions and livestock, £16,006; debtors, £19,669; cash, £17,478. Liabilities—capital stock, £28,000; mortgages and liens, £155,074; creditors and credit balances, £21,911. Net receipts from ore sales amounted to £8,808. Operations for the year showed a loss of £1,610, with a total debit to date, £18,712.

Property: about 3,000 acres, at Foldal, Norway, timbered and includ-

ing 4 old mines, known as the Juliana Marie, Knutshovd, Foldal, Grer, Molfke and Grimsdal, worked for about 150 years. Mine, opened mainly by tunnels, shows a vein of about 12' average width, carrying massive cupriferous pyrite, with only traces of arsenic, vein giving every indication of persistence. Ore estimated to average about 2% copper and 46% sulphur. Property also has some ore of high copper tenor.

Development: during 1915 amounted to 5,385', compared with 6,328' in 1914. The main shaft was sunk to the 6th level, but exploratory work on this and the 5th and 7th levels did not fulfill expectations of the management.

Equipment: includes an excellent mining plant, installed at a cost of £105,000, and company has expended about £22,000 for substantial mine buildings. A large waterfall, on the Einuna river, held under a 25-year lease, subject to renewal, at annual rental of £25, has been improved with a hydro-electric power station. Good wagon roads have been built.

A 22-mile Pohlig aerial tram, which is one of the longest in the world, built at a cost of £38,412, runs from the mines to the Lille-Elvedal railway, and has a capacity of 40 metric tons per hour. Miscellaneous improvements include a telephone line, and a quay at Trondhjem, for ore shipments.

The tonnage of clean ore shipped from the mine to the railway was—

Year	Tons	Copper,%	Sulphur
1910	58,558	1.93	46.31
1911	48,832	1.96	45.84
1912	45,334	1.99	46.38
1913	38,579	1.85	44.79
1914	40,457	1.84	44.87
1915	58,400	1.81	44.35

Property considered promising and management good. No reports issued since 1915.

ORKLA GRUBE-AKTIEBOLAG — NORWAY

Address: N. E. Lenander, mgr., or V. B. Lange, Lokkens Verk, Norway.

Officers: Marcus Wallenberg, pres.; Th. Fearnley, v. p., at last accounts.

Inc. October, 1904, in Norway. **Cap.,** 16,000,000 kroner ($4,160,000); shares 180 kroner ($46.80) par.

Dividends: of 7% are paid.

Property: at Meldalen, Norway. Deposits are lenses in gabbro. Ore is a cupriferous iron pyrite, carrying 2% copper and 42 to 44% sulphur. The mine is opened by an incline and 2 vertical shafts to 1,300' depth.

Equipment: five 1,200- h. p. electric hoists, four 1,400-h. p. compressors, two 130-h. p. pumps and a mill of 500,000 tons annual capacity.

Production: in 1915 was 180,000 tons, and in 1916, 100,000 tons. No recent returns.

ROSTVANGEN AKTIESELSKABET — NORWAY

Head office: Skippergaten 19, Christiania, Norway. **Mine office:** Rostvangen, via Tonset, Norway.

Directors: Johan Didrichsen, chairman; V. Koren, managing director; B. Bredesen, mgr.

Inc. May 18, 1908, in Norway.

Mine: is connected with the Kristiania-Trondhjem railway by an aerial tram.

Production (annually): 40,000 tons of pyrite containing an average of 2.5% copper and 45% sulphur.

SULITELMA AKTIEBOLAG — NORWAY

Office: Helsingborg, Sweden.

Directors: Lord-Lieut. G. Tamm[illegible], pres.; M. [illegible]; Claes Andersson, R. M. [illegible]; Fred. Th. [illegible]

gelsson (managing director), Holm Holmsen (gen. mgr.), Dr. C. Sjunnesson, Vice-Consul Lloyd Lundström (vice-managing director), and Captain Loris Person Henning. Andr. Zuale, mgr.

Inc. 1890, in Sweden. **Cap.**, originally 3,000,000 kroner, but increased several times to present amount of 14,042,000 kr.; shares, 500 kr. par. Annual meeting in May.

Dividends: 6% was paid in 1907; and total to end of 1911 was 2,460,000 kr.

Property: 214 claims and total area of 50,000 hectares, more or less mineralized, mainly in the Fauske Herred district of Nordland. Lands include the Sulitjelma, Carlotta, Giken, and Altens groups of mines. The company also owns the Vaddasguisa mine, in the Oksfjorddalen, in Skjervö and Kvaenangen herreds, the Vaddasguisa being the largest and best ore deposit so far known in the Oksfjorddalen.

The Sulitjelma mines are situated within the Arctic Circle on the shore of Lake Langvand, 400′ above sea-level and 12 miles E. of Fineidet, a port on the Saltenfjord. Discovered 25 years ago, they have been developed to an enterprise in which 1,600 workmen are employed, and in which the Knudsen pyrite smelting process was invented and is still in operation.

Geology: ore consists of cupreous iron pyrite and pyrrhotite, disseminated through mica-schist and sometimes found massive. This ore occurs in long and narrow lenses on the contact between schist, amphibolite, and olivine gabbro, the lenses running E.-W. on the N. side of the lake, changing to N.-S. on the S. side of the lake. There are 17 outcropping orebodies, 15 under development, which range from 1 to 30′ in thickness, and from 200 to 2,500′ in length. The ore is sorted by hand and 4 grades produced; the first, called sulphur ore, contains 3% copper, 44% sulphur, and is shipped to acid makers; the richer ore carries 6% copper and 32% sulphur, and is smelted at the mines; the concentrating ore with 1.8% copper and 22% sulphur, is treated by water concentration and by the Elmore process; waste, carrying 0.25% copper and 3% sulphur, is discarded. The total ore mined averages 2.45% copper and 45% sulphur. Of the sulphur ore exported, about 90% is fines and 10% lumps, shipped to various points in Norway, Sweden, Denmark, Great Britain and the Continent.

Development: is mainly by 4 tunnels, 2,500, 1,250, 500, and 200′ long. Workings total over 12 miles. Reserves in 1919 were given as 1,725,000 tons. Underground haulage is by electricity. Longwall stoping is the general method used. Power includes a 970-h. p. hydraulic plant, 1,220 h. p. electric plant, 780-h. p. compressor plant, and 10 h. p. gasoline plant.

Equipment: includes eight 20-h. p. hoists, 5 air compressors, 3 at the mines and 2 at the smelter. The mine has 2 pneumatic drills, 1 Temple electric drill, and 18 pneumatic hammer-drills in service. There are 3 sawmills, a general store, 3 schools, a church and a lodge, with a large number of dwellings for employees, the company owning a total of 320 buildings.

There is an extensive system of aerial tramways, with 15 stations and 2 power stations, the tram system including a 4-mile line to the Jakobesbakken mine.

The frame concentrator, of 36,300 sq. ft. area, is equipped with 3 Hadfields and five 13x24″ Krupp Grusonwerk crushers, 15 sets of rolls, 76 Harz jigs, 17 Ferrari concentrating tables, 1 slime table and 62 sizers.

There is a separate mill of 12,800 sq. ft., containing an Elmore vacuum oil flotation plant, the largest Elmore plant in the world, having 18 units, with a productive capacity of about 25,000 tons of 6.5% copper concentrate yearly. The plant went into commission April, 1909, and in the first year of operation produced about 8,000 tons of concentrate, carrying 6.75% copper, with a recovery of better than 80%. This Elmore plant is not only the largest installation in existence, but has given perfect satisfaction, redeeming all promises. [illegible] Elmore units, installed at other copper mines [illegible] other parts [illegible] proven unsuccessful, but the high saving [illegible] low co[illegible] at the Sulitjelma show that the process,

Portugal, carrying tungsten (wolfram) deposits, and equipped with two concentrators.

Production: 235 tons of wolfram concentrate in 1914; 300 tons in 1915, and 337 tons in 1916.

RUSSIA

See under Siberia, Asia, for Siberian mines which were listed under Russia in former volumes.

CAUCASUS COPPER CO. RUSSIA

Office: E. W. Lowe, Pinners Hall, Austin Friars, London, E. C. 2, England.

Directors: J. Colquhoun, chairman; M. Grancini, Viscount Grimston and E. B. Lockhart.

Inc. Oct. 4, 1900, in England. **Cap.,** £1,000,000; shares £1 par; 513,50[illegible] issued. **Debentures:** £42,620 of 5% firsts, and £1,238,500 of 5% seconds issued.

No accounts have been available for 5 years owing to the war, but in 1915 the debit balance was £178,319. Creditors, loans, and bills payable amounted to £236,400; and debenture interest accrued, £76,447.

Property: near Dzansul, Department of Kutais, Caucasus, southern Russia. In 1912 reserves were estimated at 3,600,000 tons of 3.1% copper ore. In 1914 the Turkish army took possession, but was ejected 5 months later. A little work was done late in 1916, but none in 1919.

Equipment: includes a 1,000-ton mill using flotation.

Production: 3,030 tons of copper in 1911; 2,992 tons in 1912; 3,936 [illegible] in 1913.

KYSHTIM CORPORATION, LTD. RUSSIA

Head office: J. P. B. Webster, sec., Pinners Hall, Austin Friars, London, E. C. 2, England. **Operating office:** Moscow, Russia. Mine office: Kyshtim, Perm, Russia.

C. J. C. Scott, chairman of board of directors; Leslie Urquhart, mng. director; P. A. Ivanoff, mng. director; R. G. Brown, cons. engr; and T. [illegible] Jones, advisory eng. in Russia.

Inc. Oct. 29, 1908, in Great Britain, to acquire the entire share capital of the Kyshtim Mining Works, a Russian corporation. **Cap.,** £1,[illegible] shares £1 par; 1,254,240 issued and fully paid. Debentures authorized £650,000 at 6%, all issued and redeemed.

Dividends: initial 5% dividend paid in December, 1912; total in 1914, 22½%; 25% in 1913; 5% in 1914; 10% in 1915, paid in November, 1916.

Balance-sheet for year ended Jan. 13, 1918, submitted Dec. 19, [illegible] showed a balance carried forward of £82,401. The Kyshtim Mining Works Co.'s reports have not been issued. Its profits in 1916, before charging depreciation and income tax, was about 6,111,000 rubles.

In December, 1917, the interest held in the Kyshtim Mining Works was transferred to the Russo-Canadian Development Corporation, so-called, the Kyshtim Corporation receiving debentures in the new company in exchange.

Property: 2,198 sq. miles, or 1,406,700 acres, the mineral land [illegible] 189,000 acres, the remainder being farm and forest areas, all [illegible] Government of Perm, southern Urals, Russia. The copper mines [illegible] from Kyshtim, are connected [illegible] company's own line with the Government railroad. The iron mines [illegible] mountains, and the timber [illegible] fuel and mining purposes, also [illegible] public.

Principal copper mines [illegible] Smirnoff, and Tissoff. Ore [illegible] tons, averaging 2.75% copper.

Geology: as described by [illegible] Kyshtim are a compact, dense

d quartz, carrying irregular blotches, streaks, and minute grains of chalpyrite, sphalerite, and tennantite. The evidence indicates that the ore is result of the metasomatic replacement of alternating bands of a sheared d broken schist by a rather fine-grained, cracked, and broken pyrite, andral barite, and quartz. This granular aggregate contained considerable en interstitial space, which was later filled by contemporaneous chalcorite, sphalerite, and tennantite. Tennantite probably also marks a slightlater stage in the primary mineralization, and with it are contemporanusly associated chalcopyrite and quartz of a second generation. The ragenesis of the sulphide minerals is one of decreasing iron and increasing pper content. The orebodies, as viewed in a vertical section, normally ow four distinct, roughly horizontal and parallel zones. From the outop downward they may be designated as: (1) the gossan zone, which exnds from the surface to a maximum depth of 60′; (2) the zone of loose ritic sand, extending from the bottom of the gossan to a maximum depth 150′, the greater part of which lies beneath the level of the ground-water;) the loose, leached sulphides, which reach from the bottom of the baritic nd to a maximum depth of 180′, where they gradually pass into (4) the derlying, firm, massive, mainly unaltered sulphide ore. Downward enchment of secondary sulphide does not occur in the form of a shallow, ell-developed, commercially important, horizontal zone. typical of many her localities, but has taken place to a relatively slight degree along the mediate walls, especially the hanging wall, to the greatest depth yet atined in exploration, which is 600′ below the ground-water level.

Equipment: complete mine plants, also smelter at Karabash capable of roducing 10,000 tons of copper yearly. There are 3 blast-furnaces of a otal capacity of 1,500 to 1,800 tons daily, and one 100′ gas-fired regenerave-type reverberatory for fine ore and flue dust. Company has an elecolytic refinery at Kyshtim, with annual capacity of 13,000 tons of copper, here it also treats blister copper from other companies.

Production, years ending January:

Year	Copper, Tons	Year	Copper, Tons
917	5,000	1915	7,642
916	6,392	1914	7,588

In 1914 total cost was £37.84 per ton of copper, which is equal to 8.1c er lb. in January, 1918, the Bolsheviks nationalized the Kyshtim properties, but they were ousted and work resumed early in 1919. Late in 1919 ompany was merged into the Russo-Asiatic Association, which see.

ROSPECTING COMPANY, THE **RUSSIA**

Office: Basildon House, Moorgate St., London, E. C. 2, England.

Inc. in Russia, Cap., 200,000 rubles. Company holds the mining inter- of the Russo-Canadian Development Corporation, during the develop- stage.

Property: concessions covering about 73 sq. miles have been located. the mineralized area of 1,550 acres of the Steppe region there are 5 porhyry deposits and 7 veins with favorable indications. Prospecting has een done by drilling.

USSIAN MINING CO[illegible]TION, LTD. **RUSSIA**

Officers: Henry Richa[illegible] 41 Salisbury House, London, E. C. 2, ngland.

Pro[illegible] Siberia was sold to Altai [illegible] interest in collieries in

Inc. Aug. 31, 1900, in Spain. **Cap.**, 15,000,000 pesetas shares (accounts) and 7,000,000 obligaciones.

Accounts for 1916 showed a current balance of 143,240 pesetas and expenditures of 175,573 pesetas for construction account; 185,540 pts. for interest on bonds; 98,198 pts. for interest on accounts and 50,000 pts. loaned to Coto Teular Co., leaving a balance of 30,050 pts. Total expenditures to date amount to 5,803,317 pts.; for mine account, and 14,914,332 pts. for railway account. Total all accounts, 31,153,638 pts.

Property: a group of 8 mines, 345 hectares, at Cala, near the Pena and Rio Tinto mines, carrying extensive bodies of magnetic iron ore and cupriferous pyrite. Company owns and operates a 97-kilometer railroad from the mines to San Juan del Aznalfarache, on the Guadalquivir river, in the adjoining province of Sevilla. The mill and reduction works were installed in 1917.

Production: for 1916 was 23,973 tons of ore. Shipments were 12,60 tons crude ore; 7,346 tons calcined ore; 1,010 copper mineral, the total value being 286,536 pesetas. No later figures procurable.

CAMPANARIO; SOCIÉTÉ DES MINES DE CUIVRE DE SPAIN

Address: 5 Rue du Helder, Paris, France. **Mine office:** Valverde del Camino, Huelva, Spain.

Baron A. de Dietrich, chairman of board of directors; Arthur Marshal, gen. mgr.

Inc. Dec. 20, 1906, in France. **Cap.**, f5,000,000; shares f500 par.

Property: seven hundred hectares, including 6 old mines, and actually having about 250,000 tons of cupriferous pyrite in sight.

Equipment: includes an elaborate and extensive surface plant.

Production: about 40,000 tons of pyrite annually, ore being first treated by lixiviation and cementation to recover its copper content, and residue sold for sulphur. No exact figures available.

CASTILLO DE LAS GUARDAS; SOC. ESPANOLA DEL SPAIN

Office: Apartado 12, San Sebastian, Spain. **Mine office:** Castillo de las Guardas, Sevilla, Spain.

Officers: Edmond Delage, chairman; Julio Astoreca, sec.; Ernest Largillier, managing director, with Louis de Beauce, Georges Thurel, Ernest Juan, directors. Francisco Zarraga, manager; Manuel Fernandez Balbuena, engineer.

Inc. July 12, 1901, in Spain. **Cap.**, 7,500,000 pesetas, increased later to 10,000,000 pesetas; shares 500 pesetas par; issued 9,000,000 pesetas. Annual meeting in March.

Property: 240 hectares, 23 kilometers from Zalamea la Real, having 15½ kilometer private railway, known as the Ferrocarril de Minas Castillo y Empalme Ronquillo, connecting at Estacion Ronquillo with the Ferrocarril Sevilla y Cala.

Mine shows granite-porphyry and diabase, carrying 5 orebodies, one of which under development, has a lens of 40 meters width and 230 meters length, proven for depth of 165 meters, carrying cupriferous pyrite averaging about 1.5% copper, 0.5% lead, 0.13% zinc and occasionally up to 2 oz. silver and 4 grams gold per metric ton. Mine was discovered 1843, and worked in a small way, until taken over by the present company, 1901.

Development: by the following shafts: Menesses, 142 meters; San Pablo, 142 meters; Malacate, 100 meters; Colorado, 110 meters; Dos de Mayo, 40 meters; Remedies, 42 meters.

Equipment: includes a 683-h. p. steam and electric plant, with two 200-h. p. hoists, good for 140 meters each, 250-h. p. air compressor.

The company owns 353 buildings, with stone shops, also [illegible] rate schools for boys and girls, a hospital for workmen and their [illegible] and a town hall.

[illegible]OBA COPPER CO., LTD. SPAIN

[illegible] Place, London, E. C. 4, England. Mine office: Sevilla, Spain.

Officers: Edgar Taylor, chairman; Hugh F. Marriott, C. H. Villiers, Lord Vaux of Harrowden, Richard E. Carr, J. E. Champney, directors; F. H. Williams, sec.; John Taylor & Sons, mgrs.; J. Hocking, mine supt.

Inc. Aug. 5, 1908, in Great Britain. **Cap.**, £200,000; shares 5s par; all issued, and fully paid. Company is a consolidation of the Cerro Muriano Mines, Ltd., and North Cerro Muriano Copper Mines, Ltd.

For year ending Dec. 31, 1911, profits were £14,899; for 1912, £39,405; 1913, £83,321; 1914, a loss of £4.203; in 1915 profits were £10,077; in 1916, £45,665; in 1917, £13,513. In 1919 there was a loss of £11,603. Net cash assets were £73,773 at end of 1919.

Dividends: in 1912, 20%; in 1913, 20%; in 1914 and 1915, nil; in 1916, 10%; nothing since.

Property: 469 hectares, 10 miles N. E. of Cordoba, in the south of Spain, held under perpetual lease from the crown, and reached by the Andalusian railway. Mines show old workings, dating from the Roman era, extending to a depth of 400', notwithstanding a heavy flow of water. There are 6 large veins and several small veins in mica-schist, diorite and quartzite, carrying chalcopyrite and pyrite, with gangue of calcite, quartz and country rock, the ground being soft, requiring the filling of stopes with waste. Veins are reported to have widths of 12' to 40', with proven lengths as follows: Calavera, 1,635'; Excelsior, 635'; Lorenzo, 4,575'; Isabel, 5,550'; Cerro Muriano, 8,500'. Some ore taken from the old Roman workings assayed 28 to 34% copper.

Development: by 8 main shafts—the Santa Victoria, bottomed in footwall at 950'; San Rafael, 1,571'; San Arturo, 1,115'; Esperanza, 196'; Eastern, 1,539'; Excelsior, 850'; Lorenzo, 1,018', and the Isabel, 620'. Development work for year 1916 totaled 6,821', including 260' of shaft sinking. The San Rafael shaft, 300 meters from the Santa Victoria, shows a vein of 5 to 13 meters width with the better portions worked out by the Romans. Ore reserves were estimated, Dec. 31, 1916, at 142,914 long tons, averaging 2.39% copper, against 99,139 tons of 2.16% in 1917, and 64,894 tons of 2.23% in 1918. The San Rafael and Eastern sections have been abandoned. Development work at the mine has been retarded considerably by water.

Equipment: about half of the product is treated by the mill and half by the smelter. The mill has 6 units of the Murex magnetic separation process which treats the re-crushed jig middlings, other flotation processes being unsuitable owing to the presence of calcite. In 1916 Murex plant treated 14,599 tons of re-ground jig middlings and tailings, averaging 1.34% copper, and produced 1,374 tons of concentrates averaging 10.6% copper, with 74% recovery.

The smelter includes a calcining plant and a converter plant. The blast-furnace, blown-in, August, 1908, is used only alternate months, its capacity being double that of the mine.

Production: in 1916 the mine output was 95,947 tons of 2.18% copper content. After sorting, 84,800 tons of 2.47% copper content were treated in the milling, concentrating and smelting works. The concentrator treated 48,727 tons of 1.57% ore, which yielded 4,798 tons of 9% concentrates, and 14,599 tons of middlings assaying 1.34% copper. The recovery for the Murex and concentrating plants was 75% as compared with 70.7% of the previous year. Yield in 1916 was 1,746 tons of blister copper. In 1917 the output was 1,554 tons of copper from 61,373 tons of ore treated; and in 1918, 1,453 tons from 46,369 tons. In 1919 the yield was 284 tons of blister copper.

This property is one of the largest and most interesting of the old Hispana-Roman mines and was famous before the Christian era for the high quality of copper and brass produced from its ore, but was entirely idle for 2,000 years, until re-opened, 1903, by the predecessors of the present company. In September, 1919, company announced the sale of its mining properties for 1,000,000 pesetas; assets now consist of £70,000 government bonds, which is to be spent partly in developing an option secured on

Tinto has 3 mineral zones, carrying a succes
nown as the South or Nerva lode, the San Dionis
e North lode, in addition to which there are 2 sm
acent to the North lode, which also are being w
re 3 different mines, of which 4 are worked opencast
The underground mine is worked pillar-and-stall
of 12½ meters, levels being opened 4 meters high and
ded into galleries and crosscuts of 4x4 meters, leavi
meters, which is not an entirely satisfactory method of ex
loes more ore in the pillars than is mined.
The San Dionisio mine, the westernmost and deepest of the group
shaft is nearly 1,200' depth. The work of changing over the San Dion
for opencast extraction was begun 1907, and completed 1911. The
burden, consisting principally of porphyry and slate, was removed by st
shovels and carried through tunnels on the different levels, similar w
being done in the South lode opencast extension. Ore will be mined
steam shovels to as great a depth as practicable, below which it wi
necessary to hoist by shafts to the lowest tunnel level. The San Dion
is likely to be the chief source of ore supply for several decades to c
and work has been planned systematically for 10 years in advance.

Most of the ore mined is hauled out through tunnels without the use
of small steam engines. The lowest tunnel now in use for the 2 main lodes
the South and Dionisio, has not proven deep enough and management plan
driving a new tunnel, 200' below the present one, which will be 3 miles long
and will require 3 to 4 years for completion.

Wherever possible mining has been done by open pit workings which
have the great advantage of giving complete extraction of the ore, and are
therefore economical in tonnage costs in the long run, though require
enormous initial expenditures for the removal of overburden. Fortunately
the financial resources of the company permit the outlay of vast sums, the
principal of which will not be repaid for many years, but which eventually
will be returned in full with very handsome interest. The possibility
of the caving system for underground mining was considered, but a
adverse decision was reached. Timber is scarce and high-priced. The depth
of the largest pit is about 600' and beyond the great pit the immense ore
bodies are worked by drift-stopes, the capping being blasted and sent down
raises to fill and hold the ground as the ore is removed. Steam shovels
recently have replaced manual labor to a considerable extent in opencast
extraction.

Production: 1876-1916, was 20,000,000 tons of pyrite shipped, and 40,000,
(?) tons of ore treated locally, a total of 60,000,000 long tons, this ore yield
ing 800,000 long tons fine copper. No production figures are available sinc
1913, on account of war reasons, but considering strikes and temporary

[redacted] these figures are approximately correct. In 1913 there was [redacted]8 tons of pyrite, while 1,207,403 tons of 2.19% ore was treated [redacted] This total of 1,859,571 tons compares with 2,406,969 tons in [redacted]ve copper outputs were 44,978,880 and 57,395,520 lb.
[redacted]nagement of the company is both technically and financially [redacted]cism, and the mine itself, after 3,000 years of production, requires [redacted]ndation.

ASIA

The mines are arranged alphabetically by countries.

KARA BURUN MERCURY SYN., LTD. ANATOLIA (ASIA MINOR)

Address: Aidin, near Smyrna, Turkey in Asia.

Property: yields quicksilver ores from cinnabar-bearing quartz veins in schist near limestone. Mining is done by open-cuts, and ore as low as 0.25% mercury is mined, concentrated by screening and the lump ore calcined in two double Spirek furnaces, the fines going to a Cermak-Spirek furnace. Total output of mine 30 tons daily.

Production: about 3,000 flasks of quicksilver yearly.

CHINA

It is difficult to procure specific data concerning the operating mines or active mining companies of China.

The geology of the country and its mineral resources, are described in various books, but the foreign owned mines are few and those operated by Chinese firms are with few exceptions, private enterprises. The American consular service reports that the following firms are interested in mining:

Chater, C. P.	Hongkong Iron Mining Co., Ltd.
China Mining & Metal Co., Ltd.	C. E. Richardson.
The China Crude Ore Export Co., Ltd.	R. W. Weymouth.

The above firms can probably be reached through the American Consulate at Hongkong.

The Wah Chang Mining and Smelting Co. is the world's largest producer of antimony. The largest iron mines of China are in Tayeh. The Han-yeh-ping company's mines produced 600,000 metric tons during 1919, compared with 596,000 tons in 1918. About half of this is used in the company's iron and steel works.

NEW YORK-ORIENT MINES CO. CHINA

Address: H. Foster Bain, Box 994, American Post Office, Shanghai, China; or D. C. Jackling, Hobart Bldg., San Francisco.

This syndicate composed of various well-known American engineers has been endeavoring to secure desirable mining concessions in the Orient for several years, but apparently, thus far without success.

WAH CHANG MINING & SMELTING CO., LTD. CHINA

Main office: Changsha, China. **Other offices:** 9 Ningpo Road, Shanghai, China; Wah Chang Trading Corporation, Woolworth Bldg., New York; H. M. Newhall & Co., Newhall Bldg., San Francisco; and H. E. M. Bourke, 21 Great Winchester St., London, E. C. England.

Officers: Y. H. Wang, pres.; H. Y. Liang, v. p.-chief engr.; K. C. Li, v. p.-New York mgr.; M. C. Wang, v. p.; N. F. Chu, v. p.-treas.; S. L. Tang, supt.-asst.-treas.; K. K. Chang, sec.; T. W. Tseng, asst. sec.; D. C. Chow, Shanghai mgr. **Auditors:** Y. G. Chow, M. H. Li, and C. F. Tsai. **Directors:** H. L. Shuan (chairman); H. Q. Liang, Q. Yang, C. T. Chow, D. W. Tang, P. Q. Yuen, H. K. Liang, L. C. Tsow and F. C. Chow.

The Wah Chang company was formed in 1898, under the name of Kin-Tung Antimony Mining Co., and was the first antimony mining company in

China. In 1908 it was reorganized, and obtained a patent for its antimony smelting process from the Chinese Government. In addition to this, the company obtained a monopoly of the smelting of antimony in the province of Hunan, to extend over a period of 10 years as from 1908. It has since been extended for a period of 25 years. Under this monopoly, no company has the right to erect works in the province, unless the consent of the Wah Chang company is obtained. The patent granted extends over the whole of China.

The main office is situated at Changsha, next to the antimony works, which extend over a large area, and includes in addition, a lead plant, warehouses, etc.

Antimony Mines: (1) the Yi-Yang, a good property with modern mining equipment. A railway has been built to connect the mine with the river; (2) the An-Hua mines; and (3) the Lu-Lin mines.

Tin Mines: the An-Yuen and Poo-sha.

Tungsten Mines: the Yao Kan Sian and Ton An mines. Each mine is controlled by a subsidiary of the Wah Chang Company.

Lead Mines: the Tien For Tai mines.

Products: the principal product is the WCC Antimony, with a guaranteed minimum purity of 99% Sb, but assaying 99.6% and over. Company also markets Chinese needle antimony, white oxide of antimony, and antimony ore; tungsten concentrates, which assay 70% WO_3 and over; lead and zinc ores; and Chinese No. 1 tin ingots. The antimony tin and tungsten are shipped all over the world. The lead is entirely disposed of in China for domestic purposes.

At the antimony works the Herrenschmidt process is used. This was described by K. C. Li in a paper prepared for the American Institute of Metals, and reprinted in the E. & M. Journal of October 20, 1917, also by C. Yu Wang in Bull. 136, of the A. I. M. E. in April, 1918. The ore mined is low-grade. In 1915 and 1916 there was extracted from accumulated residue over 9,000 tons (20,160,000 lb.) of metal. The works treat custom ore.

This company is the largest antimony producer in the world and supplied 55 to 65% of American imports since 1915. Exports of antimony from Changsha to the United States during 1916, amounted to 4,762 tons valued at $2,681,190, against $1,500.000 in 1915. The 1917 figures were 3,292 tons worth $245,672 (U. S.) plus 454.836 Hankow taels (83 to 106 cents U. S.) Exports from Changsha in 1917 to all countries were 21,333 tons of crude antimony, valued at $2,252,807; 102 tons of ore, $9.394, and 14,804 tons of regulus, $3.258,712.

Wah Chang Trading Corporation.

Head office: Woolworth Bldg., New York.

Officers: K. C. Li, pres.-treas.; H. T. Liang, v. p.; Chas. Gitlan, sec.

History: in the winter of 1914-'15 the Wah Chang Mining & Smelting Co., Ltd. decided to open a branch office in America for the direct sale of its products. The business, which began in a small way with the handling of antimony metal and tungsten ore only, rapidly developed, and in 1916 it was decided to form a New York corporation under the above title with a capital of $10,000. It did not become operative until March 1, 1918, when the capital was increased to $100,000. and the entire business of the Wah Chang Mining & Smelting Co., Ltd. branch office was taken over.

In April, 1918, the capital was increased to $1,000,000, and in May, 1919, was again increased to $2,000.000. The Wah Chang Trading Corporation became the sole representative of Wah Chang M. & S. Co., outside of China, and consequently took control of Wah Chang M. & S. Co.'s agencies abroad. The scope of the business has been greatly extended, and now includes antimony metal (crude and oxide), tungsten and other ores, tin, silk, etc. as imports, and machinery, pig iron, railway equipment, soda ash and other chemicals, aluminum, brass and sporting equipment as exports. It is hoped to extend the business still further.

KAMPONG KAMUNTING TIN DREDGING, LTD. MALAYA

Offices: Challis House, Sydney, New South Wales, Australia, and Kamunting Taiping, Perak, Federated Malay States.

A. W. Freeman, chairman and managing director; W. E. Hill, sec.; Sydney; H. K. Bennett, sec. at mine. A. J. King, mgr.

Inc. Nov. 24, 1916, in Federated Malay States. **Cap.,** £150,000; £1 par; £140,000 issued.

Revenue for half year ended June 30, 1918, was £54,499, of which £32,365 was profit. Dividends absorbed £28,000, and £6,003 was carried forward. Current assets total £69,404, and liabilities £1,522.

Sales during half year ended June 30, 1919, were £43,830, of which £19,402 was profit; £24,500 was distributed as dividends.

Dividends: 30% in 1916; 32½% in 1917; 20% in 1918; 17½% in 1919 for half year.

Property: 602 acres of tin-bearing alluvial ground near Taiping, which is worked by two dredges. The estimate life is from 10 to 12 years.

Production (half years):

Year	Ground dug, yards	Tin oxide, tons	Cost per yard, cents	Profit per yard, cents
1919 (June 30)	907,000	350	...	...
1918	915,300	324	8.4	20.1
1917	965,000	432	7.2	20.1

Drilling showed an average of 1.07 and 0.75 lb. of tin per yard, and in the last period the respective recoveries were 86% and 88%.

KAMUNTING TIN DREDGING, LTD. MALAYA

Office: 7 Martin's Lane, London, E. C. 4, England; and Penang, Federated Malay States.

J. I. Philips, chairman of directors; Bright & Galbraith, Ltd., sec.; R. L. Naish, gen. mgr.

Inc. May 2, 1913. **Cap.,** £150,000; £1 par; 130,000 issued.

A profit of £35,195 was made during year ended June 30, 1918. With previous balance and other income there was available £45,646. Dividends absorbed £13,000. After writing off development, taxes, etc., £12,771 was was carried forward. **Dividends:** 20% in 1915-'16; 5% in 1916-'17; and 10% in 1917-18.

Property: 750 acres of tin-bearing alluvial ground near Taiping, Perak. From 220 drill-holes put down to an average depth of 36' the average tin content was 1.37 lb. A 7-cu. ft. dredge is at work.

Production: Year	Gravel dug, yards	Black tin, tons	Average value per yard	Cost per yard
1917-18.....	834,013	397	34c.	10c.
1916-17.....	936,500	369	20c.	8c.

KINTA TIN MINES, LTD. **MALAYA**

Offices: 65 London Wall, London, E. C. 2, England; and Osborne and Chappel, mgrs., Ipoh, Federated Malay States.

W. A. Luning, chairman of board of directors; H. P. Hood, sec.

Inc. May 17, 1900, in Great Britain. **Cap.,** £120.000; £1 par; all issued.

Profit for year ended June 30, 1917, was £22,653, plus £2,622 from previous year. Dividends absorbed £24,000. Working capital was £13,587. Profit in 1919 was £85,738, of which £36.000 was distributed.

Dividends: 255% to Oct. 21, 1918.

Property: 923 acres owned or under lease, situated in State of Perak.

Equipment: storage dams and pipe-lines used jointly with the Gopeng Consolidated, and hydraulic apparatus.

Production: 476 tons of black tin in 1915; 548 tons in 1916; and 510 tons in 1917; 742 tons in 1919.

KRAMAT PULAI, LTD. **MALAYA**

Offices: 265 Winchester House, London, E. C. 2, England; and Ipoh, Federated Malay States.

A. L. Knaggs, chairman, board of directors; A. H. Cullen, sec.; B. W. Thunder, mgr.

Inc. Oct. 19, 1907. **Cap.,** £100,000; £1 par; all issued.

Profit in 1917 was £32,337, and dividends absorbed £20,000. Balance from 1916 was £7,767, and that carried to 1918 was £20,104. Working capital, £37.725. Profit in 1918 was £35,551.

Dividends: 10% in 1912; 10% in 1913; 7½% in 1914; 12½% in 1916; 10% in 1916; 20% in 1917; and 15% in 1918 to November.

Property: 1,395 acres of tin ground at Pulai, Kinta district, State of Perak, a prospecting license on 1,114 acres adjoining, and a lease on 57 additional acres, worked by 3 hydraulic elevators.

Production: 206 tons of tin oxide in 1916, 227 tons in 1917, and 177 tons in 1918.

LAHAT MINES, LTD. **MALAYA**

Offices: Portland House, 73 Basinghall St., London, E. C. 2, England; and Ipoh, Federated Malay States.

W. J. Payne, chairman of board of directors; A. H. Cullen, sec.; Osborne and Chappel, mgrs.

Inc. Nov. 26, 1906. **Cap.,** £120.000; £1 par; all issued.

Revenue in 1917 was £59,335, of which £25,089 was profit, and £18,000 was paid in dividends. Cash, investments, and reserve, total £27.884, with accounts payable, £7.087.

Dividends: 91% from 1909 to December, 1918.

Property: 283 acres of tin land at Lahat, worked centuries ago. The tin deposit is on a granite-limestone contact. Ore is mined by open cut work.

Equipment: 220-k. w. Diesel generator, 160-h. p. gas engine, hoists at mines, water and gravel pumps, monitors, elevators, puddlers, etc. Electric power is purchased.

Production:

Year	Yardage sluiced	Recovery per yd., lb.	Black tin, tons	Value per yd., c.	Cost per yd., c.
1917-18.....	505,700	1.07	242	.....	....
1916-17.....	580,000	1.0	259	23.70	7.52
1915-16.....	607,000	0.8	215	17.18	7.48

TEKKA LIMITED — MALAYA

Officers: Station Hill, Redruth, Cornwall, England; and Osborne & Chappel, Ipoh, Federated Malay States.

James Wickett, chairman of board of directors; Tom Wickett, sec. C. H. Preedy, mgr.

Inc. Jan. 21, 1907, in Great Britain. **Cap.,** £90,000; £1 par; all issued. Company controls Tekka-Taiping, Ltd., which see.

Profit for year ended January 31, 1919, was £72,166, plus £13,336 from 1918, making £85,502 available. Dividends absorbed £39,987, and £37,98 was carried forward to 1920.

Dividends: 69/6 ($16.62) per share since 1909; 8/6 in 1918, exclusive of shares of Tekka-Taiping distributed in 1913.

Property: about 500 acres of tin-bearing land in Kinta district, State of Perak. Bedrock is limestone.

Equipment: water supply for monitors, elevators, and Pelton wheels.

Production: Year	Yardage sluiced	Yield per yd., lb.	Black tin tons	Cost per yd., c.
1918.....	487,950	2.35	510	21.04
1917.....	452,000	2.43	507	16.00

Company is an important tin producer, with a promising future.

TEKKA-TAIPING, LIMITED — MALAYA

Subsidiary of Tekka Limited, which see.

Offices: Station Hill, Redruth, Cornwall, England; and Osborne & Chappel, cons. engrs., Ipoh, Federated Malay States.

James Wickett, chairman of board of directors; Tom Wickett, sec.

Inc. Sept. 29, 1913, in Great Britain. **Cap.,** £90,000; £1 par; 65,000 issued. In September, 1919, company was reorganized with a capital of £300,000, shares £1 par.

Accounts for year ended October 31, 1917, show a revenue of £55,8[illegible] of which £37,832 was profit. Dividends absorbed £12,998. After allowing for all charges, £25,541 was carried forward. Current assets were £51,9[illegible] above liabilities. Profit in 1918 was £59,642, of which £12,999 was paid in dividends.

Dividends: 20% in 1916; 20% in 1917; 20% in 1918; and 5% in January 1919.

Property: 2,046 acres of tin-bearing gravel ground near Taiping, State of Perak.

Equipment: includes a dredge and gravel pumps.

Production: Year	Yardage	Tin saved per yd., lb.	Value per yd., c.	Cost per yd., c.
1918.....	767,000	1.21	.....	[illegible]
1917.....	903,200	1.15	28.26	[illegible]
1916.....	938,000	1.26	29.00	[illegible]

TRONOH MINES, LTD. — MALAYA

Offices: Portland House, 73 Basinghall St., London, E. C. 2, England; and Tronoh, Federated Malay States.

C. V. Thomas, chairman of board of directors; A. H. Cullen, sec.; [illegible] Rich, mgr.

Inc. Dec. 3, 1901, in Great Britain. **Cap.,** £160,000; £1 par; all issued

Profit in 1917 was £51,047, plus balance of £20,529 from 1916, making £71,676 available. Dividends amounted to £40,000; and £23,393 was carried forward. Current assets were £190,157, and liabilities £8,228.

Profit in 1918 was £124,095, of which £80,000 was distributed.

Dividends: total 500% from 1902 to December, 1918.

Property: 2,679 acres of tin land and 2,000 acres of timber land in Kinta district, State of Perak. Washing machines and 3 dredges are at work.

Production:

Year	Yardage	Yield per yd., lb. tin	Cost per yd., c.
1917	1,399,835	1.66	15
1916	1,639,661	2.25	13

In 1918 the total output of black tin was 1,367 tons, compared with 1,044 tons in 1917. This is one of the largest producers of Malaya.

YUKON GOLD CO. **MALAYA**

See Addenda, under United States, for operations in Malaya.

INDIA

The Kolar goldfield, in the State of Mysore, is the one important producing area of India. The mines are all under one management with offices in London, and are all operating on one lode—the Champion Reef. This is a rather thin quartz vein, much folded in places, encased in hornblende-schist, which is surrounded by granite rocks. Operations are now at a depth of 4,000' or more. The gold is free and its extraction simple by amalgamation and cyanidation. Production is very regular, averaging around £2,250,000 for several years. All machinery is driven by electricity, generated 90 miles distant. The field has a very promising future.

BALAGHAT GOLD MINING CO., LTD. **INDIA**

Office: W. L. Bayley, 6 Queen St. Place, London, E. C., England.

Lord Ribblesdale, chairman of board of directors, John Taylor & Sons, gen mgrs.; W Pritchard, supt.

Inc. Dec. 7, 1896. **Cap.,** £308.000, in 95,400 preference and 212,600 ord. shares of £1 par; all issued.

Dividends: total 132½% on pfd. shares from 1900 to 1907 and 52½% on ord. shares from 1901 to 1906; none since.

Profit in 1917 was £5,493. Assets are £4,651 above liabilities. Reserve fund amounts to £13,000. Profit in 1918 was £5.072.

Property: 1,565 acres in the Kolar gold field, State of Mysore, India.

Development: by shafts and extensive workings. Reserves in 1918 were 8,614 tons, compared with 30,076 tons in 1917, and 26,133 tons in 1916.

Equipment: is complete, including mine plant, stamp-mill, and cyanide works.

Production:

Year	Ore, tons	Tailing, tons	Gold, oz.
1918	26,745	54,130	22,135
1917	28,525	61,600	19,929
1916	29,476	57,438	17,725

BALUCHISTAN CHROME CO., LTD. **INDIA**

Office: E. Price, 19 St. Swithin's Lane, London, E. C. 4, England.

E. Davis, chairman of board of directors and mgr.; E. Oughton, mgr.

Inc. July 29, 1914, in Great Britain. **Cap.,** £1,650,000 in 55,000 10% cum. pfd., and 110,000 ord. shares of £1 par, all issued.

Profit in 1917 was £17,500, and £8,703 was carried forward. Net current assets were £22,000. **Dividends:** 10% on pfce. in 1917; and 11½% on pfce. and 15% on ord. in 1918.

Property: 6,176 acres of mineral land in the Hindubagh district of Baluchistan, India.

issued, and 450,000 ord., 422,465 issued; shares 10s. par. Preference shares get 20% per annum.

The year ended Sept. 30, 1917, resulted in a loss of £6,671. Cash and supplies totaled £28,182, and accounts payable £9,226. The following year showed a loss of £8,054.

Property: about 3 sq. miles in Anantapur district of Madras, India.

Equipment: 20-stamp mill and cyanide plant.

Production: 29,600 tons yielded 7,531 oz. of gold in 1917, and 16,000 tons yielded 12,983 oz. in 1918. A good tonnage of tailings was also treated in 1918. By July, 1919, returns had fallen to 900 oz. per month, and it was decided to suspend mining operations. From December, 1913, to September, 1918, the total output was 35,816 oz. gold from 128,570 tons of ore.

KANBAUK (BURMA) WOLFRAM MINES, LTD. INDIA

Offices: 34 Great St. Helen's, London, E. C. 3, England; and Foucar & Co., Rangoon.

W. Nuding, chairman of board of directors; C. M. Lyons, mgr.; H. D. Griffiths, cons. eng.

Inc. March 24, 1917, in Burma. **Cap.,** £190,000; £1 par; 140,000 issued. Debentures, £60,000 authorized; £50,000 issued at 10% for 5 years.

Profit for 18 months ended Dec. 31, 1917, was £26,380. Current assets were £16,800, and liabilities £22,500.

Property: lease of 4,732 acres in the Tavoy district of Burma, carrying tungsten and tin deposits. A concentrating plant is at work.

Production: 305 tons of wolframite in 1916, and 358 tons in 1917.

MAWCHI MINES, LTD. INDIA (BURMA)

Office: J. A. Henderson, sec., 18 St. Swithin's Lane, London, E. C. 4, England. **Mine office:** Mawchi, via Toungoo, Burma.

F. D. Holroyd, chairman of board of directors; M. B. Geeson, mgr. of Burma; E. Adamson, technical manager.

Inc. Nov. 2, 1914, in Great Britain. **Cap.,** £250,000; £1 par; 220,000 issued. Also £29,590 of 6% debentures.

Profit for year ended June 30, 1918, was £33,690. Dividends absorbed £33,168; £17,303 was carried forward. Current assets exceeded liabilities by £60,000.

Dividends: 5% in 1916; 10% in 1917; and 5% in 1918.

Property: a concession of 11 sq. miles, 16 miles from Pazaung, in southern Burma, for which company pays rental and royalty to the government. Tin and tungsten deposits are worked, and reserves were 83,000 tons of ore esimated to carry 3.95% mixed concentrate.

Production: 639 tons of mixed concentrate from 22,071 tons in 1916, and 678 tons in 1917.

MYSORE GOLD MINING CO., LTD. INDIA

Office: W. F. Garland, 5 Queen St. Place, London, E. C. 4, England. Lord Ribblesdale, chairman of board of directors; R. H. P. Bell, supt.; John Taylor & Sons, gen. mgrs.

Inc. July, 1880, in England. **Cap.,** £305,000; shares 10s. par; all issued. Late in 1919 it was proposed to increase the capitalization to £610,000 and issue 610,000 shares, 10s. par.

Profit in 1917 was £404,296, of which £259,250 was distributed. Balance from 1916 was £111,665, and that carried to 1918 was £83,944. Reserve fund was £150,000; cash and gold, £243,624; and stores, £[illegible]. Profit in 1918 was £126,513. Revenue in 1919 was £663,826, of which £186,443 was profit. After paying dividends, £66,189 for taxes, and £[illegible] for depreciation, balance forward to 1920 was £7,201. Cash assets £197,707 net.

Dividends: total 3230% to end of 1919, equal to £8,847,844.

Property: 3,051 acres at Kolar, State of Mysore, India.

Development: by shafts over 4,000 [illegible] narrow lode. Reserves were 600,[illegible] 1919. Ore [illegible]

normal conditions, development was 51,000′ less than normal during the years 1914-1918.

Equipment: complete, with 160 stamps, tube-mills and cyanide plants.

Production: to end of 1919 was 5,179,025 oz. gold from 5,701,861 tons of ore.

Year	Ore, tons	Gold Yield, oz.
1919	270,425	163,719
1918	293,186	174,208
1917	307,126	198,446
1916	307,023	198,258
1915	305,000	207,981

The Mysore has been one of the world's largest gold mines. Its depleted ore reserves are quite low-grade, but inasmuch as zones of impoverishment overlying high-grade ore are a feature of the mine, deeper development is to be done.

NORTH ANANTAPUR GOLD MINES, LTD. **INDIA**

Office: W. L. Bayley, 6 Queen Street Place, London, E. C. 4, England. J. Taylor, chairman of board of directors; L. C. Oliver, supt.

Inc. June 23, 1908, in Great Britain. **Cap.,** £125,000, in 25,000 pfce. (all issued), and 100,000 ord. (91,253 issued); £1 par. Preference shares are entitled to 20% per annum.

Profit for year ended June 30, 1919, was £18,445, which is £3,410 less than in 1918.

Dividends: from 1912 to March, 1919, the pfce. shares received a total of 140%, and ord. shares 20%.

Property: 1½ square miles in Anantapur district, Madras, India; also holds a 2-year option on the Baragunda copper mine in northern India.

Development: by 5 shafts. Ore reserves are 11,000 tons, compared with 10,000 tons in 1918, and 32,000 tons in 1917.

Equipment: includes 35-stamp mill and cyanide plant.

Production, years ending June 30:

Year	Tons	Gold, value
1919	14,200	£49,569
1918	20,100	57,287
1917	26,500	57,705

The gold mine appears to be nearly exhausted, but the new copper property is considered promising.

NUNDYDROOG COMPANY, LTD. **INDIA**

Office: W. L. Bayley, 5 Queen St. Place, London, E. C. 4, England.

W. B. McTaggart, chairman of board of directors; C. H. Richards, supt.; John Taylor & Sons, mgrs.

Inc. April 20, 1893, in England. **Cap.,** £283,000; shares 10s; all issued.

Profit in 1918 was £123,424, of which £63,675 was distributed, against £141,558 and £94,333 in 1917. The reserve fund remains at £50,000.

Dividends: since 1888 total 968%.

Property: 1,497 acres at Kolar, State of Mysore, India.

Development: by 5 main shafts, 3,440′, 4,037′, 3,993′, and 4,085′ deep, the [illegible] being 18′ diam. and under construction. Reserves are estimated at [illegible] tons.

[illegible]ment: complete with 80 stamps and cyanide plant.

	Ore, tons	Gold Yield, oz.
[illegible]	102,731	78,757
[illegible]	99,345	79,586
[illegible]	98,000	80,401
[illegible]	94,000	82,822

Boveri-Rateau blowers, a complete lining department, and 140-ton electric crane. Blister copper from the converter is refined electrolytically, the product being 99.95% copper. The slime from the electrolytic tanks is treated in two cupel furnaces. The monthly capacity of the electrolytic plant is 1,200 tons.

The electrolytic zinc refinery at the Kosaka mine was installed in 1915. There are 4 Herreshoff calcining furnaces, which were used before the matte calcining, one muffle furnace, and 5 Ding's magnetic separators. The daily production of electrolytic spelter is about one ton.

Power is all electric, the Kosaka installations aggregated 3,550 k.w. a.c. and also 220 k.w. d.c. for the mine, smelter, shops, and rail lines. It is generated by 4 water plants on the river Oyu, near the mine, also by a Locomobile steam plant.

The Kosaka mine operates an electric trolley, with 9 miles of main line and branch lines, equipped with 35 locomotives and 400 three-ton ore cars. The lines reach all principal points at the mine, smelter, and shops and connect with the Kosaka railway at the Kosaka depot. The Kosaka railway, which is 15 miles between Kosaka and Odate, connects with the Government railway at Odate.

Production: the annual output of the Kosaka has been as follows: 12,76[illegible] long tons of copper, 335 tons of lead, 829,970 oz. silver, 20,000 oz. of gold and 251 tons of zinc.

The Tokito dressing plant is 2 miles from the smelter, with aerial tram connection. Mixed ores from the branch mines of the Kosaka mine are dressed, the capacity being 100 tons per day.

Hanaoka Mine: in Kita-akita-gun, Akita Prefecture, Japan, owned by the Fujita Co. since 1915.

Ore: the deposit is massive and worked by filling methods. The ore contains chiefly copper and iron pyrite, galena, zinc blende, and gypsum. After hand-picking, it is transported to the Kosaka smelter, 18 miles away.

Production: in 1918 was 125,582 tons, which contained 0.000092% gold, 0.00513% silver, and 3.112% copper.

Omori Mine: situated in a mountainous region in the province of Iwami (Omori-machi, Nima-gun, Shimane-ken), in the northwest of Honshu, near the coast of the Japan Sea. This mine is said to have been discovered some 600 years ago, and reopened in 1525. The mine once was highly productive, but was closed in 1872 by an earthquake, and reopened in 1[illegible] by the present company, which, after spending considerable capital, equipped the mine with a modern plant.

Geology: the district is composed of Tertiary tuffs and sandstone, interspersed with a great mass of andesite containing ore. There are five veins which have been produced by the fillings of the fissures with mineral solutions. The dip of veins varies from 80° to 70° N., with from [illegible]' to 3' width. Ore exists in bands in the veins, its average width being 7", but it sometimes swells to 6'. Some of the veins are 2,000' long, composed principally of chalcopyrite, galena and zinc blende, containing gold and silver. Five of the veins—Sato, Honnakase, Nakase, Sanjio and Uenose—are now being worked. The ore contains 0.00148% gold, 0.050[illegible] silver, 6.66674% copper and 0.58771% lead.

Development: the veins are worked by stoping, and material is removed by adits and shafts. The ore, after being cobbed and picked, is mechanically dressed by breakers, rolls, trommels, jiggers, etc. The dressed ore, with the requisite quantity of limestone and coke, is smelted raw in an ordinary circular jacketed furnace. The matte formed from this ore-pyrite smelting is once more smelted, forming blister copper (98% Cu) containing 2.3% gold, 77% silver, and lead. This last operation is carried out according to the Japanese Mabuki process.

Production: the output was 1,071,100 lb. of blister copper in 1916, [illegible] lb. in 1917, and 729,366 lb. in 1918. All blister copper from this mine is shipped to the Kosaka electrolytic refinery.

Oarasawa Mine: about 17 miles W. of Kurosawajiri station on the Government railway, to which a tramway has been constructed from the mine, is situated at Yuda-mura, Waga-gun, Iwateken (east district of Akita-ken, not far from the Kosaka mine). It was opened 33 years ago, passing in 1910 to the present ownership.

Geology: country rocks are granite, tuff, and liparite of Tertiary age. Traversing these rocks, especially tuff, many veins in various widths from 6″ to 6′ occur, running nearly parallel in the strike of N. 35 to 60° E. and dipping N. W. at 60 to 70°. A few veins dip at the same angle as the former, but in the opposite direction. The gangue is principally quartz, and the veins carry mainly chalcopyrite and iron pyrite, also some oxides of copper.

At five miles W. from the Oarasawa mine is the Unekura mine. This is a branch of the Oarasawa at present. The district consists mainly of liparite and tuff of Tertiary age, and fissure veins are found in liparite and tuff. These can be classified into two general groups; the strike of one is N. 25° E., the other N. 85° E. The minerals contained in the ore are chalcopyrite and a little iron pyrite; the gangue is quartz.

Development: the veins of Oarasawa and Unekura are worked by overhand stoping, and the material is removed by adits and shafts. The ore mined is mechanically dressed to 7.5% grade.

Production: is about 151,000 long tons of dressed ore yearly, plus 1,000 tons of purchased ore. The blast-furnace process is generally similar to that at the Omori. Annual production of blister copper (anode) contains 98% copper, 0.0005% gold, 0.05% silver, is 1,650 long tons, which is transported to Kosaka refinery. About 1,000 men are employed, including branch mines.

Matsuoka Mine: situated at Yamada-mura, Okachi-gun, Akita-Ken, and three miles W. from Yuzawa station on the Government railway, to which a light railway has been laid from the mine. The mine was worked in the eighteenth century by Shinen Sato, a famous economist, miner and metallurgist, to whom modern mining in Japan is greatly indebted. Since the end of 1906 the present company has operated the property.

Geology: country rocks are liparite and tuff of Tertiary age. Ore deposits consist of a network of veins in the upper part, but only a few veins in the lower part. The ore consists of chalcopyrite, galena, and zinc blende, gold, and silver; and assays 0.003% Au, 0.0085% Ag, and 0.95% Cu. This is dressed to 0.006% Au, 0.015% Ag, and 2.3% Cu, and is transported by railway to Kosaka. Production was 15,000 tons of dressed ore in 1916.

Yanhara Mine: situated in Kume-gun Okayamaken, about 10 miles from the Tsuyama railway station of the Chugoku line. Property is traversed by the River Yoshii, a stream of considerable size, so that the mine output is carried by boat to the port of Kuban on the Island-Sea, at the river mouth, 35 miles below. The ore deposit was discovered in 1911.

Geology: a Mesozoic clay slate is intruded at several places by a basic rock of the gabbro family. The deposit is a magmatic segregation near the slate and in the gabbro itself, in several masses, one of the largest measuring 400′ by 500′ by 250′. The ore is an iron pyrite, containing only 4% copper and 46% sulphur, and is used mostly for making sulphuric acid.

Production: 420,000 tons of pyrite and 30 tons of copper ore yearly.

Hirota Steel and Ferro-Alloy Works: situated near Aizu, in Fukushima prefecture. Owing to the war, Japan has suffered from the lack of some materials imported from foreign countries in ordinary times, and all ferro-alloys are among them. The company taking advantage of this opportunity decided to produce these alloys and special steels. The works are [illegible] electric power, and now produce ferro-silicon, ferro-[illegible]tungsten, ferro-molybdenum, ferro-titanium of every description, and special kinds

Most of the products are used in Japan by the navy and army arsenals, also by various engineering works, while some alloys are exported to Russia and other foreign countries.

FURUKAWA GOMEI KAISHA (FURUKAWA & CO.) JAPAN

Directors: Baron Toranosuke Furukawa, pres.; Rokusaburo Kondo, chief director; Masayuki Otagawa, Koji Inoue, Bunjiro Kondo.

In 1875 the late Ichibei Furukawa established the Furukawa Copper Firm in Tokyo. He was very energetic, and devoted himself to developing and equipping the mines he had prospected. In 1903 the late Junkichi Furukawa, the son of the founder, succeeded his father and became president of the firm. In the same year the concern was reorganized into a company under the Japanese law. On his death, in 1906, Toranosuke Furukawa, his brother, succeeded him, and since then he has been president of the company.

The company has 11 offices, 4 copper works, and 25 mines, whose total area of concession is about 70,000 acres; 1,200 officials and 25,000 men are employed; the annual production is 35,000 tons of copper, 20,000 tons of copper wire and plate, 220,000 tons of copper ore, 1,200,000 tons of coal, and quantities of bullion, pig lead, silver ore, zinc ore, etc.

Head Office: Yaesucho, Kojimachi-ku, Tokyo, Japan.

Branches:	**Address:**
Osaka Branch Office	Ajikawa kamidori, Kita-ku, Osaka.
Moji Branch Office	Hamamachi Moji.
Wakamatsu Branch Office	Kaigan dori, Wakamatsu, Fukuoka-ken.
Hakata Branch Office	Hakata Kaigan dori, Fukuoka.

Principal Mines:

Ashio Copper Mines	Ashio Kamitsuga-gori, Tochigi-ken.
Ani Copper Mines	Ani, Kita-akita-gori, Akitaken.
Nagamatsu Copper Mines	Shiraiwa, Nishimurayama-gori, Yamagata-ken.
Mizusawa Copper Mines	Jwakimura, Waga-gori, Iwateken.
Otori Copper Mines	Oizumimura, Higashi-tagawa-gori, Yamagataken.
Kawaiyama Copper Mines	Ikumo-mura, Abu-gori, Yamaguchi-ken.
Kune Copper Mines	Sakuma-mura, Iwata-gori, Shizuoka-ken.
Furokura Copper Mines	Oyu-mura, Kazuno-gori, Akita-ken.
Kijo Gold Mines	Todo, Kijo-gun, Heinanhoku-do, Chosen.
Innai Silver Mines	Innai, Ogachi-gori, Akitaken.
Daira Lead Mines	Fujikoto-mura, Yamamoto-gori, Akitaken.
Shakanoo, Shiogashira and Daini-Shakanoo Colleries	Otani-mura, Kano-gori, Fukuoka-ken.
Shinshakanóo Colleries	Nishiawa-mura, Kurate-gori, Fukuoka-ken.
Shimoyamada Colleries	Kumada-mura, Kaho-gori, Fukuoka-ken.
Yoshima Colleries	Yoshima-mura, Ishiki-gori, Fukushima-ken.

Works:

Mizushima Smelter	Mizushima Is., near Tamashima, Kojimagun, Okayama-ken.
Amagasaki Refinery	Amagasaki, near Osaka.
Nikko Copper Works	Nikko, Tochigi-ken.
Honjo Copper Works	Yanagiwara-cho, Honjo-ku, Tokyo.

Ashio Mines.

These mines are in Ashio, Kamitsuga-gori, in Tochigi-ken, about 100 miles from Tokyo, connected by the Imperial government railroad and the Ashio railroad. They are 11 miles W. of famous Nikko. Area of the concession is 4,000 acres.

Geology: the district consists mainly of Paleozoic sediments and Tertiary liparite (rhyolite). The liparite forms a volcanic neck erupted through the paleozoic sedimentary rocks and is 2 miles in diameter. The ore deposit of Ashio occurs in veins, most of which traverse the liparite. The strike or course of the veins is either N. 60° E. or N. 80° W. The veins of the first named direction are called the 60° lodes, or the Yokomabu series, and the others the 100° lodes, or the Shinsei series. The mines have more than 200 veins, of which 40 of the Yokomabu series and 60 of the Shinsei series are now being worked. The most important veins of the first series are named as follows: Yokomabu, Kosei, Jimbo and Deai. The second series embraces the Shinsei, Eisei and Tengu. They intersect each other and form rhombic nets of veins. The lodes are generally 1 to 16′ thick, 400 to 6,000′ long, and generally have steep dips. The chief minerals are chalcopyrite and pyrite, with accessory amounts of zinc blende, arsenopyrite, galena and pyrrhotite. Bornite, chalcocite, cuprite, malachite, pisanite and sometimes azurite and native copper are found in the oxidized zone. The gangue minerals are found in small amount; clay and chlorite are common, quartz is also common, and calcite is found at deep workings. Native bismuth, bismuthinite, wolframite, fluorite, crystallized vivianite, ludlamite and apatite are rarely found.

Development: the mines have three main adits, namely: the Ariki, Kotaki and Isudo, which are three miles apart.

The Ariki adit is driven mainly along the strike of Yokamabu vein and is 10′ high, 10′ wide and about 8,000′ long. It is an important level for transportation and drainage. The Kotaki adit, whose portal is to the N. W. of the mine, is driven chiefly along the course of the Kosei and Tengu veins, and is connected with the Ariki tunnel. Both the Kotaki and Ariki tunnels are used as trunk haulage ways for underground transportation. The 6 levels' below and the 12 levels above are within the reach of the Tsudo adit.

Tsudo adit: this adit is S. of the mine, on the bank of the Watarase river, 475′ lower than the Ariki. This level was begun in 1885, and driven northward for 12,000′. More than 50 veins were cut in the tunnel, most of them still being profitably worked. The Tsudo tunnel is the main drainage and transportation way of the mine. It is 11′ high and 13′ wide. There are 12 mine levels below it, the lowest one 1,500′ beneath the tunnel.

Honkuchi shaft: which is 6′x9′, is a half mile from the portal of the Honkuchi tunnel, connects with the 10th level and extends down to the Ariki tunnel level. It is equipped with electric hoists.

Yokomabu No. 1, or first shaft, which is 6′x11′ in the clear, is sunk on the Yokomabu vein at a point 4,600′ from the portal of the Ariki adit, connecting at 457′ below with the Tsudo level. There are 7 levels and many working faces that are now being profitably operated.

Yokomabu No. 2, or second shaft, which is 6′x18′, is sunk on the same Yokomabu vein, at a place 2,500′ from the Ariki adit. It taps the Tsudo adit at a depth of 410′ and goes 100′ below it. The shaft has 7 levels between the Ariki and Tsudo tunnels, and 6 levels below the Tsudo adit.

Yokomabu No. 3, or third shaft, 5′x12′, is 1,900′ from No. 1 Yokomabu and passes through Tsudo level at 466′ below Ariki level, and reaches to the depth of 1,300′, and more sinking is going on. A hoist is fitted up at the mouth of this shaft for the workings below Tsudo level. The Kolaki shaft, 6′x14′, is near the Kosei vein, 2,100′ from the Kolaki adit, [illegible] Tsudo level at depth of 448′. No. 1 Kosei shaft, 6′x18′, near [illegible] vein, is along No. 23 vein, 2,600′ W. from the Tsudo adit. It is

900′ deep, and further sinking is in progress in 1917. There are 8 levels connecting with the shaft for the working of the Kosei, Kosei-machi, Tengu, etc., veins. No. 2 Kosei shaft, 6′x18′ and 660′ deep is 2,000′ W. from No. 1, on the Kosei vein. There are several levels connecting with the shaft, which open up to the eastern part of the vein. The Kosei-machi shaft, 6′x23′, is over 1,500′ below the Tsudo adit.

The vertical depth of the underground workings from the highest outcrop to the lowest level is as follows: Outcrop on Bizendate peak to Tsudo adit, 2,200′; below Tsudo adit, 1,500′; a total of 3,700′.

The aggregate length of drifts amounts to about 1,000,000′, or 190 miles

Overhand stoping is generally used, but also square set work. Each stope is 6′ high, and more than 2½′ wide, varying according to the thickness of the vein.

General features: waste water from the precipitating tank for cement copper and the slimy water from the dressing plants are treated with milk-of-lime, after passing through slime setting ponds.

The smoke from all furnaces passes through Cottrell treaters. Ashio being in a very mountainous region, aerial tramways are widely used for transportation of timber, etc.; their total length is 25 miles. The Tanamura system is adopted in all lines.

Power is supplied from the Hosoo hydro-electric power plant (12 miles from Ashio), developing 20,000 h. p.

Production: has increased gradually during the past 10 years as follows: 6.315 long tons in 1907; 7,191 in 1908; 7,526 in 1909; 7,453 in 1910; 7,932 in 1911; 8,470 in 1912; 10,428 in 1913; 12,204 in 1914; 11,624 in 1915; 14,81[illegible] (33,187,840 lb.) in 1916.

Cost of Ashio copper is probably a little less than 10c per lb. finished

Ani Copper Mines.

(Annual production, 1,500 tons of copper.)

The Ani Copper Mines are at Ani, Kitaakita-gōri, on the western side of the Moriyoshi Mountain, in Akita-ken. The concession is over 4,600 acres, and is over 5 miles long.

Geology: rocks include Tertiary tuff, tuffaceous shale, liparite, and andesite. Veins traverse the whole formation, there being two sets of veins, one running N. S. and the other E. W. The dip is generally steep, though a few of the N. S. lodes have a dip less than 40°. The E. W. lodes are cut by the N. S. lodes, which are sometimes brecciated veins, and occasionally have a clay filling. The E. W. lodes are numerous, though not thick nor long; while the N. S. lodes are big, though few in number.

The principal metallic minerals are chalcopyrite, associated with pyrite, some galena and zinc blende. The gangue or vein stuff is mainly quartz, but sometimes calcite and barite are found. The oxidized zone is deep and contains bornite, chalcocite, native copper, etc.

For timbering, only rough, round logs are used. There are several forms of timbering used including legs and caps, saddle back, and polygonal sets. It is interesting to note that large excavated spaces such as the hoisting and pumping stations and chambers, each 40′ wide, 25′ high, are timbered with big logs.

Transportation: underground of ores, waste and supplies is by electric locomotives and electric hoists; the former in the Ariki-Kotaki adit, Tsudo adit and No[illegible] and 8 levels below the Tsudo. The total length of electrically [illegible] tackage is 10 miles. All shafts are equipped with electric hoists. [illegible] power used is 1,200 h. p.

The [illegible] Kotaki le[illegible] drain the water coming from above. [illegible] There are many kinds of pumps, [illegible]rbine types. Total electric pump[illegible]

[illegible] by electricity, transmitted [illegible] plant to five substations.

where it is transformed down to 2,200 volts, again stepped down to 500 volts at underground substations.

Ore dressing: the mines have three concentration mills at Honzan, near the portal of the Ariki, Kotaki and Tsudo tunnels. Crude ore is sorted into two grades underground, one averages 12% copper, the other 0.8%. The daily output of crude ore for the three mills is 250 long tons of 1st and 1,500 tons of 2nd grade. The former is selected mostly by hand, the latter is treated by jigs, tables and flotation. Concentrates from these mills amount to 300 tons of 12.5% grade daily.

Cement copper: is recovered from old workings and weathered rubbish. The daily production is 2½ tons of 66% copper, which is sent direct to the smelter.

Smelter: this is at Honzan, the eastern part of Ashio. The lumps and fines from the concentrating mills being silicious, some basic ores and limestone is supplied from other places. About 105,000 tons of 12.5% product is treated annually, indicating a production of 13,000 tons of copper.

The lumps are charged raw to the blast-furnace, the fines are reduced in reverberatory furnaces after roasting in 5 McDougall furnaces. The matte is bessemerized as usual.

There are four blast-furnaces, 160x42″ at the tuyere level; the height from the center of the tuyeres to feed floor is 8½′. Blast is supplied by a Root No. 8 blower, also by turbo-blower. Matte averages 40% copper. Slag assays silica, 39%; iron, 25%; lime, 19%; aluumina, 9%, and copper, 9.2%.

The reverberatory furnace is 19′x110′. Waste heat is utilized by steam boilers. Matte is ladled into converters by an electric traveling crane.

There are 7 converters of the barrel type, 72″ diam. and 100″ in length. The tuyeres have Dyblie ball valves. Blast for the converters is produced by two turbo-compressors. Lining for converters is a decomposed rhyolite porphyry (liparite).

The converters produce more than 100,000 lb. of blister copper daily. Blister is cast into 70-lb. ingots or anode plates, and carried to the Nikkō Copper Works by rail.

Gases from the roasters, blast and reverberatory furnaces, and converters, pass through two Cottrell treaters to eliminate the fumes and dust. Arsenic is also saved. The dust carries 1.37% copper, 19.72% sulphur, and 31.83% arsenic.

Analysis of the blister copper is as follows; copper, 99.077%; gold, 0.0003%; silver, 0.1065%; arsenic, 0.029%; bismuth, 0.006%; iron, 0.052%; sulphur, 0.028%, and selenium and tellurium, 0.038%.

Mining: there are many levels and shafts, including the Manaita, 10′ wide, 7′ high, and 8,000′ long, the most important transportation and drainage level. Below this there are four levels at present. The Kanbun is 7′ high, 4′ wide, and 4,500′ long. There are ten other levels above the Kanbun tunnel with intervals of 60′ to 80′, the lower five now being used. The Kosawa main shaft, 4′x4′, is one of the blind shafts, which is sunk down to Maehi vein in Manaita level, and is 400′ deep. It is equipped with hoists, and pumps. The Chōmatsu crosscut opens nearly all of the chief veins in this mine. It is 7′ high, 10′ wide, and 1,000′ long and is the most important transportation level. There are seven levels above and six below it.

The Sosuido level is the third below the Chōmatsu, and is 4′ wide, 6′ high, and 1,700′ long. It is used for drainage only. The Kavakusa, 4′x14′, is one of the blind shafts sunk to the Shinsei vein on the Chōmatsu level, and is 600′ deep at present. The Koganehira level is the lowest for transportation and drainage, and is 7′ high, 4′ wide, and 1,500′ long. The [illegible] level is 50′ above the former, and is 6′ high, 4′ wide, and 3,000′ long. There are 10 levels above the Koganehira, connected by winzes. The [illegible] cut through at the foot of the mountain range between [illegible] Sammai valleys. It is the lowest level in the mine, and [illegible] 2,000′ long, with double tracks. During the driving

ing the Tertiary. The deposit consists of quartz veins that traverse all rocks.

Mining: the portal of the Sosuidō adit is near the concentrating mill; it is first a crosscut, and then a drift along the Hompi vein, the champion lode of the mines. It is 7,800′ long, and is used for drainage and transportaion.

No. 1 Yamaichi shaft, 4′x13′, is 1,370′ deep and develops the Hompi vein. It is equipped with an electric hoist. No. 2 Yamaichi is on the E. end of the Hompi vein, connects with the Sosuidō adit level at a depth of 300′, but it has no connection with other levels.

Ore treatment: crude ore is crushed by gravity stamps and concentrated on Wilfley tables. Concentrates and old tailings are treated by cyanidation. The former contains 1.09% (355 oz.) silver, and the latter 0.02% (6.5 oz.) silver. The cyanide plant was completed in August, 1917, and produces 400,000 oz. of silver annually.

Daira Lead Mines.

(Annual production, 600 tons of lead, 5,000 tons of zinc ore.)

These are in the village of Fujikoto, in Yamaoto-gōri, Akita-ken. The mine is 17 miles from the Futatsui station of the Ou line of the Imperial Government Railway.

Geology: the rocks include Tertiary tuff, andesite, and liparite. The quartz vein carries mainly argentiferous galena, and zinc blende. The deposit is reached by a tunnel driven along the vein.

Treatment: dressing is done by hand, mechanical crushing, screening, jigging, and flotation, and finally by an electro-magnetic separation. The lead ore is smelted here, and the zinc ore sold. The former is roasted in pots with limestone, and is reduced by charcoal in Mabuki hearths, and made into base bullion. A 400-h. p. hydro-electric power plant was erected, and a light railway connecting the mines and Futatsui station of the Government Railway has been constructed.

Coal Mines.

Name	Coal	Tons per Annum
Shiogashira, Shakanoo, Daini-Shakanovo	Bituminous	380,000
Shimoyamada	Anthracite	160,000
Shinshakanoo		60,000
Yoshima		500,000

Mizushima Smelter.

This is a customs smelter, situated on the islet Mizushima, 5 miles S. E. of the Havour Tamashima, near Okayama City. It includes pot roasters, blast furnaces, and Mabuki hearths. The blister copper is sent to Nikkō Copper Works.

Production is 3,500 tons of copper per annum.

Amagasaki Refinery.

This refinery is in the town of Amagasaki, near Osaka. Copper is refined in reverberatory furnaces. Lead ingots and silver bullion are also produced.

Annual production is 5,000 tons of refined copper, 2,000 tons of lead, and 10,000 oz. of silver bullion.

Nikko Copper Works.

[illegible] works are at Kiyotaki, near Nikkō, and make electrolytic [illegible], alloy wire, copper plates, etc.

[illegible] and other mines is refined here. The plant consists [illegible]tem, and one for the multiple system, blue [illegible] slime house.

1916	800	116,600	1,115,646
1915	1,000	129,310	987,742
1914	600	103,960	915,116
1913	320	79,640	650,185

Ikuno Mine: area 6,213 acres, at Ikuno Machi, Hyogo prefecture, Japan. G. Tajuchi, mgr., R. Kamada and C. Kato, asst. mgrs. The principal mines of this group are the Tasei, Kanagase, Akenobe and Kasei. There are 4 smaller ones.

Geology: the Tasei has a 14′ main vein with numerous branches in quartz porphyry and altered andesite tuffs. The ores carry native gold and silver, together with chalcopyrite, galena, zinc-blende, and pyrite. The vein is notable for its silver content, and has been the mainstay of the mine for centuries, giving it the name of "Silver Mine of Ikuno."

Production: copper is shipped in slabs carrying 96.83% copper, 0.0072% gold, and 0.4742% silver. Output for the past 6 years follows:

Year	Gold, oz.	Silver, oz.	Copper, lb.	Tin, lb.
1918	2,007	168,147	4,930,918	—
1917	1,184	196,175	6,138,172	—
1916	2,140	249,000	5,486,119	551,[illegible]
1915	2,110	223,200	5,219,481	684,[illegible]
1914	2,600	240,200	4,749,880	164,[illegible]
1913	3,200	258,900	3,870,311	41,[illegible]

Kanagase Mine: near the Tasei, has many veins in quartz trachyte, three of them being workable. The property is traversed by several massive dikes, with fault dislocation of the veins along the dikes. The main copper vein is 8′ to 10′, runs N. S., dips 60 to 80° E., and is 10,000′ long. The ore carries native copper, bornite, chalcopyrite, and tetrahedrite. The other veins now being worked are 3′ to 9′ thick, nearly vertical, [illegible] for 2,000′, and contain argentite, sphalerite, galena, ruby silver, and stromeyerite besides copper sulphides.

The Akenobe mine has numerous copper and tin-bearing veins in Paleozoic slate, scattered along the Akenobe river. Eleven veins are worked, varying from 3′ to 4′ wide. Ores carry chalcopyrite, bornite, cassiterite, wolframite, and blende also.

The Kasei mine shows hornblende gneiss, cut by rhyolite and porphyry dikes with fissure veins carrying silver sulphides associated with chalcopyrite and native silver.

Equipment: includes steam, water, and electric power plant.

Yoshioka Mine: area 3,137 acres, at Fukiyamachi, a small town in Kawakami district, Okayama prefecture, 33 miles from Tatami, on the railway. M. Yamashita, mgr.

Geology: slates, sandstones, and phyllites are cut by porphyry and quartz porphyry. The ore deposit is divided into two parts, one in sedimentary beds, increasing in richness with depth; the other an impregnation in metamorphic slates in an igneous contact zone. The former shows veins of erratic width, in the form of a stockwerk. Ore is chalcopyrite, with some pyrite, arsenopyrite, pyrrhotite, with a quartz gangue, and averages 3 to 8% copper.

Development: the mine has a 360′ shaft, with [illegible] shaft. Total openings amount to 28 miles.

Production: 7,000 tons of ore annually. The output was as follows:

Year	Gold, oz	Silver, oz.	Copper, lb.
1918	144	41,624	1,299,356
1917	158	60,608	1,749,627
1916	120	63,200	1,607,312
1915	130	64,500	1,608,555
1914	130	61,790	1,741,342
1913	130	61,250	1,519,989

Makimine Mine: area 1,388 acres, at Kitakata village, Higashi-Usuki district, Miyazaki prefecture, Japan. It is far away from railway lines, but in a well traveled region. It is accessible by steamer up the Gokase river to Tomi.

Geology: country rock is slate with interbedded standstone, and a capping of lava from the Aso volcano. These rocks are cut by veins of small size, carrying lenticular ore shoots of pyrite, averaging 5% copper, the ore shading into pyrite and lievrite. There are 11 main veins, whose ore-bodies are from 10′ to 20′ wide, though averaging but 1′ to 7′, and are 30′ to 300′ long.

Development: is by tunnels at 50′ to 60′ intervals, with inclined winzes of 310′ and 1,000′, and a vertical 240′ winze. Workings aggregate 23,300′.

Equipment: is hydro-electric.

Production: for past 6 years was as follows:

Year	Gold, oz	Silver, oz.	Copper, lb.
1918	597	3,735	853,505
1917	644	8,325	1,573,300
1916	630	8,350	2,121,223
1915	627	8,100	2,415,395
1914	618	7,740	2,103,181
1913	615	6,430	1,515,903

Naoshima Smelter: is on an islet called Naoshima, 1½ hours from kayama City by train and boat. This smelter is divided into two departments—one smelting copper ore, the other lead ore. The copper department includes MacDougall furnaces, reverberatory furnaces, and converters; the lead department includes preliminary roasting furnaces, pots, ast furnaces, softening reverberatory furnaces, Park's pans, refining reverberatory furnaces, distillation furnaces, and cupellation furnaces. Furce gases are treated by 5 units of electric precipitation apparatus. The ster copper and bullion are sent to Osaka Refinery.

been won by the possession of mines of exceptional value, though the company has some excellent properties, but rather by the utilization of the most modern methods and appliances in mining and metallurgy, directed by the best technical skill available.

MITSUI MINING CO., LTD. JAPAN

Head office: No. 1 Surugacho, Nihombashiku, Tokyo, Japan. **New York office:** 65 Broadway, New York.

Directors: Gennosuke Mitsui, pres.; with Genyemon Mitsui, Dr. Nagai Yamada, Dr. Tamaki Makita, Dr. Buntaro Yamada, Dr. Heinojo Ueki, Kenzaburo Iwata, Dr. Takuma Dan, Kikusaburo Fukui, and Kwan-ichi Okamoto. **Auditors:** Jutaro Mitsui, Shogoro Hatano, and Tomojiro Ono.

Cap., 50,000,000 yen paid up.

Property: the Miike, Tagawa, Yamano, Hondo, Noborikawa, Sunagawa, Kushiro, and Kawakami coal mines; the Kamioka, Kushikino, and Kosaka metal mines; the Iwaonobori sulphur mine; zinc refinery, by-product coke and gas power plant and dye manufactory. The Kamioka smelter is in the heart of a sericulture district and in order to prevent fumes and dust from damaging the mulberry trees and silkworms, a 3-unit Cottrell treater handles gases from the furnaces. Dust from the precipitator carries 1.13% free sulphur and 19.65% arsenic.

Production: in 1918 was 3,696,000 tons coal, 31,000 oz. gold, 657,000 oz. silver, 41,000 lb. copper, 5,750 tons lead, 10,400 tons zinc, 15,700 lb. arsenic, 94 tons tungsten ore, and 7,000 tons sulphur, also 114,000 tons coke, 1,300 tons sulphate of ammonia, several kinds of oil, intermediates, dye-stuffs, and chemicals.

SUMITOMO COPPER CO. JAPAN

Offices: Kitahama, 5 chrome, Higashi, Osaka, Japan. Kobe, Japan (shipping department); Niihama, Iyo, Japan (mine).

Directors: M. Suzuki, K. Nackada, K. Yukawa, M. Kubo, C. Kasaki, M. Ozura, and Y. Yamashita, two latter being managers.

Company owns the various mines and smelters described below, and other properties comprising 3 claims, 6,353 acres, besides a 5-acre mill-site, 33,452 acres timber lands, and 575 acres miscellaneous lands, are in the Besshi district. The Besshi mine proper, on Besshi mountain 4,400 ft. in height, has an area of 209 acres. The timber lands carry large plantations of fir, set out yearly since 1879, which have now become available for cut timber, 15 to 20 years growth being required. Water supply is taken from the Kokuriu river.

The Besshi Mine.

The Besshi mine is situated near Kobe, 10 miles from the sea and 4,000 ft. above it. It has been in the possession of the Sumitomo family for more than 200 years, being successfully worked by native methods until 1874, in that year modern methods of mining were adopted and the property is now the second largest mine in Japan.

Geology: the Besshi copper deposit is a bedded vein occurring in crystalline schists considered to be of Archæn age and characterized by chlorite and graphitic schists with serpentinized dike rocks in the hanging country. The ore deposit itself is a vein of crushed quartz schist conformable in strike and dip to the enclosing rocks, but broken when they were folded. The vein is traceable for 6,000' and has an ore shoot which is 5,000' long, 5' to 25' and averaging 7' thick, that has been developed to a depth of 2,500' without decreasing in size or value. The ore is a mixture of chalcopyrite and pyrite interbanded with schist and carries from 3 to 4% copper, and is fairly free from other metals, the smelter product selling at Lake Superior copper prices, without electrolytic refining. Numerous parallel E.-W. veins [illegible] the orebody [illegible] 30' and rarely 50'.

[illegible] inclined shaft, 1,200' deep on the [illegible] workings with the surface. The [illegible] haulage and drainage way, 10x7' [illegible] ries a stream through the [illegible]

which has a fall of 1,800′ after leaving the mine and generates 6,000 kw. The latest work is a fourth adit, 16,000′ long, from Hateba, the end of the private railway conveying ore from the mine to the sea. A shaft 16′ in diameter and 1,875′ deep was sunk vertically from No. 3, or main working tunnel, to meet the new level. Work in the tunnel was advanced at the rate of 200′ per month.

The orebody is worked by ordinary overhand methods and the output is sorted at the surface into lump ore, constituting 70% of the product, fines 20% and waste 10%.

The mine has 9 main levels with largest production from the 6th and 7th levels. There is a system of natural ventilation by which warm air from the valley entering through the Tonaru tunnel escapes through the mouth of the Toyen shaft, near the crest of the mountains, the air current being regulated by brattices. The mine has 61,268′ of workings, with about 2,500,000 tons of ore blocked out for stoping. The mine is well timbered, with a tram line on each level, and ore is blasted with guncotton, a little dynamite and occasional gunpowder. Electric pumps force water from the lower workings to a large sump on the 8th level, whence it is discharged through the Tonaru tunnel which is lighted throughout by electricity and has the terminal station of an aerial tram at its portal.

The **Nishinokawa mine** is at Oboki-mura, Nu-gori, Iyo, Japan. This property shows quartz-schists with lenses of 3 to 12′ width carrying chalcopyrite ore with 3 to 4% copper, associated with sphalerite, pyrite, magnetite and hematite, with quartz gangue. The mine employs an average of 225 men.

Mining equipment includes a 1,000-h. p. electric installation having three 200-h. p. electric hoists, good for 1,200′ depth each, with three 120-h. p. Rand, two 120-h. p. and one 75-h. p. Leyner, and one 50-h. p. Schramm air compressors. As ore extraction is mainly through No. 3 tunnel, no exceptionally powerful machinery is required.

The concentrator at the mouth of the Tonaru tunnel is of 700 tons daily capacity, equipment including 2 Blake crushers, 4 belt conveyors and 4 trommels, ore being assorted mainly by hand labor.

Owing to complaints by farmers of damage from copper-laden waters, a cementation plant was installed several years ago, and considerable copper is precipitated on scrap iron and coke, the production of 80% cement copper amounting to upwards of 200 tons yearly.

A 3,600-meter Bleichert aerial tram leads from the mill and tunnel to the railway at Hateba, this having a longest span of 600 meters, with an hourly capacity of 90 tons at an average speed of 2.5′ per second. Hateba is the terminus of a railway running to Niihama, the nearest port. The connections between the mine and shipping wharf include about 2 miles of aerial tram and several miles of railway. The mine also has 3 aerial trams of 1,276′, 5,200′ and 5,178′ lengths, respectively.

The company owns 2 private railways of 9.73 miles aggregate length, with 30″ gauge, rolling stock including 10 locomotives, 10 box cars and 184 ore cars.

The company operates 3 electric plants, 2 driven by steam and 1 by water. The steam plant at the mine and hydro-electric plant at Otoshi on the Kokuriu river, distribute electric energy to the mine, mill and shops, while the steam-electric plant at Shisaka furnishes power to the smelter.

The general shops at Niihama, about midway between the mine and smelter, include a foundry making castings up to 5 tons in weight, extensive carpenter shoops, machine shops, boiler shops and smithies, these works not only making ordinary repairs, but turning out a large part of the machinery and castings used at the mines, works and smelter.

The Besshi smelter formerly was at Niihama, but owing to serious damage to neighboring farmers from smelter fumes, was transferred 1905, to the island of Shisakajima, 12 miles from Niihama, only the general shops remaining at the old smelter site.

The **Shisakajima smelter,** 20 miles from the mine, built at a cost of about 4,000,000 yen, is thoroughly modern in design and equipment. Ore is received from barges, strings of 10 being towed by tugs 10 miles and unloaded by a 20-ton crane, into cars operated in counterbalance, on an incline leading to the top of the works, which are laid out in 7 terraces, gravity being used throughout for the flow of material.

The smelter handles 600 metric tons daily of ore containing 30 to 33% sulphur mixed with 7% gneiss as flux and 4 to 5% coke. The fines are nodularized with flux and water in a revolving conical wooden cylinder and afterwards pot-roasted in Nakamura roasting pots. The sintered ore, with lump ore and coke, is fed to the first blast furnaces which make a 20% matte and an 0.2% slag. This first matte is smelted a second time, making 35% matte and 0.3% slag.

The furnace building has four 160-ton 39x192" blast furnaces, of the water-jacket type for ordinary or pyritic smelting, and a 400-ton 48x288" blast furnace for pyrite smelting. There are four 37-metric ton circular blast furnaces, each with a corresponding light reverberatory forehearth, with blast, for smelting roasted matte and making blister copper. There are two 15-metric ton reverberatories for refining, 1 being used as a spare, and 4 sets of Mabuki hearths, using an old Japanese process, improved by the Sumitomo Co., for the conversion of matte, these having a daily capacity of 32 tons of roasted matte each, 1 being held as a spare. Barren quartz pebbles are used for fluxing. No custom smelting is done. The product is blister copper averaging 99.8% in copper tenor, carrying traces of silver and gold. About 20% of the product is sent to the Osaka rolling mill, owned by the Sumitomo family, and the greater part of the remainder is sent to Kobe, whence exported, mainly to Europe.

The smelter power plant has 3 No. 4 and 3 No. 6 Connersville blowers, and blast for the 4x24' pyritic furnace is furnished by a Curtis steam engine direct-connected to a turbo-blower that delivers 750 cu. ft. per minute of free air, compressed to 1.24 atmospheres normally, with a maximum absolute pressure of 1.34 atmospheres. Steam for the turbo-blower is furnished at 200 lbs. initial pressure by a Babcock & Wilcox boiler. There is an air compressor for converter blast.

Fuel is coal at the mine, and coal, coke, and waste gases from coke ovens at the smelter, coal being used for the reverberatories and reverberatory forehearths, with coal and wood employed for the roast stalls. Fuel costs are 4.2 and 4.7 yen per long ton for coal, according to grade, and 8.8 to 21 yen for coke, yearly consumption being estimated by the management to average 9,333 long tons of coal and coke. The company has a coking plant at Niihama with 72 brick kilns, having a daily capacity of about 55 tons, using coal from the Keeki mine at Kiushiu.

The company owns a very extensive fleet of vessels, including 2 steamers for passengers and package freight, 1 steamer for carriage of coal, and 81 sailing vessels, with 20 sailing vessels held under charter. The company operates a passenger line, with a steamer plying between Niihama and Kobe, a distance of 125 miles.

The Besshi mine employs about 3,000 and the various enterprises of the company employ about 4,800 hands. The miscellaneous enterprises in connection with the Besshi mine are very extensive, including a large number of warehouses and stores, and a branch of the Sumitomo bank at Niihama. The company maintains a main hospital, with 4 branches, and supports 7 elementary schools for the children of employees.

Production: of the Besshi mine is about 20,000,000 lb. copper annually at an estimated cost of between 9 and 10 cts. per pound for finished copper

KOREA.

CHOSEN GOLD MINES, LTD. **KOREA**

Operations ceased at end of 1916. See Vol. XIII of this book for detail of organization, etc.

HUCHANG MINING CO. **KOREA**

Address: Koshagun, Heianhokudo, Japan.

Inc. 1917, in Japan. **Cap.**, 4,000,000 Yen.

Property: in northern part of Chosen, not far from the Yabu river, contains a large deposit of copper ore on which mining operations were started late in 1918.

ORIENTAL CONSOLIDATED MINING CO. **KOREA**

Office: 15 Broad St., New York. **Mines and works:** Unsan district, Korea, Asia.

Officers: H. C. Perkins, pres.; Leigh Hunt, v. p.; Frederic Bull, 2nd v. p.-treas.; L. T. Haggin, 3rd v. p.; with Ogden Mills, J. S. Fassett, Wm. P. Palmer and H. F. Meserve, directors. George Kennaby, sec.

Officers in Korea: Alf. Welhaven, gen. mgr.; Thos. W. Van Ess, asst. gen. mgr.; C. A. Crispin, auditor; A. B. Palmer, cashier; E. S. Barstow, supt. of transportation; J. B. Lower, supt. of Tabowie, etc.; J. A. Vernon, asst. supt. of Chintui, etc.; E. H. Emerson, elec. engr.; W. H. Aldridge, mech. engr.; K. F. Hoefle, supt. of fuel and timber railway; E. L. Power, medical officer; S. E. Iijima, sec. to gen. mgr.; W. D. Townsend, agent, Chemulpo.

Inc. Sept. 29, 1897, in West Virginia, to operate mining concessions in Korea. **Cap.**, $5,000,000; outstanding $4,293,900, and the balance is owned by the company; shares $10 par. No bonded debt. Stock transferred and dividends paid at 15 Broad St., New York. Listed on London Stock Exchange.

Comparative General Balance Sheet, years ended June 30:

ation and depletion.

Dividends: in recent years, 1903, $1.25; 1904, 1905 and 1906, $1 each; 1907, 60c.; 1908, $1.50; 1909, $1.15; 1910, $1; 1911, $1.50; 1912, $1; 1913 and 1914, $1.50; 1915, $2; 1916, $1.50; 1917; 50c.; 1918, 25c.; and 25c. in 1919-'20, making a total of $19 per share, or 190%, or $8,045,993.

Property: a concession covering 400 sq. miles, including a number of gold mines in the Unsan district in the northwestern part of Korea, described by Evans and Heofle in "Min. & Sci. Press" of March 29, 1919.

Geology: the region shows granite rocks cut by erosion into a high and rugged mountainous area. The lodes are typical fissure veins varying from 20′ to 140′ wide, and of unusual persistence downward, but are broken by intense crushing and faulting. The vein quartz contains pyrite, galena, sphalerite, gold and a little silver. A predominance of galena is generally accompanied by an increase in gold, but free gold is rarely seen. Graphite is distributed in small quantity through the ore.

Development: the following tables summarize mining operations:

Tabowie Mine.

	1919	1918	1917
Deepest shaft, feet	.....	2,600	.....
New work, feet	10,488	11,510	13,092
General results	Discouraging	Unsatisfactory	Fairly Satisfactory
Ore reserves, tons	441,000	485,000	550,000
Value per ton	$5.44	$5.70	$6.00
Ore mined in year, tons	127,122	122,106	132,441
Value per ton	$6.57	$6.56	$6.29
Cost of mining per ton	2.08	1.86	1.79

Taracol Mine.

	1919	1918	1917
Deepest shaft, feet	.....	1,942	1,615
New work, feet	.....	13,156	11,719
General results	Good	Encouraging	Satisfactory
Ore reserves, tons	260,000	238,000	220,000
Value per ton	$4.54	$4.54	$4.20
Ore mined in year, tons	107,401	101,617	103,097
Value per ton	$4.53	$4.73	$4.80
Cost of mining, per ton	1.70	1.67	1.46

Tongkol Mine.

Deepest shaft, feet	.....	.....	.....
New work, feet	.....	5,489	5,110
General results	Fair	Fair	Satisfactory
Ore reserves, tons	5,500	7,000	8,000
Value per ton	$10.18	$8.00	$8.00
Ore mined in year, tons	4,443	8,040	8,492
Value per ton	$16.50	$10.62	$10.34
Cost of mining per ton	$5.61	$4.00	$4.34

Chintui Mine.

Deepest shaft, feet	.....	1,085	985
New work, feet	.....	4,535	2,852
General results	.....	Satisfactory	Encouraging
Ore reserves, tons	32,500	35,000	30,000
Value per ton	$4.33	$4.17	$4.00
Ore mined in year, tons	11,902	23,881	28,140
Value per ton	$4.03	$4.63	$4.93
Cost of mining per ton	$1.96	$2.01	$1.76

Reserves in all the mines are 779,000 tons, worth $5.22 per ton.

Extensive prospecting is carried on continuously on the concession, [illegible] of work being done in 1917; 1,226′ and 3,323′ of ditching in 1918, and 9,85[illegible] 1919. This cost $1.15 per foot.

Mining methods vary somewhat, but overhead stoping, with or without timber, is the general practice. Large stoping widths, soft walls, and slipping of backs along graphitic seams in the quartz requires square-sets. As waste and dike matter are mixed with the ore, sorting is necessary.

Equipment: includes 20-mile narrow-guage timber tramway, 22½-mill transmission line; sawmill and wood-working shop; 2 hydro-electric power plants of about 2,500-h. p., the second one (the Suribong), finished in October, 1919, at cost of over $400,000; mine fans, pumps, compressors, and hoists; tool-shop; machine-shop and foundry; 3 stamp mills, containing 80, 80, and 40 head, respectively, also amalgamating plates and amalgamators, vanners, classifiers, and canvas tables; concentrate treatment plant; refinery; assay-office; living quarters, medical and surgical department; and an afforestation department, which has planted 869,025 trees (mostly larch, acacia, and red pine) since 1913.

Production, years ending June 30:

Year	Tons Crushed	— Per Ton — Yield	Costs	Year	Tons Crushed	— Per Ton — Yield	Costs
909.....	296,417	$4.80	$2.72	1914.....	301,162	$5.60	$3.68
910.....	320,707	4.40	2.43	1915.....	297,889	5.45	3.40
911.....	344,097	4.37	2.45	1916.....	309,730	6.04	2.90
912.....	323,703	4.76	2.68	1917.....	317,601	5.94	2.76
913.....	313,701	5.19	3.25	1918.....	303,672	5.90	3.06
				1919.....	250,868	5.84	3.36

Total production to June 30, 1919, was 5,017,138 tons of ore, valued at 30,888,065, of which $8,045,993 was distributed as dividends.

Company's operations are extensive and ably conducted. Geological condi-ons are carefully studied, and while one of the mines is almost exhausted, the thers maintain ore reserves. The native labor problem has been solved without erious perplexities, mainly by a close study of Korean adaptability and industry. ltogether a highly profitable concern, operating on low-grade ore at low cost. esults are given with commendable detail and frankness.

Dividends: have been 25% in 1910; 50% yearly from 1911 to 1917, inclusive.

Property: a lease on the Suan concession, granted Nov. 4, 1905, to the Korean Syndicate, comprising 59,000 acres, about 55 miles E. from Pyeng Yang. The concession carries full rights to examine, develop and operate all mines and deposits contained within the area covered by the grant. Company also has permission to cut timber and to use all the water required for mining, milling and other purposes from sources within, or adjacent to, the district. These privileges are given for a royalty of 1% on the gross value of the output of the mines. There is an additional annual tax of about 30 cents per acre (50 sen for each 1,000 tsubo), on all land actually selected for mining operations, such selections being made by December, 1916.

The rights in this concession are secured to the Seoul Mining Co. by an agreement made with the Korean Syndicate which provides for the payment of 8% royalty of the actual profits derived from the concession, clear of all depreciation charges. (Royalties and taxes paid in 1918 amounted to $70,884.)

Geology: property shows both granite and limestone, the principal orebody, known as the Collbran Contact, lying between limestone and a batholith of granitoid rock. Ores carry gold, copper, tungsten and bismuth, the gold seldom being visible and rarely in coarse condition. Silver is also present, alloyed with the gold to an appreciable amount. The copper ores contain chalcopyrite, bornite and tetrahedrite, with a high gold content, a fair average probably being about 1.2% copper and $10 gold. The ore-bodies are irregular and in general parallel with the limestone-granite contact, connected more or less by generally well-defined fissures. The gangue is a highly siliceous crystalline limestone, altered by contact action and containing a considerable amount of magnesia and alumina.

Development: there are 3 principal and several subsidiary mines being worked, the former being the Tong Ahm, Tul Mi Chung, and Soctarie. In 1918, 38,209′ of new work was done, and the total development is now about 200,000′.

The Suan mine is about exhausted. It has been an interesting mine, as the ore contained $9.20 gold, 1.15% copper, and 1.7 lb. bismuth per ton. Mining is conducted through shafts and tunnels.

Tul Mi Chung is the largest mine, and contained reserves estimated at 410,614 tons, averaging $10.12 per ton in gold, silver, and copper in 1918. The main work has been done on orebodies occurring at the junction of limestone and schist. Good ore was found at the limestone-granite contact, and possibilities in that formation are encouraging.

Tong Ahm is a new mine, and has every indication of developing into an important producer. It contains 50,424 tons of $9.02 ore.

Peh Jai is a new and promising prospect, containing 11,000 tons of $6.66 ore, which is extremely complex, containing gold, silver, copper, bismuth and tungsten. The gangue is a heavy magnetite and garnet.

Reserves at all mines are as follows:

	Tons	Value per ton	Total Value
1918	771,575	$8.09	$6,242,833
1917	816,957	8.57	7,005,625
1916	1,206,136	....	15,014,376
1915	1,221,331	....	.....
1914	1,208,600	12.42	15,015,000
1913	633,300	12.07	7,646,000
1912	421,000	14.44	6,080,000
1911	211,400	16.55	3,499,000

The Soctarie deposit consists of an extensive band of quartzite, interbedded with limestone, of an average thickness of 25'. This band carries 0.3% tungsten as scheelite, 40 cents gold, and 0.4% copper. Reserves are estimated at 267,717 tons, worth $4.93 per ton. A great deal of experimental work has been done on this ore, locally and abroad, especially in making marketable products.

Equipment: includes steam and hydro-electric power plants, 56-mile transmission-line, complete mining machinery, 40-stamp mill at Suan mine to be enlarged to treat ore from the Soctarie mine, and 480-ton mill at the Tul Mi Chung, including regrinding, flotation, and cyanidation plants.

Production:

Year	Tons Ore	Rec'y p. t.	Cost p. t.	Profit p. t.	Total Output
1918	201,151	$9.64	$4.00	$5.64	$1,343,234
1917	215,039	7.61	3.47	4.14	1,636,923
1916	176,518	10.63	3.98	6.42	1,823,768
1915	108,078	9.35	3.94	5.11	978,383
1914	74,550	9.44	3.90	5.54	.....
1913	71,535	9.39	4.13	5.26	.....
1912	74,432	8.25	3.52	4.73	.....
1911	70,229	7.83	3.01	4.82	.....
1910	32,793	9.86	4.35	5.81	.....

This is a highly profitable company, directed by able technical men who have many problems to solve, not the least being the separation of gold, copper, and tungsten, upon which experiments have been under way for the past four years. Flotation is expected to make a good recovery. The Tul Mi Chung mill is now treating 488 tons daily of gold-copper ore and a 1,000-ton mill is planned. If 90% of the gold, copper and tungsten can be extracted from the Soctarie ore, a 1,000-ton mill will also be erected there. Company conducts extensive prospecting on its concession, following geologic examinations.

Technical operations on the Suan Concession are described by A. R. Weigall and J. F. Mitchell-Roberts in the "Min. & Sci. Press," October 11, 1919.

PHILIPPINE ISLANDS

The following is as complete a list of the metal mines in the Philippines, as can be secured. We have endeavored in vain to secure detailed information on these companies; the Benguet Cons. Mining Co. being the only company which supplied complete data on its operations.

Name	Address	Metal	Remarks
Alabat Mng. Assn., Manila	Alabat Island	Placer	Prospecting
Benguet Cons. Mng. Co.	Antamok, Mt. Province	Gold	Mining and milling.
La Riqueza Nacional.	" " "	Gold	Development.
Colorado Mng. Co.	Aroroy, Sorsogon	Gold	Mining and milling.
Syndicate Mng. Co.	" "	Gold	Mining and milling.
Keystone Mng. Co.	" "	Gold	Mill closed. Dev'g.

SIAM

BANGNON VALLEY CO.

Address: Bangnon Valley, Renong, Siam. Controlled by Australian capital.

Property: tin-bearing land in Bangnon Valley, Renong, Siam, on which a dredge is operating. During half-year ended November 30, 1917, the boat dug 382,845 cu. yd., from which 117 tons of black tin (71% metal) was saved. The value was 18c. per yard, and cost 8c. The profit was £7,928, compared with £35,077 in year ending May 31, 1917. Regular dividends are being paid.

DEEBOOK DREDGING

Office: J. W. Barrett, Renong Chambers, Ringwood, Victoria, Australia.

E. T. Miles, chairman of board of directors; A. H. Miles, mgr.; H. J. Coates,, sec. at Renong, Siam; E. Habben, sec., at Palmerston House, London, E. C. 2, England.

Inc. May, 1913, in Victoria, Australia. **Cap.,** £100,000; £1 par; all issued.

During year ended May 31, 1918, profit was **£18,243**, plus £10,856 from previous year. After paying dividends there was a balance of £24,099 carried to 1919. Cash assets exceed liabilities by **£41,172**, including **£24,450**, value of shares in Ronpibon Extended.

Dividends: 5% in 1914; none from 1915 to 1917, and 20% in 1918.

Property: 440 acres of alluvial ground at north end of Bangnon Valley, Renong, Siam, worked by 2 dredges.

Production: 230 tons of black tin in 1917 and 235 tons in 1918.

RATRUT BASIN TIN DREDGING CO.

Address: G. M. Yetts, Bangnon Valley, Renong, Siam.

Property: tin-bearing ground in Siamese Malaya, worked by a dredge which in year ended May 31, 1917, dug **492,000 yards**, and saved 183 tons black tin. Cost of working was 7.84c. per yard. Dividends are being paid.

RENONG TIN DREDGING CO., LTD.

Office: Guthrie & Co., 5 Whittington Ave., London, E. C. 3, England.

F. B. Lawson, chairman of board of directors; F. Nicholls, mgr.; F. W. R. Payne, cons. engrs.

Inc. July 1, 1913, in Great Britain. **Cap.,** £135,000 in 25,000 [illegible] pfcc. (all issued), and 100,000 ord. shares (87,267 issued) of £1 par. Increased to £200,000 in March, 1920, 32,000 shares being given for new [illegible]

In 1918, profit was £49,269, of which £29,930 was paid in dividends; assets exceeded liabilities by £90,000. Reserves are £16,000.

Dividends: preference shares paid in full; while common received in 1915: 30% in 1916; 30% in 1917; and 10% in 1918.

Property: 460 acres of tin-bearing gravel land on the Renong and Chan rivers, Siam, on which 2 dredges are working, also 1,000 acres in Siamese Malaya, of which 650 acres contain 18 to 24' of ground averaging 1.2 lbs. black tin per yard. A dredge is to be erected there.

Production years ended June 30:

Year	Yardage	Black Tin	Cost
1918	2,033,357	842	[illegible]
1917	2,170,177	970	[illegible]

RONPIBON EXTENDED

Address: J. W. Barrett, Ringwood, Victoria, Australia.

Inc. November, 1917, in Victoria, Australia. **Cap.,** £40,000 [illegible] by Deebook Dredging and Ronpibon Tin.

Property: 90 acres of tin-bearing gravel in Bangnon Valley, Siam. One dredge in operation.

RONPIBON TIN

Address: J. W. Barrett, Ringwood, Victoria, Australia.

Property: tin-bearing ground in Bangnoa Valley, Renong, Siam. With the Deebook Dredging Co., Ronpibon is interested in Ronpibon Extended. A dredge was to be erected at last accounts.

SIAMESE TIN SYNDICATE, LTD. **SIAM**

Office: Capel House, New Broad St., London, E. C. 2, England.

W. H. P. Stevens, chairman of board of directors; C. A. Underwood, sec.; H. G. Scott, gen. mgr.; A. N. Wakefield, res. mgr.

Inc. Nov. 22, 1906, in Great Britain. **Cap.,** £200,000; £1 par; 120,000 issued.

The net profit for 1917 was £34,984, of which £30,000 was paid in dividends. Profit in 1918 was £35,652.

Dividends: 30% in 1913; 20% in 1915; 25% in 1916; 25% in 1917; and 25% in 1918.

Property: 1,730 acres of tin-bearing land at Ngow, Renong district, Siam. The new areas recently acquired contain over 30,000,000 cubic yards, carrying from 0.8 to 4 lb. of tin per yard. A cocoanut plantation is also being cultivated.

Equipment: includes 3 dredges.

Production: 798 tons of black tin in 1917, and 978 tons in 1918.

In March, 1920, a subsidiary, the Bangrin T. D. Co., was formed with capital of £170,000 to work a property 5 miles N. of Ngow, containing 16,000,000 yd. of 0.75 lb. ground.

TONGKAH HARBOUR TIN DREDGING CO. **SIAM**

Office: H. J. Wise, A. M. P. Chambers, Elizabeth St., Hobart, Tasmania.

A. H. Ashbolt, chairman of board of directors; E. T. Lewis, gen. mgr.; Alex. McEwan, sec. in Siam, with G. H. Symons.

Inc. 1906, in Tasmania. **Cap.,** £250,000; shares £1 par; 150,000 issued.

Net profit was £40,336 in 1915; £40,808 in 1916; £67,923 in 1917, and £118,920 in 1918. Current assets at end of September, 1918, totaled £98,236, and liabilities, 6,884. Profit in 1919 was £75,548.

Dividends: to September, 1919, total £550,000.

Property: 5,650 acres in Tongkah harbor, Siam, of which over 545 acres have been dredged. The dredgable material averages 1 lb. tin oxide per yard. Five boats are at work.

Production:

Years	Yardage	Tin Oxide 73% metal (tons)	Value	Cost per yard, cents
1913-'14	.....	1,126	£108,053	.....
1914-'15	2,968,600	1,262	123,260	10.19
1915-'16	3,363,750	1,077	115,000	9.27
1916-'17	3,682,550	1,188	144,845	8.80
1917-'18	3,383,250	1,314	221,651	10.04
1918-'19	3,208,350	1,149	.....	....

This is one of the most profitable mining companies in the Orient, and its annual reports give full data concerning dredging operations and costs.

SIBERIA

Under this head we have listed those companies formerly described under Russia. While several are in the Ural region, they really belong in the Asiatic section.

The following first-hand information regarding conditions that affect mining in Russia and Siberia appeared in the "Mining and Scientific Press" of October 11, 1919:

Until July 25, 1919, the plant of the Kyshtim Corporation, a notable copper and iron enterprise, was being operated by the Russian staff of the English corporation, but with the help and under the authority of the Siberian government.

3.5% lead, 0.5% copper, 1.7 oz. silver, and 0.7 oz. gold per ton. There are 360,000 additional tons of sulphide ore carrying gold in Sokolni mine, making a total of 3,534,000 tons, containing an estimated profit-value of £13,000,000.

Equipment: first unit (50,000 tons) of a concentrating mill of 200,000 tons per annum capacity, power plant, coke plant, zinc distillation plant of 20 blocks of retorts (6 finished), lead smelter, refinery and accessories, 143-mile railway, 8 river steamers and 28 barges; also a farm to supply food to employes.

The ore is mined and treated at the Ridder property, carried 63 miles by rail, 430 miles by river, and then 80 miles by rail to the colliery and smelters.

Production: amounted to 210 tons of 99% spelter in 1916, and 333 tons in first half of 1917. A considerable tonnage of zinc and lead concentrates is on hand.

When in full operation this great property will add considerably to the world's metal output. Late in 1919, company was merged into the Russo-Asiatic Consolidated, which see.

LENA GOLDFIELDS, LTD. SIBERIA

Head office: H. Richards, 441 Salisbury House, London, E. C. 2, England. **Agency:** Russian Mining Corporation, Ltd., Nevsky 19, Petrograd, Russia.

Officers: Lord Harris, chairman of board of directors; C. W. Purington, cons. engr.

Inc. July 10, 1908, in England. **Cap.,** £1,405,000; shares £1 par; 1,163,297 issued. Company holds 8.85% of capital of the Lena Gold Mining Co. (Lenskoie), which see, the operating company in Russia. Ruble exchange and shareholdings make the financial situation complicated.

Financial Statement, for years ending September 30 (Sterling figured at normal exchange, £1 = 9.52 rubles):

Revenue.

	1915-'16	1916-'17	1917-'18
Cash balance on hand	£613,872	£157,983	£410,899
Lenskoie shares sold	245,635	321,722	....
Russian 5% bonds	.....	378,731	294,...
Lenskoie dividends, 1913-'14	50,071	.....	....
Lenskoie dividends, 1914-'15	.....	74,386	
Royalties, etc	16,817	.....	
Interest	21,738	37,470	
Premium on 246,703 Lena shares sold	.....	154,189	
Subscription on above shares	.....	5,000	
Repayment of advances by Lenskoie	102,598	18,787	
Total	£1,050,730	£1,148,268	£1,...

Expenditures.

	1915-'16	1916-'17	1917-'18
Advances to Lenskoie	£32,877	£396,544	
Dividends paid, etc	159,651	80,526	
Repayment of account loan	37,000	.....	
Russian 5% bonds	663,219	.....	
British war bonds	.....	260,300	
Purchase of new Lenskoie shares	.....	.....	
Sundry investments	.....	.....	
Cash balance on hand	157,983	410,899	
Total	£1,050,730	£1,148,268	£1,...

Cash assets and investments in London on September 30, 1918, were £... Shares in Lenskoie were placed at 37,934,000 rubles, a massive valuation in the exchange situation. Cash balance in Russia was 8,749,772 rubles. £1 sterling = 30 rubles = £1,225,624. Add...

above cash and investments, and deducting liabilities of £83,774 net assets are £1,799,046.

Dividends: 20% in 1909-'10; 30% in 1910-'11; 20% in 1911-'12; nil in 1912-'13; 5% in 1913-'14; 1¼ rubles per share in 1914-'15, paid in April, 1916.

Property: gold placers worked since 1863, yielding over $200,000,000. There are four groups totaling 90,376 acres in the Irkutsk province of Siberia.

Development: for many years operations were on somewhat primitive lines, but modern methods are gradually being introduced, including prospecting by drilling, underground drift mining, hydraulicking, dredging and winter washing of gravel; also improved sluices, riffles, jigs, and clean-up accessories. Over 5,000 men and 800 horses are employed.

Proved reserves of gravel ore are as follows:

Class	Yards	Recoverable value per yd.	Gross profits	Years life
Drifting	711,200	39/10 ($9.46)	£456,363	1½
Dredging	58,984,000	1/7½ ($0.40)	£2,577,800	16

The calculated life of the mine is based on the old rate of extraction for drift mining, and the use of two 17 cu. ft. dredges for the other ground.

Winter washing operations were not begun until 1913; 25% of the total yardage was washed in the winter of 1914; 36½% in 1915, and 52½% in 1916.

Production, years ending September 30:

Year	Yardage	Yield per yd.	Value	Cost per yard
1916-'17	570,529	46/1 ($11.05)	£1,318,445	.....
1915-'16	788,942	39/10 ($ 9.56)	1,503,010	27/6 ($6.54)
1914-'15	974,234	38/11 ($ 9.23)	1,791,944	26/7 (6.31)
1913-'14	873,635	29/4 ($ 6.80)	1,277,609	26/10 (6.44)

This is an immense property now passing from primitive to modern methods of mining. The work has been handicapped by prejudices, complex finance, inefficient labor, a severe winter climate, and long distance from sources of supplies.

Alaskan methods are applicable in Siberia and are now being tried. As the gravel yields up to $9 per yard, there is a big margin for profit. Lena Goldfields is one of the world's greatest gold producers.

LENSKOIE COMPANY **SIBERIA**

Address: H. Richards, 441 Salisbury House, London, E. C. 2, England. L. Gernet, chairman in Russia; M. Malozemoff, mine manager.

Inc. in Russia. **Cap.,** 33,000,000 rubles, increased from 11,100,000 R. in 1917 by issuing 110,000 shares of 150 R (par value) at 355 R. each. Lena Goldfields, Ltd., holds 8.85% of the Lenskoie's capital.

In 1915-'16, Lenskoie made an operating profit of £954,191. Of this, £582,479 was absorbed in writing down capital expenditures at the mines, leaving a net profit of £371,712. From this sum, £251,981 was written off for depreciation, and £78,616 for taxes, bonuses, etc., leaving £41,114 carried to special reserve.

No accounts for 1916-17 were available up to June, 1919; but for that year the gold output was valued at £1,445,014.

In November, 1917, the Bolshevik regime brought serious trouble to the Lenskoie Co. The exorbitant demands of workmen and dealers increased to 200% above pre-war prices, while labor efficiency, never satisfactory, dropped 50%. The selling price of gold was raised six times by the Government, but it was still insufficient to meet expenses. The Soviet Government then agreed to meet the loss provided the company yielded to all demands. In October, 1918, the mines were nationalized and the offices in Petrograd confiscated by the Soviet authority. In June, 1918, this Government was expelled from Bodaibo, the region in which the mines are situated, and since then little news has been received. In March, 1919, only 3 drift-mines were being worked, yet these are capable of yielding 237,000 oz. of gold annually for at least 6 years. The first dredge is not expected to be operating before the spring of 1922.

For further particulars see Lena Goldfields, Ltd.

ORSK GOLDFIELDS, LTD. SIBERIA

Office: 65 Broad St. Ave., London, E. C., England. Thos. Mallinson, sec.

G. W. W. Mackinnon, chairman of board of directors; G. S. Dyer, gen. mgr.; Hooper, Speak & Co., cons. engrs.; B. K. Pavlovsky, agent at Ekaterinburg, Russia.

Inc. March 1, 1906, in Great Britain. **Cap.,** £920,000 in 531,000 ordinary £1 shares (530,907 issued), 876,000 preference shares 5s. (318,000 issued), and 170,000 priority shares, £1 (80,000 issued).

Financial Statement, years ending January 13, converted from rubles into sterling.

Year	Revenue	Expense in Siberia	Expense in London	Profit or loss	Dividends
1918	£53,010	£21,609	£37,573	—£6,171	.....
1917	55,421	31,439	37,701	—11,719	.....
1916	105,611	51,323	24,460	+26,944	£16,827

London charges include difference in exchange, a large sum.

Dividends: about £13,500 in 1915, and £16,827 in 1916; none since.

Property: 6,700 acres of alluvial ground, 50 miles N. W. of Nikolaievsk, Okotsk province, eastern Siberia. Two dredges are operated, one having 3½ and the other 7½ cu. ft. buckets. The boats work from April to November.

Production, years ended January 13:

Year	Yardage	Gold yield including tribute
1919	705,013	.....
1918	893,386	£51,426
1917	864,052	53,565
1916	784,552	97,000

The revolution in Russia has not interfered seriously with operations.

RUSSO-ASIATIC CONSOLIDATED SIBERIA

An amalgamation of the Irtysh, Kyshtim, Russo-Canadian, and Tanalyk corporations, formed late in 1919.

Office: J. P. R. Webster, sec., Pinners Hall, Austin Friars, London, England.

Inc. 1919, in England. **Cap.,** £12,000,000; £1 par. Shares to be issued in exchange for present holdings amount to £8,456,972; £3,442,838 for Irtysh, £2,520,000 for Kyshtim; £1,768,152 for Russo-Canadian, and £725,982 for Tanalyk. Shareholders in Irtysh, Kyshtim, and Tanalyk received 2 new shares for each old one held; Russo-Canadian stockholders get one new share for each preference share, and one new share for every 2 shares common held. Russo-Asiatic assumes the Irtysh and Tanalyk debentures and the Irtysh options.

RUSSO-ASIATIC CORPORATION, LTD. SIBERIA

Office: J. P. B. Webster, Pinners Hall, Austin Friars, London, E. C. England.

C. J. C. Scott, chairman of board of directors; R. G. Brown, cons. eng. Leslie Urquhart, managing director.

Is an exploration company acquiring and developing mining properties in Russia and Siberia. In 1914 it formed the Irtysh Corporation, Ltd. (which see) to operate the Ridder Concession and Ekibastus coal field.

RUSSO-CANADIAN DEVELOPMENT CORPORATION, LTD.

Office: Basildon House, Moorgate St., London, E. C. 2, England, and Montreal, Canada.

Inc. 1917, in Canada. **Cap.,** 1,000,000 7% non-cumulative preferred, and 2,000,000 common shares; $5 par; all issued. Company organized to acquire from the Irtysh, Kyshtim, and Tanalyk Corporations all the issued capital of the Ridder, Kirgiz, Kyshtim Mining Works, and the South Urals M. & S. companies, registered in Russia; also the capital of the Mining & Metallurgical Bank, the Trading Company and the Prospecting Co. Late in 1919, company was merged with the Russo-Asiatic Consolidated, which see.

SIBERIAN PROPRIETARY MINES, LTD. **SIBERIA**

Office: T. Mallinson, sec., 65 Broad St. Ave., London, E. C. 2, England. E. Hooper, chairman of board of directors.

Inc. Aug. 8, 1905, in Great Britain. **Cap.**, £135,000; shares £1 par.

Company has an interest in Orsk Goldfields, Ltd., in oil companies in Europe and California, and in the Foldal Copper & Sulphur Co., Norway. Options on gold-bearing lands in Orenburg, Russia, were dropped in 1918.

SIBERIAN SYNDICATE, LTD. **SIBERIA**

Office: J. A. Clark, 60 London Wall, London, E. C. 2, England.

Sir A. Fell, chairman of board of directors.

Inc. June 3, 1902, in Great Britain, but reconstructed three times, last in July, 1913. **Cap.**, £100,000; shares £1 par; 52,062 issued.

Company has large interest in Russian Anthracite Collieries, Ltd.; in a copper mine in Asia Minor; copper, lead, and zinc areas in eastern Siberia, and in an oil-shale deposit.

SISSERT COMPANY, LTD. (THE) **SIBERIA**

Office: 1 Broad Street Place, London, E. C. 2, England.

Sir J. B. Dale, chairman of board of directors.

Inc. June 26, 1912. **Cap.**, £1,000,000; shares £1 par; issued 755,000 shares, fully paid. Shares are listed on the London Stock Exchange. An option expiring two years after peace, on 166,000 shares treasury stock has been granted. Title to property is held through the Sissert Mining District Co., Ltd., registered in Russia, which the company controls through ownership of entire share capital.

Profit in 1916 was £2,544.

Dividends: 5% in 1913 and 1914; none since.

Property: about 340,000 acres, held under a perpetual lease, in the Urals, 0 miles S. of Ekaterinburg, on the Ekaterinburg-Cheliabinsk railway. The roperty includes many old copper, gold, and iron mines, and extensive forests. 'he principal copper properties are the Degtiarsky, Polefskoy, and Gumeshevsky ines, which have been worked since 1727, and the Sysselsky, opened in 1906. 'here are also about 100 iron mines, yielding limonite of 40 to 53% iron content, ith other mines yielding chrome and manganese. Iron ore reserves are estimated at 6,000,000 tons. The annual output of iron ore was 40,000 tons.

Development: the Sysselsky copper mine is opened by 3 shafts, deepest 45', showing ore of about 5% copper tenor. Mine has a plant with a productive capacity of 1,500 tons per annum. Reserves are estimated at 70,000 ons of 4¼% ore.

The Gumeshevsky and Polefskoy mines, discovered in 1716 have been operated almost continuously since 1727. These mines are about 500' deep, and up o 1870 produced a total of about 63,500,000 lb. fine copper, though only oxidized re was mined. The orebody is a contact deposit, genetically related to augitic ocks, and lying between between limestone and augitic biotite syenites, the xidized ore occurring in a decomposed irony and calcareous clay belt, fully 2 iles in length and about 1,000' wide. The sulphide ores carry chalcopyrite in nses of garnet-magnetite rock. The old ore dumps at the Gumeshevsky, consting of clay material with fine ore that escaped hand-picking in earlier operaons, were worked with excellent results. They still contain 400,000 tons. The e has been leached at the rate of 80,000 tons yearly.

Old slag dumps at Polefskoy are also to be reworked. These dumps, estimated 640,000 tons, are said to contain 1% copper, about 75% of which is thought to recoverable by pyritic smelting.

Fifty drill-holes at the Degtiarsky mine showed 3,530,000 tons of 2.77% pper ore, with 3s. (72c.) gold and silver. The orebody is about 10,000' long, 00' being fully proved. Over 5,000,000 tons is ultimately expected. Two afts to 150', with laterals, confirm drilling results.

At the Staro Poldnefskoy and Kadnakofsky iron mines the surface is a e gossan and the underlying sulphide is certain to be copper bearing and of mmercial value.

In the Krilatofsky mine, 6 miles from the Degtiarsky, are gold quartz veins

in granitic schist. Reserves to 280' are estimated at 371,000 tons of 1½ oz. ($3.18), and 227,000 tons of 10s. 6d. ($2.52) per ton ore. In the Blagoveshensky, near Sissert, is considerable 20s. ($4.80) gold ore. These ores will be used as a flux in reducing the copper ores.

The Degtiarsky and Sysselsky mines also contain several million tons of iron pyrite.

From the Bgorshinsky and Isyhks mines a large quantity of coal is available.

Annual production was normally 40,000 tons of iron ore, 17,500 tons of pig iron, 10,000 tons of pyrite and some coal.

In 1912 the mines produced 3,280,200 lb. of copper; 2,895,200 lb. in 1913; 2,140,600 lb. in 1914; 506,000 lb. in 1916. In the last two years operations were intermittent.

SPASSKY COPPER MINE, LTD. SIBERIA

Office: J. A. Clark, sec., Finsbury House, Bloomfield St., London, E. C. 2, England.

Sir A. Fell, chairman of board of directors; Ernest Carnot, v. c.; H. C. Bayldon, gen. mgr., at Spassky Zavod, Akmolinsk, Siberia; H. C. Robson, smelter supt.; D. G. Smith, supt. at Yuspenssky; C. Farmer, mine supt. at Spassky; J. R. Horsley, mgr. at Atbasar; E. T. McCarthy, cons. eng. Henri Puzely, mgr., Miasnitzskaia 17, Moscow, Russia.

Inc. July 9, 1904, in Great Britain. **Cap.** £1,250,000; shares £1 par; 1,031,940 issued.

Statement for 1915, published November, 1916, showed a net profit of £126,453 earned in Siberia. The remittance of funds from Russia is not permitted, so money will accumulate there. Assets included cash, £162,316; supplies, £150,256; and metals, etc., £163,039. Creditors, etc., amounted to £100,202. No financial statement is available since.

Dividends: 15% in 1910, 17½% in 1911, 25% in 1912, 10% in 1914, declared in October, 1915. Further dividends postponed on account of revolution.

Property: in the Kirghiz Steppes, in 2 main groups, about 300 miles apart, 250 and 500 miles, respectively, from the nearest point on the Trans-Siberian railway. After the revolution the government is to construct a line that will pass near the mines.

The Spassky group, comprising about 100 sq. miles, in the Akmolinsk district, includes the Yuspenssky copper mine and the Karagandy and Saran coal mines; also lands carrying iron and limestone.

Geology: the Yuspenssky mine has a network of veins at and near the contact of slate and arcose sandstone, in sedimentaries, of Permian age. The veins, known as the Annensky and Vladimir, or Yuspenssky, are about 200' apart and substantially parallel, and it is thought they may join at depth. Principal development is on the Annensky vein, which is 10 to 60' in width, carrying a hanging-wall paystreak of massive chalcocite, succeeded by bornite, largely massive, with silicious gangue, followed by small quantities of chalcopyrite and occasional tetrahedrite, the vein growing gradually leaner in copper toward the footwall, which is imperfectly defined and carries low-grade copper impregnation. The gangue is mainly quartz and barite, and the ore is estimated by the company to average 12 to 20% copper. The upper workings show some native copper, cuprite, azurite and malachite. The mine was gouged for rich ore by the former owners, who left a large amount of low-grade material unstoped.

Development: the Yuspenssky mine is opened by 3 shafts, the Annensky being 700' deep. Chalcopyrite is taking the place of bornite in the enrichment zone, while the mineral contents are becoming more evenly distributed. Reserves at the end of 1915 were 10,000 tons of 19% and 429,475 tons of 7% ore. Considerable diamond drilling was done in 1915 and 1916, with fair results.

Equipment: includes 900-h. p. steam plant, hoists, compressors, pumps, 150-ton concentrator and smelter, 26-mile railway and quarters for employees.

The Karagandy coal mine, 24 miles by rail from the Spassky smelter, produced 90,215 tons in 1913; 80,001 in 1914, and 63,984 in 1915. It contains about 400,000,000 tons of coal.

The Atbasar group, 36 sq. miles, 250 miles N. E. of Djoumlin, the nearest

station on the Orenburg-Tashkent railway, includes the Kresto, Pokrofsky, Annensky and Nadiozhdenski mines, and a coal area of about 9 sq. miles, 65 miles from the mines.

Geology: the Atbasar shows sedimentary sandstones, shales and conglomerates, on a plateau of about 20 sq. miles, lying about 70′ above the level of the district, carrying numerous outcrops of malachite, and at depths of 50 to 70′ from surface, are found sandstone beds mainly 18″ to 8′ thick and of 3′ estimated average thickness, carrying bornite, claimed to average about 13% copper.

Development: work at Atbasar is under way and reserves were estimated at 543,900 tons of 10.7% ore.

Equipment: includes mining machinery, buildings and smelter of 6,500-ton capacity of copper per annum, this being erected between the coal and copper mines.

Production at Spassky:

Year	Ore, tons	Copper, pounds
1906	.....	1,865,690
1907	.....	3,552,570
1908	.....	3,838,235
1909	15,551	3,675,840
1910	19,647	5,540,550
1911	31,302	6,401,920
1912	28,315	8,955,520
1913 (15 months)	43,591	14,000,000
1914	20,697	10,490,000
1915	20,847	7,728,000

Operations at the Spassky have been seriously hampered by war and revolution. In April, 1918, the Bolshevik faction nationalized the property, but it was handed back within a short time, and late in 1918 operations were resumed on a reduced scale.

VERK ISETZ CORPORATION — SIBERIA

Address: Kalata, Ural district, Russia.

Property: the Kalata mines, 145 miles N. of Kyshtim, eastern Urals, Russia, opened early in the last century mainly for pyrite for acid manufacturing.

Geology: copper-bearing schists similar to those worked by the Kyshtim and Sissert companies. Ore is a heavy sulphide, with bands of magnetite in the pyrite. Silica content is only 2%, other minerals being 2.3% copper, 43.5% iron and 50% sulphur.

Development: on the 406′, 455′ and 560′ levels the main shoot is 560′ long and 84′ wide, yielding 3,000 tons of ore per foot of vertical depth. This ore is nearly solid pyrite. Timbering must be done soon after extracting ore. Slag is used for filling stopes. The deepest of the 3 shafts is 770′. Mining in 1915 cost $1.80 per ton.

Equipment: electric hoist with 3½-ton skips, coarse crushing plant, compressors and smelter designed by F. W. Draper. The latter consists of two blast-furnaces, 287″ by 56″, producing a 12.5 to 13.5% copper matte, two 12′ Great Falls type converters, turbo-blowers, refinery and 3,000 kw. power plant. In 1915, there was reduced 169,760 tons of charge, equal to 530 long tons daily. Fuel consumption was 1.66% of the charge, or 2.49% of the ore, practically pyrite smelting. Slags contained 0.33% copper. No recent figures are available owing to the war and revolution.

AUSTRALASIA

Includes the Commonwealth of Australia and Dominion of New Zealand. The mines are described alphabetically by States.

NEW SOUTH WALES

The Broken Hill district has been idle since May, 1919, on account of labor troubles.

ABERCROMBIE COPPER MINES, LTD. N. S. W.

Although fully equipped, property is intermittently operated, and information as to results is not obtainable. See Vol. XIII for details.

AMALGAMATED ZINC (DE BAVAY'S), LTD. N. S. W.

Office: E. H. Shackell, sec., Collins St., Melbourne, Australia; London office, Lloyd, 1 London Wall Bldgs., London, E. C. 2, England.

Directors: Hon. W. L. Baillieu, chairman; M. Cohen, A. J. F. de Bavay (London Board; H. W. P. Clinton, F. A. Govett, G. W. W. Mackinnon, W. S. Robinson and J. L. Wharton, A. J. F. de Bavay, cons. chemist and metallurgist; A. D. Greenlees, works mgr.

Inc. 1909, in Australia. **Cap.,** £500,000; shares £1 par; all issued and fully paid.

Accounts are submitted semi-annually. Reports for 1st half of 1918 showed assets over liabilities, £151,055, and a net operating profit of £101,668.

Dividends: 5% in 1910; 20% in 1911; 27½% in 1912; 32½% in 1913; 20% in 1914; 45% in 1916; 20% in 1917; 20% in 1918. A dividend of 1s was paid in April, 1919, making total disbursements to date £925,000.

Company acquired the entire assets of the De Bavay Treatment Co., Ltd., and the patents of the Potter's Sulphide Ore Treatment, Ltd. To avoid litigation with the Minerals Separation, Ltd., the companies were merged into the Minerals Separation and De Bavays Processes Australia Proprietary, Ltd., capitalized at £300,000, shares £1 par, of which 101,750 shares were issued the Minerals Separation Ltd., and 83,250 the Amalgamated Zinc. The Amalgamated Zinc has the right to use all the Minerals Separation patents, but must pay the usual royalties.

Company also owns the following share interests: 119,250 shares Minerals Separation & De Bavay's Processes, Australia Pty., Ltd.; 960 shares Zinc Producers' Association Pty., Ltd., and 200,000 shares in Electrolytic Zinc Co. of Australia.

Amalgamated Zinc has no mines, but buys zinc-lead-silver tailings from the Broken Hill South, Broken Hill Proprietary Block 10, and North Broken Hill mines at Broken Hill, N. S. W. Material is treated in a flotation plant capable of handling 40,000 tons per month.

During first half of 1918, 164,719 tons of tailings were treated, yielding 47,184 tons of zinc concentrate and 1,834 tons of lead concentrate. The former assays 48% zinc, 6% lead, and 9.1 oz. silver; latter 53% lead, 12% zinc, and 8 oz. silver per ton.

BRITISH BROKEN HILL PROPRIETARY CO. LTD. (THE) N. S. W.

Offices: T. Mullett, sec., Salisbury House, London, E. C. 2, England; F. H. Clark, Australian sec., Steamship Buildings, Adelaide, South Australia.

Directors: J. S. Smith-Winby, chairman; F. S. Saunders, A. Sowden, W. H. Woodhead, F. V. Sanderson, W. J. Magarey, J. K. Samuel (last 3 form the Australian board), C. J. Rowley, gen. mgr.; G. C. King, asst. gen. mgr.; J. Beal, mill supt.

Inc. Nov. 11, 1887, in England. **Cap.**, £339,000, in 315,000 £1 ordinary shares, and 60,000 8/-privileged shares; all issued and fully paid.

Profit: for first half of 1918 was £114,783. Dividends amounted to £37,500, and £119,571 was carried forward. Liquid assets exceed liabilities by £265,825. The first half of 1919 resulted in a profit of £65,582, which was carried forward.

Dividends: since 1897 total £821,280, but have been irregular; 4/- in 1917, and 6/- in 1918.

Development: by shafts and extensive workings. Ore reserves in 1918 amounted to 1,095,015 tons, assaying 6.9 oz. silver, 13.3% lead, and 11.5% zinc. **Equipment:** complete for mining; also concentrating plant, using jigs and flotation (Minerals Separation and Lyster selective).

Production: the war caused a suspension of operations from August, 1914, to early in 1917. During 1918 the mill treated 222,662 tons of ore and produced 33,806 tons of lead concentrate assaying 27.95 oz. silver, 61.41% lead and 7.14% zinc; also 28,530 tons of zinc concentrates assaying 10 oz. silver, 9% lead, and 44% zinc. Production of 63,099 tons of ore for first half of 1919 made 9,903 tons concentrate carrying 60.7% lead, 7.3% zinc, and 26.4 oz. silver.

The flotation plant made 8,040 tons of concentrate, carrying 45% zinc, 9.1% lead, and 10.1 oz. silver; 1,953 tons carbonate ore running 23.6% lead was also mined.

BROKEN HILL JUNCTION LEAD MINING CO. N. S. W.

Office: A. D. Young, Brookman's Bldg., Adelaide, South Australia.

Directors: J. G. North, chairman; J. Bembrick, R. T. Edwards, W. A. Freeman, and C. H. Smith, W. Quale, mgr.

Inc. 1914 in South Australia. **Cap.**, £150,000; shares 10s. par; 72,567 issued fully paid and 200,000 issued 6/5 paid.

Property: 51 acres of mining ground at Broken Hill, N. S. W., developed by shafts and extensive workings.

Equipment: includes complete mine and mill equipment with concentrating plant. An arrangement was made in 1918 with Amalgamated Zinc for the treatment of 300,000 tons of ore at the rate of 1,500 tons per week.

BROKEN HILL PROPRIETARY BLOCK 14 CO., LTD. N. S. W.

Office: J. Brandon, 31 Queen St., Melbourne, Victoria, Australia.

Directors. Alex. Campbell; B. A. Moulden; V. J. Saddler, Clive Bailleu, and J. L. Wharton. F. V. Smith, gen. mgr.

Inc. Feb. 19, 1887, in Victoria. **Cap.**, £155,000, in 100,000 10% cum. pfd. 6s. shares and 100,000 ord. 25s shares; all issued.

Reports are issued half-yearly, and in the period ended March 31, 1919, the profit was £7,807. Surplus of cash assets was £47,977.

Dividends: 19s. per share from 1896 to 1901, after which 34s. on pfd. and 26s. on ord. shares, the last being in March, 1919.

Property: at Broken Hill, N. S. W. Though the company has a mill, the carbonate ore is all sold to smelters and the sulphide ore is treated at the Block 10 mill. Recent exploration work developed much new ore, but the old stopes are still productive. Company also has an interest in the King Island Scheelite Co., which see.

Production, in 1918:

Class of ore	Tons	Lead per cent.	Silver, Oz.	Zinc, per cent.	Total cost per ton
Carbonate	3,817	22.32	13.62	....	65/- ($15.60)
Sulphide	13,447	13.58	10.13	11.2	28/6 ($ 6.78)

BROKEN HILL PROPRIETARY BLOCK 10 CO., LTD. N. S. W.

Office: J. Brandon, 31 Queen St., Melbourne, Victoria, Australia.

Directors: A. Campbell, chairman, Clive Bailleau, William Jardine, V. J. Saddler, and B. A. Moulden. A. W. Wincey, gen. mgr.

Inc. March 14, 1888, in Victoria. **Cap.**, £1,000,000; shares £10 par; all issued and £ 9 13s paid.

Reports are issued half-yearly, and during the period ended March 31,

1919, the profit was £22,130. Dividends absorbed £15,000. Surplus of cash assets was £75,431.

Dividends: from 1890, total £14 3s. per share; including 3s. in 1918-19.

Property: mines at Broken Hill, N. S. W., and an interest in the Block 10 Misima Gold Mines, operating on St. Aignan island, near New Guinea. The Broken Hill mine contains estimated reserves of 228,900 tons to a depth of 1,000'.

Development: recent development work has been confined to the 1,015', 715', 615', 515' and 415' levels. Mining costs are 27/4 ($6.52) per ton.

Equipment: includes concentrator with flotation plant, which also treats ore from Block 14 mine.

Production: Block 10 only; for 6 months ended March 31, 1919, was 27,762 tons of ore containing 9.65 oz. silver per ton, 11.03% lead, and 10.8% zinc ore. This output yielded 6,731 tons of concentrates assaying 63.1% lead and 40.38 oz. silver and 1,373 tons of zinc concentrate assaying 47.2% zinc and 12.7 oz. silver, per ton. Recoveries averaged 86.9% of the silver, 92.9% lead, and 84.4% zinc. Milling costs were 12/7 ($3.02) per ton, and total costs were 44/6 ($10.62) per ton. There were 333 men employed.

BROKEN HILL PROPRIETARY CO., LTD. N. S. W.

Head office: F. M. Dickenson, 320 Collins St., Melbourne, Victoria, Australia. **Mine office:** Broken Hill, N. S. W. **Steel works:** Newcastle, N. S. W.

Directors: Bowes Kelly, chairman; D. E. McBryde, v. c.; with R. C. Blackwood, H. G. Darling, W. Jamieson, H. V. McKay and D. W. H. Patterson. G. D. Delprat, gen. mgr.; E. J. Horwood, works mgr. at Broken Hill; R. T. Sloss, mine mgr.; D. Baker, steel works mgr. at Newcastle; J. A. Lindsay, chief engr.

Inc. Aug. 13, 1885, in Victoria, Australia. **Cap.,** originally £320,000 shares £20 par; subsequently sub-divided, but increased to £600,000; shares £1 par, in 1912; finally increased to £3,000,000 shares £1, of which 2,100,000 are issued. Debentures £1,000,000 of 6% authorized; £848,700 outstanding. Company has a large interest in Broken Hill Associated Smelters Proprietary.

Profit for half-year ended May 31, 1919, was £642,350, compared with £706 for same period of 1918.

Dividends: total about £12,000,000, inclusive of shares in other companies distributed. From 1886 to 1889, each £2 share received 15s; in 1890 each £2 share received 10s. and each 8s share 22s; from 1891 to 1913 each 8s share (960,000) received 55s; and from 1913 to 1916 each 8s (1,181,000) received 6d; 3s. each in 1917 and 1918; and 1s. in 1919, up to February.

Property: the Broken Hill, one of the world's largest and most famous silver-lead-zinc mines now past the zenith of its career. Company also owns iron mines at Iron Knob, S. Australia.

Development: by shafts down to 1,300', huge open-cuts and many miles of workings. The mine still has fairly large ore reserves which contain 20% lead, 8 oz. silver, and 12% zinc. Tailings on hand are also in large quantity.

Equipment: at Broken Hill; power plant, hoists, compressors, tramways, crushing plants, 1,000-ton ore concentrator, flotation plant, etc. At Port Pirie, S. Australia, up to June, 1915, company operated a large smelter with roasters, Huntington-Heberlein and Dwight-Lloyd sintering machines, lead-refining plant, blast-furnaces, lead-silver refinery. This plant was transferred to the Broken Hill district in June, 1915. At Iron Knob, company has plant for extraction of iron ore, which is shipped by boat to Newcastle, N. S. W., and by rail to Waratah, near Newcastle, a distance of 170 miles, to the company's blast-furnaces and steel mills.

Production: has lately been curtailed by labor troubles. During first [illegible] yielding 11,958 tons of 65% lead concentrates; 1,373 tons of zinc concentrates; and 55,833 tons of 50% zinc concentrates.

Company's metal output to end of 1914, returned at £37,421,721. Since then, the figures include coal and iron.

At Newcastle the production was 67,803 tons of pig iron, 89,011 tons of steel, ingots, 74,025 tons of coke, 1,120 tons of ammonium sulphate, and 777,324 gallons of tar.

BROKEN HILL SOUTH, LTD. **N. S. W.**

Head office: J. R. Edwards, sec., Collins House, 360 Collins St., Melbourne, Victoria, Australia. R. N. Kirk, agent in Sydney; A. W. Lewis, sec. *in* Adelaide; E. E. Garner, sec. in London.

Directors: B. A. Moulden, chairman; W. M. Hyndman, Colin Fraser, L. K. S. MacKinnon, and Hon. D. J. Gordon, G. W. W. MacKinnon, director in London. W. E. Wainwright, gen. mgr.

Inc. Oct. 11, 1893, in Victoria. **Cap.,** £800,000; shares £1 par; all issued and paid up otherwise than in money; increased from £200,000 in September, 1918. Debentures: £200,000 of 6%, issued in bonds of £100; £176,600 outstanding at June 30, 1919.

The company owns an interest in the following companies: Broken Hill Associated Smelters Pty., Ltd., 200,000 £1 shares; Zinc Producers Association Pty., Ltd., 720 £1 shares; Barrier Roaster Co. Pty., Ltd., 10,000 £1 shares; and Electrolytic Zinc Co. of Australasia Pty., Ltd., 80,000 £1 shares, a total of £290,720 it cost.

Statement for the year ended June 30, 1919, shows that the value of the production was £709,392, of which £384,999 was operating profit, less £40,886 for general charges, interest, taxes, and depreciation. Dividends paid amounted to £120,000. The appropriation for income taxes, new plant, development, etc., was £160,000 and £64,113 was carried forward. Investments, supplies, metals and concentrates, cash on hand and on deposit, totaled £984,325; while current liabilities, exclusive of debentures, were £31,386.

Dividends: since 1902 total £12 1s. per share, including 21s. in 1918 [illegible] by old company). Last distribution in March, 1919, of 1/6 per share.

Property: 69 acres of mineral ground at Broken Hill, N. S. W.

Development: to 1,500′ depth by six shafts and extensive workings. [illegible] lowest stoping level, 1,270′ below the surface the ore averages 15.2% [illegible] oz. silver, and 14.7% zinc. In 1918-'19, company did 3,349′ of diamond-[illegible] and 3,595′ of new underground work. All underground work is by con-[illegible] during 1918-19 miners averaged 21/3 ($5.07), and trackers 18/11 [illegible] 8-hour shift. There are 639 men employed in the mine. Reserves [illegible],000 tons.

Equipment: includes a modern steam power-plant, ventilating fans, [illegible]ists, compressors, crushing plant, an 1,100-ton concentrating mill, and [illegible] flotation plant; etc. In July, 1919, fire destroyed machinery, [illegible] crushing plant valued at £70,000 and a years time is lost before it is [illegible]aced. Zinc tailing is treated by the Amalgamated Zinc (DeBavay's) Ltd., joint account, at the rate of 200,000 tons per annum. The old tailing dumps sold to the Zinc Corporation, Ltd., at the rate of 80,000 tons per annum. [illegible] on hand totals 700,580 tons, and slime, 406,787 tons. All the lead concentrate produced is sent to the B. H. Associated Smelters Pty., Ltd., Port Pirie, South Australia, for smelting. About 555 men are employed on surface work.

BROKEN HILL SOUTH SILVER MINING CO. N. S. W.

Reorganized in 1818 as Broken Hill South Ltd., which see.

BUTLER'S TIN MINE N. S. W.

Address: C. Lonsdale Smith, mgr., Torrington, N. S. W.; or James Mackay, legal mgr., Melbourne, Victoria.

Property: 7 miles from Torrington, N. S. W. Lode is in granite, and ore carries tin, wolfram, and lead.

Development: by 920′ adit, shaft, and workings reaching a depth of over 300′.

Equipment: includes steam power, engines, and mill with 10 stamps, jigs, tables, vanners, flotation unit, and magnetic separator. The first section of the mill makes a recovery of 80% tin, 68% tungsten, and 66% lead; while the final treatment takes out 98% of the lead, making the zinc concentrates saleable. No production figures are obtainable.

COBAR-GLADSTONE MINING CO. N. S. W.

Mine office: Wrightville, Robinson county, N. S. W., Australia. Mine is opened by a 400′ vertical shaft, and in 1917 was making weekly shipments of 35 tons of concentrates to the E. R. & S. Co. smelter at Port Kembla, assaying from 20 to 23% copper.

Equipment: includes rolls, jig and concentrating tables.

No recent returns received; probably idle.

ELECTROLYTIC REF. & SM. CO. OF AUSTRALIA, LTD. THE

Office: 118 Pitt St., Sydney. **Works office:** Port Kembla (50 miles south of Sydney), County of Camden, New South Wales, Australia.

Directors: R. G. Casey, chairman; Kelso King, P. V. McCulloch, J. M. Niall, W. L. Baillieu, and J. L. Wharton. S. W. Thornton, sec.; E. A. White, mgr.

The plant covers an area of approximately 53 acres and contains a sampling mill, blast furnaces and converter plant, anode furnaces, electrolytic tank house, refining furnace, etc., etc. 33,950 tons ore were treated in 1918, and 24,700 tons blister copper handled.

Production: 21,300 tons of electrolytic copper (registered brand "E. S. A."); 8,969 tons of fire-refined copper, (registered brand "ESA F. R."); and 371 tons of bluestone (registered brand "ESA Bluestone").

These works are an important adjunct to the copper industry of Australia.

GREAT COBAR, LIMITED N. S. W.

Head office: 4b Fredericks Place, Old Jewry, London, E. C., England. **Mine office:** Cobar, N. S. W., Australia.

Officers: Sir John Taverner, chairman; C. H. Wayte, Sir E. V. Evans, directors; E. Hogan Taylor, mgr.

Inc. May 22, 1906, in England. **Cap.**, £1,000,000, in 200,000 shares of £5 each; 186,542 issued. Also 6% first mortgage debentures totaling £750,000, of which £667,300 are outstanding.

Property: copper mines, smelters, coal mines, coke works and refining plant, at Cobar and other parts of New South Wales. The price paid the Great Cobar Copper Mining Syndicate, which had operated profitably for years, was £800,000 cash, £55,000 in paid-up shares, and £151,000 in cash, shares, or debentures. Several well-known engineers examined the Cobar mine, including C. M. Rolker, J. D. Kendall, W. J. Barnett, and Pellew-Harvey.

A new shaft was sunk to 1,540′, and new 1,200-ton smelter erected. In 1913 reserves were estimated at 2,705,161 tons, 2,081,735 tons of which contained 2.5% copper. In that year, the yield was 13,016,640 lb. copper, 27,136 oz. gold, and 127,542 oz. silver. No returns since.

Many troubles arose in the mine and plant, and in April, 1914, operations ceased and receivers (A. F. Whinney in England and W. H. Fletcher in Australia) were appointed. An independent report was made, which gave 3 years' ore opened. At £65 per ton for copper, the profit would be £88,800, and if no more ore were found, the plant might realize £63,700. The total profit of £152,500 would yield debenture-holders 23%. To enable the new scheme to be worked out, £62,000 was borrowed from debenture-holders, and £40,000 from

the New South Wales Government. Net proceeds in 1916, 1917, and 1918 went to certificate-holders on certain terms.

Mining and smelting were resumed during 1917 under the new arrangement.

Production: from 1876 to 1906, inclusive, the Great Cobar mine yielded 1,592,895 long tons of ore, returning 138,593,280 lb. fine copper. Production, under the former ownership, was 7,000,000 to 9,000,000 lb. copper yearly, having been 9,027,200 lb. fine copper in 1906; and production by present company was about 10,000,000 lb. in 1907; 10,586,240 lb. copper, 64,949 oz. silver, and 13,002 oz. gold in 1908; 12, 762,080 lb. copper, 83,208 oz. silver, and 14,452 oz. gold in 1909; 13,847,680 lb. copper, 107,932 oz. silver and 21,524 oz. gold in 1910. Production for the year ending June 30, 1912, was 339,494 tons of ore from the company's own mines and 88,924 tons of custom ore, producing 15,089,760 lb. copper, 178,760 oz. silver and 37,696 oz. gold. 1913 returns are given above.

From the results it is evident an error was made in original estimates of the mine, the new smelter was unsuitable, and the capitalization was too heavy.

In November, 1918, debenture-holders decided to continue operations until the end of 1920. In April, 1919, shares had dropped to 1/ each.

JUNCTION NORTH BROKEN HILL MINE N. S. W.

Office: E. V. Nixon, 360 Collins St., Melbourne, Victoria, Australia.

Directors: J. S. Palmer, chairman; K. G. Brooks, F. H. Reynolds, W. Clarke, H. B. Ludlow, and A. Rigby. J. F. Stephen, gen. mgr.

Inc. August, 1912, in Victoria. **Cap.,** $375,000; shares £1 10/- par; 225,000 issued.

Accounts are presented half-yearly, and for the period March 31, 1918, there was a profit of £ 36,669. Dividends amounted to £31,500. Current assets exceed liabilities by £170,899.

Dividends: 1/- in 1917; 3/6 in 1918.

Property: 45 acres at Broken Hill, N. S. W. The mine which is fully developed and equipped, contains 192,000 tons of ore that averages 12.3% lead, 8.9 oz. silver, and 6% zinc.

Production: 8,989 tons of 60% lead and 10,435 tons of 50% zinc concentrates, in 1917-18.

MAMMOTH MOLYBDENITE CO., LTD. N. S. W.

Address: Yetholme, New South Wales, Australia.

Property: company operates a molybdenite mine and mills the ore which assays 1.3%, making a concentrate of 85% MoS_2. No details are available, but mine was being worked at last accounts.

MINERALS SEPARATION & DE BAVAY'S PROCESSES AUSTRALIA PROPRIETARY, LTD. N. S. W.

Office: E. H. Shackell, Collins House, Melbourne, Victoria, Australia.

Directors: W. L. Baillieu, chairman; A. E. Bright, M. Cohen, H. H. Greenway, and J. L. Wharton.

Inc. June 27, 1912, in Victoria, to acquire the Australia and New Zealand rights to the Minerals Separation, Ltd., De Bavay's Sulphide Process Co., Ltd., Potter's Sulphide Ore Treatment, Ltd., and Amalgamated Zinc (De Bavay's), Ltd., patents. The foreign patents of these various companies were taken over by Minerals Separation, Ltd., which is the parent of Minerals Separation North American Corporation (United States).

Cap., £300,000; shares £1 par; 265,000 issued.

Profit in 1917 was £24,511, of which all but £11 was distributed.

Dividends: 10% in 1912; 13¾% in 1913; 5% in 1914; 7½% in 1915; 10% in 1916.

Company grants licenses to use its processes, and starts suits against other systems of flotation.

MT. BOORALONG MOLYBDENITE MINES N. S. W.

Address: James Rankin, 97 Elizabeth St., Melbourne, Victoria, Australia. H. T. Wardle, supt.

Inc. May 31, 1916, in Victoria. **Cap.,** £150,000.

Property: 110 acres in New England district of N. S. W., containing

...8% metallic tin.

N. S. W.

...all Ave., London, E. C. 2, England; Col-
...ralia. Broken Hill, N. S. W., Australia.
...Hylton, supt.

Directors: F. A. Govett, chairman and managing director; J. A. Agnew, H. W. P. Clinton, W. C. C. Romaine, R. W. Skipwith, T. White, P. L. Gell, T. B. Birkbeck, and W. M. Hyndman.

Inc. July 8, 1911, in Great Britain. **Cap.,** £575,000, in 245,792 pfd. £1, and 658,616 com. 10s. shares, all issued. Company is interested in the Broken Hill Associated Smelters Proprietary, Zinc Producers Association Proprietary, Electrolytic Zinc Co., and Barrier South, Ltd.

Profit for 1917 was £225,154, plus balance of £25,971 from previous year. Dividends amounted to £228,905. Current assets exceed £500,000.

Dividends: 15% on pfd. and 10% on ord. in 1911; 37½% and 35% in 1912; 35% and 30% in 1913; 20% and nil in 1914; 25% and 10% in 1915; 37½% and 35% in 1916; 40% on each in 1917; 27½% and 15% in 1918.

Property: the South Blocks mine and claims, a total of 160 acres in Broken Hill.

Development: to depth of 1,590' by two vertical shafts (one 1,210' deep), and extensive underground workings. Reserves given as 1,887,000 tons, containing 14.3% lead, 2.6 oz. silver and 9.2% zinc.

Equipment: includes a complete and modern mill using rolls, tables and flotation plant with Minerals Separation, and the Lyster and Horwood selective processes, described in Mining Magazine (London), of November, 1918.

Company buys tailings from other Broken Hill mines besides treating its own ores.

Summary of operations:

Year	Zinc plant tailings, tons	Lead plant, ore, tons	Zinc concentrate, tons	Lead concentrate, tons
1918	257,300	135,580	61,470	33,581
1917	257,590	134,618	63,700	31,993
1916	200,510	136,901	45,464	37,376

Galena concentrate carries 66% lead, and blende concentrate 48% zinc. Costs are about 33/– ($7.92) per ton.

ZINC PRODUCERS' ASSOCIATION PROPRIETARY, LTD. N. S. W.

Offices: E. H. Shackell, Collins House, Melbourne, Victoria, Australia, and A. J. M. Sharpe, Pinners Hall, London, E. C. 2, England.

Directors: W. L. Baillieu, chairman; A. Campbell, M. Cohen, J. G. North, J. S. Palmer, F. A. Govett, F. C. Howard, W. M. Hyndman, F. A. Keating, Bowes Kelly, D. E. McBryde, B. G. Moulden, J. L. Wharton, and W. H. Westhead. Sir J. M. Higgins represents the Federal Government.

Inc. May 20, 1916, in Victoria, to market all the zinc concentrate or ore produced in Australia, the various companies contracting to deliver their output to the Association for a period of 50 years. An agreement was also made with the British Government to handle these products.

Cap., £100,000; shares £1 par; all held by the Broken Hill companies, the Broken Hill Associated Smelters, and the Mt. Lyell companies.

PAPUA (New Guinea)

BLOCK 10 MISIMA GOLD MINES

Controlled by Broken Hill Proprietary Block 10 Co.

Office: 31 Queen St., Melbourne, Australia.

Officers: J. Brandon, sec.; R. Williamson, mgr.

Inc. December 1916, in Victoria, Australia. **Cap.,** £250,000; shares £5 par, [illegible] issued.

[illegible] made in second half of 1917; loss of £340 in first half [illegible] 300 in first half of 1919.

[illegible] gold-b[illegible] claims on the island of St. Aignan, [illegible] 25,250 tons of 38s. ($9.12) ore. Mine [illegible] plant of 50 tons daily capacity, which [illegible] the first six months' run produced

7,045 tons of 30/10 ($7.40) ore. Extraction by cyanidation was 88.7% in the 6 months of 1919; 5,580 tons of 26/1 ($6.25) ore were mined, and the ore reserve increased.

LALOKI (PAPUA) COPPER MINES

Address: C. R. Baldwin, Port Moresby, Papua.

Property: a copper mine of considerable promise 18 miles from Port Moresby, once owned by the Great Fitzroy Copper Company of Queensland. Country is rough, and transportation expensive, though costs have recently been reduced from £6 ($28.80) to 15s. ($3.60) per ton by constructing a new road and using steam tractors.

A shoot of 8% ore has been opened, which experiments show can be cheaply roasted, the calcined material leached, and the copper and zinc extracted by electrolytic methods, with a high extraction of the metal.

QUEENSLAND

CHILLAGOE, LIMITED **QUEENSLAND**

Property sold to the Queensland Government. Fully described in Copper Handbook, Volume XI.

CORELLA COPPER CO. **QUEENSLAND**

Operations ceased in 1917. Stock valueless. See Vol. XIII.

GREAT FITZROY MINES, LTD. **QUEENSLAND**

A dormant corporation. See Vol. XIII for organization and former operations.

HAMPDEN-CLONCURRY COPPER MINES, LTD. **QUEENSLAND**

Offices: E. H. Shackell, Collins House, Melbourne, Australia; and E. Habben, sec., Palmerston House, London, E. C. 2, England.

Directors: J. L. Wharton, chairman; W. L. Baillieu, F. G. Hughes, W. Orr, H. H. Schlapp, and B. M. Turner. London directors: W. D. Reid, G. W. W. Mackinnon, and G. W. Staples. Earle Huntley, gen. mgr., Friezland, via Cloncurry, North Queensland. D. Wentworth, metallurgist.

Inc. July 31, 1909, in Australia, as a reorganization of a company of same name. **Cap.,** £400,000; shares £1 par; 350,000 issued.

Profit for half-year ended August 31, 1918, was £61,016, against £67,550 in the previous period. Balance forward was £38,593. Current assets exceed liabilities by £215,948.

Dividends: in 1913, 40%; 1914, nil; 1915, 20% 1916, 40%; 1917, 15%; 1918, 10%.

Company owns 4,000 shares of the Electrolytic Ref. & Sm. Co. of Australia, Ltd., and 18,750 shares of Metal Manufacturers stock; both having works at Port Kembla, New South Wales; and 1,000 shares in the Copper Producers' Association.

Property: about a dozen mines, with 450 acres mineral claims, in the Cloncurry mining district, North Queensland. Mines are connected by 2′ gauge railway with the Cloncurry Copper Mines, Ltd. The mines contain auriferous copper ores, the combined reserves being 133,000 tons of smelting ore averaging 4%, and 231,000 tons of 6.8% concentrating ore, plus over 60,000 tons of mixed ores in the McGregor and other mines.

Equipment: includes railways, complete mining plant, mill and flotation plant, and 375-ton smelter with converters.

Production, half-years to August, 1919:

Period	Ore smelted, tons	Copper, Lb.	Silver, Oz.	Gold, Oz.
1918	56,603	7,616,000	9,716	2,302
1918	49,565	7,176,960	21,854	1,202
1917	.....	.....	.....	.....
1917	46,443	6,948,480	23,418	1,028
1916 (year)	104,476	16,856,000	59,119	2,234

Custom ore is smelted, but the product is not included in the above figures.

IRVINEBANK MINING CO., LTD. **QUEENSLAND**

Office: J. H. Reid, managing director, 18 Bridge St., Sydney, N. S. W. **Works office:** Irvinebank, Queensland.

Property: company owns tin mines and tin concentrating works at Irvinebank, Koorboora and Watsonville; copper mines at Watsonville and wolfram mines and mill at Mt. Carbine, all in North Queensland. The tin smelter includes a reverberatory furnace and is the only tin works in the State.

MANY PEAKS COPPER MINING CO., LTD. **QUEENSLAND**

Office: J. D. Murray, sec., East St., Mt. Morgan, Queensland. James Hill, mgr.

Inc. 1906, in Queensland. **Cap.**, 81,640 shares, 6d. (12c) par, originally 2,041 shares £1 par, changed in 1911 to present amount.

Company owns a cupriferous pyrite deposit from which the Mt. Morgan G. M. Co. drew its supply of fluxing material at a royalty of 2s. 6d. (60c.) per ton. The lease called for not less than 25,000 tons annually. In August, 1918, the Mt. Morgan company terminated the lease.

Receipts for year ending June 30, 1917, amounted to £6,222, plus credits of £2,535, making £8,757. Of this £6,803 was distributed in dividends. Cash on hand was £1,165. For 1918, revenue was £4,156, of which £3,742 was distributed.

Dividends: total £56,383 or 13/6 ($3.18) per share to June, 1918.

Property: 320 acres, well timbered, on terminus of Boyne Valley railway. The property shows promising vein up to 90′ in width, having no secondary sulphides, the zone of oxidation being succeeded by chalcopyrite ore of about 3.5% copper tenor. Development is exclusively by tunnels, the main tunnel being on the 470′ level, with 3 levels above, at 100′ intervals. A winze opens the deposit to 570′ depth. The ore is very pyritic and was all used by the Mt. Morgan company as a flux. Its copper content is about 1½%. Reserves are about 1,000,000 tons.

Production: 33,245 tons in the year ended June 30, 1918, making 497,95[illegible] tons to date, on which royalties totalled £62,241.

MOUNT CUTHBERT, N. L. **QUEENSLAND**

Offices: W. B. Arnold, sec., 39 Queen St., Melbourne, Australia: Edwin Habben, sec., Palmerston House, London, E. C. 2, England; and Mount Cuthbert, Queensland.

Officers: P. Pigott, chairman; Robert Philp, T. P. Power, F. E. Power, John G. Robertson and J. Forsyth, directors. Stephen Harris, gen. mgr.

Inc. Feb. 21, 1907, in Victoria, Australia. **Cap.**, £240,000; shares £1 par. Reorganized October, 1909, and August, 1916, in Victoria. Capital increased to £419,394; shares £1 10s. par. Original 7% debentures outstanding £55,500. At the reconstruction in August, 1916, £50,000 7% prior lien debentures were created to secure creditors; these debentures expired in September, 1917.

Profit for half-year ended August 31, 1917 was £29,173. Of this £15,00[illegible] was put into reserve. Accumulated deficit was £87,131. Liabilities exceeds assets by £36,556.

The year ended August 31, 1919, resulted in a loss of £12,308.

Property: 575 acres at Mount Cuthbert in the Cloncurry district, 3 miles from Cloncurry, Queensland.

Geology: the orebodies occur in veins cutting a schistose formation and as intimately disseminated sulphides in the schists. In some places the veins cut dolomitic limestone and carry good ore. The vein outcrops are distinctly traceable through the various claims. Reserves amount to 130,000 tons of 9.5% ore.

The ores contain glance, chalcopyrite, pyrite, and bornite at depth. Deepest workings are 484′. Considerable chalcotrichite (a hair-like form of copper) occurs in places.

In 1919 company had opened an orebody in the Kalkadoon mine, varying from 15 to 40′ wide.

Equipment: includes 200-ton smelter, started in March, 1917. The Cuthbert and Kalkadoon mines have equipment to mine at a depth of 2[illegible]. The Government railway from Cloncurry runs to Mount Cuthbert, and also

have been built to connect with several of company's mines. The mines were fully described in "Chem. Eng. & Min. Review" of Melbourne, for November 5, 1917.

Production: to Feb. 28, 1919, a total of 91,855 tons of ore had been smelted, yielding 5,026 tons (11,258,250 lb.) of blister copper. Of this, 13,099 tons were treated at Mount Elliott, the remainder at Mount Cuthbert.

MOUNT ELLIOTT, LTD. **QUEENSLAND**

Offices: E. Habben, Palmerton House, Old Broad St., London, E. C. 2, England; F. G. Hughes, Collins House, Melbourne, Victoria, and Mt. Elliott, Selwyn, via Townsville, Queensland, Australia.

H. J. Hill, chairman of board in London. W. L. Baillieu, general representative in Australia, and W. H. Corbould, cons. eng.

Inc. June 14, 1907, in Great Britain. **Cap.,** £1,250,000; shares £5 par; 237,518 issued.

Operations for the year ended June 30, 1918, showed a loss of £56,890. Liabilities exceeded assets by £37,000. In 1918-'19, loss was £41,034.

Dividends: 10% in 1910-'11; 15% in 1911-'12; 27½% in 1912-'13; and 5% in 1913-'14; none since; a total of £425,000.

Property: a group of copper mines situated in the Cloncurry copper district of Queensland, covering approximately 4,600 acres, about half of which can be classed as good and probable copper area. The holdings include those of the Dobbin and Cloncurry Mines, Ltd., transferred to Mount Elliott, the undertakings of the two companies now being operated as a unit. The vendors of the original Dobbin & Cloncurry Mines, Ltd., receive a proportion of profits equal to about £200,000, which makes approximately £1,450,000 on which the company must pay dividends.

Development: is not deep nor very extensive, including shafts of various depths, at the different mines whose reserves are given in the table below:

Mine	Reserves in tons	Copper, %
Mount Elliott	600,000	3.0
Mount Elliott	10,000	10.0
Consols	450,000	4.0
Great Australia (limestone)	110,000	2.5
Great Australia (silicious)	93,000	4.0
Dobbin	70,000	5.0
Mount Oxide	300,000	10.0
Argylla	200,000	4.0
Lady leases	28,000	5.0
Total and average content	1,861,000	4.6

In this estimate, no allowance is made for possible ore below 600′ in Mount Elliott, 480′ in Consols., 300′ in Great Australia, 305′ in Dobbin, 300′ in Mount Oxide, 100′ in Argylla, and 200′ in Lady leases. If the developed ore of the smaller mines be included, the total reserve would aggregate 2,500,000 tons; underground conditions indicate that the downward limit of the orebodies have not been reached.

The Mount Oxide property has steeply dipping shales containing an interbedded lode 60′ thick, overlaid by 70′ of hematite. Next to this iron ore here is 18′ of 4% copper ore, with 50,000 tons of 20% ore and a total of 00,000 tons of 12½% copper ore.

Equipment: a 300-ton plant treating 5% ore and actually recovering ½%. Company needs a large modern plant to place the project on a profitable asis.

Production: to date 327,175 tons of ore yielding 28,264 tons of 63,311,360 . copper. The output for 1917-'18 was 5,201,280 lb. copper recovered from 1,952 tons of ore. In 1918-'19 (7½ months) the yield was 6,460,160 lb. from 1,[illegible] tons of ore.

[illegible] management states the 10% ore treated in former years gave good profits, but

the grade of present reserves is too low to warrant operations, as the output is too small to carry the overhead charges.

MOUNT MORGAN GOLD MINING CO., LTD. **QUEENSLAND**

Offices: E. W. Moran, sec., Mt. Morgan, Queensland; S. W. Thornton, sec., 118 Pitt St., Sydney, New South Wales; T. H. Williams, sec., 125 William St., Melbourne, Victoria; E. Habben, sec., Palmerston House, Old Broad St., London, E. C. 2, England.

Directors: (Australia) R. G. Casey, chairman; Kelso King, J. L. Wharton, J. M. Niall, John Sanderson, W. L. Baillieu, K. deL. Cudmore, R. S. Archer, W. G. Thompson. (England): E. V. Reid and A. J. Pugh, W. G. Thompson, A. A. Boyd, gen. mgr.; J. Horsburgh, asst. gen. mgr.

Inc. Oct. 1, 1886, in Queensland. **Cap.,** £1,000,000; shares £1 par; fully issued and fully paid.

Financial Statement:

Period	Revenue	Profit	Dividends	Balance	Excess of current assets
1918 (½ year, Dec. 1)....	£548,486	£86,485	£50,000	£135,221	£507,23
1918 (Year, June 2).....	1,233,983	252,749	250,000	98,736	465,17
1917 (Year, May 27).....	1,301,377	309,205	250,000	95,986	522,10

Dividends: paid quarterly, have ranged from a minimum of 8d., at the beginning, 1886, to a maximum of £1 2s., in 1889. To end of 1916 the company had paid about 825% in dividends, which were 6s. yearly, 1892-97; 6s. 6d. in 1898; 7 s. yearly 1899-1900; 5s. 10d. in 1901; 5s. 9d. in 1902; 3s. yearly 1903-06; 4s. 6d. yearly 1907-08; 4s. yearly 1909-13; 3s. in 1914; 4s. in 1915; 5s. in 1916; 5s. in 1917; 3s in 1918, and 1s. in January, 1919. The total is £9,229,166.

Property: 90 acres perpetual leasehold, and 640 acres freehold; also flux quarries, coal beds, and magnesite deposits. Lease on the pyrite deposits at Many Peaks was given up late in 1918.

Company has a large interest in the Electrolytic Refining & Smelting Co. of Australia, Ltd., which refines Mt. Morgan and custom copper and in the recently organized Metal Manufacturers, Ltd., which is to make copper products from Australian metal. Mt. Morgan is about 25 miles west of Rockhampton, and the mine has been, since 1890, one of the greatest gold producers of the world.

Geology: the Mount Morgan gold deposit proved to be the siliceous gossan of a great copper deposit. As the ore showed increased copper content at depth the company wisely began extensive diamond-drilling, which proved immense tonnage of copper ore. The mine has been operated as 2 connected mines, the upper section being worked open-cut. The oxidized ores were exhausted in 1910, and only sulphide ores are now mined. The sulphide ore is known locally as "mundic," being an auriferous and slightly cupriferous pyrite.

Development: is done through 2 principal shafts, known as the Kent of 1,050′ depth, and the Lynda incline, about 1,500′ deep. Underground extraction is from the 360′ to 950′ levels. Depleted stopes are filled with waste in the pigstye system, some of the stopes being of great size. New openings amount to a thousand feet or so per annum, which does not seem extensive when the character of the deposit is considered such footage is considerable.

Ore reserves have been estimated as follows:

Date	Tons	Copper, %	Gold
June, 1918.....	3,622,892	2.58	
December, 1918.....	3,706,964	2.58	
June, 1918.....	3,825,685	2.58	
June, 1917.....	4,176,795	2.59	

This includes concentrating and smelting ore.

Equipment: is very complete and up-to-date, having undergone changes during the past 5 years. It includes a concentration plant, and large power plant. The smelter has blast furnaces.

Experiments are being made in treating some of the ore.

The district being arid, [illegible] have been built for

here being 7 dams, of which 5, in commission, have an aggregate capacity of 87,000,000 gal., No. 7 holding 270,000,000 gal.

Production: the total from 1883 to October, 1918, was 4,637,421 oz. of old and 86,678 tons (194,158,720 lb.) of copper. Recent returns were:

	Ore concentrated, tons	Ore smelted, tons	Copper, tons	Gold, Oz.
919 (½ yr. June 1)....	75,138	90,687	2,688	50,042
918 (½ yr. Dec. 1)....	115,466	105,264	3,580	42,942
918 (½ yr. June 1)....	123,854	102,872	3,505	38,138
917 (year May 27)....	141,430	278,380	8,042	98,950

During the last 12 years, product of the mine realized £12,153,362. The ncome was absorbed in the following proportions: wages, 46.36%; Government, 1.14%; royalties, etc., 7.29%; stores, etc., 14.45%; dividends, 10.65%; and balance, 11%.

Mount Morgan is one of the great mines of the world, but it has passed the :nith of its production. The decreased amount of ore treated in the past few :ars is, however, said to be due to scarcity of labor, and not to scarcity of ore.

IUNGANA MINING CO., LTD. **QUEENSLAND**

Company now out of existence. See Vol. XIII.

COTTISH GYMPIE GOLD MINES, LTD. **QUEENSLAND**

Head office: Dunlop & Murray, secs., 188 St. Vincent St., Glasgow, :otland. **Mine office:** Mary St., Gympie, Queensland, Australia.

Officers: G. B. Hoggan, chairman; R. G. Campbell, J. B. Hilliard, and . Walker, directors. D. E. Reid, gen. mgr.; T. Jobling, mine mgr.; H. Walker, rveyor.

Inc. June 11, 1902, in Scotland. **Cap.,** £700,000; shares £1 par; 600,000 ued.

The year ended May 31, 1918, resulted in a loss of £2,074. A debit balance £4,448 was carried forward.

Dividends: since 1898, total about £6 2s. per share; £5 8s. to 1902, ce when profits have been small. The total to July, 1917, was £597,742.

Property: 126 acres, at Gympie, Queensland.

Equipment: complete for treatment of about 9,000 tons per month.

Production: in year 1915-'16, 83,800 tons of ore and 27,950 tons of tail- cy anided for $6.44 per ton. In 1917-'18, 72,300 tons of ore and 29,100 tons of ing yielded 20,285 oz. of gold, at a cost of 22/– ($5.28) per ton. In July, 9, 1,500 tons yielded 635 oz. of gold.

Property has been a large producer, but now makes little profit, and is near **end.**

VER SPUR, LIMITED **QUEENSLAND**

Office: Parburg House, Eagle St., Brisbane, Queensland, Australia.

Alexander Corrie, chairman of board of directors; Edgar Hall (mgr.), M. Corrie, sec.; H. I. Stey, supt.

Inc. November, 1917, in Queensland, as reorganization of the Silver r Mining Co., **Cap.,** £75,000; shares 10s. par. **Dividends:** paid by old pany totaled £25,000.

Property: 49 acres at Silverspur, 6½ miles from the border of New h Wales. A 44-mile railroad to the mine has been authorized by the Gov- ent. Examined by Lionel C. Ball, Government Geologist, in 1918. Ore ins galena, sphalerite, and chalcopyrite, averaging 12% lead, 25% zinc, 1% er, $1 gold, and 26 oz. of silver per ton.

Development: by 520' shaft and extensive workings. Dumps are re- d to have a recoverable value of £500,000.

Equipment: includes hoist, compressor, crushing plant, roasters, and eratory furnaces.

Production: by old company £310,000. Late in 1918 a few hundred of or[illegible] smelted each month, and the resulting matte shipped to e C[illegible]fining.

WONBAH MOLYBDENITE MINING CO., LTD. QUEENSLAND

Address: Mt. Perry, Queensland, Australia.

Property: a molybdenite mine equipped with a concentrating plant which had made 5,000 lb. of concentrate from 400 tons of ore up to January, 1918.

SOUTH AUSTRALIA

BROKEN HILL ASSOCIATED SMELTERS PROP., LTD. S. A.

Office: H. L. Shackell, sec., 360 Collins St., Melbourne, Victoria, Australia.

Directors: W. L. Baillieu, chairman. C. Fraser, Bowes Kelly, F. A. Govett. Gilbert Riggs, chief met. eng.; H. St. J. Somerset, plant supt.; D. E. McBryde, Victoria, and W. S. Robinson. W. Robertson, gen. mgr.

Inc. May 7, 1915, in Victoria. **Cap.,** £1,000,000; shares £1 par; 730,000 issued and held by the Broken Hill Proprietary (£200,000), Broken Hill South (£200,000), North Broken Hill (£200,000), Zinc Corporation (£100,000), and British Broken Hill (£30,000).

Works: the largest lead smelting plant in the world, formerly owned by the Broken Hill Proprietary Co. at Port Pirie, S. Australia. The plant includes railroads, blast-furnaces of 6,000-ton per week capacity on 60% lead concentrates, roasting furnaces, Dwight-Lloyd and H. H. sintering machines, a 3,000-ton per week lead refinery, and 200-ton per week spelter works, limestone quarries in S. Australia and coke works at Bellambi, N. S. W. The ore supply for these works comes from 9 Broken Hill companies, also from outside sources. The smelters can produce 165,000 tons of lead, 5,000 tons spelter, and 6,500,000 oz. silver per year. The coke plant makes 100,000 tons yearly. Antimonial lead, assay lead, litharge, zinc dust, lino metal, and bar and granulated silver are made. The brand is B H A S in a diamond.

MT. LYELL CONSOLS WALLAROO COPPER MINES, N. L. S. A.

Reorganized as New Lyell Consols. Copper Mine, which see.

NEW LYELL CONSOLS. COPPER MINE S. A.

(Formerly Mt. Lyell Consols. Wallaroo Copper Mines).

Offices: T. Rollason, sec., 31 Queen St., Melbourne, Australia; 17 Coleman St., London, E. C. 2, England. **Mine office:** Kadina, Daly county, S. Australia. John Woolcock, gen. mgr.

Directors: T. C. Dunster, chairman; S. Cherry, George Dunkan and Cecil Bain.

Inc. November 20, 1911. **Cap.,** £250,000; shares 10s. par; 350,000 issued.

Operations were suspended on account of the War, but in September, 1918, a head-frame, hoist and pump had been installed, and operations resumed on termination of a coal miners' strike.

Property: 150 acres, leasehold, including the Wallaroo Central mine, 7 acres, adjacent to the Wallaroo mine, shows schists and slates carrying several parallel veins including the famous Wallaroo Blue lode.

Development: by a 260' shaft, showing 2 lodes of 18' and 7' average width, carrying ore with about 6% copper and $8 gold per ton. Shaft being sunk to 350'.

Equipment: includes 250-h. p. steam plant with hoist, compressor, pump, and necessary mine buildings.

WALLAROO & MOONTA MINING & SMELTING CO.

Head office: Steamship Bldg., Currie St., Adelaide, S. A. Wallaroo mines and Moonta mines. Works office, Port Wallaroo, South Australia.

Sir J. L. Stirling
H. Lipson Hancock
Inc. 1889, in
ssued.

Financial Statement, years ending December 31:

Year	Revenue	Net profit -	Dividends	Surplus cash assets
1919*	.....	£53,265**	.....	£330,218
1918	£755,918	69,907	£80,000	381,144
1917	857,000	126,736	80,000	421,945
1916	852,670	231,505	120,000	250,851

* Half year. ** Loss after paying £29,083 for taxes.

Dividends: to end of 1918 totaled £2,614,254, of which £996,000 have been paid by the present company, the remainder by the old Moonta and Wallaroo companies.

Property: the famous Wallaroo mines at Kadina and the Moonta mines, at Moonta, S. A., which have yielded 723,172,800 lb. copper valued at 19,590,192 up to June 30, 1919.

R. L. Jack states that the Wallaroo lodes traverse schistose rocks of sedimentary origin, while the Moonta lodes are found in a mass of hard and brittle feldspar-porphyry. Minerals at Wallaroo are chalcopyrite, pyrite, pyrrhotite, with a little galena, blende, and gold; at Moonta, chalcopyrite, bornite, chalcocite, pyrite, a little gold and silver, etc. During the past 11 years copper content averaged 3.8%.

Development: at Wallaroo the main lode has been opened for a length of over 3,400′ and a depth of nearly 3,000′; at Moonta the main lode is opened for 3,840′ and to a depth of 2,500′. During 1918 new openings, including 464′ of diamond-drilling, totaled 4,455′, less than half of that in 1916. Total openings in the Wallaroo mines amount to over 39 miles, and in the Moonta mines to 40 miles. At Wallaroo, there are 2 main and 2 ventilating shafts. Owing to swelling ground, part of shafts is lined with concrete, which is also used in underground storage-bins.

Equipment: includes electric power plant, steam plants, complete mine and pumping plants, ore sorting and concentrating works, tailing leaching plant, smelter, sulphuric acid works, electrolytic refinery, etc.

Production: 1,758,038 tons of 15% ore (sorted) up to 1909, after which, 1918, 599,825 tons of dressed ore, yielding a total of 723,172,800 lb. copper.

Ore mined, tons	Dressed ore Smelted, tons	Copper, lb.	Gold, oz.	Silver, oz.	Sulphuric acid, tons	Price received per lb. copper	Cost per ton, copper
.....	30,567	3,295,040	.....	.....	.....	.....	.....
219,873	63,283	15,957,760	2,992	1,608	6,745	22.236 cts.	£93 (20.09c.)
194,907	57,731	16,988,480	2,970	1,675	6,190	24.90 cts.	.....
251,078	67,754	19,248,320	3,100	3,014	6,930	24.24 cts.	80 (17.22c.)

Half year.

Costs from 1909 to 1915 varied between 11 and 12 cents per lb., rising 17 to 20 cents in 1916-'18, due to high cost of wages, material, and About 2,000 men are employed.

1918	672,000	1,054

In 1917 total reserves in the Tasmania tract amounted to 6,557,000 c. yd. of gravel containing 4,405 tons of black tin; the Victorian area is nearly exhausted, but new properties have been acquired in New South Wales.

ELECTROLYTIC ZINC CO. OF AUSTRALASIA PROP., LTD.

Controlled by Amalgamated Zinc (De Bavay's), Ltd.; Broken Hill South Limited has a 20% interest.

Office: E. H. Shackell, 360 Collins St., Melbourne, Victoria.

H. W. Gepp, gen. mgr.; D. Meredith, asst. mgr.; Gilbert Rigg, cons engineer.

Inc. May 16, 1916, in Victoria. Cap., £1,000,000; shares £1 par; £250,000 issued.

Works have been erected at Risdon, near Hobart, in Tasmania for the electrolytic treatment of zinc concentrate from Broken Hill, and production of high-grade spelter. The first unit producing 15 tons daily is at work, but is being enlarged to 100 tons. Hydro-electric power is used at the plant. During 1918 the plant treated 20,979 tons of concentrate from Broken Hill, yielding 3,822 tons of spelter, valued at £152,880.

KING ISLAND SCHEELITE CO. TASMANIA

Office: John Brandon, sec., 31 Queen St., Melbourne, Victoria, Australia. Alex. Campbell, chairman of board of directors. J. V. Brown, mgr.

Inc. March, 1917, in Victoria. Cap., £50,000; shares 6/- par; all issued.

The half-year ended March 31, 1919, resulted in a profit of £11,280. A dividend absorbed £5,000, and £7,347 was carried forward. Assets exceed liabilities by £12,201.

Property: 153 acres at Grassy, King island, Bass Strait, between Victoria and Tasmania, Australia. The orebody consists of scheelite and garnet in a metamorphosed limestone and schist, and is somewhat similar to that near Bishop, Inyo county, Calif. The ore as mined averages 0.8 to 1.1% tungstic acid.

Development: by 300' tunnel, with a 190' back at the face. Mining is by open-cut work, using a 2½-yard steam-shovel. Reserves are estimated at 78,000 tons. Overburden is moved at cost of 1/11 (46c) per cubic yard.

Equipment: includes a 100-ton gravity concentrating plant, cottages, school, etc.

Production: for half-year ended March 31, 1919, was 12,602 tons of ore averaging 0.79% WO_3, yielding 111 tons of 69.96% concentrate. Recovery was 77.2%. Total output, 347 tons of concentrate. Costs total 13% [illegible] per ton.

MAGNET SILVER MINING CO. TASMANIA

Address: Magnet, Tasmania.

Property: a large silver-lead mine in northwestern part of Tasmania.

Geology: the Magnet lode is the hanging-wall portion of a [illegible] ltra-basic igneous rock which is known as websterite-porphyry. The [illegible] ms N. E.-S. W. and dips N. W. The lode is made up of a number [illegible] trallel bands of galena, alternating with siderite and dolomite, forming lode or belt that averages 40' in width with a maximum width of [illegible]

The mine workings have three parallel drifts on each level, in order to mine the three paystreaks or veins. The galena contains some blende. The precious metal content was high in the upper part of the lode—averaging $2 gold per ton, and 4 oz. of silver for each unit of lead. This zone of enrichment persisted downward to considerable depth, fading into leaner primary ore, with an increased amount of blende. Siderite, dolomite, and calcite compose the gangue, quartz being absent. The ore carries some of the rarer lead and antimony minerals.

Development. by 1,000′ main shaft with 14 levels. Shaft sinking was continued during 1919.

Equipment: 650-h. p. hydro-electric power plant, two 75-h. p. motor-driven centrifugal pumps of 12,500 gal. per hour capacity on No. 13 level, one 155-h. p. hoist, and concentrator. Over 150 men are employed.

Production: in 1918 mine produced 10,455 tons of ore yielding 2,089 tons of concentrate containing 1,686,726 lb. of lead, and 136,166 oz. silver, worth £49,436 gross, or £31,942 net.

MT. BISCHOFF EXTENDED TIN MINING CO. TASMANIA

Offices: John Ditchburn, sec., 17 Queen St., Melbourne, Victoria, Australia; and Box 4, Waratah, Tasmania.

Directors: H. W. C. Smith, chairman; A. T. Robb, D. McRorie, M. J. Sheehan, and J. H. Gillies. C. W. Gudgeon, supt.

Inc. April 20, 1905, in Tasmania and Victoria. **Cap.,** £16,000; shares 10/- par; all issued. Revenue in 1918 was £33,499, and profit £8,114.

Dividends: total 4/- per share, equal to £6,400.

Property: 433 acres at Waratah, Tasmania, containing a tin-bearing fissure vein cutting through slate, quartzite, and porphyry. Ore carries 1% of tin, and occurs in a 12″ streak.

Development: by 3 crosscut tunnels, 1,600, 1,200 and 720′ long, the lowest with a 1,000′ back. Total work aggregates 26,978′. Reserves total 31,000 tons of ore blocked out, plus 24,000 tons probable ore, assaying 0.96% tin.

Equipment: includes steam power plant, two 450 cu. ft. compressors, 3 centrifugal pumps, 1,900′ incline haulage tram, a 20-stamp mill, with 4 concentrating tables treating 100 tons of ore daily, with a recovery of 69-72% of the tin content.

Production:

Year	Ore, tons	Tin oxide,* ton
1918	14,690	165
1917	13,723	182

Ore reserves: 1,066,000 tons of ore, averaging 0.28% meta
ng in this wet region, in which the rainfall is 80 inches a yea
ut work.

Equipment: includes a compl plant, aerial t

railway, power-plant, concentrating mill, shops, sawmill, and reverberatory smelter at Launceston, which treats both company and custom ore.

Production: during the first half of 1919 the smelter handled 216 tons of concentrate yielding 291,200 lb. of tin; also 1,168 tons of custom ore yielding 1,814,400 lb. tin. Second half yielded 284,480 lb. metal. At the end of 1918 (48 years of operation) the total output was 75,553 tons of metallic tin, valued at £5,149,916.

Mt. Bischoff is one of the great tin mines of the world and its operations very profitable to its shareholders.

MOUNT LYELL MINING & RAILWAY CO., LTD. TASMANIA

Head office: Collins House, Melbourne, Australia. **London office:** Palmerston House, Old Broad St., London, E. C. 2, England. **Operating and works office:** Queenstown, Tasmania. **Mine office:** Gormanston, Tasmania. **Chemical works:** Melbourne, Victoria; Fremantle, Western Australia.

Bowes Kelly, chairman of board of directors; A. Williamson, chairman of London board; D. G. Lumsden, sec.; W. G. Moss, asst. sec., Melbourne office. Edwin Habben, London, sec. **Staff:** Robt. C. Sticht, gen. mgr.; Basil Sawyer, local supt.; Robt. P. Roberts, chief metallurgist; R. M. Murray, mine supt.; G. F. Jakins, asst. mine engr.; G. W. Wright, mech. engr.; H. J. Clarke, engr. for supplies; Thos W. Haynes, business mgr. of chemical works.

Inc. August 11, 1903, in Victoria, as a merger of a former company of the same name, with the North Mount Lyell Copper Co., Ltd. Cap. £1,300,000; shares £1 par; 1,289,195 issued. Annual meeting in December.

Financial Statement, years ending September 30:

Year	Revenue	Net profit	Dividends	Current assets	Current liabilities
1919	£678,305	£130,233	£80,575	£1,070,553	£387,9[illegible]
1918	916,086	247,229	161,149	1,066,545	442,9[illegible]
1917	1,003,938	268,611	209,494	1,176,182	681,3[illegible]
1916	943,706	239,002	209,494	.....	.....

Dividends: began in 1904. In recent years were: £64,460 in 1914; £145,034 in 1915; £209,494 in 1916; £209,494 in 1917; £161,149 in 1918. Total, £2,640,055. The old company paid dividends of $996,574, making total dividends, to end of 1918, £3,636,629.

Operations of the company include mining and smelting copper ore in Tasmania, mining pyrite in Tasmania, with the manufacture of acid and superphosphates in the States of Victoria and Western Australia, and the manufacture of coke in New South Wales. The operations of the company are of a high technical order.

Mt. Lyell controls the Mt. Read & Rosebery Company, which see.

Property: 2,124 acres, inclusive of 5 consolidated claims, leased for 21 and 30-year periods, and 565 acres of mill and smelter sites, in the Mt. Lyell district, with mineral lands in other parts of Tasmania, where prospecting and mining work is in progress. The principal mining operations at Gormanston, in the Mt. Lyell district, on the west coast of Tasmania, 14 miles in an air line from the port of Strahan, on Macquarie harbor.

The Mt. Lyell pyritic orebody was discovered 1883, but its value for copper was not then recognized. Other mines in the same district were unsuccessful, though the value of the North Mt. Lyell mine was recognized in 1897, but it was not profitable until it was merged in the present company in 1903. Owing to the silicious nature of the North Lyell ores neither concentration nor smelting was successful and the undertaking was a failure financially after the expenditure of about £800,000. The amalgamation of the 2 mines, effected 1903, gave a single magnificent property, the pyritic ore of the Mt. Lyell and the silicious ore of the North Mt. Lyell being natural smelting complements.

Geology: rocks of the Mt. Lyell mine are hydro-mica schist conglomerate quartzite and sandstone, with mineralization occurring along a [illegible] conglomerate contact that is a crush-zone formed by an overthr[illegible]

The orebody is a huge lenticular mass, measuring 270′ wide by 660′ long, on the 4th level, a vertical depth of 750′. This lens originally contained 6,500,000 long tons of ore, but about two-thirds of it has been extracted. The ore as now mined averages 0.54% copper, 1.96 oz. silver and 0.04 oz. gold per ton; it is a very clean pyrite, carrying but 6% silica, 2% alumina, and 2.5% barium sulphate, with a very little zinc and a trace of lead.

The copper content occurs as chalcopyrite and tetrahedrite, disseminated through the pyrite. On the southern end of the orebody there was an enrichment, consisting of chalcopyrite and bornite, with some chalcocite, in a silicious gangue, which commenced 350′ below the surface and persisted to within 150′ of the bottom of the lens. In about the center of the footwall side a second enrichment was found, commencing 100′ below the surface, and extending downward for 75′. In 1894 this high-grade ore streak yielded 850 tons of this ore, which was enriched by stromeyerite, and ran 21% copper, 1,010 oz. silver and 0.1 oz. gold per long ton. This bonanza oreshoot netted the old company £105,000.

Development: the orebody is opened by shafts with 9 levels, in which crosscuts and contour drifts encircle it. The upper levels are obliterated by an enormous open-cut, from which the ore is extracted in a series of benches with simultaneous removal of overlying or underlying country rock, the ultimate bottom of the quarry being the fifth level, 450′ below the surface. Only underground extraction is feasible below the fifth level. A vertical 400′ shaft sunk underground from the fifth level and an incline shaft open up the lower levels. The daily output from the mine is about 1,000 long tons of ore. Depleted stopes are filled with waste from the schist and conglomerate overburden. The removal of 2,000,000 cu. yd. of capping has exposed 1,200,000 cu. yd. of ore.

The South Lyell orebody, though much smaller and without outcrop, is similar to that of Mt. Lyell. Its top is 350′ below the surface and it is proven for 500′ downward, or 150′ below the lowest level in the Mt. Lyell mine; its further extension has not been explored. The orebody has been developed from the Mt. Lyell workings on each of the 5 lower levels, and is now worked as a part of that mine. South Lyell reserves total 400,000 tons.

Combined reserves in the Mt. Lyell and South Lyell mines are:

Year	Tons	Copper, %	Silver, oz.	Gold, oz.
1919	1,910,388	0.50	1.50	0.04
1918	2,028,747	0.49	1.48	0.04
1917	2,013,439	0.50	1.60	0.04
1916	1,815,505	0.53	1.96	0.04

The daily production during 1918 was 400 tons, compared with 700 tons previous years; South Lyell contributed 120 tons.

During the year ended Sept. 30, 1919, the mines produced 118,358 tons ore, principally from underground workings, the lower benches of the open-cut supplying only a minor amount.

Equipment: all machinery is electrically operated, with current from company's Lake Margaret hydro-electric power station, 7 miles distant. The incline shaft raises all ore from the mine by an electric hoist geared to a 200-h. p. induction motor, current 550 volts, having capacity of 1,000 tons in 8 hours. Self-dumping skips containing 3 tons of ore are used. Compressed air is supplied by 3 high-speed compressors with an aggregate capacity of 3,600 cu. ft. of air per minute at 90-lb. pressure, direct coupled to 300-h. p. synchroneous motors taking current at 3,000 volts. The air supply is diverted, when required, to the North Lyell mine by means of 8000′ pipe-line. Mine water is lifted by 3-throw electrically-driven pumps, each 100 g. p. m. There are 2 units in the station, though one is sufficient to handle the normal flow of water. The drill shop is equipped with [illegible] sharpeners.

North Mt. Lyell Mine.

Geology: the North Lyell ore occurs as large nuclei in pyritic disseminations in quartzite and to some extent in schist. Copper occurs as bornite and chalcopyrite with some chalcocite and occasional tetrahedrite, all associated with a small amount of pyrite. The ore is found at the contact between schist and conglomerate, these rocks being intensely silicified and pyritized on each side of the rather indistinct contact plane. This alteration usually ends abruptly against normal schist, but fades out into normal conglomerate. Very rich ore, carrying up to 60% copper, as bornite and chalcocite frequently occurs. Only one of many closely-associated orebodies—more properly called enrichments in the mineralized contact zone—outcropped at surface. This was a vertical pipe-like deposit, now worked out, which was 1,100′ long and of very irregular cross section. The other and more important bodies, are first seen on the 500′ level, where the dip of the conglomerate is reversed from west to east. The oreshoots follow the hanging wall, lengthening rapidly with depth, until at the 1,000′ level they form an almost continuous orebody some 1,500′ long, and varying in width up to 100′. The character remains unchanged down to 1,200′, the present lowest level, except perhaps that the amount of chalcocite is increasing. The North Lyell ore as broken, averages 6% copper and 1.33 oz. silver per long ton, with a trace of gold. The gangue averages 66% silica, 7% iron, and 7.5 to 11% alumina.

Development: the mine is worked by tunnels and shafts. The upper tunnel, or 200′ level, is the main entry. The lower tunnel is the 300′ level. There are 9 other levels, opened from the shaft at intervals of 75, 100, and 150′, the lowest being at the 1,200′ horizon. Filling for depleted stopes is brought from surface by means of 3 main waste pass systems, each comprising a trunk pass, and numerous branches.

Ore reserves:

Year	Tons	Copper, %	Silver, oz.	Gold, oz.
1919	960,242	6.0	1.33	0.005
1918	1,036,300	6.0	1.33	0.005
1917	997,900	6.0	1.33	0.005
1916	1,140,340	6.0	1.33	0.005

The North Lyell has excellent prospects of further orebodies, and the ore is not only persistent to the greatest depth yet reached, but is high in copper, and although too silicious for straight smelting, blends with the pyritic ore of the Mt. Lyell to make an ideal smelter charge. Part of the output is treated in a flotation plant, erected in 1916.

Equipment: the main North Lyell shaft has a 400-h. p. electric hoist good for 1,500′ depth; the other shafts have air-driven hoists, at 90-lb. pressure. The mine water is very corrosive, and is lifted by 3-throw plunger pumps of 100 g. p. m. capacity, in 2 lifts of 400′ each.

Output during the year ended Sept. 30, 1919, North Lyell produced 76,058 tons of ore averaging 7.55% copper, 1.94 oz. silver, and 0.01 oz. gold. This was much below the normal quantity.

The Lyell Tharsis mine acquired when supposedly worked out, contains a large quantity of low-grade chloritic schist, carrying disseminated chalcopyrite and pyrite; this ore lies on the hanging-wall side of the old silicious orebody.

The South Tharsis and Royal Tharsis mines are idle. They carry chalcopyrite and pyrite, disseminated sparingly, though of low average grade and not amenable to concentration, can be profitably mined and concentrated. The Lyell Comstock property, 339 acres, is contiguous to and contains the northern extension of its orebodies. It will supply a flotation plant. The ore is chalcopyritic, producing 50 tons daily, averaging 2.17% copper.

Reduction Works and Accessories.

A 1½-mile aerial tram can transport 750 tons ore daily from the Mt. Lyell mine to the smelter. There also is a 4,500′ incline surface tram, connecting with a ¾-mile 2′ gage steam railway to the smelter, also serving for the delivery of North Lyell ore, and for general traffic.

The company owns a 22-mile railway that connects the Queenstown reduction works with the seaport of Strahan, giving rail connections with all parts of the State. A second line connects Gormanston with Kelly basin, near the head of Macquarie harbor, 25 miles from Strahan.

Power-plant: a model hydro-electric station at Lake Margaret is connected with the reduction work by 6 miles of 2′ tramway.

Smelter: the reduction works are at Queenstown on the Queen river, 1½ and 2½ miles from the Mt. Lyell and North Lyell mines, respectively. The first permanently successful pyrite smelting ever accomplished was done here in 1896, under the direction of Robert Sticht.

The smelter has four 54 and 210″ blast-furnaces, 29¾′ high from tapping floor to feed floor, with box type cast-iron water-jackets, and of solid construction, suitable for pyrite smelting. The furnaces have special mechanical feeders and lifts, hydraulically operated.

The charge, averaging 2.5% copper, is brought to a matte containing 42% in one operation. Slags average 0.40% copper, 35 to 38% silica, 42 to 48% iron protoxide, 6.5 to 7.5% alumina, 1.5 to 2% barium oxide, and 4% calcium oxide.

The amount of coke used was as low as 1% or less, but is now from 3 to 5% as the charge contains less sulphur than formerly.

Flotation concentrate and flue-dust are either sintered or treated in a nodulizing plant.

The furnaces have a stationary oval, sheet steel, chrome-brick lined forehearth, 19′ long, cooled by water sprays. This is followed by the older rectangular, uncooled cast-iron forehearths, from the last of which the slag flows into a stream of water for granulation.

A new converter plant, erected in 1918, contains Great Falls upright type vessels, 10′ in diameter and 11′ 7″ high, electrically operated.

The final product, blister copper carrying 98.86% copper, 42.89 oz. silver, and 1.11 oz. gold per long ton, is refined by the Electrolytic Smelting & Refining Co. at Port Kembla, New South Wales.

The flotation plant is treating about 100 tons daily of 3.43% copper ore, recovering 90.41% of this metal and making a 10% concentrate.

Company owns acid and fertilizer plants, all having Herreshoff calciners, sulphur burners, and the ordinary chamber process for making sulphuric acid. Crude phosphate rock is secured from Ocean and Christmas Islands. The products of these plants include a variety of superphosphates and commercial fertilizers, the demand for which is rapidly increasing in Australia. The raw material for acid is furnished by the Tasmanian mine, Spanish pyrite, and sulphur from Japan and Italy. Unfortunately, it is commercially impracticable to utilize the sulphurous acid fumes from the Mt. Lyell smelter, because of the high freight rates, either in carrying the acid away from Mt. Lyell, or bringing in the crude phosphate rock, but experiments are under way with a view of recovering sulphur from pyrite. Coal-dust firing is used in the [illegible] distillation retorts. The superphosphate works are in Victoria [illegible]

The company employs [illegible] about 850 men at the mines, 150 on the rail[illegible]

Costs: average cost [illegible] from 1896 to 1903 was 22/10 ($5.48) [illegible] ending 1902 the total mining [illegible] figure does not reflects great cr[illegible]

The past few years show the following

Year	Mining	Smelting
1919.....	16/4 ($3.88)	17/3 ($4.10
1918.....	13/1 (3.14)	14/1 (3.38
1917.....	12/3 (2.94)	12/3 (2.94
1916.....	10/5 (2.50)	11/6 (2.76

Recent advances are due to increased t supplies.

Production: the present output is less t treated. The total production from 1896 to tons of ore, yielding 162,600 tons of copper, oz. of gold. Of this ore tonnage, Mt. Lye Lyell, 1,713,000; Lyell Comstock, 29,000; c ores, 169,829, and metal-bearing fluxes, 170,47

Recent returns are as under:

	Ore Smelte tons
1919.....	185,177
1918.....	240,947
1917.....	239,940
1916.....	158,663

The Mt. Lyell enterprise has had to c financial, mining and metallurgical probler success. A serious handicap is the heavy r hampering a mine worked by open cuts. F ore averages even lower in copper-contents t ful native copper mines of the Lake Superio tions, treated the lowest grade copper ore in ble, but highly creditable record passed to th is excellent, in all departments, and the suc an effective combination of financial ability

MT. READ & ROSEBERRY MINES, LTI

Subsidiary of Mt. Lyell M. & R. Co.

Offices: D. G. Lumsden, sec.; W. G. M Melbourne, Victoria, Australia; and E. Hal London, E. C. 2, England.

Bowes Kelly, chairman of board of dire E. R. Crucher, metallurgist.

Inc. Sept. 21, 1916, in Victoria. **Cap.** 156,503 issued. Debentures of £240,000 are Meanwhile, Mt. Lyell is advancing money October, 1919, being £167,987.

Property: 2,066 acres, being a consolida the Hercules Gold & Silver Mining Co., Tas rose Mining Co., near the town of Rosebery, mania. The Hercules North Blocks were a paid shares.

Development: in recent years consisted old workings were retimbered. The mines ar ply a mill. Openings are entirely by adits.

Ore reserves:

Mine	Tons	Z
Hercules	411,836	30
Rosebery	652,331	2
Total	1,064,167	1

The ore is complex, being a dense intimate mixture of blende, galena, and iron pyrite, and the former owners had great difficulty in treating and in marketing it. Trial lots were sent to Broken Hill for flotation, and to Great Falls, Montana, for electrolytic treatment.

Electric power will be obtained from the Mt. Lyell plant, and from a 15,000-h. p. plant to be erected at Lake Rolleston, near Zeehan. Late in 1919 it was propesed to erect electrolytic works at Zeehan, with an initial capacity of 50 tons of zinc daily.

Production: total prior to 1916 was 280,000 tons of ore for £354,000.

PIONEER TIN MINING CO. **TASMANIA**

Address: C. G. Ryan, Bradshaw's Creek, Tasmania.

Property: the Argonaut and Pioneer mines, working alluvial tin ground by blasting and hydraulicking. Company has an hydro-electric plant, which generates power at 0.05 pence (0.1 cent) per unit.

Profit for year ended June 30, 1917, was £44,893, of which £44,342 was distributed.

Production:

Year ended June 30—	Yardage	Cost per yard	Stream tin recovered tons	Per yard
Pioneer Mine.				
1917	894,700	4.487d.	471	1.179 lb.
1916	996,000	3.846d.	444	0.999 lb.
1900-1917	8,676,900	5.930d.	6,446	1.664 lb.
Argonaut Mine.

1916	101,000	8.061d.	47,748	1.051 lb.
1913-1917	531,400	5.850d.	213,300	0.899 lb.

TASMAN & CROWN LYELL EXTENDED MINES **TASMANIA**

Office: W. B. Arnold, sec., 39 Queen St., Melbourne, Victoria, Australia.

F. S. Fitchett, chairman of board of directors; D. W. Welch, supt.

Inc. in Victoria. **Cap.,** £150,000; shares 10/- par; all issued.

Revenue from ore sales for 9 months, ending June 1, 1919, was £1,334, and expenses £3,690.

Property: in Mt. Lyell district, Tasmania, contains lenticular contact deposit in schist, the ore being a sulphide that assays 30% lead, 20 oz. silver, 8% zinc, with some iron.

Development: by 1,800′ of tunnels, reaching depth of 240′. Reserves are 30,000 tons.

Equipment: includes a concentrating plant, to which flotation is to be added.

TASMANIA GOLD MINE, LTD. **TASMANIA**

After producing gold of a total value of £3,607,807 this property at Beaconsfield, near Launceston, is being cleaned up and the company liquidated.

VICTORIA

BENDIGO AMALGAMATED GOLDFIELDS **VICTORIA**

Office: Bendigo, Victoria, Australia. A. H. P. Moline, gen. mgr.

Financial Statement: during the year ended July 2, 1918, receipts were £61,907 ($777,000) from gold, other items making a total of £165,789 ($797,000). Wages absorbed £108,032 ($518,000). Including the previous balance of £58,841 ($283,000) expenditures used up the total revenue. In the first half of the 1918-'19 year there was a loss of £10,718, but the second half yielded a profit of £2,934.

Property: this company was organized in 1917 to consolidate about 40 producers in the center of the Bendigo Goldfield (which has yielded

over 18,000,000 oz. since 1850), explore them systematically by new openings and diamond-drilling, and equip them, if warranted, with modern plant. Operations are concentrated at a number of central points. Eight lines of "reef" are included in the area, ranging from 4,500 to 22,000 ft. in length, totaling 93,900 ft. Most of the shafts are over 2,000 ft. deep, some being over 3,000 ft.

Development: 22,555' of prospecting and development, and 3,737' of drilling (shot and diamond). Fifty faces were being followed. Continuous geologic examination is made, as the structure of the field is complex. A number of minor discoveries were made, but no high-grade shoots of any extent were found. Tributors are at work in certain parts of the mines.

Equipment: includes 30 hoists, 3 compressor stations capable of generating enough air for 150 to 180 drills, and stamp-mills of 566 tons daily capacity.

Production: in 1917-'18 the mills crushed a total of 132,351 tons for the company, yielding, with concentrates, gold worth £134,390 ($643,000); and for tributors 14,418 tons for £27,517 ($136,000). In 1918-'19 the mills treated 112,977 tons yielding 41,022 oz. gold. Ore treatment—stamps, amalgamation, and concentration—is not difficult, and tailings assay only from 24 to 56 cents per ton. Report gives considerable details of underground work and drilling. In August, 1919, the output was 5,097 oz. of gold from 8,554 tons of ore. The Constellation contributed 1,295 tons of 1.7 oz. ore.

This is a bold and probably final attempt to resuscitate the Beaufo field.

BRISEIS TIN & GENERAL MINING CO., LTD. VICTORIA

See same title under Tasmania for office, etc.

Property: 2,112 acres of alluvial ground on Yackandandah and Sandy Creeks, N. E. Victoria. Four dredges were operated, but the area is nearly worked out.

Production: 6,015 oz. gold in 1914; 5,125 oz. in 1915; 5,538 oz. in 191 3,650 oz. in 1917, and 1,054 oz. in 1918.

COCK'S PIONEER GOLD & TIN MINES VICTORIA

Office: E. H. Shackell, Collins House, Melbourne, Victoria, Australia. J. L. Wharton, chairman of board of directors. H. Falconer, mgr.; H. H. P. Moline, cons. eng.

Inc. May 14, 1913, in Victoria. **Cap.,** £150,000; shares £1 par; 100,0 issued.

Profit for half-year ended May 31, 1919, was £6,674. Current a exceeded liabilities by £19,466.

Dividends: 5% in 1915; nil in 1916; 15% in 1917, 1918 and 1919. T to date is £45,000.

Property: 752 acres of alluvial ground on Eldorado creek, 13 mile from Wangaratta, Victoria. Equipped with hydraulicking plant.

Production, in recent half-years:

Period	Yardage	Gold, oz.	Tenor
1919 (May 31)	462,000	3,786	[illegible]
1918 (Nov. 30)	389,000	3,981	33
1918 (May 31)	371,000	4,056	36
1917 (Nov. 30)	364,000	4,064	[illegible]

Costs are 8.7 pence (17.4 cents) per yard.

SOUTH NEW MOON GOLD MINING CO. VICTORIA

Office: G. H. Green, Hon. Sec., Eaglehawk, Bendigo, Victoria, Australia.

WESTERN AUSTRALIA

ASSOCIATED GOLD MINES OF WESTERN AUSTRALIA, LTD.

Office: R. Davidson, sec., 20 Copthall Ave., London, E. C., England. **Mine office:** Kalgoorlie, W. A.

Directors: E. Hooper, chairman; D. F. McAulay, gen. mgr.

Inc. Dec. 19, 1894, in England. **Cap.,** £500,000; shares £1 par; 495,364 issued. Company is largely interested in the Porcupine V. N. T. Gold Mines, Ltd., and owns the Keeley mine in Ontario.

Revenue for the year ended March 31, 1918, was £103,660, but there was an operating loss of £746, and debit balance is now £8,577. In 1919 the loss was £9,991.

Dividends: from 1898 to 1909 totaled 150%. In 1913 and 1914 2½% each; nothing since. The total is £703,833.

Property: 54 acres on the "Golden Mile," Kalgoorlie, W. A. It has produced a large amount of gold, especially from 1898 to 1904.

Development: by vertical shaft 2,200' and extensive workings. Reserves are difficult to estimate. Ore is a sulpho-telluride.

Equipment: complete mining, hoists, compressors, electric power, also 350-ton plant using crushers, ball-mills, roasters, pans, cyaniding equipment and filter-presses.

Production: for the year ended March 31, 1917, was £124,611 from 93,430 tons, compared with £103,579 from 81,528 tons in 1918; £101,510 from 71,603 tons in 1919. The total gold produced to September, 1919, was £4,167,752 from 2,035,121 tons of ore. Costs were $6.56 per ton.

BULLFINCH PROPRIETARY (1919), LTD. WESTERN AUSTRALIA

A reorganization of Bullfinch Proprietary (W. A.), Ltd.

Office: C. Hay, Worcester House, Walbrook, London, E. C. 4, England.

Sir G. P. Doolette, chairman of board of directors. A. L. Hay, mgr.

Inc. December, 1919, in Great Britain, as a reorganization of company formed in November, 1910.

Profit of old company in 1917 was £3,468, out of an income of £61,177. £3,000 was transferred to reserve for income tax. Assets exceeded liabilities by £11,000.

Dividends: 5% in 1913; 8¾% in 1914; 5% in 1915; 2½% in 1916; nothing since.

Property: 162 acres in the Bullfinch field, near Southern Cross; and leases at Wombola on Hampton Plains, 10 miles S. E. of the Celebration lease on Block 50, acquired late in 1919.

Development: at Bullfinch by shaft to 510'. Reserves were estimated to be 80,000 tons, averaging 21/- ($5.04) per ton.

Equipment: hoist, compressor, shops, 20 stamps, 2 tube-mills, cyanide plant.

Production, years ended December 31:

Year	Tonnage	Gold yield	Profit	Cost per ton
1918	58,609	£60,412	£4,638	17/- ($4.08)
1917	62,004	61,266	3,468	16/5 (3.94)
1916	71,360	76,863	8,300	15/7 (3.67)
1915	76,886	100,035	40,000	16/2 (3.81)
1914	74,398	109,478	49,000	18/8 (4.40)
1913	52,679	143,809	94,700	

The above table indicates the end of a short and profitable career of the mine at Bullfinch. Directors are optimistic concerning the new prop-

G. Sutherland, mgr.

Inc. July 28, 1909, in Great Britain. Cap., £75,000 in 45,000 pfce. and
30,000 ord. shares, £1 par, of which 26,100 pfd. and all ord. shares are issued
and fully paid.

Profit for first half of 1918 was £26,821, less £21,220 for depreciation
£5,610 was distributed. Current liabilities exceed assets by £28,419.

Dividends: from 1909 to 1918, a total of 108% on pfce. and 48% on
ord.; 10% on each in 1917-'18.

Property: 1,020 acres, near Northampton, W. A., including the Baddera
Narra Tarra, and Wheal Ellen lead mines.

Development: by 460' shaft at the Narra Tarra, with over 1,000' of work
along the lode. Ore is from 5 to 20' wide. Mine output is about 2,0
tons of ore per year. At the Baddera, the 455' main shaft opens up a lode
from 4 to 16' wide that averages 10.5% lead, but recent development is re
ported to be disappointing. The annual output is 21,000 tons of ore. The
Wheal Ellen shaft, 135' deep, is sunk on a lode 5' thick.

Equipment: includes a concentrator at the mines, and a smelter at
Fremantle, which when operating also handles custom ores. Output was
about 400 tons of lead monthly in 1918. Smelter was originally erected
to treat the rich gold ore from the Kalgoorlie mines.

Office: J. Gregory, 80 Bishopsgate, London, E. C. 2, England.
Sir G. P. Doolette, chairman of board of directors. Richard Hamilton, *gen. mgr.*
Inc. June 20, 1894, in England. **Cap.**, £175,000; shares 2s par; all sued.
Revenue during the year 1917 was £529,718, of which £257,641 was rofit. Dividends amounted to £262,500. Balance forward was £2,839, ompared with £5,488 brought forward from 1916. Net cash assets total bout £125,000. In 1918 the profit was £220,731, of which £196,875 was id in dividends.
Dividends: total 1,770% from 1895 to April, 1919, a total sum of 5,531,800.
Property: 85 acres on the "Golden Mile," Kalgoorlie, W. A.
Development: by vertical shafts, 2,844, 2,879, and 2,000′ deep, with ex-nsive workings. Ore is a sulpho-telluride. Reserves at end of 1918 were ıced at *345,719* tons, of 14½ dwt. ore. Deep exploration was not success-as the main lode passed into the adjacent Golden Horseshoe mine at ut 1,800′ in depth.
Equipment: complete and modern, with 600-ton dry crushing and roast-plant.
Production: to September, 1919, totals £11,904,695 from 3,518,805 tons re.

Year	Ore, tons	Gold yield
1918.....	152,196	£484,270
1917.....	182,265	529,718
1916.....	176,787	525,168
1915.....	195,524	583,367
1914.....	190,117	563,959

osts are around 32/- ($7.68) per ton.
his is one of the most regular gold producers and dividend-payers
, and is ably directed.

TON CELEBRATION (W. A.), LTD. W. A.
ecs: Lionel Robinson, Pinners Hall, Austin Friars, E. C. 2, London.
December, 1919, in Great Britain. **Cap.**, £250,000. Company ac-he Celebration lease from the Celebration Syndicate (which see), for cash and £100,000 in shares. The promoters got £25,000 in shares,
working capital.

CELEBRATION SYNDICATE **WESTERN AUSTRALIA**

Address: Richard Hamilton, Great Boulder Proprietary Mine, Kalgoorlie, W. A.

The Syndicate is composed of P. Fitzgerald, A. Francis, Richard Hamilton, John McDermott and J. W. Sutherland, mining engineers of Kalgoorlie.

Property: an option for £25,000 on a new mine on Block 50 of Hampton Properties, Ltd., which see for full description. Gold deposit was discovered about mid-1919, and by November the reserve was estimated at £1,000,000. The lease was acquired by Lionel Robinson, Clark & Co., who floated a company in London called Hampton Celebration (W. A.), Ltd. which see. The purchase price was £50,000 cash and £100,000 in shares.

EDNA MAY GOLD MINING CO. **WESTERN AUSTRALIA**

Address: M. T. Williams, gen. mgr., Westonia, near Southern Cross, Western Australia.

Inc. in Victoria. **Cap.,** 42,850 shares of 10s. each.

Dividends: regular of 1/- (25 cents) per month are paid, the total to April, 1919, being £325,660, equal to £7 12/- per share.

Property: a gold mine at Westonia, in the Southern Cross district, Western Australia.

Development: by vertical shaft to depth of 480'. Water has been very troublesome, and up to 60,000 gal. per hour has been pumped.

Equipment: steam power, pumps, hoist, compressor, shops, 10 stamps and cyanide plant.

Production: to September, 1919, was £728,003 from 191,493 tons of ore. The monthly tonnage was around 2,100 of 56/- ($13.40) value. Costs were 36/- ($8.64) per ton, mining being 24/- ($5.75).

In October, 1919, operations ceased, owing to exhaustion of reserves.

FREMANTLE TRADING CO., LTD. **WESTERN AUSTRALIA**

Office: E. H. Woolcott, Salisbury House, London, E. C. 2, England.

Directors: E. P. Jones, chairman; A. E. Lund, and J. A. Morris. W. G. Sutherland, mgr.

Inc. July 28, 1909, in Great Britain. **Cap.,** £75,000 in 45,000 pfd. and 30,000 ord. shares, £1 par, of which 26,100 pfd. and all ord. shares are issued and fully paid.

Profit for first half of 1918 was £26,821, less £21,220 for depreciation. £5,610 was distributed. Current liabilities exceed assets by £28,419.

Dividends: from 1909 to 1918, a total of 108% on pfd. and 48% on ord.; 10% on each in 1917-'18.

Property: 1,020 acres, near Northampton, W. A., including the Baddera, Narra Tarra, and Wheal Ellen lead mines.

Development: by 460' shaft at the Narra Tarra, with over 1,000' of work along the lode. Ore is from 5 to 20' wide. Mine output is about 2500 tons of ore per year. At the Baddera, the 455' main shaft opens up a lode from 4 to 16' wide that averages 10.5% lead, but recent development is reported to be disappointing. The annual output is 21,000 tons of ore. The Wheal Ellen shaft, 135' deep, is sunk on a lode 5' thick.

Equipment: includes a concentrator at the mines, and a smelter at Fremantle, which when operating also handles custom ores. Output was about 400 tons of lead monthly in 1918. Smelter was originally erected to treat the rich gold ore from the Kalgoorlie mines.

GOLDEN HORSE SHOE ESTATES CO., LTD. W. A.

Office: A. Swanne, Salisbury House, London, E. C. 2, England.

Sir J. S. Purcell, chairman of board of directors. J. W. Sutherland, gen. mgr.; V. H. R. Murray, mine supt.; C. E. Blackett, metallurgist.

Inc. Feb. 28, 1899, in England. **Cap.,** £1,500,000; shares £5 par, issued. **Debentures:** £5,400 of 6% outstanding.

Profit in 1917 was £100,797, of which dividends absorbed £94,303; £6,494 was carried forward. Current assets exceeded liabilities by £2,000. In 1918 the revenue was £332,620 and dividends £37,500.

Dividends: since 1899 total £10 15/- per share.

Property: 24 acres of producing ground and 85 acres of other areas on the Golden Mile, Kalgoorlie, W. A.

Development: by 2,242 and 3,140′ vertical shafts and extensive workings. Reserves at end of 1918 were 733,102 tons of 9¼ dwt. ore.

Equipment: is complete and modern, including compressors, hoists, crushing plants, a 170-stamp mill with 5 tube-mills, concentrators and cyanide plants.

Production: total to September, 1919, was £11,033,686 from 4,594,698 tons of ore. The past 3 years results were as under:

Year	Tons	Gold
1918	146,664	£332,620
1917	176,028	411,546
1916	162,316	345,529

Costs total $11 per ton.

GREAT BOULDER PERSEVERANCE G. MNG. CO., LTD. W. A.

Mine being worked by tributers. Output to date is £6,737,614 from 466,930 tons, and £1,531,250 paid in dividends. Company is being liquidated. See Vol. XIII.

GREAT BOULDER PROPRIETARY GOLD MINES, LTD. W. A.

Office: J. Gregory, 80 Bishopsgate, London, E. C. 2, England.

Sir G. P. Doolette, chairman of board of directors. Richard Hamilton, gen. mgr.

Inc. June 20, 1894, in England. **Cap.,** £175,000; shares 2s par; all issued.

Revenue during the year 1917 was £529,718, of which £257,641 was profit. Dividends amounted to £262,500. Balance forward was £2,839, compared with £5,488 brought forward from 1916. Net cash assets total about £125,000. In 1918 the profit was £220,731, of which £196,875 was paid in dividends.

Dividends: total 1,770% from 1895 to April, 1919, a total sum of £5,531,800.

Property: 85 acres on the "Golden Mile," Kalgoorlie, W. A.

Development: by vertical shafts, 2,844, 2,879, and 2,000′ deep, with extensive workings. Ore is a sulpho-telluride. Reserves at end of 1918 were placed at 345,719 tons, of 14½ dwt. ore. Deep exploration was not successful, as the main lode passed into the adjacent Golden Horseshoe mine at about 1,800′ in depth.

Equipment: complete and modern, with 600-ton dry crushing and [illegible] plant.

Production: to September, 1919, totals £11,904,695 from [illegible] ore.

Year	Ore, tons
1918	152,196
1917	182,265
1916	176,787
1915	195,524
1914	190,117

Costs are around 32/- ($7.68) per ton.

This is one of the most regular gold producers and [illegible]wn, and is ably directed.

MPTON CELEBRATION (W. A.), LTD.

Office: Lionel Robinson, Pinners Hall, Austin Friars, [illegible]gland.

Inc. December, 1919, in Great Britain. **Cap.** £250,000 [illegible]ed the Celebration lease from the Celebration Syndicate [illegible]0,000 cash and £100,000 in shares. The promoters got £ £75,000 is available for working capital.

Property: the Celebration lease on Block 50 of the Hampton Properties, Ltd., 20 miles south of Kalgoorlie.

By a new system of prospecting, called 'loaming', by which the gold in the soil and surficial material is traced to its source a gold vein was uncovered in June, 1919, which proved to be 20′ wide. Samples for a length of 200′, averaged £5 ($24) per ton. A shaft 100′ deep in November, proved that the value persisted downward. The lode is traceable for 1,400′ on the surface, and estimates based on a length of 1,400′, a width of 20′, a depth of 100′, and value of £5 per ton, at 20 cu. ft. per ton for this class of ore, give a total value of £700,000.

Geologic conditions at the Celebration are said to prove it to be a continuation of "The Golden Mile" of Kalgoorlie, which has yielded over $360,000,000 in gold. If the lode is in quartz-dolerite it should prove persistently rich, but if it is encased in calc-schist the outlook is not so good, judged by past experience at Kalgoorlie. This new mine and its geologic features have excited much interest in Australian mining circles; and the general feeling is that a big mine is likely to be developed.

HAMPTON GOLD MINING AREAS, LTD. WESTERN AUSTRALIA

Office: 4 London Wall Bldgs., London, E. C. 2, England.

Inc. March, 1920, in England. **Cap.,** £500,000; £1 par; all issued.

Property: 189,122 acres on Hampton Plains, 29 miles S. of Kalgoorlie, W. A. Block 48 adjoins Block 50 of Hampton Celebration, in which a good mine has recently been developed. Ground is considered promising.

HAMPTON PROPERTIES, LIMITED WESTERN AUSTRALIA

Offices: C. P. A. Williams, sec., 2 Tokenhouse Bldgs., London, E. C., England; and A. Francis, Macdonald St., Kalgoorlie, Western Australia.

W. A. Bevan, chairman of board of directors. E. H. B. Macartney surveyor.

Inc. Dec. 31, 1898, in Great Britain. **Cap.,** £500,000; £1 par; increased from £400,000 in October, 1919. Shares rose quickly from a few pence to over £2 11/- ($12.24 normal exchange), late in 1919.

Property: 27,000 acres (freehold) on Hampton plains, 20 miles south of Kalgoorlie, Western Australia.

Gold mining has been done from time to time on this tract, there having been several small stamp-mills operated at scattered points. In mid-1919, the deposit described under Hampton Celebration, was found, attracting considerable attention and causing a rush to the area.

HAMPTON URUGUAY, LIMITED WESTERN AUSTRALIA

Succeeded in 1920 by Hampton Gold Mining Areas, Ltd., which see.

IVANHOE GOLD CORPORATION, LTD. WESTERN AUSTRALIA

Head office: C. Lloyd, London Wall Bldgs., London, E. C. 2, England; J. McDermott, gen. mgr.; G. D. Murray, met.; James Drage, mech. eng.

Registered: Oct. 14, 1897, in London. **Cap.,** £1,000,000; shares £5 par.

Profit in 1917 was £106,092. Dividends amounted to £105,000. £7,8[illegible] was carried forward. Reserve fund is £140,000. In 1918 the profit was £79,418, of which £75,000 was distributed.

Dividends: from 1898 to March, 1919, a total of £3,733,750. Highest year was 1899 with 25/- per share; in 1918, 7/6 per share was paid.

Property: 95 acres in the "Golden Mile," Kalgoorlie, W. A., including the best producing mine of the district. Ore is silicious sulphide, 4 to [illegible] wide, 4 veins averaging 12′ being worked.

Development: by a 3,620′ main vertical shaft with levels opened at this depth. Exploration by drilling and sinking is kept well ahead of extraction. Ore reserves are estimated at 1,000,200 tons, averaging [illegible] ($8.16) per ton.

Equipment: includes steam and electric power, hoists, compressors, drills, shops, foundry, a 100-stamp concentrator with sand, slime, and concentrate cyanidation plants, capable of treating 700 tons daily.

Production: to September, 1919, totaled £9,678,514 derived from 4,[illegible]041 tons of ore. Recent yields have been:

Year	Tons	Gold	Cost per ton
1918	208,428	£345,586	.....
1917	233,719	391,429	22/10 ($5.38)
1916	238,514	381,984	21/ 9 (5.22)

Property has a profitable future for several years, and is managed with excellent technical ability.

KALGURLI GOLD MINES, LTD. **WESTERN AUSTRALIA**

Office: F. H. Carlton, 7 Crosby Square, London, E. C. 3, England.

C. S. Stafford, chairman of board of directors. F. G. Brinsden, gen. mgr. R. Black, cons. eng.

Inc. June 14, 1895, in England. **Cap.,** £120,000; shares £1 par; all issued.

Profit for year ended July 31, 1918, was £7,505, against £41,224 in 1917, and £45,947 in 1916. Dividends absorbed £12,000, reducing the reserve fund by £4,500. Cash assets exceed liabilities by £90,000.

Dividends: total £1,639,500 to April, 1919.

Property: 18 acres on the "Golden Mile," Kalgoorlie, W. A.

Development: by 1,900′ shaft. The lode is of peculiar shape, being a "chimney" which is wider than it is long, and has no defined walls, as values fade out; below the 1,800′ level the vein passed from quartz-diorite into calc-schist in which the ore became low-grade. Diamond drilling has thus far failed to reveal any other shoots of sulpho-telluride ore.

Equipment: complete with 350-ton dry crushing and a roasting plant.

Production to September, 1919, totaled £4,414,747 from 1,815,706 tons of ore. Recent yields have been:

	1918	1917	1916	1915
Ore, tons	73,022	103,210	119,180	125,990
Gold yield	£107,333	£179,837	£194,795	£249,878

Costs are around $6 a ton.

In company's last report it was stated that future operations would be unprofitable unless custom ore was received for treatment.

LAKE VIEW & OROYA EXPLORATION, LTD. **W. A.**

Office: C. Lloyd and G. G. Hay, secs., 1 London Wall Bldgs., London, E. C. 2, England.

F. A. Govett, chairman and managing director.

Inc. June 9, 1911, as the Lake View Consols., Ltd., and is a reconstruction of company of same name. **Cap.,** £450,000; shares 10s. par; 721,909 issued. Company announces its business to be the exploration and financing of mines; it holds large interests in Babilonia Gold Mines in Nicaragua; the Burma Corporation in Burma; General Petroleum in California; Granville Mining in the Yukon; Lake View & Star in Western Australia; Leonesa mine in Nicaragua; Mt. Morgan in Queensland; Natomas Co. in California; Nechi Mines in Colombia; Yuanmi Gold Mines in Western Australia; and Zinc Corporation in New South Wales.

Profit for year ended June 30, 1918, was £20,960. Property is valued at £424,740, and reserve is £100,000.

Dividends: 5% in 1912; 10% in 1913, 1914, and 1915; 5% in 1916; nothing since.

SONS OF GWALIA, LTD. **WESTERN AUSTRALIA**

Office: E. Pears, sec., 20 Copthall Ave., London, E. C. 2, England. **Mine office:** Leonora, Western Australia.

D. Richards, chairman and managing director. Bewick, Moreing & Co., gen. mgrs. J. Adam, supt.

Inc. Jan. 7, 1898, in England. **Cap.,** £350,000; shares £1 par; 325,000 issued.

In 1916 the net profit was £39,890, of which £40,625 was paid in dividends; £740 was carried forward. In 1917 the profit was £27,433. Divi-

Production: 325 tons of black tin in 1917, 328 tons in 1918, and 230 tons in 1919. Costs were £126 and average price received was £213 per ton.

JOS TIN AREA (NIGERIA), LTD. NIGERIA

Office: W. S. Griffin, 1 Giltspur St., London, E. C. 1, England.

J. G. M. Bronnjohn, chairman of board of directors; A. S. Williams, mgr.

Inc. May 3, 1910, in Great Britain. **Cap.,** £110,000; 5s. par; 300,000 issued. Profit was £12,978 in 1917. A dividend absorbed £7,500. In 1918 the profit was £15,268, of which £9,375 was distributed.

Dividends: 50% from 1912 to 1918.

Property: 1,412 acres of tin lands in the Jos and Ropp districts, Northern Nigeria, equipped with a bucket-dredge.

Production: 322 tons of black tin in 1917, and 267 tons in 1918.

LOWER BISICHI (NIGERIA) TIN MINES, LTD. NIGERIA

Office: W. S. Griffin, sec., 1 Giltspur St., London, E. C. 1, England.

H. T. Miller, chairman of board of directors; A. S. Williams, gen. mgr.; M. A. Bruce, mine mgr.

Inc. April 29, 1912, in Great Britain. **Cap.,** £40,000; 5s. par; 81,000 issued.

In 1917 the profit was £1,142, and £5,014 in 1918.

Dividends: 12½% for 1917, paid in November, 1918.

Property: 759 acres in Bauchi province, Northern Nigeria, equipped with hydraulic plant.

Production: 72 tons of black tin in 1916; 64 tons in 1917; and 87 tons in 1918.

NARAGUTA (NIGERIA) TIN MINES, LTD. NIGERIA

Office: A. J. Culley, Friars House, 39 New Broad St., London, E. C. 2, England.

F. N. Best, chairman of board of directors; F. O'D. Bourke, gen. mgr.; C. G. Lush, cons. engr.

Inc. January, 1910, in Great Britain. **Cap.,** £175,000; £1 par; all issued.

Profit for 1918 was £42,034, of which £26,250 was distributed. Balance forward was £11,401. Reserves are £20,000. **Dividends:** 70% in December, 1918.

Property: 19 sq. miles in Bauchi province, Northern Nigeria, equipped with hydraulic plant.

Production: 520 tons in 1916; 517 tons in 1917, and 430 tons in 1918. Costs were £133 per ton in 1917.

NIGERIAN TIN CORPORATION, LTD. NIGERIA

Office: E. J. Andrews, sec., Capel House, 54 New Broad St., London, E. C. 2, England.

O. Wethered, chairman of board of directors; R. T. Hancock, mgr.

Inc. Oct. 14, 1909, in Great Britain. **Cap.,** £100,000; £1 par; all issued.

Profit during 15 months ended March 31, 1918, was £12,340, of which £9,964 was distributed and £7,116 carried forward. **Dividends:** 20% in October, 1918.

Property: 2,424 acres and river leases in Northern Nigeria. Company has large interests in other properties in Nigeria, also in Cornwall.

Production: 161 tons in 1917 and 87 tons in 1918.

OFFIN RIVER GOLD ESTATES, LTD.

Office: W. N. Humphrey, Coventry House, South Place, London, E. C. 2, England.

F. N. Best, chairman of board of directors; T. J. Cullen, mgr.

Inc. Dec. 27, 1900, in Great Britain. **Cap.,** £300,000; 7% pfd. and 255,000 ord. shares of £1 par; of which 30,000 and 255,000 respectively are issued. Debentures: £22,850 of 7% authorized; £20,000 issued. No profits are being made or dividends paid.

Property: concession for gold, covering 100 [illegible] along the Offin river, where one of the comp[illegible]

several hundred acres of tin-bearing land in Northern Nigeria, from which the tin is recovered by sluicing and calabashing. Company also owns rubber plantations.

Production years ending December 31:

Year	Yield	tons	Year	Yield	tons
1918.....	£408	119	1916.....	14,253	164
1917.....	8,464	165	1915.....	18,610	29

Evidently the gold property is about worked out.

RAYFIELD (NIGERIA) TIN FIELDS, LTD. **NIGERIA**

Office: G. E. Bance, Capel, House, New Broad St., London, E. C. 2, England.

O. Wethered, chairman of board of directors; J. M. Iles, gen. mgr.

Inc. May 9, 1912, in Great Britain. **Cap.**, £500,007; £1 par; increased October, 1919, from £400,007; all issued. Also £17,175 of 6% debenture stock outstanding.

Profit in 1917 was £42,911, of which £20,000 was paid in dividends. Balance forward was £36,626. Cash assets exceeded liabilities by £64,000. Profit in 1918 was £36,917.

Dividends: 25% to December, 1918.

Property: about 5,500 acres in Bauchi province, Northern Nigeria, equipped for hydraulicking.

Production: 843 tons of black tin in 1916 (15 months), 679 in 1917, and 679 tons in 1918.

ROPP TIN, LTD. **NIGERIA**

Office: H. St. J. Hodges, 20 Copthall Ave., London, E. C. 2, England.

E. Davis, chairman of board of directors; J. Daniel, mgr.

Inc. Dec. 14, 1911, in Great Britain. **Cap.**, £68,750 par 5s; 301,726 issued; also £11,940 6% first-mortgage debentures outstanding, £15,000 5% second-mortgage debentures, and £8,000 6% loan.

In 1917 the profit was £36,099, plus £13,134 balance from 1916. Dividends absorbed £37,156. Balance forward was £12,077. Profit in 1918 was £52,150.

Dividends: total 260% from 1913 to 1918, inclusive.

Property: 61 sq. miles in Bauchi province, Northern Nigeria, worked by two 2¼-cu. ft. dredges, hydraulic plant, and natives with calabashes.

Production: 670 tons of black tin in 1917, and 837 tons in 1918.

RUKUBA (NIGERIA) TIN MINING CO., LTD. **NIGERIA**

Office: H. Dobbin, Friars House, 39 New Broad St., London, E. C. 2, England.

Inc. Oct. 7, 1909, in Great Britain. **Cap.,** £100,000; £1 par; 70,00[illegible] issued.

Profit for year ended March 31, 1918, was £12,199, £8,425 was carried forward. Profit in 1919 was £2,956.

Dividends: 15% in 1918.

Property: 12 miles in Northern Nigeria, equipped with hydraulic plant.

Production: 113 tons of black tin in 1917, 108 tons in 1918, and 118 tons in 1919.

PORTUGUESE EAST AFRICA

ANDRADA MINES, LTD. PORTUGUESE EAST AFRICA

Office: 286 Salisbury House, London, E. C. 2, England.

Directors: J. C. P. d'Andrada, J. L. Bergson, H. Bousquet, R. Burnay and F. G. C. E. Robellaz (managing).

Inc. Sept. 11, 1911, in Great Britain. **Cap.,** £250,000 in 235,000 ord. shares of £1 and 150,000 dfd. shares of 2s. par, all issued.

Last accounts show a total profit of £22,111 for 3 years ended Dec. 31, 1915.

Property: 614 lode and 75 alluvial claims in Manica district. The Bonganza lode mine is closed, but a dredge operating on the placer ground recovered 19,698 oz. of gold from February, 1914, to December, 1915, making a profit of £45,234.

MOZAMBIQUE CO. (COMPANHIA DE MOCAMBIQUE)

Office: S. H. Sharpe, act. sec., Thames House, Queen St. Place, London E. C., England. **Head office:** 10 Largo da Biblioteca Publica, Lisbon, Portugal.

Inc. March 8, 1888, given Royal Charter, Feb. 11, 1891, and reconstituted May 5, 1892. **Cap.,** £1,500,000; £1 par; issued and paid 1,399,998. A 5% dividend paid in 1911.

The company, which possesses sovereign rights over an area of 65,000 sq. miles, is also the owner of all unalienated land and mining rights in this area, which embraces the central and richest portion of Portuguese East Africa.

The Manicaland goldfield or mining district lies within a radius of 50 miles around Macequece. Geologically speaking, the field is part of the Umtali mining field of Rhodesia. It is a belt of schistose rocks traversed by gold-bearing quartz veins, the gold also being occasionally found in the schist wall rock. Dredging for alluvial gold is being successfully carried on.

Copper ores also exist in the district, the Edmundian mine being in this locality.

Company issues for £1 a mining license that gives the holder a right to prospect for 12 months. Each license gives the right to peg-off [illegible] a block of 10 mineral claims, each 100 m. square for lode and placer deposits and 500 by 1,000 meters for non-metallic minerals.

Claim rents, corresponding to claim licenses, in Rhodesia and the Transvaal, are 10 shillings per claim, in the second year, increasing 5 yearly to a maximum of £3. Rent for a non-metallic claim is £5.11 in second year, doubling each year thereafter up to £55.11 per claim annually. Royalties payable to Companhia de Mocambique for gold are on a sliding scale on the gross output, in the case of monthly outputs up to 500 oz. of fine gold, and vary from 1 to 4%. Above 800 oz. gold output the royalty is 10% of the net profits. For all other metals and non-metallic substances the royalty is 10% of the net profit.

RHODESIA

ANTELOPE GOLD MINE (RHODESIA), LTD.

Office: 8 Old Jewry, London, E. C. 2, England.

Directors: J. C. Prinsep, chairman of board of directors; H. A. Piper, cons. engr.

Inc. Nov. 25, 1908, in England. **Cap.,** £400,000; shares 5s. par; 1,393,128 issued.

Revenue in 1918 was £79,565, of which £1,389 was profit.

Property: 170 claims, 1½ acres each, 60 miles S. of Bulawayo, Rhodesia. Reserves were estimated in September, 1916, at 110,987 tons, assaying $10.10 per ton, reduced to 76,000 tons of $9.90 ore, due to shortage of labor.

Development: by vertical and incline shaft 1,400' deep. The 14th level showed the orebody to be of undiminished size and value, but a dike, encountered in mid-1919, cut off the ore.

Equipment: complete for mining, also 150-ton mill using 2 Krupp ball-mills, 4 furnaces, tube-mill, 12 pans, and 2 filter-presses.

Production: Year	Ore treated, tons	Gold, oz.	Average value per ton
1918	39,830	18,224	.....
1917	46,334	22,096	35/ 6 ($8.46)
1916	45,927	21,580	34/10 (8.26)

BRITISH SOUTH AFRICA CO., THE — RHODESIA

Head Office: 2 London Wall Bldgs., London, E. C., England. A. P. Fillar, act. sec. **Administrator of Southern Rhodesia:** Sir D. Chaplin, Salisbury. **Administrator of Northern Rhodesia:** Sir L. A. Wallace, Livingstone. **Res. Mining eng.:** A. H. Ackermann, Bulawayo.

Board of Directors: R. Maguire, P. Lyttelton Gell, Hon. Sir L. Michell, Sir H. Birchenough, Marquess of Winchester; Otto Beit, H. W. Fox, M. P.; Baron E. B. d'Erlanger, D. O. Malcolm, Br.-Gen. E. Baring, Duke of Abercorn.

Inc. Oct. 29, 1889. Present authorized capital is £9,000,000 in 9,000,000 shares of £1 each, having been increased at intervals from £1,000,000 in 1890; 8,937,533 shares are issued and fully paid. Bonds, £1,250,000 5% mortgage debentures.

Lands: about 400,000 sq. miles. The company acquired: (a) from the Central Search Association, Ltd., the Rudd-Rhodes Concession, consisting of the mining rights over the territory of the King of Matebeleland; the Central Search Association being entitled to one-moiety of the net receipts, which right was subsequently merged in the United Concessions., Ltd., and capitalized in 1894 by the issue of 1,000,000 fully-paid shares of the company; (b) mining rights over the territory of the chiefs Khama and Ingunhana; (c) administrative power over the whole British sphere north of the Zambesi and west of Nyasaland; (d) rights of the African Lakes Co. (acquired in 1894); (e) and also through the Victoria Falls Power Co., in which this company holds a large interest, the right to develop electrical energy at Victoria Falls.

The company adopted the name "Rhodesia" to describe all the territories under its administration; the portion south of the Zambesi being known as Southern Rhodesia. Company controls Bwana M'Kubwa and other important South African copper properties by ownership of stock interest. Company is a gigantic corporation and is the owner of mineral rights throughout its territory.

BWANA M'KUBWA COPPER MINING CO., LTD. — RHODESIA

Office: sec., 19 St. Swithin's Lane, London, E. C. 4, England.

Board of directors.

Inc. March 16, 1910, in England. **Cap.,** £600,000; 10s. par; 925,053 issued. On June 30, 1918, company had an excess of £41,595 over liabilities.

Property: 47,097 acres, containing the Bwana M'Kubwa mine, 1,450 miles by rail from Beira, Portuguese East Africa, in northern Rhodesia. Reserves are estimated at 23,000 tons of 10% copper ore, 3,000,000 tons of 4.5%, and 1,200,000 tons of low-grade material. A 100-ton concentrator using Minerals Separation flotation is in operation.

Production: during the year ended June 30, 1918, the mill treated 16,736 tons of ore, yielding 1,419 tons of 40% copper concentrates.

Mine has been a long time reaching the stage of profitable operation, but from now on should yield a satisfactory return despite its large capitalization.

CAM & MOTOR GOLD MINING CO., LTD. RHODESIA

Office: Palmerston House, London, E. C. 2, England; and Salisbury, Rhodesia.

J. Weil, chairman of board of directors; C. B. Kingston, cons. eng.

Inc. Sept. 3, 1910, in England. **Cap.,** £617,500; £1 par; 599,043 issued. Reorganized in June, 1919, reducing the shares to a par of 7/6 each.

Revenue for year ended June 30, 1918, was £210,630, but expenditure exceeded this by £11,878. Debit balance, £20,709. Current assets total £89,829, and liabilities, £121,461, exclusive of the £50,000 debentures due in December, 1919.

Property: 286 claims, 429 acres, in the Hartley district of Southern Rhodesia.

Development: by 1,100′ steel-lined main shaft at the Motor mine. During 1917-18, 4,338′ of new work was done.

Reserves at the Cam mine, 107,300 tons, worth 39/2 ($9.38) per ton; at Motor mine, 384,700 of 37/3 ($8.91) ore; at Cam Good Shepherd mine, 107,300 tons of $9.38 ore.

Equipment: steam power, hoists, compressors, shops, and 500-ton mill employing 6 Krupp ball-mills, 6 Edwards roasting furnaces, tube-mills and cyanidation plant. As ore contains antimony and arsenic, its treatment is difficult.

Production: 142,766 tons of ore, yielding £208,772 in 1917-'18. In 1918, 162,922 tons yielded £219,374, at a cost of $6.25 per ton, compared with $6.99 per ton in 1917-18.

This is a group of 3 good gold mines, containing reserves valued at £940,000. Owing to expensive development and plant-alterations profits have been small, but it is now proposed to increase the output to 700 tons daily if additional development warrants it. Company reports are admirable for their detail.

ELDORADO BANKET GOLD MINING CO., LTD., THE

Office: 8 Old Jewry, London, E. C. 2, England.

H. L. Sapte, chairman of board of directors. Local directors (Rhodesia): T. G. McDonald, G. Mitchell. The Gold Fields Rhodesian Development Co., Ltd., managers at Bulawayo and Salisbury, Rhodesia. C. E. Parsons, sec.

Inc. Nov. 27, 1906, in Great Britain. **Cap.,** £300,000; £1 par; all issued.

Profit: for year ended March 31, 1918, was £51,297, plus £6,000 balance from previous year. Dividends absorbed £45,000, and £12,795 was carried forward. Cash assets totaled £46,941, and liabilities, £7,572.

Dividends: 227% from 1909 to January, 1919, 15% being paid in 1918.

Property: 161 claims (1½ acres each) in Lomagundi district of Rhodesia.

Development: to depth of 2,500′ on the auxiliary shaft below the 16th level.

Reserves were 31,700 tons of 27.6 dwt. ore. Pillar pointing, the mine is rapidly being worked out.

Equipment: complete mining plant, including pans, and a cyanide plant.

Production: 48,629 tons yielding £53,000 in 1918; 41,948 tons during 9 months ended March 31, 1919.

FALCON MINES, LTD.

Office: Gold Fields Rhodesian Development Co., London, E. C. 2, England.

J. C. Prinsep, chairman of board of directors; H. T. Brett, gen. mgr.; E. Parsons, cons. engr.

Inc. Feb. 26, 1910. **Cap.**, £600,000; £1 par; 400,000 shares issued and lly paid. **Cap.** originally £400,000, increased August, 1912, to provide for nd redemption. Bonds, £250,000 authorized, 6%; £158,078 outstanding.

In 1917-'18 profit was £75,310, plus £106,894 balance from previous year. 1918-'19 the profit was £56,320, and credit balance carried forward was 59,907.

Dividends: 20% in 1916-1917; none since.

Property: comprises 380 claims, 578 acres farm lands near the Falcon ne; also the Athens mine, acquired from the Falcon (Rhodesia) Development ., Ltd., by Rhodesia Cons. Ltd.

The orebodies are large, increasing from 17′ in width on the 3rd level to 50′ the 9th level. Metal contents also increase from 2.45% copper and $3.68 gold r ton on the 3rd to 2.3% copper and 6 dwt. gold on the 9th level.

Development: by 1,100′ shaft and over 6 miles of workings. On No. level the orebody is 180′ long, 70′ less than on No. 9, but the width and value e similar. Reserves amount to 800,000 tons, averaging $5.40 gold and 2% copper. Development work on No. 11 level proved disappointing 1919.

Equipment: crushing plant, equipped with 3 jaw-breakers and 4 trom-els, separating the fine and coarse ores. Sorted ore of 5½% copper content d 9% of total output is sent to furnaces. The 500-ton mill, installed in 1915, s 36 Nissen stamps, tube-mills, Dorr thickeners, vanners and a 9-cell Minerals paration flotation plant.

The *smelter equipment* includes 12 hemispherical blast roasting pots, two ast-furnaces, each of 300-ton daily capacity, two 12,500 cu. ft. turbo-blowers, ectric crane and 12 converters of 15-ton copper capacity. Copper is cast into rs of 360 lb., containing 10 oz. gold and 20 oz. silver. The plan of treatment similar to that of the standard plants in the United States.

See article "Ore Treatment at Falcon Mine," by H. R. Adams, S. African ng. Journ., December 30, 1916, p. 421.

Production, years ended June 30:

er	Tons Ore treated,	Copper, lb.	Gold, oz.	Silver, oz.	All costs

GLOBE AND PHOENIX GOLD MINING CO., LTD. RHODESIA

Office: T. Priest, sec., 35 Old Jewry, London, E. C. 2, England.

Earl Russell, chairman of board of directors; T. Haddon, gen. mgr.; J. Macarthur, mine mgr.

Inc. Oct. 18, 1895, in England. **Cap.**, £200,000; 5s. par; all issued.

Profit for 1917 was £347,280, of which £300,000 was distributed. Profit in 1918 was £114,065, and dividends £120,000. Reserves total £123,812.

Dividends: total 1107%, 40% being paid in 1918

Property: 70 mining claims (1½ acres each) in Rhodesia, 140 miles N. of Bulawayo.

Development: by 3,149′ incline and 2,300′ vertical shafts.

Reserves: at beginning of 1919 were 143,333 tons, averaging 29.9 dwt. per ton.

In the apex suit, started by the Amalgamated Properties of Rhodesia, the Globe and Phoenix won in every court, the final decision being given in 1919.

Equipment: complete, with 40-stamp mill, roasting and cyaniding plant.

Production: in 1918 was 66,383 tons of ore yielding 81,244 oz. gold, compared with 75,465 tons in 1917, yielding gold valued at £403,371, and 77,49[illegible] tons yielding 102,473 oz. gold in 1916.

LONELY REEF GOLD MINING CO., LTD. RHODESIA

Office: A. D. Owen, 34 Bishopsgate, London, E. C. 2, England.

Officers: C. F. Rowsell, chairman of board of directors; C. B. Kingston, gen. mgr.

Inc. Jan. 13, 1910, in Rhodesia. **Cap.**, £325,000; £1 par; 271,007 issued.

A profit of £106,143 was made in 1917, of which £60,977 was paid in dividends. Balance forward was £14,192. Revenue in 1918 was £209,712, and dividends £48,273.

Dividends: 10% in 1911; 30% in 1912; 30% in 1913; 20% in 1914; 15% in 1915; 20% in 1916; 30% in 1917; 25% in 1918.

Property: 234 claims, 351 acres, 40 miles N. of Bulawayo, Bubi district, Rhodesia.

Development: by 3,240′ shaft. Reserves are estimated as 176,097 tons worth 24.1 dwt. per ton, an increase of 31,000 tons and 5.31 dwt. per ton.

Equipment: 20 stamps, 3 tube-mills, and cyanide plant.

Production: in 1918 was 54,320 tons yielding £208,396; compared with 57,870 tons in 1917, yielding £221,299 and 59,320 tons yielding £174,857, with a profit of £70,314 in 1916.

REZENDE MINES, LTD. RHODESIA

Office: F. M. Ward, sec., 4 London Wall Bldgs., London, E. C. 2, England.

Sir A. Bailey, chairman of board of directors; Sir P. B. S. Wrey, [illegible] Farrar, L. E. B. Hanan, and Sir E. M. Clarke. L. H. Blackbeard, mine mgr.

Inc. Dec. 11, 1908. **Cap.**, £120,000; £1 par; 118,435 issued.

Profit in 1917 was £8,352; total credit balance, £45,545. In 1918 profit was £46,620. **Dividends:** 74% from 1912 to 1918, inclusive.

Property: 583 claims (1½ acres each) in Penhalonga valley, Umtali, Rhodesia.

Development: by shafts, the deepest being 1,400′ on incline. Reserves are estimated at 447,690 tons by directors, and 175,374 tons of 12.5 dwt. ore by consulting engineer S. R. Jameson.

Equipment: complete at mines, and stamp mill with cyanide plants.

Production: 54,000 tons in 1918, yielding £125,528; 59,500 tons in [illegible] yielding £94,532.

RHODESIA BROKEN HILL DEV. CO., LTD. **RHODESIA**

Office: T. Donald, 19 St. Swithin's Lane, London, E. C. 4, England.

E. Davis, chairman of board of directors; R. K. Macartney, mine mgr.; Hooper, Speak & Co., cons. engr.

Inc. Aug. 19, 1910. **Cap.,** £350,000; 5s. par; 991,083 issued.

Property: 1,690 claims (1½ acres each), 374 miles from Victoria Falls, Rhodesia. Fully described by S. J. Speak in "Mining Magazine," October, 1919.

Geology: the ground contains a number of "kopjes," ("buttes" or hills), carrying lead and zinc ores. No. 1 and 2 kopjes are 65 and 90′ high, respectively; No. 2 contains zinc ore with iron ore and a little lead. Over 300,000 tons of 32% zinc ore have been exposed, which tonnage was increased by drilling operations carried on in 1919. No. 1 kopje shows, in section, a block of dolomite replaced by oxidized ore containing numerous boulders of zincified dolomite; many caves and vugs with bone remains. A sand-filled central core adjoins oxidized ore, grading into replaced dolomite, high in zinc but low in lead.

Development: by open quarry work which is hampered by a large inflow of water, as much as 170,000 gal. per hour being pumped 40′ to surface.

Equipment: mine pumps, tramways, 2 blast-furnaces for lead ore and 2 more to be erected. A plant for treating zinc ore is under consideration.

Production: 26,000 tons of lead to October, 1919, when the output averaged 1,000 tons per month.

Property is as yet in its infancy, and is thought to have a prosperous future.

RHODESIA CHROME MINES, LTD. **RHODESIA**

Office: T. Donald, sec., 365 Salisbury House, London, E. C.

Inc. June 27, 1908. **Cap.,** £60,000; shares £1 par; 59,457 issued.

Dividends: 10% in 1911; 20% in 1912; 20% each in 1913 and 1914; nil in 1915; 45% in 1916; 20% in 1917.

Property: 885 acres, in the Gwelo and Selukwe districts, Southern Rhodesia.

Production of chromic-iron ore:

Year	Tons	Value	Year	Tons	Value
1918.....	28,628	.....	1914.....	48,207	£107,612
1917.....	72,962	£327,347	1913.....	63,383	141,481
1916.....	88,871	333,170	1912.....	69,260	154,600
1915.....	60,581	175,792			

Company is a close corporation, and reports are not issued.

RHODESIA COPPER & GEN. EX'N & F. CO., LTD. **RHODESIA**

Office: T. Donald, 365 Salisbury House, London, E. C. 2, England.

Sir E. Davis, chairman of board of directors.

Inc. March 5, 1909, in England. **Cap.,** £352,793, in 1,398,046 shares of 5s. 6d. and 101,954 of 7s. 6d. par, of which 1,173,405 of the former are issued. On May 31, 1918, there were cash assets amounting to £228,540.

Dividends: were 5% in 1910-'11; 3% in 1913-'14; 3% in 1915-'16; 2% 1916-'17; nil in 1918.

Property: 640 sq. miles near the Kafue river, 64,733 acres of farm lands, 10 mining claims, 1½ acres each, also ½ interest in 130 and ⅛ interest in 150 claims, all in Northern Rhodesia. On some of the claims fair quantities of copper ore have already been opened. To develop some of the claims the Rhodesia Broken Hill Development (lead-zinc), Kafue Copper Development, and Bwana M'Kubwa Copper companies have been organized.

SHAMVA MINES, LTD. **RHODESIA**

Inc. Sept. 25, 1912, in the Transvaal. **Cap.,** £1,000,000; £1 par; all ıued. Directors possess power to double the capital, if necessary.

Business: company has interests in the Rand Selection Corporation, akpan Mines, Springs Mines, Daggafontein Mines, and New Geduld Deep. ; tender for operating the western portion of Farm De Reitfontein No. 14 ıs accepted by the Union Government, and the West Springs, Ltd., was organ-d to work the property.

In March, 1920, it was proposed to amalgamate this and the Rand Selection rporation, the Anglo to issue 1,320,000 new shares.

Company is primarily an exploration and holding company.

AKPAN MINES, LTD. TRANSVAAL

Offices: J. H. Jeffreys, sec., 5 London Wall Bldgs., London, E. C. 2, gland, and 409 Corner House, Johannesburg, Transvaal.

E. R. Lynch, chairman of board of directors; C. R. Davis, mine mgr.; M. J. rner, asst. mgr.; J. Erving, cons. mech. eng.; C. E. Knecht, cons. mining eng.

Inc. Feb. 16, 1903, in the Transvaal. **Cap.,** £850,000; £1 par; 791,000 ıed.

Revenue in 1917 was £1,168,455; £482,120 was profit and £367,525 ; distributed. Respective figures for 1918 were £1,089,957, £366,010, and 7,107.

Dividends: from 1912 to 1918, inclusive, total 267½%, 32½% being paid 1918.

Property: 3,387 claims in the Far East Rand goldfield.

Development: by 5 shafts, deepest 3,800', one being an incline. New k in 1917 amounted to 18,451'. Reserves are estimated at 2,718,000 tons of dwt. ore, the reef having a thickness of 67".

Equipment: electric power, complete with hoists, compressors, ven-ing fans, tramways, shops, 160 stamps, 12 tube-mills, and cyanide plant of 0 tons monthly capacity, assay-office, and dwellings. Plant is to be doubled 922.

Production, years ended December 31:

Ore treated, tons	Gold, oz.	Average p. t. dwt.	Extract., %	Total cost
..... 617,100	258,272	8.31	.....	25/5 ($6.10)
..... 677,500	276,738	8.17	96.70	20/3 ($4.86)

This is one of the new mines of the Rand.

TRAL MINING & INVESTMENT CORPORATION, LTD.

London, E. C. 2, England; J. L. Siddall, ...d of directors.

E. G. Izod, mgrs. at Johannes-

burg; F. Geim, P. Troquet, and A. W. Rogers, mgrs. in London. H. F. Marriott, cons. eng. in London; E. Dew, con. mech. and elec. eng.

Inc. May 9, 1905, in England. **Cap.**, £3,400,000; shares £8 par; all issued.

Profit in 1917 was £349,090, and £397,000 in 1918. Reserve fund is £450,000.

Dividends: 1918, 5% per share; 1917, 5% (8s. per share); 1916, 5%, £2 16s. per share from 1908 to 1911, inclusive; 5% in 1912; 2½% in 1913 and 1914; nil in 1915; 5% in 1916, 1917 and 1918.

Company is a holding concern, interested in the Bantjes, City Deep, City & Suburban, Crown Mines, Daggafontein, Durban Roodepoort Deep, New Heriot, New Modder, Nourse Mines, Robinson Deep, Robinson Gold, Rose Deep, Village Deep, Village Main Reef, Rand Mines, Ferreira Deep, Geduld Prop., Geldenhuis Deep, Modder B., Modder Deep, and East Rand Proprietary companies, all large gold producers on the Rand.

Corporation is responsible for the initiation of and holds a controlling interest in Trinidad Leaseholds, Ltd., a highly successful oil company in the island of Trinidad. It also possesses a substantial interest in the Magadi Soda Co., Ltd., and is actively connected with the base metal industry in Great Britain through its interests in the British Metal Corporation, Ltd., Williams, Foster & Co., and Pascoe, Greenfell & Sons, Ltd.

Company is a holding concern [illegible] many important mines and other [illegible] American Trona, Cam & Motor [illegible] Gold Fields American Development [illegible] derfontein) Consolidated, Lone[illegible]

Power, Robinson Deep, Shamva Mines, Simmer Deep, South American Gold & Platinum, and Victoria Falls & Transvaal Power Co., all described under their respective titles. Company also owns considerable real estate in the Transvaal, Rhodesia, and London.

Financial statement for year ended June 30, 1918, shows an income of £432,081, of which £412,540 was profit; £300,000 was paid in dividends. After writing down investments and providing for contingencies, etc., the balance out of £1,070,954 available after allowing £705,808 for depreciation of investments, and £150,000 for preference dividends, etc, was £210,095.

Dividends: on first preference shares is paid Jan. 1 and July 1; on second preference, April 1 and October 1; on ordinary, since the Boer War, 25% in 1901-02; nil in 1902-03; 12½% in 1903-04; 15% in 1904-05; nil in 1905-06; 12½% in 1906-07; 20% in 1907-08; 35% in 1908-09; 30% in 1910-11; 17½% in 1911-12; 10% in 1912-13; 5% in 1913-14; 7½% in 1914; 7½% in 1915-16; 7½% in 1916-17; 7½% in 1917-18.

CONSOLIDATED LANGLAAGTE MINES, LTD. TRANSVAAL

Officers: 10-11 Austin Friars, London, E. C. 2, England, and Cons. Investment Co., Ltd., Consolidated Bldg., Johannesburg, S. A.

Directors: J. Munro, chairman; W. L. White, cons. engr.; A. E. Payne, mine mgr.

Inc. September, 1902, in Transvaal. **Cap.,** £950,000; £1 par; all issued and fully paid; £300,000 in 5½% debentures authorized; outstanding, £75,000. Company was formed to acquire the New Croesus Gold Mining Co., Ltd., and the Langlaagte Star Mining Co., Ltd.

Annual report for years ending December 31, shows:

Year	Revenue	Profit	Dividends	Balance from Last Year	Balance Forward
1919 (last quarter)	£151,115	£78,485	£71,250	.....	.....
1918.....	637,122	159,232	47,500	£59,082	£77,431
1917.....	729,938	228,553	166,250	98,627	59,082
1916.....	785,637	279,662	213,750	75,196	98,627

Dividends: for 1913, 10%; 1914, 20%; 1915, 25%; 1916, 22½%, 1917, 17½%; 1918, 5%.

Property: 343 claims, and 210 deep level claims, on farm Langlaagte, **No.** 13, 4 miles west of Johannesburg. Also 30 claims under lease for erecting **plants** and 3 water-rights.

Development: on the southern end of the property, the East and West shafts have been sunk 4,057' and 3,752' (incline depth), to work the deep levels. New openings in 1918 totaled 13,814'. There were 125 drills operated. The flow of water was as much as 16½ million gallons in a month. Ore reserves are estimated at 2,132,778 tons, valued at 6 dwt. per ton, with a stoping thickness of 49".

Equipment: includes 100-stamp mill with 1,900-lb. stamps, 10 tube-mills and cyanide plant with capacity of 53,000 tons monthly.

Production:

Year	Tons	Gold, oz.	Cost per ton
1919 (last quarter).....	114,000	35,300	$5.42
1918.....	503,300	148,730	4.55
1917.....	585,650	171,326	4.10
1916.....	627,050	184,938	3.88
1915.....	636,500	184,839	3.50

CONSOLIDATED MAIN REEF MINES & EST., LTD. TRANSVAAL

Office: Dowson ... Salisbury House, London, E. C. 2, England, and Rand ... House, Johannesburg, Transvaal.

M. Honnet, ... Wallers, cons. engr.; E. Healey, ...

Inc. July, ... erties of the Main Reef Gold M... d Mining Co.,

Ltd. **Cap.**, £950,000; £1 par, increased to £1,247,602 in January, 1928; all issued.

Property: 1,976 claims and an estate of 7.66 sq. miles six miles west of Johannesburg.

Development: ore reserves to below 4,000' in depth are 1,425,870 tons averaging 7.3 dwt. per ton.

Equipment: includes 240-stamp mill, 6 tube-mills, cyanide plant and necessary surface equipment.

Production, years ended December 31:

Year	Ore treated, tons	Gold Yield	Cost per ton
1918	539,760	£760,496	22/7 ($5.55)
1917	342,895	501,281	19/6 (4.62)
1916	294,766	442,649	.....

Increase of tonnage in 1918 is due to absorption of two other mines and mills.

CROWN MINES, LTD. TRANSVAAL

Offices: A. Moir & Co., 1 London Wall Bldgs., London, E. C. 2 England; and The Corner House, Johannesburg, Transvaal.

S. Evans, chairman and managing director; H. C. Boyd, director; H. S. Martin, cons. eng.; A. J. Brett, gen. mgr.; A. V. Lange, and T. Simpson, joint managers; and S. H. Pearce, reduction officer.

Inc. March 31, 1892, in the Transvaal. **Cap.**, £1,000,000; 10s. par; 1,880,212 issued. **Debentures:** £1,000,000, 5% first mortgage authorized £572,500 outstanding.

Profit in 1917 was £628,898, of which £376,042 was distributed; and £410,642 and £188,020 respectively in 1918.

Dividends: totaled 727% from 1898 to 1910; 120% in 1910; 110% in 1911, 1912 and 1913; 85% in 1914; 65% in 1915; 50% in 1916; 40% in 1917; 30% in 1918.

Property: 2,339 claims, 3,508 acres, on the Rand, Transvaal.

Development: by 14 shafts. Ore is hoisted through No. 5 and 7 shafts, which are connected by two main haulage-levels.

Ore reserves estimated as follows:

Year	Tons	Gold per ton, dwt.
1918	8,298,100	6.30
1917	11,429,000	5.90
1916	9,938,000	6.25

Equipment: immense mining and reduction plants, including 855 stamps, 26 tube-mills, sand and slime plants, capable of treating 7,600 tons of ore daily.

Production, years ending December 31:

Year	Ore treated, tons	Gold Yield	Working Profit	Cost per ton
1918	1,861,000	£2,528,760	£410,704	22/9 ($5.46)
1917	2,100,000	2,700,096	670,000	19/4 ($4.52)
1916	2,666,000	2,887,777	815,620	16/8 (4.00)

This company is probably the largest gold producer in the world.

EAST RAND PROPRIETARY MINES, LTD. TRANSVAAL

Offices: The Corner House, Johannesburg, Transvaal; and 4 London Wall Bldgs., London E. C. 2, England.

Sir Evelyn Wallers, chairman of board of directors; The Central Mining & Investment Corporation, manager at mine; E. C. J. Meyer, sec. Rand Mines, Ltd.

Inc. May 6, 1893 in the Transvaal. **Cap.**, £2,514,000; £1 par; 2,445,000 issued.

Debentures: £1,500,000 authorized; £835,630 outstanding.

Company controls the Angelo, Cason, Driefontein Cons., Blue Star and Comet companies, operating on the Rand, covering an area of 4,273 claims.

During 1915 a net profit of £514,940 was made. Dividends absorbed £275,163, and there was carried forward £193,354. In 1918 the profit was only £2,926. Cash assets totaled £326,485.

Dividends: since 1903 total 350%, but from 1913 to 1916 they dwindled from 25 to 5%; with none in 1917 and 1918.

Property: 4,273 claims, 1½ acres each, on the Rand, Transvaal.

Development: by numerous shafts and extensive workings. Reserves in 1916 were estimated at 4,800,000 tons of $6.40 and 9,800,000 tons of $4.40 ore, but were only 2,732,000 tons of $6.20 in 1917, and 2,200,000 tons of $6.50 ore at end of 1918. Recent development work has been unsatisfactory.

Equipment: full complement for mining; 440 stamps, 19 tube-mills and cyanide plants.

Production, years ending December 31:

Year	Ore treated, tons	Gold Yield	Working Profit
1918	1,372,300	£1,597,075	£52,915
1917	1,741,300	1,910,384	188,951
1916	1,936,326	2,365,107	514,940

In 1914, the directors thought that 20 years' profitable work was ahead of the company, but, like several other great consolidations on the Rand, the predicted estimates were not realized. While this is one of the world's great gold producers, it is very probable that a large production cannot be continued for more than a year or two longer.

FERREIRA DEEP, LTD. **TRANSVAAL**

Offices: The Corner House, Transvaal, S. A.; and 1 London Wall Bldgs., London, E. C. 2, England.

H. C. Boyd, chairman of board of directors; P. Cazalet, cons. engr.; P. Selby, mine mgr.

Inc. Aug. 25, 1898, in the Transvaal. **Cap.,** £1,000,000; £1 par; 980,000 issued.

Accounts for year ended Sept. 30, 1916, showed: net profit, £452,699; cash balance, £117,461, after payment of £379,750 in dividends. In 1918 the profit was £211,716, and £147,984 was carried forward, after distributing £220,500.

Dividends: 1902 to 1918, inclusive, 627%, 22½% being paid in 1918.

Property: 207 mining claims at Witwatersrand, formerly owned by the Barnato Cons. Mines, Ltd., the Rand Mines, Ltd., and the Ferreira Gold Mng. Co., Ltd., each of these companies receiving a stock interest in the Ferreira Deep Ltd., in payment for the claims.

Development: by extensive workings. Ore reserves were estimated on Sept. 30, 1916, at 1,632,600 tons, averaging 8.3 dwts. gold; 1,305,500 tons of 7.6 dwt. in 1917; and 932,400 of 8 dwt. in 1918.

Equipment: complete power and mining plants, with 280 stamps, 7 tube-mills and cyanide unit.

Production, years ending September 30:

Year	Ore treated, tons	Gold Yield	Cost per ton
1918	508,200	£806,487	23/ 5 ($5.57)
1917	586,320	957,973	.....
1916	643,460	1,130,227	20/11 (5.07)

GEDULD PROPRIETARY MINES, LTD. **TRANSVAAL**

Office: H. Rogers, Pinners Hall, Austin Friars, London, E. C. 2, England.

Inc. March 28, 1899, in the Transvaal. **Cap.,** £1,500,000; £1 par; 1,150,-

[redacted] in 1917 £187,143. Dividends paid were £97,000. In 1918 [redacted] **Dividends:** 5% in 1914; 10% in 1915, 1916 and 1917;

Property: 2,481 claims in the Heidelberg district, East Rand.

Development: by 7 shafts. Reserves were 2,510,000 tons of 7.5 dwt. ore at end of 1918, an increase of 310,000 tons.

Equipment: complete with 100 stamps, 7 tube-mills, and cyanide plant.

Production: 425,550 tons yielding £631,364 in 1917; 513,200 tons yielding £745,818 in 1918. Costs are around £1 ($5) per ton.

GENERAL M'G & FINANCE CORP'N, LTD. TRANSVAAL

Head office: H. W. Dalton, sec., General Mining Bldg., Johannesburg, Transvaal.

Sir G. Albu, chairman of board; A. French, mgr.; E. Hay, tech. advisor; E. Farrar, mechanical engr.; H. W. Clayden, electrical engr.; R. Heymann, cons. chemist.

Inc. Dec. 30, 1895, in the Transvaal. **Cap.,** £1,875,000; shares £1 par; all issued.

Company has large interests in and manages the Aurora West United, Meyer & Charlton, New Goch, Roodepoort United, Van Ryn, and West Rand Cons. mines, all producers. Also owns the Cinderella Cons., New Steyn, and Rand Collieries, partly developed.

Profits in 1916 were £35,616, an increase of £20,509; £44,144 in 1917, and £25,434 in 1918.

Dividends: have been irregular, amounting to 67% up to 1911; nothing since 1910.

GOV'T GOLD M'NG. AREAS (MODDERFONTEIN) CONS., LTD.

Offices: 10 and 11 Austin Friars, London, E. C. 2, England; and Consolidated Bldg., Johannesburg, Transvaal.

S. B. Joel, chairman of board of directors; M. J. Turner, mgr.; W. L. White, cons. eng.

Inc. Feb. 26, 1910, in the Transvaal. **Cap.,** £1,400,000; £1 par; all issued.

Profit in 1915 was £160,612, of which £111,599 was carried forward; and in 1917 £693,916, with £146,332 carried forward.

Total revenue in 1918 was £2,162,584 yielding, £876,326 profit, of which the government's share was £369,982. Dividends amounted to £385,000.

Revenue for last quarter of 1919 was £611,719, of which £246,226 was profit, plus £206,400 gold premium.

Dividends: 5 paid to end of 1919, the last of 20%, on December 31.

Property: 2,633 claims, 1½ acres each, on the Far East Rand, Transvaal.

Development: four 7-compartment shafts, 2,538', 2,433', 3,893', and 3,[illegible] deep, two 3,100' apart and two 4,000' apart. Main "reef" was cut in N.-E. shaft in 1912 at depth of 2,395', where it was 31" wide, and worth $7.15 per ton. The dip is 15° S. W. In N.-E. shaft reef was cut at 2,275', being 21" wide, worth $7.70; at 3,579' in the S. E. shaft it was 57" wide, worth $[illegible] and in the S.-W. shaft at 3,608', 30" wide, worth $3.80 per ton.

Ore reserves. 3,665,000 tons of 6.9 dwt. in 1915; 4,930,000 of 7.2 dwt. in 1916; 7,016,000 tons of 7.5 dwt. in 1917; and 9,445,000 tons of 8 dwt. in 1918.

Equipment: complete, with 200 (2,000 lb. each) stamps, 25 tube-mills and cyanide plants, with monthly capacity of 135,000 tons. There are 5[illegible] natives employed.

Production, years ending December 31:

Year	Ore treated, tons	Gold Yield	Working Profit	Cost per ton
1919 (last quarter)	338,000	£611,719	£246,226	21/9 ($5.32)
1918	1,303,500	2,162,585	876,327	19/7 [illegible]

The above table shows the progress of this great [illegible]

JOHANNESBURG CONS. INVESTMENT CO., LTD. TRANSVAAL

Office: T. Honey, 10 Austin Friars, London E. C. 2, England.

S. B. Joel, chairman of board; G. Imroth, mgr. in South Africa; W. L. White, cons. eng. in Johannesburg.

Inc. September, 1889, in the Transvaal. **Cap.,** £4,500,000; £1 par; 3,950,000 issued.

Profit for year ended June 30, 1918, was £200,739, plus £159,557 from previous year. Dividends absorbed £197,500; £161,796 was carried forward. Investments are valued at £3,317,058.

Dividends: 157½% from 1894 to 1918, inclusive; 3% in 1918.

Company carries on a general agency, real estate, and investment business, but has large interests in the following mines: Consolidated Langlaagte, Ginsberg, Government Gold Mining Areas (Modderfontein), Langlaagte Estate & Gold, New Primrose Gold, New State Areas, New Unified Main Reef, Randfontein Central, Van Ryn Deep, and Witwatersrand Gold, all gold producers save the New State, which is developing.

KNIGHTS DEEP, LTD. TRANSVAAL

Head office: Consolidated Gold Fields of S. A., Ltd., Box 1167, Johannesburg, Transvaal. **London office:** 8 Old Jewry, E. C. 2, England.

D. Christopherson, chairman of board of directors; G. A. Chalkley, mine mgr., Box 192 Germiston, Transvaal.

Inc. Sept. 14, 1895, in the Transvaal. **Cap.,** £743,526; £1 par; all issued.

The year ended July 31, 1918, showed a working profit of £21,019; the net balance carried to appropriation account being £3,211. **Dividends:** total declared to December, 1918, 252½%; nothing in 1918.

Property: 506 claims situated partly on the farm Elandsfontein No. 11 and partly on the farm Driefontein No. 12, Witwatersrand.

Development: ore reserves estimated in 1918 at 1,671,000 tons that average 4.43 dwt., exclusive of 83,000 mine tons of partly developed ore carrying 5.03 dwt. gold per ton. Recent development indicates that certain blocks, including above reserves cannot be profitably worked under 1920 conditions.

Equipment: 400 stamps, 11 tube-mills, and cyanide plants.

Production: year ended July 31, 1918, 1,140,700 tons of ore yielding gold to the value of £842,442, compared with £886,295 from 1,196,500 tons in 1917.

LANGLAAGTE ESTATE & GOLD MNG. CO., LTD. TRANSVAAL

Office: 10 Austin Friars, London, E. C. 2, England.

S. B. Joel, chairman of board of directors; J. Munro, V. c.; W. A. Crige, mgr.; W. L. White, cons. eng.

Inc. Jan. 13, 1888, in the Transvaal. **Cap.,** £950,000; £1 par; 886,500 issued.

Revenue in 1918 was £647,999, of which £139,083 was profit. After paying dividends of £110,813, etc., balance forward was £70,898. **Profit for** 1st quarter of 1919 was £54,785.

Dividends: total 571½% since 1889; 12½% for 1918; 7½% on Decem-er 31, 1919.

Property: covers a large area on the Rand. Block B mine contains 060,594 tons of 6.9 dwt. ore, which is worked by an incline shaft 2,983' eep. New work in 1918 totaled 8291'. The Langlaagte mine is worked it.

Equipment: complete with 200-stamp mill containing 5 tube-mills and anide plant.

Production: in 1918 was 152,282 oz. of gold from 533,690 tons of ore, th a total cost of 19/ ($4.56) per ton. Output for last quarter of 1919 was 1,790 tons of 24/6 ($5.88) ore, with total costs of 23/6 ($5.64) per ton.

ESSINA (TRANSVAAL) DEV. CO., LTD. TRANSVAAL

Head office: 1 London Wall Bldgs., London, E. C. 2, England. **Mine** ice: Messina, Zoutpansberg, Transvaal, South Africa.

Officers: C. F. H. Leslie, chairman of board of directors; A. B. Emery, gen. mgr.

Inc. Jan. 30, 1905, in England. **Cap.,** £250,000; shares 5s. par; 727,154 issued. Capital increased from £110,000 to £200,000 in 1908, and to present amount in 1911. **Bonds:** £250,000 issued April, 1912, at 95%, redeemable at 105% by drawing or purchase in open market at or under that price; £171,000 outstanding. Interest guaranteed to Jan. 1, 1917, by Camp Bird, Ltd. (of Colorado).

In 1918 the income was £399,096, of which £25,175 was profit. Balance at end of previous year £156,687, was reduced to £133,770.

The year ended June 30, 1919, resulted in a loss of £39,373, after allowing £55,600 for depreciation and railway guarantee.

Dividends: in 1915-16 were equal to 40%; 20% in 1916-'17; nil in 1917-'19.

Property: about 22,432 acres of copper-bearing lands, including the Messina and Vogelsang mines; also coal and lime claims in the Zoutpansberg district of the Transvaal. Ore contains chalcocite, bornite, and some chalcopyrite occurring in veins in granite.

Development: by the 1,033' Messina and 1,742' Vogelsang shafts, and extensive workings.

Ore reserves: in 1916 were estimated at 208,061 tons of 4.75% copper ore to No. 16 level; 273,447 tons of 3.59% in 1917; and 297,803 tons of 3.45% in 1918. The Vogelsang is likely to become a large producer. In 1919, reserves were 415,000 tons of 3.25% ore; also 325,000 tons of 1.4% jig tailings.

Equipment: adequate for all present needs, includes a 250-ton mill and 2 reverberatory furnaces.

Production, years ending June 30:

Year	Ore treated, tons	Copper, %	Copper, long tons
1918	120,899	3.47	3,537
1917	142,588	3.98	5,111
1916	112,043	5.43	5,732
1915	91,033	....	5,331
1914	64,304	....	4,007
1913	24,847	....	1,473

MODDERFONTEIN B GOLD MINES, LTD. TRANSVAAL

Office: A. Moir & Co., 1 London Wall Bldgs., London, E. C. 2, England.

Sir L. A. Wallers, chairman of board; C. L. Butlin, mgr.; H. S. Martin, cons. eng.

Inc. Nov. 18, 1908, in the Transvaal. **Cap.,** £700,000; £1 par; all issued.

In 1918 the profit was £658,587; dividends, £577,500, and balance forward to 1919, £198,045; compared with £709,601, £595,000 and £246,570 respectively.

Dividends: from 1912 to 1918, inclusive, total 442½% (£3,027,500); 82½% for 1918.

Property: 1,467 claims in the Far East Rand.

Development: new work in 1918 was 9,894', compared with 9,941' in 1917. Of this, 60% was pay-ore. A deep circular shaft, 20' in diameter, is being sunk. Ore reserves are estimated at 3,378,000 tons, averaging 9.2 dwt. per ton across 62 inches.

Equipment: complete with 80 ordinary and 24 Nissen stamps, 8 tube mills, and cyanide plants of 60,000 tons monthly capacity.

Production, years ending December 31:

Year	Ore treated, tons	Gold Yield	Cost per ton
1918	605,500	£1,253,614	19/8 ($4.80)
1917	517,500	1,193,717	19/5 (4.69)

MODDERFONTEIN DEEP LEVELS, LTD. **TRANSVAAL**

Office: H. Rogers, Pinners Hall, Austin Friars, London, E. C. 2, England.

H. Newhouse, chairman of board of directors.

Inc. April 26, 1899, in the Transvaal. **Cap.,** £500,000; £1 par; all issued.

Profit in 1918 was £593,851. Dividends amounted to £487,500.

Dividends: 35% in 1915; 67½% in 1916; 85% in 1917; and 97½% in 1918.

Property: 377 claims in the Far East Rand, developed by vertical shafts, opening 3,450,000 tons of 8.8 dwt. ore.

Equipment: complete with mill capable of treating 1,500 tons daily, or over 44,000 tons monthly.

Production, years ending June 30:

Year	Ore treated, tons	Gold Yield	Cost per ton
1918.....	505,950	£1,035,472	17/5 ($4.18)
1917.....	494,400	964,343	16/4 (3.88)

NEW KLEINFONTEIN CO., LTD. **TRANSVAAL**

Office: J. H. Clark, 208 Salisbury House, London, E. C. 2, England.

Wm. Dalrymple, chairman of board of directors; E. J. Way, cons. eng.

Inc. April 2, 1894, in the Transvaal. **Cap.,** £1,300,000; £1 par; 1,151,540 issued.

Net profit in 1917 was £196,115, of which £57,577 was distributed; 115,548 was carried forward. In 1918 the profit was £49,828 out of a yield of £860,265.

Dividends: from 1894 to 1917, inclusive, 212%; including 5% in 1917.

Property: 1,805 claims on the Witwatersrand, covering 4.7 miles on the strike of the reef, and developed by 8 shafts. The property, which is divided into 3 sections, is dependent on the future of the apex section. Reserves are estimated (1919) at 2,048,000 tons averaging 5.78 dwt. per ton, compared with 2,943,994 tons in 1916.

Equipment: complete for an output of 77,000 tons of ore per month.

Production, years ending December 31:

Year	Ore treated, tons	Gold Yield	Working Profit
1918.....	674,740	£860,265	£49,828
1917.....	785,090	1,013,300	216,289

Costs are 24/- ($5.76) per ton.

NEW MODDERFONTEIN GOLD MNG. CO., LTD. **TRANSVAAL**

Head office: Rand Mines, Ltd., Corner House, Johannesburg, Transvaal.

London office: A. Moir & Co., 1 London Wall Bldgs., London, E. C. 2, England.

Sir E. A. Wallers, chairman of board of directors; E. M. Sharp, mgr.; S. Martin, cons. engr.

Inc. June 1, 1895, in Transvaal. **Cap.,** £1,400,000; £4 par; all issued and paid up. Shares are to be split into 10 shillings par in 1920.

Accounts for year ended June 30, 1916, show profit of £766,235, of which £455,000 was paid in dividends. In 1918 the profit was £850,878, which £568,750 was distributed. Balance forward was £306,744.

In 1919, dividends absorbed £875,000 and taxes £215,000; the balance forward was £255,867.

Dividends: 70% from 1906 to 1911; 25% in 1911; 30% in 1912; 30% in 1913; 31¼% in 1914; 32½% in 1915; 32½% in 1916; 40% in 1917, and 30% in 1918.

Property: 1,265 claims, 1,808 acres, considered by some authorities one of the greatest gold mines in the world, when production, present profits and future possibilities are considered.

Development: by 13 shafts to 2,258'. Ore reserves estimated at 9,000,000 tons, assaying 8.6 dwt. gold per ton.

Equipment: includes mill with 236 stamps, 15 tube-mills and cyanide

plants, capable of treating 100,000 tons per month. Eight more Nissen stamps are to be added, increasing monthly capacity by 10,000 tons.

Production, years ending June 30:

Year	Ore treated, tons	Yield per ton	Cost per ton
1919	920,500	43/10($10.52)	20/2 ($4.84)
1918	684,100	45/7 (10.87)	21/3 (5.07)
1917	656,700	43/4 (10.36)	19/5 (4.61)
1916	635,000	48/2 (11.54)	17/3 (4.14)

NEW STATE AREAS, LTD. TRANSVAAL

Office: 10 Austin Friars, London, E. C. 2, England.

S. B. Joel, chairman of board of directors; M. J. Turner, mgr.; W. L. White, cons. eng.

Inc. Feb. 20, 1918, in the Transvaal. **Cap.,** £1,500,000; £1 par; all issued, part paid.

At end of 1918 cash amounted to £169,246, and stores £39,096.

Property: 1,176 claims on farm De Springs No. 15, and 874 claims on Geduld No. 24, in the Far East Rand.

Development: to end of 1919, £650,000 had been spent on development and equipment, and by Jan., 1920, one shaft was down 1,065' and another 1,40[illegible]. Both shafts should strike the reef at about 3,600' depth by the year 192[illegible]. They are 27' 9" by 12' 9" inside measurement

Equipment: includes boilers, hoists, 50-drill compressor, electric power, shops and all necessary buildings. Company employs 300 natives underground.

NOURSE MINES, LTD. TRANSVAAL

Office: A. Moir & Co., 1 London Wall Bldgs., London, E. C. 2, England.

H. C. Boyd, chairman of board of directors; S. Beaton, acting mgr., H. S. Martin, cons. eng.

Inc. Sept. 12, 1894, in the Transvaal. **Cap.,** £850,000; £1 par; 827,821 issued. Profit in 1917 was £60,977, and £131,013 was carried forward. Revenue in 1919 was £620,000 of which £15,393 was profit.

Profit in 1917 was £60,977, and £131,013 was carried forward.

Revenue in 1919 was £620,000 of which £15,393 was profit.

Dividends: total 266% from 1898 to 1918, inclusive; 10% in 1918.

Property. 669 claims on the Witwatersrand.

Development: by vertical shafts. Ore reserves total 1,526,100 tons. New work in 1919 amounted to 15,000'.

Equipment: capable of mining and treating 50,000 tons per month.

Production: 471,000 tons of 26/2 ($6.26) ore in 1918; and 495,100 tons of 28/- ($6.72) in 1917. Output in 1919 was 482,000 tons averaging 27/7 ($6.50) at a cost of 26/7 ($6.38).

PREMIER (TRANSVAAL) DIAMOND MIN. CO., LTD. TRANSVAAL

Offices: J. A. Stevens, sec., 6½ Austin Friars, London, E. C. 2, England; T. D. Edington, sec., and W. M. Chalmers, asst. sec., Cullinan Bldg., Johannesburg; M. S. Knowles, mine sec., Elandsfontein, Transvaal; and Credit Lyonnais, 19 Boulevard des Italiens, Paris, France. **Diamond office:** W. Busch, 14 Holborn, Viaduct, London, E. C. 1, England.

Sir T. M. Cullinan, chairman of board of directors; D. McHardy, gen. mgr.; L. J. Howes, mine mgr.

Inc. Dec. 1, 1902, in the Transvaal. **Cap.,** £800,000, in 160,000 5s. preference shares and 320,000 2s. 6d. deferred shares, all issued. Control is held by De Beers Consolidated.,

Profit for year ended Oct. 31, 1918, was £665,272. Of this the Union Government took £400,245, due under the law, and £252,500 was distributed. Net current assets were £468,000.

Income for 1919 was £1,961,259, of which £1,210,980 was profit. The government's share was £726,588. Dividends absorbed £432,500.

Dividends: paid regularly on preference shares, they being entitled to a cumulative dividend of 250% per annum. Deferred shares received a total of 5200% from 1904 to 1918-'19, inclusive, 850% being paid in the last year.

Property: 3,484 diamond-bearing claims in the Pretoria district of the Transvaal, developed by open-cut to depth of 250'. Drilling has shown diamond-bearing ground to depth of 1,000'. Reserves to 360' are estimated at 32,500,000 loads (1,600 lb. each).

Equipment: suitable for handling and treating 50,000 loads daily.

Production:

Year	Ground treated loads	Yield, carats	Value per load	Cost per load
1919.....	4,529,261	815,267	.....	.....
1918.....	4,805,851	851,573	5/— ($1.20)	2/3 ($0.54)
1917.....	4,928,629	906,341	4/10 (1.16)	2/3 (0.54)
1916.....	1,572,252	419,947	6/— (1.44)	2/8 (0.64)
1915.....	Closed on account of war.			
1914.....	7,683,943	1,417,755	3/3 (0.78)	2/6 (0.60)

RANDFONTEIN CENTRAL GOLD MIN. CO., LTD. TRANSVAAL

Office: 10 Austin Friars, London, E. C. 2, England.

S. B. Joel, chairman of board of directors; G. H. Beatty, gen. mgr.; W. L. White, cons. engr.

Inc. March 26, 1907, in the Transvaal. **Cap.**, £4,500,000; £1 par; all issuel. **Debentures:** £3,000,000 6% authorized, of which 2,315,600 are outstanding.

Financial Statement, years ended December 31:

Year	Revenue	Working Profit	Balance forward
1919 (last quarter).....	£486,117	£174,077	.....
1918.....	1,991,839	108,072	£27,669
1917.....	.....	478,063	335,018
1916.....	2,835,892	834,555	418,200

Dividends 17½% from 1912 to 1918; none since 1915.

Property: 2,296 claims, 1½ acres each, on the Rand, Transvaal.

Development: by 12 main shafts along the 7 miles of reef. New openings in 1916 totaled 112,026', including 2,151' of shaft sinking; and 52,210' in 1918, with 4,084' of sinking. Deepest shaft is 3,652'.

Reserves: consist of 4,944,302 tons of $7.80; 3,486,917 tons of $4.60, and 3,268,654 tons of $2.80 ore, a total of 11,699,873 tons. The last mentioned is at present unprofitable. At the end of 1918 the total was 4,254,000 tons of 6.8 dwt. gold ore across width or thickness of 50".

Equipment: extensive and modern, including 1,000-stamp mill, 26 tube-mills, and cyanide plants, capable of treating 185,000 tons per month. Employs 11,600 natives.

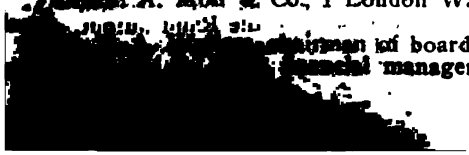
Production, years ending December 31:

Year	Ore treated, tons	Gold Yields	Cost per ton
1919 (last quarter).....	419,200	£486,117	23/8 ($5.68)
1918.....	1,745,000	£1,991,839	21/6 (5.10)
1917.....	2,017,181	2,467,636	.....
1916.....	2,209,622	2,890,000	18/1 (4.34)

The above tables show steadily decreasing returns, which in 1918 was partly due to floods, labor troubles, and epidemic. When the new shafts and pumping stations are completed a larger output and gold production is expected, as development work is satisfactory.

RAND MINES, LTD. TRANSVAAL

Office: A. Moir & Co., 1 London Wall Bldgs., London, E. C. 2, Eng-



...man of board of directors; E. T. Mellor, cons. ...manager.

Inc. Feb. 22, 1893, in the Transvaal. **Cap.**, £550,000; 5s. par; 2,125,995 issued. Listed on London Stock Exchange. On Dec. 29, 1919, 60,000 American shares were listed on the New York Curb, representing 150,000 English shares. These shares were offered the public at $40. Bankers Trust Co., New York, transfer agent, Chase National Bank, New York registrar.

Company is closely affiliated with the Central Mining & Investment Corp., successor to Wernher Beit & Co.

Financial Statement:

Year	Revenue	Dividends Paid	Carried Forward	Reserve Fund	Value of Investments
1918.....	£458,690	£451,773	£361,074	£2,805,628	£3,166,003
1917.....	727,070	770,673	348,898	2,877,878	3,142,418

Dividends: 3020% since 1898; 85% being paid in 1918; and 100% in 1919.

Property: the company owns a substantial though not a controlling interest in the producing mining companies named in the following table, and also 1,252 claims owned outright. Its shareholdings are so extensive that it practically dominates many of the companies and its income is derived almost entirely from the dividends paid by them.

Mines	Int. held by Rand mines, %	Tons	Gold yield, per ton	Profit*	Ore Reserves tons

Wolhuter Gold.....	1.60	382,950	24/-	78,875	856,870

*Operating profit, not including sundry revenues, for 1918.

Thirteen mines in the near Eastern and Central Rand produced 8,421,670 tons of ore in 1918; three in the West Rand gave 1,127,050 tons, and two in the Far East Rand gave 1,397,000 tons. Total profits were £3,336,663 against £4,748,353 in 1917.

The Modder and Spring companies in the Far East Rand are believed to have a long assured life with continuance of dividends and the Rhodesia Broken Hill should soon reach the dividend stage. The holdings are so varied that depletion at one property is offset by development in another mine.

Disbursements to company shareholders for the 11 years ended December 31, 1919, total £10,600,000 or 188% per annum on the shares issued. As this company is interested in mines producing 40% of the Rand output, and the Rand produces 40% of the world's gold, it dominates 16% of the gold output of the entire world.

ROBINSON DEEP, LTD. **TRANSVAAL**

Offices: J. T. Bedborough, 8 Old Jewry, London, E. C. 2, England; and Consolidated Gold Fields Bldgs., Johannesburg, Transvaal. D. Christopherson, chairman of board of directors.

Inc. Dec. 31, 1915, in the Transvaal to acquire assets of Robinson Deep Gold Mining Co., Ltd. **Cap.,** £925,000, in 500,000 cumulative preference A shares of 1s. each and 900,000 shares of £1 each. All A shares and 781,807 B shares are issued credited as fully paid.

Dividends: 8s. on A shares in 1916; 4s. in 1917; 2s. in 1918.

Property: 557 claims, 835 acres, on the Rand, Transvaal.

Development: by 3 shafts, one a new 7-compartment shaft 4,500' deep. Reserves are given as 1,717,000 tons, assaying 6.9 dwt. per ton, and 131,000 tons partly developed, assaying 6.5 dwt. per ton.

Equipment: includes 300 stamps, 10 tube-mills, and cyanide plants.

Production, years ending December 31:

Year	Ore treated, tons	Gold Yield	Profit
1918	529,300	£713,442	£34,225
1917	561,400	772,619	142,691
1916	632,000	934,522	306,688

Costs are about 26/- ($6.24) per ton.

ROOIBERG MINERALS DEVELOPMENT CO., LTD. TRANSVAAL

London Agency: John H. Clark, sec., 208 Salisbury House, London, E. C.

Wm. Dalrymple, chairman of board of directors; J. C. Wilson, act. mgr.; E. R. Schoch, sup't'g eng.

Inc. May 19, 1908, in the Transvaal. **Cap.,** £180,000; £1 par; all issued. Statement for year ended June 30, 1918, shows revenue of £85,334 and profit of £8,265. For same period in 1919 the revenue was £54,687, and expenditures £70,178.

Dividends: has paid 102½% since 1910; 5% in 1916-'17; none since.

Property: tin claims in the Waterburg district of the Transvaal.

Development: by 619' main shaft with 5,164' of new work in 1918; this work costing $9.30 per ton of ore mined. Surface prospecting is done by hydraulicking, as at Nipissing, Cobalt, Ontario.

Equipment: 10 stamps, tube-mill and concentrators.

Production: Year	Ore Treated, Tons	Tin, Per Cent. Metal	Extraction, Per Cent.	Metal Produced, Tons	Cost per Ton
1918-'19	14,948	1.60	.....	350*	.....
1917-'18	18,702	1.89	82.01	320	.....
1916-'17	38,557	2.85	79.80	646	.....
1915-'16	36,460	3.02	77.95	707	$12.10
1914-'15	37,263	2.82	78.27	731	10.24
1913-'14	40,643	3.18	78.81	887	11.46
1912-'13	35,917	3.56	72.85	832	12.92

*Black tin; includes that from slime.

This is one of the few base-metal producers of the Transvaal.

SIMMER DEEP, LTD. **TRANSVAAL**

Offices: J. T. Bedborough, 8 Old Jewry, London, E. C. 2, England; and Consolidated Gold Fields of South Africa, Johannesburg, Transvaal.

D. Christopherson, chairman of board of directors; C. D. Leslie, cons. engr.; H. S. MacGregor, mine mgr.; O. P. Powell, supt. engr.

Inc. Nov. 30, 1906, in the Transvaal. **Cap.,** £1,750,000; £1 par; 1,650,000 issued. **Debentures:** £755,000 5½% first mortgage, of which £689,400 are outstanding.

Accounts for 1915 showed a loss of £2,356 after paying £45,952 debenture interest and £9,848 sundries. Total reserve given as £493,622. In 1917 there was a loss of £13,483, with reserve of £519,985. In 1918 there was a loss of £27,871.

Financial position on July 31, 1918, showed £451,040 cash; £25,836 equipment, and £5,938 general expenditure to that date.

Property: a Government lease of mineral rights on 2,236 claims on Farm De Rietfontein No. 14, Far East Rand, Transvaal, immediately west of the Springs Mines, Ltd., with which arrangements were made for development and purchase of West Springs shares. A share of profits is payable to the Union Government.

Development: two shafts are being sunk, and the reef was expected to be cut at 3,800'.

This is one of the new companies operating in what is considered to be an important section of the Witwatersrand.

ZAAIPLAATS TIN MINING CO., LTD. **TRANSVAAL**

Office: E. G. Crake, Pinners Hall, Austin Friars, London, E. C. 2, England. A. Gilbertson, mgr.; W. J. Gau, cons. eng.

Inc. Aug. 18, 1908, in the Transvaal. **Cap.,** £63,750, in 255,000 shares of 5s. par, all issued.

Profit for year ended July 31, 1918, was £52,186. Dividends absorbed £19,125 and £17,425 were carried forward. Reserve was £10,000.

Dividends: from 1908 to February, 1919, inclusive, 625%; 30% in 1918-19.

Property: 234 tin claims, 23 miles W. of Potgietersrust, Transvaal, equipped with 15 stamps, 4 tube-mills, and concentrator; there is also a smelter.

Production: 355 tons of 70% metal concentrate from 28,132 tons of ore in 1916-17, and 521 tons from 17,078 tons in 1917-18. Costs are around 60/- ($14.40) per ton.

WEST AFRICA

GOLD COAST COLONY

ABBONTIAKOON MINES, LTD.

Office: E. Price, sec., 19 St. Swithin's Lane, London, E. C. 2, England. E. Davis, chairman of board of directors; S. H. Ford, supt. engr.; Consolidated Gold Fields of South Africa, cons. engrs.

Inc. Feb. 24, 1909, in England. **Cap.,** £800,000; 10s. par; 1,273,601 issued.

Profit in 1918 was £16,842 against £6,087 in 1917, and £51,490 in 1915. Balance forward to 1918 was £59,072. The year 1919 resulted in a loss of £6,332.

Dividends: in 1914, 20%; in 1915, 5%; nothing since.

Property: 918 claims, 1½ acres each, near Tarkwa, Wassau, Gold Coast Colony, West Africa, on the Government railroad.

Development: by 3,264' shaft. Reserves are given as 285,250 tons of 33/6 ($8.05) ore.

Equipment: mill with 25 stamps, 2 tube-mills, and cyanide plant of 15,000-ton monthly capacity.

Production:

Year	Ore treated, tons	Value	Cost per ton
1918	106,481	£208,435	38/- ($9.12)
1917	116,688	221,408	36/- ($8.64)
1916	117,885	231,000	27/- (6.50)

ABOSSO GOLD MINING CO., LTD. **GOLD COAST**

Office: 461 Salisbury House, London, E. C. 2, England.

T. F. Dalglish, chairman of board of directors; C. E. Jobling, gen. mgr.; D. A. Thompson, relieving; and G. W. Campion, supt.

Inc. June 18, 1901, in England. **Cap.,** £400,000; £1 par; all issued.

Profit for year ended June 30, 1916, was £25,024; in 1918 there was a loss of £1,795. The balance of £46,062 from 1917 was reduced to £24,267.

Dividends: since 1905 total 65%, 5% being paid in 1916; nothing since.

Property: in the Wassau district, Gold Coast Colony, West Africa. **Development:** by 1,880′ shaft. Ore reserves were estimated at 237,280 tons, worth $7.80 per ton in 1916, and 280,330 tons of $7.98 ore in 1918. The stoping width is 64″.

Equipment: complete for mining, steam power, also 50 stamps, tube-mill, grinding pans, and cyanide plant, of 15,000 tons monthly capacity.

Production, years ending June 30:

Year	Ore treated, tons	Yield	Cost per ton
1919	80,075	£132,027	32/6 ($7.80)
1918	102,256	152,320	29/- (6.96)
1917	112,460	167,270	26/1 (6.25)
1916	113,300	179,459	25/7 (6.14)

ASHANTI GOLDFIELDS CORPORATION, LTD. GOLD COAST

Office: H. Morgan, sec., 6 Southhampton St., Holborn, London, W. C. 1, England.

Earl of Bessborough, chairman of board of directors. J. S. Watkins, mgr.; W. R. Feldtmann, cons. engr.

Inc. May 25, 1897, in England. **Cap.,** £250,000; 4s. par; 1,103,057 issued. Profit for 1919 was £152,396, compared with £159,621 in 1918 and £173,281 in 1916. Dividends absorbed £154,428. Balance forward to 1919 was £105,471. Reserves total £117,375. Of the total profit in 21 years, 94.3% has been distributed to shareholders.

Dividends: since 1900 total 947%, 70% being paid in 1918, and 75% in 1919.

Property: 100 sq. miles at Obuasi, in Gold Coast Colony, West Africa, 124 miles from the coast. Mine is the largest producer in the region.

Geology: the Obuasi shoot occurs in disturbed ground, close to the intersection of two fissure planes. The normal fissure filling or vein formation is a brecciated graphitic schist, in places very friable. The main vein is a solid quartz body 1,000′ long on some levels, and from 3 to 40′ wide. The ore, owing to parallel streaks of graphite, has a banded structure. Some gold is free, the remainder being in pyrite and other sulphides. The Ayeinm shoot, in the same main fissure, is pear-shaped in horizontal section, being 700′ long and from 4 to 60′ wide. Gold content in both shoots is erratic.

Development: by shafts to 2,000′ depth. Mining is rendered difficult by the weakness of the rock, the irregular and great thickness of the quartz, the flat pitch of the shoot and the graphitic selvage on the footwall.

Reserves have varied as follows:

Year	Tons	Dwt. per ton	Gross Value
1919	529,500	27.2	.....
1918	526,200	28.5	£2,735,000
1917	534,100	24.5	2,772,000
1916	436,600	24.9	.....

Ore extraction costs are 12/- ($2.88) and development 7/ ($1.74) per ton. Methods are described by Johnston in "The Mining Magazine" of September, 1917.

Equipment: complete for mining, with mill containing 50 stamps, 7 ball-mills, Edwards' roasting furnaces, fine grinding and cyanide plant of 15,000 tons monthly capacity. The power plant will be enlarged during 1920.

Production: years ended June 30:

Year	Ore treated, tons	Yield	Cost per ton
1919	85,566	£429,271	59/- ($14.24)
1918	105,452	464,102	54/- (12.96)
1917	116,883	483,911	49/3 (11.79)
1916	136,994	475,958	44/7 (10.70)

Total production to end of 1918 has yielded £5,523,749. This is one of the world's biggest gold mines, operated under peculiar difficulties.

Yukon Gold Co.—Operating profit in 1919 was $511,158, less $175,828 for interest, etc., and $1,444,015 for depletion, depreciation, and stock investments, the year resulting in a deficit of $1,108,684. There are now 3 dredges in the Yukon; 4 in California, and 1 in Idaho; while 3 have been sent to Malaya to dredge tin-bearing ground. Company is exploiting silver-lead claims in the Mayo district, 200 miles S. E. of Dawson, Yukon Territory.

Alaska

Alaska Gold Mines.—Year 1919 resulted in total operating loss of $273,397. Gold recovered averaged 66 cents per ton, which is 22 cents lower than in 1918. In 5 years the output was $7,503,740. Operations can be continued only as long as advantage is taken of extracting ore broken in stopes or prepared for mining, on which costs have already been paid, according to the president of company.

Alaska Sulphur Company.—Development and equipment under way to produce 100 tons of sulphur daily for paper mills of Northwest. Deposit is at Lost Harbor, Akun Island, S. W. Alaska. T. H. Landswick of Seattle, secretary.

Bon Alaska Mining Co.—Inc. 1916, in Washington, with capital of $1,000,000; shares $1 par, listed on New York Curb in February, 1920. Company owns 28 claims in the Wrangell district, S. E. Alaska. Ores carry silver, lead, zinc, and gold. Samples of shipping ore are said to average 31.4 oz. silver and 48.9% lead. Property considered to lie in same belt of rocks as prevail in the Portland Canal district, where the Big Missouri and Premier mines lie, over 100 miles away. Development consists of 1,500 ft. tunnels, etc. When shipping 20 tons of $100 ore daily, a profit of $1,100 is expected by management.

Gold Bullion Mine.—Reported sold in February, 1920, to Hugh Dober and L. C. Thompson of Montreal, Quebec, for $500,000. Equipment to be enlarged.

Kennecott Copper Corporation.—Dividend of 50c. paid March 31, 1920.

Arizona

Arizona Commercial Mining Co.—On No. 6 level the orebody is 40' wide carrying 6% copper, for over 100', up to April, 1920. First quarter of year yielded 1,900,000 lb. copper. Net quick assets approximate $550,000.

Arizona Copper Co., Ltd.—Production for first quarter of 1919 was 9,000,000 lb. Rumored that control of company may pass to American interests.

Calumet & Arizona Mining Co.—Operating profit for 1919 was $1,906,364, less $1,381,948 for depletion, etc., leaving $524,416 net. The surplus at end of year was $13,229,770. Production was 44,991,107 lb. copper; 995,366 oz. silver, and 28,530 oz. gold. At the Gadsden mine at Jerome, 5,619 ft. of work was done, but operations were suspended in March, 1920. Option was taken on the Cornell mine in British Columbia. First quarter of 1920 yielded 10,300,000 lb. copper. A dividend of $1 per share paid March 22, 1920.

Central Copper Co.—J. N. McCauley, pres., 71 Broadway, New York. Inc. in Arizona. Cap. $10,000,000; 50c. par. Property: 31 claims in Texas and Dos Cabezos districts, Cochise county, Arizona. Veins carry copper. Prospectus very optimistic.

Consolidated Arizona Smelting Co.—About 900,000 lb. of copper bullion shipped monthly to refiners. Operating profit in 1919 was $96,294. Surplus at end of year was $172,076.

Helvetia Copper Co.—Seven oil wells in Texas are yielding an average of 9 barrels each daily.

Inspiration Consolidated Copper Co.—Receipts from sales of copper during 1919 were $11,045,222, and expenses, $6,747,658. After allowing for depreciation, etc., net balance was $4,186,628. Surplus was reduced to $9,879,259. Ore reserves are given as 77,477,000 tons. The mill worked at 55% capacity, and gave a better recovery. Tests in leaching oxide ore are

satisfactory and are being continued. Dividend of $1.50 per share paid April 26, 1920. First quarter produced 20,900,000 lb. copper.

Iron Cap Copper Co.—Operating profit in 1919 was $249,032. Copper sold was 5,823,008 lb. Current assets are $909,251. and liabilities $323,227. Dividend of 25c. per share paid March 18, 1920. Good progress being made on new mill.

Jerome Grande Copper Co.—Selling treasury shares in March, 1920, to pay for further exploration and installation of electric plant.

Miami Copper Co.—Dividend of 50c. paid May 15, 1920. Production for first quarter was 13,500,000 lb.

Mile-Wide Copper Co.—Application made in February, 1920, to place property in hands of receiver.

New Cornelia Copper Co.—Operating profit in 1919 was $1,601,198, less $1,583,952 for depletion and depreciation, leaving $17,246 net. Sales of copper were 29,972,106 lb. The works operated satisfactorily. Production for first quarter of 1920 was 10,400,000 lb. Dividend of 25 cents a share payable May 24, 1920.

New King of Arizona Mining Co.—Formely King of Arizona, now being developed.

Old Dominion Co.—Operating profit for 1919 was $73,685, against $1,147,079 in 1918. Production was 28,166,396 lb. copper, 5,755 oz. gold, and 137,071 oz. silver. Ore reserves were increased by 440,000 tons. First quarter of 1920 yielded 6,900,000 lb.

Ray Consolidated Copper Co.—Production in 1919 was 46,746,893 lb., which sold at an average of 17.90c. Costs were 15.62c. After dividends of $2 per share, there was a deficit of $1,410,917. On March 31, 1920, a dividend of 25c. was paid. First quarter of 1920 yielded 11,600,000 lb.

Shannon Copper Co.—Net quick assets in March, 1920, were $453,598. Company may enter the oil business.

Shattuck-Arizona Copper Co.—The year 1919 resulted in a loss of $21,893. Revenue was $1,069,698. Dividends amounted to $262,500. Surplus was reduced to $1,732,365. First quarter of 1920 yielded 1,000,000 lb. copper, 1,930,000 lb. lead, 41,000 oz. silver, and 460 oz. gold.

Shea Copper Co.—Information on page 382 from reliable source, but not guaranteed.

Silver King of Arizona.—Par value of shares increased to $5, and issue of $500,000, 7%, 10-year convertible bonds sanctioned.

Superior & Boston Copper Co.—Year ending September 30, 1919, showed loss of $14,863, reducing profit and loss credit to $16,401. Surplus account was $455,101. By January 1, 1920, neither the Old Dominion nor North veins had been cut on 1,000′ level. On 1,200′ level the Eastern vein is 48′ wide, but carries only 0.4% copper. The footwall vein on 400′ level maintains its richness and width. Seventeen cars of ore yielded $38,303 from the smelter.

United Arizona Extension Mining Corporation.—Inc. March, 1920, with capital of $1,500,000, shares $1 par, to develop 13 claims near Cordes station, close to the Arizona Binghampton.

United Eastern Mining Co.—Gold production in 1919 was $2,031,594, from 97,325 tons of ore. Ore reserves are valued at $6,000,820. Dividend of 5c. paid for first quarter of 1920.

United Verde Copper Co.—Dividend of $1.50 per share paid in March, 1920.

United Verde Extension Mining Co.—The 20,000,000 lb. of copper on hand at beginning of March, 1920, was reduced to 7,000,000 lb. by end of month. Output for first quarter was 10,600,000. Gross revenue in 1919 was $3,464,924, of which $3,340,900 was operating profit. Reserves for depletion and depreciation totaled $2,359,180. The net loss was $235,156. Surplus was reduced to $5,904,068.

Arkansas.

Boston & Arkansas Mining Co.—The old Davis zinc-lead-copper mine in Sevier county is being reopened. It is fully equipped, and is in charge of C. L. Larson.

California

Argonaut Mining Co.—On account of fire in the adjoining Kennedy mine, operations were suspended in March, 1920.

Blue Ledge Mine.—This promising property almost on the Oregon boundary, in Siskiyou county, is shipping copper ore regularly to the Tacoma smelter.

Carson Hill Gold Mining Co.—In March, 1920, work on the 1,100′ level had exposed 10′ of ore averaging $56 per ton, from which daily shipments were 30 tons. The mill is being enlarged.

Central Eureka Mining Co.—The 3,500 and 3,700′ levels are opening well. Dividend of 5c. paid January 12, 1920. Reserve fund being built up.

Feather River Copper Co.—The 2,500′ tunnel is in over 500′. Electrically-driven machinery installed. Interests in the Kay Copper Co. of Arizona are behind this venture.

Gruss Mining Co.—A 1,000′ tunnel is being driven to develop a copper vein. Mill is to be remodeled.

Kennedy M. & M. Co.—On account of fire, operations were suspended in March, 1920.

Natomas Company of California.—Income from all sources in 1919 was $2,934,470, of which $167,548 was operating profit. Against this must be placed $651,674, non-operating expense. Indebtedness was reduced to $431,123, and mortgage and bonded debt to $10,751,785. Current assets at end of year were $1,036,335, and liabilities $196,123. Gold production was $1,775,124, of which $461,484 was profit.

Nevada Pacific Exploration Co.—Gold ore blocked out in this mine near Forest Hill, estimated as worth $400,000, and 50-ton mill ready. Nevada interests behind this venture.

New Idria Quicksilver Co.—Output in 1919 was 7,400 flasks. Net profit was $1,050. Better ore and market now prevailing.

North Star Mines Co.—Gold production in 1919 was $1,181,346, of which $102,856 was profit. One dividend of 4%, $100,000, was paid in June. Little development was done at the North Star, while results at the Champion promise little for the future. Costs were $18.04 per oz. of gold, compared with $9.51 in 1913.

Colorado

American Smelting & Refining Co.—The Leadville District mill was taken over on a long lease in March, 1920. It is to be remodeled to dress low grade complex ores from the Yak tunnel and other mines.

Colorado Fuel & Iron Co.—Iron mines yielded 715,145 tons of ore in 1919. Net operating profit was $4,165,366 from all sources.

Cresson Consolidated Gold M. & M. Co.—10 cents per share paid March 10, 1920, making $8,491,163 to date. Production in 1919 was $1,039,500 from 94,920 tons of ore.

Golden Cycle Mining & Reduction Co.—Dividend rate reduced from 3 to 2c. monthly in April, 1920.

Leadville Leasing Corporation.—Organized in February, 1920, by A. J. Bailey to operate four mines on Breece, Carbonate, and Idaho Park hills, Leadville. Ores carry high silver content.

Little Jonny Mine.—Gold ore from this Leadville mine is being treated at the Golden Cycle mill at Colorado Springs.

Portland Gold Mining Co.—Dividends of 2c. per quarter reduced to 1½c. in 1920. New orebody on 2,300′ level shows 4 to 5′ of 1 oz. ore.

San Juan Silver Syndicate.—Organized to develop claims near Ouray. Considered by promoters to be a "double-barrelled opportunity."

Sunnyside M. & M. Co.—Surface equipment burned in April, 1919, rebuilt, and in April, 1920, the mill was dressing 500 tons of ore daily, employing 350 men. The gold-silver-lead-copper-zinc-iron ore is concentrated by flotation.

Tonopah Placers Co.—Three dredges moved 3,122,571 cu. yd. in 1919, averaging 9.8 cents per yard. The profit was $16,284, plus $6,788 from miscellaneous items.

Vindicator Consolidated Gold Mining Co.—First quarterly dividend in 1920 passed.

Idaho

Bunker Hill & Sullivan Mng. and Conc. Co.—Dividends in 1919 were 1,144,500, and $490,500 in first quarter of 1920, making $23,659,470 to date.

Callahan Zinc-Lead Co.—New name for Consolidated Interstate- Callahan M. Co. First quarter of 1920 yielded 23,780,000 lbs. of zinc concentrate, 020,000 lb. lead concentrate, and 82,090 oz. silver.

Federal Mining & Smelting Co.—Four mines were operated during 919, two in Idaho and two in Oklahoma. Reserves in the Morning mine t Mullan are 1,088,600 tons, and in the Independence at Hailey, are 53,000 ons. These mines produced 172,330 and 13,380 tons, respectively. Receipts om all sources were $2,474,864, and expenses $1,756,718. Dividends absorbed 49,479. Quick assets at end of year were $1,708,531 in excess of liabilities. rospects for 1920 are considered bright, on account of the lead, silver, and ic markets.

ERRATA: Hecla Mining Co.—On page 701, in the table, the column der 1919 should read.

Ore sales, etc	$1,692,771
Operating charges	1,066,232
Net profit	626,539
Dividends	600,000
Current assets	1,822,226
Current liabilities	63,318

On Hecla's 2,000' level, 3' of high-grade lead-silver ore was cut in February, 1920. Dividend of 20c. a share payable June 28, 1920.

Hercules Mining Co.—Shipping ore to Bunker Hill smelter in February, 0. instead of to Northport, Wash.

Nabob Consolidated Mining Co.—Milling resumed in March, 1920. ares to be listed on New York Curb.

National Copper Mining Co.—Operations finally stopped early in April, 0, and equipment to be sold.

Yukon Gold Co.—Dredge during 1919 dug 1,519,035 cu. yd. averaging 9c., at cost of 9.05c. per yard.

Michigan

Ahmeek Mining Co.—Dividend of 50c. a share paid March 31, 1920. earnings in 1919 were $640,424. Production was 17,223,111 lb. copper, hich 12,167,613 lb. was delivered at average of 18.81c. Costs were 14.02c.

Allouez Mining Co.—The year 1919 resulted in a loss of $73,738, equal 98c. per lb. on the 3,020,067 lb. delivered.

Arcadian Consolidated Mining Co.—Work resumed in April, 1920. ipany is financed for 2 years' exploration.

Calumet & Hecla Mining Co.—First 3 months of 1920 yielded 16,600,000 opper. Large shipments of metal being made. Copper delivered in realized $5,263,076, but expenses on same were $5,666,726. Total operloss was $652,286. The year ended with a surplus of $241,659.

Franklin Mining Co.—The year 1919 resulted in a deficit of $192,930. uction was suspended in May. The output was 1,062,879 lb. On No. id 19 levels 200,000 tons of good ore reported awaiting extraction.

Hancock Consolidated Mining Co.—Initial shipment in February, 1920, 700 tons of ore to mill yielded 15 lb. (0.75%) copper per ton. Results o. 44 level reported encouraging.

Indiana Mining Co.—Deficit for 1919 was $10,020. Property has been idle since May, 1918. It is well equipped.

Isle Royale Copper Co.—Operating at 60% capacity, production being at rate of 13,000,000 lb. per annum. Quick assets in February, 1920, were about $1,800,000 net. No dividend paid in first quarter. Net earnings in 1919, before deducting taxes, etc., were $416,491. Production was 13,007,66[illegible] lb. of which 8,834,380 lb. was sold at 18.6c. per lb. Costs were 15.8 cents.

Keweenaw Copper Co.—No exploration was done in 1919. Investments amount to $1,724,201.

Mass Consolidated Mining Co.—Mine still closed. Copper on hand in February, 1920, was 1,000,000 lb. Timber and surface rights on 600 acres sold for $25,000.

Mayflower-Old Colony Copper Co.—Assessments and interest during 1919 totaled $109,993. Exploration cost $99,386. Balance on January 1, 1920, was $14,823. Assessments in 1920, to March 17, realized $128,000. Driving on 1,709' level said to be encouraging.

Mohawk Mining Co.—Good ore first opened on 22nd level of No. 4 shaft north persists to 25th. Copper output averaging 1,000,000 lb. monthly. Operating costs in 1919 totaled 9c. a pound. Financial position is strong. Dividend of $1.50 paid on May 1, 1920.

Naumkeag Copper Co.—Assessment of 50c. a share on November 1, 1919, realized $35,186. Results of work on the Pewabic lode at 1,000' depth were so discouraging in January, 1920, that work was stopped there, and started at the adit level to crosscut the whole Pewabic series.

Osceola Consolidated Mining Co.—Production in 1919 was 10,824,[illegible] lb., of which 7,766,460 lb. was delivered at 18.65c. Costs were 18.08c. Net profit after allowing for depreciation was $112,559.

Quincy Mining Co.—A dividend of $1 per share paid March 29, 1920.

St. Mary's Mineral Land Co.—The sale of 6,302 acres of timber land realized $216,875. Dividends received from the Champion mine were $[illegible] per share. Cash at end of 1919 amounted to $95,953, against $206,16[illegible] a year ago.

Seneca Copper Corporation.—Second mill test of 715 tons in February, 1920, averaged 57 lb. (2.85%) copper per ton of ore. Shipments to Baltic mill to be resumed in May. Report by R. A. Parker of Denver, says that the Kearsarge lode has been opened on 3 levels as rich and wide as in adjoining mines, and within 2 years the mine should be on a good paying basis.

South Lake Mining Co.—Production was not resumed during 1919. Physical condition of mine is reported good. Current liabilities exceeded assets by $150,316 at end of year. $2 per share of the unpaid subscription to capital stock payable March 22, 1920.

Superior Copper Co.—Year 1919 resulted in loss of $92,938. Production was 563,935 lb. Metal sold realized 18.67c., and costs were 31.57c. per lb. Net current assets are $539,444, mostly cash or equivalent.

Victoria Copper Mining Co.—Production in 1919 was 1,245,590 lb. copper from 89,206 tons of ore, equal to a 0.69% yield. The year resulted in a loss of $35,808. Current assets are $395,096, and liabilities $262,385. Development was considered satisfactory.

Winona Copper Co.—Work was suspended in February, 1919, and the yield was only 561,238 lb. Revenue was $113,390, and expenditure $200,[illegible]. First two months of 1920 yielded 339,000 lb. copper. In March there were 300,000 lb. unsold.

Wolverine Copper Mining Co.—Regular dividend for March, 1920, passed. Output for first 2 months was 510,000 lb.

Missouri

American Zinc, Lead & Smelting Co.—New zinc-lead deposits discovered 10 miles S. of Joplin, and extensive drilling under way.

Eagle-Picher Lead Co.—Drilling new zinc-lead deposits 10 miles S. of Joplin.

St. Joseph Lead Co.—Owing to great demand for lead, company's works are at full capacity.

Underwriters Land Co.—Drilling new zinc-lead deposits 10 miles S. of Joplin.

United Zinc Smelting Corporation.—Capacity of works at Moundsville, W. Va., being doubled.

Montana

Anaconda Copper Mining Co.—A dividend of $1 per share, payable May 24, 1920, making $2 for current year. Production for first quarter was 55,000,000 lb. The Emma mine is producing 15% zinc and 8 oz. silver ore, also 150 tons daily of manganese ore, to be increased three times. The ferro-manganese plant at Great Falls is in operation, where also superphosphate is being made, and the copper rod mill working to capacity.

Barnes-King Development Co.—Gold production in February, 1920, was $42,377. Directors decided in March to buy 17,500 shares, at $1 each, of the Kansas-Montana Oil & Gas Co., which is drilling a well for oil in Fergus county, Montana. Oil is expected at depth of 2,400 feet.

Boston & Montana Development Co.—Recent developments are reported as encouraging. Regular shipments of ore being made. Foundations for mill complete.

Butte & Superior Mining Co.—Net profit in 1919 was $864,989, after allowance for depreciation and depletion ($916,272). Monthly production running 13,000,000 lb. zinc and 210,000 oz. silver. Earnings in January and February, 1920, at rate of $9 per share per annum. Net quick assets approximate $3,000,000. Settlement over flotation patents not expected for several months.

Butte Copper & Zinc Co.—Regular shipments of manganese and zinc ore being made from the Emma mine under the 50-50 working agreement with the Anaconda company.

Davis-Daly Copper Co.—Daily output in April, 1920, was 400 tons of 2% copper ore. Good developments reported on 2,700′ level. Net profit January was $27,000. Dividend of 25c. paid March 30. Financial position good.

East Butte Copper Mining Co.—Production in 1919 was 146,542 tons ore, yielding 19,987,733 lb. copper, 698,146 oz. silver, and 1,013 oz. gold. Gross income was $4,342,390. Net profit was $524,189. Costs were 16.58c. pound. An interest has been taken in property near Tonopah, Nevada; the Mule Creek oil field of Wyoming; also in Kansas and Oklahoma.

Elm Orlu Mining Co.—In apex dispute with Anaconda over part of the Pilot Butte copper vein, ground being examined and compromise probable.

North Butte Mining Co.—Monthly production in 1920 at rate of 1,800,000 Development at 3,200′ depth on Edith May vein is good. The East Side properties are producing ore. Net cash assets approximate $1,700,000.

Nevada

Arizona Silver Mining Co. and associated companies.—Certain Boston brokers who were very active in an advertising campaign in these shares were arrested under the Massachusetts law in March, 1920, and fined up to $200 each on April 21.

Bluestone M. & S. Co.—Sales of metals during 1919 realized $494,913. There was a net loss of $248,601.

Gold Zone Divide Mining Co.—Report of February 2, 1920, states that 36′ of new work was done on the 500′ level. Drift on what is supposed to be the Divide fissure cut a vein 40′ wide assaying $6 per ton across full width. N. E. and S. W. drifts, and a 100′ winze are being driven to determine pitch of the vein. Property is well equipped.

Jim Butler Tonopah Mining Co.—Net profit for 1919 was $28,563. Ore production was only 5,711 tons, averaging $23.48 per ton. Total costs were $15.08. Results were not encouraging, and only small profits may be expected for 1920.

Nevada Consolidated Copper Co.—Dividend of 25c. paid March 31, 1920. First quarter of year produced about 12,000,000 lb. copper. Net profit for 1919 was $1,225,357, Total surplus was reduced to $8,160,533.

Red Hill Florence Mining Co.—Assessment No. 5, of 1½c. per share, payable February 10, 1920. Receipts in 1919 were $28,214, including $24,7[illegible] from assessments. Mine development cost $20,090. Cash on January 1, 1920, was $6,888. Physical condition of the mine is considered encouraging.

Rochester Nevada Silver Mines Co.—Name changed to Rochester Silver Corporation. Capital, $2,000,000; shares $1 par. The relative equities of the 3 companies consolidated remain unaltered from original scheme. At beginning of 1920, net current assets were $142,383. Last quarter of 1919 yielded a profit of $71,722 from 13,923 tons of $14.30 ore. Costs are $9.14 per ton, but are expected to be reduced to $7.25. Ore reserves are equal to 200 tons a day for one year.

Simon Silver-Lead Mines Co.—Capital increased in April, 1920, from $1,500,000 to $2,000,000; shares $1 par.

Tonopah Belmont Development Co.—Net profit in 1919 was $569,80[illegible] Ore reserves are larger than in previous year. Price received for silver was 10 cents per ounce higher than in 1918, but costs were 15 cents more.

Tonopah Divide Mining Co.—Former directors re-elected in April, 192[illegible] Report for full year 1919, dated April 10, 1920, shows that 1,012,800 shares are outstanding. Cash assets exceed liabilities by about $31,000. Ore shipments amounted to 9,612 tons, averaging $29.35 per ton. Costs were $19.[illegible] per ton. New work covered 4,605', making 7,578' to date. The shaft was sunk 217', and is 585' deep, where leaching and oxidation continue unchanged. The lower levels have failed to open the high-grade ore opened above. Reserves are estimated at 52,000 tons averaging 20 oz. silver and 0.08 oz. gold, and 16,000 tons carrying 5.12 oz. silver and 0.125 oz. gold. The total value is about $1,500,000.

Tonopah Extension Mining Co.—Dividend of 5 cents a share paid April 1, 1920. Development continues satisfactory, and in the Victor section, [illegible] veins—8, 6, and 13' wide, respectively, have been opened to the 1,760' level.

Tonopah Mining Co.—Net earnings and income during 1919 were $402,207. Dividends totaled $300,000. Net value of investments, cash, supplies, loans to subsidiaries, etc., totals $5,381,247. Output was 41,298 tons of $18.74 ore. Costs totaled $6.37 per ton. Ore reserves are undeterminable, but should supply the mill with 150 tons daily for about one year.

New Mexico

Chino Copper Co.—Output in 1919 was 40,488,706 lb., and net operating profit on $1,038,908. After paying dividends, there was a deficit of $1,501,44[illegible] Surplus of quick assets reduced to $4,444,384 at end of 1919. First quarter of 1920 yielded 11,300,000 lb.

South Dakota

Homestake Mining Co.—Operations gradually returning to normal after the fire and flooding of mine. No dividends paid so far in current year.

National Tin Corporation.—Work resumed in February, 1920, and ore sent to mill.

Trojan Mining Co.—Mill working at full capacity.

Tennessee

Tennessee Copper & Chemical Corp.—Three contracts for three years each have been made for sale of sulphuric acid at about $10 per ton.

Report for 1919 states that 413,877 tons of ore yielded 10,407,228 lb. copper at cost of 18.715c. per lb. After allowing for operating expenses and interest there was a loss of $325,379. Current assets are $6,255,097, and liabilities, $1,022,399. Ore reserves total 3,273,645 tons. Acid production was 266,627 tons.

Utah

Bingham Mines Co.—Net income from all sources in 1919 was $80,306. Dividends totaled $112,000. Previous surplus of $365,877 was reduced to 261,231. The mines are responding to the intensive development campaign.

Daly West Mining Co.—Metals sold in 1919 realized $179,910. Surplus was reduced by $21,647. Cash balance on January 1, 1920, was $141,979. After lapse of 7 years, a dividend of 15 cents paid April 1. The new development campaign has been most satisfactory.

Eagle & Blue Bell Mining Co.—Dividend of 10c. a share paid April 10, 1920.

Judge Mining & Smelting Co.—Receipts from metals, etc., were $724,898 during 1919, and expenses $588,692. At end of year the cash balance was 148,385, plus $135,000 for unsold zinc. Dividend No. 36, of 12½c. per share, was paid April 1, 1920. Physical condition of mine is good for large output, and a continuous run is assured for the remodeled zinc plant.

Moscow M. & M. Co.—Property consolidated with that of Red Warrior and Beaver Combination companies, and new company organized under name of Moscow Silver Mines Co.

Silver King Consolidated Mining Co.—Net value of ore mined in 1919 was $275,970. Dividends amounted to $70,000.

Utah Consolidated Mining Co.—Exploration covered 17,407'. Reserves are 848,000 tons of copper ore and 38,400 tons of lead ore. Production was 710,346 lb. copper, 13,072,177 lb. lead, 10,548 oz. gold, and 373,180 oz. silver. Profit for 1919 was $181,966. Current assets at end of year were $2,135,907, and liabilities $204,220.

Utah Copper Co.—Monthly production in 1920 at rate of over 9,000,000 pounds.

Wyoming

Quin "B" Mining Co.—Office: Equitable Bldg., Baltimore, Md. Incorporated in Arizona in 1916, with capital of $500,000; $1 par; and owns 5 claims Carbon county, Wyoming. A 275' tunnel is said to have opened half a million tons of 3% copper ore.

Canada

British Columbia

Granby Consolidated Mining, Smelting & Power Co.—New issue of 7-year 8% convertible debentures on market, April, 1920. Copper production at rate of 2,000,000 lb. monthly, all from the Anyox property. Proposed to concentrate the remaining ore at Phoenix.

Manitoba

Mandy Mining Co.—Gross value of 8,482 tons of copper ore sent to Trail, B. C., during 1919 was $629,666. Net income was $217,452. Surplus at end of year was $168,318. Production for 1920 will be about 9,000 tons of ore. Equipment sold in March, 1920, to syndicate developing the Flin Flon property.

Nova Scotia

Bradford Mines, Ltd.—Office: Halifax, N. S. Inc. in Nova Scotia, with capital of $1,000,000, shares $1 par, 430,000 issued. To develop 264 acres of mineral ground in the Tangier district, 40 miles by water from Halifax. Ore is gold bearing, and is free milling. There are said to be a large number

of veins, estimated to contain 750,000 tons of $15 ore. Deepest workings are at 600'. Property is fully equipped, including electric power and mill. Estimated net earnings are $141,823 per annum, plus revenue from sale of power.

Ontario

Beaver Consolidated Mines.—Profit in 1919 was $158,216, and balance at credit of profit and loss account was increased to $1,049,081. Holdings in Kirkland Lake Gold M. Co. are placed at $362,262. Production was 301,781 oz. silver. Broken ore in mine is valued at $231,264. Development was satisfactory.

Gifford-Cobalt Mine.—Work probably to be resumed in summer of 192

Keeley Silver Mines, Ltd.—Subsidiary of Associated Gold Fields of Western Australia was organized in March, 1920, to develop the Keeley mine in the South Lorrain area near Cobalt.

Kerr Lake Mines.—Report of March 16, 1920, states that on Febru 29, cash and securities were valued at $2,415,027, equal to $4 per sha Production for first 2 months of year was 213,234 oz. silver. A fu equipped silver mine, in Utah, with 87,000 tons of 18 oz. ore, also a gra property in New Zealand, with an estimated profit of $3,436,000, now be equipped with a dredge, have been acquired.

King Kirkland Gold Mines, Ltd.—Incorporated, April 1920, to ope in Kirkland Lake district.

Kirkland Lake Gold Mining Co.—Operations in 1919 were hampere by a strike. Reserves are sufficient for the new 150-ton mill for 2 years.

La Rose Mines.—Profit for 1919 was $51,736. Surplus was $514,424.

Ontario Smelters & Refiners.—Company operates plant of Standard & R. Co. at Chippewa, Ontario; also owns land in the Temiskaming distri Capital is $750,000, of which $500,000 is outstanding. In March, 1920, $250,0 of 7% first-mortgage bonds were offered. Annual turnover is estimated $440,000.

Silver Islet Mine.—The Nepigan Mining & Lands Co., owner of t mine, on an island in Lake Superior, near Port Arthur, first worked in 18 has granted an option to American interests. Considerable ore is said be available for mining.

Thompson-Krist Gold Mining Co.—Being consolidated with the Por pine-Crown company in April, 1920.

Mexico

Sonora.

Canario Copper Co.—Capital increased from $2,000,000 to $20,000,00 December, 1919, and par value of shares from $1 to $10.

El Fuerte M. & S. Co.—Acquired smelter of Choix Consolidated M. C and obtained lease on part of latter's mines in 1920.

Greene Cananea Copper Co.—Production in first quarter of 1920, 10,100,000 lb. copper and 405,000 oz. silver.

South America

Chile

Chile Copper Co.—Year 1919 resulted in an operating profit of $1,26 but after paying interest, etc., there was a deficit of $1,720,165. Produc in January, 1920, was 7,500,000 lb.

Peru

Cerro De Pasco Mining Co.—Monthly production in 1920 averag 4,600,000 lb. copper. Total income in 1919 was $23,917,308, of which $2,28 was profit, after deducting operating charges, depletion, depreciation, in est, and taxes. Dividends amounted to $3,592,909. Surplus is $10,273

Electrolytic Copper — **N E C & B M Brands**

Best Selected Copper — **A B S & M A Brands**

Pig Lead—Desilverized. Common and Corroding — **International (I.L.R.Co.)**

Electrolytic Zinc—Highest Grade and Purity — **Anaconda Electric**

Selenium, Arsenic, Nickel Salts, Tellurium

INCO NICKEL — INCO — INCO MONEL METAL

NICKEL—Shot—High and low carbon. Ingots—two sizes. 25 lbs., 50 lbs. Electrolytic Nickel—99.80%. Produced as Rods, Sheets, Strip Stock, Wire and Tubes.

MONEL METAL—We are SOLE PRODUCERS of this natural alloy of nickel and copper. It is as strong as steel—withstands alkalies, high temperatures, most acids, corrosion and the erosive action of superheated steam.

The name Monel is given to a line of metal products developed from a natural nickel alloy—67% nickel, 28% copper and 5% other metals. These products include Monel rods, Monel castings, Monel wire, Monel strip stock, Monel sheets, etc.

Send inquiries direct.

The Metal Stocks

OUR Statistical and Information Department specializes in compiling information of value to shareholders and prospective investors in the metal stocks. This department is in charge of a graduate mining engineer of many years experience. There is also a field engineer who travels constantly among mines, mining camps and oil fields securing first-hand information and reports on the various properties in the stocks of which investors and traders are interested.

THIS service enables prospective shareholders to secure unprejudiced and unbiased reports on the condition of properties in which they are thinking of investing. The many rumors which abound are also in this way sifted down to the actual facts so far as available.

THE knowledge and experience of these technical men and their assistants are at the disposal of investors, who are invited to make use of this service whenever they desire.
